(2.) Sections in which Jehovah occurs exclusively, or in preference to Elohim: iv (Cain and Abel, and Cain's posterity), where Jehovah ten times and Elohim only once; vi, 1-8 (the sons of God and the daughters of men, etc.); vii, 1-9 (the entering into the ark), but Elohim once, ver. 9; viii, 20-22 (Noah's altar and Jehovah's blessing); ix, 18-27 (Noah and his sons); x (the families of mankind as descended from Noah); xi, 1-9 (the confusion of tongues); xii, 1-2) (Abram's journey first from Haran to Canaan, and then into Egypt); xiii (Abram's separation from Lot); xv (Abram's faith, sacrifice, and covenant); xvi (Hagar and Ishmael), where  $\text{אֱלֹהִים}$  once; xviii-xix, 28 (visit of the three angels to Abram, Lot, destruction of Sodom and Gomorrah); xxiv (betrothal of Rebekah and Isaac's marriage); xxv, 19-xxvi, 35 (Isaac's sons, his visit to Abimelech, Esau's wives); xxvii, 1-40 (Jacob obtains the blessing), but in ver. 28 Ha-elohim; xxx, 25-43 (Jacob's bargain with Laban), where, however, Jehovah only once; xxxviii (Judah's incest); xxxix (Jehovah with Joseph in Potiphar's house and in the prison). [Exod. iv, 18-31 (Moses's return to Egypt); v (Pharaoh's treatment of the messengers of Jehovah).]

(3.) The section Gen. ii, 4-iii, 24 (the account of Paradise and the Fall) is generally regarded as Jehovistic, but it is clearly quite distinct. The divine name as there found is not Jehovah, but Jehovah Elohim (in which form it only occurs once beside in the Pentateuch, Exod. ix, 38), and it occurs twenty times; the name Elohim being found three times in the same section, once in the mouth of the woman, and twice in that of the serpent.

(4.) In Gen. xiv the prevailing name is El-Elyon (Auth. Vers. "the most high God"), and only once, in Abram's mouth, "Jehovah, the most high God," which is quite intelligible.

(5.) Some few sections are found in which the names Jehovah and Elohim seem to be used promiscuously. This is the case in xxii, 1-19 (the offering up of Isaac); xxviii, 10-22 (Jacob's dream at Bethel); xxix, 31-xxx, 24 (birth and naming of the eleven sons of Ja-

cob); and xxxii (Jacob's wrestling with the angel). [Exod. iii, 1-iv, 17 (the call of Moses).]

(6.) It is worthy of notice that of the other divine names Adonai is always found in connection with Jehovah, except Gen. xx, 4; whereas El, El-Shaddai, etc., occur most frequently in the Elohist sections.

(7.) In the following sections neither of the divine names occur: Gen. xi, 10-32; xxii, 20-24; xxiii; xxv, 27-34; xxvii, 40-45; xxix, 1-30; xxxiv; xxxv; xxxvii; xl [Exod. ii, 1-22].

IV. The *historical* character of the contents of Genesis forms a more comprehensive subject of theological discussion. It is obvious that the opinions regarding it must be principally influenced by the dogmatical views and principles of the respective critics themselves. Hence the great variety of opinion that still prevails on that subject. Some, as Vatke, Von Bohlen, and others, assert that the whole contents of Genesis are unhistorical. Tuch and others consider Genesis to be interwoven with mythical elements, but think that the rich historical elements, especially in the account of the patriarchs, can be clearly discerned. Some, again, limit the mythological part to the first two chapters only; while others perceive in the whole book a consistent and truly historical impress. The field of controversy is here so extensive, and the arguments on both sides are so numerous, that we must content ourselves in this article with a very few remarks on the subject.

Genesis is a book consisting of two contrasting parts; the first introduces us into the greatest problems of the human mind, such as the creation and the fall of man; and the second into the quiet solitude of a small, defined circle of families. In the former, the most sublime and wonderful events are described with child-like simplicity; while in the latter, on the contrary, the most simple and common occurrences are interwoven with the sublimest thoughts and reflections, rendering the small family circle a whole world in history, and the principal actors in it prototypes for a whole nation and for all times. Not the least trace of mythology appears in it. Genesis plainly shows how very far remote the Hebrew mode of thinking was from mythical poetry, which might have found ample opportunity of being brought into play when the writer began to sketch the early times of the Creation. It is true that the primeval wonders, the marvellous deeds of God, are the very subject of Genesis. None of these wonders, however, bear a fantastical impress, and there is no useless prodigality of them. They are all penetrated and connected by one common leading idea, and all are related to the counsel of God for the salvation of man. This principle sheds its lustrous beams through the whole of Genesis; therefore the wonders therein related are as little to be ascribed to the invention and imagination of man as the whole plan of God for human salvation. The foundation of the divine theocratic institution throws a strong light upon the early patriarchal times; the reality of the one proves the reality of the other, as described in Genesis.

Luther used to say, "Nihil pulchrius Genesi, nihil utilius." But hard critics have tried all they can to mar its beauty and to detract from its utility. In fact, the bitterness of the attacks on a document so venerable, so full of undying interest, hallowed by the love of many generations, makes one almost suspect that a secret malevolence must have been the mainspring of hostile criticism. Certain it is that no book has met with more determined and unsparing assailants. To enumerate and to reply to all objections would be impossible. We will only refer to some of the most important.

1. The story of Creation, as given in the first chapter, has been set aside in two ways: first, by placing it on the same level with other cosmogonies which are to be found in the sacred writings of all nations; and

next, by asserting that its statements are directly contradicted by the discoveries of modern science.

(a.) Now when we compare the Biblical with all other known cosmogonies, we are immediately struck with the great *moral* superiority of the former. There is no confusion here between the divine Creator and his work. God is before all things, God creates all things; this is the sublime assertion of the Hebrew writer. On the contrary, all the cosmogonies of the heathen world err in one of two directions: either they are dualistic, that is, they regard God and matter as two eternal co-existent principles; or they are pantheistic, i. e. they confound God and matter, making the material universe a kind of emanation from the great Spirit which informs the mass. Both these theories, with their various modifications, whether in the more subtle philosophemes of the Indian races, or in the rougher and grosser systems of the Phœnicians and Babylonians, are alike exclusive of the idea of creation. Without attempting to discuss in anything like detail the points of resemblance and difference between the Biblical record of creation and the myths and legends of other nations, it may suffice to mention certain particulars in which the superiority of the Hebrew account can hardly be called in question. First, the Hebrew story alone clearly acknowledges the personality and unity of God. Secondly, here only do we find recognised a distinct act of creation, by creation being understood the calling of the whole material universe into existence out of nothing. Thirdly, there is here only a clear intimation of that great law of progress which we find everywhere observed. The *order* of creation, as given in Genesis, is the gradual progress of all things, from the lowest and least perfect to the highest and most completely developed forms. Fourthly, there is the fact of a relation between the personal Creator and the work of his fingers, and that relation is a relation of love; for God looks upon his creation at every stage of its progress, and pronounces it very good. Fifthly, there is throughout a sublime simplicity which of itself is characteristic of a history, not of a myth or of a philosophical speculation. See CREATION.

(b.) It would occupy too large a space to discuss at any length the objections which have been urged from the results of modern discovery against the literal truth of this chapter. One or two remarks of a general kind must here suffice. It is argued, for instance, that light could not have existed before the sun, or, at any rate, not that kind of light which would be necessary for the support of vegetable life; whereas the Mosaic narrative makes light created on the first day, trees and plants on the third, and the sun on the fourth. To this we may reply, that we must not too hastily build an argument upon our ignorance. We do not *know* that the existing laws of creation were in operation when the creative fiat was first put forth. The very act of creation must have been the introducing of laws; but when the work was finished, those laws must have suffered some modification. Men are not now created in the full stature of manhood, but are born and grow. Similarly, the lower ranks of being might have been influenced by certain necessary conditions during the first stages of their existence, which conditions were afterwards removed without any disturbance of the natural functions. Again, it is not certain that the language of Genesis can only mean that the sun was *created* on the fourth day. It *may* mean that then only did that luminary become visible to our planet.

With regard to the six days, many have thought that they ought to be interpreted as six periods, without defining what the length of those periods is. No one can suppose that the divine rest was literally a rest of twenty-four hours only. On the contrary, the divine Sabbath still continues. There has been no *creation* since the creation of man. This is what Genesis teaches, and this geology confirms. But God, after six periods of creative activity, entered into that

Sabbath in which his work has been, not a work of creation, but of redemption (John v, 17). No attempt, however, which has as yet been made to identify these six periods with corresponding geological epochs can be pronounced satisfactory. See GEOLOGY. On the other hand, it seems rash and premature to assert that no reconciliation is possible. What we ought to maintain is, that no reconciliation is necessary. It is certain that the author of the first chapter of Genesis, whether Moses or some one else, knew nothing of geology or astronomy. It is certain that he made use of phraseology concerning physical facts in accordance with the limited range of information which he possessed. It is also certain that the Bible was never intended to reveal to us knowledge of which our own faculties, rightly used, could put us in possession. We have no business, therefore, to expect anything but popular language in the description of physical phenomena. Thus, for instance, when it is said that by means of the firmament God divided the waters which were above from those which were beneath, we admit the fact without admitting the implied explanation. The *Hebrew* supposed that there existed vast reservoirs above him corresponding to the "waters under the earth." We know that by certain natural processes the rain descends from the clouds. But the *fact* remains the same that there are waters above as well as below. Further investigation may perhaps throw more light on these interesting questions. Meanwhile it may safely be said that modern discoveries are in no way opposed to the great outlines of the Mosaic cosmogony. That the world was created in six stages, that creation was by a law of gradual advance, beginning with inorganic matter, and then advancing from the lowest organisms to the highest, that since the appearance of man upon the earth no new species have come into being; these are statements not only not disproved, but the two last of them at least amply confirmed by geological research.

2. To the description of Paradise, and the history of the Fall and of the Deluge, very similar remarks apply. All nations have their own version of these facts, colored by local circumstances, and embellished according to the poetic or philosophic spirit of the tribes among whom the tradition has taken root. But if there be any one original source of these traditions, any root from which they diverged, we cannot doubt where to look for it. The earliest record of these momentous facts is that preserved in the Bible. We cannot doubt this, because the simplicity of the narrative is greater than that of any other work with which we are acquainted. This simplicity is an argument at once in favor of the greater antiquity, and also of the greater truthfulness of the story. It is hardly possible to suppose that traditions so widely spread over the surface of the earth as are the traditions of the Creation, the Fall, and the Deluge, should have no foundation whatever in fact. It is quite as impossible to suppose that that version of these facts, which in its moral and religious aspect is the purest, is not also, to take the lowest ground, the most likely to be true.

(1.) Opinions have differed whether we ought to take the story of the Fall in Gen. iii to be a literal statement of facts, or whether, with many expositors since the time of Philo, we should regard it as an allegory, framed in child-like words as befitting the childhood of the world, but conveying to us a deeper spiritual truth. But in the latter case we ought not to deny that spiritual truth. Neither should we overlook the very important bearing which this narrative has on the whole of the subsequent history of the world and of Israel. Delitzsch well says, "The story of the Fall, like that of the Creation, has wandered over the world. Heathen nations have transplanted and mixed it up with their geography, their history, their mythology, although it has never so completely changed form, and color, and spirit that you cannot recognise it.

Here, however, in the Law, it preserves the character of a universal, human, world-wide fact; and the groans of Creation, the Redemption that is in Christ Jesus, and the heart of every man, conspire in their testimony to the most literal truth of the narrative." See FALL OF MAN.

(2.) The universality of the Deluge, it may be proved, is quite at variance with the most certain facts of geology. But then we are not bound to contend for a universal deluge. The Biblical writer himself, it is true, supposed it to be universal, but that was only because it covered what was then the known world: there can be no doubt that it did extend to all that part of the world *which was then inhabited*; and this is enough, on the one hand, to satisfy the terms of the narrative, while, on the other, the geological difficulty, as well as other difficulties concerning the ark, and the number of animals, disappears with this interpretation. See DELUGE.

3. When we come down to a later period in the narrative, where we have the opportunity of testing the accuracy of the historian, we find it in many of the most important particulars abundantly corroborated.

(1.) Whatever interpretation we may be disposed to put on the story of the confusion of tongues, and the subsequent dispersion of mankind, there is no good ground for setting it aside. Indeed, if the reading of a cylinder recently discovered at Birs Nimrûd may be trusted, there is independent evidence corroborative of the Biblical account. But, at any rate, the other versions of this event are far less probable (see these in Josephus, *Ant.* i, 4, 3; Euseb. *Præp. Ev.* ix, 14). The later myths concerning the wars of the Titans with the gods are apparently based upon this story, or rather upon perversions of it. But it is quite impossible to suppose, as Kalisch does (*Genesis*, p. 313), that "the Hebrew historian converted that very legend into a medium for solving a great and important problem." There is not the smallest appearance of any such design. The legend is a perversion of the history, not the history a comment upon the legend. The incidental remark concerning the famous giants, the progeny of the "sons of God" and the "sons of men" (Gen. vi, 4), seems to be the true key to the demigod heroes of ancient mythology.

(2.) As to the fact implied in this dispersion, that all languages had one origin, philological research has not as yet been carried far enough to lead to any very certain result. Many of the greatest philologists (Bopp, Lepsius, Burnouf, etc.; Rénan, *Histoire des Langues Semitiques*, l. v, c. 2, 3) contend for real affinities between the Indo-European and the Shemitic tongues. On the other hand, languages like the Coptic (not to mention many others) seem at present to stand out in complete isolation. The most that has been effected is a classification of languages into three great families. This classification, however, is in exact accordance with the threefold division of the race in Shem, Ham, and Japhet, of which Genesis tells us. See PHILOLOGY (COMPARATIVE).

(3.) Another fact which rests on the authority of the earlier chapters of Genesis, the derivation of the whole human race from a single pair, has been abundantly confirmed by recent investigations. For the full proof of this, it is sufficient to refer to Pritchard's *Physical History of Mankind*, in which the subject is discussed with great care and ability. See ADAM.

(4.) One of the strongest proofs of the *bonâ-fide* historical character of the earlier portion of Genesis is to be found in the valuable ethnological catalogue contained in chap. x. Knobel, who has devoted a volume (*Die Völkertafel der Genesis*) to the elucidation of this document, has succeeded in establishing its main accuracy beyond doubt, although, in accordance with his theory as to the age of the Pentateuch, he assigns to it no greater antiquity than between 1200 and 1000 B.C. See ETHNOLOGY.

Of the minute accuracy of this table we have abundant proof: for instance (Gen. x, 4), Tarshish is called the son of Javan. This indicates that the ancient inhabitants of Tarshish or Tartessus in Spain were erroneously considered to be a Phœnician colony like those of other towns in its neighborhood, and that they sprang from Javan, that is, Greece. That they were of Greek origin is clear from the account of Herodotus (i, 163). Also (ver. 8), Nimrod, the ruler of Babel, is called the son of *Cush*, which is in remarkable unison with the mythological tales concerning *Bel* and his Egyptian descent (comp. Diodor. Sic. i, 28, 81; Pausanias, iv, 23, 5). *Sidon* alone is mentioned (ver. 15), but not *Tyrus* (comp. xlix, 13), which arose only in the time of Joshua (Josh. xix, 29); and that Sidon was an older town than Tyrus, by which it was afterwards eclipsed, is certified by a number of ancient reports (comp. Hengstenberg, *De Rebus Tyriorum*, p. 6, 7).

4. With the patriarchal history (xii sq.) begins a historical sketch of a peculiar character. The circumstantial details in it allow us to examine more closely the historical character of these accounts. The numerous descriptions of the mode of life in those days furnish us with a very vivid picture. We meet everywhere a sublime simplicity quite worthy of patriarchal life, and never to be found again in later history. One cannot suppose that it would have been possible in a later period, estranged from ancient simplicity, to invent such a picture.

The authenticity of the patriarchal history could be attacked only by analogy, the true historical test of negative criticism; but the patriarchal history has no analogy; while a great historical fact, the Mosaic theocracy itself, might here be adduced in favor of the truth of Genesis. The theocracy stands without analogy in the history of the human race, and is, nevertheless, true above all historical doubt. But this theocracy cannot have entered into history without preparatory events. The facts which led to the introduction of the theocracy are contained in the accounts of Genesis. Moreover, this preparation of the theocracy could not consist in the ordinary providential guidance. The race of patriarchs advances to a marvellous destination; the road also leading to this destination must be peculiar and extraordinary. The opponents of Genesis forget that the marvellous events of patriarchal history which offend them most, partake of that character of the whole by which alone this history becomes commensurate and possible.

(1.) There are also many separate vestiges warranting the antiquity of these traditions, and proving that they were neither invented nor adorned; for instance, Jacob, the progenitor of the Israelites, is introduced not as the first-born, which, if an unhistorical and merely external exaltation of that name had been the aim of the author, would have been more for this purpose.

(2.) Neither the blemishes in the history of Abraham, nor the gross sins of the sons of Jacob, among whom even Levi, the progenitor of the sacerdotal race, forms no exception, are concealed.

(3.) The same author, whose moral principles are so much blamed by the opponents of Genesis, on account of the description given of the life of Jacob, produces, in the history of Abraham, a picture of moral greatness which could have originated only in facts.

(4.) The faithfulness of the author manifests itself also especially in the description of the expedition of the kings from Upper to Western Asia; in his statements concerning the person of Melchizedek (Gen. xiv); in the circumstantial details given of the incidents occurring at the purchase of the hereditary burial-place (chap. xxiii); in the genealogies of Arabian tribes (chap. xxv); in the genealogy of Edom (chap. xxxvi); and in many remarkable details which are interwoven with the general accounts.

(5.) Passing on to a later portion of the book, we

find the writer evincing the most accurate knowledge of the state of society in Egypt. The Egyptian jealousy of foreigners, and especially their hatred of shepherds; the use of interpreters in the court (who, we learn from other sources, formed a distinct caste); the existence of caste; the importance of the priesthood; the use of wine by the kings (Wilkinson, ii, 142-158); the fact that even at that early time a settled trade existed between Egypt and other countries, are all confirmed by the monuments or by later writers. So again Joseph's priestly dress of fine linen, the chain of gold round his neck, the chariot on which he rides, the body-guard of the king, the rites of burial (though mentioned only incidentally), are spoken of with a minute accuracy which can leave no doubt on the mind as to the credibility of the historian. In particular, the account given (xlvii, 13-26) of the manner in which the Pharaohs became proprietors of all the lands, with the exception of those belonging to the priests, is confirmed by Herodotus (ii, 109), and by Diodorus Siculus (i, 73). The manner of embalming described in Gen. i entirely agrees with the description of Herodotus, ii, 84, etc. For other data of a similar kind, compare Hengstenberg (*Die Bücher Moses und Aegypten*, p. 21 sq.). See EGYPT.

5. It is quite impossible, as has already been said, to notice all the objections made by hostile critics at every step as we advance. But it may be well to refer to one more instance in which suspicion has been cast upon the credibility of the narrative. Three stories are found in three distinct portions of the book, which in their main features no doubt present a striking similarity to one another, namely, the deliverances of Sarah and Rebekah from the harems of the Egyptian and Philistine monarchs (xii, 10-20; xx; xxvi, 1-11). These, it is said, besides containing certain improbabilities of statement, are clearly only three different versions of the same story.

It is of course possible that these are only different versions of the same story. But is it psychologically so very improbable that the same incident should happen three times in almost the same manner? All men repeat themselves, and even repeat their mistakes; and the repetition of circumstances over which a man has no control is sometimes as astonishing as the repetition of actions which he can control. Was not the state of society in those days such as to render it no way improbable that Pharaoh on one occasion, and Abimelech on another, should have acted in the same selfish and arbitrary manner? Abraham, too, might have been guilty twice of the same sinful cowardice; and Isaac might, in similar circumstances, have copied his father's example, calling it wisdom. To say, as a recent expositor of this book has done, that the object of the Hebrew writer was to represent an idea, such as "the sanctity of matrimony," that "in his hands the facts are subordinated to ideas," etc., is to cut up by the very roots the historical character of the book. The mythical theory is preferable to this, for that leaves a substratum of fact, however it may have been embellished or perhaps disfigured by tradition. If the view of Delitzsch is correct, that xii, 10-20 is Jehovistic; xx, Elohistie (with a Jehovistic addition, ver. 18); xxvi, 1-13, Jehovistic, but taken from written documents, this may to some minds explain the repetition of the story.

There is a further difficulty about the age of Sarah, who at the time of one of the occurrences must have been 65 years old, and the freshness of her beauty, therefore, it is said, long since faded. In reply it has been argued that as she lived to the age of 127, she was then only in middle life; that consequently she would have been at 65 what a woman of modern Europe would be at 35 or 40, an age at which personal attractions are not necessarily impaired.

But it is a minute criticism, hardly worth answering, which tries to cast suspicion on the veracity of the

writer, because of difficulties such as these. The positive evidence is overwhelming in favor of his credibility. The patriarchal tent beneath the shade of some spreading tree, the wealth of flocks and herds, the free and generous hospitality to strangers, the strife for the well, the purchase of the cave of Machpelah for a burial-place—we feel at once that these are no inventions of a later writer in more civilized times. So again, what can be more life-like, more touchingly beautiful, than the picture of Hagar and Ishmael, the meeting of Abraham's servant with Rebekah, or of Jacob with Rachel at the well of Haran? There is a fidelity in the minutest incidents which convinces us that we are reading history, not fable. Or can anything more completely transport us into patriarchal times than the battle of the kings and the interview between Abraham and Melchizedek? The very opening of the story, "In the days of Amraphel," etc., reads like the work of some old chronicler who lived not far from the time of which he speaks. The archaic forms of names of places, Bela for Zoar; Chatsatson Tamar for Euedi; Emek Shaveh for the King's Vale; the Vale of Siddim, as descriptive of the spot which was afterwards the Dead Sea; the expression "Abram the Hebrew;" are remarkable evidences of the antiquity of the narrative. So also are the names of the different tribes who at that early period inhabited Canaan; the Rephaim, for instance, of whom we find in the time of Joshua but a weak remnant left (Josh. xiii, 12), and the Zuzim, Emim, Chorim, who are only mentioned besides in the Pentateuch (Deut. ii, 10, 12). Quite in keeping with the rest of the picture is Abraham's "arming his trained servants" (xiv, 14)—a phrase which occurs nowhere else—and, above all, the character and position of Melchizedek: "Simple, calm, great, he comes and goes the priest-king of the divine history." The representations of the Greek poets, says Creuzer (*Symb.* iv, 378), fall very far short of this; and, as Hävernick justly remarks, such a person could be no theocratic invention, for the union of the kingly and priestly offices in the same person was no part of the theocracy. Lastly, the name by which he knows God, "the most high God, possessor of heaven and earth," occurs also in the Phœnician religions, but not amongst the Jews, and is again one of those slight but accurate touches which at once distinguishes the historian from the fabulist. See MELCHIZEDEK.

*V. Author and Date of Composition.*—It will be seen, from what has been said above, that the book of Genesis, though containing different documents, owes its existing form to the labor of a single author, who has digested and incorporated the materials he found ready to his hand. A modern writer on history, in the same way, might sometimes transcribe passages from ancient chronicles, sometimes place different accounts together, sometimes again give briefly the substance of the older document, neglecting its form.

But it is a distinct inquiry who this author or editor was. This question cannot properly be discussed apart from the general question of the authorship of the entire Pentateuch. Under that head we shall show that this could have been no other than Moses, and that the entire work was finished when he deposited a copy of the law within the "sides" of the sacred Ark (Deut. x, 5). See PENTATEUCH. We shall here confine ourselves to a notice of the attempt of some critics to ascertain the period when Genesis was composed, from a few passages in it, which they say must be *anachronisms*, if Moses was really the author of the book (e. g. Tuch, *Commentar über Genesis*, p. lxxxv sq.).

A distinction, it is obvious, must be made between anachronisms of a subjective character, originating merely in dogmatic preconceptions, and such as relate to matters of fact. Thus the rejection of prophecy leads critics like Vater, Von Bohlen, and Kalisch to conclude that passages of Scripture declaratory of matters realized in the history of Israel must have been

written subsequent to such events. But even as regards matters of fact, the existence of anachronisms requires to be placed beyond doubt, before they can have any weight in such a case, just because of the improbability of a writer who wished his work to pass as that of an earlier age allowing such contradictions. To notice, however, a few examples: *Hebron* (Gen. xiii, 18; xxiii, 2), it is alleged from Josh. xiv, 15; xv, 13, was not so named until the entrance into Canaan, its ancient name being Kirjath-Arba (Gen. xxiii, 2). That Hebron was the original name appears from the fact that on its first mention it is so designated. In Abraham's time it was also called Mamre (xxiii, 19), from an Amoritic prince of that name (xiii, 18; xiv, 13). Subsequently, but prior to the Mosaic age, the Anakim possessed the place, when it received the name of Kirjath-Arba, or the city of Arba, "a great man among the Anakim" (Josh. xv, 15). The place *Dan* (Gen. xiv, 14), it is also alleged, received that name only in the time of the judges from the tribe of Dan, its original name being Laish or Leshem (Josh. xix, 47; Judg. xviii, 29). The localities, however, are by many thought to be quite distinct; the former being Dan-Jaan, between Gilead and the country round about Zidon (2 Sam. xxiv, 16), the adjunct Jaan being intended to distinguish it from Dan-Laish in the same neighborhood. See DAN. In Genesis, these critics further add, frequently occurs the name *Bethel* (xii, 8; xxviii, 19; xxxv, 15); while even in the time of Joshua, the place was as yet called Luz (Josh. xviii, 13). But the name Bethel was not first given to the place by the Israelites in the time of Joshua, there being no occasion for it, since Bethel was the old patriarchal name, which the Israelites restored in the place of Luz, a name given by the Canaanites. The explanatory remarks added to the names of certain places, as "Bela, which is Zoar" (Gen. xiv, 2, 8); "En-mishpat, which is Kadesh" (ver. 7), and some others, the opponents of the genuineness regard as indications of a later age, not considering that these explanations were required even for the Mosaic age, as the ancient designations were forgotten or rarely used. For proving them to be anachronisms, it must be shown that the new names were unknown in the time of Moses, though with the exception of "the king's dale" (xiv, 17), which does not again occur till 2 Sam. xviii, 16, all the names are referred to as well known in the books of the period immediately succeeding. The notice that "the Canaanite was then in the land" (xii, 6; xiii, 7), is thought to imply that the Canaanites were still in possession of Palestine, and so could not have been written till after their expulsion. But such is not the import of the passage. The descent of the Canaanites from Ham, and their progress from the south towards Palestine, had been described (x, 15-19), and they are now represented as in possession of the land to which the "sons of Eber" were advancing from an opposite point. Standing in connection with the promise of the land to Abraham, this notice contrasts the present with the promised future. The passage (Gen. xv, 18) where the land of Israel is described as extending from the river of Egypt (the Nile) to the great river (Euphrates), it is alleged, could only have been penned during the splendid period of the Jews, the times of David and Solomon. *Literally* taken, however, the remark is inapplicable to any period, since the kingdom of the Jews at no period of their history extended so far. That promise must, therefore, be taken in a rhetorical sense, describing the central point of the proper country as situated between the two rivers. The remark, "Before there reigned any king over the children of Israel" (xxxvi, 31), could not have been made, it is maintained, until the establishment of the Hebrew monarchy—an assumption which overlooks the relation of this statement to the promises of a royal posterity to the patriarchs, and especially that in an immediately preceding passage

(xxxv, 11). It stands in a relation similar to Deut. xvii, 14, where the erection of a kingdom is viewed as a necessary step in Israel's development. This explanation will of course not satisfy those who hold that in a simple historical style, a statement having such prophetic reference "is not only preposterous, but impossible" (Kalisch, *Genesis*, p. 601); but against rationalistic prepossessions of this kind there is no arguing.—Kitto, s. v.; Smith, s. v.; Fairbairn, s. v.

VI. *Commentaries*.—The following are expressly on the whole of this book, the most important being designated by an asterisk (\*) prefixed: Origen, *Commentaria* (in *Opp.* ii, 1); also *Homiliv* (ib. ii, 52); Chrysostom, *Homiliv* (in *Opp.* iv, 3; also [*Spuria*] *ib.* vi, 619); and *Sermone* (ib. iv, 746, 796); Jerome, *Questiones* (in *Opp.* iii, 301); Eucherius, *Commentaria* (in *Bibl. Max. Patr.* v); Isidore, *Commentarius* (in *Opp.* p. 283); Damianus, *Expositio* (in *Opp.* iii, 889); Bede, *Expositio* (in *Opp.* iv, 19); also *Questiones* (ib. viii, 78); Alcuin, *Interrogationes* (Hagenau, 1529, 8vo; also in *Opp.* i, ii, 303); Angelomus, *Commentarius* (in *Pez, Thesaur.* IV, i, 45); Renigius, *Commentarius* (ib. IV, i, 1); Hugo, *Annotationes* (in *Opp.* i, 8); Rupert, *Commentarii* (in *Opp.* i, 1); Aquinas, *Expositio* (Antwerp, 1572, Lugd. 1573, 8vo; Paris, 1641, fol.); Ecolampadinus, *Abolaciones* (Basil. 1523, 1536, 8vo); Zwingle, *Adnotationes* (Tigur. 1527; also in *Opp.* iii, 4); Zeigler, *Commentarii* (Basil. 1540, fol.); Frisius, *Adsertiones* (Rom. 1541, fol.); \*Luther, *Enarrationes* (by different eds., part i, Vitemb. 1544, fol.; ii-iv, Norib. 1550-4; together, Francof. 1545-50, 8vo, and later; also in *Op. Exeg.* I, ii; in English, London, 1855, 8vo); Melancthon, *Commentarius* (in *Opp.* ii, 377); Musculus, *Commentaria* (Basil. 1554, 1565, 1600, fol.); Honcala, *Commentarius* (Complut. 1555, fol.); Chytraeus, *Commentarius* (Vitemb. 1557, 1558, 1590, 8vo); \*Marloratus, *Expositio* (Par. 1562; Morg. 1568, 1580, 1584, fol.; Genev. 1580, 8vo); \*Calvin, *In Genesim* (in *Opp.* i); also tr. Lond. 1578, 4to; also ib. 1847-50, 2 vols. 8vo); Strigel, *Scholia* (Lips. 1566, 1574, 8vo); Selnecker, *Commentarius* (Lips. 1569, fol.); Martyr, *Commentarius* (Tigur. 1572, 1579, 1595; Heidelb. 1606, fol.); Brentius, *Commentarii* (in *Opp.* i); Brocard, *Interpretatio* [mystical] (L. B. 1580, 8vo; ib. 1584, 4to; Bremen, 1585, 1593, 4to); Fabricius, *Commentarius* (Lips. 1584, 1592, 8vo; 1596, Argent. 1584, 4to); \*Pererius [Romanist], *Commentarius* (Rom. 1589-1598, 4 vols. fol.; Colon. 1601, 1606, Ven. 1607, fol.; Lugd. 1616, 4 vols. 4to; and later); Musæus, *Auslegung* (Magdeb. 1595, fol.); Martineugus, *Glossa* (Patav. 1597, 2 vols. fol.); Daabitz, *Predigten* (Lpz. 1597, 8vo); Mercer, *Commentarius* (Genev. 1598, fol.); Kalmankas, *מִשְׁפָּחַת הַיְהוָה* (Lublín, s. a. fol.); Hammelmann, *Adnotationes* (Lips. 1600, fol.); Stella, *Commentaria* (Rom. 1601, fol.); Schmuck, *Auslegung* (Lpz. 1603-9, in 8 pts. 4to); Gesner, *Disputationes* (Vitemb. 1604, 1613, 1629, 4to); Lyser, *Commentarius* (in 6 pts., Lips. 1604 sq., 4to); \*Willett, *Sixfold Commentary* (London, 1605, fol.); Delrio, *Commentarii* (Lugd. 1608, 4to); Runge, *Prolectiones* (Vitemb. 1608, 8vo); Pareus, *Commentarius* (Francof. 1609, 1614, 4to); Gedick, *Auslegung* (Lpz. 1611, 1632, fol.); De Petiglian, *Commentaria* (Ven. 1616, 4to); Ferdindez, *Commentationes* (Lugd. 1618-28, 3 vols. fol.); Babington, *Notes* (in *Works*, i); Merseonus, *Questiones* [polemical] (Par. 1623, fol.); Garzia, *Discussio* (Caesaraug. 1624, fol.); Böhme, *Erklärung* [mystical] (s. l. 1624; also in his other works); Rivetus, *Erraticiones* (L. B. 1633, 4to); Gerhard, *Commentarius* (Jen. 1637, 1654, 1693, 4to); De la Haye, *Commentarii* (Lugd. 1638, Par. 1651, 1663, 2 vols. fol.); Sylvius, *Commentarius* (Dnaci, 1639, 4to); Lightfoot, *Observations* (Lond. 1642; also in *Works*, ii, 329); and *Annotationes* (ib. x, 532); Gauduntius, *Conatus* (Pisis, 1644, 4to); Cartwright, *Adnotationes* [from Targums] (Lond. 1648, 8vo; also in *Critici Sacri*, i); Rivet, *Exercitationes* (in *Opp.* i, 1); Terser, *Adnotationes* (Upsal. 1657, fol.); Chemnitz, *Disputationes* (Jen.

1665, Lips. 1711; Vitemb. 1716, 4to); Calov, *Commentarius* (Vitemb. 1671, 4to); Hughes, *Expositio* (Lond. 1672, fol.); Cocecius, *Commentarius* (in *Opp.* i, 1); also *Curæ* (ib. ii, 1); Anonymous, *Traduction*, etc. [patristic] (Paris, 1682, 12mo); Masson, *Questiones* (Paris, 1685-8, 3 vols. 12mo); Bomparte, *Notæ* [from profane sources] (Amst. 1689); Akiba-Bar, *מִשְׁפָּחַת הַיְהוָה* [Rabbinical] (Sulzb. 1690, 1700, 4to, and later); \*Patrick, *Commentary* (Lond. 1695, 4to; afterwards embodied in Patrick, Lowth, Arnold, and Whitby's *Commentary* on the Bible); Schmid, *Adnotationes* (Argent. 1697, 4to); Güntzburg, *מִשְׁפָּחַת הַיְהוָה* (Amst. 1713, 4to); Barch ben-Isaak, *מִשְׁפָּחַת הַיְהוָה* [polemical] (Halle, 1714, 4to); Von Sanden, *Questiones* (Regim. 1716, 4to); Duquet, *Explication* (Paris, 1732, 6 vols. 12mo); Sandus, *Lectiones* (Ven. 1733, 4to); Hagemann, *Betrachtungen* (in 3 parts, Brunswiek, 1734-6, 4to); Lookup, *Transtlation* (1740, 8vo); Haitsma, *Curæ* (Franck. 1753, 4to); Dawson, *Notes* (Lond. 1763-87, 3 vols. 4to); Murray, *Lectures* (Newe. 1777, 2 vols. 8vo); Dubno, *מִשְׁפָּחַת הַיְהוָה*, etc. (in Mendelssohn's *Pentateuch*, Berl. 1781-3, 8vo, and later); Giesebrecht, *Erklärung* (Rostock, 1784 sq., 2 vols. 4to); Sösmans, *Notes*, etc. (London, 1787, 8vo); Rüdiger, *Erklärung* (Stendal, 1788, 8vo); Harwood, *Annotations* (Lond. 1789, 8vo); Ilgen, *Urkunde*, etc. (Halle, 1798, 8vo); Franks, *Remarks* (Halif. 1802, 8vo); Dimock, *Notes* (Gloucester, 1804, 4to); Rosenmüller, *Scholia* (Lips. 1821, 8vo); Fuller, *Discourses* (London, 1825, 1836, 12mo); Close, *Discourses* (London, 1828, 12mo); Rudge, *Lectures* (London, 1828, 2 vols. 8vo); Schumann, *Annotatio* (Lips. 1829, 8vo); Seltmann, *Uebers.* (Hamm, 1831, 8vo); Coghill, *Commentary* (London, 1832, 2 vols. 8vo); \*Von Bohlen, *Erläuterung* (Königsb. 1835, 8vo); Von Schrank, *Commentarius* (Salzburg, 1835, 8vo); Sitthorp, *Observations* (Lond. 1835, 8vo); \*Tiele, *Commentar* (Erl. 1836, 8vo, vol. i); Warner, *Exposition* (Lond. 1838, 8vo); \*Fuch, *Commentar* (Halle, 1838, 8vo); Priaux, *Comparison*, etc. [antiquarian] (London, 1842, 8vo); \*De Sola and others, *Notes* (Lond. 1844, 8vo); Heim, *Lehre* (Stuttg. 1845, 8vo); \*Turner, *Companion* (N. York, 1846, 8vo); Trevanion, *Sermone* (Lond. 1847, 8vo); Schröder, *Auslegung* (Berl. 1848, 8vo); Evans, *Sermone* (Lond. 1849, 12mo); Sörensen, *Commentar* (Kiel, 1851, 8vo); \*Knobel, *Erklärung* (Lpz. 1852, 8vo, in the *Kurzgef. excg. hdbk.*); Candlish, *Lectures* (Edinb. 1852, 2 vols. 12mo; Lond. 1868, 2 vols. 8vo); Paul, *Analysis* (Edinb. 1852, 8vo); \*Delitzsch, *Auslegung* (Lpz. 1852, 1853, 8vo); Jervis, *Notes* (Lond. 1852, 8vo); \*Bush, *Notes* (N. Y. 1852, 2 vols. 12mo); Macgregor, *Notes* (London, 1853, 8vo); Cumming, *Readings* (Lond. 1853, 8vo); Preston, *Notes* (London, 1853, 8vo); Putnam, *Gosp. in Gen.* (N. Y. 1854, 8vo); Howard, *Tr. from Sept.* (Camb. 1855, 8vo); \*Kalisch, *Commentary* (Lond. 1859, 8vo); Wright, *Notes* (Lond. 1859, 8vo); Groves, *Commentary* (Camb. 1861, 12mo); Mandelstamm, *Erklärung* (Berl. 1862, 4to); Böhmer, *Commentarius* (Halle, 1860, 8vo); also *Uebers.* etc. (Hal. 1862, 8vo); Rahmer, *Questiones* (Breslau, 1863, 8vo); \*Murphy, *Commentary* (Belfast, 1863; Andover, 1866, 8vo); Jacobus, *Notes* (N. Dr. Schaff, New York, 1868, 8vo). See OLD TESTAMENT.

**Genesisus, ST.**, a comedian of the time of Dioclesian, of whose conversion the following marvellous but doubtful story is told. He was playing, before the emperor, the part of a candidate for Christian baptism, robed in the habit of a catechumen. But at the moment in the farce when the emperor was to judge the new convert, he was suddenly convinced by the Holy Spirit, and declared himself really a convert. He was scourged and tortured, but nothing could shake his fidelity, and he was decapitated. Different dates are

assigned for his death: Tillemont and Ruinart fix it at A. D. 286; Baronius and Fleury at A. D. 303. His day in the Roman Catholic calendar is Aug. 25. Rotrou has made this apocryphal history the subject of a tragedy. See *Acta Sanctorum*, August, vol. v; Ruinart, *Acta Sincera*, p. 269; Butler, *Lives of the Saints*, Aug. 25.

**Genet**, FRANÇOIS, a French prelate, was born at Avignon Oct. 16, 1640. He became canon and theologian of the cathedral of Avignon, and in 1685 bishop of Vaison. Implicated in the affair of the *Daughters of Childhood* of Toulouse, whom he had received in his diocese, and who were held to be Jansenists, he was arrested in 1688, and imprisoned for fifteen months. The pope finally persuaded Louis XIV to restore Genet to his diocese. He was drowned in 1702, while on his way from Avignon to Vaison. He is the author of *Théologie Morale*, which was disapproved by the bishops, and condemned by the University of Louvain, March 10, 1703. The best edition is that of 1715 (8 vols. 12mo); it was reprinted at Rouen in 1749.—Hoefer, *Nouv. Biog. Générale*, xix, 873.

**Genethliäci**, astrologers, who pretended to calculate mens' naticities by erecting schemes and horoscopes, to know what position the stars were in at their birth, and thence to foretell their good or bad fortune. "And because some of these pretended to determine positively of the lives and deaths of kings, which was reputed a very dangerous piece of treason, therefore the laws of the state were more severe against them even under the heathen emperors, as Gothofred shows out of the ancient lawyers, Ulpian and Paulus; and that was another reason why the Church thought it proper to animadvert upon these with the utmost severity of ecclesiastical censures, as thinking that what the heathen laws had punished as a capital crime ought not to pass unregarded in the discipline of the Christian Church. It was this crime that expelled Aquila from the Church. For Epiphanius says (*De Mensuris et Ponderibus*) he was once a Christian, but, being incorrigibly bent upon the practice of astrology, the Church cast him out, and then he became a Jew, and in revenge set upon a new translation of the Bible, to corrupt those texts which had any relation to the coming of Christ."—Bingham, *Orig. Eccl.* bx. xvi, ch. v. See DIVINATION.

**Geneva** (French Genève), capital of the Swiss canton of the same name, celebrated for its historical and religious associations, and in particular as the seat of the reformatory labors of Calvin. The canton had, in 1860, 82,876 inhabitants, of whom 40,069 were Protestants, 42,099 Roman Catholics, 331 Dissidents, 377 Jews. During the Middle Ages Geneva was an object of dispute between the bishop of Geneva, who was an immediate feudatory of the German empire, and the count of Genevois, who ruled the adjoining province of Savoy. After the extinction of the line of the counts of Genevois, the dukes of Savoy were appointed their successors by the German emperor Sigismund (1422). Hence the claim of Savoy upon Geneva, from which the Genevans could only free themselves by alliances with the Swiss cantons of Fribourg (1519) and Berne (1526), and by the aid of the Reformation. The latter was introduced into Geneva by Farel, Fromment, and others, about 1532, and in 1535 was officially established. Being put under the ban by the bishop, the city declared the episcopal see vacant, and declared itself a republic. Calvin first came to Geneva in 1536, and after an absence of a few years returned in 1541, when he soon succeeded in making himself the temporal as well as the spiritual ruler of the town. Thus Geneva became the metropolis of Calvinism, and, as such, exercised a great influence upon all the Calvinistic churches. From 1798 to 1814 Geneva was united with France; in 1814, its territory having been enlarged by the annexation of a few Savoyan and French communes, it joined the Swiss Confederation as the 22d canton. The

Reformed State Church, which in 1868 had 16 congregations and 35 ministers, has for some time been under the influence of Rationalism, and a part of the orthodox members have therefore organized a Free Evangelical Church, which has a celebrated theological school, several of whose professors, as Merle d'Anbigné and Gausson, have established a great theological reputation throughout the Protestant world.—Thourel, *Histoire de Genève* (Geneva, 1863); Cherbuliez, *Genève et les Genevois* (Geneva, 1868). (A. J. S.)

**Geneva Bible.** See ENGLISH VERSIONS.

**Geneviève, St.**, the patron saint of Paris, was, according to tradition, born at Nanterre, near Paris, about 423. By the advice of St. Germain, bishop of Auxerre, she took the vow of chastity, and when afterwards accused of hypocrisy and superstition, she was warmly defended by the bishop. When the inhabitants of Paris, frightened at the approach of Attila, contemplated leaving their city, Geneviève dissuaded them, saying that Paris would be spared; and as the prediction proved true, she became the object of general veneration. She also advised the building of a church to St. Peter and St. Paul, in which she was afterwards buried, and which bears her name. She died in 512. Her reputation for sanctity became so great that Simon Stylites inquired about her from all persons coming from Gaul. Miracles were said to take place at her tomb. There exists a life of her in Latin, claiming to have been written eighteen years after the death of Clovis. The life of St. Germain by the priest Constance, said to have been written during her lifetime, relates her consecration by that bishop. See the Bollandists, *Acta Sanct.* July 31; Charpentier, *Vie de St. Geneviève* (1687); Butler, *Lives of the Saints*, Jan. 3.

**Geneviève, St., Canons of**, called also canons regular of the Congregation of France, a congregation of canons regular (q. v.) established in 1614 by Charles Faure, a member of the abbey of St. Vincent of Senlis, who effected a reformation of the French canons which was soon adopted by several other abbeys. Cardinal de la Rochefoucauld, who in 1619 had been made abbot of the abbey of St. Geneviève du Mont at Paris, being desirous to reform his abbey, sent, in 1624, for twelve members of St. Vincent of Senlis, and made Faure its spiritual superior. In 1634 the pope confirmed the new congregation. Soon after its first chapter general was held, which was attended by the superiors of fifteen houses, and elected Faure coadjutor of the abbot of St. Geneviève and general of the congregation. The king had previously given up his right of nominating the abbot of St. Geneviève, and consented that he be elected every third year. Helyot, in his *History of Religious Orders*, states that at his time the congregations had in France 67 abbots, 28 priors, 2 provosts,

Canon of St. Geneviève. Daughter of St. Geneviève.

and 3 hospitals, besides, in the Netherlands, 3 abbots and 3 priors. A large number of parishes were served by its members. It was customary to elect one of the chancellors of the University of Paris from this congregation. Helyot, *Dict. des Ordres Relig.*, art. Génovéfains. (A. J. S.)

**Geneviève, St., Daughters of** (more commonly called Miramions), a monastic order in the Roman Catholic Church, founded, in 1636, at Paris, by Francisca de Blosset, for the purpose of nursing the sick and instructing girls. In 1665 it was united by Marie Bonneau de Kubelle Beauharnois de Miramion with a similar order which she had founded in 1661, under the name of the Holy Family. The order obtained considerable reputation, and extended widely. Its members took no vows, but only promised a faithful observation of the rule and the statutes of the society as long as they might belong to it.—Helyot, *Dict. des Ordres Relig.*, art. Miramiones. (A. J. S.)

**Genius, ATTENDANT.** See GUARDIAN ANGEL.

**Gennadius**, patriarch of Constantinople, succeeded Anatolius in that dignity A.D. 458. He was a man of quick parts, and composed *Homilies*; a *Commentary on Paul's Epistles*; and a *Commentary on Daniel*. He died A.D. 471. His writings are lost, except an *Epistle* preserved by Gryneus, and other fragments, all of which are given by Migne, *Patrologia Græca*, tom. lxxxv.—Evagrius, *Hist. Eccl.* ii, 11; Dupin, *Eccl. Writers*, iv, 156; Ceillier, *Auteurs Sacrés* (Paris, 1861), xi, 345.

**Gennadius**, patriarch of Constantinople (whose proper name was George Scholarius), was one of the most original and prolific writers in the Greek Church of the 15th century. He was secretary to the emperor John Palæologus, and attended the Council of Florence in 1438, while yet a layman. He became an ecclesiastic in 1449 or 1450, and entered a monastery, taking the name of Gennadius. At Florence he had declared himself strongly on the side of union with the Latin Church, in three orations to be found in Hardouin, *Concilia*, ix, 446 (supposed to be much interpolated). After becoming a monk he changed his views, and wrote against the Council of Ferrara-Florence. In 1453 he was made patriarch by the sultan, but retired in 1458, and died about 1460. Some have disputed the identity of Scholarius with Gennadius, but Renaudot puts it beyond doubt. A list of his writings will be found in Renaudot, who edited his homily *De Eucharistia* (Paris, 1704), and, in a larger edit., with Meletius and others (Paris, 1709, 4to). His treatise *περί προορισμού, De Predestinatione*, was edited by Libertinus (Prague, 1673, 8vo). Migne, in *Patrologia Græca*, tom. clx, gives Renaudot's dissertation on the life and writings of Gennadius, with his writings as follows: *Confessio Fidei* (i, ii);—*Homilia*:—*Orationes in Synodo Florent.*:—*De Predestinatione*:—*De Deo in Trinitate uno*:—*Epistole*; and other writings. Fabricius, *Bibliotheca Græca* (ed. Harles), xi, 349 sq., gives Renaudot's list of the writings of Gennadius, seventy-six in number, and adds twenty-four more. See also a list of his writings and their various editions, in Hoffmann, *Bibliographisches Lexikon*, ii, 155 sq. Of the writings attributed to him, perhaps the most important are the two Confessions made for the sultan, (1) *Ὁμλία (or ὁμολογία) ῥηθῆσα περί τῆς ἁθῆς καὶ ἁγιωμῆτων πίστεως τῶν Χριστιανῶν*; and (2) a dialogue *περὶ τῆς οὐδοῦ τῆς σωτηρίας τῶν ἀνθρώπων*, both given in Migne (Gr. and Lat.), in Kimmel, *Monumenta Fidei Eccles. Orientalis* (Jena, 1850, 8vo), and in Gass, *Gennadius and Pletho* (see below). These confessions have been critically studied by Dr. Otto, who gives the text of the dialogue, a literary history of the two confessions, and an investigation of the genuineness of the dialogue, in *Zeitschrift für histor. Theologie*, xx, 389 sq.; xxxiv, 111 sq.; and separately, from additional sources, *Des Patriarch Gennados Confession* (Wien,

1864). Otto decides that the dialogue was not written by Gennadius, but is probably a recension of the *ἑρπαι τινες ἰσορήσεις* (falsely ascribed to Athanasius), made by some Greek, in the interest of the Church of Rome, to favor the union of the Greek and Latin churches. As it gives the procession of the Holy Ghost from the Father and the Son (Migne, tom. clx, p. 322 D), the Latins and Latinizing Greeks have made much use of it in the *Filioque* controversy.—Mosheim, *Church History*, cent. xv, pt. ii, chap. ii, § 23; Dupin, *Eccl. Writers*, v, 110; Fabricius, *Biblioth. Græca*, l. c.; Hoefel, *Nouv. Biog. Générale*, xix, 913; Gass, *Gennadius and Pletho* (Breslau, 1844).

**Gennadius**, MASSILIENSIS, a presbyter of Marseilles, a Gaul (end of 5th century). Although some modern writers assert that he was a bishop, some say of Marseilles, others of Toledo, he was only a presbyter. He was versed in Greek and Latin, and a laborious student of the Scriptures and the fathers. He wrote a number of books, of which only two have come down to us: (1) *De Viris illustribus*, or *De Scripturibus Ecclesiasticis* (Catalogue of Ecclesiastical Writers), a continuation of that of Jerome, to which it is usually joined. It begins where Jerome's ends, A.D. 392, and ends 493. There have been many editions of it, besides that which is inserted in the works of St. Jerome; the best is that of Fabricius, in his *Bibliotheca Ecclesiastica* (Hamb. 1718, fol.). (2) *De Ecclesiasticis Dogmatibus* (Hamb. 1594 and 1614, 4to). Gennadius advocates doctrines on free-will and predestination similar to those of Faustus of Rhegium. "In his treatise *De Dogmatibus Ecclesiasticis*, he says, God first of all warns man, and invites him to salvation; it is in the power of man to follow him. In his work *De Viris Illustribus*, cap. 58, he speaks of Augustine with commendation, yet does not hesitate to add, that by writing so much he fell into the error of which Solomon says in the 10th chapter of Proverbs, 'In the multitude of words there wanteth not sin.' He makes mention of an error which had arisen from much speaking, and evidently refers to the doctrine of absolute predestination. This arose from carrying things to an extreme, but for all this Augustine had not fallen into heresy" (Neander, *History of Dogmas*, Ryland's transl. p. 383).—Dupin, *Eccl. Writers*, iv, 185; Mosheim, *Ch. Hist.* ii, 341; Neander, *Ch. Hist.* ii, 647; Hook, *Eccles. Biog.* v, 289; Cave, *Hist. Lit.* (Genev. 1720, fol.), i, 299.

**Gennæus** (Γενναῖος, i. e. *high-born*, but v. r. Γένεος), apparently given (2 Macc. xii, 2) as the name of the father of the Syrian general Apollonius (q. v.); but perhaps it is a mere epithet.

**Gennath** (Γεννάθ, apparently for the Chald. ܓܢܢܐ or ܓܢܢܐ, *garden*, q. d. "garden-gate;" perhaps [as Schwarz suggests, *Palest.* p. 254] from the "rose-garden," גַּן הַרֹּסֵם, mentioned in the Talmud [*Maaser*, ii, 5] as lying west of the Temple mount), the name, according to Josephus (*Jar.* v, 4, 2), of one of the gates of Jerusalem, important as mainly determining the course of the second wall, which has been greatly disputed. See CALVARY. His account is as follows: "But the second wall, while it had its beginning from that gate which they called 'Gennath,' which belonged to the first wall, yet encircling only the northern slope [or quarter], reached as far as Antonia" (Τὸ δὲ δεύτερον τὴν μὲν ἀρχὴν ἀπὸ πύλης εἶχεν, ἣν Γεννάθ ἐκάλεον, τοῦ πρώτου τείχους οὖσαν, κεικλούμενον ἐν τῷ προσάκτιον κλίμα μόνον ἀνῆγει μέχρι τῆς Ἀντωνίας); from which, together with the context, the following conclusions are certain: (1.) The gate in question formed part of the first wall that skirted the northern brow of Mount Zion, for the second wall must have started from this quarter, since it ran northward, and lay between the first and the third wall on the same side of the city. (2.) It was situated at some point east of the tower Hippicus, which formed the common

starting-point of both the other walls, but not of this; its distance from this tower is the chief matter of disagreement between topographers; the following considerations will serve to show that it was considerable: [1.] There were two other adjacent towers, not very far from each other, along the same wall, and the gate must have been beyond them all, as they would have been useless for defense if inclosed within the second wall; nor does the precipitous rock here admit egress for some distance. [2.] Several indications of the junction of the walls, if not of the gate in question itself, have been discovered about 1000 feet east of the present Jaffa gate (Williams, *Holy City*, i, Append. p. 83 sq.); this would make the line of the second wall correspond very nearly to the modern division between the Christian and Mohammedan quarters. The only objection of any force against this location of the gate, and consequently of the wall in question, is that it brings the latter upon the side of a descent, where no engineer would think of constructing a mural defence, as it would be commanded by the higher ground outside. On the other hand, the hill is not so steep as is implied in this argument; there is no evidence that the wall here was erected specially because the nature of the ground afforded a peculiarly favorable situation, but simply to include the existing buildings; nor would the matter be much improved by carrying the wall a little further up the same general shelving wedge of land, which here extends indefinitely westward. Moreover, the weakness of the second wall at this point may have been the reason for the construction of the three impregnable towers expressly so as to flank it. See JERUSALEM.

**Genne'sar**, THE WATER OF (τὸ ὕδωρ Γεννησάου), a place where Jonathan Maccabeus encamped on his way to attack the forces of Demetrius at Kadesh (1 Macc. xi, 67); doubtless the Lake GENNESARET (q. v.).

**Gennes'aret** [*g* pron. hard] (Γεννησαῖρ), the Greek form of the lake (Luke v, 1) and plain (Matt. xiv, 34; Mark vi, 53), invariably found in the N. T. in place of the GENNESAR (Γεννησάου) of the Apocrypha (1 Macc. xi, 67), and usually also of Josephus (*War*, iii, 10, 7, 8). In the Talmudical writings and Targums we always find the latter form Hebraized גִּנְסָרָא, *Ginsesar'*, as an equivalent of גִּנְנֵסָרָא, *Kinnere'th* or CHINNERETH (Lightfoot, *Works*, ii, 222); from which accordingly it has usually been derived, by an interchange of א for ס, and the insertion of ו; although others derive it from נֶסֶר, a valley, and גִּנְנֵסָרָא, a shoot or flower, as if i. q. "the vale of flowers" (Jerome, *Opp.* vii, 103, ed. Migne), or from גִּן, a garden, and נֶסֶר, a prince, as if i. q. "the prince's garden" (Lightfoot, i, 489), or even from Sharon, a fertile vale not far distant (Retland, *Palæst.* p. 193, 259).

1. *The town.* This is variously named in the O. T. as *Chinnereth* (or "Chinnereth," Josh. xix, 35), where it is assigned to Naphtali. In later times it was called *Genusar* (גִּנְנֵסָרָא, *Megilla*, 6, a), and in the Talmudic period one Jonathan ben-Charsa was from there (*Tosiphta Kelim*, s. f.). At the time of Farchi (beginning of the 14th century) it was still in existence; doubtless the ruins *Gansur*, still found at the present day one hour north-west of Tubariyeh, according to Fürst (*Heb. Lex.* p. 676, a), although no modern map lays it down. See CHINNERETH.

2. *The district* (N. T. γῆ, *land*), named from its basin-like form (like the body of a גִּנְנֵסָרָא, or lyre). This was a small region of Galilee, on the western shore of the lake, visited by Christ on his way (southward along the lake) to Capernaum (Matt. xiv, 35, 36). It is described by Josephus (*War*, iii, 10, 8) as about four miles in length and three in breadth, and as distinguished for its fertility and beauty. The Talmud also (*Berak.* 44) describes the luxuriant growth of this low-

lying district (גִּנְנֵסָרָא) under the same name (גִּנְנֵסָרָא). Dr. Robinson thus describes it (*Bib. Res.* iii, 282 sq.): "The plain upon which we now entered from Medjel is at first called Ard el-Medjel, but further on takes the name of *el-Ghuacir*, 'Little Ghor,' which strictly, perhaps, includes the whole. It is exceedingly fertile and well watered; the soil, on the southern part at least, is a rich black mould, which in the vicinity of Medjel is almost a marsh. Its fertility, indeed, can hardly be exceeded; all kinds of grain and vegetables are produced in abundance, including rice in the moister parts, while the natural productions, as at Tiberias and Jericho, are those of a more southern latitude. Indeed, in beauty, fertility, and climate, the whole tract answers well enough to the glowing though exaggerated description of Josephus. Among other productions, he speaks here also of walnut-trees, but we did not note whether any now exist." It is a crescent-shaped plain, about three miles long and two broad, shut in by steep, rugged hills. Only a few patches of it are cultivated, its melons and cucumbers being the first and best in market, owing to its deep depression. The rest is covered with tangled thickets of lotus-trees, oleanders, dwarf palms, and gigantic thistles and brambles. (See also Wilson, *Lands of Libe*, ii, 136 sq.; Thomson, *Land and Book*, i, 555; Stanley, *Palestine*, p. 368.) In this identification of the plain of Gennesaret with the one in question, Mr. De Sauley coincides (*Narrative*, ii, 356-8; see also Hackett's *Illustra.* p. 320). See CAPERNAUM.

3. *The Lake* (λίμνη, N. T. and Josephus), or *water* (ὕδωρ, 1 Macc. xi, 67; ὕδατα Γεννησάρα, Joseph. *Ant.* xiii, 5, 7), or *sea* (θάλασσα, O. T.). Josephus calls it *Gennesaritis* (Γεννησαῖτις, *Ant.* xviii, 2, 1), and this seems to have been its common name at the commencement of our era (Strab. xvi, p. 755; Plin. v, 16; Ptol. v, 15). At its north-western angle was a beautiful and fertile plain (Matt. xiv, 34), from which the name of the lake was taken (Josephus, *War*, iii, 10, 7). The lake is also called in the N. T. "Sea of Galilee," from the province of Galilee which bordered on its western side (Matt. iv, 18; Mark vii, 31; John vi, 1); and "Sea of Tiberias," from the celebrated city (John vi, 1); so also Barhebr. *Chron.* p. 400; the Talmud, *Midrash Kohel.* fol. 102, 1; Pausanias, *λίμνη Τιβεραίας*, v, 7, 3; Eusebius, *λίμνη Τιβεραίας*, *Onom.* s. v. *Σαζών*; see also Cyr. ad *Jes.* i, 5). It is a curious fact that all the numerous names given to this lake were taken from places on its western side. Its modern name is likewise *Bahr Tubariyeh*.

In Josh. xi, 2, "the plains south of Chinnereth" are mentioned. It is the sea and not the city that is here referred to (comp. Deut. iii, 17; Josh. xii, 3), and "the plains" are those along the banks of the Jordan. Most of our Lord's public life was spent in the environs of the Sea of Gennesaret. On its shores stood Capernaum, "his own city" (Matt. iv, 13); on its shore he called his first disciples from their occupation as fishermen (Luke v, 1-11); and near its shores he spoke many of his parables and performed many of his miracles. This region was then the most densely peopled in all Palestine. No less than *nine* cities stood on the very shores of the lake, while numerous large villages dotted the plains and hill-sides around (Porter, *Handbook*, p. 424).

A "mournful and solitary silence" now reigns along the shores of the Sea of Gennesaret, which were in former ages studded with great cities, and resounded with the din of an active and industrious people. Seven out of the nine cities above referred to are now uninhabited ruins; one, Magdala, is occupied by half a dozen mud hovels; and Tiberias alone retains a wretched remnant of its former prosperity.—Smith, s. v. See GALILEE, SEA OF.

**Gennesareth; Gennesaritis.** See GENNESARET.

**Genne'us.** See GENNEUS.

**Genoude, ANTOINE EUGÈNE DE,** a French priest and publicist, was born in 1792 at Montélimart. After the first expulsion of Napoleon he entered the service of Louis XVIII, and became adjutant of the prince de Polignac. In 1820 he established the journal *Le Défenseur*. In 1821 he bought the journal *Etoile*, the name of which in 1827 was changed into *Gazette de France*. In 1822 he was ennobled. After being for some time censor under the ministry of Villèle, he entered the priesthood, but soon devoted himself again wholly to the editing of political papers. After the Revolution of July he was one of the most violent defenders of the fallen dynasty, and was involved on that account in difficulties with the pope and the French bi-shops. In 1846 he was elected member of the Chamber of Deputies for Toulouse; and after the outbreak of the Revolution of 1848, he moved in the Chamber of Deputies, though without effect, an appeal to the people concerning a restoration of the elder branch of the Bourbons. Besides several political pamphlets, he wrote, *La Raison du Christianisme* (3d edit. Paris, 1841, 12 vols.);—*Les pères de l'église des trois premiers siècles* (Paris, 1837);—*Leçons et modèles de litt. sacrée* (Paris, 1837);—*La Vie de Jésus Christ et des Apôtres* (Paris, 1836; 2d edit. 1846);—*Histoire d'un âme* (Paris, 1844);—*Hist. de France* (Paris, 1844-1847, 16 vols.). He also published a new translation of the Bible, as well as of Thomas à Kempis's *Imitation of Christ*, and new editions of the works of Malebranche, of the spiritual works of Fénelon (1842), and of select works of Bossuet.—Broekhaus, *Conversat.-Lex.* s. v.; Hoefor, *Nouv. Biogr. Gén.* xix, 927. (A. J. S.)

**Genovesi, ANTONIO,** an Italian metaphysician, was born at Castiglione Nov. 1, 1712. He studied theology at Salerno, and was ordained priest in 1736. He lectured on philosophy at Naples with great reputation for some time, but at length he was attacked by numerous enemies for publishing his metaphysics, in which he recommended the works of Galileo, Grotius, and Newton. He was protected by the archbishop of Tarentum, and by the king of Naples, who made him professor of moral philosophy, and even of theology, in the Neapolitan university. In 1754 the chair of political economy was founded for him, and he continued to teach this science until his death in 1769. He was the author of *Elementa Metaphysicæ* (Naples, 1744, et seq., 5 vols. 8vo);—*Element. art. logico-criticæ* (1745, 8vo). In these books he followed D'Alembert and Helvetius. He published also *Elementa Theologicæ* (Naples, 1751), which caused him to be interdicted by the Church from teaching theology. A historical eulogy of Genovesi was published by Galanti (Venice, 1774, 8vo).—Hoefor, *Nouv. Biog. Générale*, xix, 932.

**Genoveva.** See GENEVIÈVE.

**Genovevans.** See GENEVIÈVE, ORDERS OF.

**Gentile** (usually in the plur. גֵּוֹיִם, *goyim'*; Sept. and N. T. ἔθνη). The Hebrew word גֵּוֹי, *a people*, is derived from the obsolete verb גִּיַּע, *to flow together*, as a crowd, and was originally used in a general sense of any nation, including the Jews themselves, both in the singular (Gen. xii, 2; Deut. xxxii, 28; Isa. i, 4), and in the plural (Gen. xxxv, 11). It is also used poetically (like the Gr. ἔθνη, Hom. II, ii, 87; Od. xiv, 73, and the Latin *gentes*, Virg. *Georg.* iv, 430) of insects and animals (Joel i, 6; Zeph. ii, 14).

But as the sense of a peculiar privilege dawned on the minds of the Jewish people, they began to confine the word גֵּוֹי to other nations (Neh. v, 8), and although at first it did not connote any unpleasant associations, it began gradually to acquire a hostile sense, which never attached itself to the other terms, לְשׁוֹנֵי לְשׁוֹנֵי, *tongues* (Isa. lxvi, 18), or עַמֵּי עַמֵּי, *the peoples*. In proportion as the Jews began to pride themselves upon

being "the first-born of God" (Exod. iv, 22), "the people of the covenant," "a holy nation, and a kingdom of priests" (Exod. xix, 4), they learned to use the indifferent expression *Goyim* to imply that all other nations were more or less barbarous (Psa. ii, 1, 8; ix, 7; x, 16; cvi, 47), profane (Jer. xxxi, 10; Ezek. xxiii, 30), idolatrous, uncircumcised, and unclean (Isa. lii, 1; Jer. ix, 26). Thus age after age the word became more invidious, and acquired a significance even more contemptuous than that of the Greek βάρβαρος, which, being an onomatopœia to imitate the strange sound of foreign tongues, is paralleled by the Hebrew גֵּוֹיִם, גֵּוֹיִם, *a stammerer*, applied to foreigners in Psa. cxiv, 1; Isa. xxviii, 11; xxxiii, 19. The word גֵּוֹיִם gains its last tinge of hatred as applied by Jews to all Christians. Other expressions, intended to point out the same distinction, are used with a shade less of scorn; such, for instance, as גֵּוֹיִם בְּרִיּוֹת (see Buxtorf, *Lex.* col. 723), *oi êxoi, those without*, which is Hebraistically used in the N. T. (1 Tim. iii, 9. See Otho, *Lex. Rab.* p. 111; Schöttgen, *Hor. Hebr.* in 1 Cor. v, 12. In Mark iv, 11 it is applied to the incredulous Jews themselves); and מְלָכּוּתֵי, *kingdoms* (1 Chron. xxix, 30). The Jews applied the terms מְלָכּוּתֵי, *lands*, and, according to some Rabbis, מְלָכּוּתֵי הַיָּם, *region of the sea*, to all countries except Palestine, just as the Greeks distinguished between Hellas and ἡ βάρβαρος (2 Chron. xiii, 9; xvii, 10; Ezra ix, 1; Luke xii, 30; Lightfoot, *Centuria Chorogr.* i, ad init.). Although the Jews thus separated between themselves and other nations, they hesitated as little as the Romans did to include themselves in the Greek term βάρβαρος (Josephus, *Ant.* xi, 7, 1; comp. Justin Mar. *Apol.* i, 46). See BARBARIAN.

In the N. T. ἔθνη (although sometimes used in the singular of the Jewish nation, Acts x, 22; Luke vii, 5) is generally opposed to Israel (τῶ λαῶ Θεοῦ), God's people (Luke ii, 32). But the term most frequently thus rendered is (not ἔθνη, but) Ἕλληνας, which is distinguished from Ἕλληνας (Acts vi, 1), and, although literally meaning Greeks (as in Acts xvi, 1, 3; xviii, 17; Rom. i, 14), yet usually denotes any non-Jews, because of the general prevalence of the Greek language (Rom. i, 16, and passim; 1 Cor. i, 22; Gal. iii, 28, etc.). Thus Timothy, who was of Lystra, is called Ἕλληνα (Acts xv, 1, 3), and a Syrophenician woman Ἕλληνίς (Mark vii, 26), and the Jews of the Dispersion, ἡ διασπορά τῶν Ἑλλήνων (John vii, 35). This usage is even found in the apocryphal writings, where Ἕλληνας is made a synonymy to ἀλλοφιλισμός (2 Macc. iv, 13), and τὰ Ἕλληνικά ἔθνη are pagan morals (vi, 9); and even so early as the Sept. version of Isa. ix, 12, Ἕλληνας is adopted as a rendering of גֵּוֹיִם בְּרִיּוֹת, *Philistines*. In the Greek fathers Ἕλληνας is used for the pagan, in contradistinction to the Christian world (Justin Mart. *Resp. ad Quæst.* 42, etc.), and they call their Apologies λόγοι πρὸς Ἕλληνας, or κατὰ Ἕλληνας (Schleusner, *Lex.* N. T. ii, 759). See GREEK.

It was perhaps impossible for the Jews, absorbed as they were in the contemplation of their own especial mission, to rise into any true or profound conception of the common brotherhood of all nations. Hedged round by a multitude of special institutions, and taught to regard the non-observance of these customs as a condition of uncleanness, imbued, too, with a blind and intense national pride—they often seem to regard the heathen as only existing at all for the purpose of punishing the apostasy of Judæa (Deut. xxviii, 49; 1 Kings viii, 33, etc.), or of undergoing vengeance for their enmity towards her (Isa. lxiii, 6). The arrogant, unreasoning hatred towards other nations, generated by too exclusive a brooding upon this partial and narrow conception, made the Jews the most unpopular nation of all antiquity (Tacitus, *Hist.* v, 2; "gens terrifica," *ib.* v, 8; Juvenal, *Sat.* xiv, 103; Quint. *Just.* iii, 7, 21; Pliny, xiii, 9; Diod. Sic. *Ecl.* 34; Dio Cass.

ixviii, 32; Philostr. *Apolog.* v, 33; Ammian. Marcel. xxii, 5, "fatentes Judæi," etc., "contrary to all men," 1 Thess. ii, 15). See **JEW**. This disgust and scorn unfortunately fell on the early Christians also, who were generally confused with the Jews until the time of Bar-Cochba (Tacit. *Ann.* xv, 44; Sueton. *Claud.* 25; *Ner.* 16). To what lengths the Jews were carried in reciprocating this bitter feeling may be seen in the writings of the Rabbins; the Jews did not regard the Gentiles as brethren, might not journey with them, might not even save them when in peril of death (Maimonides, *Roseach.* iv, 12, etc.), and held that they would all be destroyed and burned at the Messiah's coming (Otho, *Lex. Rabbin.* s. v. Gentes, p. 231; Eisenmenger, *Entdeckt. Judent.* ii, 206 sq.). There is the less excuse for this violent bigotry, because the Jews not only held that all nations sprang from one father (Gen. x), but had also received abundant prophecies that God was but leaving his heathen children in temporary darkness (Acts xiv, 16), and intended hereafter, in his mercy, to bring them under the Messiah's sceptre, and make them "one fold, under one shepherd" (Isa. lx, 2, and passim; Mic. iv, 1; Zeph. iii, 9; Psa. xlv, 18; ex, 1, etc.). The main part of the N.-T. history is occupied in narrating the gradual breaking down of this *μυστήριον τοῦ φραγμοῦ* (the strong barrier of immemorial prejudice which separated Jew and Gentile, Eph. ii, 14), first in the minds of the apostles, and then of their converts. The final triumph over this obstacle was mainly due to the inspired ministry of him who gloried in the title of *ἀπίσκαλος τῶν ἔθνων* (1 Tim. ii, 7; see Conybeare and Howson, i, 219 sq.), who has also given, in a few pregnant sentences, the most powerful description of the blessings which God had granted to the Gentiles, the means of serving him which they possessed, and the shameless degeneracy which had ensued on their neglect of the natural law, written on their consciences (Rom. i, 18-32). See **HETHEN**.

In one or two places the words גִּימִים and ἔθνη are used as proper names. Thus we have "Tidal, king of nations," i. e. of several conquered tribes (Gen. xiv, 1, 2; Kalisch, ad loc.). In Josh. xii, 23 we find "the king of the nations of Gilgal," where *Goyim* is possibly the name of some local tribe (*βασίλευς παρθολι-ας*, Interp. Anon.). In Judg. iv, 2, "Harosheth of the Gentiles" probably received its name from the mixture of races subjugated by Jabin, and settled in the north of Palestine (Donaldson, *Jashur*, p. 263). See **HAROSHETH**. The same mixture of Canaanites, Phœnicians, Syrians, Greeks, and Philistines, originated the common expression "Galilee of the Gentiles," גִּלְיָהוּ לְבָנִים, Sept. *Γαλιλαία ἀλλοφύλων* v. r. *τῶν ἔθνων*, Isa. ix, 1; Matt. iv, 15 (Strabo, xvi, 760; Josephus, *Life*, 12; Euseb. *Onom.* s. v.). See **GALILEE**.

On the various meanings of the phrase "Isles of the Gentiles" (יְבֵנֵי הַגִּימִים, Gen. x, 5; Zeph. ii, 11; Ezek. xxvii, 15, etc.), see Gesenius, *Thesaurus*, p. 38, 272, and **ISLE**. On the Court of the Gentiles, see **TEMPLE**, and Josephus, *War*, vi, 3.—Kitto, s. v.

**Gentilis**, GIOVANNI VALENTINO, an Arian, was born at Cosenza, in Calabria, about 1520. Having become a convert to the Reformation, he was obliged to take refuge at Geneva, where several Italian families had already formed a congregation. Here he became dissatisfied with the orthodox doctrine of the Trinity, and, together with George Blandrata, John Paul Alciati, and Matthew Grimbaldi, formed a society to discuss the sense of the passages of Scripture referring to the subject. "The result of their discussions was that the terms co-essential, co-equal, and co-existent, were improperly applied to the Son and Spirit, and that they were subordinate in nature and dignity to the Father. But however privately their meetings were held, such information was conveyed to the Italian consistory as led them to suspect that the associates had departed

from the orthodox creed; upon which they drew up articles of faith, subscription to which was demanded from all the members of their communion. These articles consisted of Calvin's confession of faith, which had been lately approved of by the ministers, syndics, councils, and general assembly of the people; to which a promise was annexed, never to do any thing directly or indirectly that should controvert the doctrine of the Trinity as therein defined." Gentilis signed these articles, influenced, not improbably, by his recollection of the tragical fate of Servetus. In private, however, he still avowed and maintained his change of sentiment, which coming to the ears of the magistrates, they committed him to prison. At length he "declared his readiness to abjure whatever should be pronounced erroneous. Upon this he was sentenced to make the *amenæ honorable*, to throw his writings into the fire, and to take an oath not to go out of Geneva without the leave of the magistrates." He satisfied himself "that he was justifiable in breaking an oath which had been extorted from him by terror, and withdrew into the country of Gex, where he joined Grimbaldi; thus proving himself to have, with much obstinacy, very little true religion." He went to Lyons, thence to Savoy, and finally to Gex. As soon as he was known there he was sent to prison, but was liberated within a few days, when, upon the bailiff's demanding from him a confession of faith, that he might cause it to be examined by some ministers, and sent to Berne, Gentilis printed the same, with a dedication to the bailiff. From Gex, Gentilis went again to Lyons, where he was imprisoned, but soon obtained his liberty, and went to Poland, where he joined Blandrata and Alciati, who were very successful in propagating their opinions. In 1566, the king of Poland, at the instigation of the Calvinists as well as the Catholics, published an edict, by which all strangers who taught doctrines inconsistent with the orthodox notion concerning the Trinity were ordered to quit the kingdom. From Poland, Gentilis withdrew into Moravia, whence he went to Vienna, and then resolved to return to Savoy, where he hoped still to find his friend Grimbaldi, and flattered himself that he might be suffered to remain unmolested, as Calvin was dead. The bailiff of Gex seized him and delivered him to the magistrates of Berne. He was convicted of obstinately impugning the mystery of the Trinity, and was condemned to death. This sentence was carried into execution September, 1566. "Gentilis triumphed over his enemies by the fortitude with which he met his death, rejoicing, as he said, that he suffered for asserting and vindicating the supremacy and glory of the Father. His hypothesis concerning the person of Christ was that of the Arian school. His history affords a striking evidence that the first reformers, when they renounced the communion of Rome, entertained but imperfect and contracted notions of Christian freedom and toleration." Benedict Aretius wrote an account of his trial and punishment (1567, Lat. 4to). See also Beza, *Val. Gentilis, Teterrimi Hæretici*, etc. (Geneva, 1567); Hook, *Ecol. Biog.* v, 293; Mosheim, *Ch. Hist.* cent. xvi, sec. iii, pt. ii, chap. iv, § 6; Hoefcr, *Nouv. Biog. Gén.* xix, 948; Bayle, *Dictionary*, s. v.; Bock, *Hist. Antitrin.* i, 369; ii, 427; Trechsel, *Antitritin.* iv, 316; *Christum Examinauer*, l, 206; Gieseler, *Church Hist.* (ed. Smith), iv, 360.

**Gentillet**, INNOCENT, a learned Protestant jurist, consult of the 16th century. The time of his birth is unknown, though it is settled that he was born at Vienne, in Dauphiny, and that he fled his country on account of the edicts against Protestants in 1585. He is supposed to have been afterwards syndic of the republic of Geneva. Besides other works, he wrote two of great value: (1.) *Apologia pro Christianis Gallis relig. evangelicæ sen reformatæ* (2d ed. Geneva, 1588, 8vo; also in French, same year);—(2.) *Le Bureau du Concile de Trente*; and in Latin, *Examen Concilii Tridentini* (Geneva, 1568, 8vo). The full title is, "The trial of the

Council of Trent, wherein the said council is proved in many points to be contrary to the ancient councils and canons, and to the king's authority." He died about 1595. See Bayle, *Diet. s. v.*; Ilaag, *La France Protestante*, vol. iv; Hoefler, *Nouv. Biog. Générale*, xix, 949.

**Gentilly**, COUNCIL OF (*Concilium Gentiliacense*), held on Christmas day, A.D. 767. Six legates from Rome, six ambassadors from the emperor Constantine Copronymus, several Greek bishops, and most of the bishops of Gaul and Germany, were present, together with king Pepin and many of his nobles. The question of the procession of the Holy Spirit was discussed, with regard to the addition made by the Latins of the words "filioque" to the creed. There was also a discussion concerning the use of images.—Landon, *Manual of Councils*, s. v.; Gieseler, *Ch. History*, per. iii, § 12.

**Gentoos**. See HINDOOS; INDIA.

**Gen'ubath** [many *Gen'ubath*] (Heb. *Genubath'*, גִּנְוּבַת, Sept. Γαρυβάτ), the son of Hadad, of the Edomitic royal family, by the sister of Tahpenes, the queen of Egypt (in the time of David), reared in Pharaoh's household (1 Kings xi, 20), to save him from the extermination by Joab (ver. 16). He was born (B.C. cir. 1036) in the palace of Pharaoh, and weaned by the queen herself; after which he became a member of the royal establishment, on the same footing as one of the sons of Pharaoh. Some connect the name with the Heb. root גָּנַב, *to steal*, and suppose an allusion either to his being the product of a *furtive* amour (Clericus), or to his existence being owing to his father's having *stolen away* from the destructive fury of the Israelites (Thenius); others, with greater probability, find in it an allusion to the Egyptian deity *Kneph* or *Cnuphis*. See HADAD.

**Genueflectentes**, γονυκλινοῦντες, *kneelers*, a class of penitents in the ancient Church; also called *prostrati*, prostraters, because they were allowed to stay after the hearers were dismissed, and to join in certain prayers particularly offered for them while they knelt. Forms of prayer, prepared for such occasions, are to be found in the Apostolical Constitutions (lib. viii, cap. viii); also in Chrysostom (*Hom. 18 in 2 Cor.*). The station of this class was within the nave or body of the church, near the *ambo* or reading-desk, where they received the bishop's benediction, and imposition of hands. Some canons call these the *penitents*, by way of emphasis, without any other distinction, because they were most noted, and the greatest number of penitential acts were performed by them whilst they were in this station.—Bingham, *Orig. Eccl.* bk. x, ch. ii, § 4, and xviii, ch. i, § 5.

**Genueflection**, the act of bending the knee, or kneeling in prayer. Baronius says that the early Christians carried the practice of genueflection so far, that some of them had worn cavities in the floor where they prayed; and Jerome relates of St. James, that he had, by this practice, contracted a hardness on his knees equal to that of camels. The Church of England gives many directions in her rubrics as to the proper time of kneeling in prayer; but warns all worshippers, in the last rubric on the communion service, that by the posture prescribed for receiving the symbols, "no adoration is intended, or ought to be done, either unto the sacramental bread and wine there bodily received, or unto any corporal presence of Christ's natural flesh and blood."—Farrar, *Eccl. Dictionary*, s. v.; Buck, *Theol. Dictionary*, s. v. See KNEELING.

**Genus Idiomaticum**. See CHRISTOLOGY, vol. ii, p. 281.

**Geoffrey** (*Geoffroi*) of Auxerre, a French theologian, was born at Auxerre about 1120. He studied under Abelard, and was at the University of Paris when St. Bernard came there to preach on the conversion of the clergy (*de conversione ad clericos*). Deeply impressed by Bernard's preaching, he entered the con-

vent of Clairvaux in 1140. For thirteen years he was principal secretary and travelling companion of St. Bernard. In 1161 or 1162 he was elected abbot of Clairvaux, but the monks, dissatisfied with the severity of his rule, petitioned Alexander III to depose him. Geoffrey voluntarily resigned, and withdrew to Cîteaux. In 1167 the abbot of Cîteaux sent him to Italy to attempt a reconciliation between the pope and emperor Frederick, but he did not succeed. The following year he endeavored to make peace between the archbishop of Canterbury and Henry II of England, who invited him to remain in his kingdom. Geoffrey became successively abbot of Fosse-Neuve in 1170, and of Haute-Combe in 1176. We have no information concerning him after 1188, though Oudin claims that he lived until 1215. He compiled the letters of St. Bernard, and his own writings have been inserted in the works of that saint. A number of his letters, together with a life of St. Bernard, and a tract against Gilbert de la Porrée, will be found in Bernardi *Opera*, vol. ii. He is considered as the author of the *Compendium Gaufridi de corpore Christi et sacramento Eucharistie*, a manuscript tract against Abelard. See Oudin, *De Scriptor. eccles.* vol. ii; *Hist. littér. de la France*, xiv, 430; Hoefler, *Nouv. Biog. Générale*, xx, 27 sq.

**Geoffrey of Monmouth** (*Gaufridus, Galfridus, Gaufridus*) was first archdeacon of Monmouth, afterwards (1152) bishop of St. Asaph. He died in 1154. He wrote a *Chronicon sive Historia Britonum* in xii books, supposed by some to be a translation from the Welsh. It is one of the sources for the legendary history of Britain. The first edition is that of Paris, 1668, 4to; the latest, that of J. A. Giles (London, 1844, 8vo). Translated. *The British History*, from the Latin by A. Thompson, Esq. (Lond. 1718, 8vo; new ed. revised by J. A. Giles, Lond. 1842, 8vo); also in Bohn's *Antiquarian Library*. See Wright, *Biog. Britann. Lit.*, Anglo-Norman Period, p. 143-149.

**Geogony**. See COSMOGONY.

**Geography**, considered as a systematic description of the earth, took its rise at a much later period than other sciences, probably because it is of less essential necessity to man; yet the elements of the knowledge out of which scientific geography is constructed must have existed as soon as men turned their attention to the earth on which they dwelt, and found it necessary to journey from one part of its surface to another. See COSMOLOGY.

1. In the absence of positive statements, we have to gather the views of the Hebrews as to the form of the earth from scattered allusions, and these for the most part in the poetical books, where it is difficult to decide how far the language is to be regarded as literal, and how far as metaphorical. There seem to be traces of the same ideas as prevailed among the Greeks, that the world was a disk (Isa. xl, 22; the word עִירְוּל, *circle*, is applied exclusively to the circle of the horizon, whether bounded by earth, sea, or sky), bordered by the ocean (Deut. xxx, 13; Job xxvi, 10; Psa. cxxxix, 9; Prov. viii, 27), with Jerusalem as its centre (Ezek. v, 5), which was thus regarded, like Delphi, as the *navel* (שֵׁבֶט; Judg. ix, 37; Ezek. xxxviii, 12), or, according to another view (Gesenius, *Thesaur.* s. v.), the highest point of the world. The passages quoted in support of this view admit of a different interpretation; Jerusalem might be regarded as the centre of the world, not only as the seat of religious light and truth, but to a certain extent in a geographical sense; for Palestine was situated between the important empires of Assyria and Egypt; and not only between them, but above them, its elevation above the plains on either side contributing to the appearance of its centrality. A different view has been gathered from the expression "four corners" (אַרְבַּע קְצוֹת, generally applied to the skirts of a garment), as though implying

The World as known to the Romans.

the quadrangular shape of a garment stretched out, according to Eratosthenes's comparison; but the term "corners" may be applied in a metaphorical sense for the extreme ends of the world (Job xxxvii, 3; xxxviii, 13; Isa. xi, 12; xxiv, 16; Ezek. vii, 2). Finally, it is suggested by Bähr (*Symbolik*, i, 170) that these two views may have been held together, the former as the actual and the latter as the symbolical representation of the earth's form. See EARTH.

In the account of creation mention is made of a spot called Eden, out of which a river, after watering Paradise, ran, and "from thence it was parted, and became into four heads" (fountains), which sent forth as many rivers—Pison, Gihon, Hiddekel, Phrat or Euphrates. See EDEN. Josephus, on this point, says (*Ant.* i, 2), "The garden was watered by one river

which ran round about the whole earth and was parted into four parts." The idea here presented is that of a vast circular plain (the earth), with water, a river, or the sea (*ὄκεανός* in Homer, *Il.* xxi, 196) encircling it, from which encircling body of water ran the said four rivers. Such, whether derived from the Hebrew Scriptures or not, was the earliest conception entertained of the earth. That some such idea was entertained among the Hebrews, even at a later period, appears from the words found in Psa. xxiv, 2: "He hath founded it (the earth) upon the seas, and established it upon the floods" (see also Prov. viii, 27); though Job xxvi, 7, "He stretcheth out the north over the empty place, and hangeth the earth upon nothing" (compare Job xxxviii, 4, 6), would seem to intimate that the writer of that book entertained superior notions on the

point. That, however, the general idea was that the earth formed an immense disk ("the circle of the earth"), above which were the substantial and firmly-fixed heavens, the abode of God, while the earth beneath was his footstool, appears from the general phraseology employed in the sacred books, and may be found specially exhibited or implied in the following passages: Isa. xl, 21 sq.; Job xxxvii, 18; Psa. cii, 25. See ASTRONOMY.

As to the size of the earth, the Hebrews had but a very indefinite notion; in many passages the "earth," or "whole earth," is used as co-extensive with the Babylonian (Isa. xlii, 5; xiv, 7 sq.; xxiv, 17) or Assyrian empires (Isa. x, 14; xiv, 26; xxxvii, 18), just as at a later period the Roman empire was styled *orbis terrarum*; the "ends of the earth" (עֲצָמוֹת הָאָרֶץ) in the language of prophecy was applied to the nations on the border of these kingdoms, especially the Medes (Isa. v, 26; xliii, 5) in the east, and the islands and coasts of the Mediterranean in the west (Isa. xli, 5, 9); but occasionally the boundary was contracted in this latter direction to the eastern shores of the Mediterranean (Isa. xxiv, 16; Zech. ix, 10; Psa. lxxii, 8). Without unduly pressing the language of prophecy, it may be said that the views of the Hebrews as to the size of the earth extended but little beyond the nations with which they came in contact; its solidity is frequently noticed, its dimensions but seldom (Job xxxviii, 18; Isa. xliii, 5). The world in this sense was sometimes described by the poetical term *tebel* (תְּבֵל), corresponding to the Greek *oikouménē* (Isa. xiv, 21).

The earth was divided into four quarters or regions corresponding to the four points of the compass; these were described in various ways, sometimes according to their positions relatively to a person facing the east, *before* (בְּפָנָיִךְ), *behind* (בְּאִחֲרֵי־פָנָיִךְ), the *right hand* (בְּיְמִינֵי־יְהוָה), and the *left hand* (בְּשֵׁמֶלֶי־יְהוָה), representing respectively E., W., S., and N. (Job xxiii, 8, 9); sometimes rela-

tively to the sun's course, the *rising* (קִרְיָא), the *setting* (סִבְיָא), Psa. l, 1), the *brilliant quarter* (קִרְיָא, Ezek. xl, 24), and the *dark quarter* (סִבְיָא, Exod. xxvi, 20; comp. the Greek *ζόφος*, Hom. *Il.* xii, 240); sometimes as the seat of the four winds (Ezek. xxxvii, 9); and sometimes according to the physical characteristics, the *sea* (יָם) for the W. (Gen. xxviii, 14), the *parched* (יָבֵשׁ) for the S. (Exod. xxvii, 9), and the mountains (הָרֵי) for the N. (Isa. xliii, 4). The north appears to have been regarded as the highest part of the earth's surface, in consequence, perhaps, of the mountain ranges which existed there, and thus the heaviest part of the earth (Job xxxvi, 7). The north was also the quarter in which the Hebrew *El-Dorado* lay, the land of gold mines (Job xxxvii, 22, margin; comp. Herod. iii, 116).

These terms are very indistinctly used when applied to special localities; for we find the north assigned as the quarter of Assyria (Jer. iii, 18), Babylonia (Jer. vi, 22), and the Euphrates (Jer. xli, 10), and more frequently Media (Jer. i, 3; comp. li, 11), while the south is especially represented by Egypt (Isa. xxx, 6; Dan. xi, 5). The Hebrews were not more exact in the use of terms descriptive of the physical features of the earth's surface: for instance, the same term (יָם) is applied to the sea (Mediterranean), to the lakes of Palestine, and to great rivers, such as the Nile (Isa. xviii, 2), and perhaps the Euphrates (Isa. xxvii, 1); mountain (הָרֵי) signifies not only high ranges, such as Sinai or Ararat, but an elevated region (Josh. xi, 16); river (נָחַל) is occasionally applied to the sea (Jonah ii, 3; Psa. xxiv, 2) and to canals fed by rivers (Isa. xli, 27). Their vocabulary, however, was ample for describing the special features of the lands with which they were acquainted, the terms for the different sorts of valleys, mountains, rivers, and springs being very numerous and expressive. We cannot fail to be

The Countries known to the Patriarchs.

struck with the adequate ideas of descriptive geography expressed in the directions given to the spies (Numb. xiii, 17-20) and in the closing address of Moses (Deut. viii, 7-9); nor less, with the extreme accuracy and the variety of almost technical terms with which the boundaries of the tribes are described in the book of Joshua, warranting the assumption that the Hebrews had acquired the art of surveying from the Egyptians (Jahn, i, 6, § 104). See TOPOGRAPHICAL TERMS.

2. We proceed to give a brief sketch of the geographical knowledge of the Hebrews down to the period when their distinctive names and ideas were superseded by those of classical writers. Like most other sciences, geography owes its elementary cultivation as a science to the Hellenic race, who, from the mythic period of their history down to the destruction of the Western empire (A.D. 476), continued to prosecute the study with more or less system, and to more or less definite results; yet it must be added that it is only in a qualified sense that the ancients may be said to have known or advanced scientific geography.

The highlands of Armenia would appear to have been the first known to the human family. Descending from these, some may have gone eastward, others westward. The latter alone are spoken of in Scripture. Coming south and west, the progenitors of the world first became acquainted with the countries lying between the Euphrates and the Tigris, roughly termed Mesopotamia, whence they advanced still more south and west into Aram or Syria, Arabia, Canaan, and Egypt. These are the chief countries with which the ancient Hebrews seem to have possessed an acquaintance; yet if the national geographical table found in Gen. x is to be referred to the early period which its position in the Bible gives it, it would appear that the geographical knowledge of the Hebrews was, even before the flood, far more extensive, embracing even "the isles of the Gentiles." See ETHNOLOGY. Other parts of Scripture by no means warrant us in ascribing to the Hebrews, before the Babylonian captivity, a wider range of knowledge than we have indicated above. This national calamity had the effect of enlarging the circle of their knowledge of the earth, or at least of making their knowledge of Assyria, Media, and Babylonia more minute and definite. It was to their neighbors, the Phœnicians, that the Israelites owed most of their geographical knowledge. This commercial people must have early acquired a superficial acquaintance with remote regions, while engaged in their maritime commercial expeditions. The knowledge they brought back to Palestine would spread beyond their own borders and reach the Hebrews, though they may not have been given to inquiry and study on subjects of the kind; nor is it safe to attempt to define at how early a period some rough notions of the isles of the Gentiles may, by means of the Phœnician navigators, have been spread about in the East. According to Clemens Alexandrinus (*Strom.* vi, 4, 36), the Egyptians had in circulation writings on geography. Their king Sesostrius may have had maps (*Schol. ad Apoll. Rhod.* iv, 292; *Goznet, Orig. des Loix*, ii, 227), though probably the first attempt to form a map (that is, a written catalogue of places, with something like their relative positions and distances roughly guessed) is to be ascribed to the men whom Joshua (Josh. xviii) sent with orders to "go through the land and describe it;" and the men "went and passed through the land," and described it "by cities into seven parts in a book."

At a later period, it is unquestionable that the Hebrews possessed a knowledge of the north-west, and a wider knowledge of the east, and even of the north of Asia (*Ezek.* xxvii; *Isa.* li, 27). From the period of the Maccabees the Jews entered into relations of a mercantile and political character, which extended their knowledge of the earth, and made them better acquainted with Asia Minor, Greece, and Italy. In the time embraced by the New-Testament history

they must have been widely acquainted with the then known world, since colonies and individuals of their nation were spread over nearly the entire surface covered by ancient civilization, and identified with the Roman empire. The occasional, if not periodical, return of the Jews thus scattered abroad, or at least the relations which they would sustain with their mother country, must have greatly widened, and made less inaccurate, the knowledge entertained in Palestine of other parts of the world. Accordingly we read (*Acts* ii, 5 sq.) that, at the effusion of the Holy Spirit on the day of Pentecost, "there were dwelling at Jerusalem Jews out of every nation under heaven."

3. The Hebrews do not seem to have devoted any attention to geography as a science, though they were widely scattered at the commencement of our era, and occupied a distinguished place in literature. The Greeks probably led the way in systematic geography. The first map is said to have been constructed by Anaximander, about B.C. 600. Nearly a century later, Hecateus of Miletus wrote a geographical work entitled *Περίοδος γῆς* (*Ukert, Geographie des Hecat. und Damastes*). These were followed by Strabo and Ptolemy. The Phœnicians and Egyptians were likewise distinguished as geographers. Ptolemy acknowledges that his great work was based on a treatise written by Marinus of Tyre (*Heeren, Commentatio de Fontibus Geographicorum Ptolemæi*, etc.). Pliny, the only Roman writer deserving of special mention in this place, was a mere compiler. As a geography his book is of little value (see *Ukert, Geographie d. Griech. u. Römer*; *Mannert, Geographie*, etc.). Sacred geography was not reduced to a system until a comparatively recent time. The *Onomasticon* of Eusebius and Jerome is an alphabetic list of places, with brief descriptions. The *Tract* of Brocardus, written in the 12th century, is little more than an itinerary. To Samuel Bochart, a French Protestant minister (born 1599), belongs the honor of writing the first systematic work on Biblical geography. His *Geographia Sacra* is a storehouse of learning from which all subsequent writers have drawn freely. Wells wrote his *Historical Geography of the O. and N. T.* in the beginning of last century. *Reland's Palæstina*, published in 1714, remains to this day the standard classic work. Dr. Robinson's *Researches* open a new era in Biblical geography. It, however, is neither complete nor systematic; it is only a book of travels, with most important historical and geographical illustrations. Ritter's *Palæstina und Syrien* aims at system and completeness, but it is too diffuse. It gives a *résumé* of everything that has been written on Bible lands. A systematic and thorough treatise on Biblical geography is still a great desideratum in literature. See ARCHEOLOGY, BIBLICAL.

Among the profane writers, Herodotus mentions Palestine, and probably Jerusalem, which he names Cadytis (*Herod.* i, 105; ii, 106, 157, 159; iii, 5, 62, 64, 91; iv, 39). Strabo (in the time of Augustus) treats of Palestine in the second chapter of his sixteenth book on Geography, mingling together much truth and much error. Ptolemy, who died A.D. 161, treats of Palestine and the neighboring countries in chaps. xv-xvii of his fifth book (see *Reland*, p. 456 sq.). Dion Cassius relates the conquest of Palestine by Pompey (xxvii, 15-17), the siege of Jerusalem by Titus (xii, 4-7), the restoration of the Temple by Hadrian, and the insurrection of the Jews under the same emperor (lix, 12-14). Of the Roman writers, Pliny, in his *Natural Hist.* (v, 13-19), treats of Syria, including Palestine, and supplies much useful information. Tacitus's *History*, from the first to the thirteenth chapter of the fifth book, also relates to our subject. He hated both Jews and Christians (*Annal.* xv, 44), and in consequence gave false colorings to much of what he said relating to them (*Hist.* v, 3, 4; ii, 79; *Annal.* ii, 42; xii, 23). Some information may also be found in Justin (xxxvi, 2), in Suetonius (*Augustus*, 93; *Claudius*, 25, 28; *Fespasian*,

4, 5; Titus, 4, 5), in Pomponius Mela (i, 2), and in Amianus Marcellinus (xiv, 8; xxiii, 1).

Among the fathers of the Church much serviceable knowledge on the subject of Biblical geography may be found in the expository writings of Theodoret and Jerome. The most important work, however, is the *Onomasticon urbium et locorum sacre Scripturæ* (ed. J. Bonfferri, 1707). Living as they did for a long time in Palestine, the writings both of Eusebius and Jerome possess peculiar value, which, however, grows less as the times of which they speak recede from their own.

Some Arabian writers are not without value. We have Edrisi, *Geographia Nubiensis* (Paris, 1619); also Abulfeda *Tabula Syriæ*, and his *Anales Muslimici*. Schultens, in his *Index Geographicus in Vitam Saladinæ* (Lugduni Batav. 1732), has collected many observations of Arabian authors on Palestine. See also Rosenmüller, *Handb. Bibl. Alterth.* i, 34; Ritter, *Erdkunde*, ii, 478;—Kitto, s. v.; Smith, s. v. Earth.

Modern works of travel in Bible countries have contributed much original information on this subject. They are too numerous, especially those on Palestine (q. v.), to be enumerated here in detail. Some of them may be seen in Darling's *Cyclopædia*, col. 1819 sq.; and most of them are referred to under each country in this work. The following lists embrace the most important in the several classes, including the above:

a. *Ancient and Mediæval Writers who have incidentally furnished Information on Sacred Geography.*—The chief text-book is of course the Bible. Next to this are (1.) *Jewish*—The *Apocrypha*; Josephus, *Opera* (ed. Hudson, 1720, 2 vols. fol.). Traill's translation of the *War* (London, 1851, 2 vols.) contains important notes and illustrations. (2.) *Heathen*—Herodotus, especially Rawlinson's translation (Lond. and N. York, 1858-60, 4 vols.); Strabo, *Geographia* (ed. Casaubon, Geneva, 1587); Pliny, *Historia Naturalis* (ed. Sillig, Geneva, 1831-36, 5 vols.). Dio Cassius (Hamburg, 1752) gives some short notes on Palestine. The few remarks in Tacitus and Livy are of little value. (3.) *Christian*—Eusebius, Socrates, Sozomen, and Theodoret, in *Historiæ Ecclesiæ. Scriptor. Græci* (1635, 3 vols. fol.); Jerome, *Opera* (ed. Migne, 9 vols. 8vo); Theodoret, *Opera* (ed. Migne, 5 vols.). In the exegetical writings of Jerome and Theodoret are some useful notes; they both resided in Palestine. William of Tyre, *Historia Belli Sacri*; James de Vitry, *Historia Orientalis*, etc. (these two works, with several others, are contained in Bongier's *Gesta Dei per Francos*, fol. 1611); *Chronicles of the Crusades* (ed. Bohu, 1848), containing Richard of Devizes, Geoffrey de Vinsauf, and De Joinville.

b. *Geographical Works and Itineraries.*—Ptolemy, *Geographiæ* (fol. 1535); *Tabula Peutingeriana*, a rude chart of the Roman empire, made in the 3d century. Reland gives the part including Palestine. Eusebius and Jerome, *Onomasticon Urbium et Locorum S. Scripture* (ed. Clerico, fol. 1707; last edit. by Larsow and Parthey, Ber. 1862); *Vetera Romanorum Itineraria* (ed. Wesselingio, 1735), containing the important itineraries of the Bordeaux pilgrim, and of Antonine, with *Synektismus* of Hierocles; Edrisi, *Geographia Universalis* (in Rosenmüller's *Annot. Arabica*, 1828); Topographical Index in *Behandlung Vita et Res Geste Saladinæ* (ed. Schultens, folio, 1732); Brocardus, *Locorum Terre Sæc. Descriptio* (ed. Clerico, appended to the *Onomasticon*, folio, 1707); Abulfeda, *Tabula Syriaca* (1766); Bochart, *Opera* (ed. Leusden et Villemadan, 1712, 3 vols. fol.); Sanson, *Geographia Sacra* (ed. Clerico, folio, 1701); Caroli A. S. Paulo, *Geographia Sacra* (ed. Holsten, fol. 1701); Cellarius, *Notitia Orbis Antiqui* (1701-5, 2 vols. 4to); Wells, *Historical Geography of the O. and N. T.* (1819, 2 vols.); Reland, *Palestina e monumentis veteribus Illustrata* (1714, 2 vols. 4to); Busching, *Erdbeschreibung*, Palästina, Arabien, etc. (1785); Rosenmüller, *Bib. Geogr. of Central Asia* (by Morren, 1836, 2 vols.); Raumer, *Palästina* (1850); Forster, *Historical Geography of Arabia* (1844, 2 vols.);

Röhr, *Historico-Geograph. Account of Palestine* (1843); Ritter, *Die Sinai-Halbinsel, Palästina und Syrien* (1848-55, 4 vols. in six parts; an English transl. has appeared, Lond. 1868, 2 vols.); Kitto, *Physical Geography of Palestine* (1841, 2 vols.); Conybeare and Howson, *Life of St. Paul* (1855, 2 vols. 4to); Smith, *Voyage and Shipwreck of St. Paul* (2d ed. 1856); Porter, *Hand-book for Syria and Palestine* (1858, 2 vols.); Van de Velde, *Memoir of Map of Palestine* (1858); Robinson, *Phys. Geog. of the Holy Land* (1865).

c. *Books of Travel.*—Wright's *Early Travels in Palestine* (1848, containing, among others, Arculf, Sæwulf, Benjamin of Tudela, Maundeville, and Maundrell); Cotovicus, *Hicvarium Hierosolymitanum* (1619); Quaresmius, *Historia Theologica et Moralis Terre Sanctæ Elucidatio* (1639, 2 vols. fol.); D'Arvicus, *Travels in Arabia the Desert* (1732); Shaw, *Travels in Barbary and the Levant* (1808, 2 vols.); Pococke, *Description of the East* (1743-45, 2 vols. fol.); Hasselquist, *Travels in the Levant* (1766); Niebuhr, *Travels through Arabia* (1792, 2 vols.); Volney, *Voyage en Syrie*, etc. (Paris, 1807, 2 vols.); Ali Bey, *Travels in Morocco, Egypt, Syria*, etc. (1816, 2 vols. 4to); Seetzen, *Risen durch Syrien, Palästina*, etc. (1854-55, 3 vols.); Burckhardt, *Travels in Syria* (1822, 4to); *Travels in Arabia* (1829, 4to); *Notes on the Bedouin and Wahabys* (1830, 4to); *Travels in Nubia* (1822, 4to); Buckingham, *Travels in Palestine* (1822, 4to); *Travels among the Arab Tribes* (1825, 4to); Irby and Mangles, *Travels in Egypt and Nubia, Syria, and Asia Minor*, etc. (1822); Laborde, *Journey through Arabia Petrea to Sinai and Petra* (1838); Lord Lindsay, *Letters on Egypt, Edom, and the Holy Land* (1838, 2 vols.); Addison, *Damascus and Palmyra* (1838, 2 vols.); Bowring, *Report on Statistics of Syria* (1840); Williams, *The Holy City* (1849, 2 vols.); Bartlett, *Forty Days in the Desert* (5th ed.); *Walks about Jerusalem; Jerusalem Revisited* (1855); *Footsteps of our Lord and his Apostles* (1852); Wilson, *Lands of the Bible* (1847, 2 vols.); Tobler, *Bethlehem* (1849); *Topographie von Jerusalem und seinen Umgebungen* (1853-54, 2 vols.); Lynch, *Official Report of Expedition to Explore the Dead Sea*, etc. (1852, 4to); *Narrative of Expedition*, etc. (1849); De Saulcy, *Narrative of Journey round the Dead Sea*, etc. (1853, 2 vols.); Van de Velde, *Narrative of Journey through Syria and Palestine* (1854, 2 vols.); Lepsius, *Discoveries in Egypt, the Peninsula of Sinai*, etc. (1853); Robinson, *Biblical Researches in Palestine in 1838-52*, 2d edit. (1856, 3 vols.); Porter, *Five Years in Damascus, Researches in Palmyra, Lebanon, and Bashan* (1855, 2 vols.); Layard, *Nineveh and its Remains* (1849); *Nineveh and Babylon* (1853); Loftus, *Chaldaea and Susiana* (1857); Stanley, *Sinai and Palestine* (1856); Thomson, *The Land and the Book* (1858). In addition to the above, important articles on Biblical Geography and Topography may be seen in various numbers of the American *Bibliotheca Sacra*, the *Journal of Sacred Literature*, and the *Journal of the Royal Geographical Society*, by Robinson, Thomson, Porter, Rawlinson, Layard, Wallin, Peole, Ainsworth, and others.

d. The best small maps are those in Robinson's *Researches* (1st edit.) and Porter's *Hand-book*; Van de Velde's large map of Palestine is the most complete and accurate hitherto published (2d ed. 1865); Henke's *Bibel-Atlas* (Gotha, 1868) is valuable for the ancient divisions.—Kitto, s. v.

**Geology**, the science that treats of the earth's crust, its rocky strata, and the fossil remains found in them. Its interest to the Biblical student chiefly arises from its bearings upon the Mosaic account of the creation. (See McCaul, *Notes on Gen. i* [London, 1861]; Challis, *Creation* [Lond. 1861]; Pratt, *Genealogy of Creation* [Lond. 1861]; *Christ. Remembrancer*, Apr. 1861; *Evang. Review*, Oct. 1861; Keel, *Einb. d. bib. I. *History of the Inquiry.*—(This we condense from Pattison, *The Earth and the Word*, Lond. 1858, p. 123–129.) The prevalent opinion among the learned for upwards of two centuries after the revival of letters was that organic remains were mere mineral concretions. Hypotheses were invented purporting to account for their production in methods quite worthy of the school of subtle philosophy whence they issued. This was maintained, not by obscure monks, but by really accomplished persons, the lights of natural history in their day, such as Fallopio, Mercati, and Olivi in Italy, Plot and Lister in England, and Agricola in Germany.

The excavations made for repairing the city of Verona in 1517 brought to light a number of fossil remains, the appearance of which exercised the wits of that time; and, among others, Fraecastoro boldly expounded their true meaning and relations. He declared that they had not originated in any such "plastic force" as was pretended, nor could they have been the results of the waters of the deluge. After having been thus rescued from the mineral kingdom, they were, however, universally attributed to the deluge. Fabio Colonna, in 1600, and the whole of the Italian writers of this period, considered that all petrifications were the remains of the Noachian deluge.

In 1669, Steno, a Dane, attached to the court of Tuscany, expounded the true theory of organic fossils; he labored to harmonize his views with Scripture by selecting strata which appeared to him to be unfossiliferous, and treating them as having been created before the existence of animals and plants. In 1676, Quirini contended that the diluvial waters could not have effected all the operations attributed to them, and maintained that the universality of the Mosaic deluge was not to be insisted on. In 1688, Robert Hook, in his posthumous treatise on earthquakes, assigns to organic remains their true character, and supposes that some species may have been lost. In his diluvial theory he attempts to crowd into the time between the creation and the deluge, and into the latter, all the visible phenomena of upheaval or dislocation.

In 1690, Dr. Thomas Burnet, in his *Sacred Theory of the Earth*, describes the earth at the beginning as a fluid mass composed of all kinds of materials. The heaviest descended to the bottom and formed a solid kernel, around which the waters, and afterwards the atmosphere, united; but between the water and atmosphere there was formed an oily stratum, which received, little by little, all the earthy constituents with which the air was still charged. On this consolidated bed, marshy, thin, uniform, level, without mountains, without valleys, without either seas or rivers, lived

the antediluvian generations. At this epoch the marshy crust, dried up by the heat of the sun, split, and fell down in the great abyss of waters. From thence came the universal deluge, the disarrangement of the axis of the globe, and the changing of climates. The earth, thus drowned, had still some cavities into which the waters entered, little by little, and so returned to their subterranean reservoir. Thus the ocean is a part of the great abyss, the isles are the fragments,, the continents are the great residuary masses of the old world. To the confusion brought about by the breaking up of the waters are owing the mountains and other undulations that we now see. This is a specimen of a large class of writings which passed for the effusions of learning and piety in the Augustan age of English literature.

In 1686, Whiston, the great astronomer, published his new theory of the earth. He conceived of the earth as still having in its midst a solid and burning kernel, retaining the heat which it received from the sun when it was only the nucleus of the comet, and continually spreading it towards its circumference. This nucleus is it-self surrounded by a great abyss, which is composed of two rings, of which the lower is a heavy fluid, and the upper water; it is this layer of water which constitutes the foundation of our earth. The deluge was occasioned by another comet striking the earth, and was the parent of all the disturbances now manifest in its crust.

About 1680 the great Leibnitz wrote of the earth as an extinct sun vitrified. According to him, its greater portion was the subject of a violent fire, at the time when Moses tells us that the light was separated from the darkness. The fusion of the globe produced a vitrified crust; when the crust was cold, the humid parts, which had risen in vapor, fell again, and formed the ocean. The sea then deposited calcareous rocks. It at first enveloped all the surface of the globe, and surmounted the higher parts which at present form the continents and isles. Thus the shells and other rubbish of marine animals that one finds everywhere prove that the sea has covered all the land; and the great quantity of fixed salts, of sand, and other matters, fused and calcined in the earth, testify to the universal fire, and that it preceded the existence of the sea.

In 1695, Dr. Woodward, in his *Discourse on the Natural History of the Earth*, most ably vindicates the proper nature of organic remains, and disposes of the views of those who attribute them to casual inundations, or to the wash of the sea when the land was first made; but he is equally unsuccessful in the formation of a hypothesis with his predecessors. He holds that at the deluge the solid strata of the earth were dissolved in the water; the remains of animals sank down and became imbedded according to their relative gravity.

In Italy, Vallisneri, finding by his own careful observations that the facts were not in accordance with the theories then in vogue, which were affirmed to be founded in the interpretation of Scripture, attacked the interpreters, and demonstrated that they were in error. He wisely contented himself with recording his own observations, and would not attempt the construction of a theory.

In 1740, Moro, on the other hand, with much that is valuable in his onslaught upon other cosmogonists, fell into the error of becoming one of their number. His theory, however, is much more consistent, as well as reverential to the truth, than that of any of his predecessors.

In 1749, Buffon published, like his fellow philosophers, a theory of the earth, which is now found in the first part of his collected works. It is a free and easy way of world-making with the aid of a sun, a comet, volcanic and aqueous forces at pleasure. The Sorbonne required him to recant so much of his work

as expressed the sentiment that the waters of the sea had produced the land, and then left it dry, and that the land was again, by wear and tear, gradually merging into the sea. The recantation is published with his works. These gorgeous dreams cost their author forty years' thought, and enjoyed uncommon reputation. Even now their decision of tone and eloquence of statement command an interest.

In 1756, Lehmann, the German mineralogist, confined the action of the flood to the production of a few only of the rocks, and assigned the unfossiliferous strata to the original creation, and the conglomerates to an intermediate revolution.

In 1760, Michell, who held for eight years the Woodwardian professorship at Cambridge, showed himself the true predecessor of modern geology. Neglecting cosmogony altogether, and applying himself to the description of the strata as they appeared under his own observation, he discovered the true sequence of the beds, and indicated a direction in which the geologist might pursue his labors without infringing on theology.

After Michell, the visions of the cosmogonists were again reproduced by various English writers. Sound geology, however, began to take precedence of world-making; the actual wonders of the subterranean world were preferred to the gay creations of the world-makers. Hutton, William Smith, and a host of followers, comprising Cuvier and Brogniart, kept the republic of letters well employed in acquiring the grammar of the new science, which was created by physical researches into the strata and their contents. Henceforward cosmogony assumes a second-rate position.

De Luc, in 1799, wrote the chronology of Moses, as only commencing with the creation of man; and of the days of creation as being not natural days, but indefinite periods. A long line of illustrious men, many of whom are now living, diverted attention from the vain attempts of the early philosophers, and occupied themselves exclusively with descriptive geology. A classification of opinions—taking only the views of the leading men—will serve to show, in a general way, what has been said and done for the last fifty years in this department of knowledge. The following are the principal hypotheses:

1. That the days of creation are indefinite periods, during which all the phenomena of geology occurred; that the deluge is now marked by the drift and gravel remains of the post-tertiary age (Cuvier, Parkinson, Jameson, and others).

2. That the first sentence of Genesis has no connection with the subsequent verses. The phenomena of geology have place between the first and second verses. The chaos was universal, and ushered in the present creation (Chalmers, 1804. See also *The Earth's Antiquity in harmony with the Mosaic Account of Creation*, by James Gray, M.A., 1849).

3. That the earth that now is was the bed of the ante-diluvian sea. That all the phenomena now visible resulted from operations in the interval between the creation and the end of the deluge. That, save this, the rocks were created as they now exist (Granville Penn, Young).

4. That we cannot rely on an interpretation of the Hebrew records, and therefore we may set them aside when apparently at variance with geological facts (Babbage).

5. That the records are poetical representations, and not historical (Baden Powell).

6. That the first verse is a detached account of the original creation. The chaos, the six days' creation, and the flood were local phenomena, and refer to what was transacted in the province occupied by man only (Dr. Pye Smith).

7. That the "days were great natural periods. The Palaeozoic system, pre-eminently that of plants, is the work of the third day; the secondary, pre-eminently

the epoch of sea-monsters and creeping things, is the work of the fifth day; and the tertiary, the time of mammalian creatures, is the work of the sixth day" (Hugh Miller).

8. That the Mosaic narrative is a revelation made in visions to the mind of the prophet; the days are therefore spoken of not in connection with the events, but the duration of the vision. The events occurred in extremely lengthened periods. The deluge was partial (Lime, *Mosaic Record in harmony with Geological*, 1854; Poole, *Genesis of the Earth and Man*, 1856).

9. That all creation took place consecutively, according to the literal reading of Gen. i. All things, fossil and recent, form part of one whole system of life, and were created at once on the successive days of creation. That the fossil species have become gradually extinct, and their remains buried by disturbances occurring from the first (L'abbé Soignet, *Cosmogonie de la Bible*, Paris, 1854).

10. P. H. Gosse (*Omphalos*, Lond. 1857). The theory of this writer is a reproduction of Granville Penn, with a dash of the old, arbitrary, anti-geologic notion of the creation of the rocks, with fossils complete as they are. He affirms a principle which he calls the law of "Prochronism," in virtue of which the strata of the surface of the earth, with their fossil flora and fauna, may possibly belong to a "prochronic" (i. e. to an unreal and symbolical or typical) development of the mighty plan of the life history of the world.

The preceding account, though it is only a very general view of the principal hypotheses on this subject, yet sufficiently shows how the minds of the framers have felt the power of the sacred writings. They have done homage, unconsciously in many instances, to divine truth, by acknowledging the necessity of accordance with it, however widely they have diverged from its plain teaching. It is a notable instance of the commanding power of the Scriptures that thus, through ages of ignorance and periods of enlightenment, they should still have been the polestar, guiding all voyagers in their pathless track towards the unknown.

11. We have reserved until last, as being, on the whole, the most comprehensive and satisfactory, the conclusions of Mr. Crofton, which have now for some years been before the world (originally sketched in *Kitto's Journal*, Jan. 1850), and have not been refuted by any philologer. He affirms that, apart from geological considerations, and judging from analogy with Scripture alone, the interpretation of the sacred volume renders the following ten propositions credible.

(1.) That the absolute age of our earth is not defined in the sacred volume.

(2.) That there may have been a long interval in duration between the creation of "the heaven and the earth" mentioned in the first verse of the first chapter of Genesis and the continuation of the earth's history in the second verse.

(3.) That the term "the earth" does not apply necessarily, in every instance, to the whole of our planet, but sometimes only to a part of it.

(4.) That the state of the earth, described in the second verse as "without form and void," does not necessarily mean matter never reduced to form and order, but may signify matter reduced to disorder, after previous organization and arrangement.

(5.) That the "darkness" "upon the face of the deep," also mentioned in the second verse, is not negative of the previous existence of light, but may have been only a temporary one.

(6.) That the commencement of the account of the first six days' creation dates from the beginning of the third verse, "And God said, Let there be light."

(7.) That the act of "the first day" does not necessarily signify the creation of light, but may have been only the calling of it into operation upon the scene of "darkness" described in the second verse.

(8.) That the calling of "the light Day" and "the darkness Night," with the declaration that "the evening and the morning were the first day," does not necessarily imply that this was the first day, *absolutely* speaking.

(9.) That the work of "the second day," mentioned in the sixth, seventh, and eighth verses, may have been only an operation performed upon the atmosphere of our earth.

(10.) That the work of "the fourth day," described from the fourteenth to the eighteenth verses, does not necessarily imply that the sun, moon, and stars were then first created or formed, for the first time, from pre-existent matter; but may only have been that they were then, for the first time in the detail of the history of the present earth, made visible to it, and ordained to their offices with respect to the coming human creation (*Genesis and Geology*, Lond. 1852; Phila. 1853).

II. *Controversy between Geologists and Theologians.*— "The kindred sciences of geology and palæontology cannot yet be said to have been in existence more than eighty years. But they had scarcely begun to assume the form and lineaments of sciences when that jealousy, which has never since the days of Galileo ceased to exist to some extent between the religionist and the natural philosopher, began to evince itself. The religionist was alarmed by rumors that the rocks, under the searching eye of the geologist, disclosed a state of facts which was wholly at variance with the Mosaic detail of the manner and order of the creation; and the studies of the geologists were, without much inquiry, condemned and denounced, in no very measured terms, as destructive of the doctrine of the divine inspiration of the Scriptures, and as infidel in their inception and tendency. On the other hand, the man of science was not slow in retorting that, if the record of Moses was of divine origin, it had nothing to apprehend from the development of facts; and that, if it could not bear the test of physical truth, it must give way, even though it stood on the threshold of the treasury of inspiration; for that, in such a crisis, the testimony of the senses with which man has been endowed for his guidance must prevail against mere matters of faith. In argument the man of science had the advantage, but in practice he erred by too frequently assuming geological facts and Scripture interpretation without sufficient inquiry, and so contributed, by hastily formed conclusions, to put asunder the word and the works of God, which, by the decrees of Omniscience, must ever be joined together.

"The contest, in its early stages, was carried on by those religionists who construed the Mosaic days of the creation to have been six successive natural days of twenty-four hours each, measured by the revolution of our globe on its axis; and the objection of the geologist was founded on the obvious impossibility or absurdity that the world could have been stocked with the various animal and vegetable organisms, whose remains have been found in the crust of the earth, in the brief period of the six natural days that preceded the birth of Adam. The evidence was incontrovertible that for untold ages before that event generation upon generation of extinct animals had lived and died upon the earth.

1. "To meet this difficulty, which threatened to blot out the first page of the Scriptures from inspired revelation, and which was obviously subversive of the authenticity and inspiration of all Scripture, a host of champions arose, who, instead of examining with patience and testing with care the alleged facts of geology, recklessly denied their existence, or sought to explain and account for them on wholly inadequate, and in many instances on false and absurd principles and grounds. Some ascribed the existence of fossil remains to the flood in the days of Noah; others to what was termed a plastic power that existed as one

of the natural laws of matter; and others, again, insisted that the various systems of rocks were created by the fiat of the Almighty with the fossil remains of animals that had never lived, and of plants that had never grown, imbedded in them. These were the reasonings of Granville Penn, Fairholm, Kirby, Sharon Turner, Gisborne, Taylor, dean Cockburn, etc.; and of them it is unnecessary to say more than that the progress of scientific discovery has extinguished their arguments, not only without injury to the cause of Scripture truth, but with the effect of establishing it on a surer basis.

2. "Another class of inquirers sought to solve the difficulty by conceding the well-established facts of geology and the geological explanations of those facts, but suggesting that the imperfection of our knowledge of the original Hebrew at the present day was such as to preclude all certainty of a right interpretation of its meaning. This was the position of Babbage; while Baden Powell insisted that the narrative of the creation is couched in the language of mythic poetry, and was not intended to be a historical detail of natural occurrences. It is satisfactory to know that the necessity for arguments so injurious in their tendencies to the cause of the truth and integrity of the Bible no longer exists; for the precision of the Mosaic phraseology will be found confirmed by every step that has been taken in the development of the truths of geology.

3. "At an early period of this controversy, Dr. Chalmers, whose sagacious mind and prudent foresight comprehended the importance of this issue between the facts of geology and the language of the Scriptures, propounded the proposition that 'the writings of Moses do not fix the antiquity of the globe'—that after the creation of the heavens and the earth, which may have comprehended any interval of time and any extent of animal and vegetable life, a chaotic period ensued, when death and darkness reigned upon our globe, and the earth became, in Scripture language, 'without form and void,' and all that had previously existed was, by some catastrophe, blotted out, and a new world of light and life produced, by fiat of the Deity, in a period of six natural days, closing with the birth of Adam; and thus the world which now exists was cut off from that which preceded it by a period of black, chaotic disorder. The geologist had thus ample room for the existence of all the organisms whose remains are found in the rocks that compose the crust of the earth, and he might labor in his investigation of the nature and order of geological events without endangering the truth of the Mosaic record of the creation" (Kitto).

Against this view Dr. Conant urges several objections (*Revised Version of Genesis*, p. xx), the force of which, however, may in a great measure be readily parried. 1. The sacred writer himself gives no intimation of such an interval. Of course not, since its mention forms no part of his plan. An *argumentum a silentio* is wholly invalid. It is sufficient if a space can be found in point of fact. 2. It assumes that Moses has given us an account of only a *part* of the creative work. But no one claims that he has given all the details of creation, or even a complete outline of it. His object was merely to state so much as stands connected with *human* history; and on the view in question, this is more perfectly done than by any other interpretation, since it was the last creative stage by which the earth was specially fitted for man's abode. 3. Science shows no such convulsion in the period preceding man's introduction on the earth. On the contrary, an innumerable series of such cataclysms are revealed between the various strata of the earth's crust, and there is special evidence of some general ice-wave almost immediately preceding the historic period, in the phenomena of drift, boulders, and striated rocks, all of which are everywhere strewn upon the present surface of the globe. 4. Six extended cre-

ative periods allow time for the operation of second causes, such as were obviously at work for long ages in the formation of the earth, whereas six mere days would be no more called for than a single instant, such as that in which the Almighty fiat evoked the primitive matter into being. But we are not competent to prescribe what would be a worthy process for the Creator, and this objection overlooks the moral significance of these week-days as compared with the Sabbath. Besides, the theory in question affords equal scope with any other for the cycles of geogony, geology, and geontology, while it brings the inspired narrative closer to man's present home, with his animal and vegetable companions. For example, on the opposite view, little propriety could be made out of the historical statement, Gen. ii, 19, 20: "Now Jehovah God had formed from the ground every living [thing] of the field, and every bird of the heavens, and brought [each] to the man to see what he would call it; so [that] whatever the man might call it [as] a living creature, that [was] its name; accordingly, the man called names to all the cattle, and to the bird of the heavens, and to every living [thing] of the field; but for the man [one] did not find a helper as his counterpart [(or mate)]." Surely Adam did not call forth in review the fossil forms of long-extinct species from the bowels of the earth; and yet he must have done so if the animated tribes just spoken of, which are obviously the same with those of the sixth demurgic day, were those of the geological ages. The advocates of a literal—although not local—creation on the sixth day are at liberty to apply the above-quoted language to an inspection of merely the surrounding creatures, or those inhabiting the garden of Eden along with Adam, as specimens of the various races roaming the earth—as in the case of the animals assembled from his own neighborhood by Noah into the ark [see DELUGE]; for their interpretation gradually narrows down the scope of the Mosaic cosmogony to man's special accommodation; but this symbolical theory, being throughout of cosmopolitan extent, requires all its terms to be taken in their most universal application. Indeed, in order to be consistent, it should not be content with the creation of a single human pair, and their location in a particular spot; but it really favors the modern skeptical demand for an aboriginally widespread humanity in various independent centres of origin. See ADAM.

The objections of Kalisch (*Commentary on Genesis*, p. 48 sq.), who concludes that, "with regard to astronomy and geology, the Biblical records are, in many essential points, utterly and irreconcilably at variance with the established results of modern researches" (p. 52), are as follows: (1.) That the connecting <sup>ו</sup>, and, of ver. 2, "expresses immediate sequence." So little force is there in this as an absolute or universal remark, that the connection in question occasionally appears at the beginning of a book (Exod. i, 1; 1 Kings i, 1; Ezra i, 1) or even an isolated epistle (2 Kings v, 6; x, 2). See Gesenius, *Thesaurus*, p. 395, h. (2.) Exod. xx, 11, "For in six days the Lord made the heaven and the earth," etc., so far from being "in direct opposition" to this view, is in exact agreement with it, since that expression, which is a mere repetition of the summary statement in Gen. ii, 1, contains not one syllable concerning the creation (it is <sup>וַיִּבְרָא</sup> there, not <sup>וַיִּשְׁרַב</sup>, as in Gen. i, 1) of matter. The formula "heavens and earth" in Gen. i, 1 denotes the *universe*, as its absolute position there shows; whereas in Exod. xx, 11 it merely designates the sky and the land as subdivisions of our planet, in distinction from the sea, which is immediately added to embrace the whole. (3.) "In Matt. xix, 4 man is said to have been created 'in the beginning,' the work of the sixth day was therefore believed to be coeval with the time specified in the first verse." This is a piece of reason-

ing which refutes itself. (4.) "The earth could not have been termed 'dreary and empty' if it [had] teemed with life and vegetation long before." Certainly it could if this life and vegetation had been destroyed, as we suppose. (5.) For the same reason, the argument cited by the same author (p. 45) from Hugh Miller (*Testimony of the Rocks*, p. 121, 122) is inapposite here, that "for many ages ere man was ushered into being not a few of [the species of] his humble contemporaries of the fields and woods enjoyed life in their present haunts, and that for thousands of years previous to their appearance many of the existing [species of] mollusks were in our seas;" for these species may very readily have been *recreated*, on the theory we are now advocating, even if they had been exterminated just before the period of man—which, however, does not necessarily follow, for their germs may have survived the cataclysm supposed.

The objections which Dr. Taylor Lewis urges against this "chasm theory," as he styles it, and which he regards as "the most difficult as well as the most unsatisfactory" of all the proposed solutions, are still less forcible (Lange's *Commentary on Genesis*, p. 167): 1. The incongruity between the events spoken of before and after the chasm. But on this theory there is *no* direct connection. 2. Want of natural or moral reasons for the alleged catastrophe. But no catastrophe is stated in the narrative; it is only an inference of modern times. 3. The theory is evidently brought in as an escape from geological difficulties. That is little against it, for all the modern explanations are but ingenious devices to meet some speculative view, except the bald one that holds to the literal creation of the universe in six periods of twenty-four hours each. On the other hand, the interpretation under consideration simply allows Moses to say nothing about matters with which he had nothing to do. We protest against making him wise in all the modern scientific ratiocinations. 4. It makes the "heavens" of ver. 1 different from those of ver. 8. This is true only as to the *extension* of the term, which the different character of the two contexts requires us to vary. Does any reasonable interpreter suppose the mere *sky* alone to be meant in ver. 1, as in ver. 8? 5. The connecting <sup>ו</sup>, "and," does not admit "so sharp and remote a severance" in the history. We may reply that there was no wide gap in the imagination of the writer; it exists only in the mind of the modern savant. But, supposing that Moses did know all about the period thus ignored by him, every Bible reader is aware how often such gaps are silently bridged by the conjunction in question, which might almost be described as a "disjunctive" rather than a copulative. The erudite objector himself candidly admits (p. 130) that such minute grammatical points as the tense of the verb <sup>וַיִּבְרָא</sup>, "was," instead of <sup>וַיִּשְׁרַב</sup>, as well as the question whether the first day is exclusive or inclusive of the "beginning," are inconclusive.

On the other hand, the sacred text itself discloses several positive indications of such a hiatus as we have supposed between verse 1 and 2 of Gen. i. (1.) The term "beginning" implies a sequel or later stage of creation, especially as it stands in so emphatic a position and absolute a form. (2.) The act here designated by the word "created" is not a general one, of which the details follow, but one totally distinct in kind from them, namely, the *aboriginiation* of matter itself: hence it is not used again until the bringing into existence of animal life is specified. (3.) Accordingly, the phrase "heavens and earth," although expressive of the universe, does not mean the celestial and terrestrial worlds as such, or as now extant, but merely their elementary state or materials. This will be disputed by few if any interpreters. But thus, under any theory, a long interval must have elapsed between this primordial state of matter, and its organization or crystalli-

zation into the most rudimentary forms to which it is possible to apply the statements of the succeeding verse. (4) For "the earth" is there spoken of separately as at least a segregated globe, and special prominence is given to it by its emphatic position in the sentence, as well as by the strong disjunctive accent placed upon it by the Masoretes, whereas the reduction of the heavenly bodies to their present order is not spoken of till a much later point—a fact utterly irreconcilable with the view that makes the latter phenomena coincide with their astronomical production.

(5) The force of the substantive verb  $\text{הָיָה}$ , "was," which, as being *expressed* in ver. 2, is not the simple copula, adds intensity to this distinction of the terrene from the aerial sphere, and shows that the writer has descended from the universal creation to our own planet as the immediate abode of man. Now, although the verb in question ought not perhaps, with some, be rendered *became, remained*, etc., yet as the equivalent of  $\text{ἔπαυσα}$ , in distinction from  $\text{εἶπὶ}$ , it certainly serves to point out a particular condition of the earth at a definite stage of its history as an actual event in contrast with its later and prior state; q. d. "The earth, however, still existed as," etc. (6) The peculiar phrase employed to describe the condition in question is even more conclusive of this interpretation; for not only is this not an adjective, which would have expressed simple quality, but the nouns  $\text{תִּבְיָהּ}$ ,  $\text{תִּבְיָהּ}$ , literally *wasteness and desolation, or emptiness and vacuity* (for both these ideas are implied, and the two words are almost synonymous), used superlatively by way of reiterated asseveration, are both expressive of a positive rather than a negative fact, the result of an active cause, and not a mere continuance of disorder or the absence of organic principles, q. d. "wreck and ruin" (compare Isa. xxxiv, 11, "He shall stretch out upon it the line of confusion [*ḥōhu*], and the stones of emptiness [*bōhu*]," speaking of the complete demolition of a city). (7) The same picture of devastation is contained in the parallel terms  $\text{תְּהוֹמוֹת}$ , *abyss*, and  $\text{תְּהוֹמוֹת הַיָּם}$ , *surface of the water*; by which the face of the globe (not its interior) is represented as a vast and billowy sea, just such as an arctic deluge or a suddenly melted *mer de glace* would exhibit. (8) Finally, the *brooding* ( $\text{רַחֵם}$ ) of the divine Spirit over this dark and turbid nest (not chaotic world-egg) does not exclude all previous creative or reductive energy, but rather implies the already fecundated germ or organized embryo, which only needed incubation to bring it to perfection and manifestation. The *semina rerum* survived the extinction of the parent races, and a fresh brood was to repopulate the globe. Or perhaps the figure may still better be interpreted of the fledgling earth, chilled and stunned by the recent catastrophe, nestling for warmth and protection beneath the genial wings of its Creator, to gather new vigor for the final essay at independent life and action.

4. "Dr. Pye Smith, in his *Geology and Scripture*, suggested that the chaotic period had been confined and limited to one particular portion of the earth's surface, viz. that part which God was adapting for the dwelling-place of man and the animals connected with him. This section of the earth he designates as 'a part of Asia lying between the Caucasian range, the Caspian Sea, and Tartary on the north, the Persian and Indian seas on the south, and the mountain ridges which run, at considerable distances, on the eastern and western flanks;' and he suggests that this region was brought by atmospheric and geological causes into a condition of superficial ruin, or some kind of general disorder. This theory left to the geologist his unbroken series of plants and animals in all parts of the world, with the exception of this particular locality. But the explanation was never received with favor, and was obviously inconsistent with the language of

Scripture, inasmuch as the term 'the earth,' in the first verse of the first chapter of Genesis, embraces the whole of the terrestrial globe, and 'the earth' that is, in the next verse, described as 'without form and void,' cannot be more restricted in its meaning and extent." This theory, however, is maintained by one of the latest expositors of this portion of Scripture (Murphy, *Commentary on Genesis*, ad loc.).

5. Another scheme of reconciliation of Scripture and geology has for its foundation the assumption that the Mosaic days designate periods of vast and undefined extent—that the six days of creation portray six long periods of time, which commenced with "the beginning," and have succeeded each other from thence through the various scenes depicted by Moses, up to and inclusive of the creation of man; and that the seventh day, on which God rested from his work of creation, is still current. Against such a construction of the word "day" in the Mosaic record, Dr. Buckland, who was one of the advocates for the natural-day interpretation, asserts that "there is no sound critical or theological objection;" an admission, however, which there is abundant reason to dispute. See DAY.

"Long before the question had assumed the importance and interest which the discoveries of geology have given to it, many well-informed philologists advocated the opinion that the Mosaic days were periods of long duration. Among the Jews, Josephus and Philo, and of Christians, Whiston, Des Cartes, and De Luc, have so expressed themselves; while of those who have written with full knowledge of geological facts, we have Cuvier, Parkinson, Jameson, Silliman, and Hugh Miller—all of them holding the opinion that the Mosaic days of creation were successive periods of long duration." Nevertheless, in a hermeneutical point of view, this theory is open to the gravest objections. See COSMOGONY, MOSAIC.

The statement of Prof. Taylor Lewis is perhaps the most finished form of this fashionable theorizing, namely, that, as St. Augustine expresses it, "common solar days are mere *vicissitudines calidæ*, mere changes in the position of the heavenly bodies, and not *spatia morarum*, or evolutions in nature belonging to a higher chronology, and marking their epochs by a law of inward change instead of incidental outward measurements. . . . This is not a metaphorical, but the real and proper sense of the word 'day'—the most real and proper, the original sense, in fact, inasmuch as it contains the essential idea of cyclicity or rounded periodicity, or self-completed time, without any of the mere accidents that belong to the outwardly measured solar or planetary epochs, be they longer or shorter. . . . Wonderful things are told out of the common use of language, and therefore common terms are to be taken in their widest compass, and in their essential instead of their accidental idea. . . . No better term could be used for the creative *moræ*, pauses, or successive *naturæ*, as Augustine styles them; and so no better words than 'evening' and 'morning' could be used for the antithetical vicissitudes through which these successions were introduced" (Lange's *Genesis*, p. 131). This appears to us a gratuitous assumption of the whole question in debate, and that in a form so nearly akin to pure *transcendentalism* as to be beyond the reach of sober criticism. Its acceptance or rejection will depend upon the subjective condition of the inquirer's own mind. But this interpretation, whether true or false, does not, in fact, at all touch the real difficulty between the geologists and Moses; it rather occasions that difficulty, for it essentially identifies the creative acts of the two schemes. Now the discrepancy in question, as we shall see, relates not so much to the absolute or comparative length of the several creative processes, as to their relative *order* and *character*. These are unmistakably fixed in the most marked and indelible characters in the respective records of geology and Genesis, and, unfortunately for the theory in

question, they altogether fail to tally. However indefinite an extension, therefore, we may give to the word "day" in the sacred narrative, this will avail little so long as the successive events themselves so widely differ from those of the scientific system. Moreover, the creations of the geological world overlap each other, and vary in their relative position in different regions, whereas those of the Biblical cosmogony are strictly consecutive and universal.

Similar objections apply to an ingenious theory of Prof. S. D. Hillman (in the *Meth. Quar. Rev.*, Oct. 1868), who, while admirably defending the "nebular hypothesis," proposes to identify the *days* of creation with astronomical æras. He leaves no room for the alternations of "evening and morning."

"The consistency or harmony of these two records of the creation—that of Moses and that of the geologist—has, in conformity with the foregoing interpretation of the word 'day,' been attempted to be traced and vindicated by the late Hugh Miller in a lecture delivered by him to the Young Men's Christian Association in the year 1855, and afterwards republished in *The Testimony of the Rocks*, and also by Dr. McCausland in his *Sermons in Stones*. The former sought to show the consistency between the facts of geology and the events recorded by Moses as having occurred on the third, fifth, and sixth days or periods of creation, stating that, as a geologist, he was only called on to account for those three of the six days or periods, inasmuch as geological systems and formations regard the remains of the three great periods of plants, reptiles, and mammals, and those only; and 'that of the period during which light was created—of the period during which a firmament was made to separate the waters from the waters—or of the period during which the two great lights of the earth, with the other heavenly bodies, became visible from the earth's surface, we need expect to find no record in the rocks.' But the author of the latter work (*Sermons in Stones*) has undertaken further to show that geology confirms and establishes the truth of every statement in the record of Moses, from the beginning down to the creation of man—the original state of the globe 'without form and void'—the first dawn of light—the formation of the firmament, and the separation of the waters below from the waters above it—and the first appearance of the sun, moon, and stars on the fourth day, intermediate between the creation of the vegetable world on the third, and the creation of the creeping things and birds on the fifth day." But neither of these writers, however acute and accurate in matters of natural science, was competent to appreciate the philological and exegetical bearings of the subject, and hence both have palpably warped the statements of the sacred text into a forcible conformity to their geological prepossessions. The many and striking discrepancies will appear in the following discussion of the facts of geology in detail. See section iv.

The only objection which even these geologists have deemed sufficient to set aside the above explanation of Dr. Chalmers is that geology (in their view) furnishes no evidence of such a sudden and total break in the order of creation immediately previous to the introduction of man. It is difficult to see how they can maintain this argument in the face of the two well-known facts, that no remains of the present races of animals or vegetables are to be found in the fossiliferous rocks (at least none in those below the "tertiary"), and that none of the fossil species are now extant upon the globe. The few exceptions claimed to these rules are too trifling and doubtful to affect their validity (these are strongly adduced by Lyell, *Antiq. of Man*, Lond. and N. Y. 1863; a careful synopsis may be found in Bruce's *Races of the Old World*, N. Y. 1863, ch. xxxii; comp. *Brit. and For. Exam. Rev.*, Oct. 1861; *Meth. Quar. Rev.*, Jan. 1864), and the cases of striking resemblance may be referred to the maintenance of analogous types

of being in each fresh creation. Indeed, the universal presence of "drift," and the *striae* everywhere found upon rocks at the surface, seem to be conclusive evidence of some grand cataclysm closing the pre-Adamic period with universal wreck, which the flippant assertions of some modern writers cannot gainsay. Several of the recently discovered cases of human remains or art, covered by deposits computed to be of immense age, are examined by an expert in the *Meth. Quarterly Review* for Oct. 1865, and the preposterous conclusions derived from them by Lyell and others fully exploded. The well-known rate of the growth of deltas at the alluvial mouths of all great rivers proves that they began their course not over six thousand years ago. Prof. Jewell, of Chicago, in the *Meth. Quar. Review* for Jan. 1869, carefully examines all the most recent discoveries alleged in favor of the antiquity of man under the five heads: "1. *Lacustrine habitations* of Central and Southern Europe; 2. '*Kjocken-middings*' or *Kitchen refuse-heaps* of the coasts of Denmark and Norway, and the Atlantic coast of North America; 3. *Deltas*, as those of the Nile, Po, Ganges, and Mississippi; 4. *Cave deposits*, in various parts of Europe; 5. *Remains* [of human bones and other objects] found in the peat, clay, and gravel-beds and terrace-formations of various parts of the world." He then sums up the proper scientific conclusions from these geological data thus:

(1) Man and the mammoth in some parts of the globe were contemporaneous.

(2) Instead of carrying man back to the period assigned to the mammoth and other great extinct pachyderms, we are required rather to bring the mammoth down to the period of man.

(3) We may safely say that the facts elicited not only show that those deposits in which remains of man have been found may have been formed within the six thousand years of historical chronology, but that in all probability such was the case.

(4) The knowledge we yet have of the dynamical geology of the various superficial formations from the "pleistocene" upward, is not such as to enable us to reach trustworthy conclusions with regard to past time.

(5) Geological changes have taken place in the past with a rapidity seldom if ever witnessed at present.

6. In view of all the difficulties, some interpreters in despair abandon all attempt at reconciliation between the Mosaic record and scientific findings, e. g. Kalisch, as above, and in general the whole Rationalistic school. Even Quarry (*Genesis and its Authorship*, Lond. 1866 chap. i), while acutely and forcibly showing the untenableness of the adjustments proposed in favor of the geological schemes, is not content with pronouncing the effort premature, in view of the unsettled state of the sciences involved, but proceeds to lay down the axiom that we must "give up looking for physical truth where moral truth alone is to be expected." But surely this is not simply a case where the phenomenal theory of interpretation is competent to explain the whole discrepancy—applicable as that principle was seen to be to much of the phraseology of the Mosaic account as early as the time of Gregory of Nyssa (*Hexæmeron*, in *Opp. Greg. Nys.*, where the optical explanation is advocated); for as Moses is expressly writing on the subject of creation, a just exegesis demands that his statements—so far as they are parallel—must tally with all later discoveries and conclusions. See HERMENEUTICS.

Mr. Quarry (*Genesis*, p. 17 sq.) adduces the following alleged discrepancies as evidence of the non-historical character of the narrative in Gen. i, ii: (1.) The apparently simultaneous creation of both "the heavens and the earth" in the beginning, whereas the firmament, the celestial bodies at least, are represented as being formed in detail at a later day. But if, as we hold, the first verse merely declares the calling into existence of the primordial matter or elements, not only does all repetition vanish, but the distinction inherent in the nature of the case between creation proper and progressive development is duly observed. Our ex-

planation likewise dissipates his objection to the use of the term "days" before the creation of the sun. (2.) He alleges that the numeral  $\aleph$ , one, being here anathorous, cannot properly be rendered "first" in connection with the opening eve-morn of creation, in the sense of the order of time. But certainly it can have no other meaning when followed in the same series by the other undoubted ordinals "second," "third," etc. That the *sixth* day alone has the article is due to its emphasis as the concluding one of the working week. (3.) The correlation between the two triads of works—"the luminaries of the fourth day corresponding to the light of the first, the fishes and birds of the fifth to the waters and the firmament of the second, and the terrestrial animals of the sixth to the dry land of the third"—constitutes no valid argument against the matter-of-fact character of the representation; for these are merely signs of the progress and harmony observable in all God's plans, and a special coincidence arising in this case from the necessarily gradual preparation of the globe for its varied classes of tenants. The assumptions that birds are impliedly represented as being produced from the air, that the creatures were all brought before Adam immediately upon their creation, and that the woman was formed on a different day from the man, are all gratuitous and erroneous, as is likewise the supposition that the absence of vegetation in chap. ii, 5 was absolute and universal, instead of referring to a mere spontaneous *growth*, and that in Eden simply.

III. *Geological Formations.*—"The crust of the earth is composed of rocks, which have been formed, some by the action of fire, such as granite, basalt, porphyry, and greenstone, which are termed igneous rocks, and some by sedimentary deposit at the bottom of water, such as sandstone, limestone, shale, etc., which are known as aqueous or stratified rocks. Igneous rocks were first formed; and on these, from time to time, through the long ages of our planet's existence, were deposited the many successive layers of sedimentary stratified rocks, in which are found the fossil remains of the animals and plants that were in existence during the several periods of deposition. These layers of rocks have been frequently and extensively, throughout these eras of their formation, broken up and distorted by volcanic action, and the protrusion of igneous rocks from beneath, upwards, and through them; and by these the mountain ranges, in all parts of the earth, have been elevated, and those diversities of land and sea which the face of our planet presents, have been formed." We shall continue, in accordance with the prevalent theory, to characterize the basis rocks, i. e. granite, and its unstratified congeners, as *igneous*, although recent investigations tend to the conclusion that they, as well as the superincumbent animal series, are the result of the disintegrations, decompositions, and fresh combinations of aqueous agency.

"The first aspect of the globe which the investigations of the cosmogonist have enabled us to realize, present to view a viscid igneous ball revolving on its axis, and wheeling its annual course around the sun, its centre of attraction. Its present oblate spheroidal form, flattened at the poles and elevated at the equator, is the exact form that a liquid sphere of the size and weight of the earth, revolving on its axis in twenty-four hours, would assume; and the still prevailing central heat, which is indicated by the gradual increase of temperature as we descend in mines from the surface in the direction of the earth's centre, reveals the igneous origin of the mass. The gradual cooling down of this fiery sphere, by radiation into space, would result in the formation of a crust of granite or some other igneous rock on the surface; and as the cooling progressed, the gases which are the constituents of water, and which are kept asunder by intense heat, would naturally combine, and thus the crust, in

process of time, would be covered with an ocean. Thus we have all the elements requisite for the production of the first series of sedimentary rocks, which were formed out of the disturbed particles or detritus of the igneous crust at the bottom of the waters which encircled the globe. The lowest of our sedimentary rocks, gneiss and mica schist, which rest on the primordial granite, or some other rock of igneous origin, are found, on inspection, to be composed of the débris or broken particles of granite, and so far the foregoing theory of their origin is confirmed. This series of rocks has been styled 'metamorphic,' from the great change that has been wrought in their structure by the action of the intense heat to which, at the time of their formation, they must have been exposed, and by which they have been partially crystallized, and their lines of stratification obliterated. They form a portion of that vast pile of the bottom rocks which have been termed 'the Cambrian,' and which have been calculated to be 25,000 feet, or nearly five miles, in depth or thickness.

"Throughout the long ages occupied by the deposition of the mass of sediment of which these bottom rocks are composed, the temperature of the globe must have been very high, though gradually becoming more cool; and the traces of animal life in them are extremely rare and difficult to detect and identify. The scanty fossil remains which have been discovered by the industry and research of the geologist, reveal no type of animal life of a higher order than the zoophyte (a creature partly of animal and partly of a vegetable nature), annelids, or sea-worms, and bivalve mollusks—all of their marine creatures devoid of the senses of sight and hearing; and with them have been found traces of fucoids or sea-weeds, but no land vegetation. In fact, all that has been discovered of organic matter in these rocks indicates a beginning of life at the time of their formation, and a beginning of life in the lowest and most humble of its forms.

"The long era of the Cambrian formation was succeeded by another as extensive, during which the rocks which have been denominated 'the Silurian' were formed, by sedimentary deposits, to the depth (as some estimate) of 30,000 feet. The fossil remains of animals throughout this formation are abundant, and disclose the zoology of the era to have been confined to submarine invertebrates, zoophytes, mollusks, and crustaceans; and no vertebrate animal appears until the close of the era, when the remains of fishes are found in the beds which lie immediately at the top of the Silurian formation. Light to some extent must have pervaded the earth during this period; for many of the mollusks, and all of the crustaceans, were furnished with eyes, some of them, as in the instance of the trilobite, of a peculiarly elaborate and perfect structure. It appears to be a law of nature, that animals whose entire existence is passed in darkness are either wholly devoid of the organs of sight, or, if rudimentary eyes are discoverable, they are useless for the purposes of vision, as exemplified in the animals of all orders, from the mollusk to the mammals, which have been discovered in the caverns of Illyria, in the caverns of South America, mentioned by Humboldt, in the Mammoth Cave of Kentucky, in deep wells, and in depths of the sea where no ray of light can penetrate.

"The system that succeeded the Silurian was that in which the Devonian or Old-Red-Sandstone rocks were formed; and all geologists concur in stating that the position in which these rocks are found indicates that the era was ushered in by violent commotions, during which most of the principal mountain ranges in the world were thrown up. The fossil remains of this era, during which sedimentary rocks, calculated to be about 10,000 feet in thickness, were formed, present to our view, in addition to the previous existing orders of animals, vertebrate fish of the Placoid and Ganoid species. These have been graphically described by Hugh Miller, in *The Old Red Sandstone*, as

Section of the Earth's Crust, showing the Relative Position of its Strata.

N. B.—The above distribution of the successive layers consist merely of the titles and systems adopted by different authors. Some of the strata are found only in certain localities of limited extent, and there are modifications peculiar to other places. The "rocks" (a general term in geology for all strata, of whatever character) are represented in the cut as tilted up by an adjacent mountain. Several such changes of level, and not seldom even by depression, are sometimes exhibited as having successively taken place. The layers are frequently corrugated or otherwise disturbed, either singly or throughout the whole or various parts of the series. Any one of them may appear at the surface, in consequence of derangement or the absence of those properly belonging above it. Seldom or never are they all found together as here. They exist in endless variety of combination, both chemical and mechanical, and are sometimes thrown into almost promiscuous confusion by volcanic and other causes; but when present and in their natural site, they observe the arrangement indicated on the diagram.

cartilaginous, and clad in strong integuments of bone composed of enamelled plates, instead of the horny scales which form the covering of the fish of the present day; and it has been suggested by Dr. Buckland that this hard coating may have formed a defence against the injurious effects of water of a high temperature. The first traces of land vegetation have been found at the top of the Silurian, where the Old Red Sandstone rests on it." "The fossil remains of a small reptile, which is stated to have been found in a rock at the top of the Old Red Sandstone, have been supposed to be the first traces of terrestrial life upon the globe; but professor Owen is of opinion that the rock in question does not belong to the Old Red Sandstone formation, but to another long subsequent—the Trias.

"The system that succeeded the Devonian is the Carboniferous, which is one of importance and interest to mankind, as having been the period of the formation of coal, iron, and the mountain limestone—a com-

bination of products that have contributed so largely in these latter days to the comfort and convenience of the human race. The coal-measures, it is well ascertained, are the product of profuse and extensive vegetation, and the nature of the plants of which it has been formed is easily discoverable by a close examination of the mineral itself, which, on inspection, discloses them to have been almost entirely of the cryptogamic order, and such as would be produced in abundance in positions of shade, heat, and humidity. Ferns, calamites, and esquisitaceous plants preponderate, and wood of hard and ligneous tissue, which is, in a great measure, dependant on the unshaded light of the sunbeam, is of rare occurrence in this formation, while season rings, which result from the impact of the direct rays of sunlight on the tree, are not found at all in the fossil woods of this or the previous formation, though they appear in those of the succeeding systems."

"In confirmation of these views, it is remarkable

that other geological phenomena, besides that of the absence of the season rings in the trees, indicate that there was no variation of seasons on our earth before the close of the carboniferous æra. Temperature appears, up to that period, to have been tropical and uniform in all latitudes; for the fossil remains testify that the animals and plants that lived and grew in the carboniferous and preceding æras at the equator were of the same species as those that lived and grew at the same period in the arctic regions—and the coal-measures are as abundant in the high latitudes as in the temperate and tropical zones. These phenomena can only be accounted for by the continued prevalence of the central heat, and the consequent neutralization of the effect of the sun's rays, the influence of which now operates to produce the variety of seasons. The climatal condition of the earth in those ages must have been similar to those of a vast humid hothouse shaded from the direct radiance of the sun, and which would be eminently conducive to the production of a prolific vegetation, such as that which has been stored up in our extensive coal-measures.

"The zoology of this æra furnishes us with the first undoubted traces of terrestrial animal life, in the form of insects of the beetle and cockroach tribes, scorpions, and reptiles of the batrachian order—creatures which were adapted by nature to live in the dull, hazy, tepid atmosphere that overspread our planet at this time.

"At the close of the carboniferous æra another commenced, during which the system of rocks, which has been denominated 'the Permian' system, was formed, the fossil remains of which indicate that great changes must have taken place in the physical constitution and aspect of the earth. The exuberant vegetation which had supplied the material of the coal-measures of the preceding formation had died away, and a vegetation of a higher order succeeded." "The animals, too, which inhabited the Permian earth disclose an advance in organic life. The Saurian, or true reptile, here made its first appearance; and the earliest traces of birds present themselves in the New Red Sandstone, a member of this system. The foot-tracks of these birds, of immense magnitude, which stalked on the Permian sands and mud, are found impressed on the now hardened slabs of sandstone and shales of that formation both in Scotland and in America.

"The Permian was succeeded by the systems of the Trias and Oolite, whose fossil remains attest an advance in animal as well as in vegetable organization. Trees of the palm, pine, and cypress species were mingled with the diminished ferns, calamites, and conifers of the coal æra; and with this improved vegetation, a higher order of insects appears to have come into existence to feed on and enjoy the increasing bounties of Providence. But the peculiar and most striking feature of the age was the extraordinary increase, in number and magnitude, of the Saurian reptiles which then peopled the earth. The Saurians were divisible into three distinct classes—the terrestrial, or Dinosaurians; the marine, or Elnanosaurians; and the aerial, or Pterosaurians. They were all of them air-breathing creatures—amphibious, and more or less aquatic in their nature and habits; together with the birds whose tracks have appeared in these same systems." "The fossil remains of the reptilian inhabitants of earth, ocean, and air of the Oolite world, more especially of the Lias member of it, have revealed them to have then swarmed out in such amazing numbers, and of such vast dimensions, that geologists have always dwelt on the scenes which the earth of those days must have presented with astonishment and wonder, and have named that æra 'the age of the reptiles.'"

"The Chalk or Cretaceous system succeeded that of the Oolite, and presents little, if any evidence of advance in creation. There is, however, a manifest decrease of the Saurian reptiles, which reigned in such

abundance in the preceding formation, and some traces of the true mammals have, it is said, been found in this system. At all events, in the next formation, the Tertiary, we have distinct evidence of the existence of the mammal race of animals, including the quadruped mammals, resembling those now extant."

"No traces of human remains, or of any work of art, have been found below the superficial deposits, or outside coating of the globe; yet there is no evidence of the introduction on the earth of any species of animal whose prototype was not in being before the human race became inhabitants of the earth. Man's pedigree is of less antiquity than that of any other known creature, though, geologically and physically, he is at the top of the ascending orders or scale of created beings; for it is admitted by the most eminent and best-informed geologists that the well-attested facts of their science demonstrate that the plan or law of the creation was progressive, beginning with the zoophyte in the bottom rocks, and ascending through the succeeding formations in the advancing forms of the Mollusk, Crustacean, Fish, Reptile, and Mammal, culminating with Man, since which no new species has been introduced on the scene. See SPECIES.

"The length of the time which has elapsed since our planet was a ball of liquid fire, and during which our world of light and life was elaborated in its various stages by the hands of the Almighty, admits of no calculation. It is not to be reckoned by days or years, or any known measure of time. We can only look at the vast piles of the sedimentary rocks which have been laid down at the bottom of the waters in that period, to the depth of fifteen miles at the lowest calculation, and ask how long was the space of time occupied in the formation of those masses by the slow process of depositing grain after grain of the particles of the matter of which they have been formed, and yet that is but a brief portion of duration when compared with that which must have been occupied by the cooling down of the globe, so as to admit of the existence of life upon its surface." "The Scriptures do not fix the age of the earth, or supply any means by which we could calculate the length of time that had elapsed between 'the beginning' and the first appearance of the creation, including that of Adam; and the Biblical records have unfolded to us that nearly six thousand years have passed away since he became an inhabitant of the earth. Facts, however, have recently come to light on which it has been argued that, though the extent of the human æra must have been short indeed when compared with the vastness of the geological ages, yet some of the human race must have tenanted the earth at a time long anterior to that assigned by the Bible records to have been the date of Adam's birth. Mr. Leonard Horner's experimental researches in Egypt, instituted with a view to ascertain the depths of the sedimentary deposits in the valley of the Nile, have brought to light relics of works of art and specimens of man's handiwork, such as pieces of pottery and sculpture, that tend to prove the existence of intelligent manufacturers at a period of time that could not be less than eleven or twelve thousand years; but the premises from which this conclusion has been deduced are too uncertain and fallible to warrant such an extension of the commonly received age of man. The rate of accretion of sedimentary deposits of a river like the Nile is subject to so many varying external influences, that, as a measure of time, it may be most fallacious, and no reliance can be placed upon it as disproving the record of Moses. Still greater importance has been ascribed to the discoveries in the gravel quarries of Abbeville and Amiens, in the north of France, and also in Suffolk in England, of flint implements, such as hatchets, spears, arrow-heads, and wedges of rude manufacture, associated in undisturbed gravel, with the bones of extinct species of the elephant, rhinoceros, and other animals, whose remains

are found in the diluvium formed by the last great geological revolution. If these implements are of artificial origin, they afford strong evidence that the races of men by whom they were manufactured were the contemporaries of animals which geologists affirm could not have existed within the Scripture term of human life. Nevertheless, many of those best acquainted with geological phenomena and the knowledge to be derived from them have not admitted that this association of a mixture of the flint implements with the extinct animal remains is conclusive evidence of the co-existence in life of the manufacturer of the implements with those animals, and affirm that mere juxtaposition is no evidence of contemporaneity, when no remains of the human frame are to be found in the same place" (Kitto, *Cyclopaedia*, s. v. Creation). The few instances in which such remains have been found together are all resolvable into cases of animals of comparatively recent extinction (*Bibliotheca Sacra*, July, 1867, p. 457 sq.). The age of the diluvium also in which these remains have been discovered, uncertain as it was before, has not been determined by the presence of these human relics in it, so that the Scripture chronology of the human era has not been displaced.

IV. *Proposed Identification of these Geological Periods with the Mosaic "Days."*—Most geologists have frankly avowed the utter incompatibility of these rocky revelations with that of Genesis, if intended as the records of the same events; while those who have believed them to be reconcilable have usually contented themselves with vaguely referring to the progress and order evinced in both accounts as a proof of their general agreement, without attempting anything like a minute comparison—doubtless for the reason that any distribution of the geological aeras into precise portions, such as those of Moses, whether six or any other number, must be highly arbitrary and fanciful. A few, however, following out the suggestion of Jameson, have of late ventured upon such a collation in detail, e. g. Hugh Miller and Dr. McCausland (see above).

1. The most ingenious of these schemes makes the first Mosaic "day" correspond to the age of the lower, metamorphic, or Cambrian rocks, in which the eyeless zoophytic life is compared with the vivifying influence of the Spirit brooding over the abyss as yet in darkness; the second "day," on which the firmament was formed, would answer to the Silurian series, containing only submarine invertebra, evincing the presence of light; the third "day," when the dry land brought forth the vegetable tribes, would be represented by the Old Red Sandstone period, containing also vertebrated fish and traces of land vegetation; the fourth "day," which witnessed the development of the celestial luminaries, would agree with the Carboniferous era, which indicates the lifting up of the veil of vapor that had before enshrouded the globe, thus giving rise to a more solid form of woody fibre; the fifth "day," when birds and reptiles were produced, would be denoted by the group of the Permian, New Red Sandstone, Trias, and Oolite systems, with their gigantic Saurians and bird-tracks; and finally, the sixth "day," which saw the creation of land animals, would fall in the Cretaceous or rather the Tertiary epoch, which presents the most perfect fossil mammals. Unfortunately, however, there exist several important discrepancies in this effort at identification, which go to show that it is altogether artificial and untrue. In the first place, there are not exactly six of these strata of rocks, but some ten or a dozen; indeed, geologists are not agreed among themselves as to their proper number and classification, some making them out to be a score or more. Each of these is well defined in itself, and most of them contain their own peculiar fossil forms; yet even they are evidently in general but progressive developments of the same organic types, and not totally fresh orders

of being, such as the successive stages of the Mosaic creation exhibit. Nor are they uniformly distributed over the earth's surface, but some here and others there, although preserving almost invariably the same relative order; so that it is doubtful whether in all cases they mark regularly consecutive aeras in the earth's history as a whole. Neither are they equal in extent or thickness, so as to lead us to conclude that they occupied fixed portions of time, such as the Mosaic days of co-ordinate length. In the second place, they do not tally in their productions with the Mosaic series. The account in Genesis does not introduce life at all until the third day, whereas we find the very lowest stratified rocks teeming with certain kinds of animation. Nor is this the vegetable life, which first appears in the record of Moses; on the contrary, it is such as belongs to the animal kingdom, and is precisely of the marine order, which Moses withholds till the fifth day; while geology does not discover vegetation (unless inferentially) till the junction of the Silurian with the Old Red Sandstone, and it does not become characteristic till we reach the Carboniferous era. In like manner, Moses makes the creation of birds simultaneous with that of fishes, whereas fish appear in the strata of the period prior to that of the bird-tracks—indeed, anterior to plants themselves. Moreover, reptiles, which figure so conspicuously in the geological annals, are passed over with little, if any distinction in the Mosaic statement. Terrestrial animation, on the other hand, to which Moses does not allude till the sixth day, begins in the geological series as early as the Carboniferous age. In a word, the animal and vegetable kingdoms, which the sacred narrative places at a decided interval, go on in parallel progression through the rocky cycles; and their relative order of appearance is, if anything, rather the reverse of that given by Moses, while as little coincidence appears in the order of land and water products. In the third place, not only is this theory opposed to the obviously literal meaning of the word "day" in the Mosaic record, and hampered by exegetical difficulties at every point in its details (such as the application of the Spirit's formative "hovering," ver. 2, upon the dark chaos, to the evolution of zoophytes; the segregation of the "firmament," to the deposition of the Silurian rocks; the emergence of "dry land," to the fossil casts of the Old Red Sandstone; the bursting forth of the heavenly "lights," to the production of the coal-measures; the formation of marine "creatures and fowl," to a motley stratification that chanced to contain huge lizards and nondescript rocs; and the creation of animated nature, to the piling up of chalky or earthy sediment as a basis for alluvial soil)—aside from these formidable difficulties, the whole interpretation of Moses's simple language as adumbrating the vast and complicated systems of geological changes is preposterous in the highest degree. We conclude, therefore, that a hypothesis, which, while it outrages every just and natural principle of hermeneutics, at the same time so utterly breaks down the moment it is actually brought to the test of scientific comparison, is wholly unworthy our acceptance. Moses is clearly relating a historic creation of the present races of animal and vegetable life, and the analogies between the events and progression of his days and those of the geological cycles are merely such resemblances as the successive restorations from a chaotic state would naturally present, although on a vastly different scale in point of duration.

2. Prof. Dana, in his *Manual of Geology* (Phila. 1862), gives (p. 742), as the latest conclusion of science on the relation between the Mosaic and the geological cosmogonies, the following, which he has condensed from the lectures of Prof. Guyot (see *Bibliotheca Sacra*, Apr. 1855, p. 324 sq.), and which we here place in parallel columns with the statements of the first chapter of Genesis:

1. THE BEGINNING OF ACTIVITY IN MATTER.—In such a beginning from matter in the state of a gaseous fluid the activity would be intense, and it would show itself at once by a manifestation of light, since light is a resultant of molecular activity. A flash of light through the universe would therefore be the first announcement of the work begun.

2. THE DEVELOPMENT OF THE EARTH.—A dividing and subdividing of the original fluid going on would have evolved systems of various grades, and ultimately the orbs of space, among these the earth, an igneous sphere enveloped in vapors.

3. THE PRODUCTION OF THE EARTH'S PHYSICAL FEATURES, by the outlining of the continents and oceans. The condensable vapors would have gradually settled upon the earth as cooling progressed.

4. THE INTRODUCTION OF LIFE UNDER ITS SIMPLEST FORMS, as in the lowest of plants, and perhaps, also, of animals. The systems of structure characterizing the two kingdoms of nature, the *Radiate* of the vegetable kingdom, and the *Radiate*, *Molluscan*, *Articulate*, and *Vertebrate* of the animal, are not brought out in the simplest forms of life. The true *Zoic* era in history began later. As plants are primarily the food of animals, there is reason for believing that the idea of life was first expressed in a plant.

5. THE DISPLAY OF THE SYSTEMS IN THE KINGDOMS OF LIFE—the exhibition of the four grand types under the animal kingdom, being the predominant idea in this phase of progress.

6. THE INTRODUCTION OF THE HIGHEST CLASS OF VERTEBRATES—that of the *Mammals* (the class to which *Man* belongs), viviparous species, which are eminent above all

And the earth was without form, and void; and darkness was upon the face of the deep. And the Spirit of God moved upon the face of the waters. And God said, Let there be light; and there was light. And God saw the light, that it was good; and God divided the light from the darkness. And God called the light day, and the darkness he called night. *And the evening and the morning were the first day.*—Ver. 2-5.

And God said, Let there be a firmament in the midst of the waters, and let it divide the waters from the waters. And God made the firmament, and divided the waters which were under the firmament from the waters which were above the firmament; and it was so. And God called the firmament heaven. *And the evening and the morning were the second day.*—Ver. 6-8.

And God said, Let the waters under the heaven be gathered together unto one place, and let the dry land appear; and it was so. And God called the dry land earth, and the gathering together of the waters he called the seas; and God saw that it was good.—Ver. 9-10.

And God said, Let the earth bring forth grass, the herb yielding seed, and the fruit-tree yielding fruit after his kind, whose seed is in itself, upon the earth; and it was so. And the earth brought forth grass, and herb yielding seed after his kind, and the tree yielding fruit, whose seed is in itself, after his kind; and God saw that it was good. *And the evening and the morning were the third day.*—Ver. 11-13.

And God said, Let there be lights in the firmament of the heaven, to divide the day from the night; and let them be for signs and for seasons, and for days and years; and let them be for lights in the firmament of the heaven, to give light upon the earth; and it was so. And God made two great lights; the greater light to rule the day, and the lesser light to rule the night; he made the stars also. And God set them in the firmament of the heaven, to give light upon the earth, and to rule over the day and over the night, and to divide the light from the darkness; and God saw that it was good. *And the evening and the morning were the fourth day.*—Ver. 14-19.

And God said, Let the waters bring forth abundantly the moving creature that hath life, and fowl that may fly above the earth in the open firmament of heaven. And God created great whales, and every living creature that moveth, which the waters brought forth abundantly after their kind, and every winged fowl after his kind; and God saw that it was good. And God blessed them, saying, Be fruitful and multiply, and fill the waters in the seas; and let fowl multiply in the earth. *And the evening and the morning were the fifth day.*—Ver. 20-3.

And God said, Let the earth bring forth the living creature after his kind, cattle and creeping thing, and beast of the earth after his kind; and it was so. And God made the

other vertebrates for a quality prophetic of a high moral purpose, that of suckling their young.

7. THE INTRODUCTION OF MAN—the first being of moral and intellectual qualities, and one in whom the unity of nature has its full expression.

And the earth after his kind, and cattle after their purpose, and everything that creepeth upon the earth after his kind; and God saw that it was good.—Ver. 24-25.

And God said, Let us make man in our image, after our likeness; and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing that creepeth upon the earth. So God created man in his own image, in the image of God created he him; male and female created he them. . . . And God saw everything that he had made, and, behold, it was very good. *And the evening and the morning were the sixth day.*—Ver. 26-31.

Now, however probable these stages of creative progress may be as an *exposition of science*, yet we find the following (among other) discrepancies in them when compared with the Biblical text, which to our mind show their utter incompatibility, IF INTENDED AS AN ACCOUNT OF THE SAME SERIES OF EVENTS, and which would hopelessly entangle the philologist and expositor in any careful and judicious comparison of the geological details with the language of the sacred writer.

(1.) It is not clear how light would necessarily be the first *result* of molecular activity in a gaseous fluid; the mass, we should suppose, would have already been in an incandescence state. Nor would such "cosmical light" (whatever that phrase may mean) have been subject to the ebb and flow constituting the alternations of "day and night," or "evening and morning." Indeed, the phraseology of Moses reveals to us at the outset a turbulent *surface* rather than a homogeneous but quiescent mass of igneous vapor as the primeval chaos.

(2.) "Waters" is certainly a very inappropriate term for a fiery nebular substance in whatever stage of fluidity; and the division of the supra from the infra-firmamental liquid is a strange description of the disintegration of melted spheres from each other, whether still vaporized or cooled to semi-solidity.

(3.) The picture of the chaotic floods retiring to their proper beds bears very little resemblance to the crystallization of the azoic rocks, or the hardening of the metamorphic basis of the earth's crust, and but slightly more to the condensation of steam and other volatilized matter by a radiation of heat. Besides, as geology itself shows, the present configuration of land and water, plain and mountain chain, river and desert, has been the effect of innumerable changes, elevations, and subsidences at vastly different periods scattered throughout the pre-Adamic history of the globe.

(4.) On the third day life was not merely "introduced under its *simplest* forms," but there were created, besides "grass" and "herb yielding seed," also the fully developed "fruit-tree, whose seed is in itself;" whereas geology, instead of exhibiting in the lowest stratified rocks any of these higher forms of vegetation, leaves but the bare presumption (for the author is only able to state, page 120, that "sea-weeds or *algæ* are the earliest of the globe, *probably* preceding animal life") of the existence of any plants whatever in that age. The fourth day, which was devoted to the production or manifestation of the heavenly luminaries, has, it will be observed, nothing corresponding to it in the geological cycles. A notable chasm!

(5.) The "four grand types of the animal kingdom (radiate, mollusk, articulate, and vertebrate)," however, are not to be found in the Mosaic statement, which refers only to marine creatures and (aquatic) birds as belonging to the fifth "phase of progress" (day), for the reason obviously that the soil was still too humid for land animals, such as geology, never-

theless, exhibits in company with the finny and feathered tribes indiscriminately.

(6.) If the rendering "whales" be allowable in ver. 21, Moses has already anticipated the lactiferous animals on the preceding "day;" and, at any rate, some of the lower orders of vertebrates, if not actual reptiles (for the author's gloss of "prowling" for "creeping" things is an unheard-of interpretation), are here first introduced in connection with their terrene associates.

(7.) In the Mosaic account man is not assigned to a separate era from the quadrupeds, although he is mentioned last. The planting of Eden and the formation of Eve likewise must have taken place on the same sixth day.

In short, striking as are the general features of resemblance between the above geological and Mosaic schemes of creation, especially in the idea of systematic progression manifest in both, yet, when closely examined, in no instance are the epochs found to tally in particulars. It is only by a most violent distortion of facts on the one side, or of language on the other, that the two can be assimilated in detail. We prefer, therefore, to adhere to the older explanation, which finds a silent place for the records of geology in the first and second verses of Genesis, and refers the narrative of Moses to a subsequent creation of the present order of terrestrial things in six literal days. Nor are we deterred by the supposed "belittling conception of a Deity working like a day-laborer by earth-days of twenty-four hours," since the Almighty has grounded upon precisely this fact the institution of the Sabbath for man during all the weeks of time. See COSMOGONY.

3. A still more recent and plausible schedule is propounded by Prof. C. H. Hitchcock, in the *Bibliotheca Sacra*, July, 1867, as follows:

Days.	Order of Scripture.	Order of Geology.		Names of Formations.
		When Introduced.	Predominance.	
6.	MAN. Mammals.	MAN. Large Mammals.	MAN. Mammals.	Aluvium. Tertiary.
5.	Birds. Water. Animals.	Small Mammals. Birds.	Reptiles and Reptilian birds.	Cretaceous. Jurassic. Triassic.
4.	Sun, Moon, and Stars.	Reptiles, Fishes, Articulata, Molluscs, and Radiata.	Plants. Amphibians. Fishes, Plants, Mollusks, and Trilobites.	Permian. Carboniferous. Devonian. Silurian.
3.	Plants. Dry land, and sens.	Protozoans. Plants, Dry land, and Ocean.		Huronian. Labradorian.
2.	Clouds and water separ- ated. Atmosphere.	Development of Atmosphere. Gradual cooling and condensation of earth.		Previous to the formation of Strata.
1.	Day and night.  Light. Creation of matter.	Day and night. Igneous fluidity, Nebular state. Light. Creation of mat- ter.		

The author carries out the parallel between the Mosaic narrative and the geological phenomena at considerable length under each day, and makes a closer approximation to a harmony in the details than any previous writer. He wisely abstains, however, from a minute examination of the sacred text in comparison with the scientific elements; for here, like all his predecessors in this direction, his *exegesis* would inevitably have broken down. The obvious purport of the account in Genesis is sacrificed to the geological theory, and its phraseology is forced into the geological formulae. There is no natural or critical agreement. Nearly all the above strictures apply with more or less force to this new version: we have space to point out but a few special discrepancies: "day and night" are only provided for at the close of the first "day," and then as an indefinite series of alternations between light and darkness, not as a single  $\nu\chi\alpha\eta\eta\mu\epsilon\rho\nu$ ; each day in the

geological order laps over into the other, instead of being sharply defined as in the scriptural statement; it is the "plants" of the fourth geological "day," rather than those of the third, that correspond with the vegetable productions of the scriptural progression; the marine creatures of the fifth Scripture day are only to be recognised in the "amphibians" and "fishes" of the fourth geological cycle; indeed, the fourth of the Scripture days, which is occupied only with the appearance of the heavenly luminaries, is the most active of the geological periods in the production of every form of animated existence, beginning with trilobites and running up to complete vegetation.

But, most of all, we object to the general view under which this is set forth as an interpretation of the Biblical passage in question, namely, that it is a "pictorial" description, or "symbol," or "vision," "retrospectively prophetic;" whereas it seems to us a plain literal history, utterly destitute of the least semblance of imagery or seer-like import beyond the mere use of a few anthropomorphisms familiar to the Hebrews. If such liberties are allowable in hermeneutics, that is the end of all meaning in words. For instance, when the successive scenes in the Mosaic narrative are compared (*Meth. Quart. Rev.* April, 1868, p. 298) with the regularly numbered emblems of the Apocalypse (the seven seals, trumpets, angels, vials, etc.), the very important fact is overlooked that the latter are avowedly set forth as *symbolical representations* of ecclesiastical import, while the former are unaccompanied by any intimation of an ulterior significance. Indeed, this comparison is suicidal to the interpretation which it is put forth to support; for, as the visions of John in the Revelation could only have authority as premonitions of the future on the concession of their actual occurrence in the manner related by himself, so the description of Moses in the opening chapters of Genesis must be accepted as literal statements of real phenomena, in the most obvious and *bona-fide* sense, before they can be made the basis of a symbolical application. See COSMOLOGY, p. 528.

This much only may, however, be granted as true in the hypothesis upon which these and similar explanations are based: that the geological and the Mosaic creations being, like all of God's acts in a given line, mutually typical of each other, inasmuch as they proceed upon a uniformity in the divine plan—the development of an archetypal idea—were in their *great outlines*, of course, similar, and hence may, to a considerable extent, be justly compared together, and even portrayed in the same general terms; but on this very account interpreters of the Bible ought to be the more careful not to confound the two, and especially not to substitute the distant and more dimly shadowed event for the one directly in the mind of the sacred writer. See DOUBLE SENSE (*of Scripture*). In the present instance, moreover, there is eminently a natural ground of necessity for the coincidences above discernible: although no amount of ingenuity has been able to dramatize the facts of geology into precisely *sic* acts, yet the aboriginal creation of matter is of course the first scene in each case; light is a prerequisite of vegetation, and this, again, must be the antecedent food for the animal tribes, while man forms the fit outcome of the entire plot; the incidental details of the two schemes might be expected to vary, as, in fact, they are found to do.

V. *Scriptural Allusions to Geological Facts.*—(Condensed from Pattison, *ut sup.* p. 103–108.) The sacred writers make frequent references to the physical phenomena of the earth beneath. Are such references in accordance with the facts established by subsequent researches and the observation of travellers, or do the latter convict the former of ignorance and error? The question is the more important as the materials of the earth are not treated *conventionally* in the Scriptures, but naturally. In speaking of the sand on the sea-

shore, one writer alludes to it as a barrier placed by God against the encroachments of ocean, another as an illustration of the countless host of the Philistines, a third as representative of the multitude of God's people. Far different and more adapted to universal use is this than the employment of one object always to express one and the same idea, as in the symbolic picture-writing of the Egyptians and Assyrians, and as is the usage in much of the literature of the East. Freedom of language, if not of thought, is unknown where every object is used as a conventional sign, always appropriated to one fixed sentiment. We shall find incidental accords between the facts and the record in regard to all things capable of such verification. Take, for instance, the references to stone as an illustration.

The patriarchs and Israelites are frequently directed to build an altar; the injunction to form it of unhewn stones will be found given where rocks abound; the permission to make it of earth refers to districts in which we now find that stone cannot readily be procured. The numerous instances given of the setting up of commemorative stones in Palestine by the Israelites could not have occurred in the rockless plains of the Euphrates. See *STONE*. The geological traveller can readily understand the perfect congruity of the picture which represents the army of the Philistines encamped on one hill, the bands of Israel on the opposite slope, and a brawling brook in the valley between, to which David descended, and from its water-worn pebbles selected five for his sling, smoothed and sharpened by the stream.

The mention of slime for mortar, and brick for stone, in the Babylonian plains (Gen. xi, 3), in Egypt (Exod. i, 14), and again by the Euphrates during the captivity (Nah. iii, 14); and of bitumen in the vale of Siddim (Gen. xiv, 10), equally corresponds with the present geological character of the regions referred to.

The frequent occurrence of rocks and broken ground in Syria is the groundwork of much of the scenery reflected in the general language of Scripture writers, and of many incidents in the history. This accurately accords with the actual physical character of the land itself.

The representations of scenery are so minute in some cases—for instance, the rocky defile in Gibeah, 1 Sam. xiv, 4—that it becomes quite easy for travellers to test the fidelity of the writer. To this kind of criticism the Bible is more exposed than any other book, owing to its variety in time and place; and it need hardly be said that it has escaped not only unscathed, but illustrious, from the trial. The peninsula of Sinai is nowhere formally geographically described in the Bible; but from the record of events alleged to have taken place there, we infer that it was a mountainous district, full of barren, rugged rocks, towering into peaks, and cleft by deep, dry valleys. Laborde, and the numerous tribe of Oriental travellers, in describing the surface scenery, bring before us evidence of the peculiarly appropriate terms in which Scripture alludes to this region. One of the latest travellers thus writes: "Soon after this we came to an immense plain of hard rocks. The mountains which bounded it were truly magnificent: their numerous summits seemed not so much peaks as spikes, or tall spires of rocks. The whole scene is one of the most magnificent desolation and unmingled terror" (H. Bonar, *Desert of Sinai*).

So, in the limestones, there exist now caverns which are the verifications of the cave of Machpelah, of Adullam, and others, by showing the occurrence of strata in which the requisite phenomena are found; while the water-supply of the whole country at present is an accurate reflection of the scriptural account of wells and streams. The language of David and of the prophet Isaiah could only have been employed by persons familiar with the need of irrigation, and its modes, peculiar to the countries to which they profess to belong. How vividly were the mountains of the Holy Land

impressed upon the minds of the principal writers of the Bible! There are about three hundred distinct references in Scripture to mountains; a glance at a good physical map of the region will show the correspondence between the statements of the record and the facts of the earth's surface in the districts referred to.

Were a student shut up in a cell, without any other channel of knowledge than the Word, he might construct a physical geography of the East which would contain all the leading features of that remarkable portion of the globe. The river of Egypt, with its fertile plains, the stony desert, the rocky Sinai, the hills of Judaea, the rivers and lakes, the mountain chains, and the Great Sea, would all fall into their proper places on his ideal map.

So the allusions to "the dust of the earth" will carry a fulness of meaning to persons living in a land where, during a large portion of the year, the whole surface is reduced to dust by the influence of heated winds. God's power in creating man out of such incoherent matter, and man's humble bodily origin and end in this life, are forcibly represented by the frequent employment of this illustration, so familiar to the inhabitant of the East.

In like manner, the references to the inundation of the Nile (Amos ix, 5; Job xxviii, 11), to earthquakes (Isa. ii, 19; Job ix, 6; xxxiv, 20), to mines, metals, precious stones, flints, and other mineral substances, are all found to be in accordance with the actual physical phenomena.

The references to *clay* in the Scriptures are frequent, and accord with its uses and localities at the present day. See *CLAY*.

VI. *Geology of Bible Lands*.—(Condensed from Pattison, *ut sup.* p. 111-116.) The geology of the countries mentioned in holy Scripture is as yet but imperfectly known to us, but quite sufficient has been ascertained to test the accuracy of the incidental allusions made by the writers of the Bible.

1. The framework of Syria is composed of two mountainous ranges, running in a parallel strike with the coast of the Mediterranean, much broken by transverse clefts, extended by irregular spurs on either side, with detached minor masses, having the same north and south bearing. Between the two ridges runs the valley of the Jordan, occupying a deep depression, terminating in the Dead Sea.

The body of the country is a mass of Jurassic (oolitic) rocks, overlaid unconformably by a spread of cretaceous deposits (chalk and green sandstones), both much disturbed by outbursts of trappan matter (greenstone and basalt), and scooped into valleys along numerous lines of ancient fracture. The oolite was eroded before the deposition of the chalk, and the latter has been washed and worn away prior to the deposition of the third system, namely, the eocene tertiary, which is found in patches, and abounds along the lands of medium height on the shores of the Great Sea. There are a few reconsolidated rocks and gravels of a more recent period, but the bulk of the whole region is a highly contorted, inclined, and broken mass of secondary, metamorphic, and igneous rocks.

The Libanus is an axis of Jurassic rock, with some thin beds of oolite coal, surmounted by chalk, and flanked towards the coast by the great tertiary nummulitic limestone so universal along this parallel of the earth. The chalk contains fossils similar to that of the south of France. The tertiaries are often found isolated after the fashion prevalent in other countries. In some places conglomerates of the later Jurassic age occur, containing pebbles and fossils of the lower oolites.

Towards the sources of the Jordan we find igneous rocks prevailing, with their usual concomitants of metallic minerals, highly-colored landscapes, abundant springs, and verdant pastures. Hermon (the highest

Geological Map of Palestine.

mountain in Palestine) is formed of limestone, with bursts of trap. In this range occur the strata containing abundant remains of fish and vegetable impressions.

Galilee exposes similar conditions: an underlying oolite rock, an overlying cretaceous, with quartz, much broken up by trap.

The upper portion of the Jordan valley, as far south as the lower shores of the Sea of Tiberias, are much diversified by greenstone, lavas, pumice, and other kinds of igneous rock.

On the east rise the granitic and trappan mountains of Moab, inclosing a limestone country. In the valley itself are tertiary and post-tertiary accumulations, while on the west the tertiary sandstone occupies in force the plateaus of the subjacent limestone. Mount Tabor is a mass of chalk rock, and the cliffs around the Sea of Galilee are much intersected by basalts and lavas.

The Jordan valley itself shows two terraces far

above its present waters, both due to its former condition, first as an arm of the Red Sea, and then as a lake.

The Mount of Olives and the other eminences around Jerusalem are composed of chalk with flints; the older limestones appear in the bottom of the deep valleys. This is the substratum of the Holy City and its vicinity. Bethlehem is surrounded by coarse yellow cretaceous limestone.

The Dead Sea is bounded on the west principally by tall cliffs of stratified limestone, with much rubble of an ancient date: towards the south, tertiary marls and clays prevail, the whole abounding with traces of volcanic agencies. The upper portion of the long mound at the south of the lake is gypsum, overlying rock salt, which is furrowed into knolls and pillars. The south-eastern shore is colored by the bright red of the sandstone; on the east are heavy limestones and chalk, altered by the igneous masses forming the mountains of Moab. The north-east angle is formed of basaltic rocks, with volcanic slag and pumice.

The whole Jordan valley was undoubtedly a vale in tertiary periods; but the Dead Sea appears to have received the remarkable features which now characterize it subsequently to the deposition of the tertiary beds.

2. Extending our survey eastward from Palestine, we may embrace a wide area, extending from Ararat to the head of the

Persian Gulf, the general features of which are now well known. Many of the groups of secondary sedimentary strata familiar to us in Western Europe also occur here, upheaved, together with their overlying tertiary deposits, by igneous rocks, in like manner.

Along the margin of the present river-courses are alluvial deposits now in process of formation. Next, marine alluvium, following the direction of the existing great valleys, opening out into the sea, and still increasing at the outlet. Colonel Rawlinson and Mr. Ainsworth represent the marine alluvium as increasing at the head of the Persian Gulf at the rate of a mile in thirty years (*Quarterly Journal*, x, 465). There are occasional fresh-water deposits, showing the former existence of small lakes; somewhat of earlier date are extensive formations of gravel, proving the occurrence here, as in the West, of a period of turbulence at the commencement of the post-tertiary epoch.

The highest tertiary deposits form a system of red sandstone and marls underlying the valleys of the

Mesopotamian rivers. This newest red sandstone tertiary is much developed in Asia Minor, and thence eastward. It has subordinate beds of gypsum, with occasional nephth and bitumen springs. Underneath this the nummulitic series extends for 800 miles with a thickness of 3000 feet. This has been much disturbed by elevation, which has thrown it into domes and waves, constituting much of the peculiar scenery of the Turkish eastern frontier. Below this occurs the cretaceous series in the form of blue marls, white limestone with flints, and hippurite limestone. A few traces of Palæozoic rocks are brought to the surface; the whole is sustained by the granitic axis of the Caucasian chain, and occasionally metamorphosed by ancient volcanic contact.

There are no fossils common to the cretaceous series and the beds above, though both are marine deposits, nor are there any common to the two great tertiary divisions, the nummulitic and the red.

3. On turning westward towards the head of the Red Sea we encounter the remarkable peninsula of SINAI, formed of red sandstone, borne up and rifted by one of the most forcible exhibitions of igneous rocks to be found in the world.

On approaching the spurs of the Sinaitic range, boulders of red granite and metamorphic rock give indications of the disturbed district beyond.

4. The well-known narrow plain of EGYPT is a valley bordered by nummulitic rocks of eocene age, interspersed with sandstones. As the plain narrows, the scenery becomes diversified by frowning precipices of granite, basalt, and porphyry, which confine the foaming river at the cataracts, and expand into the mountains of Nubia. The sands, which stretch away towards the peninsula, cover tertiary strata, with silicified forests of the same age.

**Geometrical Style.** See GOTHIC ARCHITECTURE.

**Ge'on** (Γε'ων), a Græcized form (comp. Gen. ii, 13, Sept. Γε'ων) of the name ΓΗΩΝ (q. v.), one of the rivers of Paradise, mentioned (Ecclus. xxiv, 27) along with the Jordan, Euphrates, etc., in a description of wisdom ("as Geon in the time of vintage," meaning apparently the Nile at its period of annual overflow. Fritzsche, ad loc.).

**George, David.** See JONAS.

**George**, duke of Saxony, celebrated for his antagonism to Luther and to the Reformation, was born Aug. 3, 1471. He began to govern his province in 1500, and immediately showed a persecuting spirit against those who inclined to the Reformation. In 1519 he attended the four-days' controversy between Eck and Carlstadt at Leipzig, and afterwards that of Eck and Luther, from the 4th to the 14th of July. Discussions followed between the duke and Luther, which were afterwards continued alternately in Dresden and Wittenberg. He several times accused Luther to his uncle, the elector of Saxony, and sought to prejudice him against the reformer. Family misfortunes, such as the death of his brother Frederick in 1510, of his daughter Margaret in 1524, and of his wife in 1525, also contributed to embitter his disposition. He died April 17, 1539, but his religious views had some time before undergone a change; and under his successor and brother, Henry, the Reformation made great progress in Saxony. There is a MS. life of George of Saxony by George Spalatinus in the library of Gotha.—Herzog, *Real-Encyklop.* v, 28; Schulze, *Georg u. Luther* (Leipz. 1834).

**George**, elector of Brandenburg-Anspach, one of the first German princes who embraced the doctrines of the Reformation, and who was therefore surnamed the Confessor, and the Pious, was born at Onolzbach March 4, 1484. In 1515 he became, conjointly with his brother Casimir, regent of the province, in consequence of

the infirmities of his father, Frederick. Both his father and his brother having died, he assumed the government in his own name in 1527. In 1524 he had become acquainted with Luther, and adopted his views. In 1529 he accompanied the reformer to the Diet of Spire, where he signed, on the 19th of April, the celebrated protestation against the "Majority Decision" of the German princes. The next year he went to the Diet of Augsburg, where he indorsed the Evangelical Confession on the 25th of June, on which occasion he boldly said to the emperor that "he would rather lose his head than renounce his religious convictions." Following out the plans of ecclesiastical reform of his brother Casimir, he framed in 1533 the Church organization of Brandenburg-Nuremberg, as also the liturgy which accompanied it, and which has been recently revived. He died at Onolzbach Dec. 17, 1543. See Pauli, *Allgem. Preuss. Staatsgesch.* iii, 457, 476; Buchholz, *Gesch. d. Kurmark Brandenburg.* iii, 217, 296, 305; Mosheim, *Ch. Hist.* iii, 42; Herzog, *Real-Encykl.* v, 28.

**George, Enoch**, bi-shop of the Methodist Episcopal Church, was born in Lancaster Co., Virginia, in 1767 or 1768; was converted at about eighteen; entered the itinerancy in 1790; was made presiding elder in 1796; 1801 and 1802 located; in 1803 re-entered the travelling ministry; was elected bishop in 1816; and died at Staunton, Va., August 23, 1828. He was the son of a planter in moderate circumstances, and of no religious profession. His mother died while he was young, and he acquired in youth the gay and dissolute morals of the district where he lived. He was, however, at this period deeply convinced of sin under the preaching of that holy man, the Rev. D. Jarratt (q. v.), of the English Church. But the subsequent removal of his father to North Carolina for a time left him to grow more wicked than before, until at length, with his father, he was converted by the instrumentality of the Rev. John Easter. Although young, and exceedingly reluctant, he was thrust out by his brethren and his own inward convictions into public service, and for two or three years was very useful as an exhorter, local preacher, and assistant on circuits with Philip Cox and Daniel Asbury. In 1790 he entered the itinerancy, and from that time he bore for many years the hardships and trials of a pioneer Methodist preacher. His usefulness and influence continually increased, and in 1796 he was made presiding elder on a district which included Charleston, S. C., and his labors there resulted in a great revival of religion. In 1799 his health failed, and he became "superannuated." In 1800 he re-entered the itinerancy, but in 1801 his health failed again, and he located and opened a school at Winchester, in Virginia, and soon after married. In 1803 he re-entered the Conference. In 1816 he was delegate to the General Conference at Baltimore. In the same year his wife died. Bishop McKendree's health had now nearly failed, and when the Conference met it was decided to elect more bishops, and the choice fell upon R. R. Roberts and Enoch George. From this time he labored with untiring zeal and universal acceptability in supervision, visitation, and in preaching the word with mighty power, until he was taken from labor to reward. His funeral sermon was preached by bishop McKendree at the General Conference of 1852. Bishop George was a man of large information, and of great activity and force of mind. His genius was very original; the effect of his preaching was very great. Dr. Samuel Luckey gives the following account of a sermon by bishop George at John Street Church, New York, in June, 1816. "The subject of the discourse was the conquest which Christ achieved over sin and death. He announced his text: 'When he ascended up on high, he led captivity captive;' and, from the moment he uttered it, had complete command of his audience. The picture he drew of sin, and the desolations it has wrought, was truly terrific. Like a mighty cataract, he rushed on with

constantly increasing impetuosity, till every nerve that had braced itself to resist was unstrung, and his hearers seemed passively to resign themselves to an influence which was too strong for them. At a felicitous moment, when the feelings of his audience would bear to be turned into a different channel, he exclaimed, in the language of holy triumph, and in a manner peculiar to himself, 'But redemption smiled, and smiled a cure!' His train of thought was now changed, but the power of his eloquence was not at all diminished. Sin had been personified as the tyrant monster, swaying his daemon sceptre over our race, and death in his train, dragging the conquered millions to their dark abode. A mightier than these was now introduced—the sinner's Friend and the conqueror of death. He came to destroy the works of the devil, and to deliver those who, through fear of death, were all their lifetime subject to bondage. The risen and ascended Saviour was represented as coming up from the empire of death, having seized the tyrant upon his throne, and then as triumphantly passing the portals of heaven amid the acclamations of heaven's shining hosts. The description was so vivid as to be almost overwhelming. The audience, which had just before seemed like a terror-stricken multitude, almost within the very grasp of the destroyer, now exhibited countenances relumed with returning smiles. The whole assembly was actually in a commotion" (Sprague, *Annals*, vii, 193).—*Minutes of Conferences*, ii, 35; Wakely, *Heroes of Methodism*, p. 137; Fry, *Life of Ep. George* (18mo); Stevens, *Hist. of the Methodist Episc. Church*, vols. iii, iv.

**George of LAODICEA**, one of the Semi-Arian leaders in the theological controversies of the 4th century. He was born at Alexandria, and was presbyter of the church there before the Council of Nicea in 325, when his Arian opinions caused him to be deposed. He then removed to Syria, where he became bishop of Laodicea. He attended the Council of Antioch in 329 or 330, and the Council of Tyre in 335. He failed to be present at the Council of Sardica in 347 (his enemies said through fear), and, while absent, was deposed and excommunicated, but the sentence was never carried into effect. He was in great favor during the reign of Constantius II, and took part in many matters of importance; among others, in the elevation of Miletus to the bishopric of Antioch. Basil of Ancyra (q. v.) and George of Laodicea were the heads of the so-called *Semi-Arians*, who adopted the Eusebian doctrine that the Son is of *similar* essence with the Father. They published, "in conjunction with other bishops assembled in a synod at Ancyra, A. D. 358, a long and copious document, of a doctrinal and polemical nature, in which the doctrines of this party concerning the resemblance of essence, as well in opposition to the Nicene as to the Eumonian articles, were fully unfolded; at the same time that the Church was warned against the artifices of those who, by expunging the term *ὁμοία*, were seeking to suppress the doctrine of the resemblance of essence itself. It was here very clearly shown that true resemblance in all other things presupposed resemblance of essence, and that without this the notion of a Son of God, essentially different from created existences, could not be maintained" (Neander, *Ch. History*, ii, 405). This creed was adopted by the emperor Constantius and by the Synod of Sirmium, A. D. 358. We know nothing of him after the death of Constantius. His works are, *Letters to Alexander, bishop of Alexandria*:—*Ἐγκύριον εἰς Ἐπίσκοπον τὸν Ἐμισσηρόν*:—A work against the Manicheans, now lost.—Hoefler, *Nouv. Biog. Générale*, xx, 116; Neander, *Church History*, Torrey's transl., ii, 405; Baur, *Trinitätslehre*, i, 471; Herzog, *Real-Encyklop.* v, 30; Lardner, *Works*, iii, 596.

**George of POLENZ**, the first regular Roman Catholic bishop who embraced the Reformation, was born

at Meissen in 1478. He studied theology in Italy, was licensed there, and, having gone to Rome, became private secretary to pope Julius II. Having been admitted to the order of Teutonic Knights, he went to Prussia, where, in 1518, the grand master, Albrecht, margrave of Brandenburg, appointed him bishop of Sambia. His diocese was the first in which the Reformation strongly established itself. Brissman, a pupil of Luther, who had previously been a Franciscan, came to Königsberg, and the bishop invited him to preach the first evangelical sermon in the cathedral, Sept. 24, 1523. The bishop himself soon openly adopted the Reformed doctrines. In January, 1524, he ordered that all sermons and baptisms should take place in the vernacular throughout Prussia, and at the same time recommended Luther's Bible and writings. Luther went to Spalatin (Feb. 1, 1524), *Episcopus tandem unus Christo nomen dedit et evangelizavit in Prussia, neque Scabienensis*, and in the following year, 1525, he dedicated to *Dr. Georgio a Polentis*, vere episcopo Sambiensis ecclesie, his Latin commentary on Deuteronomy. In 1525 bishop George resigned all secular government. He then retired to the palace of Balga, and died April 28, 1550.—Herzog, *Real-Encyklop.* v, 26.

**George of TREBIZOND** was really a native of Crete, but as that island has a bad name, especially unfit for a priest, he took that of Trebizond, whence his ancestors had come. In 1420 he came to Italy—first to Venice, afterwards to Rome, where he lectured on rhetoric and philosophy. He was made secretary to Nicholas V, but lost the favor of the pope by his fierce advocacy of Aristotle against Bessarion, Pletho, and other learned Greeks. Alphonso, king of Naples, received him at his court and gave him a pension. He died at Rome in 1486, aged 91. He was undoubtedly a man of talent and learning, but quarrelsome and vain. He translated some of Plato's writings, and Eusebius's, but inaccurately. He published also a treatise *De Rhetorica* (Venice, 1523, fol.); controversial pieces against the Greek Church, to be found in Allatius, *Græcia Orthodoxa* (Rome, 1652, vol. i); *Comparatio Aristotelis et Platonis* (Ven. 1523, 8vo). See Brucker, *Hist. Phil.* iv, 65; Herzog, *Real-Encyklopädie*, v, 23; Cave, *Hist. Lit.* ii, App. p. 49; Fabricius, *Bibl. Græca*, iii, 102; Niccron, *Mém. pour Serris*, etc., tom. xix; Hoefler, *Nouv. Biog. Générale*, xx, 127.

**George**, prince of Anhalt and bishop of Merseburg, was born at Dessau Aug. 13, 1507, and educated at Leipsic. In 1525 he was made subdeacon, and in 1526 cathedral provost at Magdeburg. When twenty-two years of age his attainments were such that he was chosen by Albert, elector of Mentz, to be one of his council, and gained his highest confidence. About this time the Reformation attracted the attention of all men, and Luther's writings concerning the difference between the law and gospel, etc., were dispersed and read everywhere. Prince George was no idle spectator. At first he diligently opposed the so-called "novelties," and devoted himself specially to the study of Church history and to the Scriptures, the better to defend the "Church." He began all his investigations with prayer. The result was that he openly embraced the doctrines of the Reformation, and renounced all connection with popery. He put down superstition and set up seminaries of learning—the surest way, under God, of exterminating the errors which superstition had engendered. All, however, was done with Christian mildness, and multitudes were soon brought by divine grace to rejoice experimentally in the light of the Gospel. By 1534 Anhalt may be said to have become Lutheran. In 1545, by the persuasion of Luther, he consented to give himself to the work of the ministry, and was made bishop of Merseburg—an office full of danger and difficulty, which no worldly man would covet. He was ordained by Luther, Melancthon, and other divines,

August 2, 1545, in the cathedral at Merseburg. His whole time was thenceforth devoted to this holy work. Above all low ambition and revenge himself, he endeavored to remove them from others. He was a peacemaker among princes. Insults he bore with Christian magnanimity. He lived with God in his heart, and for God in his intercourse with men. Luther, Justus, Jenius, and others were his most intimate friends. As in life, so in death, he was full of resignation, faith, and love; dwelling most sweetly on the promises, especially John iii, 16; x, 27, 28, and Matt. xi, 28. He died Oct. 17, 1553, aged forty-six. His synodal addresses, in Latin, were published by Camerarius (1555); his German writings by Melancthon (7th edit. 1741). Melancthon wrote two elegies on his death, and Camerarius wrote his life in Latin, which was translated into German by Schubert, and published, with additions (Zerbst, 1854).—Middleton, *Biog. Evang.* i, 292; Beckmann, *Hist. d. Fürst. Anhalts*, vols. v, vi; Herzog, *Real-Encyclop.* v, 24.

**George Scholarius.** See GENNADIUS OF CONSTANTINOPLE.

**George**, patron of England, and of several other countries and towns, according to the legend, was a prince of Cappadocia, who fell a martyr under Dioclesian, 303. His greatest achievement was the conquest of a dragon, by which he delivered a king's daughter from death. He is commonly figured on horseback, in full armor, with the dragon writhing at his feet. It is difficult to separate the mythical from the historical in the accounts of St. George. Calvin and the Magdeburg centuriators deny that there ever was such a person. But it is certain that he was honored, and churches named after him, at a very early period, in the Eastern Church, especially in Georgia. Gregory of Tours mentions the honors paid him in France in the 6th century; and Gregory the Great ordered the renewal of an ancient church of St. George that was falling to ruin. His relics are said to be still preserved in the church of St. Germain des Prés at Paris. The Crusaders held St. George in special devotion; the English Council held at Oxford, 1222, made St. George's day a festival for all England; in 1347 Edward III instituted the Order of the Garter under his protection. Some writers identify St. George with the Arian George of Cappadocia (so Gibbon, *Decline and Fall*, Harpers' edit., ii, 454). Mr. John Hogg, secretary of the Royal Society of Literature, published a pamphlet in 1862, entitled *Supplementary Notes on St. George the Martyr*, in which he professes to settle the question by a Greek inscription taken from a very ancient church at Ezra, in Syria, in which George is styled Martyr, and the date of his death fixed before A.D. 346, while George the Arian, of Cappadocia, was yet living. See Heylyn, *Historie of St. George* (Lond. 1631, 4to); Gibbon, *Decline and Fall*, chap. xxiii; *Acta Sanctorum*, t. iii; Milner, *Historical and critical Inquiry into the History and Character of St. George*; Lowick, *Life and Martyrdom of St. George*; *Methodist Quarterly Review*, 1862, p. 499.

**George the Arian**, also **George the Fuller**, or of CAPPADOCIA, was called by the first name from the occupation of his father, and by the second because he was an inhabitant of that province. Few men have been more corrupt and more despicable. He began life as a parasite. Afterwards he was provided with a subaltern office in the commissariat department of the army, and he there embezzled the money intrusted to him, and was obliged to fly. He then became a vagabond. To so many bad qualities he added profound ignorance: he had no knowledge of letters, and still less of the holy Scriptures and theology. Notwithstanding these disadvantages, this man appeared to the Arians a fit instrument to work their will. They brought the emperor Constans into their views; he was their protector and their support. At

Antioch, in the year 356, there was an assembly of thirty Arian bishops, and in this assembly George was ordained, and received the mission to go and govern the Church of Athanasius. George entered Alexandria accompanied, by the order of Constans, by soldiers under the command of Sebastian, duke of Egypt, and a Manichaean. Under pretext of searching for Athanasius, they violated the most sacred places, and committed every kind of crime. The Alexandrians rose against him and obliged him to fly; but, supported by Constans, he returned more powerful than ever. But "the pagans, whose temples George had pillaged, afterwards rose in revolt, threw themselves upon George, and overwhelmed him with abuse and with blows. The next day they paraded him through the town upon a camel, and, having lighted a pile, they threw him and the animal on which he was mounted upon it, after which they threw his ashes to the winds, and plundered his house and his treasures (A.D. 361). Julian, on learning this outrage, was much irritated, or pretended to be so; he wrote a severe letter to the insurgents, but pursued them no further. As a lover of books, he endeavored to recover the library of George, which was very numerous. It is hard to reconcile the accounts of George's extreme ignorance with the accounts given of this library.—Sozomen, *Hist. Eccl.* bk. ii, ch. xiv, 28; bk. iii, ch. ii; Neander, *Ch. Hist.* ii, 60; Hook, *Eccles. Biog.* v, 295; Sozomen, *Hist. Eccl.* iii, 5; iv, 10; Hoefler, *Nouv. Biog. Générale*, xx, 116.

**George the Pisidian** (*Georgius Pisides* or *Pisida*) flourished about the middle of the 7th century. (This account is taken substantially from Smith, *Dictionary of Biography*, s. v.) George is described, in the manuscripts of his writings, as deacon and *γραφωφύλαξ*, "record-keeper," or *Σενοφύλαξ*, "keeper of the sacred vessels" of the Great Church (that of St. Sophia) at Constantinople. He appears to have accompanied the emperor Heraclius in his first expedition against the Persians, and to have enjoyed the favor both of that emperor and of Sergius, i. e. nothing further is known of him. Among his writings are *Εἰς τὴν κατὰ Περσῶν Ἐκστρατείαν Ἡρακλείου τοῦ βασιλέως ἀρροσάσεις τρεῖς*, *De Expeditione Heraclii Imperatoris contra Persas Libri tres*. This work is mentioned by Suidas, and is probably the earliest of the extant works of this writer. The three books are written in trimeter iambs, and contain 1098 verses. They describe the first expedition of Heraclius, whose valor and piety are in moderately praised, against the Persians, A.D. 622, when he attacked the frontier of Persia in the neighborhood of the Taurus. *Πόλεμος Ἀβαρκῶς ἢ Ἀβαρκῆ, Bellum Avanicum ἢ Avanicum*, a poem of one book of 541 trimeter iambic verses, describing the attack of the Avars on Constantinople, and their repulse and retreat (A.D. 626); *Εἰς τὴν ἁγίαν τοῦ Χριστοῦ τοῦ θεοῦ ἡμῶν ἀνάστασιν*, *In Sanctum Jesu Christi, Dei Nostri, Resurrectionem*, consisting of 129 trimeter iambic verses, in which George exhorts Flavius Constantine, the son of Heraclius, to emulate the example of his father; probably written about A.D. 627. *Ἑξαήμερον ἴπτοι Κοσμονογία, Opus Sex Dierum seu Mundi Orphicium*, a poem of 1910 iambic verses in the edition of Quercius, who restored some lines omitted by previous editors. It has been supposed that this work has come down to us in a mutilated condition, for Suidas speaks of it as consisting of 3000 verses. But it is possible that the text of Suidas is corrupt, and that we should read *εἰς ἐπι ἑσχαδία* instead of *τρισκαδία*. The poem has no appearance of incompleteness. The *Ἑξαήμερον* contains a prayer as if by the patriarch Sergius for Heraclius and his children. The poem was probably written about A.D. 629. *Εἰς τὸν μάρτυρα Βιοῦ, De Vinitate Vitæ*, 262 iambic verses; *Κατὰ Σεήθου, Contra Sererum*, or *Κατὰ ἑνασεβίου Σεήθου Ἀντιοχείας, Contra impium Sererum Antiochie*. This poem consists of 731 iambic verses. A passage of Nicephorus Callisti

(*Hist. Eccl.* xviii, 48) has been understood as declaring that George wrote a poem against Johannes Philoponus, and it has been supposed that Philoponus is aimed at in this poem under the name of Severus, while others have supposed that Nicephorus refers to the Hexæmeron, and that Philoponus is attacked in that poem under the name of Proclus. But the words of Nicephorus do not require us to understand that George wrote against Philoponus at all. This poem against Severus contains the passage to which Nicephorus refers, and in which the Monophysite opinions which Philoponus held are attacked. *Εγκώμιον εἰς τὸν ἄγιον Ἀναστάσιον μάρτυρα, Encomium in Sanctum Anastasium Martyrem*, in prose; *Ἐῖς τὸν ἐν Βλαχέρωναις ναόν, In Templum Dēipræ Constantinopoli in Blachernis situm*; a short poem in iambic verse. Some works known or asserted to be extant have been ascribed to George, but without sufficient reason. Usher and others have conjectured that he was the compiler of the *Chronicon Paschale*, but Quercius refutes the supposition. Le Long speaks of Greek commentaries on the epistles of Paul by George of Pisidia as being extant in the Imperial Library at Vienna, but they are not noticed in the catalogues of Lambecius and Reimannus; and it is probable that Le Long's statement is erroneous. Some persons have improperly confounded George of Pisidia with George of Nicomedia, who lived two centuries later; and Cave erroneously makes George of Pisidia archbishop of Nicomedia, although he correctly fixes the time in which he lived. The versification of George is correct and elegant, and inharmonious verses are very rare. He was much admired by the later Byzantine writers, and was very commonly compared with Euripides, to whom some did not hesitate to prefer him. But his poems, however polished, are frequently dull, though in the *Hexæmeron* there are some passages of a more elevated character. The *Hexæmeron* and *De Vanitate Vitæ*, with such fragments as had been collected, with a Latin version by Fred. Morel, were first published in 4to, Paris, 1584. Some copies of the edition have the date 1585 in the title-page. The *Hexæmeron* was also published by Brunellus, as a work of Cyril of Alexandria, together with some poems of Gregory Nazianzen and other pieces (Rome, 1590, 8vo). Both pieces, with the fragments, were reprinted in the appendix to the *Bibliotheca Patrum* of La Bigne (Paris, 1624, fol.), and with the version of Morel, and one or two additional fragments, in the Paris edition of the *Bibliotheca Patrum* (1654, fol.), xiv, 389, etc. The Latin version of Morel is in the edition of the *Bibliotheca* (Lyon, 1677, fol.), xii, 323, etc. (Quercius, ut sup.; Fabricius, *Bibl. Gr.* i, 185; vii, 450, 472, etc.; viii, 612, 615; Cave, *Hist. Lit.* i, 583).—Smith, *Dictionary of Gr. and Rom. Biography*, ii, 253, 254.

**Georgia**, or **GRUSIA**, formerly an independent country of Asia, now included in the Russian provinces of Tiflis and Kutais. The name is sometimes employed to designate the whole territory possessed or claimed by the Russians south of the Caucasus, and embracing the districts of Kacheth, Kartli (Karthalia, Karduel), Imereth, Mingrelia, and Guria. In this larger sense it has an area of about 28,000 square miles, and in 1862 a population of 1,142,611 inhabitants; while Georgia proper, embracing the three first-named districts, contains only 12,800 square miles and 577,267 inhabitants. The Georgians are one of that numerous group of nations or tribes that inhabit the Caucasus, to which Dr. Latham has given the name of Dioscurians. They are celebrated for the athletic frames of their men and the beauty of their women, but their long oppression by the Mohammedans has had its effect both upon their intelligence and their morality. Of the total population of Georgia, taken in the larger sense, 835,830 belong to the Georgian race (inclusive of Mingrelians and Lazi); the remainder are Turcomanni, Ossetes, Armenians, Jews, Rus-

sians, and Germans. The Christian population numbers 1,003,791, and the non-Christian 138,820 souls. On their language and literature, see the articles **GEORGIAN LANGUAGE** and **GEORGIAN VERSION**.

The ancient history of Georgia is altogether fabulous. It submitted to Alexander the Great, but after his death was made an independent kingdom. In this condition it remained for about twenty-one centuries. Christianity spread in Georgia about the close of the 4th century and dislodged the ancient religion, which was probably kindred to the Mithras service of the ancient Persians. In consequence of the profession of the Christian faith, Georgia became allied to the Byzantine empire, conjointly with which it resisted the attacks of the Sassanides. More successful than the inroads of the Sassanides were those of the Arabs, and under the dynasty of the Bagratides, a branch of the Armenian dynasty of that name (since 614), Georgia became a province of the empire of the Arabian caliphs, and only the mountainous districts in which the kings of Georgia found a refuge preserved a kind of independence. In the 9th century, during the decline of the Arabian caliphate, the Georgians recovered their independence for a short period, but in the 10th century they became tributary to the Mohammedan dynasties in Persia. Toward the end of the 10th century they again achieved independence, and inaugurated the most brilliant era in Georgian history; for from this period to the 13th century, when they were conquered by the Mongols, Georgia was governed by a series of able sovereigns, who increased its extent and raised it to great prosperity. Toward the end of the 14th century the country was conquered by Timour, who was driven from it in the beginning of the following century by George VII. Alexander I, the successor of George VII, divided the kingdom between his three sons. Each of these states was again divided, and at one time 26 different princes reigned in Georgia. The general history of Georgia now divides into two parts: that of the eastern states, Kartli and Kacheth; and that of the western states, including Imereth, Mingrelia, and Guria. From the 16th to the 18th century the eastern states were heavily oppressed by Persia, and in 1799, Gregory XI, after many attempts to establish their independence, resigned the states in favor of Paul, emperor of Russia, and in 1802 the emperor Alexander proclaimed the territory a Russian province. Of the three states forming Western Georgia, Guria fell into the hands of Russia in 1801, and formally surrendered itself to that empire by the treaty of 1810; Mingrelia was virtually added to Russia in 1803, and fully incorporated with it in 1868, and the state of Imereth toward the close of the 18th century. Thus the whole of Georgia has been brought

under the dominion of Russia, and has been united, along with the other Transcaucasian possessions of that country, into a general government, the head of which unites in his own person the military and civil powers, and exercises military supremacy over the whole of the Caucasus.

The Georgians were represented in the synods convened by the Armenian patriarch in the 5th and 6th centuries, and embraced the Monophysite faith, and they also withdrew from the communion of the patriarch of Constantinople. In the latter part of the 6th cen-

Mingrelian Monk.

tury they resumed their former ecclesiastical connection, and they have since been considered as a part of the Greek Church. When Georgia passed into the hands of Russia it lost the independence of its national Church. The differences between the Russian and the Georgian forms of religion being very small, the latter became subject to the Synod of Petersburg; the authority of the Georgian *catholicoi* was also transferred, and a Russian archbishop set to occupy the see of Georgia. Convents and nunneries are abundant, and the inmates are all mendicants. Most of the bishops are rich, but the majority of the priests are both very poor and ignorant. The best and fullest information about Georgia is contained in the works of Brosset, *Hist. ancienne de la Géorgie* (Petersb. 1849, 2 vols.; Additions, 1851), and *Histoire Moderne de la Géorgie* (Peters. 1854-57, 3 vols.).—Brockhaus, *Couvers.-Lex.*; Farrar; Helvot, *Ordres des Relig.* (ed. Migne), s. v. Melchites. (A. J. S.)

**Georgian Language.** The Georgian language, which is also spoken by the Mingrelians, Lazians, and the Suani, belongs to the Iberian family. The chief characteristics of it are as follows. Its alphabet consists of thirty-five letters; it has no articles; the substantives have eight cases and no genders; the adjectives, when associated with nouns, are indeclinable, but when they stand by themselves are declined; the comparative is formed by the prefix *n* and the suffix *si*, and cardinals are obtained by prefixing *me* to the ordinals. It possesses eight conjugations with several minor subdivisions, and the different persons are indicated by terminations and personal prefixes; it has several forms for the praterite and the future tenses, and only one form for the present tense; three modes, viz. indicative, imperative, and the participle, and supplies the place of the infinitive by a verbal noun; it has postpositions governing different cases, in addition to the prepositions, and can multiply verbs to any extent by the terminations *eleba* and *ola*, form abstracts from adjectives by the terminations *oba* and *eba*, as well as active personal nouns, adjectives—both active and passive—and diminutives, by various terminations and prefixes, and its construction allows many liberties. From the venerable old Georgian language a dialect developed itself, in the course of time, by the introduction into it of many Armenian, Greek, Turkish, and other foreign words, and by the vitiation of the pronunciation and spelling of many expressions. The two dialects have distinct alphabets: the alphabet in which the old Georgian is written is called *Kuzuri*, i. e. the sacred, and consists of the letters invented by Miesrob; and the alphabet of the modern Georgian is called *Keluli*, and is supposed to have been invented by the Georgians themselves in the 14th century. The old language is the ecclesiastical or literary, and is employed in all sacred and literary writings, while the modern is the civil dialect, or the dialect of common life (*lingua vulgaris*). Compare Ersch und Gruber's *Encyclopædie*, s. v. Georgier, p. 192; Eichhorn, *Allgemeine Bibliothek der biblischen Literatur*, i, 156 sq.—Kitto, s. v.

**Georgian Version.** This is one of the oldest versions of the Bible extant.

1. *Name, Date, and Source of this Version.*—The Georgians call their Bible by different names—1. *Biblia*, i. e. the Bible; 2. *Zmunda Zerili*, the holy Scripture; 3. *Sanкто Zerili*, the divine Scriptures; 4. *Zighni Zueliso da akalio aghkwnisa*, the books of the O. and N. T.; and 5. *Dabaleba*, Genesis, after the first book of the Bible. The version is supposed to have been made about A.D. 570, when the Georgians, stimulated by the example of the Armenians [see ARMENIAN VERSION], sent young men of talent to Greece to study the Greek language, who, on their return, translated the Scriptures and liturgical books of the Greek Church. The translation of the O. T. is made from the

Sept., and of the N. T. from Greek MSS. of the Constantinopolitan family, and is composed in the *ecclesiastical* or ancient dialect. See GEORGIAN LANGUAGE.

II. *Text and Editions of the Version.*—This venerable version has shared in all the troubles to which Georgia has been subject. The entire books of Maccabees and Ecclesiasticus were lost in the many revolutions of the country, passages disappeared from different parts of the volume, and the whole text got into a state of confusion. It was only in the beginning of the 18th century that prince Vaktangh published at Tiflis the Psalms, the Prophets, and the New Testament, and split up the text into chapters and verses. Shortly after, prince Arcil, uncle of prince Vaktangh, who fled from Kartel to Russia, undertook a revision of this version, making it conformable to the Russian translation as it then was, and divided it only into chapters, because the Russian translation was divided into chapters only. But this prince only lived to carry through the revision from Genesis to the Prophets, and to translate from the Russian Bible the lost books of Maccabees and Ecclesiasticus. His son, prince Vakuset, was, however, induced by the solicitations of his brother, prince Bachar, and the Georgian clergy resident in Russia, to continue the work of revision. He made the text conform still more to the Russian translation, newly revised according to the command of Peter the Great, supplied from this translation all the passages which were wanting in the Georgian version, made also the portions which his father had published conformable to this translation, and divided the whole into chapters and verses. He had Georgian types cast at Moscow, and at once began printing in that city; the correction of the press he committed to four native Georgians, and the first edition of the entire Georgian Bible appeared in 1743, fol., prince Bachar, brother of the editor, defraying the entire expense. From this edition the Moscow Bible Society reprinted the N. T. in 1816, 4to, under the superintendence of the Georgian metropolitan Ion and of archbishop Pafnut, with types cast from the very matrices which had been used for the former edition, and which had escaped the conflagration of the city at the time of Napoleon's invasion. Another edition was published in 1818, in the *civil* character, 4to. It is said that there have appeared more recent editions of various portions of this version both at Tiflis and in Russia, but there is no particular account of them.

III. *Critical Value of the Version.*—The value of this version, in a critical point of view, has been greatly impaired by the corruptions which it has suffered during the centuries of political changes to which the country has been exposed, and especially by the endeavor of its editors to make it conform to the Russian translation. It must not, however, be supposed that its value is entirely gone. Both Tischendorf (*N. T. Græc.* 2d ed. præf. p. lxxviii) and Mr. Malan regard it as a good auxiliary to the criticism of the Greek text. Indeed, Mr. Malan, who has published an English translation of the Georgian version of John's Gospel, goes so far as to say that "it differs from the Slavonic in many places in which it might be expected to agree, it has a character of its own, is a faithful version, and valuable for criticism" (*The Gospel according to St. John, translated from the eleven oldest Versions, etc.*, by the Rev. S. C. Malan, M.A., Lond. 1862, p. ix, note 3).

IV. *Literature.*—A very interesting treatise on this version, containing a brief account of its history and publication, from the preface of prince Vaktangh, was communicated by professor Adler, of Copenhagen, to Eichhorn, who published it in his *Allgemeine Bibliothek der biblischen Literatur*, i, 153 sq., and afterwards reprinted it in his *Einleitung in das Alte Testament*, vol. ii, sec. 318, b, etc. Dr. Henderson, who had visited both Georgia and Russia, could do no more in his *Biblical Researches and Travels in Russia* (London, 1826, p.

518, etc.) than to give a literal translation of this account. A valuable book has also been published by Franz Carl Alter, entitled *Ueber Georgiatische Literatur* (Wien, 1798), in which is given an extensive collation of the various readings from both the O. and N. T.—Kitto, s. v.

**Georgius Syncellus**, termed also "Abbas and Monachus," lived in the latter part of the 8th and beginning of the 9th century. He obtained his distinguishing epithet from having been syncellus or personal attendant of Tarasius, patriarch of Constantinople, who died A.D. 806. Theophanes, who was his friend, describes him as a man of talent and learning, especially well versed in chronographical and historical subjects, which he had studied very deeply. He died in "the orthodox faith," without completing his principal (and, indeed, only known) work, the completion of which he strongly urged, as his dying request, upon his friend Theophanes. He is the author of a chronography or chronicle, the title of which in full is as follows: "Ἐκλογή Χρονολογίας συνταγίσα ὑπὸ Γεωργίου Μοναχοῦ Συγκέλλου γερονότου Ταρασιῶν Πατριάρχου Κωνσταντινουπόλεως ἀπὸ Ἀδάμ μέχρι Διοκλητιανοῦ," *A select Chronicle, drawn up by George the Monk, Syncellus of Sarasius, Patriarch of Constantinople, from Adam to Diocletian*. The author states that he intended to bring his work down to A.D. 800; but, as already stated, he was cut off by death, and the work only comes down to the accession of Diocletian, A.D. 284. The work is included in the various editions of the Byzantine writers. Goar, the Parisian editor, contended that we have the work of Syncellus in a complete form, but the contrary opinion seems to be the better founded. Possevino, Vossius, and others have identified Syncellus with Georgius Harmartolus; but Allatius has shown that this identification is erroneous. Syncellus has transcribed verbatim a considerable part of the Chronicon of Eusebius, so that his work has been employed to restore or complete the Greek text of the Chronicon. The *Chronographia* of Theophanes, which extends from A.D. 285 to A.D. 813, may be regarded as a continuation of that of Syncellus, and completes the author's original design. The Bonn edition of Syncellus is edited by W. Dindorf, and with the brief *Chronographia* of Nicephorus of Constantinople, occupies 2 vols. 8vo, 1829. (Theophanes, *Proœmium ad chronog.*; Cedren. *Compend.* sub. init.; Allatius, *Ibid.* p. 24; Fabricius, *Bibl. Gr.* vii. 457; Cave, *Hist. Lit.* i. 611).—Smith, *Dictionary of Gr. and Rom. Biography*, ii. 254. See SYNCELLUS.

**Gephen**. See VINE.

**Gephrus** (Γεφρούρες, prob. a Græcized form of the Heb. גֶּפְרוֹר, a village; see CAPRAR), a town mentioned by Polybius (v. 70, 12) as captured by Antiochus along with Pella and Camus (Camon), and therefore situated in the same vicinity east of the Jordan (Reland, *Palaest.* p. 804); perhaps the present *Kefr-Aban*, a short distance N.E. of Kefr-Abil (Robinson, *Later Researches*, p. 318).

**Ge'ra** (Heb. גֶּרָא, גֶּרָא, a grain [see GERAR]; Sept. Γηρά), the name of at least three Benjamins.

1. The son of Bela and grandson of Benjamin (1 Chron. viii. 3); probably the same with the one mentioned (with some confusion) in verses 5, 7, unless one of these be identical with No. 2 below. In Gen. xlvii. 21, he is given as if directly the son of Benjamin; and he there appears among the descendants of Jacob, at the time of that patriarch's removal to Egypt, B.C. 1871. See JACOB. "Gera is not mentioned in the list of Benjamite families in Numb. xxvi. 38-40, of which a very obvious explanation is that at that time he was not the head of a separate family, but was included among the Belaites; it being a matter of necessity that some of Bela's sons should be so included, otherwise there could be no family of Belaites at all.

To the remarks made under Becher should be added that the great destruction of the Benjamins recorded in Judg. xx may account for the introduction of so many new names in the later Benjamite lists of 1 Chron. vii and viii, of which several seem to be women's names" (Smith). See BENJAMIN. In 1 Chron. vii. 7, UZZIEL occupies the same position as Gera elsewhere in the genealogy. See BELA.

2. The father (or ancestor) of Ehud the judge (Judg. iii. 15); compare 1 Chron. viii. 5, 7; possibly identical with No. 1 above. B.C. ante 1509. See EHUD.

3. The father (or ancestor) of Shimei, which latter so grossly abused David (2 Sam. xvi. 5; xix. 16, 18; 1 Kings ii. 8); thought by some to be identical with both the foregoing. B.C. ante 1023. See SHIMEI.

**Gerah** (גֶּרָה, *gerah'*, a berry or granule [compare English "barley-corn" and "grain" as measure and weight]; Sept. ὀβολος, Vulgate *obolus*), the smallest weight, and likewise the smallest piece of money among the Hebrews, equivalent to the twentieth part of a shekel (Exod. xxx. 13; Lev. xxvii. 25; Numb. iii. 47; xviii. 16; Ezek. xlv. 12). It would therefore weigh 13 $\frac{1}{2}$  Paris grains, and be worth about 3 cents. The same Hebrew word also signifies *cut*, as being a round mass. It has been supposed by many that the *gerah* was so called from the fact that some kernel, as of pepper or barley, or perhaps the seeds of the carob-tree (κεράτιον) may have been originally used for this weight, but it would be equal in weight to 4 or 5 beans of the carob, and according to the Rabbins, it weighed as much as 16 grains of barley.—Gesenius. See METROLOGY.

**Gerardo**, JOSEPH MARIE, BARON DE, a French statesman and philosophical writer, was born at Lyons February 29, 1772, and was educated for the priesthood. During the Revolution he served in the French army, and, under Napoleon, he filled various high civil offices. He was made a French peer in 1837, and died at Paris November 10, 1842. He is mentioned here for his philosophical and ethical writings. Having sent an article to the French Academy in 1799, which received a prize, he enlarged it into a treatise entitled *Des Signes et de l'art de penser* (1800, 4 vols. 8vo). This was followed by *De la Generation des connaissances humaines* (1802, 8vo), which was crowned by the Berlin Academy. His most important work is his *Histoire complete des systemes de Philosophie considérés relativement aux principes des connaissances humaines* (1803, 3 vols; 3d ed. 1817-8, 4 vols. 8vo):—*Da perfectionnement moral ou de l'éducation de soi-même* (1824; 1832, 2 vols.), which received the Montyon prize from the French Academy, and was translated into English and published under the title *Self-Education* (Boston, 1860, 12mo). De Gerardo wrote many works on economical and political science.—Hoefer, *Nouv. Biogr. Générale*, xx. 143.

**Ge'rar** (Heb. גֶּרָר, גֶּרָר, according to Simonis a *bolging-place*, according to others from the Arabic *water-spots*, but more prob. with Fürst, a *region*, as being the centre of a distinct Philistine kingdom; Sept. and Josephus [ῥά] Γε'ραρα), a very ancient town and district on the southernmost borders of Palestine, in the country of the Philistines, and not far from Gaza. It was visited by Abraham after the destruction of Sodom (Gen. xx. 1), and by Isaac when there was a dearth in the rest of Canaan (Gen. xxvi. 1). The intercourse, differences, and alliances of the Hebrew fathers with the king and people of Gerar form a very curious and interesting portion of patriarchal history (Thomson, *Land and Book*, ii. 350). See ISAAC. In Genesis the people are spoken of as Philistines; but their habits appear, in that early stage, more pastoral than they subsequently were. Yet they are even then warlike, since Abimelech had "a captain of the host," who appears from his fixed title, "Phicol," like that

of the king, "Abimelech," to be a permanent officer (comp. Gen. xxi, 32; xxvi, 26; and Psa. xxxiv, title). See ABIMELECH. The local description, xxi, 1, "between Kadesh and Shur," is probably meant to indicate the limits within which these pastoral Philistines, whose chief seat was then Gerar, ranged, although it would by no means follow that their territory embraced all the interval between those cities. It must have trenched on the "south" or "south country" of later Palestine. From a comparison of xxi, 32 with xxvi, 23, 26, Beersheba would seem to be just on the verge of this territory, and perhaps to be its limit towards the N.E. For its southern boundary, though very uncertain, none is more probable than the wady El-Arish ("River of Egypt") and El-'Ain; south of which the neighboring "wilderness of Paran" (xx, 15; xxi, 22, 31) may probably be reckoned to begin. Isaac was most probably born in Gerar. The great crops which he subsequently raised attest the fertility of the soil, which, lying in the maritime plain, still contains some of the best ground in Palestine (xxi, 2; xxvi, 12). It was still an important place in later times, as we may gather from 1 Chron. xiv, 13, 14. According to the ancient accounts, Gerar lay in or near a valley ("the valley of Gerar," Gen. xxvi, 17; comp. 1 Sam. xv, 5), which appears to be no other than the great wady *Sheriah* (or one of the branches of it) that comes down from Beersheba; besides, we know that it was in the land of the Philistines, and that it was not far from Beersheba when Isaac resided there (Gen. xxvi, 1, 20, 23; 26-33; comp. xx, 1). The name continued to exist (perhaps as a matter of tradition) for several centuries after the Christian era. Eusebius and Jerome (*Onomast.* s. v. Gerar) place it twenty-five Roman miles southward from Eleutheropolis; and Sozomen (*Hist. Eccles.* vi, 32; ix, 17) reports that a large and celebrated monastery stood there, near a winter torrent. The abbot Silvannus resided there towards the end of the 4th century, and the name of Marcion, bishop of Gerar, appears among the signatures of the Council of Chalcedon in A.D. 451. In the Talmudical writings the district is termed *Gerarki* (Schwarz, *Palestine*, p. 109). The name seems to have been afterwards lost, and Dr. Robinson (*Researches*, i, 279; ii, 383) was unable to discover any traces of it in the locality; but he unnecessarily disparages the claims of wady *El-Jerar*, which runs into the wady El-Arish at Jebel el-Helal, to be regarded as a southernmost trace of the ancient kingdom (*Jour. Sac. Lit.* July, 1860, p. 309-319). It is possible that the wells mentioned by him as lying in the shallow wady El-Kusaimeh, in the same neighborhood (i, 280), may represent those digged by Abraham and reopened by Isaac (Gen. xxvi, 18-22).—Kitto, s. v.; Smith, s. v. J. Rowlands, in travelling from Gaza to Khulassah, came after 3 hours' march to a broad, deep wady, *Jurf el-Gerar*, a little below its junction with a branch-valley from wady Sheriah. Near this junction are ruins called *Kiurbet el-Gerar* (Williams, *Holy City*, 1845, App. p. 488-492), which he identifies with Gerar. This account Van de Velde heard confirmed by the people of Gaza, with a slight modification (*Narrative*, ii, 183). There are no ruins yet standing, but scattered stones which appear to have been once used in buildings; and in the absence of old wells, it would seem as if the ancient city had been supplied from some spring. Stewart's suggestion of the ruins of *El-Abdeh* (*Tent and Khan*, p. 207) is out of the question (Van de Velde, *Memoir*, p. 314). In 1 Chron. iv, 39, the Sept. substitutes Gerar (*Γεραρα*) for Gedor (q. v.).

**Gerard, Alexander**, an eminent Scotch divine, was born Feb. 22, 1728, at Garioch, in Aberdeenshire, and was educated at Marischal College and the University of Edinburgh. In 1750 he succeeded Fordyce as professor of moral philosophy at Marischal College, and in 1760 was appointed divinity professor. In 1771 he obtained the theological professorship at King's

College, Aberdeen. He died in 1795. He wrote (1.) *An Essay on Taste* (1759, 8vo; enlarged edition, 1780). This work obtained the prize of a gold medal offered by the Philosophical Society of Edinburgh. (2.) *An Essay on Genius* (Lond. 1767, 8vo);—(3.) *Sermons* (London, 1780, 1782, 2 vols. 8vo);—(4.) *Dissertations on the Genius and Evidences of Christianity* (Lond. 1766, 8vo);—(5.) *The Pastoral Care*, edited by his son (Lond. 1799, 8vo).

**Gerard, Gilbert, D.D.**, son of Alexander Gerard, was born and educated at Aberdeen. He was for some time pastor of the English church at Amsterdam, and afterwards professor of Greek in King's College, Aberdeen, and in 1775 of divinity. He died in 1815. His "Institutes" are valuable for the numerous references to authorities which they contain, and are very scarce. The greater part of the first edition was lost at sea. His writings are, *Institutes of Biblical Criticism* (Edinb. 1808, 2d edit. 8vo);—*Compendious View of the Evidences of natural and revealed Religion* (London, 1828, 8vo).—Darling.

**Gerard, Thom, Tum, Tunc, or Tenque**, founder and first grand master of the order of St. John of Jerusalem, was born about 1040, on the isle of Martigues, on the coast of Provence. While Jerusalem was in the hands of the Saracens, some merchants of Amalfi obtained permission from the sultan of Egypt and Syria, in 1050, to erect a Benedictine monastery near the holy sepulchre, for the convenience of the pilgrims. It was called Sainte Marie la Latine. Among others, Gerard arrived to pay his devotions, and he acquired a high character for his piety and prudence. The number of pilgrims increased every year, enriching the treasury of the monastery. In 1080 the abbot built a hospital for the reception of poor and sick pilgrims, the management of which he gave to Gerard. The chapel of that hospital was consecrated to St. John, because of a tradition among the inhabitants of Jerusalem that Zacharias, the father of St. John, had lived on the spot where it was built. After the conquest of Jerusalem by Godfrey of Bouillon, Gerard projected a new religious order, in which the ecclesiastical and military characters were to be blended. This design he began to carry out in the year 1100, when numbers associated with him under the denomination of "Hospitalers of St. John of Jerusalem," "who, besides the three vows of chastity, poverty, and obedience, took a particular vow to devote themselves to the relief of all Christians in distress. This order, and the rules drawn up for its government, were approved and confirmed by pope Paschal II, who, by a bull which he issued, granted it various considerable privileges, and recognised Gerard as the first grand master. Gerard died in the year 1120. Such was the commencement of that order which in succeeding times became so celebrated in history, when its members were commonly known by the name of knights of Rhodes, and afterwards by that of knights of Malta."—Hook, *Eccles. Biog.* v, 298; Hoefer, *Nov. Biog. Générale*, xx, 149.

**Gerard or Gerhard Groot.** See GROOT, GERHARD.

**Gerāsa** ([j] Γερασα, prob. of Heb. origin), a celebrated city on the eastern borders of Perea (Josephus, *War*, iii, 3, 3), placed by some in the province of Coele-Syria and region of Decapolis (Steph. s. v.), by others in Arabia (Epipl. *adv. Ier.*; Origen, in *Johan.*). It is doubtless the *Gelusa* assigned by Pliny (v, 18) to the Decapolis. These various statements do not arise from any doubts as to the locality of the city, but from the ill-defined boundaries of the provinces mentioned. In the Roman age no city of Palestine was better known than Gerasa (Smith, *Dict. of Class. Geog.* s. v.). It lay on elevated ground, according to Ptolemy, in 68° 15' = 31° 45' (Reland, *Palest.* p. 459), who distinguishes it from the *Gerasa* (Γερασσα) of Arabia Petraea (*ib.* p. 463). It is not mentioned in the O. T.,

nor in the New, unless in the reading *Gerascene* (q. v.) at Matt. vii, 28. It is not known when or by whom Gerasa was founded. Its inhabitants were mostly heathen (Josephus, *War*, iii, 3, 3; comp. iv, 9, 1; ii, 18, 5; *Ant.* xiii, 15, 5). It is first mentioned by Josephus as having been captured by Alexander Jannæus (B. C. cir. 85), who was actuated by a desire of gaining a large treasure (Josephus, *War*, i, 4, 8; *Ant.* viii, 2, 3). That king died near it while besieging Regaba (*Ant.* xv, 5). Before the place had time to recover from this capture, it was included among the number of those cities which were burnt by the enraged Jews in their vengeance on the Syrians, and on the Roman power generally, for the massacre of a number of their nation at Casarea (Josephus, *War*, ii, 18, 1). A terrible revenge was taken by other cities, but Gerasa is honorably excepted (*War*, ii, 18, 5). It had scarcely recovered from this calamity when the emperor Vespasian dispatched Annius, his general, to capture it. Annius, having carried the city at the first assault, put to the sword one thousand of the youth who had not effected their escape, enslaved their families, and plundered and fired their dwellings. It appears to have been nearly a century subsequent to this period that Gerasa attained its greatest prosperity, and was adorned with those monuments which give it a place among the proudest cities of Syria. History tells us nothing of this, but the fragments of inscriptions found among its ruined palaces and temples show that it is indebted for its architectural splendor to the age and genius of the Antonines (A. D. 138-80). It subsequently became the seat of a bishopric. Baldwin II of Jerusalem destroyed its castle in the year 1122 (Will. Tyr. p. 825; *Histor. Hierosol.* p. 615). This was the native place of Nicomachus Gerascenus. Coins of Gerasa may be seen in Eckhel (*Nom. Vet.* iii, 356). There is no evidence that the city was ever occupied by the Saracens. There are no traces of their architecture—no mosques, no inscriptions, no reconstruction of old edifices, such as are found in most other great cities in Syria. All here is Roman, or at least ante-Islamic; every structure remains as the hand of the destroyer or the earthquake shock left it, ruinous and deserted. It is now called *Jerash*. Its ruins were first discovered by Setzen (i, 388 sq.), and have often been subsequently visited. They are by far the most beautiful and extensive east of the Jordan. They are situated on both sides of a shallow valley that runs from north to south through a high undulating plain, and falls into the Zurka (the ancient Jabbok) at the distance of about five miles. A little rivelet, thickly fringed with oleander, winds through the valley, giving life and beauty to the deserted city. The first view of the ruins is very striking, and such as have enjoyed it will not

soon forget the impression made upon the mind. The long colonnade running through the centre of the city, terminating at one end in the graceful circle of the forum; the groups of columns clustered here and there round the crumbling walls of the temples; the heavy masses of masonry that distinguish the positions of the great theatres; and the vast field of shapeless ruins rising gradually from the green banks of the rivulet to the battlemented heights on each side—all combine in forming a picture such as is rarely equalled. The form of the city is an irregular square, each side measuring nearly a mile. It was surrounded by a strong wall, a large portion of which, with its flanking towers at intervals, is in a good state of preservation. Three gateways are still nearly perfect, and within the city upwards of two hundred and thirty columns remain on their pedestals. A description of them may be found in Burckhardt's *Syria*, p. 252-64; also in those of Lord Lindsay and others, which are well condensed in Kelley's *Syria*, p. 448 sq. See also Buckingham's *Palestine*, p. 405; Keith, *Evidence of Prophecy* (36th ed.).—Smith, s. v.; Kitto, s. v.

**Gerascène** (Γερασσηνός), an inhabitant of *Gerasa* (q. v.). Several MSS. read Γερασσηνός instead of Γερασσηνών, in Matt. viii, 28; but the city of Gerasa lay too far from the Sea of Tiberias to admit the possibility of the miracles having been wrought in its vicinity. If the reading Γερασσηνός be the true one, the χῶρα, "district," must then have been very large, including Gadara and its environs; and Matthew thus uses a broader appellation, where Mark and Luke use a more specific one. This is not impossible, as Jerome (*ad Obad.*) states that Gilead was in his day called Gerasa, and Origen affirms that Γερασσηνών was the ancient reading (*Opp.* iv, 140).—Smith, s. v. See GADARA. The nature of Origen's argument makes this statement very doubtful. It looks like a bold hypothesis to get over a difficulty (see Alford, *ad loc.*). The rival Gergesa, however, is also mentioned by Eusebius and Jerome. The latter thus writes: "Hodieque super montem viculus demonstratur iuxta stagnum Tyberiadis in quod porci præcipitanti sunt" (*Onomast.* s. v.). Thomson thinks he has discovered Gergesa as a ruin called *Kersa* or *Gersa*, on the bank of wady Semak, east of the lake. He describes it as "within a few rods of the shore, and an immense mountain rises directly above it, in which are ancient tombs. . . . The lake is so near the base of the mountain, that the swine rushing madly down it could not stop, but would be hurried on into the water and drowned" (*Land and Book*, ii, 34-38). It is uncertain which reading has the highest authority, and consequently these conjectures are very doubtful (see, however, Ellicott's *Lectures on the Life of our Lord*, p. 188, note; Van de Velde, *Memoir*, p. 311; Reland, p. 502, 807). See GERGSENE.

**Gérauld**, HUGUES, a French priest of evil name in the 12th cent., first mentioned as chaplain of pope Clement V. He afterwards became archdeacon of Eu, in the diocese of Rouen. Clement V finally appointed him bishop of Cahors, in consideration, it is said, of a large sum of money. He soon, however, took advantage of his position to despoil the inhabitants of his diocese, and pope John XXII appointed the bishops of Riez and Arras to investigate the charges against Gérauld. Accused of simony, of ingratitude towards the see of Rome, of cruelty to those who appealed from his decisions, of spoliation, and of criminal con-

Principal Ruins of Jerash.

nection with women, he was condemned to prison for life. An author of that period, Bernard Guidonis, says that Géraud, after being stripped of the insignia of his office, was condemned to be dragged on the public highway, flayed in some parts, and finally burned alive. The execution took place in July, 1317. See Raynaldus, anno 1317; Martene, *Veterum Scriptorum*, t. v, p. 174; Bzovius, *Num.* 16; Duchesne, *Histoire des Cardinaux français*, t. ii, p. 290.—Hoefer, *Nouv. Biog. Générale*, xx, 185.

**Gerbaïs, JEAN**, doctor of the Sorbonne, was born at Rupois in 1629, and became professor of rhetoric at the royal college of Paris, 1662, and principal of the college of Rheims, where he died in 1699. He was commissioned by the French clergy to publish the *Décisions touchant les Réguliers* (decreed in the assembly of 1645), with Hallier's notes. He wrote, 1. *De Causis Majoribus* (1679, 4to), in which he ably supports the liberties of the Gallican Church, and maintains that episcopal causes ought to be first judged by the metropolitan, and the bishops in his province; Innocent XI condemned this work in 1680:—2. *Traité du Pouvoir de l'Eglise et des Princes sur les empêchemens du Mariage* (A Treatise on the authority of Kings over the hindrances to Marriage, 1690, 4to):—3. *Lettres touchant le Péculé des Religieux* (1698, 12mo):—4. A translation of the treatise by Panormus on the Council of Basle (8vo):—5. *Lettre sur la Comédie* (12mo):—6. *Lettre sur les Dorures et la Luxe des Habits des Femmes*.—Dupin, *Eccles. Writers*, cent. xvii; Hook, *Eccles. Biog.* v, 299; Hoefer, *Nouv. Biog. Générale*, xx, 186; Nicéron, *Mémoires*, tom. xiv.

**Gerberon, GABRIEL**, an indefatigable Benedictine author, was born at St. Calais, in the province of Maine, France, Aug. 12, 1628. He became a Benedictine in the congregation of St. Maur in 1649. After teaching theology with reputation for several years, he declared himself in favor of Jansenism, and for this he was ordered to be arrested in 1682 by Louis XIV. He escaped to Holland, and in 1703 was seized by the bishop of Mechlin and imprisoned at Amiens, and afterwards at Vincennes, for no crime but following strictly the Augustinian theory of grace. He died at the abbey of St. Denis March 29, 1711. His chief work is the *Histoire Générale du Jansénisme* (General History of Jansenism, Amsterd. 1703, 3 vols. 12mo), but he wrote very largely also on the Jansenist and other controversies.—Herzog, *Real-Encyklop.* v, 31; Hook, *Eccles. Biog.* v, 299; Hoefer, *Nouv. Biog. Génér.* xx, 194 sq.

**Gerbert.** See SYLVESTER II, Pope.

**Gerbert, Martin**, baron of Hornau and Benedictine abbot of St. Blasien, one of the most learned Roman Catholic prelates of the last century, was born at Ilorb, on the Neckar, Aug. 13, 1720. He was educated at the Jesuits' college in Freiburg, and at the cloister of St. Blasien, where he became priest in 1744, and abbot in 1764. He enlarged his mind by travel and varied culture, and his works bear every mark of industry and learning. He died May 3, 1793. His principal works are *Historia nigre sylve ord. St. Benedicti* (Colon. 1783-88, 3 vols. 4to):—*Principia theologiæ* (St. Blasien, 1757-59, 7 vols.):—*Theologia Vetus et Nova circa Presentiam Christi in Eucliaristia* (Freiburg, 1756, 12mo):—*Monumenta Veteris Liturgiæ Alemannicæ, ex antiquis MSS. collecta et digesta* (St. Blasien, 1777-79, 4to):—*De Cantu et Musicâ Sacrà a primâ Ecclesiæ Ætate usque ad presens Tempus* (1774, 2 vols.). Gerbert divided his history of church music into three parts: the first ends at the pontificate of St. Gregory; the second goes as far as the fifteenth century; and the third to his own time. In 1784 he published a work of more importance, under the title of *Scriptores Ecclesiastici de Musicâ Sacrà, potissimum ex variis Italiæ, Galliæ, et Germaniæ Codicibus collecti* (3 vols. 4to). This is a collection of all the ancient authors who have written on music, from the 3d century to the invention of print-

ing, and whose works had remained in manuscript.—Herzog, *Real-Encyklop.* v, 33; Hook, *Eccles. Biog.* vol. v.; Choron, *Dictionnaire des Musiciens*; Hoefer, *Nouv. Biog. Générale*, xx, 198 sq.

**Gerbillion, JEAN FRANÇOIS**, a French Jesuit missionary to China, was born at Verdun Jan. 11, 1634. He studied at Nancy under the Jesuits, and was, with five others, sent as missionary to China, where he arrived March 25, 1686. The missionaries at once sought an audience from the emperor, who refused to admit the new religion, on the ground that as the sects of Fo, Tao-sse, the Lamas, and the Ha-changs taught men to do good and avoid evil, there was no need of a fourth for the same purpose, which would only lead to doctrinal disputes. Yet, by special edict, he retained at his court the missionaries Gerbillion, Pereira, and Bouvet, with permission to practice the religion, but not to teach it. He commanded them to learn the Chinese and other dialects, and sent them on several diplomatic missions. In 1692 Christian worship was finally permitted in China; but Gerbillion's attempts to introduce the Roman Catholic religion, and to open the country to European commerce, failed through the jealousy of the divers other orders of Roman missionaries. He was for some time rector of the French College of China, and died at Pekin March 25, 1707. He wrote *Elements of Geometry* in Chinese and Tartar (Pekin):—*Theoretical and Practical Geometry*, in the same languages, and published also at Pekin:—*Observations historiques sur la grande Tartarie* (in Du Halde's *Description de la Chiné*, t. xxxiii):—*Relation de huit Voyages en Tartarie* (in Du Halde). He is also considered by some as the author of the *Elementa Lingue Tartaricæ*, which others attribute to the missionaries Couplet or Bouvet. See *Lettres édifiantes*, tom. xviii; *Hist. génér. des Voyages*, t. vii and viii.—Hoefer, *Nouv. Biog. Générale*, xx, 203 sq.

**Gerdes, DANIEL**, a learned German divine, and member of the Berlin Academy, was born at Bremen April 19, 1698. He took his doctor's degree at Utrecht, after which (1726) he became professor of theology and ecclesiastical history at Duisburg. He removed to Groningen in 1735, and died Feb. 11, 1765. His works are accurate, and of great utility for the history of the Reformation. Among them are *Historia Reformationis, sive Introductio in historiam evangelii sæculo xvi passim per Europam renovati*, etc. (Gron. 1744-52, 4 vols. 4to):—*Florilegium historico-criticum librorum variorum* (Gron. 1763, 8vo):—*Meltemata Sacra* (Gron. 1759, 4to):—*Specimen Italiæ Reformate* (L. Bat. 1765, 4to):—*Doctrina gratiæ sive compendium theologiæ dogmaticæ* (Duisb. 1751, 4to).—Hoefer, *Nouv. Biog. Générale*, xx, 206; Herzog, *Real-Encyklop.* v, 34.

**Gerdil, HYACINTHE SIGESMOND**, a Roman Catholic theologian, and cardinal of the Congregation of St. Paul, was born at Samoens, in Savoy, June 23, 1718. In 1732 he entered the order of the Barnabites, and studied at Bologna, where his talents attracted the notice of the cardinal archbishop Lambertini, who secured his aid in the preparation of his great work on *Canonization*. He was subsequently made professor of philosophy and theology, first at Macerata (1737) and afterwards at Turin (1749). In 1777 pope Pius VI made him cardinal, with the title of St. Cecilia, and afterwards prefect of the Propaganda. He would probably have been elected pope on the death of Pius VI but for his great age. He died August 12, 1802. Gerdil was undoubtedly a man of considerable intellect and of large acquirements. His writings on metaphysical subjects, especially against Locke's philosophy, have secured the admiration of many Protestants as well as of Roman Catholics. He also wrote largely on the evidences of Christianity, and against Bayle and the Encyclopedists. Editions of his works were published by P. Toselli (Bologna, 1781-1794, 6 vols.), and by Fontana and Grandi (Rome, 1805 sq., 20 vols.). In

the 20th vol. of the latter edition there is a biography of Gerdil by Fontana. See Tiplado, *Biografia degli Italiani illustri*, tom. iv.; Hoefler, *Nouv. Biog. Générale*, xx, 207 sq.; Gams, *Gesch. der Kirche Christi im 19<sup>ten</sup> Jahrhundert* (Junsb. 1853, vol. i.).

**Gerem.** See GARMITE.

**Gergäsa, Gergësa.** See GERASENE; GADARA; GERSENE.

**Gergeséne** (Γεργεσηνός), a reading (Γεργεσηνών) found in the Received Text (with many fragmentary uncial and other MSS.) in the account of the expulsion of the swine by our Lord (Matt. viii, 28), instead of *Gadarene* (Γαδαρηνών, as Tischendorf, with several of the earliest and many later MSS.), or *Gerasene* (Γερασσηνών, so Lachm. with most of the cursive MSS. and several versions), or even *Gazarene* (Γαζαρηνών, so the Codex Sinaiticus). In the parallel passages (Mark v, 1; Luke viii, 26) the readings are different, but equally disputed (R. T. Γαζαρηνών, with by far the greatest weight of authority; Lachm. and Tisch. Γερασσηνών, with N [in Mark only, in Luke Γεργεσηνών], B, etc.). It is evident that the evangelists did not write the same name; and we may therefore suppose that the exact spot was one on the immediate lake shore, within the bounds of the region indifferently known by either of the general names *Gadara* or *Gerasu*; or if "Gergesenes" be retained, it may refer to the ancient territory of the *Girgashites* (q. v.), in the same neighborhood. See GERASENE.

**Ger'gesite** (only in the plur. Γεργεσαίτοι), a Græcized form (Judith v, 16) of the ancient GIRGASHITE (q. v.).

**Gerhard, Johann**, an eminent theologian of the Lutheran Church of Germany, was born in Quedlinburg October 17, 1582. In 1599 he went to the University of Wittenberg, and studied medicine for a time, then went to Jena, where he privately studied Hebrew, the Scriptures, and the fathers. After passing A.M., he began to give private lectures in those branches and in theology. Thence he went to Marburg, where the teachings of Winckelmann and Mentzer deeply impressed him. After lecturing on theology at Jena, he accepted the superintendency of Heldburg, offered him by Casimir, duke of Coburg, in 1606. Declining two calls to Jena in 1610 and 1611, and one to Wittenberg in 1613, he finally accepted the seniorate of the faculty of Jena, at the command of George I, elector of Saxony, in 1615. Here he devoted his great talents industriously to his duties to the university, the Church, and the state. He held the first place in the ecclesiastical conferences at Jena, 1621; Leipsic, 1624 and 1639; and was consulted by princes both in ecclesiastical and secular matters. He died Aug. 20, 1637. Gerhard's great points of excellence as a dogmatic writer are comprehensiveness of plan, thoroughness of the treatment of topics, and perspicuity of style. The *Loci Communes Theologici* has not only been a standard of Lutheran theology for two centuries, but has also been greatly valued by Roman Catholic and Reformed theologians.

The exegetical writings of Gerhard are also of great value, the most important being *Comment. in Harmoniam hist. evang. de Passione et Resurrectione Christi* (1617, 4to), a continuation of the commentaries of Chemnitz and Lyser, and published with them (Hamburg, 1652, 3 vols. fol.). It is specially valuable for its patristic learning. Posthumously appeared his *Comm. in Genesis* (1637, 4to); *Comm. in Deuteronomium* (1638, 4to); in 1 and 2 *Tim.* (1643); in 1 and 2 *Peter* (1641); *ad Coloss.* (1660, 4to); *ad Romanos* (1666, 4to). He also published *De Sacræ Script. Interpretatione* (1610, 4to):—*Methodus Stud. Theol.* (1620)—still valuable as a methodological work. In the sphere of dogmatic theology Gerhard has made his name immortal by two great works; the first is *Doctrina catholica et evangelica, quam*

*ecclesiæ Augustanæ confessioni addictæ profitentur ea Romano-catholicorum scriptorum suffragiis confirmata* (1634, 3 vols.), a work which many theologians consider the best of Gerhard's writings. The other great work is *Loci Theologici, cum pro adstruenda veritate, tum pro destruenda quorundam contradi. sententiarum falsitate*, which he began in Heldburg when only twenty-seven years of age, and of which he celebrated the completion (ninth volume) at Jena in 1629 (first edit. Jena, 1610-1625, 9 vols.; frequently reprinted; one of the best editions is that by Cotta, Tüb. 1762-1789, 22 vols. 4to, the two last volumes containing index by G. H. Müller; a new edition was begun by Dr. Preuss, Berlin, 1867 sq.). That part of the *Loci* which treats of God and of the person of Christ was developed more fully in his work published in 1625, under the title *Exegesis sive uberior explicatio articulorum*, etc. The value of the *Loci Theologici* in comparison with the predecessors of Gerhard in the Lutheran Church, especially with Hutter and with his successors, especially with Calov and Quenstedt, is ably treated by Gass in his *Geschichte der protest. Dogmat.* i, 261.

The practical writings of Gerhard are full of the spirit of Christian love and devotion. He was, indeed, charged by the cold dogmatists of the time with pietism and mysticism. Among them are *Meditationes Sacræ ad veram pietatem excitandam* etc. (Jena, 1606):—*Schola Pietatis, d. i. christl. Unterrichtung z. Gottseligkeit* (Jena, 1622-23, 12 vols.):—*52 Heilige Betrachtungen*. These have been frequently reprinted; the *Meditationes* has passed through scores of editions, and has been translated into English and often reprinted (last, Lond. 1841, 12mo). For a list of all his writings, see Fischer, *Vita Joannis Gerhardi* (Lips. 1723); see also Herzog, *Real-Encyclopædie*, v, 40; Gieseler, *Church History* (ed. Smith), iv, 574.

**Gerhard, Johann Ernst**, (1.) a theologian, was born at Jena December 15, 1621. He studied at the universities of Jena, Altdorf, Helmstadt, Leipzig, and Wittenberg, devoting himself to Oriental literature and theology. He visited successively the libraries of Holland, Switzerland, and France, and in his journey became acquainted with some of the most eminent literary men of that period. After his return to Jena he became professor of history, afterwards of theology, in the university, and died in that city Feb. 24, 1688. He wrote *Harmonia linguarum orientalium*:—*Consensus et Dissensus religionum profanarum Judæismi, Samaritanismi, Muhamedismi et pygmismi*.—Ersch and Gruber, *Allg. Encycl.*; Jöcher, *Allg. Gel.-Lex.*; Hoefler, *Nouv. Biog. Générale*, xx, 213.

**Gerhard, Johann Ernst**, (2.) son of Johann Ernst (1.), was born at Jena Feb. 19, 1662. He studied theology at Jena and Altdorf, became a member of the *Societas Discrevendum*, and contributed a number of *Memoirs* to the *Acta Eruditorum* of Leipzig. He was afterwards appointed church and school inspector of Gotha; was called to Giessen in 1696 as professor of theology, and became preacher in the same city in 1698. He wrote some controversial works little sought after now; the most remarkable of them is entitled *Der lutherischen und reformirten Religion Einigkeit*.—Ersch u. Gruber, *Allg. Encycl.*; Fischer, *Vita Gerhardi*; Hoefler, *Nouv. Biog. Générale*, xx, 213.

**Gerhard, St.**, was born at Staves, diocese of Namur, in 890. In his youth he served under Berengar, count of Namur. Being once at a hunt, he left his companions and retired to pray in a chapel built on a high cliff near the village of St. Gerhard. Having fallen asleep there, he had a dream in which he thought that he saw the apostles, and that Peter, taking him by the hand, took him around the chapel, afterwards telling him that it was to be enlarged in honor of St. Peter and the martyr Eugene, and that the bones of the latter were to be brought there. Gerhard fulfilled this dream, and in 918 built there a church and also a

convent. Some time after he was sent by Berengar on a mission to count Robert of Paris, after fulfilling which he entered the abbey of St. Denis, near Paris. The relics of St. Eugene and of several other saints were given him by the abbey of St. Denis, which was said to possess enough of them to supply all France! The fame of the miracles wrought by the relics of St. Eugene was soon spread around, and drew crowds of visitors, obliging Gerhardt to live in a cell near the church in order to obtain some quiet. After spending twenty-two years in the reformation of convents, he died Oct. 3, 957. He was canonized by Innocent II. See Mabillon, *Acta ss. ord. s. Bened.* v, 248 sq.—Herzog, *Real-Encyclop.* v, 89.

**Gerhardt**, PAUL, the "prince of German hymnists," was born at Gratenhainichen, in the electorate of Saxony, in 1606 or 1607. He received his first appointment in 1651 as minister at Mittenwalde. In 1657 he was called to the church of St. Nicholas, in Berlin. In 1668 he became archdeacon at Lübben, in Saxony, where he died in 1676. As a theologian, he is noted particularly in the controversies between the Lutherans and the Reformed. As a poet, his hymns are remarkable for depth of Christian feeling and suggestive thought. They are the expression of his own feelings and experience, and characterized generally by their subjective tone. Among his 120 hymns there are no less than 16 commencing with "I," and 60 others referring exclusively to God and the individual heart; yet their popular element distinguishes his productions from the poets of the Reformation and those of the later rationalistic period. "His hymns happily combine simplicity with depth and force. They are the heart-utterances of one who had a simple but sublime faith in God, and who recognised his fatherly presence in the operations of nature, the superintendence of Providence, and the daily bestowment of the surpassing gifts of redemption." He never published a complete edition of his hymns, but after 1649 they found their way into Protestant hymn-books. J. E. Ebeling, music director in Gerhardt's church, had them published in 1667, with music of his own composition. There have been many editions since; among the latest are those of Wackernagel (Stuttg. 1843; new edit. 1849), Schultz (Berlin, 1842), Becker (Lpz. 1851), and Langbecker, *Leben und Lieder Gerhardts* (Berl. 1841). Many of his hymns have been translated into English; the fullest collection is Paul Gerhardt's *Spiritual Songs*, translated by John Kelly (Lond. 1867), a well-meant but unsuccessful effort. His noble hymn, *O Haupt voll Blut und Wunden* (based on Bernard's *Salve caput cruciatum*), has been repeatedly rendered; the best version is that of Dr. J. W. Alexander (*O sacred Head now wounded*), given in Schaff's *Christ in Song*, p. 178. His *Befiehl du deine Wege* is admirably translated by John Wesley in the hymns, *Commit thou all thy griefs* (779 of Methodist Episcopal Hymn-book), and *Give to the winds thy fears* (780 of the same collection). His *O Jesu Christ mein schönes Lust* is also translated by John Wesley (*Jesus, thy boundless love to me*, Hymn 833, Methodist Hymn-book). Dr. Schaff also gives versions of his *Wir singen dir, Immanuel*, *We sing to thee, Immanuel* (*Christ in Song*, p. 56); *Fröhlich soll mein Herze springen*, *All my heart this night rejoices* (*Christ in Song*, p. 58, C. Winkworth's version); *O Welt, dich hier dein Leben*, *O world, behold upon the tree* (*Christ in Song*, p. 174, C. Winkworth's version). Some of these, and also versions of other of Gerhardt's hymns, are given by Cox, *Hymns from the German* (Lond. 1865); and by C. Winkworth, *Lyra Germanica* (London; reprinted in New York). See, besides the works already cited, Herzog, *Real-Encyclopädie*, v, 45; Hofer, *Nov. Biog. Génér.* xx, 214; Miller, *Our Hymns, their Authors and Origin* (Lond. 1866, 12mo); Wimmer, *Leben G.'s* (Altenburg, 1723); Roth, *G. nach seinem Leben u. Wirken* (Leipz. 1829); Schulz, *Paul G. u. der grosse Kurfürst*

(Berl. 1840); Wildenhahn, *Paul G., ein kirchen-gesch. Lebensbild* (Leips. 1845; 2d edit. 1850).

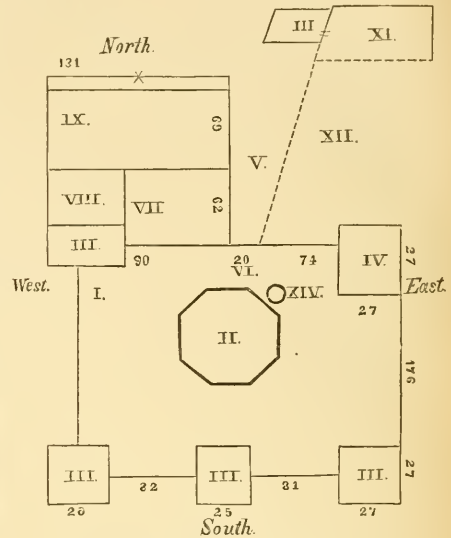

**Gerhoch** or **Geroch**, a Roman Catholic priest of Germany, was born in 1093 at Polling, in Bavaria. Soon after completing his theological studies he took an active part in the conflict between the popes and the emperors in favor of the former. Bishop Herman of Augsburg made him a canon and scholasticus of the cathedral school; but he soon left this position, as the bishop, who sided with the emperor, appeared to him to be a schismatic. He withdrew to the Augustinian monastery of Raitenbuch (now Rottenbuch), where he remained until 1122, when, peace having been made between the pope and the emperor, the bishop of Augsburg recalled him. In 1123 he accompanied the bishop to Rome, to reconcile him with the pope. After his return from Rome he was again for a time *Magister* and *Doctor Juvenum* at Augsburg, but, being disgusted with the want of ecclesiastical discipline which prevailed there, he left the city again for Raitenbuch. But there also his reformatory efforts were unsuccessful, although they were supported by the pope. In 1126, bishop Kuno, of Ratibon, made him his secretary; soon after he ordained him priest, and gave him the parish of Cham, to establish there a house for regular canons; but the opponents of a rigid discipline again thwarted the whole plan. After the death of bishop Kuno, Gerhoch found a new patron in archbishop Conrad I of Salzburg, who, in 1132, made him provost of the monastery of Reichersberg, which position he retained until his death in 1169. Gerhoch was a zealous defender of a rigid orthodoxy and of all the claims of the pope, and a violent and quarrelsome opponent of the rights claimed by the emperors in Church affairs, of simony, and of the marriage of priests. He devoted throughout his life a special attention to the reformation of the clergy, and was a steadfast adherent of the theological method of the earlier fathers in opposition to the rising scholasticism. He even went so far as to charge the *Magister Sententiarum* with heresy. His eagerness in combating Adoptionism and Nestorianism carried him off into the other extreme, and he used many expressions on the person of Christ which seem to be Eutychian. Of his writings, a commentary on the 64th Psalm, in which he treats of the corrupt condition of the Church, is best known. He gives, himself, a list of all his works, in the preface to the Commentary on the Psalms, which has been published by Pez as the fifth volume of his *Thesaurus Anecdotorum*, in 1728. Some of these works have not yet been found. Those that are known are given in Migne, *Patrologia Latina*, vols. ccxcii, ccxiv.—See Herzog, *Real-Encyclop.* v, 49; Neander, *Church History* (Torrey's transl., vol. iv). (A. J. S.)

**Ger'izim** (always with the prefix גֵּרִיזִים, גֵּרִי, *Ger'izim'*, *Mount of the Gerizites* [from גֵּרִיזִי, *Gerizzi'*, dwellers in a *shom* (i. e. desert) land, from גֵּרַז, *garaz'*, to cut off; possibly the tribe subdued by David, 1 Sam. xxvii, 8]; Sept. Γαριζῖν, Josephus Γαριζῖν) and **Ebal** were two mountains of Samaria, forming the opposite sides of the valley which contained the ancient town of Shechem, the present Nablús. From this connection it is best to notice them together. The valley which these mountains enclose is about 200 or 300 paces wide, by above three miles in length; and Mount Ebal rises on the right hand and Gerizim on the left hand of the valley (which extends west-north-west) as a person approaches Shechem from Jerusalem (see Ritter, *Erdk.* xvi, 641 sq.). These two mountains were the scene of a grand ceremony—perhaps the most grand in the history of nations—duly performed by Joshua as soon as he gained possession of the Promised Land (Deut. xxvii; Josh. viii, 30-35). See below. These mountains are mentioned by Josephus as being similarly situated on either side of Shechem (*Ant.* iv, 8, 44). He also refers to the temple

built upon one of them by the Samaritans after the exile as the seat of their national worship (*Ant.* xi, 7, 2; 8, 2-6), as related in the Apocrypha (2 Macc. vi, 2). See below. In order to justify their traditions in this respect, they have corrupted the reading of their text of the Pentateuch in Deut. xxvii, 4, so as to read "Gerizim" instead of "Ebal." It was from the top of this mountain that Jotham uttered the famous parable of the trees to the Shechemite insurrectionists under Abimelech, gathered in the plain below (*Judg.* ix, 7), a position from which he could easily be heard (see Hackett's *Illustra. of Script.* p. 198). The ascent of the hill is so difficult that, ere any of the followers of Abimelech could climb it, Gerizim would be far away among the defiles of the neighboring mountains. See JOTHAM.

1. Mount Gerizim has been fully described by several travellers who have ascended it. The latest and most complete account of the objects of interest extant upon it may be found in M. Sauley's *Narrative*, chap. viii, where also its history is given in detail. See also Robinson's *Bibl. Researches*, iii, 96 sq.; Olin's *Travels*, ii, 340 sq. Dr. Robinson says: "Mounts Gerizim and Ebal rise in steep, rocky precipices immediately from the valley on each side, apparently some 800 feet in height. The sides of both these mountains as here seen (i. e. from Nablús) were, to our eyes, equally naked and sterile. The side of the northern mountain, Ebal, along the foot, is full of ancient excavated sepulchres. The southern mountain is now called by the inhabitants *Jebul et-Túr*, though the name Gerizim is known at least to the Samaritans. The modern appellation of Ebal we did not learn." Dr. Olin states that the summit of Gerizim is somewhat higher than that of Ebal. The top of Gerizim affords a commanding view of a considerable region, chiefly occupied with mountains of inferior elevation, but also embracing several fruitful valleys, especially those of Nablús and of wady Sahl, through which lies the road to Jerusalem. A great number of villages are seen all along its north-eastern side, upon high and apparently precipitous spurs of the mountain which push out into the valley from (wady Sahl) the main ridge. Cultivation is carried quite to the top of the mountains, which are adorned with plantations of fruit-trees, while every level spot and a vast number of small fields, supported by terraces, are sown in wheat. A considerable portion of the table-land on the summit of Gerizim itself exhibits marks of recent tillage. Mount Ebal, as viewed from Gerizim, spreads out, like the latter, into a table-land, but is apparently rocky and more broken, and less susceptible of cultivation. Mount Gerizim is ascended by two well-worn tracks, one leading from the town of Nablús at its western extremity, the other from the valley on its northern side, near one of the two spots pointed out as Joseph's tomb. It is on the eastern extremity of the ridge that the holy places of the Samaritans are collected. First, there occurs the small hole in the rocky ground where the lamb is roasted on the evening of the Passover; next, the large stone structure occupying the site of the ancient temple. In one of the towers of this edifice, on the north-east angle, is the tomb of a Mussulman saint, Sheik Ghranem. Under the southern wall of this castle or temple is a line of rocky slabs, called the "ten stones," in commemoration of the ten (or twelve) stones brought by Joshua, or of the ten tribes of the northern kingdom; they have every appearance of a large rocky platform, divided by twelve distinctly marked *natural* fissures. Beyond this platform, still further to the east, is a smooth surface of rock, sloping down to a hole on its south side; the scene, according to Samaritan tradition, which some recent travellers have endeavored to vindicate, of Abraham's sacrifice (*Moriah*, Gen. xxiv), of his meeting with Melchizedek (*Gen.* xiv; so Theodotus in Eusebius, *Prap. Ev.* ix, 22), and several other sacred

events. (See Stanley's *Sinai and Palest.*, p. 245.) Mr. Bartlett also ascended Mount Ebal, but he says he "could discover no trace of by-gone generations, though the view, like that from Gerizim, is splendid and extensive" (*Footsteps of our Lord*, p. 186). The remains of the temple on Mount Gerizim are fully described by Thomson (*Land and Book*, ii, 213 sq.).—Kitto, s. v. See SHECHEM.

Foundations of Samaritan Temple on Gerizim.

2. The leading historical incidents connected with Mount Gerizim are of a highly interesting character, and some of them (as above intimated) have been the subjects of controversy.

(1.) High places had a peculiar charm attached to them in those days of external observance. The law was delivered from Sinai: the blessings and curses affixed to the performance or neglect of it were directed to be pronounced upon Gerizim and Ebal. (See Michaelis, *De montibus Ebal et Gerizim*, Argent. 1773; Stiebritz, *Vindicie τῶν ἑβραίων contra Kennicottum*, Hal. 1767; Zeffel, *id.* ib. 1766; Vershuir, *De lectione Samar.* ad loc., Francee, 1767.) Six of the tribes—Simeon, Levi (but Joseph being represented by two tribes, Levi's actual place probably was as assigned below), Judah, Issachar, Joseph, and Benjamin, were to take their stand upon the former to bless; and six, namely, Reuben, Gad, Asher, Zebulun, Dan, and Naphtali, upon the latter to curse (*Deut.* xxvii, 12-13). Apparently, the ark halted midway between the two mountains, encompassed by the priests and Levites, thus divided by it into two bands, with Joshua for their coryphaeus. He read the blessings and cursings successively (*Josh.* viii, 33, 34), to be re-echoed by the Levites on either side of him, and responded to by the tribes in their double array with a loud Amen (*Deut.* xxxvii, 14). Curiously enough, only the formula for the curses is given (*ibid.* v, 14-26); and it was upon Ebal, and not Gerizim, that the altar of the whole unwrought stone was to be built, and the huge plastered stones, with the words of the law (*Josh.* viii, 52; Josephus, *Ant.* iv, 8, 44, limits them to the blessings and curses just pronounced) written upon them, were to be set up (*Deut.* xxvii, 4-6)—a significant omen for a people entering joyously upon their new inheritance, and yet the song of Moses abounds with forebodings still more sinister and plain-spoken (*Deut.* xxxiii, 5, 6, and 15-28). See JOSHUA.

(2.) The next question is, Has Moses defined the localities of Ebal and Gerizim? Standing on the eastern

side of the Jordan, in the land of Moab (Deut. i, 5), he asks: "Are they not on the other side Jordan, by the way where the sun goeth down (i. e. at some distance to the W.), in the land of the Canaanites, which dwell in the champaign over against Gilgal (i. e. whose territory—not these mountains—commenced over against Gilgal; see Patrick on Deut. xi, 30), beside the plains of Moreh?" . . . These closing words would seem to mark their site with unusual precision; for in Gen. xii, 6 "the plain (Sept. 'oak') of Moreh" is expressly connected with "the place of Sichem or Shechem" (N. T. *Sychem* or *Sychar*, which last form is thought to convey a reproach. See Reland, *Diss. on Gerizim*, in Ugolini, *Thes.* p. dcxxv; in Josephus the form is *Sicima*), and accordingly Judg. ix, 7, Jotham is made to address his celebrated parable to the men of Shechem from "the top of Mount Gerizim." The "hill of Moreh," mentioned in the history of Gideon his father, may have been a mountain overhanging the same plain, but certainly could not have been farther south (comp. vi, 33, and vii, 1). Was it therefore prejudice, or neglect of the true import of these passages, that made Eusebius and Epiphanius, both natives of Palestine, concur in placing Ebal and Gerizim near Jericho, the former charging the Samaritans with grave error for affirming them to be near Neapolis? (Reland, *Dissert.*, as above, p. dcxxx). Of one thing we may be assured, namely, that their scriptural site must have been, in the fourth century, lost to all but the Samaritans, otherwise these two fathers would have spoken very differently. It is true that they consider the Samaritan hypothesis irreconcilable with Deut. xi, 30, which it has already been shown not to be. A more formidable objection would have been that Joshua could not have marched from Ai to Shechem, through a hostile country, to perform the above solemnity, and retraced his steps so soon afterwards to Gilgal, as to have been found there by the Gibeonites (Josh. ix, 6; comp. viii, 30-35). Yet the distance between Ai and Shechem is not so long (under two days' journey). Neither can the interval implied in the context of the former passage have been so short as even to warrant the modern supposition that the latter passage has been misplaced. The remaining objection, namely, "the wide interval between the two mountains at Shechem" (Stanley, *S. and P.* p. 238, note), is still more easily disposed of, if we consider the blessings and curses to have been pronounced by the Levites, standing in the midst of the valley—thus abridging the distance by one half—and not by the six tribes on either hill, who only responded. How indeed could 600,000 men and upwards, besides women and children (comp. Num. ii, 32 with Judg. xx, 2 and 17), have been accommodated in a smaller space? Besides, in those days of assemblies "sub dio," the sense of hearing must have been necessarily more acute, just as, before the aids of writing and printing, memories were much more retentive. We may conclude, therefore, that there is no room for doubting the scriptural position of Ebal and Gerizim to have been—where they are now placed—in the territory of the tribe of Ephraim; the latter of them overhanging the city of Shechem or Sicima, as Josephus, following the scriptural narrative, asserts. Even Eusebius, in another work of his (*Præp. Evang.* ix, 22), quotes some lines from Theodotus, in which the true position of Ebal and Gerizim is described with great force and accuracy; and St. Jerome, while following Eusebius in the *Onomasticon*, in his ordinary correspondence does not hesitate to connect Sichem or Neapolis, the well of Jacob, and Mount Gerizim (*Ep.* cviii, c. 13, ed. Migne). Procopius of Gaza does nothing more than follow Eusebius, and that clumsily (Reland, *Palæst.* ii, 13, p. 503); but his more accurate namesake of Cæsarea expressly asserts that Gerizim rose over Neapolis (*De Edif.* v, 7)—that Ebal was not a peak of Gerizim (see Quaresm. *Elucid. T. S.* lib. vii, per. i, c. 8), but a distinct mountain to the north of it, and

separated from it by the valley in which Shechem stood, we are not called upon here to prove; nor again, that Ebal was entirely barren, which it can scarcely be called now; while Gerizim was the same proverb for verdure and gushing rills formerly that it is now, at least where it descends towards Nablith. See EBAL.

(3.) It is a far more important question whether, as the Samaritans believe, Gerizim was the mountain on which Abraham was directed to offer his son Isaac (Gen. xxii, 2, and sq.). It has been observed that it is not the mountain, but the district which is there called Moriah (of the same root with *Morch*: see Corn. a Lapid. on Gen. xii, 6), and that antecedently to the occurrence which took place "upon one of the mountains" in its vicinity—a consideration which of itself would naturally point to the locality, already known to Abraham, as the plain or plains of Moreh, "the land of vision," "the high land," and therefore consistently "the land of adoration," or "religious worship," as it is variously explained. That all these interpretations are incomparably more applicable to the natural features of Gerizim and its neighborhood than to the hillock (in comparison) upon which Solomon built his Temple, none can for a moment doubt who have seen both. Jerusalem unquestionably stands upon high ground; but owing to the hills "round about" it, cannot be seen on any side from any great distance; nor, for the same reason, could it ever have been a land of vision or extensive views. Even from Mount Olivet, which must always have towered over the small eminences at its base to the southwest, the view cannot be named in the same breath with that from Gerizim, which is one of the finest in Palestine, commanding, as it does, from an elevation of nearly 2500 feet (Arrow-smith, *Geograph. Dict. of the H. S.* p. 145), "the Mediterranean Sea on the west, the snowy heights of Hermon on the north, on the east the wall of the trans-Jordanic mountains, broken by the deep cleft of the Jablok" (Stanley, *S. and P.* p. 235), and the lovely and tortuous expanse of plain (the Mukhna) stretched as a carpet of many colors beneath its feet. Neither is the appearance which it would "present to a traveller advancing up the Philistine plain" (*ib.* p. 252)—the direction from which Abraham came—to be overlooked. On the other hand, it is clear that the "land of Moriah" was only thus designated as containing the notable mountain there referred to; and any of the hills about Jerusalem are sufficiently conspicuous for the purpose. Abraham was undoubtedly at Beersheba when he received the command (comp. Gen. xxi, 33, and xxii, 1-3, 19). It appears from the narrative that on the third day he reached the place, offered the sacrifice, and returned to the spot where he had left his servants. The distance from Beersheba to Gerizim is about 70 geographical miles, as the crow flies, which, in such a country, will give 90 of actual travel. Abraham's servants were on foot, carrying wood; Isaac was also on foot, and Abraham rode an ass. It is not, indeed, absolutely necessary, as Mr. Porter thinks (*Hand-book of S. and P.* i, 359), that he should have started from Beersheba (see Gen. xxi, 34—"the whole land being before him," c. xx, 15). But had he set out, even from so southern a spot, "on the morning of the third day, he would arrive in the plain of Sharon, exactly where the massive height of Gerizim is visible afar off" (Stanley, p. 248), and from thence, with the mount always in view, he would proceed to the exact "place which God had told him of" in all solemnity—for again, it is not necessary that he should have arrived on the actual spot during the third day. All that is said in the narrative is that, from the time that it hove in sight, he and Isaac parted from the young men, and went on together alone. Still this interpretation is not the natural and obvious one, and supposes too protracted a journey for the circumstances. The Samaritans, therefore, through whom the tradition of the site of Gerizim has been preserved,

are probably wrong when they point out still—as they have done from time immemorial—Gerizim as the hill upon which Abraham's "faith was made perfect;" a natural result of their desire to magnify their national seat of worship. It is, moreover, strange that a place once called by the "Father of the faithful" Jehovah-jireh, should have been merged by Moses, and ever afterwards, in a general name so different from it in sense and origin as Gerizim. Josephus, in more than one place, asserts that where Abraham offered, there the Temple was afterwards built (*Ant. i, 13, 2; vii, 13, 9*). St. Jerome follows Josephus (*Quest. in Gen. xxii, 5, ed. Migne*), and the Rabbinical traditions respecting Mount Moriah are strongly in the same direction (Cunæus, *De Republ. Heb. ii, 12*). The Christian tradition, which makes the site of Abraham's sacrifice to have been on Calvary, is merely a monkish transference from the Jewish vicinity. See MORIAH.

(4.) Another tradition of the Samaritans is still less trustworthy, viz., that Mount Gerizim was the spot where Melchizedek, met Abraham—though there certainly was a Salem or Shalem in that neighborhood (*Gen. xxxiii, 18; Staley, S. and P. p. 217, and sq.*). The first altar erected in the land of Abraham, and the first appearance of Jehovah to him in it, was in the plain of Moreh, near Sichem (*Gen. xii, 6*); but the mountain overhanging that city had not in any case, as yet, been hallowed to him by any decisive occurrence. He can hardly, therefore, be supposed to have deviated from his road so far, which lay through the plain of the Jordan; nor again is it likely that he would have found the king of Sodom so far away from his own territory (*Gen. xiv, 17, and sq.*). See SHAVEN, VALLEY OF. Lastly, the altar which Jacob built was not on Gerizim, as the Samaritans contend, though probably about its base, at the head of the plain between it and Ebal, "in the parcel of a field" which that patriarch purchased from the children of Hamor, and where he spread his tent (*Gen. xxxiii, 18-20*). Here was likewise his well (*John iv, 6*), and the tomb of his son Joseph (*Josh. xxiv, 32*), both of which are still shown, the former surmounted by the remains of a vaulted chamber, and with the ruins of a church hard by (Robinson, *Bibl. Res. ii, 283*) the latter with "a fruitful vine" trailing over its whitewashed inclosure, and before it two dwarf pillars hollowed out at the top to receive lamps, which are lighted every Friday or Mohammedan Sabbath. There is, however, another Mohammedan monument claiming to be the said tomb (Stanley, *S. and P. p. 241* note). The tradition (Robinson, *ii, 283* note) that the twelve patriarchs were buried there likewise (it should have made them eleven without Joseph, or thirteen including his two sons) is probably an erroneous inference from Acts vii, 16 (where *αὐτός* is not to be included in the subject of *μετέστησαν*; see Hackett, ad loc.). See MELCHIZEDEK.

(5.) We now enter upon the second phase in the history of Gerizim. According to Josephus, a marriage contracted between Manasseh, brother of Jaddus, the then high-priest, and the daughter of Sanballat the Cuthæan (comp. 2 Kings xvii, 24), having created a great stir amongst the Jews (who had been strictly forbidden to contract alien marriages; Ezra ix, 2; Neh. xiii, 23)—Sanballat, in order to reconcile his son-in-law to this unpopular affinity, obtained leave from Alexander the Great to build a temple upon Mount Gerizim, and to inaugurate there a priesthood and altar rival to those of Jerusalem (*Ant. xi, 8, 2-4*, and, for the harmonizing of the names and date, Prideaux, *Connect. i, 396*, and sq., McCaul's edit.). "Samaria thenceforth," says Prideaux, "became the common refuge and asylum of the refractory Jews" (*Ibid.*; see also Joseph. *Ant. xi, 8, 7*), and for a time, at least, their temple seems to have been called by the name of a Greek deity (*Ant. xii, 5, 5*). Hence one of the first acts of Hyrcanus, when the death of Antiochus Sidetes

had set his hands free, was to seize Shechem, and destroy the temple upon Gerizim, after it had stood there 200 years (*Ant. xiii, 9, 1*). But the destruction of their temple by no means crushed the rancor of the Samaritans. The road from Galilee to Judæa lay then, as now, through Samaria, skirting the foot of Gerizim (*John iv, 4*). Here was a constant occasion for religious controversy and for outrage. "How is it that thou, being a Jew, askest to drink of me, which am a woman of Samaria?" said the female to our Lord at the well of Jacob—where both parties would always be sure to meet. "Our fathers worshipped in this mountain, and ye say that in Jerusalem is the place where men ought to worship?" . . . Subsequently we read of the depredations committed on that road upon a party of Galileans (*Ant. xx, 6, 1*). The liberal attitude, first of the Saviour, and then of his disciples (*Acts viii, 14*), was thrown away upon all those who would not abandon their creed. Gerizim thus continued to be the focus of outbreaks through successive centuries. One, under Pilate, while it led to their severe chastisement, procured the disgrace of that ill-starred magistrate, who had crucified "Jesus, the king of the Jews," with impunity (*Ant. xviii, 4, 1*). Another hostile gathering on the same spot caused a slaughter of 10,600 of them under Vespasian. It is remarkable that, in this instance, want of water is said to have made them easy victims; so that the deliciously cold and pure spring on the summit of Gerizim must have failed before so great a multitude (*War, iii, 7, 32*). At length their aggressions were directed against the Christians inhabiting Neapolis—now powerful, and under a bishop—in the reign of Zeno. Terlebinthus at once carried the news of this outrage to Byzantium: the Samaritans were forcibly ejected from Gerizim, which was handed over to the Christians, and adorned with a church in honor of the Virgin; to some extent fortified, and even guarded. This not proving sufficient to repel the foe, Justinian built a second wall round the church, which his historian says defied all attacks (*Procop. De Edif. v, 7*). It is probably the ruins of these buildings which meet the eye of the modern traveller (Porter, *Handb. of S. and P. ii, 339*). Previously to this time the Samaritans had been a numerous and important sect—sufficiently so, indeed, to be carefully distinguished from the Jews and Calcolists in the Theodosian Code. This last outrage led to their comparative disappearance from history. Travellers of the 12th, 14th, and 17th centuries take notice of their existence, but extreme paucity (*Early Travellers*, by Wright, p. 81, 181, and 432), and their numbers now, as in those days, is said to be below 200 (Robinson, *Bibl. Res. ii, 282, 2d ed.*). We are confined by our subject to Gerizim, and therefore can only touch upon the Samaritans, or their city Neapolis, so far as their history connects directly with that of the mountain. We may observe, however, that as it was undoubtedly this mountain of which our Lord had said, "Woman, believe me, the hour cometh, when ye shall neither in this mountain, nor yet at Jerusalem (i. e. exclusively), worship the Father" (*John iv, 21*)—so likewise it is a singular historical fact, that the Samaritans have continued on this self-same mountain century after century, with the briefest interruptions, to worship according to their ancient custom ever since to the present day. While the Jews—expelled from Jerusalem, and therefore no longer able to offer up bloody sacrifices according to the law of Moses—have been obliged to adapt their ceremonial to the circumstances of their destiny; here the Paschal Lamb has been offered up in all ages of the Christian era by a small but united nationality (the spot is accurately marked out by Dr. R., *Bibl. Res. ii, 277*). Their copy of the law, probably the work of Manasseh, and known to the fathers of the 2d and 3d centuries (Prideaux, *Connection, i, 600*; and Robinson, *ii, 297-301*), was, in the 17th, vindicated from oblivion by Scaliger, Usher, Morinus, and others;

and no traveller now visits Palestine without making a sight of it one of his prime objects. Gerizim is likewise still to the Samaritans what Jerusalem is to the Jews, and Mecca to the Mohammedans. Their prostrations are directed towards it, wherever they are; its holiest spot in their estimation being the traditional site of the tabernacle, near that on which they believe Abraham to have offered his son. Both these spots are on the summit; and near them is still to be seen a mound of ashes, similar to the larger and more celebrated one north of Jerusalem; collected, it is said, from the sacrifices of each successive age (Dr. R., *Bibl. Res.* ii, 202 and 209, evidently did not see this on Gerizim). Into their more legendary traditions respecting Gerizim, and the story of their alleged worship of a dove—due to the Jews, their enemies (Heland, *Diss. op. Ugolin. Thesaur.* vii, p. cccxxix—xxxiii)—it is needless to enter.—Smith, s. v. See SAMARITANS.

**Gerizite.** See GERIZITE.

**Gerlach, Otto von,** a German theologian, was born in 1801 at Berlin, and studied first law and then theology at the university there. In 1828 he became *privat docent* in theology; in 1834, pastor of the Elizabeth-Kirche; in 1847, court preacher; in 1849, professor ordinarius of theology. He was a man of earnest piety, and labored zealously as pastor and in fostering missions at home and abroad. In this respect he has been called "the Wesley" of the Berlin Church. The translation of Wesley's sermon on "Awake, thou that sleepest!" was his first literary work. He translated Baxter's *Saint's Rest* into German. His reputation was largely extended by his *Commentar z. N. T.* (Berlin, 1841; 3d ed. 1844, 2 vols. 8vo; new ed. 1858). The O. T. was also added, the whole under the title *Die heilige Schrift nach Luther's Uebersetzung mit Einleitungen u. erklärenden Anmerkungen* (1847–53, 6 vols.). He also published a new edition of select writings of Luther (Berl. 1840–48, 24 vols.):—*Relig. Zustand der Angli. Kirche* (Potsdam, 1845):—*Kirchliche Armenpflege* (trans. from Chalmers, 1847). The last two works were the fruit of a tour in England and Scotland, undertaken by Gerlach in 1842 at the command of the king, to investigate the workings of British Christianity. Gerlach died at Berlin, greatly lamented, Oct. 24, 1849.—*Methodist Quarterly Review*, April, 1849, p. 268; *Herzog, Real-Encyklop.* v, 83.

**Gerle, Christophe-Antoine,** a French religious enthusiast, was born A. D. 1740, in Auvergne, and died about 1805. When quite a young man he entered the order of Carthusian monks, and soon afterwards was made prior of Pont-Sainte-Marie. In 1789 he was chosen deputy to the Estates General by the clergy of Riom, and was one of the first representatives of the clergy who supported the policy of the Tiers État. In the famous Tennis-Court session of the National Assembly (*Séance du Jeu de Paume*) he exhibited so much earnestness and patriotic fervor that David assigned him a conspicuous place in his painting (*Serment du Jeu de Paume*) (Tennis-Court Oath) representing the most imposing scene in that meeting. Having become a member of the Constitutional Assembly, Gerle proposed, Dec. 12, 1789, that all monks who wished to do so might be allowed to retire to the monasteries of their order and live according to their particular rules, provided they conformed to the general laws, and, April 12, 1790, urged in vain the issuing a proclamation declaring the Roman Catholic faith to be the only one accepted by the French nation. In June following he brought to the notice of the Convention the prophecies of Susanne de Bouze, of Perigord, made eleven years before, in regard to an impending general revolution, and the reforms consequent thereon. In 1792 he was chosen one of the electors of Paris. There was a strange mixture of philosophism and superstition in his nature, as was evinced by his becoming a Theist, or follower of Catharine Théos or Théot, an old

woman who styled herself the mother of God, and announced the near advent of a regenerating Messiah, and in whose following a number of silly, superstitious, or intriguing characters were gathered. Gerle thought that both himself and the French Revolution were clearly indicated in the prophecies of Isaiah. As these visionaries were politically friendly to Robespierre, whom they invoked as supreme pontiff, Robespierre's enemies sought to increase the odium against him by a public exposure of their absurdities, and accordingly Vadier, the organ of the Committee of General Safety, made a report to the National Convention demanding the prosecution of Théos, Gerle, and others as guilty of plotting a fanatical conspiracy, which was adopted, and on May 16, 1794, these persons were arrested and imprisoned on the orders of the committee. In the excitement and confusion following the fall of Robespierre they seemed to have been forgotten. Théos died in prison, and Dom Gerle remained there until the advent of the Directory. He was for some time one of the editors of the *Messenger du Soir*, and afterwards employed in the bureau of the minister of the interior, Benezech. A memoir written by him in regard to his arrest appeared in the *Revue Rétrospective*, No. xi, 2<sup>me</sup> série, Nov. 30, 1835.—Hœfer, *Nouv. Biog. Générale*, xx, 233–236; Alison, *History of Europe*, iii, 92 (9th ed. Edinburgh, cr. 8vo). (J. W. M.)

**Germain, St.** See GERMANUS.

**Germain, St., en Laye,** a place near Paris, noted for a treaty of peace concluded between the king of France and the Huguenots, Aug. 8, 1570, in which it was provided that the Protestants should thereafter be unmolested on account of their religion. This treaty was only made to be broken, as the massacre of St. Bartholomew, only two years later (Aug. 24, 1572), terribly demonstrated. See Mosheim, *Church Hist.* iii, 173; Smedley, *Reformed Religion in France*, i, 322.

**Germain, St., Manuscripts** (CODICES SANGERMANENSES), the name of two very ancient Latin MSS. of the N. T. (usually designated as *g*<sup>1</sup> and *g*<sup>2</sup>), so called from having formerly been in the library of the Benedictine monastery of St. Germain des Prés at Paris, partially examined by Marteanay (whose citations were repeated by Blanchini), and afterwards throughout by Sabatier.—Tregelles, in Horne's *Introd.* iv, 238; Scrivener, *Introd.* p. 257. See MANUSCRIPTS, BIBLICAL.

**German Baptists.** See DUNKERS, and MENNONISTS.

**German Catholics,** the name of a sect in Germany which sprung up in 1844 in consequence of the exhibition of the holy coat at Treves [see HOLY COAT]. This proceeding called forth a vigorous protest from Johannes Ronge, a priest in Silesia, who, having been suspended from his office, was living in retirement. Ronge addressed a public letter to bishop Arnoldi, of Treves, Oct. 1, 1844, in which he characterized the exhibition of the coat as idolatry. Even before the publication of this letter, another priest, J. Czarski, at Schneidemühl, in the Prussian province of Posen, had formally seceded from the Roman Catholic Church, and was about to form a congregation of "Christian Apostolic Catholics." Czarski and Ronge were naturally drawn into confederacy, though their views on doctrine radically differed; the former sympathizing with evangelical Protestantism, and the latter being an ultra Rationalist. Ronge addressed an appeal to the lower orders of the priesthood, calling upon them to use their influence in the pulpit and everywhere to break the power of the court of Rome, and priesthood in general throughout Germany; to set up a national German Church independent of Rome, and governed by councils and synods; to abolish auricular confession, the Latin mass, and the celibacy of the priests; and to aim at liberty of conscience for all Christians, and perfect freedom for the religious education of chil-

dren. Czerski, on the other hand, drew up a confession of faith differing but little from that of the Roman Catholic Church, though it declared the Holy Scriptures and the Nicene Creed as the only standards of Christian faith. The new sect quickly increased. At the beginning of 1845 more than a hundred congregations were in existence, each adopting its own confession of faith, some agreeing with that of Czerski, and the majority adopting the rationalistic views of Ronge. In the confession of faith adopted by the Congregation of Breslau, of which Ronge was chosen preacher, the essentials of belief were restricted to a few doctrines: belief in God as the Creator and Governor of the world, and the Father of all men; in Christ as the Saviour, in the Holy Spirit, the holy Christian Church, the forgiveness of sins, and eternal life. Baptism and the Lord's Supper were held to be the only sacraments. Confirmation was retained, but most of the rites and practices peculiar to the Roman Catholic Church were given up. The first council of German Catholics was held at Leipzig, March 22, 1845, and attended by deputies from many of the leading congregations. The majority declared in favor of the principles expressed in the rationalistic Breslau confessions. The interpretation of Scripture, the only source of Christian belief, was left to the free exercise of reason, pervaded and actuated by the "Christian idea." Forms of worship were to be adapted to the requirements of time and place. With regard to church government, the council declared in favor of the presbyterial and synodical constitution. The congregations were to have the free election of their clergy and eldership. The increase of the sect continued to be so rapid that by the end of 1845 it numbered nearly 300 congregations. Many prominent Roman Catholics joined it, and even a number of Protestant rationalistic clergymen went over to it. Distinguished historians like Gerwinus looked upon the movement as a momentous event in the history of Germany. It even exercised a considerable influence upon the Protestant Church of Germany, by causing the organization of the Free Congregations (q. v.), a similar rationalistic sect, chiefly consisting of seceders from the Protestant state churches. Several state governments, as those of Saxony, Prussia, Baden, Bavaria, and Austria, took very severe measures against them, and either altogether suppressed them, or at least tried to put as great obstacles as possible in their way. The internal disagreements between the orthodox and the rationalistic sections also discouraged the spread of the movement, which, at the second council, held in Berlin in 1847, appeared to be on the decrease. The revolutionary movements of 1848 gave the German Catholics full liberty, and, consequently, some additions were made to the number of their congregations, especially in Austria. But the further advance which the majority of the German Catholics now made in their opposition to evangelical Christianity, and the profession of some of their prominent men, that on their part the religious movement had been merely a cloak for covering their revolutionary tendencies in politics, estranged many of their friends. After the political reaction set in, in 1849, strong measures against them were again taken by most of the state governments, and in Austria they were again wholly suppressed. In 1850 delegates of the German Catholic congregations attended the council of the Free Congregations, and a union of the two organizations was agreed upon. This union was consolidated at the council held in Gotha in 1857, when the united body assumed the name of "*Bund freireligiöser Gemeinden.*" For their further history, see FREE CONGREGATIONS. (A. J. S.)

**German Methodists.** See UNITED BROTHERS.

**German Reformed Church in America.** The German Reformed Church is the historical continuation in America of the Reformed branch of the

Protestant Reformation of Germany. The great movement of the 16th century in the bosom of the Roman Catholic Church was at first known as simply the Reformation, or Reformed Church, the term *Reformed* being used in a general sense as designating the whole religious movement in its opposition to the errors and corruptions of Rome. Two distinct tendencies, embracing theology and practical life, were, however, at work from the beginning. The one received its type and character primarily from the genius, faith, and spirit of Martin Luther, and prevailed chiefly among the northern states of the German nation. The other is not thus related to the peculiar spirit of one man. Its character was wrought out rather by a succession of ministers and theologians in Switzerland, France, the Netherlands, and the German provinces bordering on the Rhine, among whom are prominent Zwingle, Bullinger, Calvin, Melancthon, Olevianus, Ursinus, and others of the same type of faith. Lutheran theology reached its full development in the Form of Concord, 1580; Reformed theology in the Palatinate Catechism, 1563, so called from the German province in which the Catechism originated; called also the *Heidelberg* Catechism, from the University of Heidelberg, in which Ursinus and Olevianus, the authors of the work, were professors of theology.

Palatinate was the name formerly borne by two provinces of Germany, distinguished as Upper and Lower, and situated along the river Rhine. The first (Oberpfalz) bordered on Bohemia and Bavaria; the other (Unterpfalz) was situated on both sides of the Rhine, touching on different sides Mayence, Würtemberg, Baden, Alsace, and Lorraine. The Palatinate did not yield to the power of the Reformation movement until 1546, when it embraced the Lutheran faith. It was moulded, however, rather by the gentle spirit of Melancthon than by the stern spirit of Luther. Under Frederick III, surnamed the Pious, who acceded to power in 1559, these German provinces passed over from the Lutheran to the Reformed faith. The theological controversies which preceded and accompanied this transition gave rise to the formation of a catechism, the design of which was to reconcile opposing Lutheran and Reformed elements on a new basis. The principle and the scope of this new confession is Reformed, not Lutheran; but, resting on the Apostles' Creed as its animating and form-giving principle, it rises above extreme antagonisms, and aims at resolving into one consistent whole the divergent tendencies of faith characterizing the two original branches of Protestantism. The adoption of this catechism by a synod of the Palatinate, convened for the purpose Jan. 19, 1563, was followed by the preparation of an order of worship answerable to it, and by a complete religious and educational organization of the two provinces; the great design of Frederick III being to establish and perpetuate the Reformed faith in this German electorate. Thus arose the Reformed Church of Germany, or the *German* Reformed Church, in distinction from the Reformed Church of Switzerland, of France, Holland, Scotland, and other states and countries.

Religious persecution at home, civil oppression and confusion, and the gratuitous offer of land in Pennsylvania by William Penn, led to the emigration of a large number of Palatines to America in the beginning of the last century. From year to year their numbers increased. To these were added hundreds and thousands coming from other states of Europe, holding the Reformed faith. They settled in New York, along the Hudson, in New Jersey, Maryland, Virginia, and even extended into the Carolinas; but the greater number located in Pennsylvania, east of the Susquehanna. The first minister was the Rev. George Michael Weiss, who, assisted on his way by the Classis of Amsterdam, emigrated from the Palatinate in company with about 400 Palatines in the year 1727. They settled along the Skippach, Montgomery County, Pa.

Here a congregation was organized, and a wooden church immediately built. This, so far as known, was the first German Reformed Church in America.

Until the year 1747 the religious condition of these people was very sad. They had no ministers; no Church organization; no school-teachers; no books, excepting a few Bibles, Catechisms, Liturgies, and Hymn-books, which they brought with them from the fatherland; and no pecuniary resources, for the majority were extremely poor. Besides, they were separated by national customs and by language from the large English population of the country. So helpless and destitute, yet anxious to enjoy the means of grace, they were exposed to the danger of being misled into all sorts of errors by irresponsible teachers. But they were distinguished for morality, industry, and thrift. In the course of time they began to accumulate property, and acquire a reputation for honesty and integrity. With this came respect, influence, and general prosperity.

Yet this chaotic state of the Reformed Church grew worse rather than better. Emigration continued. This, added to the natural increase of population, extended the religious destitution, and multiplied their moral and spiritual dangers; for from the first settlement of Palatines in America, throughout this entire period, there were at no time more than three or four ordained ministers of the Reformed Confession among them.

The arrival in 1746 of the Rev. Michael Schlatter, a Reformed minister from St. Gall, Switzerland, who was commissioned and supported by the synods of North and South Holland, introduces the *formative* period in the history of the Church. A man of great energy, strong faith, burning zeal, and indomitable perseverance, he visited all the German settlements in Virginia, Maryland, New Jersey, Pennsylvania, and some in New York; gathered the people; preached the Gospel; administered the sacraments; organized churches; located pastors; established schools; and on Sept. 29, 1747, in the city of Philadelphia, succeeded in effecting the organization of the first synod, or the *Coetus*, as it was called, of the German Reformed Church. Subsequently he visited Europe for the purpose of representing the extreme destitution of the Germans in America. He travelled through Holland, Switzerland, Germany, and England, and everywhere awakened profound interest. He succeeded in creating a large fund, the yearly interest of which was devoted to the support of ministers and school-teachers in America, and to the purchase of Bibles for gratuitous distribution among the people. He also induced a number of young ministers to go forth as missionaries to their brethren in the New World, of whom five came with him on his return to America.

The first *Coetus* consisted of *thirty-one* members—five ministers and twenty-six elders—and represented forty-six churches and a population then estimated at thirty thousand. Organized by direction of the Synod of Holland, the *Coetus* stood under the jurisdiction of that body. Its proceedings were sent annually for review and confirmation to the Classis of Amsterdam, that Classis having been charged by the Synod of Holland with the duty of superintending the affairs of the German Church in America. No one was ordained to the office of the ministry without its consent.

This subordinate relation to the Church of Holland continued until 1793, a period of forty-six years. Emigration increased. From time to time, ministers and school-teachers from the Palatinate and other Reformed provinces of Europe arrived. But the increase of ministers was not in proportion to the increase of the population. Though the Church grew, yet the spiritual destitutions multiplied, so that at the end of this period there were at least one hundred and fifty churches, but no more than about twenty-two ordained ministers.

In 1793 the *Coetus* resolved no longer to transmit its acts and proceedings for revision to the Classis of Amsterdam, and assumed the right to govern itself, and to have the care of the churches in America, independently of foreign oversight and control. A constitution was adopted, entitled "*Synodal-Ordnung des hochdeutschen Reformirten Synods und der mit ihr verbundenen Gemeinden in den Vereinigten Staaten von Nord-America.*" By this act the *Coetus* became the *Synod*, and the *Reformirte Kirche*, or *Reformed Church*, became the *Hoch-deutsche Reformirte Kirche*, or *High-German Reformed Church*, in order to distinguish it from the *Nieder-Deutsche*, or *Low-German*, or *Low-Dutch Church*.

This event introduces a *period of thirty-two years*, extending to the establishment of a theological seminary in 1825, a period which it is not easy to characterize. In one respect there was progress. The people increased in numbers and wealth. There were also large accessions to the population by immigration. Congregations multiplied. Many Germans migrated westward, and churches were organized in Ohio. There was also proportionally a larger accession to the ranks of the ministry, the number rising from twenty-two to *eighty-two*. But in another respect there was retrogression. So long as the Church stood directly under the supervision of Holland, the great majority of ministers were men who had been thoroughly educated in the gymnasiums and universities of Europe. But now, while some men of thorough education still came from Europe, the larger number came from the membership of the American Church. As the synod had no theological seminary, no college, and no academy, candidates for the office could acquire only a superficial or partial knowledge of Latin and Greek, of science and theology. Young men had to prosecute their studies under the tuition of pastors who had charge of from two to eight churches. As a natural consequence, the standard of ministerial qualifications had to be lowered; and with the loss of broad culture, departed also, in great measure, the sense of its value. Some of the leading ministers saw the evils to which the Church was exposed from this tendency, and endeavored to resist it manfully, but without avail.

With the depression of the ministry came ecclesiastical disorders, the fruit of tendencies at work from the beginning. Some laymen presumed to administer the sacraments; some ministers, also, were disorderly. They were disposed to ordain men to the holy office on their own judgment and authority as individuals. The Church, moreover, felt the enervating influence of German rationalism or neology, and of the deism of England. The most active and influential men, though struggling earnestly against these downward forces, could offer but a feeble resistance; for, taking the faith of the Reformation as the standard of judgment, they themselves occupied a false theological attitude. The rationalistic habit of thought of the 18th century, taking hold of them, gave an undertone to their preaching and ecclesiastical life, which, though they cherished firm faith in the truth of supernatural revelation, nevertheless nourished comparative indifference to the *original* faith of the Reformed Church as embodied in the Palatinate Catechism, and even exerted an influence in direct opposition to it.

Though separated by the ocean, the Church in America was always in close sympathy with the Church of Germany. The profound reaction against Rationalism, which began to reveal its presence there during the second decade of the present century, was almost simultaneous with a revival of a better faith in the bosom of the American Church. The first decided indications appear in the records of 1815, and from that time onward with gradually increasing clearness. In that year we meet the first recognition of the Heidelberg Catechism. In all the records preceding this time, we find no reference to any confession of faith.

In 1820, the synod enjoins on all ministers to use no other book but the Heidelberg Catechism in the instruction of youth preparatory to confirmation. The want of literary and theological institutions seems to be more deeply and generally felt. Earnest and persevering efforts are made to establish a theological seminary. In 1819 the constitution is revised and amended. The territory is subdivided into classes; a classis corresponding to a presbytery in the Presbyterian Church. And the synod, instead of being a general convention of all the ministers and one elder from each parish, as it had been since 1747, becomes a delegated body composed of ministers and elders chosen by the classes.

The revival of faith and activity resulted finally, after a struggle against much opposition extending through seven years, in the creation of a theological seminary by the Synod of Bedford, Pa., in 1824. The Rev. Lewis Mayer, D.D., was chosen professor of theology. The seminary opened at Carlisle, Pa., the following spring. Removed to York in 1829, the institution was finally, 1835, located at Mercersburg, Pa., where it still remains. With the seminary was removed also to Mercersburg the high-school opened at York in 1830. This school, under a charter granted by the Legislature of the state, became Marshall College in 1836.

The opening of the theological seminary constitutes the most important epoch in the history of the Church in America. Followed soon after by the creation of a classical institution of a high order, it was the means of quickening the historical faith and dormant energies of the Church. Though several decades of years were necessary in order to unfold the moulding power of these institutions in the sphere of philosophy, theology, and practical life, yet a new impulse was at once given to thought and life. The standard of qualification for the ministry was elevated. A much larger number of pious young men responded to the call of God to preach the Gospel. The ministry increased rapidly. Religious periodicals were established: first, one in English, 1828; and several years later, one in German, 1836. A board of domestic missions and a board of beneficiary education were created. The benevolence of the people was evoked. Greater zeal manifested itself for the extension of the Church. About this time, also, some men were admitted to the ministry who could preach acceptably in English, and were thus prepared to meet the wants of the younger membership in the cities and larger towns; wants arising from the growing prevalence of that language among the German people; for, until 1825, with perhaps but two or three exceptions, all the pastors conducted public worship exclusively in the mother tongue; in consequence of which, scores of families, who preferred the English language, had, during the previous fifteen or twenty years, in particular localities, passed over to other denominations. The transition, though generally gradual, caused no little discussion and confusion in nearly every congregation where the change was felt to be necessary, owing to the firmness with which the older people clung to German worship. At present this difficulty has been surmounted throughout nearly all portions of the Church west of the Susquehanna and south of the Potomac, where the English language is now generally used either exclusively or in conjunction with the German; but east of the Susquehanna, where the Pennsylvania dialect of the German language has been perpetuated among not less than fifty thousand of her people, and where the great majority of ministers conduct public worship in the mother tongue, the problem still awaits solution.

Though the theological seminary and the gradual introduction of the English language both met a great want and proved to be a great good, yet the Church was thereby exposed to new and serious dangers. This spiritual awakening united positive and negative ele-

ments. It was the assertion and development of the old faith, and, at the same time, a reaction against what was defective and wrong in her American history. This reaction, modified by contact with the Presbyterian, Methodist, and other denominations, for a while confounded what was true and good in the past with what was false and evil, and was disposed, with the abuse of catechisation, confirmation, the observance of the great festivals of the Church year and other customs, to set aside these customs themselves, and thus ignore the historical character of the German Reformed Church. The false tendency prevailed most generally among the congregations that had introduced the use of the English language. The German sections of the Church enjoyed a large measure of protection. As the prevalence of the German language deprived them of the advantage of fellowship with the English denominations, so it shielded them also measurably against the transforming influence of a foreign spirit.

But even where this spirit, foreign to the genius of the Church, had acquired the most commanding influence, the traditional habit of thought and life was not extinct. The conditions of a strong counter reaction were always present. It was only necessary that some one assert clearly and forcibly the latent faith of the Church. This was done with great power by the Rev. John W. Nevin, D.D., several years after he had become, in 1840, professor of didactic theology in the seminary at Mercersburg.

For nearly twenty years the tendency to surrender her distinctive faith and customs had been gaining strength in the German Reformed Church, slowly indeed, but steadily, and the process of assimilation to a foreign form of Christian life was silently going forward. A powerful counteracting element, however, was developed as early as 1836 in the profound Anglo-German philosophy taught by the Rev. Frederick Augustus Rauch, D.P., the first president of Marshall College, who laid the foundation of the system of organic and objective thinking which has ever since characterized the leading educational institutions of the Church. There was accordingly at hand both a general and special preparation for the great Church movement of the last twenty-five years, of which Dr. Nevin has been the principal organ: general, in the slumbering spirit of the Heidelberg Catechism, which, living in the hearts of ministers and people, perpetuated a sense of dissatisfaction with a foreign religious habit, and constituted a general qualification to support, as by intuition, the protest against error, and the affirmation of fundamental truth pronounced by a great leader; and special, in the genetic method of thought which, in full sympathy with the spirit of the Catechism, had, through the teaching of Dr. Rauch, given character to the college, and moulded the philosophical thinking of the first ministers of the Church, who received a full literary and theological training in her own institutions.

This profound and comprehensive movement constitutes the leading characteristic of the Church in the last period of her American history. The bold criticism of Protestantism, and the unequivocal reassertion of the catholic truth contained in the Protestant confessions of the 16th century by Dr. Nevin, and the publication of the *Principle of Protestantism* by the Rev. Philip Schaff, D.D., in German and English, called forth earnest and sometimes very violent rejoinders from religious papers and quarterly reviews, and provoked a series of controversies concerning the new-measure system, the Lord's Supper, tradition and the rule of faith, the nature of the Church, the present attitude of Protestantism and its relation to Roman Catholicism, the person of Christ, the nature of Christianity, and, in the course of time, holy baptism and liturgical worship, with many other cognate fundamental doctrines; controversies which have been prosecuted vigorously, with short intervals of repose, down

to the present time, and have not only involved some of the principal denominations in this country, but of late have also extended to Germany.

The main positions, both negative and positive, affirmed by Dr. Nevin and his coadjutors, have from time to time been sustained by the Eastern Synod and by the General Synod, sometimes by direct and formal action, but generally in an indirect way, since the main questions have only occasionally been at issue before the judicatories in a formal manner. Indeed, instead of being merely the innovation of a party, the great movement has been only a life movement of the German Reformed Church herself, the men prominent in the controversies being rather the exponents and organs than leaders. Yet a portion of the Church has all along been opposing the prevailing theological views. The opposition has generally been conducted with moderation and sobriety, but sometimes it has been violent and disorderly, and has even indicated an inclination towards schism. Another effect of the controversies and of the theological attitude of the Church has been to provoke a large measure of opposition from some of the principal Protestant denominations. A disposition even shows itself to maintain that the German Reformed Church is no longer true to her origin and history as a branch of the Protestant Church.

Soon after the controversies began the *Mercersburg Review* was established, in order to serve as a medium for the development, defence, and progress of what came to be known among opponents as *Mercersburg Philosophy and Theology*. It was issued regularly from 1849 until 1861 inclusive. Suspended during the progress of the Civil War, it was resumed in January, 1867.

In 1820 the ministers and churches in Ohio organized themselves by the authority of synod into a classis, called the *Classis of Ohio*; but it stood in organic relation to synod only during the short period of four years. In 1824 it became an independent body, and assumed the title of the *Synod of Ohio*, having 11 ministers, 80 congregations, and 2500 members. In 1837 the Synod of Ohio became the *Synod of Ohio and Adjacent States*. In 1842 this synod subdivided its territory into six classes. Thus there came to exist two mutually independent synods, having the same organization, holding the same faith, governed by the same constitution, having the same usages and customs, and each one possessing supreme and final authority within its own bounds. The two bodies exchanged delegates annually, the delegate being admitted as a full member of the body to which he was commissioned. A sense of dissatisfaction with this incomplete and anomalous organization began to prevail, and a strong desire became general, both East and West, to effect a more perfect organization by creating a higher body that should have jurisdiction over the whole Church. The constitution was accordingly so changed by a vote of two thirds of all the classes of each synod as to make room for the organization of a triennial General Synod. This body, composed of delegates, ministers and elders, chosen by all the classes, represents the whole Church. It is the highest judicatory, and "the last resort in all cases respecting the government of the Church not finally adjudicated by the synod." The General Synod held its first session in Pittsburg in November, 1863.

During the same year the Church celebrated the three hundredth anniversary of the formation and adoption of the Heidelberg Catechism. This celebration was originally suggested by the Rev. Dr. Harbaugh, and the preparatory arrangements made by a committee of which he was chairman. Ministers, elders, and members from all parts of the Church met in General Convention in the German Reformed church, Race Street, Philadelphia, Jan. 17, 1863, and continued in session six days. Twenty essays and

discourses on the origin, history, doctrines, confessional relations, and the fortunes of the Heidelberg Catechism, prepared by distinguished theologians of Europe and America, were read and discussed. The jubilee was formally closed by a similar convention held at Reading May 21, 1864.

Though held during the darkest times of the war of the Rebellion, yet the celebration was in all respects a success. Profound and general interest was awakened in the origin, history, faith, and relations of the German Reformed Church among ministers and the laity. The Church came to a better apprehension of her historical character as an original branch of the Protestant Reformation, and acquired a clearer consciousness of her present relative position and vocation, and of her future mission. A new impulse was at the same time given to all her practical operations.

As the fruit of this celebration, two volumes possessing permanent historical value were published: the *Triglott Catechism* and the *Tercentenary Monument*. The first is a critical edition of the Catechism in the original German, in Latin, modern German, and in English, printed in parallel columns, and accompanied with an historical introduction. The English is a new translation. The *Monument* consists of the discourses and essays delivered at the Convention held in Philadelphia, and was published in English and German.

This tercentenary jubilee constitutes a most important epoch in the history of the Church, and may be regarded as the relative conclusion of the ethical forces at work for the previous twenty or thirty years.

The second General Synod, held at Dayton, 1866, authorized the organization of two additional synods: the one, consisting of the classes of St. Joseph, Indiana, Sheboygan, Heidelberg, and Erie, to be called the *North-western Synod*; and the other, consisting of the classes of Clarion, St. Paul's, West New York, and Westmoreland. The first was organized at Fort Wayne, Ind., May 28, 1867. The organization of the other body is still pending, but will probably be accomplished during the coming year (1870).

For the last ten years measures have been in progress to restore the original title *Reformed Church* by dropping the American prefix *German*. The change has finally been secured by a vote of two thirds of the classes, and only awaits the formal decision of the General Synod.

The Heidelberg Catechism is the symbol of faith, and the only standard of *doctrines*. The book may be said to embody two theological tendencies; the one Melancthonian, the other Calvinistic. We may designate them more correctly, perhaps, by saying that the one tendency, proceeding from faith in the divine-human Saviour, a concrete fact, as the fundamental principle, is christological, sacramental, churchly, and conservative; while the other, presupposing the sovereign will of God as the determining principle of Christianity, is in sympathy with intellectualistic, unsacramental, and unchurchly views, and renders the book susceptible of a construction which is apparently in full harmony with all the logical deductions which flow from the supralapsarian theory. Hence it is that the Catechism could be cordially indorsed by the Synod of Dort, 1618, which wrought out and affirmed with such logical consistency the celebrated Five Points of Calvinism; and that the Reformed (Protestant Dutch) Church, while it receives the Heidelberg Catechism as a correct and excellent exponent of revealed truth, nevertheless holds it only as construed according to the famous decrees of Dort and the Belgic Confession.

The German Reformed Church has never affirmed this supralapsarian element as a ruling principle. We mean the *German*, in distinction from the Swiss Reformed, French, Dutch, Scotch, and other branches of the Reformed Church. In the German branch the

Melanchthonian element has been predominant rather than the Calvinistic, though many of her theologians and ministers, and even Ursinus, one of the authors, interpret the Catechism in accordance with the Calvinistic theory of decrees.

The leading characteristic of the Catechism is the peculiar position which the Apostles' Creed occupies. The Creed is principal. It is not an element co-ordinate with the Decalogue and the Lord's Prayer, but the Decalogue and Lord's Prayer hold a place respectively which is demanded by the idea of the Creed. The Creed underlies and pervades the Catechism like a plastic power, and determines, prevailing, the nature and substance of what must be received as the true faith.

It determines the ruling theory of Christianity as being a new creation rather than a system of revealed doctrines; as being an objective and concrete order of life rather than subjective experience and abstract theory. It determines the relation in which the believer is held to the new creation as being immediate, direct, and personal. Like the earth before the natural eye, so do supernatural objects stand before the eye of the spirit as a reality—a reality which is the possession of the believer.

The Creed also determines the order in which the facts of supernatural revelation are developed. As the Creed, on the one hand, presupposes the fall and misery of man, and, on the other, involves and implies holy living as a necessary consequence of the new life, whilst it embraces only those facts which belong to the positive side of revelation, the Catechism, answering to this order, places the creation and fall of man, sin and depravity, in the first part; conversion, good works, and prayer, as the necessary fruit of the new life, in the third part, under the general head of Thankfulness, taking the Decalogue as the law of good works, and the Lord's Prayer as the model of devotion; whilst the second part gives the positive objective substance of redemption, and consists in setting forth the facts of revelation in the order in which the Creed affirms them; and, in immediate connection therewith, expounds the sacraments and the office of the keys; the sacraments as the means of grace by which, through faith, we have part in the one sacrifice of Christ on the cross, and are fed and nourished unto everlasting life; and the office of the keys as embracing the preaching of the Gospel and Christian discipline, by which two things the kingdom of heaven is opened to believers and shut against unbelievers. Holding this central position, the Creed informs the constitution of the Catechism, projects its peculiar structure, and breathes its animating spirit into the form of instruction. Not that the Catechism realizes the idea of the Creed perfectly at all points; but it acknowledges the original authority of the Creed, and realizes its fundamental characteristics. The Creed thus also holds the Catechism in organic connection with the undoubted faith of the one holy Catholic Church in all the ages of her history up to the apostolic period.

Though the peculiar organizing force of the Creed may not, at all times since the Reformation, or even at the time of its first publication, have been clearly or consciously apprehended, yet this principal element has always been felt, and has always had a correspondent moulding influence whenever and wherever the Catechism has been cordially received, and has, without prejudice and obstruction, been allowed freely to exert its educational power. Whatever is distinctive in the original character, or subsequent history, or the present attitude, as regards doctrine and worship, of the German as compared with other Reformed branches of the Protestant Church, is owing primarily and mainly to this fundamental and distinguishing element of her confession.

It is the peculiar genius of the Heidelberg Catechism

which has given impulse to the profound and comprehensive theological movement by which the Church is now apprehended, and has sustained it with increasing power; a movement that is progressively eliminating two classes of doctrinal views: those which follow logically from the Calvinistic theory of the divine sovereignty, and those which proceed from the Arminian conception of human freedom. Neither the sovereign will of God on the one hand, nor the free will of man on the other, is the principle of salvation; neither God apart from man, nor man apart from God. According to the general idea of the Catechism, this principle is found in a concrete fact, the person of the Redeemer, who, being true God and true man, unites in himself mysteriously the freedom of the human with the sovereignty of the divine will. Being by true faith a member of Christ through the power of the Holy Ghost, a Christian determines himself freely, and is at the same time determined by God, when he lives according to the will of God, actualized in the person and work of Christ.

The most important result, theologically, of the tercentenary celebration, 1863, was the advancing and maturing of a consciousness of this principal element of the Catechism, namely, the organic relation which the Creed bears to its structure and doctrines. For the first time in her American history did the Church formally recognize the Creed, in its proper historical sense, as possessing fundamental authority for the Reformed faith. The tercentenary convention held in Reading, May, 1864, appointed a committee to submit to the (Eastern) synod for adoption certain topics having reference to the theological and religious bearings of the tercentenary jubilee. The report of this committee was presented to the Synod of Lancaster in October of the same year. It sums up the theological and religious results in the following theses:

1. "Our tercentenary jubilee has served a wholesome purpose for renewing for our ecclesiastical consciousness a proper sense of what is comprehended in our confessional title *Reformed*, as related originally to Lutheranism in one direction, and to the Catholic Church of the olden times in another.

2. "It is an argument of sound and right historical feeling in this case, that the beginnings of our Church-life are referred, not simply to the epoch and crisis of the Reformation, but *through* that also to the original form of Christianity as it existed in the first ages.

3. "The true genius and spirit of our Church in this respect is shown by the place which is assigned to the Apostles' Creed in the Heidelberg Catechism, where it is plainly assumed that the Creed, in its proper historical sense, is to be considered of fundamental authority for the Reformed faith.

4. "It is a matter of congratulation that our growing sympathy with the Apostles' Creed is attended with a growing power of appreciation among us also for that christological way of looking at the doctrines of Christianity which has come to characterize all the evangelical theology of Germany in our time, and by which only, it would seem, the objective and subjective (in other words, the churchly and experimental) sides of the Gospel can be brought into true harmony with each other."

These theses were adopted without dissent. They show with what unanimity the mother synod stands, in doctrinal apprehension, upon an *historical and catholic* basis, and protests both against all the sectarian and rationalistic tendencies of Protestantism, and against the errors and corruptions of the Roman and Greek churches.

Taking as a general principle the idea enunciated in these theses, that the Church refers her life not only to the epoch of the Reformation, but through this also to the original form of Christianity as it existed in the first ages, and that the Apostles' Creed is to be considered of fundamental authority for the Reformed faith,

we proceed to state in few words some of the principal doctrinal views which the Palatinate Catechism, thus interpreted, teaches and involves:

1. Adam, created in the image of God, was endowed with capacity to resist temptation and abide in his original state of life-union with God; but he transgressed the command of God by a free act of his own will through the instigation of the devil, the head of the kingdom of darkness.

2. The fall of Adam was not that of an individual only, but the fall of the human race.

3. All men are born with the fallen nature of Adam, and are thus under the power of the kingdom of darkness, inclined to all evil, and unapt to any good; and are subject to the wrath of God, who is terribly displeased with their inborn as well as actual sins, and will punish them in just judgment in time and in eternity.

4. The eternal Son of God, incarnate by the Holy Ghost of the Virgin Mary, true God and true man in one person, is the principle and substance of the new creation.

5. In the mystery of the Word made flesh, the humanity which the Son of God assumed into organic and eternal union with himself is the most perfect form of supernatural revelation, and the only medium of divine grace.

6. All the acts of Christ are not those of God or of man separately taken, but the acts of the God-man.

7. His baptism, fasting, and temptation; his miracles and his word; his agony, passion, and death; his descent into Hades; his resurrection from the dead, ascension to heaven, and session at the right hand of God; the coming of the Holy Ghost, and his second advent—all derive their significance and saving virtue from the mysterious constitution of his person.

8. The atonement for the sin of man is the reconciliation of God and fallen humanity in the person and work of Jesus Christ. It is not simply the offering of himself on the cross, but the whole process of resuming human nature into life-union with God, and includes both perfect satisfaction to the law by suffering the penalty and all the consequences of sin, and complete victory over the devil. The full benefit of the atonement inures to the believer, because by faith he is a member of Christ and a partaker of his anointing, and thus stands before God in the life and righteousness of Christ.

9. The Church constituted by the coming of the Holy Ghost is the mystical body of Christ, a new, real, and objective order of existence, and is both supernatural and natural, divine and human, heavenly and earthly, the fulness of him that filleth all in all; in whose communion alone there is redemption from sin and all its consequences, fellowship with God in Christ, and the hope of complete victory over death and hell, and of eternal glory. The relation which the new, regenerated humanity, his mystical body, bears to Christ the head, the second Adam, is analogous to the organic relation which the old, fallen, accursed humanity bears to the first Adam.

10. The sacraments are visible, holy signs and seals, wherein God, by an objective transaction, confirms to sinners the promise of the Gospel. They are the means whereby men, through the power of the Holy Ghost, are made partakers of the substance of divine grace, that is, of Christ and all his benefits.

11. Holy baptism is a divine transaction, wherein the subject is washed with the blood and spirit of Christ from all the pollution of his sins as certainly as he is washed outwardly with water; that is, he is renewed by the Holy Ghost, and sanctified to be a member of Christ, that so he may more and more die unto sin, and lead a holy and unblamable life.

12. Baptized persons do not attain unto the resurrection of the dead and eternal life in virtue simply of holy baptism, but only on the condition that, improv-

ing the grace of baptism, they believe from the heart on Christ, die unto sin daily, and lead a holy life, and thus realize the full virtue of the incarnation and atonement.

13. The sacrament of the holy supper is the abiding memorial of the sacrifice of our blessed Saviour Jesus Christ for our sins upon the cross; the seal of his perpetual presence in the Church by the Holy Ghost; the mystical exhibition of his one offering of himself made once, but of force always to put away sin; the pledge of his undying love to his people, and the bond of his living union and fellowship with them to the end of time. In the use of this sacrament believing communicants do not only commemorate his precious death as the one all-sufficient vicarious sacrifice for their sins, but Christ himself also, with his crucified body and shed blood, feeds and nourishes their souls to everlasting life; that is, by this visible sign and pledge he assures them that they are really partakers of his true body and blood, through the working of the Holy Ghost, as they receive by the mouth of the body these holy tokens in remembrance of him.

14. The bread and wine of the holy supper are not transmuted into the very body and very blood of Christ, but continue to be natural bread and wine; nor is the body and blood of Christ consubstantial, that is, in, with, and under the natural bread and wine; but the sacramental transaction is a holy mystery, in which the full life-giving and saving virtue of Christ, mediated through his humanity, is really present by the supernatural power of the Holy Ghost, and communicated to those who, by true faith, eat and drink worthily, discerning the Lord's body.

15. At death the righteous pass into a state of joy and felicity, and abide in rest and peace until they reach their consummation of redemption and bliss in the glorious resurrection of the last day.

16. The second advent of Christ to judge the world in righteousness will complete the objective order of redemption, and also the subjective process of life and salvation in his body, the Church; when the last enemy, which is death, shall be destroyed; when the saints shall come forth from the dead in the full image of their risen Lord, and with him pass into heaven, the state of perfect blessedness; and the wicked shall rise to the resurrection of eternal damnation.

We add a brief summary of doctrine on points not directly included in the foregoing formal statements.

The German Reformed Church *denies* that the will of God or the will of man is the principle of theology; that Christianity is merely a system of doctrine or a rule of moral conduct; that the covenant is only a compact between God and man, or between the Father and the Son; that there is a twofold eternal decree, electing some unto salvation and others unto damnation; that the election of God unto eternal life in Christ becomes effectual outside of the economy of grace; that the humanity of Christ, or the incarnation, is an expedient in order to make an atonement for sin; that the Church is an association of converted individuals; that the Bible is the foundation of the Church; that the relation of the contents of the Bible to the individual is immediate; that the authority of the Church is subordinate to the private judgment of the individual Christian; that the unconverted and ungodly may observe the holy communion; that justification consists in a forensic act of God imputing the righteousness of Christ *ab extra*, or that it is realized by an act of faith in the imputed righteousness of Christ; that the faithful use of the ordinary means of grace is inadequate to the wants of the Church and the world; that the Church of Rome is a *total* apostasy; and that Protestantism has its ground *immediately* in the sacred Scriptures.

On the contrary, the Church *affirms* that the person of Christ is the true principle of sound theology; that Christianity is a new life; that the humanity of Christ

is an essential constituent of Christianity; that the Christian Church is an organic continuation in time and space of the life-powers of the new creation in Christ Jesus; that the covenant is an order or institution of grace, spiritual and real; that the Bible was written by members of the Church under plenary inspiration of the Holy Ghost; that private judgment is subordinate to the general judgment of the Church as expressed particularly in the œcumenical creeds; that the word of God is the only norm of faith and practice, and is superior to all creeds and confessions; that the individual comes to a right apprehension of the contents of the Bible through the teaching of the Church; that the election of grace unto life is effectual in and by the established economy of grace; that justification is by an act of faith in the person and work of Christ, and consists both in the imputation and impartation of Christ and his righteousness; that holy baptism is the sacrament of regeneration, regeneration being the transition from the state of nature to the state of grace, as natural birth is the transition to the natural world; that regeneration, succeeded by conversion and sanctification, completes itself in the resurrection from the dead, inasmuch as regeneration and salvation pertain to the entire man, the body no less than the soul; that believers only hold communion with Christ in the Lord's Supper; that the ordinary, divinely-ordained means of grace are adequate to all the needs of the Church and the world, and, if faithfully used, do not fail to promote a steady and vigorous growth of the Church; that, although the Church of Rome holds many articles of faith, and approves and perpetuates many customs which are not warranted by the Scriptures and are wrong, she is nevertheless a part of the Church of Christ; and that Protestantism is an historical continuation of the Church Catholic, in a new and higher form of faith, organization, and practice.

There is a respectable minority, located chiefly in the West, who dissent from many of the doctrines as given in this statement; a few even resist the whole system of thought as being subversive of the true Reformed faith. Some of them adopt the theory of salvation taught by the Methodist Church, and observe some of her measures and customs. Others hold the Calvinistic theory of decrees, and their teaching conforms to the Presbyterian or Puritan type of religion. But the prevailing faith, as held by the Eastern Synod, is gradually overcoming opposition, and extending; and from year to year the number of ministers and churches is increasing, both West and East, that stand firmly on the historical, churchly, and sacramental basis of the Palatinate Catechism.

As regards *worship*, the Church is in a state of transition. During the present century extemporaneous prayer has prevailed in the regular services of the Lord's day; but this is a departure from the original custom. Originally the worship was liturgical. The Palatinate Liturgy was issued one year after the Palatinate Catechism. It did not, however, like the Catechism, acquire an œcumenical character. Every state or province in Europe where the Reformed Church was established had its own liturgy. In Switzerland there were as many liturgies as Reformed cantons. In Scotland they were in use also for at least a century after the Reformation.

These liturgies contain offices for the regular service of the Lord's day; for the administration of the sacraments; for the ordination of ministers, elders, and deacons; for the solemnization of marriage, burial of the dead, etc.; and contain the creed, the Lord's prayer, confession and absolution, the Gloria in Excelsis, Te Deum, and the Litany and responses, although no one book unites all these elements. They are all a hand-book for the minister rather than an order of worship for the people.

The first ministers in America brought with them

the liturgies of those sections of Germany or Switzerland from which they emigrated. These continued in common use, particularly in the German congregations, though preference was generally given to the Palatinate liturgy, until partially superseded by the book prepared at the direction of the synod by the Rev. Dr. Mayer, and adopted in 1840. This work had no historical basis, and never took root.

General dissatisfaction prevailed with this state of things. The great christological movement deepened the sense of want; and there was an earnest demand for a liturgy answerable in spirit and character to the churchly and sacramental ideas which had been revived in the Church. A liturgical committee was accordingly appointed in 1849. Specific instructions were given in 1852. The book known as the Provisional Liturgy was reported to synod in 1857, and submitted to the churches for *trial*. This liturgy excited a controversy which continued until 1864, when the Eastern Synod, in compliance with an order of the General Synod of Pittsburg, referred the work for revision to a committee consisting of Rev. Drs. Schaff, Nevin, Wolff, Zacharias, Bomberger, Harbaugh, Porter, Fisher, Gerhart, and Apple; and Messrs. John Rodenmayer, George Shafer, George C. Welker, and Louis H. Steiner, M.D. This committee reported a book entitled *An Order of Worship for the Reformed Church* to the Synod of York, 1866. After a long and animated discussion, a resolution was passed by a vote of 53 to 14, authorizing the optional use of the "Order of Worship" within the limits of the Eastern Synod, and referring the book for action to the General Synod, which convened at Dayton, Ohio, Nov. 28, the same year. The General Synod devoted three days to a calm and full discussion of the questions relating to doctrine and cultus, when certain resolutions disappearing the book were lost by a vote of 55 to 66. Thereupon the book was approved "as an order of worship proper to be used in the congregations and families of the Reformed Church" by a vote of 64 to 57. The opposition arose chiefly from ministers and churches in the West. Of the ministers and churches East a very large majority supported the "Order of Worship."

This liturgy is not simply a hand-book for the minister, or a pulpit liturgy, but it is an order in which the people take part with the minister in the worship of God. Less complicated and shorter in many of its offices than the Book of Common Prayer, it unites all the historic elements of liturgical worship on the basis of the apostolic faith and the custom of the primitive Church, modified, however, by the faith, genius, and history of the Reformed Church, and adapted to the needs of the present age.

Though not yet formally adopted, many churches use the Order of Worship in full, many more use it in part, while it is held in high honor by nearly all those who do not yet feel prepared to use all its offices regularly. The book is daily gaining ground, and the probability is that in the course of one or two decades of years liturgical worship will become the established order of all the churches East, and to a large extent also of the churches in the West.

The *government* is Presbyterian. Every congregation is governed by a consistory, which is composed of the pastor, elders, and deacons; no congregation is without either elders or deacons. They are chosen by the communicant members for a term of two, three, or four years, generally only two years, and ordained by the laying on of hands, and installed. When the term expires, the administrative power ceases, but not the office. If re-elected, installation is repeated, but not ordination. The consistory is subject to the classis, which consists of the ministers and an elder from each parish within a given district. The classes are subject to the synod. The synod is a delegated body, and consists of a given number of ministers and elders,

chosen by four or more adjacent classes. The synods are subject to the General Synod. This body consists of ministers and elders chosen by *all the classes* of the Church. It is the highest judicatory, and the last resort in all cases respecting government not finally adjudicated by the synods. Every judicatory has legislative authority within its own sphere; every minister and member possesses the right of appeal from a lower to a higher court.

All the children and youth are carefully catechized by the pastor once in two weeks, or once or twice a week, for a period of from three to nine months in the year, the time being determined by the ability of the pastor. Some pastors, particularly those located in cities and larger towns, have each but one church; but the majority have parishes consisting of from two to four churches, and not a few of from five to eight. Catechumens possessing the requisite qualifications are, after examination in presence of the elders, received into the full communion of the Church by the rite of confirmation. The holy communion is commonly administered twice a year, and in many of the churches four times. The communicants receive the sacred emblems by companies, standing around the altar. In many of the churches it is still customary to administer the communion to the sexes separately; first the men come to the altar, and afterwards the women. But this old German custom is going into disuse. In the English churches men and women approach the altar in company; so also in some of the German churches. Services preparatory to the celebration of the holy communion are held on the Saturday or Friday previous.

The baptism of infants is faithfully and universally observed. Children are presented by their parents. Sponsors are allowed, but the parents themselves must also be present. Baptism may be administered at any time and in any suitable place, but an occasion of public worship in the church is held to be most appropriate.

The principal festivals, Christmas, Good Friday, Easter, and Whit-Sunday, are held in high honor, and observed with much solemnity. The liturgy has revived the idea of the church year. In many congregations, the pulpit teaching and the worship observes the concrete historic movement of revelation from Advent to Trinity Sunday, and from Trinity Sunday to Advent, as set forth in the catholic cycle of Lessons. As the liturgy becomes known and is appreciated, so does the observance of the church year gain favor. Acquiring greater practical power from month to month, it is gradually receiving more general confidence, and being observed in all its parts.

There are connected with the General Synod 4 synods: 1. The Synod of the German Reformed Church in the United States, with 16 classes, 290 ministers, 718 congregations, and 88,603 members; 2. The Synod of Ohio and adjacent States, with 8 classes, 130 ministers, 308 congregations, and 20,069 members; 3. The North-western Synod, with 7 classes, 92 ministers, 166 congregations, and 9811 members; 4. The Pittsburg Synod (in process of formation), which will have about 44 ministers, 126 congregations, and 9240 members. Its statistics are included in synod No. 1 (two thirds) and in synod No. 2 (one third). Total, 31 classes, 512 ministers, 1192 congregations, 118,483 members. Received by confirmation and certificate during the year, 11,337. Aggregate membership, including those who are baptized, but not confirmed, 192,000.

*Institutions of Learning.*—Two theological seminaries. Seminary at Mercersburg, Pa., founded in 1825: four professors, twenty-eight students. Seminary at Tiffin, Ohio; founded at Canton, O., 1838; suspended from the fall of 1839 to 1848; reopened at Columbus, O., Oct., 1848; removed and permanently located at Tiffin, O., 1851: two professors, twenty students. One mission-house, Sheboygan, Wis.: three professors, twenty-two students.

*Two fully-organized colleges*, (1.) Franklin and Marshall, at Lancaster, Pa. Franklin College, founded at Lancaster in 1787; and Marshall College, at Mercersburg, in 1836; Franklin and Marshall consolidated at Lancaster in 1853: seven professors, 116 students, 442 alumni. (2.) Heidelberg College, founded at Tiffin, O., in 1850: five professors, 182 students.

There are, besides, seven classical institutions: Catawba College, Newton, N. C.; Mercersburg College, Mercersburg, Pa.; Palatinate College, Myerstown, Pa.; Westmoreland College, Mount Pleasant, Pa.; Reimersburg Institute, Reimersburg, Pa.; Calvin Institute, Cleveland, O.; and Ursinus College, Montgomery Co., Pa. Mercersburg College is in process of organizing a full college course. It has 4 professors and 124 students. Two female seminaries; one at Allentown, Pa., the other at Tyrconnell, Md.

*Periodicals.*—Two reviews, four weekly papers, and one semi-monthly; one monthly magazine, and three Sunday-school papers.

There are two printing-establishments; one at Philadelphia, Pa., and one at Cleveland, O.

These statistics represent the condition of the German Reformed Church in America in 1869.

*Literature.*—*Mercersburg Review* (Phila. 16 vols.); *Heidelberg Catechism*, by Rev. J. W. Nevin, D.D. (Phila. 1847); *The Life of Rev. Michael Schlatter*, by the Rev. H. Harbaugh, D.D. (1857); *The Fathers of the Reformed Church* (2 vols.), by Rev. Dr. Harbaugh; *The Principle of Protestantism*, by Rev. Philip Schaff, D.D. (1845); *The Mystical Presence*, by Dr. Nevin (1846); *The Liturgical Question*, by Dr. Nevin (1862); *The German Reformed Church*, a monograph by Rev. E. V. Gerhart, D.D. (1863); *Tercentenary Monument* (1863, p. 574); *Der Heidelberger Catechismus*, by Rev. Dr. Schaff (1863); *A History and Criticism of the Ritualistic Movement in the German Reformed Church*, by the Rev. J. H. A. Bomberger, D.D. (1866); *Vindication of the Revised Liturgy*, by Dr. Nevin (1867). Comp. the Heidelberg Catechism in German, Latin, and English, with an historical introduction, prepared and published by the direction of the German Reformed Church in the U. S. of America (tercentenary edition, N. Y., Charles Scribner, 1863, p. 277). Also a Liturgy for the use of the Ger. Ref. Church in the U. S. of America (1858, p. 340); revised under the title *An Order of Worship for the Ref. Ch.* (Phila., S. R. Fisher & Co., 1867, p. 388). See also *Creed and Customs*, by Rev. George B. Russell, A.M. (Phila., S. R. Fisher & Co., p. 420). (E. V. G.)

**German Theology.** See THEOLOGY, GERMAN.

**Germanus**, the name of three patriarchs of Constantinople. (I.) The *first* was transferred from the see of Cyzicus to that of Constantinople in 715, and was a zealous defender of image-worship, for which he was degraded, in a council held at Constantinople in 730. He died in 740, and was anathematized by a council at Constantinople, fourteen years afterwards (754). A treatise of his, *περὶ τῶν ἁγίων οἰκονομικῶν συνόδων*, etc., may be found in H. Justel's *Bibliotheca Canonica*, and in Le Moine, *Varia Sacra*: there also remain some letters and homilies of his (*Bib. Max. Patr.* xvii, xx). His remains are all given in Migne, *Patrologia Græca*, tom. 98. See also Fabricius, *Bibliotheca Græca*, ed. Harles, xi, 155; Ceillier, *Auteurs Sacrés* (Paris, 1862), xi, 36 sq.

(II.) Germanus the younger, a monk of the Propontis, who became patriarch in 1222; but as Constantinople was then in the hands of the Latins, he resided at Nicæa, in Bithynia. He corresponded with pope Gregory IX, in hope of bringing about a union between the Eastern and Roman churches, but in vain. He was deposed in 1240, restored again to his see in 1254, and died in 1255. His *Epistles and Homilies* are given by Migne, *Patrologia Græca*, tom. 140.

(III.) Germanus, bishop of Adrianople, became patriarch of Constantinople in 1267. He accepted the

honor with great reluctance, and resigned it in a few months, to retire to a monastery.—Neander, *Ch. Hist.* iii, 203; Fabricius, *Bibl. Græca*, vii, 10; viii, 84; xi, 162; Cave, *Hist. Lit.* i, 621; ii, 289; Hoefler, *Nouv. Bibliothèque Générale*, xx, 238.

**Germanus of Auxerre, St.**, one of the most striking figures in the period of the fall of the Roman empire, was born in Auxerre, in Roman Gaul, of illustrious parents, about A. D. 380. He was placed in the best schools of Gaul, and having finished his early education, he went to Rome, to pursue a course of civil law and study eloquence. His merit, and his marriage with a lady of high rank, brought him into notice at the court of the emperor Honorius, and procured for him, besides the government of Auxerre, the office of duke or general of the troops of several provinces. Although a Christian, he was a skillful hunter, and was in the habit of hanging on a large tree, in one of the public squares, the heads of the animals he had killed. This custom bearing some resemblance to pagan superstitions, St. Amatorius, bishop of Auxerre, one day, when the duke was absent, caused the tree to be cut down, and the monuments of his vanity to be removed. Germanus suffered this correction with impatience, and threatened to be revenged, but God ordered it otherwise. Amatorius was advanced in years, and discerning in Germanus such qualities as were calculated to make a great bishop, he convoked in his church an assembly of the faithful, and Germanus being present, he seized on him, and compelled him to assume the ecclesiastical habit, without giving him time to reflect, and informed him that he was to be his successor. On the death of Amatorius, May 1, 418, Germanus was elected bishop by the clergy and people. From that time he was completely changed. He practised his episcopal duties to their fullest extent. The Christians of Great Britain, frightened at the progress of Pelagianism in their island, had applied to pope Celestine and the bishop of Gaul to obtain aid, and they, in an assembly held in 428-9, sent them Germanus, with whom they joined Lupus, bishop of Troyes. Both set off instantly. This mission had great success at the time, but Pelagianism reappeared seventeen or eighteen years afterwards, and Germanus went again with Severus, bishop of Troyes, to extirpate it. To prevent its return, Germanus established schools in Britain, which afterwards became celebrated. He had scarcely arrived again at Auxerre, when the Armoricans entreated him to mediate for them with Evaricus, who had been sent by Ætius to chastise them for an imputed rebellion. Germanus set out immediately, saw the prince of the barbarians, and succeeded in arresting his march. As this affair could not end without the consent of the emperor, Germanus went to Ravenna, where the court was then held: he was received with great honor by Placidia, mother of Valentinian III. This work was the last which the holy bishop undertook. He died in Ravenna, on the 31st of July, 448, after having been thirty years bishop of Auxerre. He is commemorated as a saint on the 31st of July.—Hook, *Ecc. Biog.* v, 303; Smith, *Relig. of Anc. Britain*, p. 168; Neander, *Light in Dark Places*, p. 59-54; Baillet, *Vies des Saints*, July 3.

**Germanus, St.**, of Paris, was born at Autun, A. D. 496; was made deacon 533, presbyter 536, and bishop of Paris 555. He was noted for his strict asceticism, for his great charity to the poor, and especially for his zeal in the purchase and redemption of slaves. He died in 576. There is extant a letter of his to queen Brunehild (*Concil.* tom. v). He was buried in St. Vincent's church, which was burnt by the Normans in 881, and reconstructed in 1163, under the name of St. Germain des Prés. The monks of St. Germain, of the Benedictine rule, have their abbey here. Bouillart, *Benedictine of St. Maur*, published in 1724 a *Histoire de l'abbaye de St. Germain*, in which he gives a life of Germanus. The aristocratic quarter of St. Germain in Paris is named from the abbey and church.—Migne;

Baillet, *Vies des Saints*, May 28; Ceillier, *Auteurs Sacrés* (Paris, 1862), xi, 306.

**German Versions of the Holy Scriptures.**  
 1. *Early Versions.*—There is no certain trace of any attempt to translate the Scriptures into the vernacular dialects of the German people previous to the latter half of the 9th century. Though Charlemagne enjoined upon his clergy the study of the Bible and the delivering of expositions of it to the people in the vulgar tongue, there is no evidence for the assertion hazarded by Usher (*De Script. Vernac.* p. 109) and others that German versions of the Bible were made by his order; nor is the statement that a Saxon poet had, by order of his son Lewis, versified the whole Bible (Flacius III. *Catal. Test.* p. 93) better supported. It is to the poetical narratives of the life of our Saviour which appeared after the middle of the 9th century, that the beginnings of Biblical translation among the Germans are to be traced. The *Krist* of Otfried of Weissenburg (in A. D. 860); the *Heliand*, by an unknown author, and perhaps about the same time, are the earliest documents of which anything certain can be said. Of both of these editions have been printed; the best are, of the *Krist*, that by E. G. Graff (Königsb. 1831); and of the *Heliand*, those of J. A. Schmeller, with a glossary (Münch. 1840), and J. R. Köne, with a translation (Münst. 1855). Some fragments of a very ancient translation of Matthew have been published by St. Endlicher and H. Hoffmann, 1834, and by J. F. Massmann, 1841, from a codex in the library at Vienna; the dialect in this version is very rude, and, if not provincial, would seem to point to an earlier date than the 9th century. Versions of the Psalter seem to have been executed in considerable numbers in the 10th century; one of these, by Notker Laabeo, abbot of St. Gall, is given by Schilter (*Thes.* vol. i), and others anonymous are to be found in Graff's *Deutsche Interlinear versionen der Psalmen* (Quad. 1839). A paraphrase of the Song of Songs, in Latin verse and German prose, by William of Ebersberg in Bavaria (cir. 1080), has been edited in Schilter's *Thes.* i, and separately by Merula (Leyd. 1598), Freher (Worms, 1631), and recently, with additional fragments of other parts of Scripture, by Hoffmann (Berl. 1827). This scholar has also edited, in the 2d vol. of his *Fundgraben*, a metrical translation of Genesis and part of Exodus, belonging to the same period or a little later. To the 13th century belongs the chronicle of Rudolf von Hohenems, which is a sort of poetical version of the historical parts of the O. T.; of this many MSS. exist, and an edition has been published, but from a bad text, by Schütze (Hamb. 1779). Several works of a similar kind, in which the Biblical narratives are set forth, sometimes with apocryphal additions, were produced about this time; of these, one, which exists in various dialects and in numerous codices, is a version of the historical parts of Scripture in prose, composed partly from the poetical versions already extant, partly translated from the Vulgate (Massmann, *Die Kaiserchronik*, iii, 54). Formal translations from the Vulgate began now to be multiplied; of these MSS. exist, though the names of the authors have for the most part perished (Reiske, *De Verss. Germ. ante Lutherum*, 1697; Schöber, *Bericht von alten Deutschen geschriebenen Bibeln*, 1763; Rosenmüller, *Hist. Interpr.* v, 174, etc.). Out of these, though by what process we are unable to describe, came the complete version of the Bible in German, which was in the possession of the people before the invention of printing, and of which copies were multiplied to a great extent as soon as that art came into operation. Before 1477 five undated editions, the four earlier at Mayence and Strasburg, as is believed, the fifth at Augsburg, as the book itself attests, had been printed; and between 1477 and 1522, nine editions, seven at Augsburg, one at Nürnberg, and one at Strasburg, were issued. Several editions of the Psalter also appeared, and one of the Gospels, with the

Pericopæ from the Epistles. Collectors tell also of a translation of Ruth by Böschentayn, 1525; of Malachi by Heltzer, 1526; of Hosea by Capito, 1527, and other similar attempts (Kiederer, *Nachrichten II.*, 8vo, sq.). An important place must be also assigned to the translation of the N. T. into Danish by Hans Mikkelsen (Leips. 1524); which, though avowedly "ret efter latinen vdsatthe," bears numerous traces of independence of the Vulgate, and of being made directly from the Greek (Henderson, *Dissertation on Hans Mikkelsen's N. T.*, Copenh. 1813). Of translations into Low German, one was printed at Cologne, 1480; another at Lübeck, 1498; and a third at Halberstadt, 1522.

2. *Luther's Version.*—The appearance of this constitutes an epoch, not only in the history of the Church, but also in that of German literature and of the German people. Luther's version is a permanent monument of the author's ability and indomitable perseverance. Luther had few helps in his arduous work. His exegetical aids were limited to the Septuagint, the Vulgate, a few Latin fathers, the N. T. of Erasmus, and such Hebrew as could be learned from the imperfect elementary books then extant. He had, however, valuable coadjutors in Melancthon, Bugenhagen, Jonas, Aurogallus, and Creuziger, whom he constantly consulted, especially when any difficulty occurred. He had access also to the Rabbinical expositions through some learned Jews. But the main burden of the work rested with himself, and it was to his own resources he had chiefly to trust for success. Of the patient toil he bestowed upon it some idea may be formed from what he himself says of his labors on the book of Job: "On Job, M. Philip, Aurogallus, and I, worked so that sometimes in four days we had hardly succeeded in accomplishing three lines." With what anxious care he sought to perfect his work may be seen from the MS. of the third part of his translation, containing Job, Psalms, and the writings of Solomon, still preserved in the Royal Library at Berlin, written in his own hand, and exhibiting the corrections which he made in the style and expression before sending it to press. Not unfrequently as many as three forms of expression, and sometimes more, occur, between which he hesitated before finally fixing on the one which he would print. He spent on the work in all twelve years. The N. T., completed by him in the Wartburg, appeared in 1522; the five books of Moses (*Das Alte Testament, Deutsch*, th. i) in 1523; the other historical books as far as Esther (*Das A. T. Deutsch*, th. ii) in the close of the same year; Job, Psalms, and the Solomonic writings (*Das A. T.*, th. iii) in 1524; between 1526 and 1531 several of the prophetic writings were issued, and in 1532 appeared the collective body of the Prophets as th. iv of *Das A. T. Deutsch*. The Book of Wisdom was issued in 1529, and the rest of the apocryphal books in 1533 and 1534. The whole Bible was thus completed, and appeared under the title "BIBLIA: d. i. die ganze heilige Schrift. Deutsch, Martin Luther, Wittenberg. Gedruckt durch Hans Luft, 1534," fol. (Pischon, *Die hohe Wichtigkeit der Uebersetz. der II. S. durch Dr. M. Luther*, Berl. 1834). Of this work thirty-eight editions were printed in Germany before 1580, besides seventy-two of the N. T., and innumerable reprints of other smaller portions (Panzer, p. 336).

3. *Zürich Bible.*—This is a combination of Luther's translation of the other books with a new translation of the prophetic writings by Con. Pellican, Leo Judä, Theod. Bibliander, etc. It appeared in 1524, and was reprinted in 1527, and twice in 1530. In 1531 another edition appeared, with a new translation of the poetical books (Panzer, p. 260). The *Worms Bible*, 1529, is a work of the same kind as the Zürich Bible.

4. *Versions from Luther's Bible in the other Teutonic Dialects.*—1. *Low German*, by J. Hoddersen, 1533 and often; 2. *Danish*, N. T., 1524, Bible, 1550: this is found also in Hutter's Polyglot; 3. *Swedish*, N. T., 1526, by Laurentius Andreä, Bible, 1541, by Laurent. and Olaus

Petri; 4. *Icelandic*, N. T. 1540, Bible 1584, by Gudd. Thorlakson, bishop of Holm; 5. *Dutch*, N. T. 1526, Antw., printed by Liesvelt, whence this is called the Liesvelt N. T.; the whole Bible was translated anew after Luther into Dutch by Ad. Vischer in 1648, and this is the existing authorized version for the Dutch Lutherans; 6. *Pomeranian*, 1588.

5. *Versions of the Reformed Church.*—Of these the first was the production of David Pareus, and appeared in 1579. It was superseded by that of J. Piscator in 1602, of which many editions have appeared. A translation of the N. T., by Amandus Polanus, appeared in 1603. In 1665 a new translation for the use of the Swiss churches appeared at Zürich, the authors of which were Hottinger, Suicer, Füßlin, and others. In Holland various attempts were made to produce versions direct from the originals. In 1556 J. Uitenhoven issued the N. T., and in 1562 the whole Bible; and in 1587 appeared the Bible translated by J. Hackius, which chiefly follows the Geneva [French] Bible.

6. *Authorized Versions.*—In the year 1618 the Synod of Dort appointed a commission of 22 members to prepare a new version; this appeared in 1637, and received the authorization of the States General. This is the authorized Dutch version. The Danish version was completed in 1607 by P. J. Resen, and in 1647 appeared with the royal sanction, after it had been carefully revised by Hans Svaning, archbishop of Zealand. The Icelandic version received its permanent form in 1644 from Thorlak Skuleson, the grandson of Thorlakson, and his successor in the episcopate. The authorized Swedish version was completed under the auspices of Gustavus III.; it consists of a revised edition of the work of Andreä and Petri, and appeared in 1618.

7. *Roman Catholic Versions.*—The earliest of these is the N. T. of Emser, "nach lawt der christliche Kirchen bewerten Text," etc., sine loc. 1527, fol., Leipz. 1529, 8vo, and often since. In 1534 the Bible of Dietsenberger (q. v.) appeared at Mayence; and in 1537, that of Eck (q. v.) at Ingolstadt. Previous to these, Casper Ulenberg had translated the Bible in accordance with the Sixtine text of the Vulgate, and this translation, revised by the Jesuits at Mayence in 1661, appeared as *Die Catholische Bibel*. Revised editions were issued by Ehrhard in 1722, and by Cartier in 1751; and it has been often reprinted both with and without the Latin text. More recent versions by Roman Catholics are those of Salzmann (Lux. 1770), Wittola (Vien. 1775), Weitenauer (Augs. 1777), Fleischutz (Fuld. 1778), Rosalino (Vien. 1781), Fischer (Prag. 1784), Braun (Vienna, 1786), Lauber (1786), Mutschelle (Munich, 1789), Weyl (May, 1789), Krach (Aug. 1790), Brentano, Dereser, and Scholz (1790-1833), Baber (1805), Van Ess (1807), Schnappfinger (1807), Widemann (1809), Kistemaker (1825), Scholz (1828), Allioli (1838), Loch and Reischl (1857). Of these, the majority are confined to the N. T. The translations of Van Ess, Scholz, and Allioli have been repeatedly issued. Gossner, pastor of the Bohemian Church in Berlin, published a translation of the N. T. from the Greek in 1815, which has often been reprinted.

8. *Other Versions.*—In 1630 J. Creil issued a German translation of the Bible in the interests of Socinianism; and in 1660 another, in the interests of Arminianism, was published by Jer. Felbinger. The Remonstrant party in Holland published a translation in Dutch, made by Chr. Hartsoecker, in 1680. In 1666 a Jewish translation of the O. T. into German was published by Joseph Athias; this, along with the versions of Luther, Piscator, Caspar Ulenberg, the Dutch A. V., and a version of the N. T. by J. H. Reitzen, printed in parallel columns, was published under the title of *Biblia Pentapla* (3 vols. 4to, Hamb. 1711). Of German versions of more recent date there are many. Those of Triller (1703), Reiz (1712), Junkherrot (1732), Heumann (1748), Bengel (1753), Michaelis (1769-85), Sillig (1778), Seiler (1783), Stolz (1795), the Berleburg

Bible (1726, etc.), belong to the Lutheran Church; those of Grynaeus (3 vols. 8vo, Basle, 1776), and Voegelin (Zürich, 1781) to the Reformed. Belonging to the present century are the translations of Preiss (1811), Schäfer (1816), Meyer (1829), [Richter and Pleissner] (1830), Böckel (1832), Alt (1837), Von der Heyd (1852), chiefly of the N. T. only. But all these yield in importance to the work of De Wette, prepared originally in conjunction with Augusti (6 vols., Heidelb. 1809-14), subsequently wholly by himself (3 vols., 1831-33, 4th ed. 1858). The Jewish version by Arnheim, Fürst, and Sachs, under the editorship of Zunz (Berlin, 1838), is also deserving of notice. Finally we notice the careful translations in Phillippon's *Israëlitische Bibel* (1858) and Bansen's *Bibelwerk* (1858 sq.).—Kitto, s. v.

**Germany.** I. *Ancient Religion of.*—The information we now possess concerning the religion of the tribes of *Germania Magna*, such as the Alemans, Saxons, Franks, etc., is very incomplete and disconnected. The Greek and Latin authors mention the names of but a few deities, who seem to have been to some extent similar in their attributes to their own gods. The Christian writers also mention them only in so far as is necessary for their purpose, and their views are naturally colored with their own opinions. The Scandinavian mythology must originally have been very closely connected with that of Germany; but we can get no light from that quarter, as we do not know the early period of the former. It is clear that at an early period the Celtic element was infused in the Aleman and the Frank, while among the northern tribes, the Slavonic, Lithuanic, and Finnic myths were introduced; while a tendency towards the Greek worship is also perceptible. As for the *vicinities* of the ancient Germans, Cæsar states that they worshipped only such as visibly exerted a decided influence over events; he particularly mentions three: the Sun, Vulcan, and the Moon. The domestic divinities were: *Wuotan* (Woden), the supreme god, and his wife *Freia*, the goddess of the household and of marriage; *Zio*, the god of war; *Fro*, who watched over the crops, and his wife *Frouwa*; afterwards came *Ihol* or *Paltar* (the Balder of the north), *Fosite*, and *Thunar* (Donar), god of the clouds and storms. The progenitor of the human race was *Tuisco*, who combined the attributes of the Greek Uranos and Zeus, and whose son Mannus is identical with the subsequent *Irmin*, or the Greek Hercules. Among the special divinities of different tribes were *Nerthus* (commonly *Iertho*), goddess of fertility and the chase; the *Aeces*, two brothers (a sort of Castor and Pollux); *Costra*, in Saxony, etc. Other goddesses appear to have been merely aliases of these: thus *Iludana* and *Eisa* were identical with *Freia*, etc. Among the inferior divinities (demons) were the *Riesen* (giants), physically resembling men, who were supposed to belong to a former period of creation, and dwelt in the mountains, where they erected gigantic fortifications, and defended themselves against intruders with stones and rocks. In direct contrast from these were the *Zwerge* (pigmyes), who appeared among men on special occasions, sometimes to impart gifts and blessings to them, at other times to do them evil and frustrate their plans. There were also *Bergegeister* (spirits of the mountains), called also *Elbe* or *Elfen* (elves); *Waldgeister* (spirits of the forests), especially the Wild Hunter, Schratz; and *Wassergeister* (spirits of the waters), or Nixen. There were also a quantity of lares, or favorable household gods of an inferior degree, while tormenting genii haunted the houses and their neighborhoods at night, disturbing slumberers and throwing stones at passers-by. Horses and bulls were considered sacred, and bears, wolves, and foxes were objects of respectful awe. The gods and goddesses often took the form of birds, and among these the eagle, raven, and woodpecker were regarded with the highest veneration. The cuckoo was supposed to possess the gift of prophecy. Serpents also were wor-

shipped, and the fear they inspired gave rise to the fable of the dragon. The cosmogony of Germany seems to have greatly varied with the times and in the different tribes; the general belief was that the gods originated out of chaos, created the world, and governed it. Belief in continued existence after death was shown by the idea of the great city of the dead, *Walhalla*. The mode of worship was very simple, if compared with that of the Greeks and Romans, or even of the Celts. The temples were not generally structures made by men, but often trees or groves which the deity was supposed to inhabit, revealing himself in the rustling of the leaves. Some of the gods dwelt in the mountains, caves, or streams. Yet there were also regular temples, of which vestiges are yet found, and which contained images of the gods; for, although Cæsar and Tacitus deny their existence, there is oft mention made in the early times of Christianity of the destruction of idols in Germany [see *IRMENSUL*], and images of the sun and the moon have been found (though these may also have belonged to Celtic or Slavonic tribes). The holy places were mountains or rocks; e. g. the *Blockberg*, the chain of mountains between Silesia and Bohemia, etc. The woods and trees, especially the oak, beech, and linden-tree, were objects of particular veneration. Unbelievers were not allowed to touch them, or to enter the groves. The worship consisted in prayer to the gods; the sacrifices were either propitiatory or thank-offerings; they also took place before consulting the omens, going to war, electing a king, or on any other special occasion. These sacrifices consisted generally in horses, bulls, goats, etc., and even human beings. The color of the animal was generally white. Besides this, on all festive occasions, a portion of the feast was offered to the household gods, and laid before their shrine. No mention is made of the general feasts of the Germans in the earlier times, yet it is considered likely that they had at least as principal ones the *Juel*, *Easter*, and the *Summer* feasts. The priests took part in legislation and the wars as well as in worship, and in war they carried the sacred images or symbols against the enemy. In the household the head of the family could act as its priest. Chosen women, called *Abrunes*, consecrated the horses, and prophesied by consulting the omens at the sacrifices. II. *History of Christianity in Germany.*—As some of the German tribes were under the rule of the Romans at the beginning of the Christian æra, Christianity became known to the Germans at a very early date. Some of the episcopal sees, as Cologne, even claim to have had disciples of the apostles as their first bishops. Peter is said (Baron. ad ann. 46) to have ordained the bishops Eucharius, Egistus, and Marcius for Germany. In 314, when the Council of Arles was held, we have trustworthy information of a bishopric in Cologne. In the south of Germany, on the other hand,

we find the first Christians at Augusta Vindelicorum (Augsburg), in Rhœtia, into which Christianity was introduced by the bishop Narcissus, in the time of Dioclesian (284-305). In the following centuries the number of bishoprics in Western Germany gradually increased, and at the beginning of the 6th century we find subject to the jurisdiction of the metropolitan of Treves, bishops at Cologne, Mentz, Martigny, Worms, Spire, besides a number of others whose sees now belong to France or Switzerland. Next to south-western Germany, it was the south-east in which Christianity made the greatest progress. At the beginning of the 7th century there were in the two Noricums, or modern Bavaria and Austria, proportionally almost as many Christian churches as in the other countries of the ancient Western empire, and Bavaria, in particular, became an entirely Christian state. Even before this time many of the German tribes which had invaded and conquered the western provinces of the Roman empire had either become Christian or were inclined to be so. The Goths received the first announcement of Christianity from prisoners taken in war, and a Gothic metropolitan had a seat in the Synod of Nicæa. Among the West Gothic princes, Frigiter was favorable to Christianity, but Athanarich cruelly persecuted it. When the Western Goths, conquered by the Huns, had to seek refuge in the Roman empire, they had to consent to be baptized. The form of Christianity which they then received from the emperor Valens was Arian. Other German tribes, like the Eastern Goths and the Vandals, likewise became Christians of the Arian faith, which was carried by the German conquerors into Spain, Italy, and Northern Africa. To an Arian bishop of the West Goths, Ulilas, Germany is indebted for the first German version of the Bible. The conversion of Clovis, the king of the Franks, to the Catholic Church, gave to the German tribes who had left the fatherland the first orthodox king; and the success of the Franks in their wars with the Arian kings, in which they were aided not a little by the Catholic subjects of the latter, soon led to the destruction of Arianism as a national religion in the Germanic world. Under the influence of the Franks, in the beginning of the 8th century, the Catholic Church pressed forward as far as the Saale and the Elbe, but it was under no ecclesiastical regulations, and was much corrupted by paganism. British monks carried the Gospel as far as the Main, and among the Alemanni, but they had no connection with Rome. See COLUMBANUS; GALL. Winfred, the Anglo-Saxon monk, better known under the name of Boniface (q. v.), was sent from Rome to undertake the conversion of Germany, and finally became the apostle of the Germans, and the founder of the German Church. He made the German Church dependent upon Rome, and, in consequence of the plenary powers given him by the Roman see, was looked upon as the general bishop of Germany. The last serious struggle in defence of German paganism was made by the Saxons; but, finally acknowledging their inability to resist Charlemagne, they resolved to adopt the religion of the conquerors, and become one nation with the Franks. The Christianization of Eastern Germany, which at that time was chiefly inhabited by Slavic tribes, was not completed until the 13th century.

When the Roman empire had been revived in the German nation by the Othos, the emperor was regarded as the political head of Christendom in the West, and the holy empire as a divine institution. The old legal principle that God has divided all power on earth between the emperor and the pope was frequently construed in Germany so as to mean that the emperor carried the secular sword as a feudal investiture from the pope. The efforts of mediæval popes to enlarge the papal power at the expense of the imperial, and even to establish the absolute superiority of the pope over all secular power and the whole world, led to continual

Wars between the emperors and the popes. The popes entirely failed to carry through their theocratic idea; but the authority of the emperors of Germany, as the first among the Christian rulers, likewise steadily declined.

In the 16th century Germany was the birthplace of the great reformation of the Church, which substituted the Lutheran and Reformed churches for that of Rome not only in a large portion of Germany, but in a number of other European countries. It seemed at one time probable that the whole of the German empire might be gained for the Reformation; but, after many wars, one of which, the Thirty Years' War, was one of the fiercest and longest religious wars on record, the activity of the Jesuits and the courts of Austria and Bavaria saved a large portion of Germany, especially in South Germany, for the old Church.

The old German empire was dissolved in 1806. In 1815 the German Confederation was established as a league of independent states. Another great change in the constitution of the German nation was effected by the war of 1866, which united most of the German states into the North-German Confederation, under the leadership of Prussia, while Austria was wholly excluded from Germany. Bavaria, Würtemberg, Baden, and part of Hesse-Darmstadt were recognised as independent South-German states. The Grand-duchy of Luxemburg was also released from all connection with Germany, and remained a semi-independent state, under the rule of the king of Holland. The little principality of Lichtenstein, in South Germany, was totally ignored at this reconstruction of Germany, and likewise formed henceforth an independent state. Our *Cyclopædia* devotes a special article to Austria, Prussia, and each of the smaller German states, in which a full statement of their Church history and ecclesiastical statistics is given.

In 1868, the number of Protestants, Roman Catholics, and Jews in the North-German Confederation and the South-German states was about as follows:

	Protestants.	Rom. Cath.	Jews.
North German Confederation.	20,682,000	7,875,000	349,200
South German States . . . . .	3,351,000	4,925,000	133,000
Total . . . . .	24,033,000	12,810,000	473,200

**Gerobulus**, JOHANNES, a clergyman of the Reformed Church of Holland, was born at Utrecht. He was settled successively at Delft, Emden, Vlissingen, Ghent, Harlingen, Deventer, Harderwyk, and Utrecht. He died at Utrecht Feb. 14, 1606. He translated into Latin the East Friesland Catechism, and also wrote a defence of the Heidelberg Catechism against Dirk Volkertsz. Coornbert, a translation of Beza's Paraphrase of the Psalms, Advice to the Sick, and an Account of the Reformed Church in Utrecht. (J. P. W.)

**Geroch.** See GEROCII.

**Gerōda**, a place mentioned in the *Antonine Tables*, possibly the modern *Jerdul*, a large village on the great caravan road from Damascus to Palmyra (Porter, *Damascus*, i, 371).—Van de Velde, *Memoir*, p. 314.

**Gerthe'nian** (only in the plural, Γερθηναῖοι v. r. Γερθηνοί, Vulg. *Gerreni*), apparently the designation of the inhabitants of a town, which is named in 2 Macc. xiii, 24 only as one limit (ἕως τῶν Γ.) of the district committed by Antiochus Eupator to the government of Judas Maccabæus, the other limit being Ptolemais (Accho). To judge by the similar expression in defining the extent of Simon's government in 1 Macc. xi, 59, the specification has reference to the sea-coast

of Palestine, and, from the nature of the case, the Gerhonian, wherever they were, must have been south of Ptolemais. Grotius seems to have been the first to suggest that the town *Gerrhon* or *Gerrha* (Γέρρων, Ptolemy, iv, 5, p. 103; *Gerro*, Pliny, *Nat. Hist.* vi, 29; Γέρρα, Strabo, xvi, p. 760; Γέρα, Sozomen, *Hist. Eccl.* viii, 19) was intended, which lay between Pelusium and Rhinocolura (wady el-Arish). It has been pointed out by Ewald (*Geschichte*, iv, 365, note) that the coast as far north as the latter place was at that time in possession of Egypt, and he therefore conjectures that the inhabitants of the ancient city of GERAR, southeast of Gaza, the residence of Abraham and Isaac, are meant. In support of this, Grimm (*Kurzg. Hannöb.* ad loc.) mentions that at least one MS. reads Γεραρρών, which would without difficulty be corrupted to Γέρρων. The Syriac version (early, and entitled to much respect) has *Gozor*, by which may be intended either (a) the ancient GEZER, which was near the sea—somewhere about Joppa; or (b) GAZA, which appears sometimes to take that form in these books. But these are evidently conjectural emendations of the text; and the objection of Ewald is sufficiently met by observing that the place in question was not included in the Maccabean province of Judas, any more than Egypt of the parallel passages (1 Macc. xi, 59; Josephus, *Ant.* xiii, 5, 4).—Smith, s. v.; Kitto, s. v. See MACCABEUS, JUDAS.

**Ger'shom** (Heb. *Gershomi'*, גֶרְשׁוֹם [in Chron. usually גֶרְשׁוֹם], *expulsion* [see GERSTON], an etymology alluded to in Exod. ii, 22, where there is a play upon the word, as if written גֶרְשׁוֹם, or *Ger-Sham*, q. d. a sojourner there; in which passage the Sept. preserves the form Γηροσάμ [comp. Josephus, Γηροσός = ἰαλεκτος, *Ant.* ii, 13, 1], but elsewhere Græcizes Γηροσάμ or Γηροσών), the name of three or four Levites.

1. The oldest son of Levi (1 Chron. vi, 16, 17, 20, 43 [in the Heb.], 62, 71; xv, 7), elsewhere distinctively written GERSUON (q. v.).

2. The elder of the two sons (the second being Eliezer) who were born to Moses in the land of Midian by Zipporah (Exod. ii, 22; xviii, 4). B.C. 1698. These sons of the great lawgiver held no other rank than that of simple Levites, while the sons of their uncle Aaron enjoyed all the privileges of the priesthood (1 Chron. xxiii, 1, 5, 16; xxvi, 24), a proof of the rare disinterestedness of Moses. Shubael, one of his descendants, was appointed ruler (שֹׁבְאֵל) of the treasury under David (1 Chron. xxvi, 24-28).

3. The son of one Manasseh (according to the text) and father of Jonathan, which last acted as priest to the Danites who captured Laish (Judg. xviii, 30); but, according to a more correct reading, he is not different from the son of Moses. See JONATHAN. The Talmud explains the substitution of "Manasseh" for "Moses" in the text by asserting that Jonathan did the works of Manasseh, and was therefore reckoned in his family (*Baba Bathra*, fol. 109, b). See MANASSEH.

4. A descendant of Phinehas, and chief of his house, who returned from Babylon with Ezra (Ezra viii, 2), B.C. 459.

**Ger'shon** (Heb. *Gershon'*, גֶרְשׁוֹן, *expulsion*, from גֶרְשׁוֹן, to drive out; Sept. in Gen. Γηροσών, elsewhere [and usually there also in the Cod. Alex.] Γέρσον; Joseph. *Γηροσώνης*, *Ant.* ii, 7, 4), the eldest of the three sons of Levi, apparently born before the migration of Jacob's family into Egypt (Gen. xli, 11; Exod. vi, 16). B.C. cir. 1895. But though the eldest born, the families of Gershon were outstripped in fame by their younger brethren of Kohath, from whom sprang Moses and the priestly line of Aaron (see 1 Chron. vi, 2-15). Ger'shon's sons were Libni and Shimi (Exod. vi, 17; Numb. iii, 18, 21; 1 Chron. vi, 17), and their families were duly recognised in the reign of David, when the per-

manent arrangements for the service of Jehovah were made (1 Chron. xxiii, 7-11). At this time Gershon was represented by the famous Asaph "the seer," whose genealogy is given in 1 Chron. vi, 39-43, and also, in part, 20, 21. The family is mentioned once again as taking part in the reforms of king Hezekiah (2 Chron. xxix, 12, where it should be observed that the sons of Asaph are reckoned as distinct from the Gershonites). At the census in the wilderness of Sinai the whole number of the males of the Bene-Gershon was 7500 (Numb. iii, 22), midway between the Kohathites and the Merarites. At the same date the efficient men were 2630 (iv, 40). On the occasion of the second census the numbers of the Levites are given only in gross (Numb. xxvi, 62). The sons of Gershon had charge of the fabrics of the tabernacle—the coverings, curtains, hangings, and cords (Numb. iii, 25, 26; iv, 25, 26); for the transport of these they had two covered wagons and four oxen (vii, 3, 7). In the encampment their station was behind (אֲחֵרִים) the tabernacle, on the west side (Numb. iii, 23). When on the march they went with the Merarites in the rear of the first body of three tribes—Judah, Issachar, Zebulun—with Reuben behind them. In the apportionment of the Levitical cities, thirteen fell to the lot of the Gershonites. These were in the northern tribes—two in Manasseh beyond Jordan, four in Issachar, four in Asher, and three in Naphtali. All of these are said to have possessed "suburbs," and two were cities of refuge (Josh. xxi, 27-33; 1 Chron. vi, 62, 71-86). It is not easy to see what special duties fell to the lot of the Gershonites in the service of the tabernacle after its erection at Jerusalem, or in the Temple. The sons of Jeduthun "prophesied with a harp," and the sons of Heman "lifted up the horn," but for the sons of Asaph no instrument is mentioned (1 Chron. xxv, 1-5). They were appointed to "prophesy" (that is, probably, to utter, or sing, inspired words, נִצְּנִים), perhaps after the special prompting of David himself (xxv, 2). Others of the Gershonites, sons of Laadan, had charge of the "treasures of the house of God, and over the treasures of the holy things" (xxvi, 20-22), among which precious stones are specially named (xxix, 8).

In Chronicles the name is, with two exceptions (1 Chron. vi, 1; xxiii, 6), given in the slightly different form of "Gershom."—Smith, s. v. See GERSHONITE.

**Ger'shonite** (Heb. *Gershunai'*, גֶרְשׁוֹנִים, Sept. Γερόσωνί, but often simply like *Gershon*, and so A.V. often "son of Gershon"), a designation, usually in the plur., of the descendants of GERSUON, one of the sons of Levi (Numb. iii, 21; iv, 24, 27; Josh. xxi, 33; 1 Chron. xxiii, 7; 2 Chron. xxix, 12). Their office, during the marches in the wilderness, was to carry the veils and curtains belonging to the tabernacle, on the western side of which they encamped (Numb. iii, 23-26; xxvi, 57). In the singular the term is applied to Laadan (1 Chron. xxvi, 21) and Jehiel (1 Chron. xxix, 8).

**Ger'son** (Γηροσών), the Greek form (1 Esdr. viii, 29) of the name GERSTON (q. v.).

**GERSON**, JEAN CHARLIER (*Doctor Christianissimus*), one of the greatest names in the history of France and of the Gallican Church. He was named Gerson from a village in the diocese of Rheims, where he was born, Dec. 14, 1363. He entered the college of Navarre in 1377, and passed through all the degrees. He then studied theology seven years under the grand master Pierre d'Ailly, whom he succeeded as chancellor of the university and prebendary of Notre Dame in 1396. Here he strenuously devoted himself to improving the course of theological study, on which his views may be seen in a letter to D'Ailly, dated April 1, 1400, *De reformatione Theologie* (*Opera*, vol. i). But the difficulties of his position were very great. The university was in disorder; the state was torn by contending

factions; the Church was divided by the great papal schism which began in 1378, when Urban VI was elected pope at Rome, and Clement VII at Avignon. Gerson found so much opposition in his efforts to reform theology, and to bring peace to the Church, that he decided to retire from Paris to the quiet charge of the cathedral at Bruges, a preferment given to him by Philip of Burgundy. At last he gave up this purpose, and gave up, with it, the tranquillity of his whole life. Gerson was more than once deputed to the popes during the schism. In a memoir, *De unitate ecclesiastica*, he defended the Council of Pisa (q. v.), and conducted himself in a firm though prudent manner when the council proceeded to depose Gregory XII and Benedict XIII, and to elect Alexander V. It was during the sitting of this council that he published his famous treatise *De auferibilitate Pape*, to prove that there are cases in which the assembled Church may command two rivals to desist from their strife, and has a right to depose them if they refuse, for the sake of peace and unity. The Council of Constance (q. v.) opened a new field for his talent; he took a place there as ambassador from king Charles VI, from the Church of France, and from the University of Paris, and he directed all the measures which were adopted respecting John XXIII, who had succeeded Alexander V, and whose licentious conduct had tended rather to increase than to allay the schism. In this council Gerson and D'Ailly were the chief leaders in the so-called reforming party. The discourses which Gerson on various occasions pronounced during the council, and the treatises which he published, were intended principally to show that the Church may reform itself, as well in its governors as in its members; and that it has the power of assembling, *without the consent of the pope*, when he refuses to convoke it; to prove the necessity of holding councils, as well general as special; to prescribe the payment of first-fruits, and to extirpate simony, which had become very common. He had established, as the basis of the decrees of the council, the doctrine of the supremacy of the Church in all which concerns faith and morals, and on this subject a discourse on the Immaculate Conception has been ascribed to him, but which was, in fact, pronounced at the Council of Basle after his death. It was principally through his efforts that the council "declared itself independent of all popes, and superior to them." The piety of Gerson, though strong and zealous, was neither superstitious nor credulous; he denounced, in his treatise *Contra sectam Flagellantium*, the abuse made of flagellation, of which Vincent Ferrier was the advocate. He also composed a book, *De probatione spirituum*, in which he gave rules for distinguishing false revelations from true ones. The pretended visions of St. Bridget would have been condemned at his instigation had they not found an apologist in the cardinal Torquemada; and though his theology was professedly mystical as opposed to scholasticism, he opposed the theories of John Rusbroeck, of the passive union of the soul in the Deity, which is similar to the pure love of the Quietists. He also wrote against D'Ailly on judicial astrology, which was then in high repute among the princes of Europe, and which he combated with great success, even in his old age, against the physicians of Lyons and Montpellier. Before that time, his treatise on this subject, *De astrologia reformata*, had procured for him the praise of the learned bishop of Cambrai. In another treatise, *De erroribus circa artem magicam*, he attacks the superstitious errors of magic and the prejudices of the empirics. With regard to toleration, Gerson was involved in all the errors of his times. At the trial of John Huss (q. v.), his writings and speeches contributed greatly to the condemnation of that eminent reformer, who was burnt by order of the Council of Constance, July 6, 1415. He took a similar share in the prosecution of Jerome of Prague (martyred May 30, 1416). "Cut off," said he, in a letter to the arch-

bishop of Prague, "the heresies, with their authors, and burn them." He called this terrible punishment a "merciful cruelty." Gerson's hopes for a reform of the Church at the Council of Constance were bitterly disappointed. The election of Martin V (Nov. 11, 1417) put an end to all hope of reform, and Gerson retired, fatigued and discouraged, from the scene of sterile disputes. He had contributed by his writings to the revocation of a bull of Alexander V in favor of the preaching friars, against the privileges of the clergy and of the universities. Gerson's zeal raised against him many enemies, and the fear of the dangers to which he would be exposed from the Burgundian faction induced him to take refuge in Germany, disguised as a pilgrim, about the time of the last sittings of the Council of Constance. In Bavaria he composed his *De Consolatione Theologicæ*, a mixture of prose and verse, containing an apology for his conduct at the Council of Constance. Soon after he retired into Austria, where the duke offered him an asylum at Vienna. In 1419 he returned to France, and took up his abode at the monastery of the Celestines at Lyons, of which his brother was prior. Here he spent his remaining years in catechising poor children, of whom he required no other reward than their simple prayer, "Lord, have mercy on thy poor servant Gerson." He died July 12, 1429.

We now state briefly the relations of Gerson to the Church, to theology, and to philosophy. (1.) As to the Church, his whole life was spent in mourning over its abuses and corruptions, and in struggles for reformation. Full of respect for the papacy, which he considered necessary to the existence of the Church, he nevertheless opposed both its spiritual and temporal encroachments. He looked upon the dogma of the infallibility and consequent inviolability of the popes as a remnant of superstition which could not be extirpated too soon. To the whole mass of the faithful, assembled in general council, he attributed alone infallibility, the power of binding and loosing, the right of deciding, without appeal, all matters pertaining to faith and discipline, and that of judging the pope himself, whom his high position does not render *impeccable*. "Let the ecclesiastical power," said he, "so restrict itself within its natural limits as to remember that secular authority, even among the heathen, has its distinct rights, its laws, its verdicts, on which the spiritual power must guard from encroaching, lest the secular power might also encroach on the faith and lawful rights of the Church." By his settled doctrine of the relation existing between the papacy and the general councils on the one hand, and between the spiritual authority and the temporal power on the other, Gerson may be considered as one of the originators of Gallicanism (q. v.), and the forerunner of Bossuet (q. v.). The spirit of the famous "four propositions" of 1682 breathes in every page of the writings of the chancellor of the university. (2.) There are two elements to be distinguished in Gerson's *philosophy*: the outward scholastic element, with its pedantic divisions and subtle distinctions, and the mystical element, which lifted his soul, thirsting for God, above the dry forms of the schools into the superior sphere of ineffable love. Gerson distinguishes in the nature of the soul a double set of faculties, whose highest degree is the simple understanding, and whose highest effort is the instructive perception of spiritual truths; and the affective faculties, which, in their highest flights, attain to a state of ecstatic enjoyment, whose proper object is God. (3.) His theology is that of love. Faith and penitence are the wings on which divine love rises and attains to the possession of the Infinite Being. This possession is naturally imperfect: here below none can see God face to face, "for there shall no man see it and live;" but it produces peace in the heart; the ignorant and the lowly can attain to it, and it is much superior to that which results from speculative theories, with their at-

tending abstractions and syllogism, and the uncertainty and the agonizing doubts which often accompany them. Gerson's is a mild form of mysticism, based on the nicest analysis: it does not lead to the absorption of the personality into the bosom of the Infinite Being, nor exclude the normal exercise of the function of the intellect and volition. Gerson was a determined enemy of scholasticism. He signalized, as the origin of all the evils of theology, that vain curiosity which leads to the disregard of the most reliable authorities, the dangerous taste for novelty in things and in words, the love of argument, and the mixing up of the different sciences. Revelation, with him, is the limit of theology, and to endeavor to carry it farther by human reasonings is to lead it astray. "If the Scriptures are insufficient as a means of arriving at God, where shall we find anything to lead us higher? Let us then guard against attempting to help theology by an admixture with other sciences, and against introducing into it the exercises of the schools." As to *practical* religion, as we have already said, Gerson was of the moderate mystical school. In his view all the moral and intellectual powers of man were originally in harmony with each other, and directed to God; but sin destroyed this harmony, and it is the object of mystic theology to restore it. But, in order to effect this, it must first know the nature of the powers of the mind, and the manner of acting upon them. Following Richard de St. Victor (*de Contemplatione*), Gerson distinguishes in the operations of the two orders of faculties three different degrees: in the *vis cognitiva*, 1. the *cogitatio*, involuntary tendency of the soul to moral consideration; 2. the *meditatio*, voluntary effort to learn the truth; 3. *contemplatio*, the voluntary inquiry into spiritual, and especially divine subjects; in the *vis affectiva*, 1. the desire, *libido*; 2. piety, *devotio*; 3. loving aspirations, *dilectio caritativa*, and *amagogica*, inseparably connected with the *contemplatio*: these are only separately or theoretically considered. In this union of love with contemplation resides the true essence of mystic theology, which is essentially a theology of love. Gerson designated it as *theologia affectiva*, in contradistinction from scholastic theology, which he called *theologia speculative*. Love consists only in an "*experimentalis Dei perceptio*," from which, however, Gerson abstracts all that is material or figurative. In his definition of it, he says: "By love is the eternal Word born in the soul, and the unity with God achieved." That wonderful book, *De Imitatione Christi*, is attributed by many of the best critics to Gerson. On this question, see KREMPIS.

There are several editions of Gerson's collected works, but the most complete is *Opera Omnia J. Gersonii, op. et stud. L. Ellies du Pin* (Antwerp, 1706, 5 vols. fol.). Vol. i contains a life of Gerson, an essay on the authorship of the *Imitation of Christ*, a critical catalogue of his writings, together with his dogmatical works. Vol. ii contains his treatises on ecclesiastical polity, etc.; vol. iii, his writings on moral theology; vol. iv, exegetical writings; vol. v, controversial writings, sermons, etc. Some works are included in this edition which do not belong to Gerson. See RIECHER, *Vie de Gerson*; L'Enfant, *Hist. of the Council of Constance*; LÉCNY, *Essai sur Gerson* (Paris, 1832, 2 vols. 8vo); SCHMIDT, *Essai sur Gerson* (Strasb. 1839); THOMASSY, *Jean Gerson* (Paris, 1843, 16mo); FAUGÈRE, *Eloge de Gerson* (Paris, 1837); ENGELHARDT, *de Gersonio Mystico* (Erlang. 1843, 4to); HILGEN's *Zeitschrift für d. hist. Theol.* (1833); *Studien u. Kritiken* (1835), p. 278; JOURDAIN, *Doctrina Gersonii de theolog. myst.* (Par. 1838, 8vo); MICHELET, *Hist. de France*, vol. iv; BONNECHOSE, *Reformateurs avant la Réforme*, i, 160; NEANDER, *Ch. Hist.* vol. v; NEANDER, *History of Christian Dogmas*, 519, 607, 612; MOSHEIM, *Ch. Hist.* ii, 443; DUPIN, *Hist. of Eccles. Writers*, cent. xy; HOEFER, *Nouv. Biog. Générale*, xx, 283 sq.; HASE, *Ch. Hist.* 250, 251; HOOK, *Eccles. Biog.* v, 306; SCHWAB, *J. Gerson, eine Monographie*

(Würzburg, 1858, 8vo); HERZOG, *Real-Encyclopädie*, v, 89 sq.

**Gertrude, St.**, born in 626, was the daughter of Pepin of Landen, majordomo of the king of Austrasia, France. She was religiously brought up, and finally entered the nunnery of Nivelles, nine miles from Brussels, of which she was elected abbess at the early age of twenty. She died there March 17, 659, and that day has since been kept in commemoration of her throughout Brabant.—*Acta Sanctorum*, March 17.

**Gertrude, St.**, was born at Eisleben, Germany, and became in 1294 abbess of a congregation of Benedictine nuns at Roberdorf. She was thoroughly versed in Latin and the holy Scriptures, but is particularly known for the visionary mysticism of her piety. A series of editions of her *Insinuationum divine pietatis exercitia* appeared during the 16th and 17th centuries. Mege published an edition in 1664, and in 1676 translated it, together with her biography, into French. She died in 1334. Her saint's day is Nov. 15.—Herzog, *Real-Encyclop.* v, 300.

**Geruphina** (גֵּרֻפִּינָה), the name of a mountain not very far from Jerusalem, mentioned in the Talmud (*Rosh hash-Shanah*, ii, fol. 22, b) as the third summit distant, on which signal-fires were lighted; held by Schwarz to be a prominent peak near the centre of a mountain-chain called "*Arapun*, about three Eng. miles south of Kalat el-Itaba, or Ramoth Gilead" (*Palest.* p. 82); but we find no corresponding name in any other modern authority.

**Gervaise, FRANÇOIS-ARMAND**, a Trappist monk, was born at Paris in 1660. Having studied under the Jesuits, he then entered among the barefooted Carmelites; but, not finding this reform sufficiently austere to satisfy his love of asceticism, he took the habit of La Trappe in 1695, and insinuated himself so much into the favor of the celebrated abbé De Rancé that he was appointed abbot of La Trappe on the death of Zozimus Foisel in 1696. The abbé, however, soon repented of his choice, for the new abbot began, by his austerity and intriguing spirit, to foment divisions among the monks, and to undo all that De Rancé had done. He soon resigned, and in leaving La Trappe he drew up a long Apology. When his *Histoire générale de Cîteaux* (Avignon, 1746, 4to) appeared, the Bernardines, who were violently attacked in it, obtained an order from the court against him, and he was arrested at Paris and conveyed to the abbey of Notre Dame des Reclus, where he died in 1755. He wrote *La Vie de St. Cyprien* (Paris, 1717, 4to);—*La Vie d'Abailard et d'Héloïse* (Paris, 1720, 2 vols. 12mo);—*La Vie de St. Irenée* (Paris, 1723, 2 vols. 12mo);—*La Vie de l'Apôtre St. Paul* (Par. 1734, 3 vols. 12mo);—*La Vie de St. Epiphane* (Paris, 1738, 4to);—*L'honneur de l'église défendu contre P. Le Courayer* (1742, 2 vols. 12mo). See RICHARD, *Bibliothèque Sacrée*; HOOK, *Eccles. Biog.* vol. v; HOEFER, *Nouv. Biog. Générale*, xx, 330.

**Gervaise and Protase** (GERVASIUS et PROTASUS), two saints always named together in the Roman martyrology. Ambrose gives an account of them, and calls them the "first martyrs of Milan." They appear to have suffered martyrdom in the time of Dioclesian. Many stories are told of the miracles wrought by their "relics." Their commemoration day is June 19. See Butler, *Lives of the Saints*, June 19.

**Gervase of CANTERBURY**, a mediæval English chronicler, was born about 1150, and died in the early part of the 13th century. We know but little of his history. It appears that he was a monk of the priory of Christ's Church, Canterbury, and held the office of sacristan, was present at the burning in 1174 of Canterbury Cathedral, and watched the erection of the new cathedral, until the election of Baldwin as archbishop in 1184, when he wrote his account of the destruction and rebuilding thereof, entitled *Tractatus de combustione Dorobornensis ecclesie*. Another work,

*Imaginationes de discordiis inter monachos Cantuarienses et archiepiscopum Baldwin*, written, perhaps, after Hubert became archbishop in 1193, gives a full account of the dissensions between Baldwin and his monks. His next work, *Vita Dorobornensium archiepiscoporum*, contains lives of the archbishops of Canterbury, ending soon after Hubert's accession. His most valuable work, *Chronica de tempore regum Angliæ Stephani, Hen. II, et Ricardi II*, chronicles the reigns of these sovereigns, and contains in the conclusion an announcement of a second part, to be devoted to the reign of John, which was probably never written. In the library of Corpus Christi College, Cambridge (No. 438), there is a MS. treatise of Gervase, entitled *Mappa Mundi*, the first part of which gives a topographical description of England by counties, with lists of the bishops' sees and monasteries in each, and the second part lists of the archbishops of the whole world and their suffragans, and added thereto a chronicle of England from the fabulous times to the death of Richard I. Bishop Nicolson (*Eng. Hist. Library*) characterizes Gervase as a diligent and judicious historian; and Wright (*Biog. Brit. Lit.*) says "his writings show great care in collecting information, and discrimination in using it; and his chronicle of the reigns of Stephen, Henry, and Richard is one of the most valuable of the historical memorials of the 12th century." His works, except the *Mappa Mundi*, were published in Twysden's *Historia Anglicanæ Scriptores Decem* (London, 1652, fol., Coll. 1285-1684), and an English translation of his *Tractatus de Combustione*, etc., is given in the *Report of the Proceedings of the British Archaeological Association, at the first General Meeting, held at Canterbury in the Month of September, 1844*, ed. by Alfred John Dunkin (Lond. 1845, 8vo), p. 194-240. —Wright, *Biographiæ Britannicæ Literariæ* (Anglo-Norman period, p. 419-421); Hofer, *Nouv. Biog. Gén.* xx, 326, 327; Rose, *New Gen. Biog. Dictionary*, viii, 12. (J. W. M.)

**Gerzite.** See GEZRITE.

**Gē'sem** (Γεσίμ), a Græcized form (Judith i, 9) of the name of the land of GOSHEN.

**Gesenius, Friedrich Heinrich Wilhelm**, a distinguished Oriental scholar, was born at Nordhausen February 3, 1785. After finishing his education at the universities of Helmstadt and Göttingen, he was for a short time teacher at the pedagogium at Helmstadt. In 1806 he became privat docent at the University of Göttingen, and in 1809 professor of ancient literature at the college of Heiligenstadt. In 1810 he became extraordinary, and in 1811 ordinary professor at Halle. In 1814 he received the degree of doctor of divinity; and in 1820 he made a scientific journey to Paris and Oxford, where he chiefly collected material for his projected Hebrew dictionary. He died Oct. 23, 1842. Gesenius was an outspoken adherent of the Rationalistic school. In the study of Oriental languages, his works, which had an almost unprecedented circulation, began a new era. The most important among them are: *Hebräisches und Chaldäisches Handwörterbuch* (Lpz. 1810-1812, 2 vols.; 7th ed. 1868; Latin ed. 1833; 2d ed. by Hoffmann, 1847; Eng. transl. by C. Leo, Cambridge, 1825; by J. W. Gibbs, Andover, 1824, and by Robinson, Boston, 1850); —*Hebräische Grammatik* (Halle, 1813; 20th edit. by Dr. Rödiger, 1866; English transl. by M. Stuart, Andover, 1826, and by Conant, Boston, 1839; also a French transl.); —*Hebräisches Lesebuch* (Halle, 1814; 7th edit. by De Wette; 9th edit. by Heiligstedt, 1858; transl. into English, N. Y.); —*Kritische Geschichte der hebr. Sprache u. Schrift* (Leipzig, 1815; 2d edit. 1827); —*De Pentateuchi Samaritanæ origine inole et auctoritate* (Halle, 1815); —*Grammatico-Krit. Lehrgründe der hebr. Sprache* (2 vols., Leipzig, 1817); —*Uebersetzung des Propheten Jesaias mit einem phil.-krit. u. hist. Commentar* (3 vols., Leipzig, 1820-1821; 2d edit. 1829); —*Thesaurus phil.*

*crit. ling. hebr. et chald.* (Leipzig, 1827-1853, 8 vols.; part of the 3d vol. by Rödiger); —*Scripturæ linguæ phœnicæ monumenta* (Leipzig, 1837, 3 vols.). He also wrote many valuable articles for the *Allgemeine Encycl. of Ersch und Gruber*, and translated Burckhardt's *Travels to Syria and Palestine* (Weimar, 1823, 2 vols.), with many valuable notes illustrating Biblical geography. See *Gesenius, eine Erinnerung an seine Freunde* (Berlin, 1843); Herzog, *Real-Encyclop.* v, 121-3.

**Gesenius, Justus**, a German divine and scholar, was born at Esbeck, in Hanover, July 6, 1601, studied theology at Helmstadt and Jena, and became pastor in Brunswick in 1629. In 1636 he became court preacher at Hildesheim, and finally councillor and general superintendent of Hanover. He died Sept. 18, 1673. His principal works are, *Passionspredigten* (Hanov. 1660); —*Trostpredigten* (Hanov. 1661); and, under the name of Timotheus Fridlibius, *Warum willst du nicht Katholisch werden wie deine Vorfahren waren* (on the conversion of the duke John Frederick to Romanism) (Hanov. 1669-72, 4 parts). He wrote also a number of hymns, which have been incorporated in the Hanoverian Hymn-book.—Pierer, *Universal Lexikon*, s. v.; Herzog, *Real-Encyclop.* v, 117. (J. N. P.)

**Gē'sham**, or rather GESHAN [as in the edit. of 1611] (Heb. *Geyshan'*, גֵּשָׁן, *filly*, Sept. Γησῶν v. r. Σωγῶν, Vulg. *Gesan*), the third named of the sons of Jahdai (q. v.) among the descendants of Caleb (1 Chron. ii, 47). B.C. post 1612.

**Gē'shem** (Heb. גֵּשֶׁם, a *shower*, if Heb.; Fürst, *firmness*; but more prob. the Arabic *Jasim* or *Jahum*, a historical name in Arabia Proper; Sept. Γησῶν, Vulg. *Gesan*), once (Neh. vi, 6) in the prolonged form GASH'MU (Heb. *Gashmu'*, גֵּשְׁמוּ), an Arabian (Neh. ii, 19; vi, 1), and one of the enemies of the Jews on the return from the exile, especially in the plots against the life of Nehemiah (Neh. vi, 2). B.C. 446. Geshem, we may conclude, was an inhabitant of Arabia Petraea, or of the Arabian Desert, and probably the chief of a tribe which, like most of the tribes on the eastern frontier of Palestine, was, in the time of the captivity and the subsequent period, allied with the Persians, or with any peoples threatening the Jewish nation. Geshem, like Sanballat and Tobiah, seems to have been one of the "governors beyond the river," to whom Nehemiah came, and whose mission "grieved them exceedingly, that there was come a man to seek the welfare of the children of Israel" (Neh. ii, 10); for the wandering inhabitants of the frontier doubtless availed themselves largely, in their predatory excursions, of the distracted state of Palestine, and dreaded the re-establishment of the kingdom; and the Arabians, Ammonites, and Ashdodites are recorded as having "conspired to fight against Jerusalem, and to hinder" its repairing. See NEHEMIAH.

**Gē'shur** (Heb. *Geshur'*, גֵּשׁוּר; Sept. Γεσούρ and Γεσουρ), the name of a district of Syria near Gilead (2 Sam. xv, 8; 1 Chron. ii, 23), which adjoined, on the east side of the Jordan, the northern border of the Hebrew territory, and lay between Mount Hermon, Machab, and Bashan (Deut. iii, 13, 14; Josh. xii, 5). It is plain from these notices that Geshur lay in that portion of Syria which was connected with or adjoining to the land of Gilead, and the Geshurites probably dwelt in the rocky fastnesses of Argob. This region is supposed to be the same with what is now called the *Lejah*, and is remarkable for its singularly wild and rugged scenery. Burckhardt says, "In the interior parts of the Lejah the rocks are in many places cleft asunder, so that the whole hill appears shivered, and in the act of falling down," etc. Porter adds, "No description can approach the reality. One cannot repress a shudder when he finds himself in such a den, surrounded by armed hordes on whose faces the country seems to have stamped its own savage aspect.

Ibrahim Pasha, flushed with victory, and maddened by the obstinacy of a handful of Druses, attempted to follow them into this stronghold; but scarcely a soldier who entered returned. Every nook concealed an enemy. . . . The Lejah has for ages been a sanctuary for outlaws, and not unfrequently a refuge for the oppressed" (*Handbook for Syria*, p. 504). See ARGOB.

Geshur is first associated with Aram or Syria among the conquests of Jair, the son of Manasseh. After stating that he had three and twenty cities in the land of Gilead, it is said, Jair took "Geshur and Aram, with the towns of Jair, from them, with Kenath, and the towns thereof, three-score cities" (1 Chron. ii, 23). While these places were taken, they were held only as subject territories, still to a great extent occupied by their original inhabitants. See HAVOTH-JAIR. According to the boundaries of the Holy Land, as defined by Moses, Geshur would have formed part of it; but in Josh. xiii, 2, 13, it is stated that the Israelites had expelled neither the Geshurites nor the Maachathites, but dwelt together with them. That the Hebrews did not afterwards permanently subdue Geshur appears from the circumstance that, in David's time, this district had a king of its own, called Talmi, whose daughter, Maachah, was one of the wives of David (2 Sam. iii, 3; 1 Chron. iii, 2). She was probably a person of superior beauty, as she became the mother of the two handsomest of David's children, Absalom and Tamar. How David should have thought of getting a wife from such a quarter, or what prior link of connection between him and the king of Geshur might have led to such a result, is left unnoticed in the history. But possibly the Geshurites, who are mentioned among the tribes against whom David made incursions while he dwelt in Ziklag (1 Sam. xxvii, 8), and who, from the name being once found in connection with the Philistines (Josh. xiii, 3), are generally supposed to have been a different tribe from the other, may, after all, have been the same. See GESHURITE. The Geshurites, very probably, from their fastnesses in Argob, were wont to sally forth, like the Amalekites, in occasional raids upon the districts to the south and east of Palestine, without having any settled habitations there; and David might justly regard them (though located at some distance), equally with the Amalekites who are mentioned along with them, as fair subjects for making reprisals upon. In that case he would be brought into close contact with Talmi, first, indeed, as occupying a hostile relation to him, but not unnaturally afterwards as wishing to form with him a bond of alliance. Amid the troubles and difficulties which encompassed David's access to the throne, a marriage into the family of the king of Geshur might seem to afford a prospect not to be slighted of strengthening his position. As it ultimately proved, this alliance became the source of one of his greatest dangers, in giving birth to the fascinating, but restless and aspiring Absalom. The wild acts of Absalom's life may have been to some extent the results of maternal training; they were at least characteristic of the stock from which he sprung. In fleeing, as Absalom did, after the assassination of his brother Amnon, to the court of his maternal grandfather at Geshur (2 Sam. xiii, 37, 38; xiv, 23, 32), one can easily understand how secure a refuge he might find there, while he required to be in concealment, but at the same time how unlikely it was his ambition could remain long satisfied with its dreary aspect and dreadful seclusion. See ABSALOM. The word *Geshur* signifies a *bridge*, and corresponds with the Arabic *Jisr*, Syriac *Glythairá*; and in the same region where, according to the above data, we must fix Geshur, between Mount Hermon and the Lake of Tiberias, there still exists an ancient stone bridge over the Upper Jordan, called *Jisr-Benáat-Jakub*, or "the bridge of the daughters of Jacob," i. e. the Israelites. "The ancient commercial route to and from Damascus and the East

seems to have lain in this direction in the most ancient times (Gen. xxxvii, 25), and hence the probability that there was even then a bridge over the river, which (in times when bridges were rare) gave its name to the adjacent district. The Jordan, however, is at a considerable distance from the region in question. Dr. Robinson, moreover, regards the bridge in question as a structure of the time of the Crusades, although he admits that it occupies the site of a traditionary Ford of Jacob (*Researches*, iii, 361).—Kitto, s. v.; Fairbairn, s. v. See BRIDGE.

**Gesh'uri** (Heb. *Geshuri'*, גֶּשׁוּרִי, Sept. Γαγγυρί v. r. Γεγγυρί, and Γεσουρί v. r. Γεσουρί; the sing. Deut. iii, 14; Josh. xii, 2), or GESHURITES (Heb. *Geshurim'*, גֶּשׁוּרִים, plur. Josh. xii, 5; xiii, 11, 13; 1 Sam. xxvii, 8; but in Josh. xiii, 13, second clause, where the Heb. has *Geshur* simply), the name of an aboriginal people of Palestine, who appear at opposite extremities of the country. See CANAAN, LAND OF.

1. The natives of a district geographically within Bashan, but politically reckoned to Aram (2 Sam. xv, 8). It seems, from the various references in Scripture, that the Geshurites occupied a territory of great natural strength, and that thus, though small in number, they were able to defend themselves against all assailants. Ireland thinks (*Palæst.* p. 77 sq.) that Geshur of Bashan (Josh. xii, 5) was distinct from the Geshur of Aram (2 Sam. xv, 8). For this, however, there is no authority, and the whole tenor of the Scripture narrative seems opposed to it. The view of Keil (on Josh. xii, 5), Rosenmüller (*Bib. Geogr.* ii, 227), and Gesenius (*Thesaurus*, s. v.), that Geshur lay along the east bank of the upper Jordan, is opposed to the topographical details of the Bible, in which it is closely connected with Argob. Their chief argument is that *Geshur* signifies "a bridge," and there is a bridge on the upper Jordan. Porter, after a careful survey of the whole country, was led to the conclusion that Geshur embraced the northern section of the wild and rocky provinces now called *Lejah*, and formerly Trachonitis and Argob. It probably also took in the neighboring plain to the north as far as the banks of the Pharpar, on which there are several important bridges; but on the approach of the Israelites, the people may have concentrated themselves in their rugged stronghold, where the Israelites deemed it more prudent to leave them than to attempt to expel them. The wild tribes that now occupy that region hold a somewhat similar position, being really independent, but nominally subject to the Porte (see *Journ. of Sac. Lit.* July, 1854, p. 300; Porter's *Damascus*, vol. ii; Burckhardt's *Travels in Syr.* p. 105 sq.). See GEZER. The Geshurites appear to have maintained friendly relations with the Israelites east of the Jordan; probably from mutual interest, both being extensive cattle owners. The community of occupation may have led to the alliance between David and the daughter of Talmi, king of Geshur (2 Sam. iii, 3). See TRACHONITIS.

2. A people who dwelt on the south-western border of Palestine, adjoining the Philistines (Josh. xiii, 2). They appear to have been nomads, and to have ranged over the neighboring desert, though occupying for a time at least a portion of Philistia. "David went up and invaded the Geshurites, and the Gezirites, and the Amalekites; for those nations were of old the inhabitants of the land as thou goest to Shur, even unto the land of Egypt" (1 Sam. xxvii, 8).—Kitto, s. v. These, however, appear to have been but a branch of the foregoing tribe, settled more or less permanently on the maritime outskirts of Judah. Schwarz finds the latter "in the modern village *Adshur*, one mile from Deir-Diban, on the road to Migdal" (*Palæst.* p. 113). Thénius (*Comment.* ad loc.) thinks that *Geshurites* should be read instead of "Ashurites" in 2 Sam. ii, 9. See GESHUR.

**Gesselius, TIMAN, M.D.**, was born at Amersfoort near the close of the 16th century. His father, Cornelius Gesselius, was rector of the Latin school of that place, but lost his situation in consequence of refusing to subscribe the canons of the Synod of Dort. His son Timan, associate rector, holding his father's sentiments, shared the same fate. Being a doctor of medicine, he established himself first at Nymegen, and subsequently at Utrecht as a practising physician. He deserves mention here chiefly on account of his labors in Church history. His principal works are, *Historia sacra et ecclesiastica ordine chronologica et in compendiarium digesta* (Traj. 1659, 4 vols.):—*Historia rerum memorabilium in orbe gestarum ab anno mundi usque ad annum Christi 1625* (Traj. 1661). See Gladius, *Godgeleerd Nederland*, 1 D. blz. 517 en verv. (J. P. W.)

**Gessner, SALOMON, D.D.**, a Lutheran divine, was born in Silesia in 1559, appointed professor of theology at Wittenberg in 1592, and died in 1605. He wrote *Commentationes in Psalmos Davidis* (Wittenb. 1629, fol.).—Darling, *Cyclop. Bibliographica*, s. v.; Melchior Adam, *Vita Theologorum*, etc., i, 352.

**Ge'ther** (Heb. *גֵּתֵר*, signif. unknown; Sept. *Γαίρη* v. r. *Γαζέρο*), the name of the third of the sons of Aram (Gen. x, 23). B. C. post. 2513. Josephus (*Ant.* i, 6, 4) makes him the ancestor of the *Bactrians* (but see Michaelis, *Spicileg.* ii, 138); and in the traditional legends of the Arabs one *Gathir* appears as the source of the Thamudites in Hejaz and the Jadesites in Jemama (Abulf. *Hist. Antæist.* p. 16). The Arab. vers. of the Polyglot has the *Gerumaku*, a tribe which in the time of Mohammed must have inhabited the district of Mosul. See ARABIA. Jerome (ad loc.) proposes the *Carians*. Bochart asks (*Phaleg.* ii, 10) whether the river *Centrites*, mentioned by Xenophon (*Anab.* iv, 3, 1) and Diodorus Sic. (xiv, 27), and which lay between the Carduchians and Armenians, may not have derived its name from Gether; and Le Clerc finds a trace of the name in *Cathara* (Καζάρα), a town on the Tigris (Ptol. v, 18). Kalisch (*Commentary*, ad loc.) thinks it may be but an Aramaean form of *Geshur*, an identification already proposed by Thomson (*Land and Book*, i, 386). (See Schulthess, *Parad.* p. 282.) See ARAM.

**Gethsem'auê** (Γεθσημανή v. r. Γεθσημανεί, prob. for Aramaean *ܓܝܬܫܡܢܝܐ*, oil-press, such being doubtless in the vicinity), the name of a small field (*χωρίον*, plot, A. V. "place," Matt. xxvi, 36) or olive-yard (comp. *κῆπος*, John xviii, 1), just out of Jerusalem, over the brook Kedron, and at the foot of the Mount of Olives, to which Jesus, as often before (comp. Luke xxii, 39), retired with his disciples on the night of his betrayal (Mark xiv, 32), and which was the scene of his agony (q. v.). The Kedron runs in the bottom of a deep glen, parallel with the eastern wall of Jerusalem, and about 200 yards distant. Immediately beyond it rises the steep side of Olivet, now, as formerly, cultivated in rude terraces. Somewhere on the slope of this mount Gethsemane must have been situated (see Nitzsch, *De horto Gethsemane*, Viteb. 1750). According to Josephus, the suburbs of Jerusalem abounded with gardens and pleasure-grounds (*παρὰ τῆς πόλεως*, *War.* vi, 1, 1; compare v. 3, 2); now, with the exception of those belonging to the Greek and Latin convents, hardly the vestige of a garden is to be seen. There is, indeed, a favorite paddock or close, half a mile or more to the north, on the same side of the continuation of the valley of the Kedron, the property of a wealthy Turk, where the Mohammedan ladies pass the day with their families, their bright, flowing costume forming a picturesque contrast to the stiff, sombre foliage of the olive-grove beneath which they cluster. But Gethsemane has not come down to us as a scene of mirth; its inexhaustible associations are the

offspring of a single event—the agony of the Son of God on the evening preceding his passion. Here emphatically, as Isaiah had foretold, and as the name imports, were fulfilled those dark words, "I have trodden the wine-press alone" (lxiii, 3; compare Rev. xiv, 20, "the wine-press . . . without the city"). "The period of the year," remarks Mr. Gresswell (*Harm. Diss.* xlii), "was the vernal equinox; the day of the month about two days before the fall of the moon—in which case the moon would not be now very far past her meridian, and the night would be enlightened until a late hour towards the morning;" the day of the week Thursday, or rather, according to the Jews, Friday, for the sun had set. The time, according to Mr. Gresswell, would be the last watch of the night, between our 11 and 12 o'clock. Any recapitulation of the circumstances of that ineffable event would be unnecessary, any comments upon it unseasonable. A modern garden, in which are eight venerable olive-trees, and a grotto to the north, detached from it, and in closer connection with the Church of the Sepulchre of the Virgin—in fact, with the road to the summit of the mountain running between them, as it did also in the days of the Crusaders (Sanuti, *Secret. Fidei. Cruc.* lib. iii, p. xiv, c. 9)—both securely enclosed, and under lock and key, are pointed out as making up the true Gethsemane. These may be the spots which Eusebius (*Onomast.* s. v. Γεθσημανή, "where the faithful still resort for prayer"), St. Jerome (*Liber de Situ et Nomini-bus*, s. v.), and Adamnanus mention as such; and from the 4th century downwards some such localities are spoken of as known, frequented, and even built upon. This spot was probably fixed upon at the wish of Helena, the mother of Constantine, in A. D. 326. The pilgrims of antiquity say nothing about those time-honored olive-trees, whose age the poetic minds of Lamartine and Stanley shrink from criticising—they were doubtless not so imposing in the 6th century; still, had they been noticed, they would have afforded undying testimony to the locality—while, on the other hand, few modern travellers would inquire for and adore, with Antoninus, the three precise spots where our Lord is said to have fallen upon his face. Against the contemporary antiquity of the olive-trees, it has been urged that Titus cut down all the trees round about Jerusalem; and certainly this is no more than Josephus states in express terms (see particularly *War.* vi, 1, 1, a passage which must have escaped Mr. Williams, *Holy City*, ii, 437, 2d edit., who only cites v, 3, 2, and vi, 8, 1). Besides, the tenth legion, arriving from Jericho, were posted about the Mount of Olives (v, 2, 3; and comp. vi, 2, 8), and in the course of the siege a wall was carried along the valley of the Kedron to the fountain of Siloam (v, 10, 2). The probability, therefore, would seem to be that they were planted by Christian hands to mark the spot; unless, like the sacred olive of the Acropolis (Bahr, ad *Herod.* viii, 55), they may have reproduced themselves as scions from the old roots, a supposition which their shape and position render not unlikely (Aiton, *Land of the Messiah*, p. 204). Maundrell (*Early Trav. in Palestine*,

Garden of Gethsemane as seen from the North.

by Wright, p. 471) and Quaresmius (*Elucid. T. S. lib. iv, per. v, ch. 7*) appear to have been the first to notice them, not more than three centuries ago; the former arguing against and the latter in favor of their reputed antiquity, but nobody reading their accounts would imagine that there were then no more than eight, the locality of Gethsemane being supposed the same. Parallel claims, to be sure, are not wanting in the cedars of Lebanon, which are still visited with so much enthusiasm; in the terebinth, or oak of Mamre, which was standing in the days of Constantine the Great, and even worshipped (Vales. ad Euseb. *l'it. Const.* iii, 53); and the fig-tree (*ficus elastica*) near Nerbudda, in India, which native historians assert to be 2500 years old (Patterson's *Journal of a Tour in Egypt*, p. 202, note). Still more appositely, there were olive-trees near Litemum 250 years old, according to Pliny, in his time, which are recorded to have survived to the middle of the 10th century (*Nouv. Dict. de Hist. Nat.* Paris, 1846, xxix, 61). There can, indeed, be no certainty as to the precise age of the trees; but it is admitted by all travellers that the eight which still stand upon the spot in question bear the marks of a venerable antiquity, having gnarled trunks and a thin foliage. Several young trees have been planted to supply the place of those which have disappeared (Olin's *Travels*, ii, 115). Some years ago the plot of ground was bought by the Latin Church; and, having been enclosed by a wall, the interior is laid out in walks and flower-beds after the fashion of a modern European garden; the guardian *padre*, however, still points out to pilgrims not only "the grotto of the agony," but also the spot where Judas betrayed Jesus, and that where the three disciples slept (Geramb, *Pilgrimage to Palestine*, i, 63 sq.). Mr. G. Robinson says: "The grot to which our Saviour retired, and where, 'falling to the ground' in the agony of his soul, and sweating 'as it were great drops of blood,' he was comforted by an angel (Luke xxii, 43, 44), is still shown and venerated as such. It is excavated in the rock, and the descent to it is by a flight of rudely-cut steps. The form of the interior is circular, about fifteen feet in diameter, and the roof, which is supported by pilasters, is perforated in the middle to admit light. There are some remains of sepulchres in the sides" (*Travels in Palestine*, Par. 1837, i, 128). The Armenian or Greek Church, however, denies that this is the actual site, and has fixed upon another as the proper one, at some little distance to the north of it. But both sites have been deemed by many writers as too public for the privacy of prayer (Thomson, *Land and Book*, ii, 284). The solemn quietude of the Latin site, however, is strongly commented upon by Bartlett (*Walks about Zion*, p. 98). Dr. Robinson remarks that there is nothing particular in the traditionary plot to mark it as the garden of Gethsemane, for adjacent to it are many similar enclosures, and many olive-trees equally old (*Researches*, i, 246). He admits, however, the probability that this is the site which Eusebius and Jerome had in view, and as no other site is suggested as entitled to superior credit, we may be content to receive the traditional indication (Tischendorf, *Reise in dem Orient*, i, 312). It has been visited and described by nearly every modern traveller in Palestine. Some have even heard the ancient name given in connection with this spot, but this was probably borrowed by the Arabs from the Christian traditions. — Kitto, s. v.; Smith, s. v. See JERUSALEM.

Geu'el (גֵּוּ'עַל, *elevation of God*; Sept. Γου'ε'λ), son of Machi of the tribe of Gad, and one of the commissioners sent by Moses to explore Canaan (Numb. xiii, 15). B.C. 1657.

Geulinx, ARNOLD, a Belgian philosopher, born about 1625 at Antwerp, died about 1668 as professor of philosophy at Leyden. He at first taught the classics and the Cartesian philosophy at Louvain, but sub-

sequently went to Leyden, where he abjured Catholicism, and finally obtained the chair of philosophy, which he retained until his death. He was the most remarkable disciple of Des Cartes prior to Spinoza and Malebranche, and his writings contain the germs of some of the doctrines of these later philosophers. He in particular developed the hypothesis of occasional causes. He wrote *Ethica* (Amsterdam, 1665); *Logica* (Amsterd. 1662); *Metaphysica* (Amsterd. 1691). (A. J. S.)

Gez. See LOCUST.

Ge'zer (Heb. גֵּזֵר, prob. a *precipice*, from גָּזַר, to cut off; Sept. Γαζ'ερ, but in Chron. vi, 67 and xx, 4 Γαζ'ε'ρ, in 1 Chron. xiv, 16 Γαζ'ηρα; in pause ΓΑ'ΖΕΡ, גֵּזֵר, which Ewald, *Isr. Gesch.* ii, 427, note, deems the original form), an ancient city of Canaan, whose king, Horam, or Elam, coming to the assistance of Lachish, was defeated and probably killed, with all his people, by Joshua (Josh. x, 33; xii, 12). The town, however, is not said to have been destroyed; it formed one of the landmarks on the southern boundary of Ephraim, not far from the lower Beth-horon, towards the Mediterranean (xvi, 3), the western limit of the tribe (1 Chron. vii, 28). It was allotted, with its suburbs, to the Kohathite Levites (Josh. xxi, 21; 1 Chron. vi, 67); but the original inhabitants were not dispossessed (Judg. i, 29); so that in the time of David the Philistine territory seems to have included it (2 Sam. x, 25; 1 Chron. xx, 4); and even down to the reign of Solomon the Canaanites (or, according to the Sept. addition to Josh. xvi, 10, the Canaanites and Perizzites) were still dwelling there, and paying tribute to Israel (1 Kings ix, 16). At this time it must, in fact, have been independent of Israelitish rule, for Pharaoh had on some occasion burnt it to the ground and killed its inhabitants, and then presented the site to his daughter, Solomon's queen. But it was immediately rebuilt by the latter king (1 Kings ix, 15-21); and, though not heard of again till after the captivity, yet it played a somewhat prominent part in the later struggles of the nation, being the *Gazera* (Γαζ'ηρα, 1 Macc. iv, 15; vii, 45), or *Gazara* (Γαζ'αρα, 1 Macc. xv, 28, 35; xiii, 53; 2 Macc. x, 32), of the Apocrypha and Josephus (Γαζ'αρα, *Ant.* xiii, 9, 2), who once calls it *Gadara* (Γαδ'αρα, *Ant.* xiii, 9, 2). Strabo (xvi, 759) also mentions a town called *Gadaris* (Γαδα'ρίς). Ewald (*Gesch.* iii, 280), somewhat arbitrarily, takes Gezer and *Geshur* to be the same, and sees in the destruction of the former by Pharaoh, and the simultaneous expedition of Solomon to Hamath-zobah, in the neighborhood of the latter, indications of a revolt of the Canaanites, of whom the Geshurites formed the most powerful remnant, and whose attempt against the new monarch was thus frustrated. In one place *Gob* is given as identical with Gezer (1 Chron. xx, 4; comp. 2 Sam. xxi, 18). Gezer was perhaps the original seat of the *Gezrites* (q. v.) whom David attacked (1 Sam. xxvii, 8), in the vicinity of the Amalekites; and as they are mentioned in connection with the Geshurites, they may have lived a considerable distance north of Philistia. Finally, Mount *Gerizim* (q. v.) appears to have derived its name from the vicinity of this tribe (compare the name *Ar-Gerizim*, by Theodotus, in Eusebius, *Præp. Evang.* ix, 22).

Gezer must have been between the lower Beth-horon and the sea (Josh. xvi, 3; 1 Kings ix, 17), therefore on the edge of the great maritime plain which lies beneath the hills of which Beit-ur et-tahta is the last outpost, and forms the regular coast road of communication with Egypt (1 Kings ix, 16). It is therefore appropriately named as the last point to which David's pursuit of the Philistines extended (2 Sam. v, 25; 1 Chron. xiv, 16), and as the scene of at least one sharp encounter (1 Chron. xx, 4), this plain being their own peculiar territory (comp. Josephus, *Ant.*, viii, 6, 1, Γαζ'αρα τὴν τῆς Παλαιστίνων χώρας ὑπάρχουσαν); and

as commanding the communication between Egypt and the new capital, Jerusalem, it was an important point for Solomon to fortify. By Eusebius (*Onomast.* s. v. *Γαζέρι*) it is mentioned as four miles north of Nicopolis (Amwās), a position exactly occupied by the important town *Jimzu*, the ancient *Gimzo*, and corresponding well with the requirements of Joshua. But this hardly agrees with the indications of the first book of Maccabees, which speak of it as between Emmaus (Amwās) and Azotus and Jamnia; and again as on the confines of Azotus. In the neighborhood of the latter there is more than one site bearing the name *Yasur*; but whether this Arabic name can be derived from the Hebrew Gezer, and also whether so important a town as Gazara was in the time of the Maccabees can be represented by such insignificant villages as these, are doubtful questions.—Smith, s. v. Schwartz (*Palest.* p. 85) identifies it with *Yasur*, a little village two miles east of Jaffa; but this has long since been identified by the Hazor of Eusebius (see Robinson's *Res.* ii, 370, note). Van Senden proposes to identify it with *El-Kubab*, a place on a tell north-west of Amwās; but Van de Velde suggests that this would require the supposition of two Gezers (*Memoir*, p. 315). The site seems rather to be that of the modern *Um-Rush*, a village with ruins and a well on the Jaffa road (Robinson, *Researches*, iii, 57), a place which must, from its position (commanding the thoroughfare), have always been of great importance, like Gezer.

**Gezerite.** See GEZRITE.

**Gez'rite** (Heb. with the art. *haq-Gizri'*, גִּזְרִי, apparently from גִּזְרָה, a *section*, or גִּזְרָה, a *shorn*, i. e. *sterile tract*; the marginal reading at 1 Sam. xxvii, 5, erroneously adopted instead of the textual *haq-Gizri'*, גִּזְרִי, the GIZRITE; Sept. ὁ Γεζριτικός v. r. Γεζρι, Vulg. *Gezri*, A. V. "the Gezrites"), the designation of a tribe in the vicinity of the Amalekites, attacked and subdued by David while residing among the Philistines (1 Sam. xvii, 8), and hence probably Canaanitish nomades inhabiting the south-western wastes of Palestine. The twofold form of the name, *Gezerite* or *Gerizite*, seems to furnish a link between the city of GEZER and MOUNT GERIZIM. See also GESURITE. They were rich in Bedouin treasures—"sheep, oxen, asses, camels, and apparel" (ver. 9; comp. xv, 3; 1 Chron. vi, 21). They appear to have occupied Central Palestine at a very early period, and to have relinquished it in company with the Amalekites, who also left their name attached to a mountain in the same locality (Judg. xii, 15), when they abandoned that rich district for the less fertile but freer south. Other tribes, as the Avvim and the Zemarites, also left traces of their presence in the names of towns of the central district.—Smith, s. v. See CANAANITE.

**Gfrörer**, AUGUST FRIEDRICH, a German historian, was born March 5, 1803, at Calw. In 1826 he was for a time tutor in a private family at Geneva, made then a journey in Italy, and in 1828 was appointed lecturer (repetent) in the Evangelical "Stift" in Tübingen. In 1830 he became librarian in Stuttgart, and devoted henceforth his whole time to historical studies. Having at first been a Liberal Protestant of the Tübingen school, he gradually changed his views, and became partial to Roman Catholicism. In 1846 he accepted a call as professor of history to the University of Freiburg. In 1848 he was elected a member of the German Parliament, in which he belonged to the "Grossdeutsche" (Great German) party. In November, 1853, he joined the Roman Catholic Church. He died July 10, 1861. The most important of his works are: *Geschichte unserer Tage* (under the assumed name of Ernst Fregmund, 1830-1835).—*Philo u. die jüd. alexandria Theosophie* (Stuttg. 1831, 2 vols.).—*Gustav Adolf u. seine Zeit* (Stuttg. 1835-37, 2 vols.; 3d edit. 1852).—*Gesch. des Urchristenthums* (Stuttg. 1838, 3 vols.).—*Allgem.*

*Kirchengesch.* (Stuttg. 1841-46, 4 vols.):—*Geschichte der ost. u. westfränk. Karolinger vom Tode Ludwig des Frommen bis zum Ende Konrad I* (Freiburg, 1848, 2 vols.):—*Untersuchung über Alter, Ursprung, Zweck der Decretalen des falschen Isidorus* (Freiburg, 1848):—*Ursprung des menschlichen Geschlechts* (Schaffhausen, 1855, 2 vols.):—*Papst Gregorius u. sein Zeitalter* (Schaffhausen, 1859-61, 7 vols.):—*Geschichte des 18ten Jahrhunderts* (after his death edited by Weiss, Schaffhausen, 1862).—*Allgem. Encycl.* s. v. (A. J. S.)

**Ghazzali**, ABU HAMID MOHAMMED IBN AHMAD, "surnamed ZAINEDDIN (*glory of the law*), one of the most eminent Mohammedan philosophers and divines, and one of the warmest adherents of Sufism (q. v.), born in 450 H. (1058, A. D.), at Tus, in Khorassan, the birthplace also of Firdusi, and burial-place of Harun-al-Rashid. The surname of Ghazzali was given to him, according to some, because his father dealt in *ghazal* or spun cotton. Left an orphan at an early age, by the advice of his guardian, a Sufi, he went to Djorshan, with the intention of devoting himself to study and science as a means of support, and became the favorite pupil of Abu Nasr Ismail, an eminent teacher of the time. He afterwards betook himself to Nishapur, where he attended the lectures of the learned Imam of the two sanctuaries (Mecca and Medina) on law, polemics, philosophy, and theology, and remained till the death of his instructor. The grand vizier of Bagdad then appointed him (A. D. 1091) to a professorship at his *Nizamje* (university), which he left four years later in order to perform the holy pilgrimage to Mecca. On his return he visited Jerusalem and Damascus, and remained for ten years at the mosque of the latter place, leading a studious and ascetic life. He afterwards visited Cairo, Alexandria, and other places in Africa, everywhere teaching and lecturing on religion and science, and also returned for a short time to Nishapur; but he finally went back to Tus, his native place, where he died, 505 H. (A. D. 1111), having founded a monastery for Sufis and a college for the studious. Of the ninety-nine works written by him (mostly in Arabic, a few in Persian), the most famous is his *Itjâ' Olîm ad-Dîn* (Restoration of Religious Sciences), a work so remarkable and exhaustive, that it has been said, "If all the books of the Islam were lost, and we had only this one left, we should not miss the others" (*Itjâ' Kholîfah*). The academies of the West, however, Cordova, Morocco, Fez, etc., condemned it as contrary to the teachings of the Sunna (q. v.), and had it publicly burned. Next in importance stands his great philosophical work *Tahâfut Al-Filâsâfah* (The Overturning of the Philosophers), which has survived only in Hebrew translations, and which gave rise to a warmly contested controversy between him and Averroës (Ibn Roshd). We may mention also his commentary on the ninety-nine names of God, and an ethical treatise, *O Chibî!* published and translated into German by Hammer-Purgstall. About one third only of his works is known to have survived, and of this but a very small part has been published.—Chambers, *Encyclop.* s. v.

**Ghibellins** or **Ghibellines.** See GUELPHS.

**Ghislain**, or GUILLAIN, ST., called the apostle of Belgian Gaul, is said to have been a native of Athens. He came to Gaul in 633, and in 641, with the assistance of king Dagobert, he founded the convent of St. Ghislain (originally St. Peter's cell). The legend says that he was led to that spot by an eagle, who guided him in the search after his ecclesiastical vestments, which had been stolen by a she-bear. After Walde-trude's husband had retired from the world and founded the convent of Haumont, Ghislain induced Walde-trude to found one at Castrilocus: this was the first settlement of the present city of Mons, and the origin of its chapter. Ghislain died in 687, and was canonized in 925. Miracles were said to take place at his

tomb, especially the cure of epilepsy, which is still commonly called in Belgium St. Ghislain's Evil. His life was written in the 12th century by Philippe Deharveng, abbot of Bonne-Espérance. See *Acta Sanctorum Ord. Sancti Benedicti*; Baillet, *Vie des Saints*, 17th Oct.; Hofer, *Nouv. Biog. Générale*, xx, 403 sq.

**Ghost**, an old English word of Saxon origin (Germ. *geist*), equivalent to *soul* or *spirit*, occurs as the translation of the Heb. רוּחַ, *ne' phesh*, and the Greek πνεῦμα, both signifying *breath, life, spirit, or living principle*, by which and similar terms they are elsewhere rendered (Job xi, 20; Jer. xv, 9; Matt. xxvii, 50; John xix, 30). It frequently occurs in the N. T. in the sacred name "Holy Ghost." See SPIRIT. Other phrases in which it occurs are those rendered to "give up the ghost," etc., all simply signifying to *die*, e. g. זָבַח, to *expire* (Lam. i, 19; Gen. xxv, 17; xxxv, 29; xlix, 33; Job iii, 11; x, 18; xiii, 19; xiv, 10); ἐκπνέω, to *breathe out*, etc., *one's life* (Mark xv, 37, 39; Luke xxiii, 46); ἐκψύχω, to *breathe out one's last* (Acts v, 5, 10; xii, 23). Many commentators suppose, from the original terms used in the Gospels (ἀφῆκε τὸ πνεῦμα, Matt. xxvii, 50; παρέδωκε τὸ πνεῦμα, John xix, 30), something preternatural in Christ's death, as being the effect of his *volition*. But there is nothing in the words of Scripture to countenance such an opinion, though our Saviour's volition must be supposed to accompany his offering himself for the sins of the world. The Greek words rendered *yielded up*, and *gave up*, are no other than such as is frequently used, both in the Septuagint (Gen. xxxv, 18; comp. Ps. xxxi, 5; Eccles. xii, 7) and the classical writers, of *expiration*, either with the *spirit* or the *soul* (Josephus, *Ant.* v, 2, 8; vii, 13, 3; *Ælian*, II. *An.* ii, 1; Herod. iv, 190. See SPECTRE.

**Ghostly** (i. e. *spiritual*) occurs in the expressions "ghostly enemy" and "ghostly counsel," found in the Catechism and in the Communion-service of the Church of England, signifying the one our spiritual enemy Satan; the other, spiritual advice preparatory to partaking of the Eucharist (Eden, s. v.). See SPIRIT, HOLY.

**Gí'ah** (Heb. *Gí'ach*, גִּיאַח, a *breaking forth* sc. of a *fountain*; Sept. *Gé* v. r. *Gai*, Vulg. simply *valis*), a place (probably marked by a spring) opposite the hill Ammah, on the road to the "wilderness (east?) of Gibeon," where Joab and Abishai ceased at sun-down from the pursuit of Abner after the death of Asahel (1 Sam. ii, 24). It is perhaps identical with the "pool" mentioned in ver. 13, although in that case the parties must have become far separated in the rout, since they would thus have returned to the spot where the battle began. See GIBEON.

**Giant**. These beings of unusual height are found in the early history of all nations, sometimes of a purely human origin, but more frequently supposed to have partaken also, in some way, of the supernatural and the divine. The scriptural history is not without its giants, and the numerous theories and disputes which have arisen in consequence render it necessary to give a brief view of some of the main opinions and curious inferences to which the mention of them leads. The English word has several representatives in the original Hebrew.

1. In Gen. vi, 4, we have the first mention of *giants* (נְפִלִים, *nephilim'*, according to some from the Arabic, but better from נָפַל, to *fall*, q. d. *causing to fall*, i. e. *violent*; Sept. γίγαντες, Vulg. *gigantes*; but more discriminatingly Aquil. ἐπιπύροντες, Symm. βυαίον)—"There were giants in the earth in those days; and also after that, when the sons of God came in unto the daughters of men, and they bare children to them, the same became mighty men, which were of old men of renown." A somewhat similar intercourse is made mention of in the second verse of the same chapter—"The sons of God saw the daughters of men that they were

fair, and they took them wives of all which they chose" (see *Jour. Sac. Lit.* Oct. 1867). Wellbeloved (ad loc.) and others translate and interpret the passage so as to make it speak merely of "men of violence; men who beat down, oppress, and plundered the weak and defenceless." Doubtless this is an agreement with the meaning of the original word (which occurs also in Numb. xiii, 33, in connection with the Anakim). But these giants, as in other cases, would naturally be designated by a descriptive name, and great strength is generally accompanied by violence and oppression. In our judgment, the bearing of the passage obviously favors the common notion of giants, and that the rather because their origin is traced to some unexplained connection with "the sons of God," that is, with beings of high endowments, if not of a superior nature. We have here given, in all probability, the true basis of all those mythological heroes with which the history of ancient nations is found to begin, such as Hercules and others of a like stamp. It is also especially worthy of note that these are ascribed to a similar parentage, half human, half celestial. Their famous deeds have been immortalized by their dedication in every profane system of religion. This appears to us a more substantial interpretation of the Greek and Roman, and even of the Indian and Scandinavian systems of mythology, than the subtle resolution of these semi-fabulous characters into symbols of the various powers of nature, after the mythical theory of the German writers. It is simply the traditions of these cases of antediluvian prowess and fame that the early poets of each nation have wrought up into the divine personages of their heroic age. We merely add that, by the "sons of God" and the "daughters of men" in the above passage, we are doubtless to understand the descendants of Seth and Cain respectively (see Gesenius, *Heb. Thesaur.* p. 96); yet Kitto inclines to regard the former as angelic beings (*Daily Illust.* ad loc.). See NEPHILIM.

2. In Gen. xiv, 5, we meet with a race termed *Rephaim* (רִפְּאִים), as settled on the other side of the Jordan, in Asheroth-Karnaim, whom Chedorlaomer defeated. Of this race was Og, king of Bashan, who alone remained, in the days of Moses (Dent. iii, 10), of the remnant of the Rephaim. A passage, which is obviously from a later hand, goes on to say, "Behold, his bedstead (רִפְּאִי, *canopy*, others *coffin*; see Michaelis, Dathe, Rosenmüller) was a coffin of iron; is it not in Rabbath of the children of Ammon? nine cubits is its length and four cubits its breadth, according to the cubit of a man," or the natural length of the cubit. See CURB. It does not appear to us to be enough to say that Og was "no doubt a man of unusual stature, but we cannot decide with accuracy what his stature was from the length of the iron couch of state or coffin in which he was placed" (Wellbeloved, ad loc.). Whatever theory of explanation may be adopted, the writer of the passage clearly intended to speak of Og as a giant, and one of a race of giants (compare Josh. xii, 4; xiii, 12). See OG. This race gave their name to a valley near Jerusalem, termed by the Sept. ἡ κοιλίς τῶν ριφαιῶν. See REPHAIM.

The *rephaim* (A. V. "dead") of Job xxvi, 5; Prov. ii, 8, etc., are doubtless the *shades* of the departed. See DEAD.

3. The *Anakim* (אַנָּכִים or אֲנָכִים, *sons of Anak*). In Numb. xiii, the spies sent by Moses before his army to survey the promised land, report, among other things, "The people be strong that dwell in the land; and, moreover, we saw the children of Anak" (verse 28). This indirect mention of the children of Anak shows that they were a well-known gigantic race. In the 32d and 33d verses the statement is enhanced—"It is a land that eateth up the inhabitants; and all the people that we saw in it are men of great stature. And there we saw the giants, the sons of Anak which

came of the giants; and we were in our own sight as grasshoppers, and so we were in their sight." However much of exaggeration fear may have given to the description, the passage seems beyond a doubt to show the current belief in a race of giants (Deut. ix, 2). From Deut. ii, 10, it appears that the size of the Anakim became proverbial, and was used as a standard with which to compare others. In the time of Moses they dwelt in the environs of Hebron (Josh. xi, 22). They consisted of three branches or clans—"Ahiman, Sheshai, and Talmai—the children of Anak" (Numb. xiii, 22). They were destroyed by Joshua (Josh. xi, 21) "from the mountains, from Hebron, from Debir, from Anab, and from all the mountains of Judah, and from all the mountains of Israel: Joshua destroyed them utterly with their cities. There was none of the Anakim left in the land of the children of Israel: only in Gaza, in Gath, and in Ashdod, there remained" (Judg. i, 20; Josh. xiv, 12). See ANAKIM.

From this remnant of the Anakim thus left in Gath of the Philistines proceeded the famous Goliath (גִּלְיָת), 1 Sam. xvii, 4. This giant is said to have been in height six cubits and a span. He challenged the army of Israel, and put the soldiers in great alarm. The army of the Philistines and that of Israel were, however, on the point of engaging, when David, the youngest son of Jesse, came near, bringing, at the command of his father, a supply of provisions to his three eldest brothers, who had followed Saul to the battle; and, becoming aware of the defiance which had been again hurled at "the armies of the living God," he at once went and presented himself as a champion to the king; was offered, but refused, a coat of mail; and, arming himself solely with a sling, smote the Philistine in his forehead, so that he fell upon his face to the earth, and was decapitated by David with his own sword. A general victory ensued. This achievement is ascribed to the divine aid (xvii, 46, 47). In 2 Sam. xxi, 19, "Goliath the Gittite, the staff of whose spear was like a weaver's beam," is said to have been slain by Ellhanan, a chief in David's army. This apparent contradiction the common version tries to get over by inserting words to make this Goliath the brother of him whom David put to death. Some suppose that the former was a descendant of the latter, bearing the same, perhaps a family name. See, however, the parallel passage in 1 Chron. xx, 5. Other giants of the Philistines are mentioned in the passage before cited, 2 Sam. xxi, 16 sq., namely: 1. "Ishbi-benob, which was of the sons of the giant, the weight of whose spear weighed three hundred shekels of brass, he being girded with a new sword, thought to have slain David; but Abishai, the son of Zeruiah, scoured him, and smote the Philistine and killed him." 2. Saph, who was of the sons of the giant, and was slain by Sibbechai. 3. "A man of great stature, that had on every hand six fingers and on every foot six toes, four and twenty in number, and he also was born to the giant; and when he defied Israel, Jonathan, the son of Shimeah, the brother of David, slew him." These four were sons of the giant in Gath, that is, probably of the Goliath of Gath whom David slew (1 Kings xx, 8; 2 Sam. xx, 22; 1 Sam. xvii, 4). See each of these names in their alphabetical order.

4. Another race is mentioned in Deut. ii, 10, the *Emim* (אֱמִיטִים), who dwelt in the country of the Moabites. They are described as a people "great and many, and tall as the Anakims, which were also accounted giants" (Gen. xiv, 5). See EMIM.

5. The *Zamzumim* also (זַמְזָמִים) (Deut. xxi, 20), whose home was in the land of Ammon—"That also was accounted a land of giants: giants dwelt therein of old time, and the Ammonites called them Zamzumims, a people great and many, and tall as the Anakims; but the Lord destroyed them before them, and

they (the Israelites) succeeded them, and dwelt in their stead." See ZAMZUMIM.

6. The only other passage where the term "giant" occurs (except as a rendering of *gigas* in Judith vi, 6; Wisd. xiv, 7; Ecclus. xvi, 7; xlvii, 4; Bar. iii, 26; 1 Macc. iii, 3) is Job xvi, 14, where the original is גִּבּוֹרִים, elsewhere "a mighty man," i. e. champion or hero. See GIBBORIM.

All nations have had a dim fancy that the aborigines who preceded them, and the earliest men generally, were of immense stature. Berosus says that the ten antediluvian kings of Chaldaea were giants, and we find in all monkish historians a similar statement about the earliest possessors of Britain (comp. Homer, *Od.* x, 119; Augustine, *De Civ. Dei*, xv, 9; Pliny, vii, 16; Varro, *ap. Aul. Gellius*, iii, 10; Jerome on Matt. xxvii). The great size decreased gradually after the Deluge (2 Esdr. v, 52-55). That we are dwarfs compared to our ancestors was a common belief among the Latin and Greek poets (*Il.* v, 302 sq.; Lucret. ii, 1151; Virg. *Æn.* xii, 900; Juv. xv, 69). On the origin of the mistaken supposition there are curious passages in Natalis Comes (*Mytholog.* vi, 21) and Macobius (*Saturn.* i, 20). See NIMROD. At an early period and under favorable circumstances, individuals, and even tribes, may have reached an unusual height and been of extraordinary strength. This was in great part, no doubt, owing to the simpler mode of life and more hardy habits that prevailed in early times. But many things concur to show that the size of the race did not differ materially from what it is at present. This is seen in the remains of human beings found in tombs, especially among the mummies of Egypt. To the same effect is the size of ancient armor, as well as architectural dimensions, and the measures of length which have been received from antiquity. Ancient writers who are free from the influence of fable are found to give a concurrent testimony. "Homer, when speaking of a fine man, gives him four cubits in height and one in breadth; Vitruvius fixes the usual standard of a man at six Roman feet; Aristotle's admeasurement of beds was six feet" (Millingen's *Curiosities of Medical Experience*, p. 14). No one has yet proved by experience the possibility of giant races, materially exceeding in size the average height of man. There is no great variation in the ordinary standard. The most stunted tribes of Esquimaux are at least four feet high, and the tallest races of America (e. g. the Guayaquilists and people of Paraguay) do not exceed six feet and a half. It was long thought that the Patagonians were men of enormous stature, and the assertions of the old voyagers on the point were positive. For instance, Pigafetta (*Voyage round the World*, Pinkerton, xi, 314) mentions an individual Patagonian so tall that they "hardly reached to his waist." Similar exaggerations are found in the voyages of Byron, Wallace, Carteret, Cook, and Forster; but it is now a matter of certainty, from the recent visits to Patagonia (by Winter, captain Snow, etc.), that there is nothing at all extraordinary in their size. The general belief (until very recent times) in the existence of fabulously enormous men arose from fancied giant-graves (see De la Valle's *Travels in Persia*, ii, 89), and, above all, from the discovery of huge bones, which were taken for those of men, in days when comparative anatomy was unknown. Even the ancient Jews were thus misled (Josephus, *Ant.* v, 2, 3). Augustine appeals triumphantly to this argument, and mentions a molar tooth which he had seen at Utica a hundred times larger than ordinary teeth (*De Civ. Dei*, xv, 9). No doubt it once belonged to an elephant. Vives, in his commentary on the place, mentions a tooth as big as a fist which was shown at St. Christopher's. In fact, this source of delusion has only very recently been dispelled (Martin's *West Islands*, in Pinkerton, ii, 691). Most bones which have been exhib-

ited have turned out to belong to whales or elephants, as was the case with the vertebra of a supposed giant examined by Sir Hans Sloane in Oxfordshire. On the other hand, isolated instances of monstrosity are sufficiently attested to prove that beings like Goliath and his kinsmen may have existed. Columella (*R. R.* iii, § 2) mentions Navius Pollio as one, and Pliny says that in the time of Claudius Cesar there was an Arab named Gabbaras nearly ten feet high, and that even he was not so tall as Pudio and Secundilla in the reign of Augustus, whose bodies were preserved (vii, 16). Josephus tells us that, among other hostages, Artabanus sent to Tiberius a certain Eleazar, a Jew, surnamed "the Giant," seven cubits in height (*Ant.* xviii, 4, 5). Porus, the Indian king, was five cubits in height (Arrian, *Exp. Al.* v, 19). Nor are well-authenticated instances wanting in modern times. Delrio says he saw in 1572 a man from Piedmont whose height exceeded nine feet (*Not. ad Senec. Ed.* p. 39). O'Brien, whose skeleton is preserved in the Museum of the College of Surgeons, must have been eight feet high, but his unnatural height made him weakly. On the other hand, the blacksmith Parsons, in Charles II's reign, was seven feet two inches high, and also remarkable for his strength (Fuller's *Worthies*, Staffordshire). The tallest person of whom we have a trustworthy record did not, according to Haller, exceed nine feet. Schreber, who has collected the description of the principal modern giants, found few above seven feet and a half, although he mentions a Swedish peasant of eight feet Swedish measure; and one of the guards of the duke of Brunswick was eight feet six inches Dutch. Such well-known instances as those of Daniel Lambert and others in modern museums probably come fully up to any of the measures of the Biblical giants. See art. Giant in the *Encyclopædia Metropolitana*; Whiston, "On the old Giants," *Auth. Records*, ii, 872-938; Prichard, *Researches into the Physical History of Mankind*, i, 358 (1836).—Kitto, s. v.; Smith, s. v.

**Gib, ADAM**, one of the founders of the anti-burgher secession in Scotland, was born in Perthshire in 1713, and educated in Edinburgh. He was a bitter opponent of private church patronage, and in 1733 was dismissed from his pastoral charge. He was made pastor of a secession church in Edinburgh in 1741, and when the dispute began in 1746 about the swearing of the oaths of burgesses, Mr. Gib was considered the ablest advocate of the anti-burgher party. He died in 1788. He published *A Display of the Secession Testimony* (1744, 2 vols. 8vo):—*Sacred Contemplations*, with an essay appended on Liberty and Necessity in reply to Lord Kames (1786).—Allibone, *Dictionary of Authors*, i, 660; Rose, *New General Biographical Dictionary*, viii, 18.

**Gib'bar** (Chald. *Gibbar'*, גִּבְבָּר, for Heb. גִּבְיָר, a *hero*, as in Dan. iii, 20; Sept. Γαββάρ, Vulgate *Gebbar'*), given as the name of a man whose descendants to the number of 95 returned with Zerubbabel from Babylon (Ezra ii, 20), probably an error for the remnants of the natives of GIBEON (Neh. vii, 25).

**Gib'bethon** (Hebrew *Gibbethon'*, גִּבְתֹּן, a *height*; Sept. Γαβθών v. r. Γαβθών, Γαβθών, Γεθθών and Βεγεθών), a city of the Philistines, which was included in the territories of the tribe of Dan (Josh. xix, 44), and was assigned, with its "amburs," to the Kohathite Levites (Josh. xxi, 23). It was still in the hands of the Philistines in the time of Nadab, king of Israel, who besieged it, and was slain under its walls by Baasha, one of his own officers (1 Kings xv, 27). B.C. 950. The effort to expel the Philistines seems to have been continued by the forces of the northern kingdom, till the siege was finally raised by Omri in consequence of the necessity of pursuing the usurper Zimri (1 Kings xvi, 15). B.C. 926. It is said by Eusebius and Jerome (apparently even to their time) to be inhabited

by Gentiles (πῶν Ἀλλοφύλων Γαβαζών), but they expressly distinguish this from the Danite town, and they seem uncertain whether to identify it with a village (πολίτην) called *Gabe* (Γαβέ), about 16 R. miles from Cæsarea, near the great plain of *Legio*, or with one of two or three other places named *Gabbatha* (*Onomast.* s. v. Γαβαζών, *Gabathon*). Josephus (*Ant.* viii, 12, 5) calls it *Gabathone* (Γαβαζώνη). The signification of the name and the great strength of the place seem to fix it upon the hills west of Gibeah of Benjamin (with which M. D. Sauley confounds its locality, *Narrative*, i, 98). It is possibly the modern large village *Saidon*, a short distance beyond the well S.E. of Ramleh (Robinson, *Researches*, iii, 21). Van de Velde calls it also *Sheik Musu* (*Memoir*, p. 114).

**Gibbites**, THE, a small fanatical sect in Scotland about 1681, named from their leader, John Gib, a sailor. They never exceeded thirty persons. Their doctrines were a compound of Quaker ideas, with some of the extreme speculative views of the strict Covenanters. They were seized as a body, put into the House of Correction, and soon ceased to exist as a sect.—Hetherington, *Church of Scotland*, ii, 114.

**Gibbon, EDWARD**, historian, was born at Putney, in Surrey, April 27, 1737. He was sent to Oxford too young, and did not learn much there. At sixteen he embraced Romanism. He was immediately placed under the care of a Calvinist minister at Lausanne, whose instructions led him in a few months back to Protestantism. "The five years he spent at Lausanne, closing in 1758, when he was just of age, formed the real commencement of his education; and at their close, he was not only a ripe scholar in French and Latin, but possessed of an extraordinary amount of historical and other information. He found leisure, however, for falling in love, unsuccessfully, with a young lady, who afterwards became the wife of M. Necker, and the mother of Madame de Staël. For several years after Gibbon's return to England he lived chiefly at his father's house in Hampshire, and, failing in attempts to obtain diplomatic employment, he accepted a militia commission, attended zealously to his duties, and rose to be lieutenant colonel. But the studious habits and literary ambition which he had acquired never flagged. In 1761 he published, in French, a short essay *On the Study of Literature*. He extended his acquaintance with English authors, and, beginning to learn Greek thoroughly, pursued the study zealously, when, in 1763, he was allowed again to visit the Continent. In Rome, next year, he conceived the design of his great historical work. Returning home in 1765, he passed some years unsatisfactorily to himself, but not without much improvement both in knowledge and in skill of writing. In 1774 he entered the House of Commons, in which he sat for eight sessions; and he was rewarded for his silent votes in favor of Lord North's administration by holding for three years a seat at the Board of Trade. In 1770 he published, in answer to Warburton, his spirited *Dissertation on the Sixth Book of the Æneid*. In the same year, the death of his father placed him in possession of a fortune, which, though embarrassed, he was able to extricate so far that it afforded a handsome competence, and enabled him to devote himself exclusively to study and composition. In 1776 he published the first volume of *The History of the Decline and Fall of the Roman Empire*, the first edition of which was sold in a few days, and was rapidly followed by others. The second and third volumes, appearing in 1781, brought down the narrative to the fall of the Western Empire; and for a while the author hesitated whether he should not here allow the work to drop" (Rich, *Biog.* s. v.). He resumed the design, however, in 1783, when he fixed his abode at Lausanne, and prepared the remaining volumes, the last of which appeared in 1788. He died January 16, 1794, during his last visit to England. His posthumous

works were published by his friend Lord Sheffield. The best editions of the "Decline and Fall" are that of Milman (Lond. 1846, 6 vols. 8vo, 2d edit.), and that by Dr. Wm. Smith (1855, 8 vols. 8vo). In a literary point of view, the merits of this history are very great; its style has a loftiness in harmony with the grandeur of the theme; its erudition is vast to a degree unknown before in English writers of history; its arrangement is luminous, and its execution is sustained at the same point of excellence throughout. But Gibbon was an infidel, and his unbelief lurks in every page of his work where Christianity is nearly or remotely touched on. His skepticism leads him into manifold displays of unfairness, and even into inaccuracies, many of which are corrected in Milman's notes. Dr. J. M. Macdonald wrote an able article in the *Bibliotheca Sacra* (July, 1868), defending Gibbon from the charge of infidelity, and seeking to account for the opposite opinion about him so generally adopted. The attempt is very ingenious, but will not shake the established opinion.—Milman, *Life of E. Gibbon* (Lond. 1839, 8vo); *Quarterly Review*, xii, 375; lxii, 196; *Literary and Theol. Review*, ii, 38; *Christian Review*, xiii, 34; *National Review*, Jan. 1856.

**Gibbons**, THOMAS, D.D., a pious and eminent English dissenter, was born at Reak, near Cambridge, in 1720. His father, who was pastor of a Congregational church at Olney, in Bucks, gave him the best education his circumstances would permit. In 1742 he became acquainted with Dr. Isaac Watts; and by showing him a volume of poems in manuscript, an intimate friendship was formed between them, which continued unabated to the close of Dr. Watts's life. In 1743 Dr. Gibbons was called to the pastoral charge of the Independent church meeting in Haberdashers' hall, Cheapside, which he held till his death, Feb. 22, 1785. He wrote *Memoirs of Dr. Watts* (1780, 8vo);—*Poems, on several Occasions* (1743);—*Rhetoric; or, a View of its principal Tropes and Figures, in their Origin and Powers* (1767, 8vo);—*Hymns* (1769);—*Hymns*, second series, entirely original (1784);—*Lives and Memoirs of eminently pious Women* (1777, 2 vols. 8vo). After Dr. Gibbons's death, three volumes of sermons by him were published in 8vo by subscription. Some of his hymns are still used, and will continue to hold their place in Christian song.—Jones, *Christian Biography*, p. 177; Darling, *Cyclop. Bibliograph.* i, 1244.

**Gibborim**, plur. of גִּבּוֹרִים, *Gibbor'*, a warrior (Isa. iii, 2; Ezek. xxxix, 20); especially spoken of David's noted braves or "mighty men" (2 Sam. xxiii, 8; 1 Kings i, 8; 1 Chron. xi, 26; xxix, 24). See CHAMPIONS. The sons of the marriages mentioned in Gen. vi, 1-4, are called *Gibborim'* (גִּבּוֹרִים, from גָּבַר, *to be strong*), a general name meaning *powerful* (ὀβρισταὶ καὶ πάντος ὑπεροπταὶ καλοῦ, Josephus, *Ant.* i, 3, 1; γῆς παίδες τὸν νοῦν ἐκθίβασαντες τοῦ λογίζεσθαι κ. τ. λ., Philo, *De Gigant.* p. 270; comp. Isa. xlix, 24; Ezek. xxxii, 21). They were not necessarily *giants* in our sense of the word (Theodoret, *Quæst.* 48). Yet, as was natural, these powerful chiefs were almost universally represented as men of extraordinary stature. The Sept. renders the word γίγαντες, and call Nimrod a γίγας κενητός (1 Chron. i, 10); Augustine calls them *Staturosi* (*De Civ. Dei*, xv, 4); Chrysostom ἦρωες εὐμήκεις, Theodoret παρμεγέθεις (comp. Bar. iii, 26, εὐμεγέθεις, ἐπιστάμενοι πόδεμον).

These beings are chiefly interesting as connected with the question, Who were their parents, "the sons of God" (בְּנֵי הָאֱלֹהִים)? The opinions respecting the import of this latter title are various: (1.) *Men of power* (οἱ ἐνασπενόνηρον, Symm., Jerome, *Quæst. Heb.* ad loc.; בְּנֵי הָאֱלֹהִים, Onk.; בני שלטניה, Samar.; so too Selden, Vorst, etc.), (compare Psa. ii, 7; lxxii, 6; lxxxix, 27; Mic. v, 5, etc.). The expression will then exactly resemble Homer's Διογενεῖς Βασιλῆς, and the Chinese *Tián-tseï*, "son of heaven," as

a title of the emperor (Gesenius, s. v. 𐤓𐤁). But why should the union of the high-born and the low-born produce offspring unusual for their size and strength? (2.) *Men with great gifts*, "in the image of God" (Ritter, Schumann); (3.) *Cainites arrogantly assuming the title* (Paulus); or (4.) *the pious Sethites* (comp. Gen. iv, 26; Maimon. *Mor. Nebuch.* i, 14; Suidas, s. v. Σιθ and μαγαμίας; Cedren. *Hist. Comp.* p. 10; Augustine, *De Civ. Dei*, xv, 23; Chrysost. *Hom.* 22, in Gen.; Theod. in Gen. *Quæst.* 47; Cyril, c. Jul. ix, etc.). A host of modern commentators catch at this explanation, but Gen. iv, 26 has probably no connection with the subject. Other texts quoted in favor of the view are Deut. xiv, 1, 2; Psa. lxxiii, 15; Prov. xiv, 26; Hos. i, 10; Rom. viii, 14, etc. Still the mere antithesis in the verse, as well as other considerations, tend strongly against this gloss, which indeed is built on a foregone conclusion. Compare, however, the Indian notion of the two races of men Suras and Asuras (children of the sun and of the moon, Nork, *Erasm. und Rabb.* p. 204 sq.), and the Persian belief in the marriage of Jemshid with a sister of a *der*, whence sprang black and impious men (Kaïsch, *Gen.* p. 175). 5. Worshipers of false gods (παίδες τῶν θεῶν, Aqu.) making אֲנָשִׁים = "servants" (comp. Deut. xiv, 1; Prov. xiv, 26; Exod. xxxii, 1; Deut. iv, 28, etc.). This view is ably supported by Poole in *Genesis of Earth and Man*, p. 39 sq. (6.) Devils, such as the Incubi and Succubi. Such was the belief of the Cabbalists (Valesius, *De S. Philosoph.* cap. 8). That these beings can have intercourse with women St. Augustine declares it would be folly to doubt, and it was the universal belief in the East. Mohammed makes one of the ancestors of Balkis, queen of Sheba, a demon, and Damir says he had heard a Mohammedan doctor openly boast of having married in succession four daemon wives (Bochart, *Hieroz.* i, p. 747). Indeed, the belief still exists (Lane's *Mod. Eg.* i, ch. x, ad in.). (7.) Closely allied to this is the oldest opinion, that they were *angels* (Sept. ἄγγελοι τοῦ θεοῦ, for such was the old reading, not οἰοί, August. *De Civ. Dei*, xv, 23; so too Josephus, *Ant.* i, 3, 1; Philo, *De Gig.* ii, 358; Clem. *Strom.* iii, 7, 69; Sulp. Sever. *Hist. Script.* in *Orthod.* i, 1, etc.; compare Job i, 6; ii, 1; Psa. xxix, 1; Job iv, 18). The rare expression "sons of God" certainly means angels in Job xxxviii, 7; i, 6; ii, 1; and that such is the meaning in Gen. vi, 4 also, was the most prevalent opinion both in the Jewish and early Christian Church. It seems, however, to be directly negated by Matt. xxii, 30. See SONS OF GOD.

It was probably this very ancient view which gave rise to the spurious book of Enoch, and the notion quoted from it by Jude (6), and alluded to by Peter (2 Pet. ii, 4; compare 1 Cor. xi, 10; Tertul. *De Virg. Vel.* 7). According to this book, certain angels, sent by God to guard the earth (Ἐρωήγοροι, φύλακτες), were perverted by the beauty of women, "went after strange flesh," taught sorcery, finery (*lumina lapillorum, circulos ex aure*, Tertullian, etc.), and, being banished from heaven, had sons 3000 cubits high, thus originating a celestial and terrestrial race of demons—"Unde modo vagi subvertunt corpora multa" (Commodian *Instruct.* III, *Cultus Demonum*), i. e. they are still the source of epilepsy, etc. Various names were given at a later time to these monsters. Their chief was Leuias, and of their number were Machsael, Aza, Shemchozai, and (the wickedest of them) a goat-like demon Azazel (compare Azazel, Lev. xvi, 8; and for the very curious questions connected with this name, see Bochart, *Hieroz.* i, 652 sq.; Rab. Eliezer, cap. 23, *Bereshith Rab.* ad Gen. vi, 2; Sennert, *De Gigantibus*, iii). See ASMODEUS.

Against this notion (which Hävernäck calls "the silliest whim of the Alexandrian Gnostics and Cabbalistic Rabbis," *Introd. to Pentateuch*, p. 345) Heidegger (*Hist. Patr.* l. c.) quotes Matt. xxii, 30; Luke xxiv, 39, and similar testimonies. Philastrius (*Adv. Hæres.*

cap. 108) characterizes it as a heresy, and Chrysostom (*Hom.* 22) even calls it τὸ βλάσφημον ἱκεῖνο. Yet Jude (ver. 6, 7) is explicit, and the question is not so much what *can* be, as what *was* believed. The fathers almost unanimously accepted these fables, and Tertullian argues warmly (partly on *expedient* grounds!) for the genuineness of the book of Enoch. The angels were called Ἐγγήγοροι, *watchers*, a word used by Aquil, and Symm. to render the Chaldee ܘܢܘܢ (Dan. iv, 13 sq.; Vulg. *Vigil*; Sept. εἰσ; Lex Cyrilli, ἀγγέλοι ἢ ἀγγονοί; Fabric. *Cod. Pseudepigr.* V. T. p. 180), and therefore used, as in the Zend-Avesta, of good guardian angels, and applied especially to archangels in the Syriac liturgies (compare ܘܢܘܢ, Isa. xxi, 11), but more often of evil angels (Castelli *Lex. Syr.* p. 649; Scaliger, *ad Euseb. Chron.* p. 403; Gesenius, *Theos. s. v.* ܘܢܘܢ). The story of the Egregori is given at length in Tertull. *De Cult. Fem. i.* 2; ii, 10; Commodianus, *Instruct.* iii.; Lactant. *Div. Inst.* ii, 14; *Testam. Patriarc.* c. v., etc. Every one will remember the allusions to the same interpretation in Milton, *Par. Reg.* ii, 179:

"Before the Flood, thou with thy lusty crew,  
False-titled sons of God, roaming the earth,  
Cast wanton eyes on the daughters of men,  
And coupled with them, and begat a race."

The use made of the legend in some modern poems deserves to be severely reprobated. See ANGEL.

We need hardly say how closely allied this is to the Greek legends which connected the ἄγρια ὄντα γιγάντων with the gods (Homer, *Od.* vii, 205; Pausan. viii, 29), and made *καίμονες* sons of the gods (Plato, *Apolog.* ἡμίθεοι; Cratylus, § 32). Indeed, the whole heathen tradition resembles the one before us (Cumberland's *Sanchoiathko*, p. 24; Homer, *Od.* xi, 306 sq.; Hesiod, *Theog.* 185, *Opp.* et *D.* 144; Plato, *Rep.* ii, § 17, 604 E.; *De Legg.* iii, § 16, 805 A.; Ovid, *Metam.* i, 151; Lucan, iv, 293; Lucian, *De Deā Syr.*, etc.; compare Grotius, *De Ver.* i, 6); and the Greek translators of the Bible make the resemblance still more close by introducing such words as θεόμαχοι, γιγάντες, and even Τιτῶνες, to which last Josephus (*l. c.*) expressly compares the giants of Genesis (Sept. at Prov. ii, 18; Psa. xlviii, 2; 1 Sam. v, 18; Judith xvi, 5). The fate, too, of these demon-chiefs is identical with that of heathen story (Job xxvi, 5; Sir. xvi, 7; Bar. iii, 26-28; Wisd. xiv, 6; 3 Macc. ii, 4; 1 Pet. iii, 19). See DÆMON.

These legends may therefore be regarded as distortions of the Biblical narrative, handed down by tradition, and embellished by the fancy and imagination of Eastern nations (Thomson, *Land and Book*, ii, 395 sq.). The belief of the Jews in later times is remarkably illustrated by the story of Asmodeus in the book of Tobit. It is deeply instructive to observe how wide and marked a contrast there is between the incidental allusion of the sacred narrative (Gen. vi, 4), and the minute frivolities or prurient follies which degrade the heathen mythology, and repeatedly appear in the groundless imaginings of the Rabbinic interpreters. If there were fallen angels whose lawless desires gave birth to a monstrous progeny, both they and their intolerable off-spring were destroyed by the deluge, which was the retribution on their wickedness, and they have no existence in the baptized and renovated earth.—Smith, s. v. Giants. See GIANT.

**Gibbs**, JOSIAH W., LL.D., professor in the theological department of Yale College, was born in Salem, Mass., April 30, 1790. He graduated at Yale College in 1809, and was tutor in the College from 1811 till 1815. He then spent some years at Andover, Mass., devoting himself to the study of Hebrew and Biblical literature. While there he published a translation of Storr on *The Historical Sense of the New Testament* (Boston, 1817, 12mo), and also prepared a translation of Gesenius's *Hebrew-Lexicon*, which appeared in 1824; also London, 1827, 2d edit. 1832; in abridged form, *Manual Hebrew and English Lexicon*, including

*Biblical Chaldee*, 1828; 2d edit. enlarged, New Haven, 1832, 8vo. In 1824 he was called to be lecturer of sacred literature in the theological school of Yale College. In 1826 a professorship in that branch was founded, to which Mr. Gibbs was called. He remained in this post until his death, March 25, 1861, at New Haven. Professor Gibbs was a constant contributor to periodicals, especially on the points of Biblical criticism, archaeology, and philological science. Many of his valuable papers appeared in newspapers, often anonymously. Others were published in the *Christian Spectator*, *Biblical Repository*, *New Englander*, and *American Journal of Science*. During his later years his attention was chiefly given to comparative grammar, and in this branch, as in every other which he touched, his work was that of a thorough scholar. For several years he was one of the publishing committee of the American Oriental Society. Some of his essays were collected, with additions, under the title *Philological Studies, with English Illustrations* (New Haven, 1856), and *Teutonic Etymology* (New Haven, 1860).—Fisher, in *New Englander*, July, 1861, art. ii,

**Gib'eä** (Heb. *Giba'*, גִּבְעָא, *hill*; Sept. Γαιβᾶ v. r. Γαιβᾶ), a place built or occupied in connection with Machbenai by Sheva, son of Caleb's concubine Maachah (1 Chron. ii, 49); hence probably the same with GIBEAH (q. v.) of Judah (Josh. xv, 57).

**Gib'eāh** (Heb. *Gibak'*, גִּבְעָא, *a hill*, as the word is sometimes rendered; likewise the Sept., which usually has Γαιβᾶ, but in Josh. xviii Γαιβαῖς; Josephus Γαιβᾶθ, *Ant.* vi, 4, 6), the name of three cities, all doubtless situated on hills. The term is derived, according to Gesenius (*Theos.* p. 259, 266), from a root, גִּבְעָ, signifying to be round or humped (compare the Latin *gibbus*, Eng. *gibbous*; the Arabic *jebel*, a mountain, and the German *gipfel*). It is employed in the Heb. Bible to denote a "hill," that is, an eminence of less considerable height and extent than a "mountain," the term for which is הַר, *har*. For the distinction between the two terms, see Psa. cxlviii, 9; Prov. viii, 25; Isa. ii, 2; xl, 4, etc. In the historical books *gibeah* is commonly applied to the bald, rounded hills of Central Palestine, especially in the neighborhood of Jerusalem (Stanley, *Palest. App.* § 25). There is no lack of the corresponding name among the villages of Central Palestine. Several of these are merely mentioned as appellatives:

(1.) The "hill of the foreskins" (Josh. v, 3), between the Jordan and Jericho; it derives its name from the circumcision which took place there, and the vicinity since afterwards to have received the name of GILGAL (q. v.).

(2.) "The hill" of Kirjath-jearim, a place in which the ark remained from the time of its return by the Philistines till its removal by David (2 Sam. vi, 3, 4; comp. 1 Sam. vii, 1, 2). See KIRJATH-JEARIM.

(3.) The hill of Moreh (Judg. vii, 1). See MOREH.

(4.) The hill of God—Gibeah ha-Elohim (1 Sam. x, 5); one of the places in the route of Saul, which is so difficult to trace. In verses 10 and 13 it is apparently called "the hill," and "the high place." See ELOHIM.

(5.) The hill of Hachilah (1 Sam. xxiii, 19; xxvi, 1). See HACHILAH.

(6.) The hill of Ammah (2 Sam. ii, 24). See AMMAH.

(7.) The hill of Gareb (Jer. xxxi, 39). See GAREB.—Smith, s. v.

**GIBEAH OF BENJAMIN** is historically the most important of the places bearing this name. It is called "Gibeah of Benjamin" (1 Sam. xiii, 15; 2 Sam. xxiii, 29) and "Gibeah of Saul" (1 Sam. xi, 4; Isa. x, 19; λόφος Σαούλ, Josephus, *War.* v, 2, 1); also "Gibeah of God," rendered hill of God (1 Sam. x, 5); and GIBEATH (Josh. xviii, 28, where it is enumerated

among the last group of the towns of Benjamin, next to Jerusalem). This last name (גִּבְעָה, which frequently appears elsewhere in the original), being the form of GIBEAH in the construct state, has been joined by some to the following name, i. e. "Gibeah of Kirjath-jearim" (Schwarz, *Phys. Descrip. of Palestine*, p. 132); but these two cities are evidently counted separately in the text. Others regard "Gibeah" here as a mere appellative denoting some hill near Kirjath-jearim (compare 1 Sam. vii, 1, 2). This city is often mentioned in Scripture (Hos. v, 8; ix, 9; x, 9; 1 Sam. x, 26). It was the scene of the atrocious crime which involved in its consequences almost the entire extirpation of the tribe of Benjamin (Judg. xix, 12-30; xx, 1-48). It soon recovered from that eventful siege and sack. It was the birth-place of Saul, and continued to be his residence after he became king (1 Sam. x, 26; xi, 4; xv, 33; xxiii, 19; xxvi, 1); and it was doubtless on account of this its intimate connection with Saul that the Gibeonites hanged up here his seven descendants (2 Sam. xxi, 6). An erroneous translation of the name has led to the misapprehension that this was the scene of Jonathan's romantic exploits against the Philistines (1 Sam. xiv). See GEBÄ. Like Bethel, it seems to have been reckoned among the ancient sanctuaries of Palestine (1 Sam. x, 5, 6; xv, 34; xxiii, 19; xxvi, 1; 2 Sam. xxi, 6-10). The inhabitants were called Gibeathites (1 Chron. xii, 3). Josephus locates it twenty (*Ant.* v, 2, 8) or thirty (*War.* v, 2, 1, Γαβαθασούλη) stadia north of Jerusalem. Jerome speaks of Gibeah as, in his time, level with the ground (*Ep.* 86, *ad Eustoch.*), and since then it does not appear to have been visited by travellers till recently. Dr. Robinson at first identified it with *Jeba*, a half-ruined place about five miles north by east of Jerusalem (*Researches*, ii, 114); but he afterwards retracted this position as being that of GEBÄ (*Bibliotheca Sacra*, 1844, p. 598); and he has finally fixed upon *Tell el-Ful*, about four miles north by west of Jerusalem, as the site of Gibeah of Saul (new ed. of *Researches*, iii, 286). *Tell el-Ful* ("hill of the bean") is a high knoll, with a curiously knobbed and double top, having a large heap of stones upon it. There seems to have originally been here a square tower, fifty-six feet by forty-eight, built of large unhewn stones, and apparently ancient; this has been thrown down, and the stones and rubbish, falling outside, have assumed the form of a large pyramidal mound. No trace of other foundations is to be seen. The spot is slightly, and commands a very extensive view of the country in all directions, especially towards the east. There are no other remains around the hill itself; but a few rods further west, directly upon the great road as it enters the lower plain or valley, there are seen a number of ancient substructions, consisting of large unhewn stones in low massive walls. Probably the ancient city extended down from the hill on this side and included this spot (Robinson, in *Researches* and *Biblioth. Sacra*, ut sup.; Stanley's *Palestine*, p. 210). The ancient road from Jerusalem to Bethel and Shechem passes close along its western base, and Ramah is in full view on another hill two miles further north (*Handbook of S. and P.* p. 325). The narrative of the Levite's journey is thus made remarkably graphic. He left Bethlehem in the afternoon to go home to Mount Ephraim. Two hours' travel (six miles) brought him alongside Jerusalem. Evening was now approaching. His servant advised him to lodge in Jebus, but he declined to stop with strangers, and said he would pass on to Gibeah or Ramah. The "sun went down upon them when they were by Gibeah," and they resolved to pass the night there (Judg. xix). The site of Gibeah was well adapted to form the capital of Israel during the troublous times of Saul, when the whole country was overrun by the hostile bands of the Philistines. It was naturally strong, it was on the very crest of the mountain range, and it commanded a wide

view, so that Saul's watchmen could give timely notice of the approach of the enemy.

2. GIBEAH OF JUDAH, situated in the mountains of that tribe (*Josh.* xv, 57, where it is named with Maon and the southern Carmel; compare 1 Chron. ii, 49), which, under the name of *Gabatha* (Γαβαθά), Eusebius and Jerome place twelve Roman miles from Eleutheropolis, and state that the grave of the prophet Habakkuk was there to be seen (*Onomasticon*, s. v. Γαβαθά, Gabaath; although they there confound it with the Gibeah of Phinehas in Ephraim, and elsewhere [s. v. Κελλά, Ceila] state that Habakkuk's tomb was shown in Keilab), or, more probably, one of those by a similar name (Γαβαά, Γαβαθά) lying in the Daroma or near Bethlehem (*ib.* s. v. Γαβαθών, Gabathon). Dr. Robinson (*Researches*, ii, 327) identifies it with the village of *Jebah*, which stands upon an isolated hill, in the midst of wady el-Mussur, about ten miles south-west of Jerusalem; but this is too far from the associated names in Joshua, which require a location south-east of Hebron (Keil, *Comment.* ad loc.), possibly at the ruins on a mound with caves marked as *Erfäijeh* on Van de Velde's *Map* east of tell Zif. See JUDAH.

3. GIBEAH OF PHINEHAS, in Mount Ephraim, where the high-priest Eleazar, son of Aaron, was buried by his son Phinehas (*Josh.* xxiv, 33, where the name is rendered "hill of Phinehas"). Eusebius and Jerome (*Onomast.* s. v. Γηβθά, Gebin) probably mention this place by the name of *Geba* (although they incorrectly identify this with the Gebim of Isa. x, 31) (s. v. "Gebim"), five Roman miles from Gophna, on the road to Neapolis (Shechem), which was itself fifteen Roman miles north of Jerusalem. Josephus appears also to allude to it (Γαβαθά, *Ant.* v, 1, 20). Dr. Robinson (*Researches*, iii, 80, note) finds it in a narrow valley called *wady el-Jib*, the *Geb* of Maundrell, lying just midway on the road between Jerusalem and Shechem; the indication of direction in the *Onomasticon* agrees with the position of the village *Jibea* (located on that wady), west of the Nablús road, half way between Bethel and Shiloh (Van de Velde, *Memoir.* p. 315), but the distance still better suits that of the Moslem ruined village *Jibá*, west of this (Robinson, *Researches*, iii, Append. p. 125; Van de Velde, *Map*).

Gib'eäth (*Josh.* xviii, 28). See GIBEAH 1.

Gib'eäthite (Heb. with the article *hag-Gibathi'*, גִּבְעָתִיתִי; Sept. ὁ Γαβαθίτης v. r. Γαβαθίτης, Γεβωθίτης), the designation of a native of Gibeah (1 Chron. xii, 3); in this case, Shemaah, or "the Shemaah," father of two Benjaminites, "Saul's brethren," who joined David. See GIBEAH 1.

Gib'eön (Heb. *Gibon'*, גִּבְעוֹן, *hill-city*; Sept. Γαβαών, Josephus Γαβαώ), one of the four cities of the Hivites, the others being Beeroth (omitted by Josephus, *Ant.* v, 2, 16), Clephirah, and Kirjath-jearim (*Josh.* ix, 17). See CANAANITE. Its inhabitants made a league with Joshua (ix, 3-15), and thus escaped the fate of Jericho and Ai (comp. xi, 19). See GIBEAONITE. It appears, as might be inferred from its taking the initiative in this matter, to have been the largest of the four—"a great city, like one of the royal cities"—larger than Ai (x, 2). Its men, too, were all practiced warriors (*Gibborim*, גִּבְרִים). Gibeon lay within the territory of Benjamin (xviii, 25), and with its "suburbs" was allotted to the priests (xxi, 17), of whom it afterwards became a principal station, where the tabernacle was set up for many years under David and Solomon (1 Chron. xvi, 39; xxi, 29; 2 Chron. i, 3), the ark being at the same time at Jerusalem (2 Chron. i, 4). For these and other notices in the historical books of Scripture, see below. From Jer. xli, 16, we may infer that after the destruction of Jerusalem by Nebuchadnezzar, Gibeon again became the seat of government. It produced prophets in the days of Jeremiah (*Jer.* xxviii, 1). After the captivity we find

the "men of Gibeon" returning with Zerubbabel (Neh. vii, 25; in the list of Ezra the name is altered to GIBBAR), and assisting Nehemiah in the repair of the wall of Jerusalem (iii, 7). In the post-Biblical times it was the scene of a victory by the Jews over the Roman troops under Cestius Gallus, which offers in many respects a close parallel with that of Joshua over the Canaanites (Josephus, *War*, ii, 19, 7; Stanley, *Palest.*, p. 212). In 2 Sam. v, 25 it would seem to be called GEBEA (where the error of the original has been followed by all the versions), as compared with 1 Chron. xiv, 16; but it is to be distinguished from both Geba and Gibeah. It is said (2 Sam. ii, 13) that there was a pool in Gibeon. Whether it were of any considerable extent does not appear from this passage; but there is little doubt that it is the same as "the great waters that are in Gibeon" (Jer. xli, 12). There was also a great stone or rock here (2 Sam. xx, 8), and also the great high place (1 Kings iii, 4). All this shows that Gibeon was situated on an eminence, as its name imports.

*Location.*—None of the scriptural passages mark the site of Gibeon; but there are indications of it in Josephus (*War*, ii, 19, 1), who places it 40 (*Ant.* vii, 11, 7) or 50 stadia north-west from Jerusalem, and in Jerome (*Ep.* 86, *ad Eustoch.*), which leave little doubt that Gibeon is to be identified with the place which still bears the name of *El-Jib*. The name *Gabaon* is indeed mentioned by writers of the time of the Crusades, as existing at this spot, and among the Arabs it then already bore the name of El-Jib, under which it is mentioned by Bohaedinn (*Vita Saladin*, p. 243). Afterwards it was overlooked by most travellers till the last century, when the attention of Pococke was again directed to it (*Description of the East*, ii, 49). The traveller who pursues the northern camel-road from Jerusalem, turning off to the left at Tuleil el-fül (Gibeah) on that branch of it which leads westward to Jaffa, finds himself, after crossing one or two stony and barren ridges, in a district of a more open character. The hills are rounder and more isolated than those through which he has been passing, and rise in well-defined mamelons from broad undulating valleys of tolerable extent and fertile soil. This is the central plateau of the country, the "land of Benjamin"; and these round hills are the Gibeahs, Gebas, Gibeons, and Ramahs, whose names occur so frequently in the records of this district. Retaining its ancient name almost intact, El-Jib stands on the northernmost of a couple of these mamelons, just at the place where the road to the sea parts into two branches, the one by the lower level of the wady Suleiman, the other by the heights of the Beth-horon, to Gimzo, Lydda, and Joppa. The road passes at a short distance to the north of the base of the hill of El-Jib. The strata of the hills in this district lie much more horizontal than those further south. With the hills of Gibeon this is peculiarly the case, and it imparts a remarkable precision to their appearance, especially when viewed from a height such as the neighboring eminence of neby Samwil. The houses stand very irregularly and unevenly, sometimes almost above one another. They seem to be chiefly rooms in old massive ruins, which have fallen down in every direction. One large building still remains, probably a former castle or tower of strength. The natural terraces are carried round the hill like contour lines: they are all dotted thick with olives and vines, and the ancient-looking houses are scattered over the flattish summit of the mound. On the east side of the hill is a copious spring, which issues in a cave excavated in the limestone rock, so as to form a large reservoir. In the trees farther down are the remains of a pool or tank of considerable size, probably, says Dr. Robinson, 120 feet by 700, i. e. of rather smaller dimensions than the lower pool at Hebron. This is doubtless the "pool of Gibeon," at which Abner and Joab met together with the troops of

Ishbosheth and David, and where that sharp conflict took place which ended in the death of Asahel, and led, at a later period, to the treacherous murder of Abner himself. Here or at the spring were the "great waters (or the many waters, מַיִם רַבִּים מַיִם)" of Gibeon" (both here and in 1 Kings iii, 4, Josephus substitutes Hebron for Gibeon, *Ant.* x, 9, 5; viii, 2, 1), at which Johanan, the son of Kareah, found the traitor Ishmael (Jer. xli, 12). Round this water also, according to the notice of Josephus (*ἐπι τῶν πηγῶν τῆς πόλεως οὐκ ἴστωθαι*, *Ant.* v, 1, 17), the five kings of the Amorites were encamped when Joshua burst upon them from Gilgal. The "wilderness of Gibeon" (2 Sam. ii, 24)—the *Midbar*, i. e. rather the waste pasture-grounds—must have been to the east, beyond the suburb of cultivated fields, and towards the neighboring swells, which bear the names of Jedireh and Bir Neballah. Such is the situation of Gibeon, fulfilling in position every requirement of the notices of the Bible, Josephus, Eusebius, and Jerome. Its distance from Jerusalem by the main road is as nearly as possible 6½ miles; but there is a more direct road reducing it to 5 miles (Robinson, *Res.* ii, 137, 138; Van de Velde, *Memoir*, p. 315; Thomson, *Land and Book*, ii, 546; Porter, *Handb. for Syria*, p. 225).

*Scriptural Incidents.*—Several of these are of such deep interest as to call for a detailed notice.

(1.) The name of Gibeon is most familiar to us in connection with the artifice by which its inhabitants obtained their safety at the hands of Joshua, and with the memorable battle which ultimately resulted therefrom. (See Kitto's *Daily Bible Illust.* ad loc.) This is the first mention of the place in Scripture, and the battle is considered "one of the most important in the history of the world" by Stanley, whose graphic description (*Jewish Church*, i, 266 sq.) we condense, slightly modified and illustrated.

The kings of Palestine, each in his little fastness, were roused by the tidings that the approaches to their territory in the Jordan valley and in the passes leading from it were in the hands of the enemy. Those who occupied the south felt that the crisis was yet more imminent than when they heard of the capitulation of Gibeon. Jebus or Jerusalem, even in those ancient times, was recognised as their centre. Its chief took the lead of the hostile confederacy. The point of attack, however, was not the invading army, but the traitors at home. Gibeon, the recreant city, was besieged. The continuance or the raising of the siege became the turning question of the war. The summons of the Gibeonites to Joshua was as urgent as words can describe, and gives the key-note to the whole movement (*Josh.* x, 6). Not a moment was to be lost. On the former occasion of Joshua's visit to Gibeon (*Josh.* ix, 16, 17), it had been a three-days' journey from Gilgal, as according to the slow pace of eastern armies and caravans it might well be. But now, by a forced march, "Joshua came unto them suddenly, and went up from Gilgal all night." When the sun rose behind him, he was already in the open ground at the foot of the heights of Gibeon, where the kings were encamped (according to Josephus, *Ant.* v, 1, 17) by a spring in the neighborhood. The towering hill, at the foot of which Gibeon lay, rose before them on the west. The besieged and the besiegers alike were taken by surprise (in the Samaritan version of Joshua, the warcry is given, "God is mighty in battle," ch. xx, xxi).

As often before and after, so now "not a man could stand before" the awe and panic of the sudden sound of that terrible shout. The Canaanites fled down the western pass, and "the Lord discomfited them before Israel, and slew them with a great slaughter at Gibeon, and chased them along the way that *goeth up* to Beth-horon." This was the first stage of the flight. It is a long, rocky ascent, sinking and rising more than once before the summit is gained. From the summit, which is crowned by the village of Upper Beth-horon,

Map of the scene of Joshua's great Battle at Gibeon and Beth-horon.

a wide view opens over the valley of Ajalon, which runs in from the plain of Sharon.

"And it came to pass, as they fled before Israel, and were in the going down to Beth-horon, that the Lord cast down great stones from heaven upon them unto Azekah." This was the second stage of the flight. The fugitives had outstripped the pursuers; they had crossed the high ridge of Beth-horon the Upper; they were in full flight to Beth-horon the Nether. It is a rough, rocky road, sometimes over the upturned edges of the limestone strata, sometimes over sheets of smooth rock, sometimes over loose rectangular stones, sometimes over steps cut in the rock. It was as they fled down this slippery descent that a fearful tempest, "thunder, lightning, and a deluge of hail" (Josephus, *Ant.* v, 1, 17), broke over the disordered ranks; and "they were more which died of the hailstones than they whom the children of Israel slew with the sword."

Then follows the poetic version of the story, taken from the ancient legendary "Book of Jasher." On the summit of the pass, where is now the hamlet of the Upper Beth-horon, looking far down the deep descent of the western valleys, with the green vale of Ajalon stretched out in the distance, and the wide expanse of the Mediterranean Sea beyond, stood, as is intimated, the Israelitish chief. Below him was rushing down, in wild confusion, the Amoritish host. Around him were "all his people of war, and all his mighty men of valor." Behind him were the hills which hid the now rescued Gibeon from his sight. But the sun stood high above those hills, "in the midst of heaven" (it was the middle of the forenoon, or at most midday), for the day had now far advanced since he had emerged from his night-march through the passes of Ai; and in his front, over the western vale of Ajalon, may have been the faint crescent of the waning moon, visible above the hail-storm driving up from the sea in the black distance. Was the enemy to escape in safety, or was the speed with which Joshua had "come quickly, and saved and helped" his defenceless allies, to be rewarded, before the close of that day, by a signal victory? It is doubtless so standing on that lofty eminence, with outstretched hand and spear, that the hero appears in the ancient record: "Then might Joshua [be heard to] speak to Jehovah in the day of Jehovah's giving [up] the Amorite before the sons of Israel, when he said in the eyes of Israel:

'Sun, in Gibeon stand still;  
And, moon, in Ajalon's vale!'

So the sun stood still, and moon stayed until a people should take vengeance [upon] its enemies. [Is] not this written on [the] Book of the Upright?

'So the sun stayed in the midst of the heavens,  
And hastened not to go [down] as a whole day;  
And [there] was not like that day [another] before it or  
after it.  
For Jehovah's hearkening to a man's voice,  
For Jehovah [it was that] fought for Israel.'

So Joshua returned, and all Israel with him, to the camp at Gilgal" (Josh. x, 12-15). See JOSHUA.

(2) We next hear of Gibeon at the encounter between the men of David and of Ishbosheth, under their respective leaders Joab and Abner (2 Sam. ii, 12-17). The meeting has all the air of having been premeditated by both parties, unless we suppose that Joab had heard of the intention of the Benjamites to revisit from the distant Mahanaim their native villages, and had seized the opportunity to try his strength with Abner. See ABNER. The place where the struggle began received a name from the circumstance, and seems to have been long afterwards known as the "field of the strong men." See HELKATH-HAZZURIM.

(3) We again meet with Gibeon in connection with Joab; this time as the scene of the cruel and revolting death of Amasa by his hand (2 Sam. xx, 5-10). Joab was in pursuit of the rebellious Sheba, the son of Bichri, and his being so far out of the direct north road as Gibeon may be accounted for by supposing that he was making a search for this Benjamite among the towns of his tribe. The two rivals met at "the great stone which is in Gibeon"—some old landmark now no longer recognisable, at least not recognised—and then Joab repeated the treachery by which he had murdered Abner, but with circumstances of a still more revolting character. See AMASA.

It is remarkable that the retribution for this crowning act of perfidy should have overtaken Joab close to the very spot on which it had been committed. For it was to the tabernacle at Gibeon (1 Kings ii, 28, 29; comp. 1 Chron. xvi, 39) that Joab fled for sanctuary when his death was pronounced by Solomon, and it was while clinging to the horns of the brazen altar there that he received his death-blow from Benaiah, the son of Jehoiada (1 Kings ii, 28, 30, 34). See JOAB.

(4) Familiar as these events in connection with the history of Gibeon are to us, its reputation in Israel was due to a very different circumstance—the fact that the tabernacle of the congregation and the brazen altar of burnt-offering were for some time located on the "high place" attached to or near the town. We are not informed whether this "high place" had any fame for sanctity before the tabernacle came there; but if not, it would probably have been erected elsewhere. We only hear of it in connection with the tabernacle; nor is there any indication of its situation in regard to

the town. Stanley has suggested (*Sinai and Pal.* p. 212) that it was the remarkable hill of neby Samwîl, the most prominent and individual eminence in that part of the country, and to which the special appellation of "the great high-place" (1 Kings iii, 4; גִּבְעוֹן הַגָּדוֹל) would perfectly apply. Certainly, if "great" is to be understood as referring to height or size, there is no other hill which can so justly claim the distinction. But the word has not always that meaning, and may equally imply eminence in other respects, e. g. superior sanctity to the numerous other high places—Bethel, Ramah, Mizpeh, Gibeah—which surrounded it on every side. The main objection to this identification is the distance of neby Samwîl from Gibeon—more than a mile—and the absence of any closer connection therewith than with any other of the neighboring places. The most natural position for the high place of Gibeon is the twin mount immediately south of El-Jib—so close as to be all but a part of the town, and yet quite separate and distinct. The testimony of Epiphanius, by which Stanley supports his conjecture, viz. that the "Mount of Gabaon" was the highest round Jerusalem (*Adv. Hæreses*, i, 394), should be received with caution, standing as it does quite alone, and belonging to an age which, though early, was marked by ignorance, and by the most improbable conclusions.

To this high place, wherever situated, the "tabernacle of the congregation"—the sacred tent which had accompanied the children of Israel through the whole of their wanderings—had been transferred from its last station at Nob. The exact date of the transfer is left in uncertainty. It was either before or at the time when David brought up the ark from Kirjath-jearim to the new tent which he had pitched for it on Mount Zion, that the original tent was spread for the last time at Gibeon. The expression in 2 Chron. i, 5, "The brazen altar he put before the tabernacle of Jehovah," at first sight appears to refer to David. But the text of the passage is disputed, and the authorities are divided between גִּבְעוֹן, "he put," and בֵּית־עֵלֶיךָ, "was there." Whether king David transferred the tabernacle to Gibeon or not, he certainly appointed the staff of priests to offer the daily sacrifices there on the brazen altar of Moses, and to fulfill the other requirements of the law (1 Chron. xvi, 40), with no less a person at their head than Zadok the priest (ver. 39), assisted by the famous musicians Heman and Jeduthun (ver. 41).

One of the earliest acts of Solomon's reign—it must have been while the remembrance of the execution of Joab was still fresh—was to visit Gibeon. The ceremonial was truly magnificent: he went up with all the congregation, the great officers of the state—the captains of hundreds and thousands, the judges, the governors, and the chief of the fathers—and the sacrifice consisted of a thousand burnt-offerings (1 Kings iii, 4). This glimpse of Gibeon in all the splendor of its greatest prosperity—the smoke of the thousand animals rising from the venerable altar on the commanding height of "the great high place"—the clang of "trumpets, and cymbals, and musical instruments of God" (1 Chron. xvi, 42) resounding through the valleys far and near—is virtually the last we have of it. In a few years the Temple at Jerusalem was completed, and then the tabernacle was once more taken down and removed. Again "all the men of Israel assembled themselves" to king Solomon, with the "elders of Israel," and the priests and the Levites brought up both the tabernacle and the ark, and "all the holy vessels that were in the tabernacle" (1 Kings viii, 3; Joseph. *Ant.* viii, 4, 1), and placed the venerable relics in their new home, there to remain until the plunder of the city by Nebuchadnezzar. The introduction of the name of Gibeon in 1 Chron. ix, 35, which seems so abrupt, is probably due to the fact that the preceding verses of the chapter contain, as they appear to do, a

list of the staff attached to the "tabernacle of the congregation" which was erected there; or if these persons should prove to be the attendants on the "new tent" which David had pitched for the ark on its arrival in the city of David, the transition to the place where the old tent was still standing is both natural and easy.

It would be very satisfactory to believe, with Thomson (*Land and the Book*, ii, 547), that the present wady Suleiman, i. e. "Solomon's valley," which commences on the west side of Gibeon, and leads down to the Plain of Sharon, derived its name from this visit. But the modern names of places in Palestine often spring from very modern persons or circumstances, and, without confirmation or investigation, this cannot be received with certainty.—Smith, s. v.

**Gibeonite** (Heb. *Giboni*, גִּבְעוֹנִי; Sept. Γαβωνίτης), the designation of the people of the Canaanitish city GIBEON (q. v.), and perhaps also of the three cities associated with Gibeon (Josh. ix, 17)—Hivites; who, on the discovery of the stratagem by which they had obtained the protection of the Israelites, were condemned to be perpetual bondmen, hewers of wood and drawers of water for the congregation, and for the house of God and altar of Jehovah (Josh. ix, 23, 27). The compact, although the punishment of fraud, was faithfully observed on both sides (see Benzel, *Syntagm. dissert.* iii, 122 sq.). Saul, however, appears to have broken this covenant, and in a fit of enthusiasm or patriotism to have killed some, and devised a general massacre of the rest (2 Sam. xxi, 1, 2, 5). This was expiated many years after by David, at the suggestion of the priestly oracle, giving up seven men of Saul's descendants to the Gibeonites, who hung them or crucified them "before Jehovah"—as a kind of sacrifice—in Gibeah, Saul's own town (4, 6, 9). At this time, or, at any rate, at the time of the composition of the narrative, the Gibeonites were so identified with Israel that the historian is obliged to insert a note explaining their origin and their non-Israelite extraction (xxi, 2). The actual name "Gibeonites" appears only in this passage of 2 Sam.—Smith, s. v. There is not the slightest evidence for the allegation which has been sometimes made against David, that he purposely contrived or greedily fell in with this device, in order to weaken the house of Saul and place it under a darker stigma. On the contrary, David's conduct throughout to that house was in the highest degree generous and noble; and at the very time when this fresh public calamity befell it, he took occasion to have the bones of Saul and Jonathan, along with the bones of the seven now publicly hanged, gathered together and honorably buried in the sepulchre of Kish.—Fairbairn, s. v. See DAVID. From this time there is no mention of the Gibeonites as a distinct people; but most writers suppose they were included among the Nethinim, who were appointed for the service of the Temple (1 Chron. ix, 2). Those of the Canaanites who were afterwards subdued and had their lives spared were probably added to the Gibeonites. We see in Ezra viii, 20; ii, 58; 1 Kings ix, 20, 21, that David, Solomon, and the princes of Judah gave many such to the Lord; these Nethinim being carried into captivity with Judah and the Levites, many of them returned with Ezra, Zerubbabel, and Nehemiah, and continued, as before, in the service of the Temple, under the priests and Levites.—Calnet, s. v. (See De Platen, *De religione Gibeonitarum*, Rost. 1703; Fecht, *id.* ib. 1731.) See NETHINIM.

Individual Gibeonites named are (1) ISMAIAH, one of the Benjamites who joined David in his difficulties (1 Chron. xii, 4); (2) MELATIAH, one of those who assisted Nehemiah in repairing the wall of Jerusalem (Neh. iii, 7); (3) HANANIAH, the son of Azur, a false prophet from Gibeon, who opposed Jeremiah, and shortly afterwards died (Jer. xxviii, 1, 10, 13, 17).—Smith, s. v.

**Gib'lite** (Heb. with the art. in the sing. *gag-Gibbli'*, גַּבְבִּילִי, Josh. xiii, 5; Sept. Γαββί [y. r. Γαββιά?] Φυλιστίνης, Vulg. merely *confinia*; plural, *gag-Gibblim'*, גַּבְבִּילִים, 1 Kings v, 18; Sept. Alex. οἱ Γαββίλοι, other MSS. omit; Vulg. *Gibbli*, A. V. "stone-squarers"), a people whose land is coupled with "all Lebanon," as together belonging to the territory of the Israelites on the northern side, in the enumeration of the portions of the Promised Land remaining to be conquered by Joshua (Josh. xiii, 5). The ancient versions give no help, but there is no reason to doubt that the allusion is to the inhabitants of the city **GEBAL** (q. v.), which was on the sea-coast at the foot of the northern slopes of Lebanon, and from which the name is a regular derivative (see Gesenius, *Thesaur.* p. 258 b). The whole passage is instructive, as showing how very far the limits of the country designed for the Israelites exceeded those which they actually occupied. The people in question, who plainly belonged to the Phœnician territory, are understood to have been the people of *Byblus*, a city of the Phœnicians between Tripoli and Berytus. The inhabitants of Gebal are mentioned in the cuneiform inscriptions (q. v.). The Giblites are again named (in the Heb.) in 1 Kings v, 18 as assisting Solomon's builders and Hiram's builders to prepare the trees and the stones for building the Temple. That they were clever artificers is evident from this passage; and in connection with the shipping and merchandise of Tyre, the prophet Ezekiel mentions "the ancients of Gebal" as furnishing calkers, or perhaps generally ship-carpenters (Ezek. xxvii, 9). The Giblites are not mentioned in immediate connection with the affairs of Israel; if they did come into direct contact with these, it must have been for evil, and not for good; for Byblus was the seat of the worship of the Syrian Tammuz or Adonis, a worship which certainly found its way, among other corruptions, into the later idolatries of the Jewish people (Ezek. viii, 14), but whether directly from Byblus, or from other parts of Phœnicia, we have no means of ascertaining.—Smith, s. v.; Fairbairn, s. v. See **PHŒNICIA**.

**Gibson, Edmund, D.D.**, bishop of London, was born at Bampton in 1669, and was educated at Queen's College, Oxford. He early devoted himself to the study of the languages of North Britain and of British antiquities. At twenty-two he prepared an edition of *The Saxon Chronicle*, with Latin translation and Indexes (Oxford, 1692, 4to). In 1694 he became M.A., and soon after was ordained, and made fellow of his college. In 1695 he published an English translation of Camden's *Britannia* (2 vols. fol.). In 1696 he was appointed librarian at Lambeth by Tenison, archbishop of Canterbury; and in 1697 he was appointed morning preacher at Lambeth church. In the same year he published *Vita Thomæ Bolleii*, together with *Historia Bibliothecæ Bodleianæ*, both prefixed to the *Catalogi Librorum Manuscriptorum, in Angliæ et Hiberniæ, in unum collecti* (2 vols. fol.). In 1698 he published *Reliquiæ Spelmanianæ*, together with the life of the author (fol.). He was now made domestic chaplain to the archbishop, through whose means he obtained, about the same time, the lectureship of St. Martin's-in-the-Fields, and in 1700 he was presented to the rectory of Stisted, in Essex, a rectory still the seat of learning. In 1703 he was made rector of Lambeth, and residentiary of the cathedral of Chichester. He was soon after appointed master of the hospital of St. Mary, and in 1710 he was promoted to the archdeaconry of Surrey. While he was chaplain to archbishop Tenison he engaged in the controversy between the two houses of Convocation. See **ATTERBURY**. Gibson enlisted on the side of the upper house, and published ten pamphlets on the subject in three years, to which he added another in 1707. And to the interest he took in this controversy we may trace the origin of his great work, *Codex Juris Ecclesiastici Anglicani, or the Stat-*

*utes, Constitution, Canons, Rubrics, and Articles of the Church of England*, etc. (1713, fol.; reprinted at Oxford in 1761). In 1715 he succeeded Wake as bishop of Lincoln, and in 1723 he was translated to the see of London. He subsequently became chief adviser of Sir Robert Walpole in ecclesiastical affairs, and woefully disappointed his former Whig friends by his intolerant support of the Test Act, and of the severe measures adopted against the Quakers. His better qualities appeared in his opposition to the demoralizing masquerades of the time, by which he lost the favor of George II. Towards the close of his life he made a collection of the best treatises that were written against Popery during the reign of James II, and published them with a preface in 1738 (3 vols. fol.); recently republished under the title of *A Preservative against Popery*, etc., edited by Dr. Cumming (London, 1848-9, 18 vols. 8vo); there is also a *Supplement* (London, 1849, 8 vols. 8vo). He died at Bath in 1748.—Hook, *Ecl. Biog.* v, 314; Darling, *Cyclop. Bibliographica*, i, 1250.

**Gibson, Robert**, a minister of the Reformed Presbyterian Church, was born at Ballymena, Ireland, Oct. 1, 1793. His parents migrated to the United States in 1797, and his father, the Rev. William Gibson, settled as pastor of the Reformed Presbyterian Church at Ryegate, Vt. He received his theological training at the Reformed Presbyterian Theological Seminary, Philadelphia, and was licensed to preach in 1818. On Sept. 6, 1819, he was ordained and installed as pastor of the church at Beaver Dam, where he labored with great success for twelve years. In 1831 he became pastor of the Second Reformed Presbyterian church in the city of New York, and occupied that position till his death. In this new and extensive field he labored with great diligence, and his influence grew rapidly. He bore a prominent part in the controversy which resulted in the disruption of the Church in 1833, and published three pamphlets vindicating the course of the Synod. In 1836 he showed symptoms of declining health. All efforts to arrest his disease were unavailing, and he died in the midst of his people, Dec. 22, 1837. We have from him only the three pamphlets above mentioned.—Sprague, *Annals* (Ref. Presb.), ix, 71.

**Gibson, Tobias**, a Methodist Episcopal minister, was born in Liberty County, S. C., Nov. 10, 1771, entered the itinerant ministry in 1792, and died at Natchez, Miss., in April, 1804. He traveled and preached in the most important appointments of the Carolinas until the year 1800, and then went to Natchez as a missionary. The whole Louisiana purchase was then almost a wilderness. After penetrating the forest for six hundred miles to the Cumberland River, Mr. Gibson took a canoe, and alone navigated that stream to the Ohio, and thence down the Mississippi in a boat. He made four trips through the wilderness to the Cumberland while missionary at Natchez, and laid the foundations of Methodism in that vast and now so important region. His fellow-laborers in Carolina testify that "he did for many years preach, profess, possess, and practise Christian perfection; and that those who were acquainted with him must be impressed with his depth of piety;" and "that infidelity itself would stagger before the life of so holy, loving, and devoted a man of God."—*Minutes of Conferences*, i, 125.

**Gibson, William**, a Reformed Presbyterian minister, was born near Knockbracken, County Down, Ireland, in 1753. He studied at Glasgow, and was licensed by the Reformed Presbytery of Ireland in 1781. In the political ferment of Ireland towards the end of the century he joined the United Irishmen, and on the failure of the rebellion he fled to America, where he arrived in 1797. Finding a number of his own people there, he formed a congregation; and the Reformed Presbytery of North America was constituted

in 1798. In 1799 he became pastor at Ryegate, Vt., and remained there till 1817, when he accepted a call to Canonsburg, Pa. In 1830 his infirmities compelled him to resign his charge. His latter years were spent in Philadelphia, where he died, Oct. 15, 1838.—Wilson, *Presb. Hist. Almanac*, 1862, p. 274; Sprague, *Annals* (Ref. Presb.), ix, 6.

**Gichtel**, JOHANN GEORG, a German mystic, was born at Ilatison in 1638. He studied theology and law at the University of Strasburg, and was afterwards distinguished as a lawyer. He became a follower of Jacob Böhme, and prepared for publication the first edition of his works (Amsterdam, 1682). He finally devoted himself to the propagation of his theosophic and ascetic views. Gichtel considered his own announcements of divine commands as superior to the Scriptures in authority. He was imprisoned as a dangerous visionary, struck off the list of barristers, and finally exiled. He retired in 1667 to Holland, where he died poor in 1710. His opinions have found occasional adherents to this day at Amsterdam, Leyden, and even in Germany. They were called Gichtelians, or Brothers of the Angels (*Engelsbrüder*), and believed themselves equal to the inhabitants of heaven on account of their celibacy, peculiar mode of life, etc. One of the most zealous adherents of Gichtel was professor Alandt de Raadt, who, however, subsequently fell out with him, when a merchant, by the name of Ueberfeld, became intimate with Gichtel. Bands of adherents were found in Berlin, Halle, Magdeburg, Altona, where Glüsing (died 1728) was at their head, and other places, and partly maintained themselves to the 19th century. Gichtel's *Letters* were published by Gottfried Arnold (1701, 2 vols.; 1708, 3 vols.); and finally a complete collection of his writings, under the style *Practische Theosophie* (Leyden, 1722, 6 vols.). See Reinbeck, *Gichtel's Lebenslauf und Lehren* (Berl. 1732); Harless, *Gichtel's Leben u. Irrthümer, in Evang. Kirch-Zeit.* 1831, No. 77; Hofer, *Nouv. Biog. Générale*, xx, 451; Herzog, *Real-Encyklop.* v, 145.

**Giddal'ti** (Heb. גִּדְדַלְתִּי, whom I [Jehovah] have made great; Sept. Γεῦδολλαζὶ and Γεῦδελαζὶ, Vulg. *Geddethi* and *Gedethi*), the ninth named of the fourteen musical sons of Heman, and head of the twenty-second course of Levitical musicians in the tabernacle under David (1 Chron. xxv, 4, 29). B.C. 1013. The office of these brothers was to sound the horn in the Levitical orchestra (verse 5, 7). Fürst (who reduces the sons of Heman to five) suggests (*Heb. Lex. s. v.*) that the appended "names probably formed together (גִּדְדַלְתִּי וְרַבְמַתָּר מִיָּד מִיָּדִי הַתִּרְרִי מִיָּדִי הַתִּרְרִי, *I have dealt out fame and victorious help; I have spoken oracles in fulness*) an old prophetic saying with which an oracle began, whose words were applied to the five [as soubriquets]: the tone itself [as a name it would regularly be *Giddal'ti*] pointing to this explanation." See HEMAN.

**Gid'del** (Heb. גִּדְדֵל, perhaps *giant*; Sept. Γεῦδὶλ, Γαῦδὶλ, Σαῦδὶλ), the name of two men whose descendants or relatives (*Bene-Gid'del*) returned from the captivity with Zerubbabel; perhaps Gibeonites (q. v.).

1. One of the NETHINIM (Ezra ii, 47; Neh. vii, 49). B.C. ante 536.

2. One of "Solomon's servants," i. e. perhaps of the Canaanitish tribes enslaved by Solomon (Ezra ii, 56; Neh. vii, 58; compare 1 Kings ix, 21). B.C. ante 536. See SOLOMON.

**Giddings**, ROCKWOOD, a Baptist minister, was born in Plymouth, N. H., Aug. 8, 1812, graduated at Waterville College in 1833, and then went to Virginia, where he commenced the study of medicine. He was about settling as a physician in Missouri when he felt called to preach the Gospel. He was shortly afterwards ordained, and in 1835 became pastor of the Bap-

tist church in Shelbyville, Ky., where his ministrations were very successful. In 1838 he was appointed president of the Baptist College of Georgetown, then in a most destitute condition. He accepted the nomination, and in less than eight months secured more than eighty thousand dollars towards an endowment. But the severe labor he imposed on himself undermined his health, and he died Oct. 29, 1839.—Sprague, *Annals*, vi, 818.

**Gid'eōn** (Heb. גִּדְעוֹן, *tree-feller*, i. e. warrior, comp. Isa. x, 33; Sept. and N. T. Γεῦεών), a Manassite, youngest son of Joash of the Abiezrites, an undistinguished family, who lived at Ophrah, a town probably on the western side of Jordan (Judg. vi, 15). He was the fifth recorded judge of Israel, and for many reasons the greatest of them all, being the first of them whose history is circumstantially narrated (Judg. vi-viii). B.C. 1362-1322.

1. When we first hear of him he was grown up and had sons (Judg. vi, 11; viii, 20), and from the apostrophe of the angel (vi, 12) we may conclude that he had already distinguished himself in war against the roving bands of nomadic robbers who had oppressed Israel for seven years, and whose countless multitudes (compared to locusts from their terrible devastations, vi, 5) annually destroyed all the produce of Canaan, except such as could be concealed in mountain-fastnesses (vi, 2). The Midianites, in conjunction with the Amalekites and other nomadic tribes, invaded the country every year, at the season of produce, in great numbers, with their flocks and herds, rioting in the country after the manner which the Bedonin Arabs practise at this day. It was probably during this disastrous period that the emigration of Elimelech took place (Ruth i, 1, 2; Jahn's *Hebr. Comm.* § XXI). Some have identified the angel who appeared to Gideon (φάπτασμα ρεανίσκου μορφή, Josephus, *Ant.* v, 6) with the prophet mentioned in vi, 8, which will remind the reader of the legends about Malachi in Origen and other commentators. Paulus (*Ereg. Conserv.* ii, 190 sq.) endeavors to give the narrative a subjective coloring, but rationalism is of little value in accounts like this. When the angel appeared, Gideon was threshing wheat with a flail (Sept. ἔκοπτε) in the wine-press, to conceal it from the predatory tyrants. Such was the position and such the employment in which he was found by the angel of the Lord, who appeared to him and said, "Jehovah is with thee, thou mighty man of valor." It was a startling address, and one that seemed rather like a bitter irony, when viewed in connection with the existing state of affairs, than the words of soberness and truth. Therefore Gideon replied, "Oh! my Lord, if Jehovah be with us, why then is all this befallen us? and where be all the miracles which our fathers told us of, saying, Did not Jehovah bring us up from Egypt? But now Jehovah hath forsaken us, and delivered us into the hands of the Midianites." The desponding tone of the reply was not unnatural in the circumstances, and what followed was designed to reassure his mind, and brace him with energy and fortitude for the occasion. Jehovah, it is said—for, instead of the angel of Jehovah, as formerly, it is now Jehovah himself—"Jehovah looked upon him, and said, Go in this thy might, and thou shalt save Israel from the hand of the Midianites; have not I sent thee?" Gideon still expressed his fear of the result, mentioning his own comparative insignificance, and that of his father's family, but was again met with a word of encouragement, "Surely I will be with thee, and thou shalt smite the Midianites as one man." Gideon's heart now began to take courage; and to make him sure that it really was a divine messenger he was dealing with, and that the commission he had received was from the Lord, he requested a sign from heaven; and it was given him in connection with an offering, which he was allowed to

present, of a kid and some unleavened cakes. These the angel touched with the tip of his staff, and a fire presently rose out of the rock and consumed them. Immediately the angel himself disappeared, though not till he had by a word of peace quieted the mind of Gideon, which had become agitated by the thought of having seen the face of the Lord (comp. Exod. xx, 19; Judg. xiii, 22).

The family of Joash had fallen into the prevalent idolatry of the times, which was characterized by backsliding from the true worship of Jehovah; and it was the first task of Gideon as a reformer to rebuke this irreligion, and his first sphere was at home. In a dream the same night he was ordered to throw down the altar of Baal and cut down the Asherah (A. Vers. "grove") upon it [see ASHERAH], which his father had caused, or at least suffered, to be erected on the family grounds; and with the wood of this he was to offer in sacrifice his father's "second bullock of seven years old," an expression in which some see an allusion to the seven years of servitude (vi, 26, 1). Perhaps that particular bullock is specified because it had been reserved by his father to sacrifice to Baal (Rosenmüller, *Schol.* ad loc.). For Joash seems to have been a priest of that worship. Bertheau can hardly be right in supposing that Gideon was to offer two bullocks (*Richt.* p. 115). At any rate, the minute touch is valuable as an indication of truth in the story (see Ewald, *Gesch.* ii, 498, and note). Gideon, assisted by ten faithful servants, obeyed the vision. He deemed it prudent, however, to do this under cover of the darkness. The same night, apparently, he built on the spot desecrated by the idolatrous shrine the altar Jehovah-shalom (q. v.), which existed when the book of Judges was written (vi, 24). As soon as the act was discovered, and the perpetrator suspected and identified, which was immediately on the following morning, he ran the risk of being stoned; but Joash appeased the popular indignation by using the common argument that Baal was capable of defending his own majesty (compare 1 Kings xviii, 27). This circumstance gave to Gideon the surname of *Jerubbaal* (יְרֻבְבַּאֵל, "Let Baal plead," vi, 32; Sept. Ἰερουβάαλ), a standing instance of national irony, expressive of Baal's impotence. Winer thinks that this irony was increased by the fact that יְרֻבְבַּאֵל was a surname of the Phœnician Hercules (comp. Movers, *Phöniz.* i, 434). We have similar cases of contempt in the names Sycar, Baal-zebul, etc. (Lightfoot, *Hor. Heb. ad Matt.* xii, 24). In consequence of this name, some have identified Gideon with a certain priest, *Jerombalus* (Ἰερὸμβάλου), mentioned in Eusebius (*Præp. Evang.* i, 10) as having given much accurate information to Sanchoniatho the Berytian (Bochart, *Phaleg*, p. 776; Huetius, *Dem. Evang.* p. 84, etc.), but this opinion cannot be maintained (Ewald, *Gesch.* ii, 494). We also find the name in the form *Jerubbesheth* (2 Sam. xi, 21); probably indicative of contempt for the heathen deity (comp. Esbaal, 1 Chron. viii, 33, with Ishbosheth, 2 Sam. ii sq.). The mind of Joash, at all events, was confirmed by this bold act of his son, and he seems resolved to leave the solution of the controversy to divine Providence.

2. Gideon soon found occasion to act upon his high commission. The allied invaders were encamped in the great plain of Jezreel or Esdraelon, when, "clothed" by the Spirit of God (Judg. vi, 34; comp. 1 Chron. xii, 18; Luke xxiv, 49), he blew a trumpet, and thus gathered round him a daily increasing host, the summons to arms which it implied having been transmitted through the northern tribes by special messengers. Being joined by "Zebulun, Naphtali, and even the reluctant Asher" (which tribes were chiefly endangered by the Midianites), and possibly also by some of the original inhabitants, who would suffer from these predatory "sons of the East" no less than the Israelites

themselves, he encamped on one of the neighboring slopes, from which he overlooked the plains covered by the tents of Midian. Mount Gilead, indeed, is named in the movement of Gideon against Midian, but probably only as the first place of rendezvous for his army (Judg. vii, 3). For the sake of security, he might be obliged to assemble the people on the mountainous lands to the east of Jordan. Stanley (*Sinai and Palestine*, p. 342), after Le Clerc, without any authority from MSS., would substitute Gilboa for Gilead in the passage referred to. This is otherwise objectionable, as one does not see how thousands from Asher, Naphtali, about and beyond Esdraelon, could have been able to meet on Gilboa, with the Midianitish host lying between. Ewald is perhaps right in regarding the name as a sort of war-cry and general designation of the Manassites. (See, too, Gesenius, *Thes.* p. 804, n.)

The inquietude connected with great enterprises is more sensibly felt some days before than at the moment of action; and hence the two miraculous signs which, on the two nights preceding the march, were required and given as tokens of victory. The first night a fleece was laid out in the middle of an open threshing-floor, and in the morning it was quite wet, while the soil was dry all around. The next night the wonder was reversed, the soil being wet and the fleece perfectly dry. Strengthened by this double sign from God (to which Ewald gives a strange figurative meaning, *Gesch.* ii, 500), Gideon advanced to the brook Harod, in the valley of Jezreel. See HAROD. He was here at the head of 32,000 men; but, lest so large a host should assume the glory of the coming deliverance, which of right belonged to God only, two operations, remarkable both in motive and procedure, reduced this large host to a mere handful of men. First, by divine direction, the usual proclamation (Deut. xx, 8; comp. 1 Macc. iii, 56) was made that all the faint-hearted might withdraw; and no fewer than 22,000 availed themselves of the indulgence. The remaining 10,000 were still declared too numerous; they were therefore all taken down to the brook, when only those who lapped the water from their hands, like active men in haste, were reserved for the enterprise, while all those who lay down leisurely to drink were excluded. The former numbered no more than 300, and these were the appointed vanquishers of the huge host which covered the great plain. It was but a slight circumstance which marked the difference between them and the others, but still it indicated a specific quality; they were the persons that took the more expeditious method of quenching their thirst, and thereby gave proof of a nimbleness and alacrity which bespoke a fitness for executing quick movements in attacking or pursuing an enemy. This affords a perfectly sufficient and natural explanation, and there is no need for resorting, as many do, to peculiar usages in the East, and no one who knows anything of the manners of people in rural and highland districts can need to be told how common it is for them, when wishing to get a hasty refreshment at a running stream, to lift the water to their mouths in the palm of their hand, instead of leisurely bending down, or laying themselves along to get a fuller draught. Josephus, however, explains these men to have been the most cowardly in the army (*Ant.* v, 6, 3).

Finally, being encouraged by words fortuitously overheard (what the later Jews termed the *Bath-Kol*) (compare 1 Sam. xiv, 9, 10; Lightfoot, *Hor. Heb. ad Matt.* iii, 14), in the relation of a significant dream, Gideon framed his plans, which were admirably adapted to strike a panic into the huge and undisciplined nomad host (Judg. viii, 15-18). We know from history that large and irregular Oriental armies are especially liable to sudden outbursts of uncontrollable terror; and when the stillness and darkness of the night were suddenly disturbed in three different directions by the flash of torches and by the reverberating

echoes which the trumpets and the shouting woke among the hills, we cannot be astonished at the complete rout into which the enemy were thrown. It must be remembered, too, that the sound of 300 trumpets would make them suppose that a corresponding number of *companies* were attacking them. It is curious to find "lumps and pitchers" in use for a similar purpose at this very day in the streets of Cairo. The *Zabit* or *Agha* of the police carries with him at night "a torch which burns soon after it is lighted, without a flame, excepting when it is waved through the air, when it suddenly blazes forth; it therefore answers the same purpose as our dark lantern. *The burning end is sometimes concealed in a small pot or jar, or covered with something else, when not required to give light*" (Lane's *Mol. Eg.* i, ch. iv). For specimens of similar stratagems, see Livy, xxii, 16; Polyænus, *Strateg.* ii, 37; Frontinus, ii, 4; Sallust, *Jug.* 99; Niebuhr, *Desc. de l'Arabie*, p. 304; *Journal As.* 1841, ii, 516. The custom of dividing an army into three seems to have been common (1 Sam. xi, 11; Gen. xiv, 15), and Gideon's war-cry is not unlike that adopted by Cyrus (Xenoph. *Cyr.* iii, 28). He adds his own name to the war-cry, as suited both to inspire confidence in his followers and strike terror in the enemy. His stratagem was eminently successful, and the Midianites, breaking into their wild peculiar cries, fled headlong "down the descent to the Jordan," to the "house of the Accia" (Beth-shitta), and the "meadow of the dance" (Abel-meholah), but were intercepted by the Ephraimites (to whom notice had been sent, Judg. vii, 24) at the fords of Beth-barah, where, after a second fight, the princes of Oreb and Zeeb ("the Raven" and "the Wolf") were detected and slain—the former at a rock, and the latter concealed in a wine-press, to which their names were afterwards given. The Ephraimites took their heads over to Gideon, which amounted to an acknowledgment of his leadership; but still the always haughty and jealous Ephraimites were greatly annoyed that they had not in the first instance been summoned to the field; and serious consequences might have followed but for the tact of Gideon in speaking in a lowly spirit of his own doings in comparison with theirs. Gideon's "soft answer," which pacified the Ephraimite warriors, became a proverb (Judg. viii, 1-3). Meanwhile the "higher sheiks, Zebah and Zalmunna, had already escaped," and Gideon resolved to pursue them into eastern Manassah, and burst upon them among the tents of their Bedouin countrymen. On that side the river, however, his victory was not believed or understood, and the people still trembled at the very name of the Midianites. Hence he could obtain no succor from the places which he passed, and town after town refused to supply even victuals to his fatigued and hungry, but still stout-hearted troop. He denounced vengeance upon them, but postponed its execution until his return. Continuing his pursuit of the Midianites southward, he learned that they had encamped with the remnant of their army in fancied security at Karkor, just without the limits of Palestine; he therefore resolved to surprise them by a rapid detour through the edge of the nomadic region of the Hauran, a measure which he accomplished so successfully that, falling suddenly upon them from the east by night, he utterly routed them, and by sunrise was on his way to the Jordan. In this his *third* victory he avenged on the Midianitish emirs the massacre of his kingly brethren whom they had slain at Tabor. In those days captives of distinction taken in war were almost invariably slain. Zebah and Zalmunna had made up their minds to this fate; and yet it was Gideon's humane intention to spare them till he learned that they had put to death his own brothers under the same circumstances; upon which, as the avenger of their blood, he slew the captives with his own hand. In these three battles only 15,000 out of 120,000 Midianites escaped alive. It is indeed stated in Judg.

viii, 10, that 120,000 Midianites had already *fallen*; but here, as elsewhere, it may merely be intended that such was the original number of the routed host. During his triumphal return Gideon took signal and appropriate vengeance on the coward and apostate towns of Succoth and Peniel. The memory of this splendid deliverance took deep root in the national traditions (1 Sam. xii, 11; Psa. lxxxiii, 11; Isa. ix, 4; x, 26; Heb. xi, 32).

3. After this there was a peace of 40 years, and we see Gideon in peaceful possession of his well-earned honors, and surrounded by the dignity of a numerous household (viii, 29-31). It is not improbable that, like Saul, he had owed a part of his popularity to his princely appearance (Judg. viii, 18). In this stage of his life occur alike his most noble and his most questionable acts. Gideon magnanimously rejected, on theoretic principles, the proffer of hereditary royalty which the rulers in the warmth of their gratitude made him. He would only accept the golden ear-rings (q. v.) which the victors had taken from the ears of their slaughtered foes, and with these he made an ephod, and put it in his city Ophrah (Judg. viii, 22-27). But whether Gideon intended it as a commemorative trophy, or had a Levitical priest in his house, as Micah on Mount Ephraim, and the Danites at Laish, it is difficult to determine (Judg. xvii, 5-13; xviii, 15-31). The probability is that the worship rendered there was in honor of Jehovah. It became, however, a snare to the Hebrews in the vicinity, who thus, having an ephod and worship in their own country, would not so readily go over to the tabernacle at Shiloh, and consequently fell into idolatry by worshipping the gods of the Phœnicians (Judg. viii, 23). Gesenius and others (*Thes.* p. 135; Bertheau, p. 123 sq.) follow the Peshito in making the word ephod here mean an idol, chiefly on account of the vast amount of gold (1700 shekels) and other rich material appropriated to it. But it is simpler to understand it as a significant symbol of an unauthorized worship. (See *Crit. Sacr. Thes.* i, 425.)—Smith, s. v.; Kitto, s. v.; Fairbairn, s. v. See EPHOD.

The evil consequences of this false step in religion were realized in the miserable sequel of Gideon's family. After his death his numerous sons were destroyed by Abimelech, their brother, who afterwards reigned at Shechem (Judg. viii, 35; ix, 5). (See Evans, *Script. Biog.* ii, 55; Kitto, *Daily Bible Illust.* ad loc.; Stanley, *Jewish Church*, i, 374; Duncan, *Gideon, son of Joash*, Lond. 1860.) See ABIMELECH.

**Gideō'nî** (Heb. *Gidonî'*, גִּדְיוֹןִי or גִּדְיוֹןִי, another form of GIDEON; Sept. *Γαζωρί*), the father of Abidan, which latter was a prominent man of the tribe of Benjamin at the Exode (Numb. i, 11; ii, 22; vii, 60, 65; x, 24). B. C. 1657.

**Gidgad.** See HOR-HAGIGDAD.

**Gi'dom** (Heb. *Gidom'*, גִּדּוֹם, a *falling*; Sept. *Γεῶν* v. r. *Γαλαδί*), a place east of Gibeath, towards the wilderness (of Bethel), where the routed Benjamites turned to escape to the rock Rimmon (Judg. xx, 45); hence probably in the plain lying north-east of Michmash, and perhaps so called from being a *clearing* in the woods that anciently covered this tract (2 Kings ii, 24; 1 Sam. xiv, 25). See MENEKAI.

**Gier-eagle** [i. e. vulture-eagle] (רַחַמַ' *raham'*, Lev. xi, 18, and [with ἵ paragogic] *racha' mah*, רַחַמַ' *rahama'*, Deut. xiv, 17, prob. so called from its *tenderness* to its young; Sept. *κίρκρος* and *πορφύριος*, Vulg. *porphyrio*), probably a smaller species of vulture, the *Vultur percnopterus* of Siam (Bochart, *Hierv.* iii, 56). It is about the size of a raven, has an almost triangular bald and wrinkled head, a strong pointed beak, black at the tip, large eyes and ears, the latter entirely on the outside, and long feet. The male is white, with black wings; the female has a brown body. It lives entirely upon

carion. It is called in Arabic zoology *racham*, the exact equivalent of the Heb. name (Freytag's *Selecta ex Hist. Haleli*, Paris, 1819, p. 87), and is found in Arabia and Syria (Burchardt, ii, 681, 864; Russel's *Aleppo*, ii, 195), and likewise in Egypt, the streets of Cairo being infested with this disgusting but useful bird (Hasselquist, *Trav.* p. 195). See EAGLE. As to the identity

Egyptian Vulture (*Percnopterus Neophron*).

of the bird in question, Gesner had already figured (*De Aquila quem Percnopterus vocant*, p. 199) the Barbary variety, and pointed out the *racham* of Scripture as the identical species; but Bruce first clearly established the fact of its agreement with the Egyptian variety, popularly called "Pharaoh's chicken." The *rachama* of the former writer is apparently the *Ak-Bobha* ("white father") of the Turks, and forms one of a small group of vulturide, sub-generically distinguished by the name of *Percnopterus* and *Neophron*, differing from the other vultures in the bill being longer, straight, more attenuated, and then uncinated, and in the back of the head and neck being furnished with longish, narrow, sub-erectile feathers, but, like true vultures, having the pouch on the breast exposed, and the sides of the head and throat bare and livid. The great wing-coverts are partly, and the quill-feathers entirely of a black and blackish ash-color; those of the head, nape, smaller wing-coverts, body, and tail, in general white, with tinges of buff and rufous; the legs are flesh-color, and rather long; and the toes are armed with sharp claws. The females are brownish. In size the species is little bulkier than a raven, but it stands high on the legs. Always soiled with blood and garbage, offensive to the eye and nose, it yet is protected in Egypt both by law and public opinion, for the services it renders in clearing the soil of dead carcases putrefying in the sun, and the cultivated fields of innumerable rats, mice, and other vermin. Pious Moslems at Cairo and other places bestow a daily portion of food upon them, and upon their associates the kites, who are seen hovering conjointly in great numbers about the city. The *racham* extends to Palestine in the summer season, but becomes scarce towards the north, where it is not specially protected; and it accompanies caravans, feasting on their leavings and on dead camels, etc. Mr. Tristram says it breeds in great numbers in the valley of the Kedron (*Ibis*, i, 23). Naturalists have referred this vulture to the *περικρύπτερος* or *ὀρεπέλαργος* of Aristotle (*Hist. An.* ix, 22, 2, ed. Schneid.). The species indicated in the Scriptures is now generally admitted to be the white carion vulture of Egypt, *Percnopterus Neophron Egyptianus*, which differs but slightly from the above description. With respect to the original imposition of the name *Racham*, as connected with any unusual affection for its young, there is no modern ornithologist who assigns such a quality to percnopteri more than to other birds, although it is likely that as the pelican empties its bag of fish, so this bird may void the crop to feed

her brood. For the Arabian fables of the bird *racham*, see Bochart, *Hieroz.* iii, 56. The *Percnopterus* is somewhat singularly classed, both in Lev. and Deut., along with aquatic birds; and it may be questioned whether any animal will eat it, since, in the parallel case of *Vultur aura*, the turkey-buzzard or carrion-crow of America, and even the ants, have been found abstaining from its carcase, and leaving it to dry up in the sun, though swarming around and greedy of every other animal substance.—Kitto, s. v. See VULTURE. The Rev. G. E. Post, M.D., of Tripoli, Syria, suggests (Am. ed. of Smith's *Dict. of the Bible*, s. v.) that the *racham* of Moses may rather be a kind of pelican (*Pelecanus onocratus*), found in great numbers in Egypt and about lake Huleh, and which he says is likewise called by the Arabs *racham*; but this needs confirmation. See PELICAN.

Gieseler, JOHANN KARL LUDWIG, one of the greatest of modern Church historians, was born at Petershagen, near Minden, March 3, 1793. His father and grandfather, from both of whom he received instruction in childhood, were Lutheran ministers, somewhat of the Pietistic school. In 1803 he went to study at the Latin school of the Orphan House at Halle, and was afterwards made one of the masters. In 1813 he entered the "liberating" army as a volunteer; at the peace in 1815 he returned to his mastership; in 1817 he became co-rector of the gymnasium at Minden; in 1818 rector of that in Cleves; and in 1819 professor ordinarius of theology in the newly-founded University of Bonn. For this rapid success he was indebted to his *Historisch-kritischer Versuch über die Entstehung und die frühesten Schicksale der schriftlichen Evangelien* (Historico-critical Essay on the Origin and earliest History of the written Gospels). In 1824 he began the publication of his *Lehrbuch der Kirchengeschichte* (Text-book of Church History), a further account of which is given below; and his studies were thenceforward almost wholly devoted to this science. In 1831 he accepted a call to the University of Göttingen, where he spent the remainder of his life. The university repeatedly conferred on him the dignity of pro-rector, and he was almost uninterruptedly a member of one or more of the academical boards. He was devoted to the interests of the Göttingen Orphan House, of which he was curator, and which he visited almost daily. He also gave much time and labor to a masonic lodge of which he was a member. In these various offices his high administrative talent found full play. He died July 8, 1854. His *Church History* is the chief work on which his reputation rests. The 4th ed. of vol. i appeared in 1844 and 1845; the 4th ed. of vol. ii, carrying the history down to A. D. 1409, appeared in 1846-49; vol. iii, reaching to 1648, appeared in two parts in 1840 and 1853. The 1vth vol. (1648-1814), the vth (1814 to the present time), and the vith, containing *Dogmengeschichte* (History of Doctrines), were issued posthumously, 1855-1857. The history, as a whole, is, beyond question, the most learned, faithful, and impartial *compendium* of Church History that has ever appeared. Its most marked features are the judicious arrangement of the periods of history; the close, compact narrative in the text; and, most of all, the abundant *sources* of information given in the notes. In this last particular no other work resembles it; it does not merely give references, but on all difficult or controverted points the quotations bearing on the subject are given at length, thus enabling the reader who has not at command the treasures of a vast library, to consult, in no slight degree, the original sources for himself. It is true, however, that Gieseler moves through the field of Church History "with critical acumen and cold intellect" (Schaff), and not, like Neander, in the spirit of faith and devotion. The rationalism of the age in which he was educated leaves its traces, if not in his pages, at least between the lines. But his biographer, Redepenning,

denies that he ever was a Rationalist in the ordinary sense of the term, and affirms that from the beginning to the end of his career he held fast the fundamental Christian doctrine of justification by faith alone. A translation of the first three volumes of the *Church History*, by Cunningham (Philadel. 1836, 3 vols. 8vo), was made from the earlier editions, and has been superseded by a new one from the fourth edition by Davidson (Elinb. 1848-56), of which five volumes have appeared. A better edition still is the American one, edited by Dr. H. B. Smith, of which four volumes have appeared (N. Y., Harper and Brothers, 8vo). Of his other works, we mention those on the disturbances in the Dutch Reformed Church between 1833 and 1839 (*Unruhen in der nied.-ref. Kirche*, etc., Hamb. 1840); and on the Lehmin (q. v.) prophecy (*Ueber d. Lehminische Weissagung*, Götting, 1840; and *Die Lehminische Weissagung als ein Gedicht des Abts von Huysbruck nachgewiesen*, Ellerb. 1849); on the difficulty between the archbishop of Cologne and the Prussian government (*Ueber die köln. Angelegenheit*, Leipz. 1838). He was also one of the assistant editors of the *Studien und Kritiken*, one of the best theological journals of Germany.—Redepenning, in vol. v of the *Church History*, translated in the *Journal of Sacred Literature*, Jan. 1856; Herzog, *Real-Encyclop.* v, 152 sq.

**Giffen**, DAVID FLUD VAN, was born at Sneek. He belonged to an honorable family. Following the bent of his own mind, though in opposition to the wishes of his relatives, he devoted himself to the study of theology, which he pursued at the University of Harderwyk. In 1674 he became pastor of the Reformed church at Wykell. He fully embraced the views of Cocceius. The sentiments which he held he boldly proclaimed. He did not, however, blend the Cartesian philosophy with his Cocceian sentiments, but gave a practical direction and tendency to his interpretations of the Scriptures, and even to those of the prophecies, to whose elucidation he devoted special attention. To him, and his followers and successors of the same school, was applied the epithet *serious*, in distinction from those who were denominated Leyden Cocceians. His Cocceianism excited the prejudice and opposition of many to his preaching during the early part of his ministry, and involved him in unpleasant ecclesiastical proceedings. Finally, all further ecclesiastical and civil proceedings against him were prohibited by the States of Friesland, to which he had appealed. He died in 1701. An edition of his works was given to the public by professor A. Voget in 1735, under the title *Verzameling van alle de Werken, nagelaten en uitgegeven van den hooggeleerden en godvruchtigen heer David Flud van Giffen* (Groningen, 1735). See Glasius, *Godgeleerd Nederland*, i D., blz. 522 en verv.; H. Bouman, *Geschiedenis der Gedereche Hoogeschool*, ii D., blz. 45 (Utrecht, 1844, 1847); A. Ypeij en J. Dermout, *Geschiedenis der Nederlansche Heereorde Kerk*, ii D., blz. 516 en verv. (J. P. W.)

**Gift**, the rendering of seven Heb. and four Greek terms (with their variations from the same root) in the A. V., besides being the import of others differently rendered. Several of these have a distinct and special meaning, indicative of the relation of giver and receiver, or of the motive and object of the presentation. They are as follows:

1. Properly and simply מַתָּנָה, *matnan'*, a *gratuity* (Prov. xix, 6), to secure favor (Prov. xviii, 16; xxi, 14), in religious thankfulness (Numb. xviii, 11), or in dowry (Gen. iv, 12). From the same root (מָתַן, *mathan'*, to bestow, in the widest sense) are also מַתְּנֹתָי, *mattnoth'*, a *present*, e. g. a divine bestowal (Psa. lxxviii, 18), in charity (Esth. ix, 22), in religious consecration (Exod. xxviii, 38; Lev. xxiii, 38; Numb. xviii, 6, 7, 29; Deut. xvi, 17; Ezek. xx, 26, 31, 39), in inheritance (Gen. xxv, 6; 2 Chron. xxi, 3; Ezek. xlvi,

16, 17), or as a *bribe* (Prov. xv, 27; Eccles. vi, 7); with its corresponding Chald. מַתְנָה, *mattnah'*, e. g. a royal *bounty* (Dan. ii, 6, 48; v, 17); and the synonymous מַתְתָּה, *matthath'*, e. g. a *reward* (as rendered in 1 Kings xiii, 7) or *fee* (Prov. xxv, 14), or simple conferment (Eccles. iii, 13; v, 19) or contribution (Ezek. xlvi, 5, 11). From the same root likewise the *Nethinim* (sc. *given*, i. e. consecrated, Numb. viii, 19).

2. From the root נָסַח, *nasa'*, to raise, in the "Piel" sense of *aiding*, sc. by a gift, come מַסְתָּח, *maseth'*, *pecuniary assistance* (Esth. ii, 18; elsewhere in various altered significations, and with different renderings); and מַסְתָּח, *nisseth*, a *present* in token of respect (2 Sam. xix, 42). Perhaps the inherent idea of these terms, however, is rather that of *oblation* to a superior, i. e. honorary gift; hence the former is also used of a *dish of honor* sent to special guests ("mess," xliiii, 34; 2 Sam. xi, 8), and of a *tax* or fixed contribution towards the sanctuary ("collection," 2 Chron. xxiv, 6, 9), or voluntary first-fruits offered ("oblation," Ezek. xx, 40); like the cognate מַסָּח, *massa'* ("tribute," 2 Chron. xvii, 11).

3. More distinctly in the sense of a votive offering is מִנְחָה, *minchah'*, an *oblation* or propitiatory gift (2 Sam. viii, 2, 6; 1 Chron. xviii, 2, 6; 2 Chron. xxvi, 8; xxxii, 23; Psa. xlv, 12; "present," Gen. xxxii, 13, 18, 20, 21; xxxiii, 10; xliiii, 11, 15, 25, 26; Judg. iii, 15, 17, 18; vi, 18; 1 Sam. x, 27; 1 Kings iv, 21; 2 Kings viii, 8, 9; 2 Chron. ix, 24; xvii, 5, 11; Psa. lxxii, 10; in several of which passages the word has the accessory idea of *tribute*; elsewhere usually rendered "offering"). Kindred in meaning with the last, but from an entirely different root (שָׁרַח, *shur*, to travel about with a commodity offered in sale), is תְּשׁוּרָה, *teshurah'*, a *conciliatory* "present," e. g. to a scer=fee (1 Sam. ix, 7). Different still is תְּרומָה, *terumah'* (from רָמַח, *ram*, to be high), an *oblation* (Prov. xxix, 4), especially a *peace-offering* (as usually rendered). The word בְּרָכָה, *brakah*,  *blessing*, is sometimes used of a *present* (Gen. xxxiii, 11; 1 Sam. xxv, 27; 2 Kings v, 15), munificence (Prov. xi, 25), or benefaction (Gen. xlix, 25; Isa. xix, 24).

4. Mercenary in character are the following: שׂוֹחָד, *sho'chad*, a *bribe*, especially given to a judge to obtain a favorable verdict (Exod. xxiii, 8; Deut. xvi, 19; 2 Chron. xix, 7; Prov. vi, 35; xvii, 8, 23; Isa. i, 23; Ezek. xxii, 12; elsewhere rendered "bribe," "reward," "present"); עֶשְׂכָר, *eshkar'* (from עָשָׂה, *to hire*), *price*, i. e. *tribute* (Psa. lxxii, 10; "present," Ezek. xxvii, 15). So also שְׂכָרִים, *shilluchim'* (literally *sendings away*), dotal "presents" (1 Kings ix, 16) [see Downy]; but נְדָה, *ne'deh* (lit. *liberality*), signifies the prodigal wages of a harlot (Ezek. xvi, 35).

5. In Greek the usual terms are some derivative from δίδωμι, to give, namely δῶμα, a gift, simply, i. e. the thing given (Matt. vii, 11; Luke xi, 13; Eph. iv, 8; Phil. iv, 17), δῶσε, the act of giving (James i, 17); δῶσιν, a *conferment* in token of amity (Matt. ii, 11; Eph. ii, 8; Rev. xi, 10), or sacrificial (Matt. v, 23, 24; viii, 4; xxiii, 18, 19; Heb. v, 1; viii, 3, 4; ix, 9; xi, 4), or merely eleemosynary (Luke xxi, 1) or in consecration (Matt. xv, 5; Mark vii, 11) [see CORBAN]; whereas δωρεά, a *gratuity* (John iv, 10; Acts ii, 38; viii, 20; x, 45; xi, 17; Rom. v, 15, 17; 2 Cor. ix, 15; Eph. iii, 7; iv, 7; Heb. vi, 4), and δωρομα, *endowment* (Rom. v, 16; James i, 17), refer to spiritual bestowments, i. e. grace. These significations are distributed in ἀνάδωμα, a *votive offering* (Luke xxi, 5, as being *hung up*), and χάρις (2 Cor. viii, 4; "liberality," 1 Cor. xvi, 3; "benefit," 2 Cor. i, 15), *grace* (as elsewhere usually rendered), and its cognate χάρισμα, an *impartation* which is spoken of spiritual and unmerited

endowments (Rom. v, 15, 16; vi, 23), especially the miraculous or special powers granted to the early Christians (Rom. i, 11; xii, 6; 1 Cor. i, 7; vii, 7; xii, 4, 9, 28, 30, 31; 2 Cor. i, 11; 1 Tim. iv, 14; 2 Tim. i, 6; 1 Pet. iv, 10); while *μερισμός* (a *dividing*, as in Heb. iv, 12), points out the *distribution* of these among believers (Heb. ii, 4). Henderson has admirably analyzed the terms used in the above passage (1 Cor. xii, 4-6) for these various "operations" in his work on *Divine Inspiration* (Lond. 1847), lect. iv. See SPIRITUAL GIFTS.

"The giving and receiving of presents has in all ages been not only a more frequent, but also a more formal and significant proceeding in the East than among ourselves. It enters largely into the ordinary transactions of life: no negotiation, alliance, or contract of any kind can be entered into between states or sovereigns without a previous interchange of presents: none of the important events of private life, betrothal, marriage, coming of age, birth, take place without presents: even a visit, if of a formal nature, must be prefaced by a present. The extent to which the custom prevailed admits of some explanation from the peculiar usages of the East: it is clear that the term 'gift' is frequently used where we would substitute 'tribute' or 'fee.' The tribute of subject states was paid, not in a fixed sum of money, but in kind, each nation presenting its particular product—a custom which is frequently illustrated in the sculptures of Assyria and Egypt; hence the numerous instances in which the present was no voluntary act, but an exaction (Judg. iii, 15-18; 2 Sam. viii, 2, 6; 1 Kings iv, 21; 2 Kings xvii, 3; 2 Chron. xvii, 11; xxvi, 8); and hence the expression 'to bring presents' = to own submission (Psa. lxxviii, 29; lxxxvi, 11; Isa. xviii, 7). Again, the present taken to a prophet was viewed very much in the light of a consulting 'fee,' and conveyed no idea of bribery (1 Sam. ix, 7; comp. xii, 3; 2 Kings v, 5; viii, 9): it was only when false prophets and corrupt judges arose that the present was prostituted, and became, instead of a *minchah* (as in the instances quoted), a *shochad* or bribe (Isa. i, 23; v, 23; Ezek. xxii, 12; Mic. iii, 11). But even allowing for these cases, which are hardly 'gifts' in our sense of the term, there is still a large excess remaining in the practice of the East: friends brought presents to friends on any joyful occasion (Esth. ix, 19, 22), those who asked for information or advice to those who gave it (2 Kings viii, 8), the needy to the wealthy from whom any assistance was expected (Gen. xliii, 11; 2 Kings xv, 19; xvi, 8), rulers to their favorites (Gen. xlv, 22; 2 Sam. xi, 8), especially to their officers (Esth. ii, 18; Josephus, *Ant.* xii, 2, 15), or to the people generally on festive occasions (2 Sam. vi, 19): on the occasion of a marriage, the bridegroom not only paid the parents for his bride (A. V. 'dowry'), but also gave the bride certain presents (Gen. xxxiv, 12; comp. Gen. xxiv, 22), while the father of the bride gave her a present on *sending her away*, as is expressed in the term *shiluchim* (שִׁלְחִים) (1 Kings ix, 16); and again, the portions of the sons of concubines were paid in the form of presents (Gen. xxv, 6).

"The nature of the presents was as various as were the occasions: food (1 Sam. ix, 7; xvi, 20; xxv, 18), sheep, and cattle (Gen. xxxii, 13-15; Judg. xv, 1), gold (2 Sam. xviii, 11; Job xiii, 11; Matt. ii, 11), jewels (Gen. xxiv, 53), furniture, and vessels for eating and drinking (2 Sam. xvii, 28), delicacies, such as spices, honey, etc. (Gen. xxiv, 53; 1 Kings x, 25; 2 Kings v, 22), particularly in the case of persons inducted into high office (Esth. vi, 8; Dan. v, 16; comp. Herod. iii, 20). The mode of presentation was with as much parade as possible; the presents were conveyed by the hands of servants (Judg. iii, 18), or, still better, on the backs of beasts of burden (2 Kings viii, 9), even when such a mode of conveyance was unnecessary.

The refusal of a present was regarded as a high indignity, and this constituted the aggravated insult noticed in Matt. xxii, 11, the marriage robe having been offered and refused (Trench, *Parables*). No less an insult was it not to bring a present when the position of the parties demanded it (1 Sam. x, 27)" (Smith, s. v.). Comp. PRESENT.

**Gift of Tongues.** See TONGUES, GIFT OF.

**Gifts, Spiritual** (*χαρίσματα, charisms*). On this subject we make the following extract, by permission, from Schaff, *History of the Apostolic Church*, § 116:

"By the expression *spiritual gift* or *gift of grace, χάρισμα, ἐνέργημα*, the apostle means 'a revelation of the Spirit for the common good' (*Φαρέωσις τοῦ πνεύματος πρὸς τὸ σὺμφέρον*, 1 Cor. xii, 7; *πῶς τὴν οἰκονομίην τῆς ἐκκλησίας*, xiv, 12; compare Eph. iv, 12); that is, not faith in general, which constitutes the essence of the whole Christian disposition, but a particular energy and utterance of the believer's life, prompted and guided by the Holy Ghost, for the edification of the Church; the predominant religious qualification, the peculiar divine talent of the individual, by which he is to perform his function, as an organic member, in the vital action of the whole, and promote its growth. It is, therefore, as the name itself implies, something supernaturally wrought, and bestowed by free grace (comp. 1 Cor. xii, 11); yet it forms itself, like Christianity in general, upon the natural basis prepared for it in the native intellectual and moral capacities of the man, which are in fact themselves gifts of God. These natural qualities it baptizes with the Holy Ghost and with fire, and rouses to higher and freer activity. The charisms are many, corresponding to the various faculties of the soul and the needs of the body of Christ; and in this very abundance and diversity of gifts are revealed the riches of divine grace (*ποικίλη χάρις Θεοῦ*, 1 Pet. iv, 10). As, however, they all flow from the same source, are wrought by the Holy Ghost, and are gifts of free grace, so they all subserve the same end, the edification of the body of Christ. Hence the apostle applies to them the beautiful simile of the bodily organism, the harmonious co-operation of different members (Rom. xii, 4-6; 1 Cor. xii, 12 sq.). To this practical design the term *administrations* or *ministry* (*διακονία*, 1 Cor. xii, 5; comp. Eph. iv, 12; 1 Pet. iv, 10) no doubt refers. Every one has 'his proper gift,' which best corresponds to his natural peculiarity and is indispensable for his sphere of activity (1 Cor. vii, 7; xii, 11; Rom. xii, 6; 1 Pet. iv, 10). But several charisms may also be united in one individual. This was the case particularly with the apostles, whose office in fact originally included all other spiritual offices and their functions, even to the diaconate (comp. Acts iv, 35, 37; vi, 2). It is true they all had not these gifts in equal measure. John seems to have possessed especially the charisms of love, profound knowledge, and prophecy; Peter, those of Church government and discipline, miracles, and discernment of spirits (comp. Acts v, 1 sq.); James, those of the faithful episcopal superintendence of a congregation, and silent, patient service at the altar. Most variously endowed in this respect was St. Paul, eminent alike in knowing and in setting forth divine mysteries; fitted both for the labors of a pioneer, and for preserving and confirming established order; at home among visions and revelations; excelling all the Corinthians in the gift of tongues (1 Cor. xiv, 18); and accredited among them by signs and wonders (2 Cor. xii, 12). The greatest movements in the history of the world always proceed from individuals uncommonly gifted, in whom the scattered mental energies of their age are harmoniously concentrated. Of course, however, the number or strength of the charisms establishes no merit or preference as to the attainment of salvation. For this, living faith in Christ is sufficient. The charisms are free gifts of grace; and the man is responsible, not for

the possession, but for the use of them. Every spiritual gift is liable to abuse. Spiritual knowledge may puff up (1 Cor. viii, 1). The gift of tongues may foster vanity and the disposition to monopolize the benefit of worship in self-edifying rapture (xiv, 2 sq.). And every gift is attended with heavy responsibility. Hence the apostle's earnest commendation of love, which alone would prevent such abuse of other gifts, and make their exercise pleasing to God. The value of the gifts varied; not depending, however, as many of the Corinthians thought, on their splendor and outward effect, but on their practical utility for building up the kingdom of God (1 Cor. xii, 31; xiv, 3 sq.). This extraordinary operation of the Spirit showed itself first in the apostles on the day of Pentecost, the birthday of the Church. Some of these gifts, as those of prophecy and miracles, meet us, indeed, even in the Old Testament; and before the resurrection of Christ we find the disciples healing the sick and casting out devils (Matt. xi, 8; Mark vi, 13). But the permanent possession of the Holy Ghost as the Spirit of Christ was attached to his glorification and exaltation to the right hand of the Father (John vii, 39). Thence it followed the steps of the heralds of the Gospel as a holy energy, awakening in every susceptible soul a depth of knowledge, a power of will, and a jubilee of heavenly joy, which formed a glowing contrast with the surrounding paganism. For the Lord had promised (Mark xvi, 17, 18) that the gifts of speaking with tongues, casting out devils, and healing, should be not confined to a few, but bestowed on the mass of believers. This blooming glory of the infant Church unfolded itself most luxuriantly among the intellectual, excitable, gifted Greeks, especially in the Corinthian Church. But there, too, the dangers and abuses attending it most frequently appeared. The usual medium of communicating spiritual gifts was the laying on of the apostles' hands (Acts viii, 17; xix, 6; 1 Tim. iv, 11); yet on Cornelius and his company the Holy Ghost fell immediately after the simple preaching of the Gospel, and they began to speak with tongues and prophecy, to the great astonishment of the Jewish-Christian brethren, before Peter had baptized them (Acts x, 44, 46).

"It is the prevailing view that the charisms, some of them at least, as those of miracles and tongues, belong not essentially and permanently to the Church, but were merely a temporary adventitious efflorescence of the apostolic period, an ornamental appendage, like the wedding-dress of a youthful bride, and afterwards disappeared from history, giving place to the regular and natural kind of moral and religious activity. So, among the ancients, Chrysostom, who begins his twenty-ninth homily on the Epistle to the Corinthians with these words: *Τούτο ἄπαν τὸ χωρίον σφόδρα ἴσθιν ἀσάφεις, τὴν δὲ ἀσάφειαν ἢ τῶν πραγμάτων ἄγνοιά τε καὶ ἔλλειψις ποιῆι, τῶν τότε μὲν συμβανόντων, ἄνν δὲ οὐ γνωσμένων.* Among moderns compare, for example, Olshausen (*Comment.* iii, 683), who makes the charismatic form of the Spirit's operation cease with the third century. With special distinctness, this view is expressed by Trautmann as follows (*Die Apostol. Kirche*, 1848, p. 309): 'As, in the case of marriage, the festivity of the wedding-day cannot always last, any more than the inspiration of the first love when the seriousness and steady activity of the common pilgrimage just begun comes on; as, according to the universal order of nature, the blossom must fall away if the fruit is to thrive—though, on the other hand, the fruit does not appear without the preceding blossom—so that gush of heavenly powers on the day of Pentecost could not, must not continue in the Church. It could not—because the earthly human nature is not able constantly to bear the bliss of ecstasy and such mighty streams of power from above, as is shown by the example of the three chosen disciples on the Mount of Transfiguration. It must not—because

the continuance of the blossom would have hindered the development of the fruit. The splendor of these higher powers would unavoidably have fixed the eye and the heart too much on externals, and the proper object and work of faith, the inward conquest of the world, would have been neglected.' The Irvingites, on the contrary, like the Montanists of the second century, look upon these apostolic gifts and offices as the necessary conditions of a healthy state of the Church at any time; make their disappearance the fault of Christianity; and hold it impossible to remedy the defects of the Church without a revival of the charisms and the apostolate. They appeal to such passages as 1 Cor. xii, 27-31; Eph. iv, 11-13, where undue emphasis is laid on 'till;' and to 1 Thess. v, 19, 20; 1 Cor. xii, 31; xiv, 1, where the apostle not only warns Christians against quenching the holy fire of the Spirit, but also positively requires them to strive earnestly after his miraculous gifts. So Thiersch, the (only) scientific theologian of the Irvingite community, in his *Vorlesungen über Katholicismus und Protestantismus*, i, 80 (2d edit.); compare my articles on 'Irvingism and the Church Question' in the *Deutsche Kirchenfreund*, vol. iii, Nos. 2, 3, 5, and 6, particularly p. 223 sq. The Mormons, too, or 'Church of Jesus Christ of Latter-Day Saints,' whose rise (April 6, 1830) was almost simultaneous with the appearance of Irvingism in England, notwithstanding their radical difference in spirit and conduct, likewise claim to possess all the offices and spiritual gifts of the apostolic Church. Their founder, Joseph Smith, lays down, among other articles of faith: 'We believe in the same organization that existed in the primitive Church, viz. apostles, prophets, pastors, teachers, evangelists, etc. We believe in the gift of tongues, prophecy, revelation, visions, healing, interpretation of tongues,' etc. (*Hist. of all the Relig. Denominations in the U. S.* p. 348, 2d edit.). There seems to us to be here a mixture of truth and error on both sides. In these charisms we must distinguish between the essence and the temporary form. The first is permanent; the second has disappeared, yet breaks out at times sporadically, though not with the same strength and purity as in the apostolic period. In the nature of the case, the Holy Ghost, when first entering into humanity, came with peculiar creative power, copiousness, and freshness; presented a striking contrast to the mass of the unchristian world; and by this very exhibition of what was extraordinary and miraculous, exerted a mighty attraction upon the world, without which it could never have been conquered. Christianity, however, aims to incorporate herself in the life of humanity, enter into all its conditions and spheres of activity as the ruling principle, and thus to become the second, higher nature. As it raises the natural more and more into the sphere of the Spirit, so in this very process it makes the supernatural more and more natural. These are but two aspects of one and the same operation. Accordingly we find, that as fast as the reigning power of heathenism is broken, those charisms which exhibited most of the miraculous become less frequent, and after the fourth century almost entirely disappear. This is not owing to a fault of Christianity, for at that very time the Church produced some of her greatest teachers, her Athanasius and her Ambrose, her Chrysostom and her Augustine. It is rather a result of its victory over the world. Spiritual gifts, however, did not then fully and forever disappear; for in times of great awakening, and of the powerful descent of the Spirit, in the creative epochs of the Church, we now and then observe phenomena quite similar to those of the first century, along with the corresponding dangers and abuses, and even Satanic imitations and caricatures. These manifestations then gradually cease again, according to the law of the development of a new principle as just stated. Such facts of experience may serve to confirm and illustrate the phenomena of the apostolic age. In judging of

them, moreover, particularly of the mass of legends of the Roman Church, which still lays claim to the perpetual possession of the gift of miracles, we must proceed with the greatest caution and critical discrimination. In view of the over-valuation of charisms by the Montanists and Irvingites, we must never forget that Paul puts those which most shun free inspection, and most rarely appear, as the gift of tongues, far beneath the others, which pertain to the regular vital action of the Church, and are at all times present in larger or smaller measure, as the gifts of wisdom, of knowledge, of teaching, of trying spirits, of government, and, above all, of love, that greatest, most valuable, most useful, and most enduring of all the fruits of the Spirit (1 Cor. xiii).

“Finally, as to the *classification* of the charisms. They have often been divided into extraordinary or supernatural in the strict sense, and ordinary or natural. (So by Neander; also by Conybeare and Howson, *The Life and Epistles of St. Paul* [London, 1853], i, 459.) But this is improper, for, on the one hand, they all rest on a natural basis, even the gift of miracles (upon the dominion of mind over body, of will over matter); and, on the other, they are all supernatural. St. Paul derives them all from one and the same Spirit, and it is only their supernatural, divine element, that makes them charisms. Nor, according to what has been already said, can the division into permanent, or those which belong to the Church at all times, and transitory, or such as are confined to the apostolic period, be strictly carried out. We therefore propose a psychological classification, on the basis of the three *primary faculties of the soul*; they all being capable and in need of sanctification, and the Holy Ghost, in fact, leaving none of them untouched, but turning them all to the edification of the Church. With this corresponds also the classification according to the different *branches of the Church-life*, in which the activity of one or the other of these faculties thus supernaturally elevated predominates. This would give us three classes of charisms: 1. Those which relate especially to *feeling and worship*. 2. Those which relate to *knowledge and theology*. 3. Those which relate to *will and Church government*. To the gifts of feeling belong speaking with tongues, interpretation of tongues, and inspired prophetic discourse; to the theoretical class, or gifts of intellect, belong the charisms of wisdom and of knowledge, of teaching and of discerning spirits; to the practical class, or gifts of will, the charisms of ministration, of government, and of miracles. *Faith* lies back of all, as the motive power, taking up the whole man, and bringing all his faculties into contact with the divine Spirit, and under his influence and control.”

On the special gifts, see further in Schaff, *Hist. of the Apost. Church*, § 117–120. On the gift of tongues, see TONGUES, GIFT OF. See also Jortin, *Remarks on Ecclesiastical History*; Doddridge, *Lectures on Pneumatology*; Neander, *Planting and Training*, ch. i; Delitzsch, *Biblical Psychology*, part v; Martensen, *Christian Dogmatics*, § 233–235; Herzog, *Real-Encyklop.* iv, 735 sq.; and the art. CATHOLIC APOSTOLIC CHURCH; PLYMOUTH BRETHREN.

**Giftheil**, LUDWIG FRIEDRICH, a native of Suedia, made himself a name in the 17th century by his fanatical denunciations of the State Church and its ministers. The date of his birth is not known, but he began to write during the Thirty-Years' War. Giftheil not only opposed the religious institutions of his day, but also believed himself called to warn the governments against war and bloodshed. For this object he wrote to the king of England, in 1643–1644, *Zween Brieffe, gerichtet an die Mächtigen in England*, etc.; then, in 1647, his *Eine neue Declaration aus Orient*, etc. He continued his warnings also to Cromwell, and, among other things, called the protector “field-marshal of the devil, highwayman, thief, and murderer.”

After wandering over more than the half of Europe, he died at Amsterdam in 1611. See Arnold, *Kirchen-u. Ketzehist.* iii, 10; Böhme, *8 Bücher v. d. Reformation der Kirche in England* (Altona, 1734, p. 941 sq.); Herzog, *Real-Encyklop.* v, 155. (J. N. P.)

**Giger**, GEORGE MUSGRAVE, an eminent divine and scholar in the Presbyterian Church, was born in Philadelphia June 6, 1822. He graduated with high honor at Nassau Hall in 1841, and studied divinity in the Theological Seminary at Princeton in 1844. “Soon after finishing his college course he was chosen tutor in New Jersey College. This position he held till 1846, when he was elected adjunct professor of mathematics. In the following year he was elected adjunct professor of Greek, and in 1854 professor of the Latin language and literature. He held this chair till 1865, when failing health obliged him to resign. He died in Philadelphia Oct. 11, 1865. Dr. Giger was heartily attached to the interests of the college with which he was so long connected. He bequeathed to it his library, and it is also a residuary legatee to the extent of thirty thousand dollars.” He also left legacies to “Clio Hall,” one of the college societies, and to the order of Masons.—Wilson's *Presbyterian Historical Almanac*, ix, 146.

**Gihon** (Heb. *Gichon*, גִּיחֹן, in 1 Kings גִּיחֹן, a stream, as breaking forth from a fountain; Sept. in Gen. ii, 13 Γεῶν v. r. Γῆων, in 1 Kings i, 33, 38 Γῆων, in 2 Chron. xxxii, 30 Γεῶν, undistinguishable in 2 Chron. xxxiii, 14; Vulg. *Gihon*), the name of two water-courses. Gesenius compares Job xl, 23, and the Arabic *jayhama* and *jayhunu*, spoken of several larger Asiatic streams, as the Ganges, Araxes, etc.

1. The second of the four rivers of Eden, said to flow around the land of *Cush* or Ethiopia (1 Gen. ii, 13). What river is actually denoted here is a matter of great dispute and uncertainty; perhaps the face of the country in question has been so greatly changed since that time (although the present tense is used by Moses in the description) as to efface the distinctive marks given. See PARADISE. We may here remark, however, that the usual interpretation, and the one adopted by Gesenius, is that of Josephus (Γηών, *Ant.* i, 1, 3), which identifies the Gihon with the Nile; so also the Sept., which in Jer. ii, 18, for *Sutor* or the Nile, has Γηών, and in Eccles. xxiv, 27 puts Γηών (A. V. “Geon”) for the Nile. The Mohammedans likewise reckon the Nile as one of the rivers of Paradise (*Fundgrub. des Orients*, i, 304). Others regard the Oxus as meant (Rosenmüller, *Alterth.* i, 1, p. 184; Ritter, *Erdk.* ii, 480), others the Araxes (Ireland); others still the Ganges (Ewald, *Isr. Gesch.* i, 335).—Winer, i, 428.

The second river of Paradise presents difficulties not less insurmountable than the first, or Pison. Those who maintained that the Pison is the Ganges held also that the Gihon was the Nile. One great objection to this theory is, that although in the books of the Old Testament frequent allusion is made to this river, it nowhere appears to have been known to the Hebrews by the name Gihon. The idea seems to have originated with the Sept. rendering of גִּיחֹן by Γηών in Jer. ii, 18; but it is clear, from the manner in which the translators have given the latter clause of the same passage, that they had no conception of the true meaning. Among modern writers, Bertheau (quoted by Delitzsch, *Genesis*) and Kalisch (*Genesis*) have not hesitated to support this interpretation, in accordance with the principle they adopt, that the description of the garden of Eden is to be explained according to the most ancient notions of the earth's surface, without reference to the advances made in later times in geographical knowledge. If this hypothesis be adopted, it certainly explains some features of the narrative, but, so far from removing the difficulty, it introduces another equally great. It has yet to be proved that the opinions of the Hebrews on these points were as

contradictory to the now well-known relations of land and water as the recorded impressions of other nations at a much later period. At present we have nothing but categorical assertion. Pausanias (ii, 5), indeed, records a legend that the Euphrates, after disappearing in a marsh, rises again beyond Ethiopia, and flows through Egypt as the Nile. Arrian (*Exp. Alex.* vi, 1) relates that Alexander, on finding crocodiles in the Indus, and beans like those of Egypt on the banks of the Acesines, imagined that he had discovered the sources of the Nile; but he adds, what those who make use of this passage do not find it convenient to quote, that on receiving more accurate information Alexander abandoned his theory, and cancelled the letter he had written to his mother Olympias on the subject. It is but fair to say that there was at one time a theory afloat that the Nile rose in a mountain of Lower Mauretania (Pliny, *H. N.* v, 10).

The etymology of Gihon (גִּיחֹן, *to burst forth*) seems to indicate that it was a swiftly-flowing, impetuous stream. According to Golius (*Lex. Arab.*), *Jichûn* is the name given to the Oxus, which has, on this account, been assumed by Rosenmüller, Hartmann, and Michaelis to be the Gihon of Scripture. But the Araxes, too, is called by the Persians *Jichûn ar-Rus*, and from this circumstance it has been adopted by Reland, Calmet, and colonel Chesney as the modern representative of the Gihon. It is clear, therefore, that the question is not to be decided by etymology alone, as the name might be appropriately applied to many rivers. That the Gihon should be one of the channels by which the united stream of the Tigris and Euphrates falls into the Persian Gulf, was essential to the theory which places the garden of Eden on the Shat el-Arab. Bochart and Huet contended that it was the easternmost of these channels, while Calvin considered it to be the most westerly. Hopkinson and Junius, conceiving that Eden was to be found in the region of Auranitis (= *Audanitis, quasi Edenitis*), on the Euphrates, were compelled to make the Gihon coincide with the Naharsar, the Marses of Amm. Marc. (xxiii, 6, § 25). That it should be the Orontes (Leclerc), the Ganges (Buttmann and Ewald), the Kur, or Cyrus, which rises from the side of the Sughanlou mountain, a few miles northward of the sources of the Araxes (Link), necessarily followed from the exigencies of the several theories. Rask and Verbrugge are in favor of the Gyndes of the ancients (Herod. i, 189), now called the Diyâlah, one of the tributaries of the Tigris. Abraham Peritsol (Ugolino, vol. vii) was of opinion that the garden of Eden was situated in the region of the Mountains of the Moon. Identifying the Pison with the Nile, and the Gihon with a river which his editor, Hyde, explains to be the Niger, he avoids the difficulty which is presented by the fact that the Hiddekel and P'raih are rivers of Asia, by conceiving it possible that these rivers actually take their rise in the Mountains of the Moon, and then run under ground till they make their appearance in Assyria. Equally unsatisfactory is the explanation of Ephraem Syrus that the four rivers have their source in Paradise, which is situated in a very lofty place, but are swallowed up by the surrounding districts, and, after passing underneath the sea, come to light again in different quarters of the globe.—Smith, s. v. Eden.

Inasmuch as the sacred narrative makes it evident that all the rivers in question took their origin from the head waters of the Euphrates and the Tigris, we must refer the Gihon to one of the streams of the same region, namely, the lake system of Central Armenia, in the vicinity of Lake Van. As the Euphrates and Tigris flow southerly, so we may naturally conclude that by the Pison and Gihon are intended rivers flowing northerly, probably one towards the Caspian, and the other towards the Euxine. No better representative of the Gihon can be found in this region than the *Araxes* (Ἀράξης) of antiquity, which, as we have seen,

to this day bears the same name among the Arabs. This is a large river in Armenia Major, which takes its rise from a number of sources in Mount Abus (the present Bin-Gol), nearly in the centre of the space between the east and west branches of the Euphrates (Strabo, p. 531; Pliny, vi, 10; Ptolemy, v, 13; § 3, 6, 9). The general course may be described as east, then south-east, and, after flowing in a north-easterly direction, it resumes its south-east course, and, after its junction with the Cyrus (Kur), it discharges itself into the Caspian Sea (Col. Monteith, in the *London Geogr. Journ.* vol. iii). It is the modern *Arras* (Smith, *Dict. of Class. Geogr.* s. v.). See EDEX.

2. A fountain near Jerusalem, to which the young Solomon was taken to be anointed king (1 Kings i, 33, 38), out of sight, but within hearing of En-rogel, with the city between (ver. 9, 41), but its direction is not indicated. Subsequently Hezekiah "stopped the upper water-course [or upper outflow of the waters] of Gihon, and brought it straight down to the west side of the city of David" (2 Chron. xxxii, 30; xxxiii, 14). This was, perhaps, on occasion of the approach of the Assyrian army under Sennacherib, when, to prevent the besiegers from finding water, great numbers of the people labored with much diligence in stopping the water of the fountains without the city, and in particular of "the brook that ran through the midst of the land" (2 Chron. xxxii, 3, 4). The author of the book of Sirach (xlviii, 17) also states that "Hezekiah brought water into the midst of the city; he dug with iron into the rock, and built fountains for the waters." The fountain of Gihon is also mentioned by Josephus as lying outside the city (Γῶν, *Ant.* vii, 14, 5). From a comparison of these passages, the editor of the *Pictorial Bible* (on 2 Chron. xxxii) arrived at the conclusion, since confirmed by Dr. Robinson (*Researches*, i, 313), that there existed anciently a fountain of Gihon on the west side of the city, which was "stopped" or covered over by Hezekiah, and its waters brought by subterranean channels into the city. Before that time it would naturally have flowed down through the valley of the Gihon, and probably formed the brook which was stopped at the same time. "The fountain may have been stopped, and its waters thus secured very easily by digging deep and erecting over it one or more vaulted subterranean chambers. Something of the very same kind is still seen in the fountains near Solomon's Pools beyond Bethlehem, where the water rises in subterranean chambers, to which there is no access except down a narrow shaft like a well. In this way the waters of Gihon would be withdrawn from the enemy and preserved in the city, in which they would seem to have been distributed among various reservoirs and fountains." From all these circumstances there seems little room to doubt that an open fountain, called "the fountain of Gihon," did anciently exist on the west side of the city, the waters of which may still continue to flow by subterranean channels down to the ancient Temple, and perhaps to Siloam. This fountain was probably near the present Upper Pool, in the valley west of Jerusalem. This Upper Pool is a large tank, which is dry in summer, but in the rainy season becomes full, when its waters are conducted by a small, rude aqueduct or channel to the vicinity of the Jaffa Gate, and so to the Pool of Hezekiah within the city (Robinson's *Researches*, i, 352, 512-514). Mr. Williams (*Holy City*, ii, 480) suggests another route for the water in question, namely, that the upper spring of Gihon once had its issue on the north side of the city, not far from the tombs of the kings, where its waters were originally received into a basin called the Serpent's Pool, and thence flowed down the valley of Jehoshaphat. This upper outflow Hezekiah stopped, and brought the water by an aqueduct down the Tyropæon to the Temple, whence the surplus flowed off by an old channel to the fountain of the Virgin, and was continued through

a new bore to the Pool of Siloam, which Mr. Williams thinks was the Lower Pool of Isa. xxii, 9, 11. Schwarz (*Palest.* p. 266) likewise confounds the lower spring of Gihon with Siloam. This latter, he says, has the same peculiar qualities as the water of a cistern found between the castle of David and the Temple Mount, showing the course of the now closed upper fount of Gihon. From the terms of the first passage in which Gihon is mentioned (1 Kings i, 33, 38, 45), it is evident it was at a lower level than the city—"Bring him down (גִּיְהוֹן) upon (גִּיְהוֹן) Gihon"—"They are come up (גִּיְהוֹן) from thence." With this agrees a later mention (2 Chron. xxxiii, 14), where it is called "Gihon-in-the-valley," the word rendered valley being *nachal* (נַחַל). In this latter place Gihon is named to designate the direction of the wall built by Manasseh—"outside the city of David, on the west of [rather to  $\frac{1}{2}$ ] Gihon-in-the-valley to the entrance of the fish-gate." It is not stated in any of the above passages that Gihon was a spring; but the only remaining place in which it is mentioned suggests that idea, or at least that it had given its name to some water—"Hezekiah also stopped the upper source or issue (נִצְּרָה, from נִצַּר, to rush forth; incorrectly 'water-course' in A. V.) of the waters of Gihon" (2 Chron. xxxii, 30). If the place to which Solomon was brought down on the king's mule was Gihon-in-the-valley—and from the terms above noticed it seems probable that it was—then the "upper source" would be some distance away, and at a higher level. Josephus also speaks of water brought to the tower of Hippicus (*War*, v, 7, 3), which could only have come from the west. The following are therefore the views propounded as to its real import and locality: (1) Some affirm that Gihon was the ancient name of the valley of Jehoshaphat, and that it is compounded of the words נָחַל, "a valley," and יָפָה, "beauty." The fountain of the Virgin, which rises at the bottom of the valley, had originally flowed into the brook Kidron, but was artificially carried by a conduit across the ridge of Zion (?) to the Pool of Siloam. This was the lower water-course of Gihon. More to the north was anciently another spring, called the upper water-course of Gihon, which was stopped or sealed in the time of Hezekiah, and conveyed to the west side of the city of David (Lewin, *Jerusalem*, p. 11 sq.). It will be seen that in this theory the "city of David" is identified with Moriah. (2) Others think that Gihon was the old name of the Tyropæan valley; that the Pool of Siloam was the "lower Gihon;" and that the "upper Gihon" was only the table-land north of the Damascus gate (Williams, *Holy City*, i, 124, supplement). (3) Others hold that Gihon was a name sometimes given to the valley of Hinnom, and that the "upper outflow" was at the head of that valley west of the city (Robinson, *B. R.* i, 346). (4) An English engineer, recently sent out to survey the waters of Jerusalem, has reported that there is not, and from the position of the city and the character of the strata there could not be, any perennial fountain in or around Jerusalem. The so-called Fountain of the Virgin, he says, is supplied by the leakage from the great cisterns under the Temple area; and the peculiar taste of its water is occasioned by stagnation and filth (MS. Report). If this be so, then Gihon could neither be a fountain nor a perennial stream. The results of this examination of authorities may be thus stated. The upper fountain of Gihon was in the head of the valley of Hinnom, and a stream from it ran down through that valley. The fountain was covered by Hezekiah, and the water brought into the city of David by a concealed channel, partly hewn in the rock. There was an "upper" and a "lower" pool in this valley. A close examination of the place tends to confirm these views. No fountain has yet been discovered, nor could

it be without extensive excavations; but a section of an old aqueduct was laid bare when sinking the foundations of the new church on the northern summit of Zion. It was twenty feet beneath the surface, in places excavated in the rock, and its direction was from west to east (Bartlett, *Walks about Jerusalem*, p. 84). This may be a portion of Hezekiah's aqueduct from Gihon; and it may have carried the water to the Temple area as well as to Zion. In the valley of Hinnom are still two great "pools;" one at its head, called *Birket el-Mamilla*; another west of the present Sion gate in the bottom of the glen, called *Birket es-Sultan*. The fountain or rivulet in question is doubtless a part of the aqueduct system of Jerusalem, all of it probably traceable to the supply from the pools of Solomon at Bethlehem.—Kitto, s. v.; Smith, s. v. See JERUSALEM.

**Gil**, JUAN, commonly called Dr. Egidius, was one of the early converts to the Reformation in Spain. He was born at Olivera, in Aragon, and was educated at the University of Alcala, where he devoted himself especially to the Scholastic theology. After his ordination he became canon-preacher at the cathedral of Seville, and professor of theology at Sigüenza. Under the influence of Rodrigo de Valer (q. v.) he was led to the careful study of the Bible, and the effect appeared in the life and power of his preaching, which was soon noised abroad. He united with Vargas (q. v.) and Ponce de la Fuente in a plan for diffusing practical religious life. In 1550 he was nominated by the emperor to the bishopric of Tortosa, and this preferment excited the anger of his enemies. He was seized and imprisoned by the Inquisition on a charge of heresy. The emperor and the chapter of Seville interfered in his behalf; but, after a singular trial (for details, see M'Crie), he was condemned to imprisonment (1551), from which he was released in 1555. He died soon after. His remains were taken from the grave by order of the Inquisition, and burnt, as those of a Lutheran heretic.—M'Crie, *Reformation in Spain*, ch. iv.

**Gil'alai** (Heb. *Gilalay'*, גִּילְאֵי, perhaps *dungy* [Gesenius], or *weighty* [Fürst]; Sept. Γελλώλ), one of the priests appointed by Nehemiah to aid Zechariah in the musical services under Ezra at the dedication of the walls of Jerusalem (Neh. xii, 36). B. C. 446.

**Gilbert de la Porrée** (*Gislebertus Porretanus*), a Scholastic theologian and follower of Abelard, was born at Poitiers in 1070. He studied philosophy under Bernard of Chartres, and theology under Anselm and Radulfus of Laon. He began to lecture at Chartres, and both there and at Paris achieved great distinction as a profound logician and an original teacher. In 1142 he was made bishop of Poitiers, but did not give up his metaphysical pursuits. He treated theology more as a metaphysician than as a divine, making more use of Aristotle than of Scripture or of the fathers. His style was very obscure. He was a thorough Realist in philosophy. For his theories with regard to the divine nature he was accused at the Council of Rheims in 1148, where Bernard of Clairvaux headed the prosecution against him. The charges were founded on the following propositions of Gilbert: 1. That the divine nature, the substance of God, is not God. 2. The properties of the divine persons are not the persons themselves; and the persons of the Trinity are one only in virtue of their divinity. 3. It was not the divine nature, but only the person of the Word, that became incarnate. 4. There is no merit possible but the merit of Christ. Gilbert was condemned, though some of the cardinals voted with him. He submitted to the decision of the council, and remained afterwards unmolested in his diocese. He died in 1154. Gilbert wrote many books, part of which are yet in MS. Among those printed are *Commentarius in quatuor libros de Trinitate* of Boethius, published in

Boethii Opera (Bâle, 1570, fol.)—*Liber sex Principiorum*, pub. in Hermolaus Barbarus's edition of Aristotle. See Lauréau, *Philosophie Scolastique*, i, 296 sq.; Cousin, *Introd. aux Ouvrages inédits d'Abeillard*; Baur, *Dreiebnigkeit*, ii, 509 sq.; Neander, *Ch. History*, iv, 410, 461; Neander, *History of Dogmas*, p. 489, 497; Hoefler, *Nov. Biog. Générale*, xx, 484.

**Gilbert, Eliphalet Wheeler**, D.D., a Presbyterian minister, and president of Delaware College, was born at Lebanon, Columbia Co., N. Y., Dec. 19, 1793, and graduated at Union College in 1813. After completing his theological course at Princeton, he was licensed in 1817, went on a mission to the West, and on his return was elected pastor of the Second Presbyterian Church in Wilmington, Del. He was frequently engaged in missionary labors; and, on being released from his charge at Wilmington in 1834, he became agent for the American Education Society, but resigned on being chosen president of Delaware College. In 1835 he returned to Wilmington, where he remained till 1841, when he was recalled to the presidency of Delaware College. After a second resignation of this office in 1847, he was installed pastor of the Western Presbyterian Church, Philadelphia, and died July 31, 1853. He published *The Letters of Paul and Amicus*; two tracts, viz. *Regeneration and Perseverance*; three articles in the *Presb. Review*, viz. *Geology, The Apocalypse*, and *Millenarianism*.—Sprague, *Annals*, iv, 596.

**Gilbert, Gad Smith**, a minister of the Methodist Episcopal Church, was born in New Haven, Connecticut, September 22, 1814. He studied at the Wesleyan University with a view to the ministry, but for several years he turned his attention to secular pursuits. In 1842 he joined the New York Conference, and was stationed at New Milford, Connecticut. Subsequently he was stationed at Woodbury and Wolcottville. In 1847 he located, and removed to Louisiana on account of the sickness of his wife, who died during the same year. While at the South, however, he had charge of the Methodist Church at Opelousas, La. In 1848 he returned and joined the New York East Conference, and was stationed at Greenport, L. I. After that he was stationed at Southport, Conn., First Place, Brooklyn, and Rye, N. Y. In 1855 he was agent for the Wesleyan University. In 1856 he was stationed at Port Chester, N. Y., and afterwards at Second Avenue, New York City, Sag Harbor, L. I., De Kalb Avenue, Brooklyn, Tompkins Avenue, Brooklyn, which society he organized. His last appointment was Southport, Conn. He died in New Haven, August 1, 1866. Shortly before his death he praised God, saying, "This house is as that of Obed-Edom, where the ark of the Lord rested; it is the gate of heaven; heaven has come down to earth; the angels are here. This disease is drawing my body down to earth, but Jesus is drawing my soul up to heaven; I shall soon be there." And just before he ceased to live on earth he said, "Is this dying? it is felicity! O how precious Jesus is! Glory, halleluiah!"—*Minutes of Conferences*, 1867, p. 77.

**Gilbert, Joseph**, an English Independent minister, was born in 1778, and was for many years pastor at Nottingham; died in 1852. He wrote *The Christian Attonement* (Cong. Lecture, London, 1836, 8vo; 2d edit. 1852). See *British Critic*, xxi, 450; *Life of Gilbert*, by his widow (Lond. 1853, 12mo); Darling, *Cyclop. Bibliographica*, i, 1254; Allibone, *Dictionary of Authors*, i, 668.

**Gilbert of Sempringham** (GILBERT), St., founder of the order of Gilbertines, was the son of Joscelin, lord of Sempringham and Tirington, and was born in 1083. After completing his studies at Paris, he was ordained priest by the bishop of Lincoln, and received from his father the stewardship of two estates. He then founded a house for seven poor maidens who had resolved to lead a life of chastity, and who made vows of absolute seclusion. They were attended only

by a few servants, from whom they received all they required through a window. The property with which he had endowed this institution was attended to by poor laborers, whom he also subjected to certain rules and observances. As similar institutions were soon erected in other places, Gilbert requested pope Eugene III to incorporate his foundation with the Cistercians. Eugene not complying with the request, he was obliged to provide in some other way for the guidance of his congregations, and in that view attached a convent of canons to each nunnery, framing at the same time

Regular Canon of the Order of St. Gilbert.

Nun of the Order of St. Gilbert.

very strict rules to keep them each separate: he placed the nuns under the rule of St. Benedict, and the canons under that of St. Augustine. The institution counted some 2200 men and several thousand women among its members, and hospitals for the poor, the sick, widows, and orphans were connected with their regular establishments. Gilbert died in 1180, aged 106 years. The strictness of his life had not protected him from calumny. He was, however, canonized by pope Innocent III in 1202. At the time of the Reformation the order possessed 21 houses, and 11 double convents inhabited by both nuns and monks, but they were so strictly divided that the nuns received even communion through a window, and the canons administered the extreme unction to dying nuns without seeing them. Whenever it became absolutely necessary that a nun and monk should hold communication with each other, a witness was obliged to attend; hence a body of ten canons was appointed, together with a number of lay brethren, subject to the rule of Cîteaux. The order was never propagated outside of England. The rule of the order is given in full by Holstenius (tom. ii). See Hurter, *Innocenz III u. s. Zeugenossen*, iv, 230; Herzog, *Real-Encyclop.* v, 413 sq.; Hoefler, *Nov. Biog. Gén.* xx, 488.

**Gilbertines.** See GILBERT OF SEMPRINGHAM.

**Gilbo'á** [many *Gil'boá*] (Heb. *Gilbo'á*, גִּלְבּוֹאִי, *boiling spring*, prob. from a neighboring fountain; Sept. and Joseph. *Ant.* vi, 14, 2, also Euseb. *Onom.* Γελβωά), usually called *Mount Gilboa* (גִּלְבּוֹאִי הַר), a mountain near which (according to some) Gideon pitched on the eve of his overthrow with the Midianites (Judg. vii, 1 [see GILEAD, 2]); but especially memorable for the defeat of Saul by the Philistines, where his three sons were slain, and where he himself died by his own hand (1 Sam. xxviii, 4; xxxi, 1-8; 2 Sam. i, 6-21; xxi, 12; 1 Chron. x, 1, 8). When the tidings were carried to David, he broke out into this pathetic strain: "Ye mountains of Gilboa, let there be no rain upon you, neither dew, nor field of offering" (2 Sam. i, 21). The circumstances of the narrative would alone suffice to

direct our attention to the mountains which bound the great plain of Esdraelon on the south-east, and are interposed between it and the Jordan valley. (See Stanley's *Sinai and Palestine*, p. 337.) Here there are a number of ridges, with a general direction from north-west to south-east, separated by valleys running in the same direction. The largest of these valleys is the southernmost: it is a broad, deep plain, about two miles and a half wide, and leading direct into the Jordan valley. This is supposed to be distinctively (for the plain of Esdraelon is sometimes so called) the Valley of Jezreel. The higher mountains which bound it on the south undoubtedly form Mount Gilboa. Eusebius mentions the mountains of Gilboa as lying six miles from Scythopolis, with a large village upon them called *Gelbus* (Γελβούρι). There is still, indeed, an inhabited village, in whose name of *Jelbon* that of Gilboa may be recognised (Robinson's *Researches*, iii, 157, 170). The fountain implied in the name Gilboa may be that mentioned by William of Tyre (xxii, 26) under the name of Tubania (טובניא), being the large fountain still found at the north-eastern base, half a mile from the ruins, called in Scripture both the "Well of Harod" (Judg. vii, 1) and "The fountain of Jezreel" (1 Sam. xxix, 1), and now called Ain-Jalud. See HAROD.

A knowledge of the topography of this region gives great vividness to several of the Scripture narratives, but especially to that of the fatal battle in which Saul fell. The range about six miles north of Gilboa, and of nearly equal elevation and length, was anciently called the "hill of Moreh" (Judg. vii, 1), but now Jebel ed-Duhly (and by travellers "Little Hermon"). The intervening valley, named from the city of Jezreel at the western extremity of Gilboa, has at its eastern end, overlooking the Jordan, the mound and ruins of Bethshean. On the other side of the valley, and near the base of Moreh, stands Shunem; and away behind the latter hill, hidden from view, is the village of Endor. The Philistines encamped on the north side of the valley at Shunem; and Saul took up a position by the fountain of Jezreel, at the base of Gilboa (1 Sam. xxviii, 4; xxix, 1). From the brow of the hill above the camp Saul had a full view of the enemy, and he was struck with terror at their numbers (xxviii, 5). The position he had chosen was a bad one. There is a gradual descent in the valley from Shunem to the base of Gilboa at the fountain, while immediately behind it the hill rises steep and rocky. The Philistines had all the advantage of the gentle descent for their attack, and both front and flanks of the Israelites were exposed, and retreat almost impossible up the steep hill side. On the night before the battle Saul went to Endor. The battle seems to have begun early in the morning, when the king was wearied and dispirited (xxviii, 19). The Israelites were broken at once by the fierce onset of the enemy, and the slaughter was terrible as they attempted to flee up the sides of Gilboa. While the terror-stricken masses were clambering up the rugged slopes, they were completely exposed to the arrows of the Philistine archers. "They fell down slain in Mount Gilboa" (xxxi, 1); "The Philistines followed hard upon Saul and upon his sons," probably when they tried to rally their troops. The three sons fell beside their father; "and the battle went sore against Saul, and the archers hit him; and he was sore wounded of the archers" (ver. 3). David has caught the peculiarity of the position in his ode: "The beauty of Israel is slain upon the high places;" and, "Jonathan, thou wast slain upon thine high places" (2 Sam. i, 19, 25). The stripping and mutilating of the slain is characteristic of the Arab tribes to this day, and Porter witnessed some fearful instances of it in 1858 near this same spot (*Hand-book for S. and P.* p. 355). The Philistines took the body of Saul and fastened it to the wall of the neighboring fortress of Bethshean, from whence it was snatched by a few

brave men from Jabesh-Gilead, on the opposite side of the Jordan (Stanley, *Jewish Church*, ii, 39 sq.). See SAUL.

The ridge of Gilboa is bleak and bare (Wilson, *Lands of Bible*, ii, 85; First derives from this fact the name of the mountain, q. d. *bare land*, from גִּלְבּוֹא, Heb. Lex. s. v.). The soil is scanty, and the gray limestone rocks crop out in jagged cliffs and naked crowns, giving the whole a look of painful barrenness. One would almost think, on looking at it, that David's words were prophetic (Van de Velde, *Narrative*, ii, 369). The highest point of Gilboa is said to have an elevation of about 2200 feet above the sea, and 1200 above the valley of Jezreel (Van de Velde, *Memoir*, p. 178). The range of Gilboa extends in length some ten miles from W. to E. The modern local name is *Jebel Fukiuh*, and the highest point is crowned by a village and wely called *Wezar* (Porter, *Hand-book*, p. 353).—Kitto, s. v.

**GILDAS THE WISE**, the first British historian, was born in the year 511 (according to Bede, 493), became scholar to Htutus, abbot of Morgan, and was made afterwards abbot of Bangor. The time of his death is uncertain. The legendary accounts of him differ so much that Bale and Usher suppose there were two of the same name, while others doubt the existence of any such person. "In truth, as Mr. Stevenson observes, in his introduction to the Latin text of *Gildas de Excidio Britannie*: 'We are unable to speak with certainty as to the parentage of Gildas, his country, or even his name, the period when he lived, or the works of which he was the author.' Mr. T. Wright attempts to show that Gildas is a fabulous person, and his history the forgery of 'some Anglo-Saxon or foreign priest of the 7th century' (*Biog. Brit. Lit.* Anglo-Saxon period, p. 115-134). But Stevenson, Lappenberg, and others, while admitting the fabulous character of the common accounts, are inclined to believe that Gildas really lived somewhere near the time usually stated" (*English Cyclop.* s. v.). The writings which pass under his name are valuable for their antiquity, and as containing the only information we have of the times in which he wrote; although Gibbon describes him as "a monk who, in the profound ignorance of human life, has presumed to exercise the office of historian, and strangely disfigures the state of Britain at the time of its separation from the Roman empire." They are, (1) *Liber Querulus de excidio Britannie*, etc., a picture of the evils of the times and of the previous ages of British history;—(2) *Castigatio Ordin. Eccles.* (Reproach on the Clergy), a sad account of abominations and vices imputed to the clergy. They are given in Gale's *Hist. Brit.*, etc., *Scriptores xv* (Oxon. 1691, fol.), and in the *Works of Gildas and Nonnus*, translated by J. A. Giles (Lond. 1841, 8vo); also in Gale, *Rerum Angl. Script. Veteres* (1684-87, 3 vols. fol.); but the best edition is that published in 1838 by the Historical Society, and edited by Mr. Joseph Stevenson. There are three English translations of it: one by Habington (Lond. 1638, 8vo); another, entitled *A Description of the State of Great Britain, written eleven hundred years since* (London, 1652, 12mo); and a third by Dr. Giles, but based on that of Habington, and published in Bohn's *Antiquarian Library* (1848). See Wright, l. c.; Poste, *British Researches*; *English Cyclopædia*; Clarke, *Succ. of Sacral Literature*, vol. i.

**GILDER, WILLIAM H.**, a minister of the Methodist Episcopal Church, was born in Philadelphia Sept. 17, 1812, and was educated at the Wesleyan University. He entered the Philadelphia Conference in 1833, and after three years' preaching was compelled by ill health to retire from active service. About 1840 he established at Philadelphia the *Pearl and Repository*, an independent Methodist paper. For some years he was principal of the Female Institute at Bordentown, N. J. He afterwards became president of Flushing Female College, at St. Thomas's Hall, Flushing, L. I. While

at Bordertown he established the *Literary Register*, which he edited for several years. In 1862 he became chaplain of the 40th New-York Regiment, and shared in all its campaigns, following his charge into every battle. In 1863 he was taken with typhoid fever, which greatly impaired his strength. He returned to his post before he was in fit physical condition to do so, and while attending to his duties in the regimental hospital, he contracted small-pox, of which he died at Culpepper, Va., April 13, 1864. No chaplain in the army had a stronger hold upon the affection and confidence of the men than Mr. Gilder. Shortly before his death he said to his son, "I am in the hands of one whom I can trust; I feel that I am perfectly safe;" and when he could no longer speak, he intimated by signs that all was well.—*Minutes of Conferences*, 1863, p. 81.

Gil'eād (Heb. *Gilad'*, גִּלְעָד, generally with the article prefixed, when applied to the region or mountain; properly a stony district, hence, according to Gen. xxxi, 41, *heap* or *hill of testimony*; Sept. Γαλα-*ād*), the name of several men, also of a region and mountain, and perhaps a city. The name Gilead, as is usual in Palestine, describes the physical aspect of the country. It signifies "a hard, rocky region;" and it may be regarded as standing in contrast with Bashan, the other great trans-Jordanic province, which is, as the name implies, a "level, fertile tract." The statements in Gen. xxxi, 48, are not opposed to this etymology. The old name of the district was גִּלְעָד (Gilead), but, by a slight change in the pronunciation, the radical letters being retained, the meaning was made beautifully applicable to the "heap of stones" Jacob and Laban had built up—"and Laban said, this *heap* (גִּלְעָד) is a *witness* (עֵד) between me and thee this day. Therefore was the name of it called *Gilead*" (גִּלְעָד, "the heap of witness"). Those acquainted with the modern Arabs and their literature will see how intensely such a play upon the word would be appreciated by them. This *Gilead* could not have been far from Mahanaim, and was doubtless one of those rounded eminences to the northward which overlook the broad plateau of Bashan (Gen. xxxi, 25; xxxii, 1, 2). See GALEED.

1. A mountainous region east of the Jordan; bounded on the north by Bashan, on the east by the Arabian plateau, and on the south by Moab and Ammon (Gen. xxxi, 21; Deut. iii, 12-17), properly extending from the parallel of Rabbath-Ammon on the south to the river Hieromax on the north. The same name, however, was given to the *ridge* extending between these parallels. With the exception of the narrow strip of plain along the bank of the Jordan, the mountains, in fact, cover the whole region; hence it is sometimes called "Mount Gilead" (Gen. xxxi, 25), גִּלְעָד הַרְיָבָת; comp. Deut. iii, 12; Jer. i, 19, sometimes "the land of Gilead" (Numb. xxxii, 1, גִּלְעָד הָאֲרָצָה; compare Deut. xxxiv, 1; Numb. xxxiv, 29; Zech. x, 10), and sometimes simply "Gilead" (Psa. lx, 7; Gen. xxxvii, 25; Numb. xxxii, 40; Josh. xvii, 1; Amos i, 3); but a comparison of the several passages shows that they all mean the same thing. There is no evidence, in fact, that any particular mountain was meant by Mount Gilead more than by Mount Lebanon (Judg. iii, 3)—they both comprehend the whole range, and the range of Gilead embraced the whole province, or group of mountains vaguely stated by Eusebius (*Onomast. s. v. Γαλαάδ*) to be connected with Lebanon by means of Mount Hermon. It begins not far from the latter, and extends southward to the sources of the brooks Jabbok and Arnon, thus enclosing the whole eastern part of the land beyond the Jordan (Gen. xxxi, 21; Cant. iv, 1). According to Michaelis (*Mos. Recht*, i, 86), this mountain, which gave its name to the country so called, must even be situated beyond the region

sketched in our maps, and somewhere about the Euphrates. But this is fanciful. Strictly, the name comprehends the mountainous region south of the river Jabbok, where is the highest part of the mountains east of the Jordan; and one ridge is still named *Jebel Jelad* or *Jelud*, from the ruined towns so called upon it (Burckhardt, *Travels in Syria*, p. 348; Robinson's *Researches*, ii, 243, 206; App. p. 167). The inhabitants were called *Gileadites* (Judg. x, 3; 2 Kings xv, 25).

1. *Divisions of the Territory.*—(a.) Gilead is usually, therefore, the name of a large district beyond the Jordan, continually mentioned in the Scriptures in contradistinction to, or apart from, Bashan (Deut. iii, 13; Josh. xii, 5; xiii, 11; xvii, 1; 2 Kings x, 33; 1 Chron. v, 16; Micah vii, 14); though, to judge from its geographical position (as given Numb. xxxii, 26; Deut. iii, 12), it must have comprised the entire possessions of the two tribes of Gad and Reuben, and even the southern part of Manasseh (Deut. iii, 13; Numb. xxxii, 40; Josh. xvii, 2-6); corresponding to the region now called *el-Beka* and *Jebel-Ajha*. Sometimes it is put for the territory of Gad and Reuben alone (Psa. lx, 9; cviii, 9); at others for the tribe of Gad only (Judg. v, 17; comp. v, 16), although this usage is not constant, and in 1 Sam. xiii, 7, the land of Gad and Gilead are joined. The cities Ramoth, Jabesh, and Jazer are usually designated as lying in Gilead.

There is a special descriptive term, which may almost be regarded as a proper name, used to denote the great plateau which borders Gilead on the south and east. The refuge-city Bezer is said to be "in the country of the *Mishor*" (Deut. iv, 43); and Jeremiah (xlviii, 21) says, "judgment is come upon the country of the *Mishor*" (see also Josh. xiii, 9, 16, 17, 21; xx, 8). *Mishor* (מִשׁוֹר) and מִשְׁוֹר signifies a "level plain" or "table-land;" and no word could be more applicable. This is one among many examples of the minute accuracy of Bible topography. See MISHOR.

The extent of Gilead in this general sense we can ascertain with tolerable exactness from incidental notices in the Holy Scriptures. The Jordan was its western border (1 Sam. xiii, 7; 2 Kings x, 33). A comparison of a number of passages shows that the river Hieromax, the modern Sheriat el-Mandhūr, separated it from Bashan on the north. "Half Gilead" is said to have been possessed by Sihon, king of the Amorites, and the other half by Ōg, king of Bashan; and the river Jabbok was the division between the two kingdoms (Deut. iii, 12; Josh. xii, 1-5). The half of Gilead possessed by Ōg must therefore have been north of the Jabbok. It is also stated that the territory of the tribe of Gad extended along the Jordan valley to the Sea of Galilee (Josh. xii, 27); and yet "all Bashan" was given to Manasseh (ver. 30). We therefore conclude that the deep glen of the Hieromax, which runs eastward, on the parallel of the south end of the Sea of Galilee, was the dividing line between Bashan and Gilead. North of that glen stretches out a flat, fertile plateau, such as the name *Bashan* (בָּשָׁן), like the Arabic *bashukh*, signifies "soft and level soil") would suggest; while on the south we have the rough and rugged, yet picturesque hill country, for which Gilead is the fit name. (See Porter, in *Journal of Sac. Lit.* July, 1854, p. 284 sq.; compare *Ib.* Jan. 1852, p. 364.) On the east the mountain range melts away gradually into the high plateau of Arabia. The boundary of Gilead is here not so clearly defined, but it may be regarded as running along the foot of the range. The southern boundary is less certain. The tribe of Reuben occupied the country as far south as the river Arnon, which was the border of Moab (Deut. ii, 36; iii, 12). It seems, however, that the southern section of their territory was not included in Gilead. In Josh. xiii, 9-11, it is intimated that the "plain of Medeba" ("the Mishor" it is called), north of the Arnon, is not

in Gilead; and when speaking of the cities of refuge, Moses describes Bezer, which was given out of the tribe of Reuben, as being "in the wilderness, in the plain country" (i. e. "in the country of the *Mishor*," גִּלְעָד מִשׁוֹר), while Ramoth is said to be in Gilead (Deut. iv, 43). This southern plateau was also called "the land of Zazer" (Numb. xxxii, 1; 2 Sam. xxiv, 5; comp. also Josh. xiii, 16-25). The valley of Heshbon may therefore, in all probability, be the southern boundary of Gilead. Gilead thus extended from the parallel of the south end of the Sea of Galilee to that of the north end of the Dead Sea—about 60 miles; and its average breadth scarcely exceeded 20.

(b.) While such were the usual limits of Gilead, the name is used in a wider sense in two or three parts of Scripture. Moses, for example, is said to have seen, from the top of Pisgah, "all the land of Gilead unto Dan" (Deut. xxxiv, 1); and in Judg. xx, 1, and Josh. xxii, 9, the name seems to comprehend the whole territory of the Israelites beyond the Jordan. A little attention shows that this is only a vague way of speaking, in common use everywhere.

(c.) The district corresponding to Gilead is now divided into two provinces, separated by the Jabbok. The section lying between the Jabbok and the Hieromax is now called *Jebel Ajlun*; while that to the south of the Jabbok constitutes the modern province of *Belka*. One of the most conspicuous peaks in the mountain range still retains the ancient name, being called *Jebel Jil'al*, "Mount Gilead." It is about seven miles south of the Jabbok, and commands a magnificent view over the whole Jordan valley, and the mountains of Judah and Ephraim. It is probably the site of Ramath-Mizpeh of Josh. xiii, 26; and the "Mizpeh of Gilead," from which Jephthah "passed over unto the children of Ammon" (Judg. xi, 29). The spot is admirably adapted for a gathering-place in time of invasion or aggressive war. The neighboring village of es-Salt occupies the site of the old "city of refuge" in Gad, Ramoth-Gilead (q. v.).

II. *History*.—The first notice we have of Gilead is in connection with the history of Jacob (Gen. xxxi, 21 sq.). That patriarch, having passed the Euphrates, "set his face towards Mount Gilead;" he struck across the desert by the great fountain at Palmryra; then traversed the eastern part of the plain of Damascus, and the plateau of Bashan, and entered Gilead from the north-east. "In the Mount Gilead Laban overtook him"—apparently soon after he entered the district; for when they separated again, Jacob went on his way and arrived at Mahanaim, which must have been considerably north of the river Jabbok (Gen. xxxii, 1, 2, 22). See JACOB.

Gilead is not mentioned again in the patriarchal history; but it is possibly this same region which is referred to under the name *Hum* (q. v.), and was inhabited by the gigantic Zuzim. The kings of the East who came to punish the rebellious "cities of the plain," first attacked the Rephaim in Ashteroth Karnaim—i. e. in the country now called *Hauran*; then they advanced southwards against the "Zuzims in Ham;" and next against the Emim in Shaveh-Kiriathim, which was subsequently possessed by the Moabites (Gen. xiv, 5; Deut. ii, 9-19). See EMIM; REPHAIM.

We hear nothing more of Gilead till the invasion of the country by the Israelites. One half of it was then in the hands of Sihon, king of the Amorites, who had a short time previously driven out the Moabites. Og, king of Bashan, had the other section north of the Jabbok. The Israelites defeated the former at Jahaz, and the latter at Edrei, and took possession of Gilead and Bashan (Numb. xxi, 23 sq.). The rich pasture-land of Gilead, with its shady forests and copious streams, attracted the attention of Reuben and Gad, who "had a very great multitude of cattle," and was allotted to them. The future history and habits of the tribes that occupied Gilead were greatly affected by the character

of the country. Rich in flocks and herds, and now the lords of a fitting region, they retained, almost unchanged, the nomad pastoral habits of their patriarchal ancestors. Like all Bedawin, they lived in a constant state of warfare, just as Jacob had predicted of Gad—"a troop shall plunder him, but he shall plunder at the last" (Gen. xlix, 19). The sons of Ishmael were subdued and plundered in the time of Saul (1 Chron. v, 9 sq.), and the children of Ammon in the days of Jephthah and David (Judg. xi, 32 sq.; 2 Sam. x, 12 sq.). Their wandering tent life, and their almost inaccessible country, made them in ancient times what the Bedawi tribes are now—the protectors of the refugee and the outlaw. In Gilead the sons of Saul found a home while they vainly attempted to re-establish the authority of their house (2 Sam. ii, 8 sq.). Here, too, David found a sanctuary during the unnatural rebellion of a beloved son; and the surrounding tribes, with a characteristic hospitality, carried presents of the best they possessed to the fallen monarch (2 Sam. xvii, 22 sq.). Elijah the Tishbite was a Gileadite (1 Kings xvii, 1); and in his simple garb, wild aspect, abrupt address, wonderfully active habits, and movements so rapid as to evade the search of his watchful and bitter foes, we see all the characteristics of the genuine Bedawi, ennobled by a high prophetic mission. See GAD.

Gilead was a frontier land, exposed to the first attacks of the Syrian and Assyrian invaders, and to the unceasing raids of the desert tribes—"Because Machbir, the first-born of Manasseh, was a man of war, therefore he had Bashan and Gilead" (Josh. xvii, 1). Under the wild and wayward Jephthah, Mizpeh of Gilead became the gathering-place of the trans-Jordanic tribes (Judg. xi, 29); and in subsequent times the neighboring stronghold of Ramoth-Gilead appears to have been considered the key of Palestine on the east (1 Kings xxii, 3, 4, 6; 2 Kings viii, 28; ix, 1).

The name *Galaad* (Γαλααδ) occurs several times in the history of the Maccabees (1 Macc. v, 9 sq.), and also in Josephus, but generally with the Greek termination—Γαλααδίτης or Γαλααδηνός (*Ant.* xiii, 14, 2; *War.* i, 4, 3). Under the Roman dominion the country became more settled and civilized; and the great cities of Gadara, Pella, and Gerasa, with Philadelpia on its south-eastern border, speedily rose to opulence and splendor. In one of these (Pella) the Christians of Jerusalem found a sanctuary when the armies of Titus gathered round the devoted city (Eusebius, *H. E.* iii, 5). Under Mohammedan rule the country has again lapsed into semi-barbarism. Some scattered villages amid the fastnesses of Jebel Ajlun, and a few fierce wandering tribes, constitute the whole population of Gilead. They are nominally subject to the Porte, but their allegiance sits lightly upon them. The inhabitants, like the old Gadites, are semi-nomads, whose wealth consists in flocks and herds. Like them, too, they are harassed by the desert tribes; they are inured to arms, and they are noted for their hospitality. The capital of the whole country is es-Salt (Burekhardt, *Trav. in Syria*, p. 270; Buckingham, *Arab Tribes*, p. 21 sq.; Lord Lindsay's *Travels*, ii, 108 sq.).

III. *Description of modern Country*.—The great body of the range of Gilead is Jura limestone, but there are occasional veins of sandstone. The oak and the terebinth flourish on the former, and the pine on the latter. The mountains of Gilead have a real elevation of from two to three thousand feet, but their apparent elevation on the western side is much greater, owing to the depression of the Jordan valley, which averages about 1000 feet. Their outline is singularly uniform, resembling a massive wall running along the horizon. From the distant east they seem very low, for on that side they meet the plateau of Arabia, 2000 feet or more in height. Though the range appears bleak from the distance, yet, on ascending it, we find the scenery rich, picturesque, and in places even grand. The summit is broad, almost like table-land "tossed into wild

confusion of undulating downs" (Stanley, *Sinai and Pal.* p. 314). It is everywhere covered with luxuriant herbage. In the extreme north and south there are no trees, but as we advance towards the centre they soon begin to appear, at first singly, then in groups, and at length, on each side of the Jabbok, in fine forests, chiefly of prickly oak and terebinth. The rich pasture-land of Gilead presents a striking contrast to the nakedness of Western Palestine. Except among the hills of Galilee and along the heights of Carmel, there is nothing to be compared with it as "a place for cattle" (Numb. xxxii, 1). "In passing through the country, one can hardly get over the impression that he is roaming through an English park. The graceful hills, the rich vales, the luxuriant herbage, the bright wild flowers, the plantations of evergreen oak, pine, and arbutus; now a tangled thicket, and now a grove scattered over the gentle slope, as if intended to reveal its beauty; the little rivulets fringed with oleander, at one place running lazily between alluvial banks, at another dashing madly down rocky ravines. Such are the features of the mountains of Gilead. Here, too, we have the cooing of the wood-pigeon, the hoarse call of the partridge, the incessant hum of myriads of insects, and the cheerful chirp of grasshoppers to give life to the scene. Add to all the crumbling ruins of town, village, and fortress, clinging to the mountain-side or crowning its summit, and you have a picture of the country between es-Salt and Gerasa" (Porter, *Handbook for S. and P.* p. 310). Such a picture, too, illustrates at once the fertility ascribed to it by Jeremiah (xxii, 6; i, 19), and the judgments pronounced against it by Amos (i, 3, 13).

Gilead anciently abounded in spices and aromatic gums, which were exported to Egypt (Gen. xxxvii, 25; Jer. viii, 22; xlvi, 11). The balm of Gilead seems to have been valued for its medicinal properties from the earliest times. The Midianitish merchants to whom Joseph was sold were passing through the valley of Jezreel on their way from Gilead to Egypt (Gen. xxxvii, 17). Josephus often mentions this balm or balsam, but generally as the product of the rich plain of Jericho, for example (*Ant.* xiv, 4): "Now when Pompey had pitched his camp at Jericho (where the palm-tree grows, and that balsam which is an ointment of all the most precious, which upon any incision being made in the wood with a sharp stone distils out thence like a juice), he marched in the morning to Jerusalem." Dr. Thomson found in the plain of Jericho some thorn-bushes called the *zukum*, "which is like the crab apple-tree, and bears a small nut, from which a kind of liquid balsam is made, and sold by the monks as balm of Gilead, so famous in ancient times," and he supposes "that the balm which Jacob sent to Joseph (Gen. xlvii, 11), and that which Jeremiah (viii, 22) refers to for its medicinal qualities, were the same which the trading Ishmaelites were transporting to Egypt, and that it was some resinous extract from the forest trees of Gilead" (*Land and Book*, ii, 193, 194).—Smith, s. v.; Kitto, s. v.; Fairbairn, s. v. See below.

**GILEAD, BALM OF.** Our English word *balm*, and its French equivalent *baume*, are the contracted forms of *balsam*, a word (*βάλσαμον*) which the Greeks have adopted from the Hebrew words *בַּשְׂמָן* and *יִסְרִי*, *lord* or *chief of oils*. In ordinary language the word is used very loosely, but here we are only concerned with the substance to which the English translation of the Bible has given this name. As early as the days of Jacob the district of Gilead yielded aromatic substances which were in great request. After casting Joseph into a pit, we are told that his brothers espied a caravan on its way from Gilead, to Egypt, "with their camels bearing spicery, and *balm*, and myrrh" (Gen. xxxvii, 25). Afterwards, when Jacob dispatched his embassy into Egypt, his present to the unknown ruler included "a little balm" (Gen. xlii,

11); and at an interval of more than 1000 years later we find that the same region was celebrated for the same production, for we find Jeremiah asking, "Is there no balm in Gilead?" and from an expression in the prophet Ezekiel we find still later that balm was one of the commodities which Hebrew merchants carried to the market of Tyre (Ezek. xxvii, 17). In all these passages the original word is *יִסְרִי, tsori*. During the interval, however, between Jacob and Jeremiah, we are told by Josephus that the queen of Sheba brought "the root of the balsam" as a present to Solomon (*Ant.* viii, 6, 6); and there can be no doubt that, in the later days of Jewish history, the neighborhood of Jericho was believed to be the only spot where the true balsam grew, and even there its culture was confined to two gardens, the one twenty acres in extent, the other much smaller (Theophrastus).

Many attempts have been made by different writers to identify the *tsori*, not one of which, however, can be considered altogether conclusive. The Syriac version in Jer. viii, 22, and the Samaritan in Gen. xxxvii, 25, suppose *cera*, "wax," to be meant; others, as the Arabic version in the passages cited in Genesis, conjecture *theriaca*, a medical compound of great supposed virtue in serpent bites. Of the same opinion is Castell (*Lex. Hept.* s. v. *יִסְרִי*). Luther and the Swedish version have "salve," "ointment," in the passages in Jeremiah; but in Ezek. xxvii, 17 they read "mastic." The Jewish Rabbis, Junius and Tremellius, Deodatus, etc., have "balm" or "balsam," as the A. V.; Celsius (*Hierob.* ii, 180) identifies the *tsori* with the mastic-tree (*Pistacia lentiscus*). Rosenmüller (*Bibl. Bot.* p. 169) believes that the pressed juice of the fruit of the *zukum*-tree (*Eleagnus angustifolius*, Lin. [?]), or narrow-leaved oleaster, is the substance denoted; but the same author, in another place (*Schol. in Gen.* xxxvii, 25), mentions the balsam of Mecca (*Amyris opobalsamum*, Lin.), referred to by Strabo (xvi, p. 778) and Dioscorus Siculus (ii, 132) as being probably the *tsori* (see Kitto, *Phys. Hist. of Pal.* p. 273; Hasselquist, *Travels*, p. 293).

Hasselquist has given a description of the true balsam-tree of Mecca. He says that the exudation from the plant "is of a yellow color, and pellucid. It has a most fragrant smell, which is resinous, balsamic, and very agreeable. It is very tenacious or glutinous, sticking to the fingers, and may be drawn into long threads. I have seen it at a Turkish surgeon's, who had it immediately from Mecca, described it, and was informed of its virtues: which are, first, that it is the best stomachic they know, if taken to three grains, to strengthen a weak stomach; secondly, that it is a most excellent and capital remedy for curing wounds, for if a few drops are applied to the fresh wound it cures it in a very short time" (*Travels*, p. 293).

The trees which certainly appear to have the best claim for representing the scriptural *tsori*—supposing, that is, that any one particular tree is denoted by the term—are the *Pistacia lentiscus* (mastic) and the *Amyris opobalsamum*, Linnaeus, the *Balsamodendron opobalsamum*, or *Gileadense* of modern botanists (Balm of Gilead). One argument in favor of the first-named tree rests upon the fact that its name in Arabic (*dseri, dseru*) is identical with the Hebrew; and the Arabian naturalists have attributed great medicinal virtues to the resin afforded by this tree (Dioscorides, i, 10, 91; Pliny, xxiv, 7; Avicenna, edit. Arab. p. 204 and 277, in Celsius). The *Pistacia lentiscus* has been recorded to occur at Joppa both by Rauwolf and Pöecke (*Strand. Flor. Palest.* No. 561). The derivation of the word from a root, "to flow forth," is opposed to the theory which identifies the pressed oil of the *zukum* with the *tsori*, although this oil is in very high esteem among the Arabs, who even prefer it to the balm of Mecca, as being more efficacious in wounds and bruises (see Mariti, ii, 353, ed. London). Maundrell (*Journey*

from *Alep. to Jerus.* p. 86), when near the Dead Sea, saw the *zukum*-tree. He says it is a thorny bush with small leaves, and that "the fruit, both in shape and color, resembles a small unripe walnut. The kernels of this fruit the Arabs bray in a mortar, and then, putting the pulp into scalding water, they skim off the oyl which rises to the top: this oyl they take inwardly for bruises, and apply it outwardly to green wounds. . . . I procured a bottle of it, and have found it upon some small tryals a very healing medicine." "This," says Dr. Robinson (*B.b. Res.* ii, 291), "is the modern balsam or oil of Jericho." From Maundrell's description of the *zukum* Dr. Hooker unhesitatingly identifies it with *Balanites Egyptiaca*, which he saw abundantly at Jericho (*Kew Garden Misc.* i, 257).

In the region of Gilead, the only production now which has any affinity to balm or balsam is a species of *Eleagnus*, from the kernels of which a balsamic oil is extracted (*Journal of Deputation of Malta Protestant College*, p. 406); and even the balsam gardens of Jericho have perished and left no trace. There is little reason, however, to doubt that the plants with which they were stocked were the *Amyris Gileadensis*, or *A. opobalsamum*, which was found by Bruce in Abyssinia, the fragrant resin of which is known in commerce as the "balsam of Mecca." Like most plants yielding gum or gum-resin, the *amyris* requires a high temperature to elaborate its peculiar principle in perfection; and in the deeply depressed and sultry valley of the Jordan it would find a climate almost as congenial as that of Yemen, where we find it now. Nor is it impossible that there may have existed in Gilead at an early period a plantation of the self-same *amyris*; but, yielding to the superior qualities of the queen of Sheba's newly-imported specimens, the growth of Gilead may have become obsolete, and bequeathed its name and honors to its more favored rival. The *Amyris Gileadensis* is an evergreen shrub or tree, belonging to the natural order *Amyridaceae*. Its height is about fourteen feet, with a trunk eight or ten inches in diameter. The wood is light and open, and the small

"Balm of Gilead" (*Amyris Gileadensis*), with enlarged view of the Flower and Pericarp, and section of the latter.

and scanty leaves resemble rice. After the dog-days, when the circulation of the sap is most vigorous, incisions are made into the bark, and the balsam is received in small earthen bottles. The supply is very scanty. Three or four drops exude in a day through a single orifice, and the entire amount yielded by the gardens of Jericho did not exceed six or seven gallons a year. When first exuded the balsam is of a whitish tinge, inclining to yellow, and somewhat turbid, and its odor is almost as pungent as volatile salts; but, af-

ter standing some time, it becomes pellucid, and deepens to an almost golden color. With its gem-like appearance, its aromatic odor, and its great rarity—being worth twice its weight in silver—it has always been highly valued in the East as a remedy. It is considered very efficacious in the cure of wounds, and the Egyptians esteem it as a preventive of the plague. As a vulnerary it appears to have been valued in the days of Jeremiah (ch. viii, 22); and, could it be procured as easily as the balsams of Peru and Tolu, it is likely that it would find a place in European pharmacy. In describing Palestine, Tacitus says that in all its productions it equals Italy, besides possessing the palm and the balsam (*Hist.* v, 6); and the far-famed tree excited the cupidity of successive invaders. By Pompey it was exhibited in the streets of Rome as one of the spoils of the newly-conquered province, B.C. 65; and one of the wonderful trees graced the triumph of Vespasian, A.D. 79. During the invasion of Titus, two battles took place at the balsam groves of Jericho, the last being to prevent the Jews in their despairing frenzy from destroying the trees. They then became public property, and were placed under the protection of an imperial guard; but history does not record how long the two plantations survived.—Smith, s. v.; Fairbairn, s. v. Balm. See BALM.

2. Possibly the name of a mountain west of the Jordan, near Jezreel (*Judg.* vii, 3). Michaelis and others are inclined to agree with the suggestion of Clericus (*ad loc.*), that the true reading in this place should be גִּלְבּוֹא, *Gilboa*, instead of גִּלְעָד. Gideon was encamped at the "spring of Harod," which is at the base of Mount Gilboa. Gesenius, however, thinks (*Thesaur. Heb.* p. 804) that the passage merely implies that all those who should not feel inclined to prosecute the war against the Midianites farther than the mountain from which the latter had emerged, were at liberty to return home (גִּלְעָד, "per montem"). A better solution, however, is that suggested by Schwarz (*Palest.* p. 164, note), that the northernmost spur of Mt. *Gilboa* was also called Gilead; and this is confirmed by the actual existence of the name *Jalud* to this day in this spot. See HAROD.

3. A city of this name is apparently mentioned *Ios.* vi, 8 (*comp. Sept. Judg.* xii, 7); so, at least, it is given in most of the ancient and modern versions, though the meaning may only be that Gilead is (like) a city full of iniquity, i. e. a union of iniquitous people. This city (if one be meant) is perhaps the same with RAMOTH-GILEAD.

4. The son of Machir (apparently by Maachah), and grandson of Manasseh; his descendants bore his name as a patronymic (*Numb.* xxvi, 29, 30). B.C. prob. between 1874 and 1658.

5. The father of Jephthah the judge, a descendant of the above (*Judg.* xi, 1, 2). B.C. ante 1256. It is not clear, however (*comp. ver.* 7, 8), whether this Gilead was an individual, or a personification of the community.

6. The son of Jaroah, and father of Michael, of the tribe of Gad (*1 Chron.* v, 14). B.C. considerably ante 781.

**Gil'eädite** (Hebrew prop. *Giladi'*, גִּלְעָדִי; Sept. Γαλααδί or Γαλααδίτις; but often the same as *Gilead* simply), a descendant of one of the men, or an inhabitant of the region called GILEAD (*Numb.* xxvi, 29; *Judg.* x, 3; xi, 1, 40; xii, 7; 2 Sam. xvii, 27; xix, 31; 1 Kings ii, 7; 2 Kings xv, 25; Ezra ii, 61; Neh. vii, 63), or perhaps rather a branch of the tribe of Manasseh, descended from Gilead. There appears to have been an old standing feud between them and the Ephraimites, who taunted them with being deserters. See *Judg.* xii, 4, which may be rendered, "And the men of Gilead smote Ephraim, because they said, Run-agates of Ephraim are ye (Gilead is between Ephraim and Manasseh)." —Smith, s. v.

**Giles, Sr.** (Lat. *Ægilius*; Fr. *Gilles*; Span. *Gib*), patron saint of woodlands, also of Edinburgh. The Roman Catholic Church has set apart Sept. 1 for the commemoration of a saint of this name, though it is doubtful whether such a person ever lived. The hagiographers describe two such persons: the first an Athenian of the 6th century, who wrought various miracles, and finally took up his abode in a cave near the mouth of the Rhone, living upon the milk of a hind, and upon herbs and fruits. The king's hunters once wounded the hind, and the arrow also passed through the hand of St. Giles (whose attribute, in legendary art, is a wounded hind). He died in his cave, and the noble monastery of St. Giles was erected near the spot. The other claimant to the name of St. Giles was abbot of a monastery near Arles in the 6th century. The first legend, as the more striking and poetical one, is naturally the most popular. St. Giles has been especially venerated in England and Scotland. In spite of the Reformation, the name of this legendary saint is still retained in the English calendar.—A. Butler, *Lives of Saints*, Sept. 1; Mrs. Jamieson, *Legends of the Monastic Orders*, p. 28.

**Gil'gal** (Heb. *Gilgal'*, גִּלְגָּל, a wheel, as in Isa. xxviii, 28; according to Josh. v, 9, a rolling away; with the article a prop. name, Sept. τὰ Γάλαλα, but Γαλγῶλ v. r. Γαλγῶλ in Dent. xi, 20 and Josh. xiv, 6), the name of at least two places in Palestine.

1. The site of the first camp of the Israelites on the west of the Jordan, the place at which they passed the first night after crossing the river, and where the twelve stones were set up which had been taken from the bed of the stream (Josh. iv, 19, 20; comp. 3) [see

Druidical Circle of (memorial) Stones.

STONE]; where also they kept their first passover in the land of Canaan (v, 10). It was in the "end of the east of Jericho" (גִּלְגָּל עֵדֶיךָ בְּעֵדֶיךָ; A. V. "in the east border of Jericho"), apparently on a hillock or rising ground (v, 3; compare 9) in the Arboth-Jericho (A. V. "the plains"), that is, the hot, depressed district of the Ghor which lay between the town and the Jordan (v, 10). Here the Israelites who had been born on the march through the wilderness were circumcised, an occurrence from which the sacred historian derives the name: "This day I have rolled away (*gallo'thi*) the reproach of Egypt from off you." Therefore the name of the place is called Gilgal to this day." The meaning does not seem to be that a new name was given, but rather that a new meaning and significance were attached to the old name. The word *Gilgal* means a "circle," and also a "rolling away." A similar play upon a word was noticed in the case of GILEAD; and Bethel is an example of an old name having attached to it a new significance (Gen. xxxviii, 19; xxxv, 15). By Josephus (*Ant. v, 1, 11*) it is said to signify "freedom" (ἐλευθεριον). It would appear that Gilgal was the name of the place before the Exodus, for Moses describes the Canaanites as dwelling "over against Gilgal" (Deut. xi, 30). The difficulties connected with this passage have already been explained under EBAL. Keil supposes that this Gil-

gal was near Shechem (*Comm. on Josh. p. 219, 232*). The camp thus established at Gilgal remained there during the early part of the conquest (Josh. ix, 6; x, 6, 7, 9, 15, 43); and we may probably infer from one narrative that Joshua retired thither at the conclusion of his labors (xiv, 6; comp. 15). Saul, when driven from the highlands by the Philistines, collected his feeble force at the site of the old camp (1 Sam. xiii, 4, 7). The tabernacle appears to have remained there at least until its removal to Shiloh (Judg. xviii, 1). It was one of the places to which Samuel regularly resorted, where he administered justice (1 Sam. vii, 16), and where burnt-offerings and peace-offerings were accustomed to be offered "before Jehovah" (x, 8; xi, 15; xiii, 8, 9, 12; xv, 21); and on one occasion a sacrifice of a more terrible description than either (xv, 33). The air of the narrative all through leads to the conclusion that at the time of these occurrences it was the chief sanctuary of the central portion of the nation (see x, 8; xi, 14; xv, 12, 21). But there is no sign of its being a town; no mention of building, or of its being allotted to the priests or Levites, as was the case with other sacred towns, Bethel, Shechem, etc. In the history of David's return to Jerusalem (2 Sam. xix), the men of Judah came down to Gilgal to meet the king to conduct him over Jordan, as if it was close to the river (xix, 15), and David arrived there immediately on crossing the stream after his parting with Barzillai the Gileadite (xix, 40). After the erection of the Temple, Gilgal appears to have been utterly neglected. Perhaps, when Jericho was rebuilt, the traditional sanctity of Gilgal was transferred to it, and there a school of the prophets was established and remained until a late period (2 Kings ii, 5). See JERICHO. How Gilgal became appropriated to a false worship we are not told, but certainly, as far as the obscure allusions of Hosea and Amos can be understood (provided that they refer to this Gilgal), it was so appropriated by the kingdom of Israel in the middle period of its existence (Hos. iv, 15; ix, 15; xii, 11; Amos iv, 1; v, 5). These idolatrous practices are specially mentioned by Epiphanius and others (Reiland, *Palæst.* p. 782 sq.). The utter desolation of its site, and the whole surrounding region, shows how fearfully the prophecies have been fulfilled.

The place is not mentioned in the Apocrypha nor the N. T. Later authorities are more precise, but unfortunately discordant among themselves. By Josephus (*Ant. v, 1, 4*) the encampment is given as fifty stadia, rather under six miles, from the river, and ten from Jericho. In the time of Jerome the site of the camp and the twelve memorial stones were still distinguishable, if we are to take literally the expression of the *Épît. Paulæ* (§ 12). The distance from Jericho was then two miles. According to Eusebius, the spot (Γαλγῶλ) was left uncultivated, but regarded with great veneration by the residents (*Onomast. s. v. Γαλγῶλα*). When Arculf was there at the end of the 7th century, the place was shown at five miles from Jericho. A large church covered the site, in which the twelve stones were ranged (*Early Travels in Pal. p. 7*). It is probable, however, that the ecclesiastical architects had not been very particular about topography (Robinson, *Research. ii, 287*). The church and stones were seen by Willibald thirty years later, but he gives the distance as five miles from the Jordan, which again he states correctly as seven from Jericho. The stones are mentioned also by Thietmar, A. D. 1217 (according to whom it was to these that John the Baptist pointed when he said that God was "able of these stones to raise up children unto Abraham," *Peregr. 31*); and, lastly, by Ludolf de Suchem a century later. These specifications show that Gilgal must have been near the site of the modern village of Riha (Porter, *Handb. for S. and P. p. 196*). In Van de Velde's *Map* (1858), a spot named *Moharfer*, a little south-east of er-Riha, is marked as probable.—Kitto, s. v.; Smith, s. v.

Schwarz (*Phys. Descr. of Palest.* p. 128) asserts that there is at present found near the Jordan in this vicinity a hill, which appears like a heap of stones, and is called by the Arabs *Galgala*; but this lacks confirmation. It is probably this Gilgal that is called GELI-LORH in Josh. xviii, 17, where, as well as in the parallel passage, xv, 7, the position is given with more minuteness than elsewhere.

2. A royal city of the Canaanites, whose sovereign ("king of the nations of Gilgal," or, rather, perhaps the "king of Goin-at-Gilgal," גִּלְגַּל בְּנֵי הַגּוֹיִם) is mentioned in the catalogue of the chiefs overthrown by Joshua (Josh. xii, 23), appears to have been situated on the western plain, as it is connected with the "region of Dor" (verse 22). Eusebius and Jerome (*Onomast.* s. v. Γεγάλα, Gelgel) say that it was in their time a village called *Galgulis* (Γαλγούλις), about six Roman miles north of Antipatris (Kefer Saba); and this is probably the present ruined village *Iljilieh* of the same neighborhood (Robinson, *Researches*, iii, 47; Schwarz, *Palest.* p. 92), although this is only two miles from Kefer Saba, and east-south-east (E. Smith, in the *Bibliotheca Sacra*, 1843, p. 492), rather than the *Kilkilieh*, about two miles east of Kefer Saba (Robinson, *Later Researches*, p. 136, 138).

The *Goin*, or original inhabitants of this place, evidently were in some distinctive sense *heathen* (q. v.). "By that word (Judg. iv, 2) or 'nations' (Gen. xiv, 1) the name is usually rendered in the A. Vers. as in the well-known phrase, 'Galilee of the nations' (Isa. ix, 1; comp. Matt. iv, 15). Possibly they were a tribe of the early inhabitants of the country, who, like the Gerizites, the Avim, the Zemarites, and others, have left only this faint, casual trace of their existence there" (Smith, s. v.). See GALILEE.

3. A town, evidently in the mountainous interior, whence Elijah and Elisha are said to have gone down to Bethel (2 Kings ii, 2), which is itself 3000 feet above the Gilgal in the Jordan valley. It was perhaps here that Elisha rendered the pottage harmless (2 Kings iv, 38); he may even have resided here (2 Kings ii, 1; iv, 38). It lay in the vicinity of Baal-shalisha (2 Kings iv, 42). This is probably the BETH-GILGAL (A. V. "house of Gilgal") mentioned (Neh. iii, 29) as occupied by the Levitical singers after the exile; and it is evidently also the *Galgala* (Γαλγάλα) on the route of the victorious Bacchides (1 Macc. ix, 3). See GALGALA. Keil (*Comment. on Josh.* p. 219, 232) and Van de Velde (*Memoir*, p. 316), after Winer (s. v.), unnecessarily identify this with the Gilgal of Joshua's camp, etc. It is doubtless the *Galgala* (Γαλγάλα) stated by Eusebius and Jerome (*Onomast.* s. v.) to be located near Bethel; and is the large village *Iljilila*, one hour west of Sinjil, on the road from Jerusalem to Nablús, situated so high on the brow of the central mountain tract as to afford an extensive view of the great lower plain and the sea, and even a view of Mount Hermon (Robinson, *Researches*, iii, 81).

Gill, Alexander, an English philologist and theologian, was born in Lincolnshire Feb. 27, 1564. He studied and graduated in Corpus Christi College, Oxford. In 1608 he became principal of St. Paul's school, which post he filled until his death, Nov. 17, 1635. He gained much reputation as a philologist and theological critic by his *Treatise concerning the Trinity* (1601, 8vo);—*Logonomia Anglica* (1621, 4to);—*Sacred Philosophy of Holy Scripture, or a Commentary on the Creed* (1635, 8vo). See Wood, *Athenæ Oxonienses*, vol. i (London, 1691, 2 vols. fol.); Hofer, *Nouv. Biog. Générale*, xx, 523; Knight, *Life of Colet*; Allibone, *Dict. of Authors*, i, 671.

Gill, John, an eminent theologian and Biblical scholar, was born at Kettering, England, in 1697. He received his education at the grammar-school in his native town. But the tuition of the school was only one of the means of education that he availed himself

of. "As sure as that John Gill is in the bookseller's shop," became a proverbial expression. He left school and began preaching at the age of nineteen, and was pastor successively of the Baptist churches in Higham-Ferrers and Kettering. In 1719 he was settled at Horsleydown, Southwark, where he ministered for fifty-one years. He died in 1771. Short as was his term of preparatory study, he must have laid a good foundation, and have been diligent in his subsequent studies. He made himself an excellent Latin and Greek scholar, and a learned Orientalist. His Rabbinical studies were extensive and profound. The fruits of his learning are chiefly deposited in his commentary, a work valuable to consult, but so heavy and prolix in style as to repel any but very courageous readers. He was a voluminous author. For a time he exerted a commanding influence in his own denomination, and enjoyed high consideration with the religious public generally. In theology he was a Calvinist of the Supralapsarian type, and his peculiar doctrine concerning the relation of Christians to the law of God occasioned, though it scarcely justified, the charge of Antinomianism. His principal writings are, 1. *Exposition of the Song of Solomon*:—2. *Prophecies respecting the Messiah fulfilled in Jesus*:—3. *The Cause of God and Truth*, being an examination of the several passages of Scripture made use of by Arminians (4 vols. 8vo, 1735; new ed. Lond. 1838, 8vo):—4. *Exposition of the New Testament* (3 vols.):—5. *Exposition of the Old Testament* (6 vols.):—6. *Dissertation on the Antiquity of the Hebrew Language, Letters, Vowel Points, and Accents*:—7. *A Body of Doctrinal and Practical Divinity*:—8. *Sermons and Tracts*. He also wrote several treatises on Baptism, one of which, entitled *Infant Baptism a Part and Pillar of Popery*, has been republished in America. His *Body of Divinity* has also had some circulation in this country, and has been abridged. He received the degree of doctor of divinity from the University of Glasgow. (L. E. S.)

Gill, William, one of the early Methodist ministers in America, was born in Delaware (date unknown). He entered the itinerant ministry in 1777, filled a number of important stations successfully, and died in 1789. He was a man "of very quick and solid parts," and, although he had not enjoyed great advantages of early education, he became so skilled in theology that Dr. Rush, of Philadelphia, pronounced him "the greatest divine he ever heard."—*Minutes of Conferences*, i, 33; Wakeley, *Heroes of Methodism*, p. 199.

Gilles (COLONNA). See ÆGIIDIUS, vol. i, p. 89.

Gilles of Viterbo. See EGIPIO ANTONINI.

Gilles, Pierre, a pastor of the Vaudois Church at La Tour, was born in one of the valleys of Piedmont in 1571. He was appointed to collect and arrange all the documents he could find on the origin, history, beliefs, and religious customs of the Vaudois. He devoted his entire life to this work, which he published at the age of seventy-two. The title is *Histoire ecclésiastique des églises réformées recueillies en quelques vallées du Piémont et circonvoisines, autrefois appelées églises Vaudoises* (Genève, 1644, 4to).—Hofer, *Nouv. Biog. Générale*, xx, 544.

Gillespie, GEORGE, minister at Edinburgh, a learned Presbyterian divine. He was one of the four sent as commissioners from the Church of Scotland to the Westminster Assembly in 1643. He died in 1648. He wrote (1) *Aaron's Rod blossoming, or the divine Ordinance of Church Government vindicated* (Lond. 1646, 4to):—(2) *The Ark of the Testament opened; a Treatise of the Covenant of Grace* (Lond. 1661-77, 2 vols. 4to); besides other smaller treatises. A new edition of his entire works, edited by Hetherington, was published at Edinburgh in 1846 (2 vols. 8vo), with a memoir of his life.—Darling, *Cyclop. Bibliog.* i, 1258; Allibone, *Dict. of Authors*, i, 671.

**Gillies, John**, a Scotch divine, was born in 1712, ordained minister of the New College Church, Glasgow, in 1742, and continued to labor there until his death in 1796. His works are, *Historical Collections relating to remarkable Periods of the Success of the Gospel*, etc. (Glasg. 1754, 2 vols. 8vo):—*The N. T., with devotional Reflections* (London, new ed. 1810, 2 vols. 8vo):—*Life of Whitefield* (1772, 8vo; often reprinted):—*Essay on the Messianic Prophecies* (Lond. 1773, 8vo). Two supplements to the *Historical Collections* appeared in 1761 and 1796; and a new edition of the original work, with the two supplements and an additional one by H. Bonar, appeared at Kelso, 1845, 8vo.—Darling, *Cyclop. Bibliogr.* i, 1260; Allibone, *Dict. of Authors*, i, 672.

**Gillies, John, LL.D.**, was born at Brechin, Scotland, Jan. 18, 1747, and was educated at the University of Glasgow. In 1793 he became historiographer royal for Scotland; in 1830 he removed to Clapham, near London, where he died, Feb. 15, 1836. He wrote several historical works, now of little value, and translated several Greek authors, among them Aristotle (Ethics, Politics, Rhetoric), very badly.

**Gilly, David**, a Protestant divine who became a Roman Catholic, was born at Nismes in 1648. He studied at Nismes, Montauban, and Saumur, and was appointed pastor at Baugé. His life there was quiet and studious until the revocation of the Edict of Nantes, when, to save himself from the dragonades, he abjured his faith, and allied himself with the Roman Catholics. The Protestants ordered public fasts to avert the wrath of God on account of this apostasy, but the king gave Gilly a pension of 1000 livres, which was increased by the clergy 400 livres more. He was sent to Languedoc by the court to preach against his old faith, and afterwards was brought to Paris to confirm the newly-converted in their faith. He died at Angers Dec. 27, 1711.—Hoefler, *Nouv. Bing. Générale*, xx, 557.

**Gilly, William Stephen, D.D.**, a pious and exemplary English clergyman, and patron of the Vaudois Christians. He was born in 1789, and educated at Cambridge, where he passed A.B. in 1812, A.M. in 1817, and D.D. in 1833. In 1817 he became rector of North Farnbridge, Essex. In 1825 he became a canon of Durham and rector of St. Margaret's in that city. He died Sept. 10, 1855. In the year 1823 Dr. Gilly paid his first visit to the Vaudois Christians, which has been attended with such important results, not only to himself, but likewise to that interesting people, who for so many centuries have maintained their independence against all the power and persecution of papal Rome. The following year he published a volume entitled *A Narrative of an Excursion to the Mountains of Piedmont in the Year 1823, and Researches among the Vaudois, or Waldenses, Protestant Inhabitants of the Cottian Alps*. This work immediately attracted great attention, and the interest it produced was shown by its reaching a fourth edition in less than three years. A fund of over £7000 was raised, and devoted, in part to the maintenance of a college and library at La Tour, in Piedmont. Dr. Gilly ceased his labors on behalf of the Vaudois only with his life. See VAUDOIS. Besides the work above-named, he published *The Spirit of the Gospel, or the four Evangelists elucidated* (Lond. 1818, 8vo):—*Home Catechism, or an Exposition of the Duty and Advantages of public Catechising in the Church* (Lond. 1828, 8vo):—*Waldensian Researches, a second Visit to the Vaudois* (Lond. 1831, 8vo):—*A Memoir of Felix Neff, Pastor of the High Alps, and of his Labors among the French Protestants of Dauphiné* (Lond. 1832, 8vo):—*Our Protestant Forefathers* (London, 1835, 12mo; twelve editions before 1844):—*Vigilantius and his Times* (London, 1844, 8vo).—*Gentleman's Magazine*, Oct. 1855; *Quart. Rev.* xxxiii, 134.

**Gilman, SAMUEL, D.D.**, an eminent Unitarian minister, was born in Gloucester, Mass., Feb. 16, 1791,

and graduated at Harvard College in 1811. From 1817 to 1819 he was connected with the university as tutor. In the year last named he accepted an invitation from the Unitarian church at Charleston, S. C., and was soon afterwards ordained. He continued to serve that church with great popularity up to the year of his death, which took place Feb. 9, 1858. He was a frequent contributor to the *North American Review*, and his papers showed a wide range of scholarship, as well as great skill in execution. A number of his essays, etc., are collected in his *Contributions to Literature* (Bost. 1856, 12mo). See *Monthly Religious Magazine* (Bost. 1858); Allibone, *Dictionary of Authors*, i, 674; *New American Cyclopædia*, viii, 256.

**Gi'loh** (Heb. *Giloh*, גִּלּוֹחַ, exile [Gesenius] or *circle* [Fürst]; Sept. in Josh. Γαλώ v. r. Γαλώρι and Γαλώρι, in Sam. Γελώ v. r. Γωλά), the last named (after Goshen and Holon) in the first group of eleven cities in the south-western part (Keil, *Josh.* p. 384) of the hill-country of the tribe of Judah (*Josh.* xv, 51); and afterwards the native place or residence of Ahithophel (hence called "the Gilonite" [q. v.], 2 Sam. xv, 12; xxiii, 34), whence Absalom, on his way from Jerusalem to Hebron, summoned him (perhaps from a temporary banishment or disgrace at court) to join his rebellious standard (2 Sam. xv, 12; and whither he returned to commit suicide on the failure of his colleagues to adopt his crafty counsel (2 Sam. xvii, 23). Josephus calls it *Gelmon* (Γελμών, *Ant.* vii, 9, 8). De Sauley (*Dead Sea*, i, 453) and Schwarz (*Palæst.* p. 105) both make it to be the modern *Beit-Jab*, near Bethlehem; but this is rather the ancient Zelah or Zelzah (q. v.), and the scriptural notices require a different position, perhaps at *Rafid*, a village with extensive ruins one hour twenty minutes south of Hebron (Van de Velde, *Memoir*, p. 252).

**Gi'lonite** (Heb. with the art. *haq-Giloni'*, הַגִּילוֹנִי, Sept. ὁ Γελωνίτης, 2 Sam. xv, 12, or ἡ Γελωνίτις, Sept. ὁ Γελωνίτης, 2 Sam. xxiii, 34), an epithet of the traitor Ahithophel (q. v.), doubtless from his city GILOI (q. v.).

**Gilpin, Bernard**, called the apostle of the North, an eminent English reformer and itinerant preacher, was born at Kentmere, in Westmoreland, in 1517. At sixteen he was sent to Queen's College, Oxford, where, stimulated by the works of Erasmus, he made the Scriptures in Hebrew and Greek his chief study. In 1541 he became M.A., and about the same time was elected fellow of his college, and ordained. His reputation for learning soon after led to his being solicited by cardinal Wolsey's agents to accept an establishment in his new foundation at Christ's Church, whither he removed from Queen's College. The university was divided between those who asserted the necessity of a reformation and those who resisted it. Gilpin was for some time opposed to the reformers, maintaining the Romish side in a dispute with Hooper, afterwards bishop of Worcester. But his mind was open to conversion, and in preparing himself for this dispute, he began to suspect that the peculiarities of Romanism were not supported by Scripture or by the fathers. This truth was still further forced upon him when, on the accession of Edward VI, Peter Martyr was sent to Oxford, and Bernard Gilpin was selected as one of the champions on the Romish side to oppose him. The result was that he embraced the Reformation. In 1552 he was made vicar of Norton, and in the same year obtained from Edward VI a license as "general preacher," which authorized him to preach in any diocese. He resigned his living soon after, and went to Louvain, where the priests sought in vain to reclaim him to Romanism. He returned to England in 1556, and found the Church oppressed and persecuted by queen Mary with blood and fire. His uncle, bishop Tonstall, gave him the living of Easingdon, and

afterwards the rectory of Houghton-le-Spring; and although his Protestant views were well known, the bishop protected him. His enemies now accused him before bishop Bonner, and he was on his way to trial, and probably to the scaffold, but was detained by breaking his leg on the journey, till news arrived of Mary's death, and he returned in peace to his rectory. The remainder of his life was spent in the assiduous discharge of his parish duties, and in preaching through the country as an itinerant. "The parts of Redesdale and Tynedale, debatable land on the Marches, are particularly named as the scenes of his labors. The people there, living on the borders of the two counties, had long led a lawless life, subsisting mostly on plunder. Gilpin went fearlessly amongst them, holding forth the commands and the sanctions of Christianity, and did much to change the character of the country. Hence it was that he was commonly called the Northern apostle, and his name for generations was repeated with reverence. His own parish of Houghton, which included within it fourteen villages, however, was the chief scene of his labors. It yielded him an ample income, for Houghton was then, as now, one of the richest benefices in the North. He was himself a bachelor. In hospitality he was like what is said or fabled of the primitive bishops. Every fortnight, we are told, forty bushels of corn, twenty bushels of malt, and a whole ox, were consumed in his house, besides ample supplies of provisions of many other kinds. A good portion of this hospitable provision was no doubt consumed by his parishioners, it being his custom, having a large and wide parish and a great multitude of people, to keep a table for them every Sunday from Michaelmas to Easter.' But the rectory-house was also open to all travellers, and so great was the reverence which surrounded the master that his liberality was rarely abused, even the most wicked being awed by it. His skill in according differences was scarcely less famed than his hospitality and his preaching; and when to this we add that his benevolence took the wise direction of providing instruction for the young, and that he was assiduous in his attention to the sick and to the poor, we have touched upon all the points which can be prominent in the life of a good pastor. His zeal for education was manifested at once in the education of the poor children in his parish in homely learning, and in patronizing promising youth in their studies in the universities. Of these, his scholars, 'he kept full four-and-twenty in his own house, the greater number being poor men's sons, upon whom he bestowed meat, drink, and cloth, and education in learning;' and out of these scholars, and from the grammar-school which he founded, we are told that 'he supplied the Church of England with great store of learned men.' Of his scholars he always maintained at his own expense at least six at the universities, and when they had completed their studies charged himself with the care of their settlement' (*English Cyclopædia*, s. v.). His *Life*, by bishop Carleton, is one of the most interesting of Christian biographies. He died March 4, 1583. See Wordsworth, *Eccles. Biog.* iv, 367; *Life*, by W. Gilpin (Glasg. 1824, 12mo); Jamieson, *Cyclop. Relig. Biog.* p. 222; Hook, *Eccles. Biog.* vol. v; *English Cyclopædia*, s. v. See FAITH, RULE OF.

**Gilpin, Richard, M.D.**, a Nonconformist divine, was born in Cumberland, England; studied at Queen's College, Oxford, and became minister of Greystock, but was ejected for nonconformity in 1662, and afterwards practised physic. He died in 1697. While in the Church, he was very popular as a preacher. He published *Demonologia sacra; or, a Treatise of Satan's Temptations* (in three parts, London, 1677, 4to);—*The Temple Rebuilt* (Lond. 1658);—*Sermons* (Lond. 1700).—Allibone, *Dictionary of Authors*, i, 674; Darling, *Cyclopædia Bibliographica*, i, 1260.

**Gilpin, William**, a descendant of Bernard Gil-

pin, was born at Carlisle, 1724. He became master of the school at Cheam, in Surrey; afterwards vicar of Boldre, and prebendary of Salisbury. He died at Boldre, April 5, 1804. Among his numerous publications are, *An Exposition of the N. T. intended as an Introduction to the reading of the Scriptures* (Lond. 1811, 2 vols. 8vo, 4th edit.);—*Lives of the Reformers* (Lond. 1809, 2 vols. 8vo);—*Sermons to a Country Congregation* (Lond. 1802-5, 4 vols. 8vo);—*Life of Bernard Gilpin* (Glasg. 1824, 12mo, new ed.);—*Lectures on the Church Catholicism* (Lond. 1779, 2 vols. 8vo);—*Observations on Picturesque Beauty* (1790, 2 vols. 8vo);—*Moral Contrasts* (Lond. 1798, 12mo);—Darling, *Cyclop. Bibliog.* s. v.; Rose, *New Gen. Biog. Dict.* viii, 30.

**Gils, ANTONIUS VAN, D.D.**, was born July 29, 1758, at Tilburg. His parents were Roman Catholics. He graduated at Louvain with high honor. In 1783 he received spiritual consecration at Antwerp. After this he was appointed to give instructions in theology, and in 1785 he received his licentiate in theology. Not approving the changes made in the University of Louvain by order of the emperor Joseph II, he resigned his position there, and in 1786 was made chaplain at Eindhoven. From December, 1786, to April, 1790, he labored zealously among the Romanists at 's Hertogenbosch. He returned in 1790 to Louvain, where he was made president of the College of Malder and canon of St. Peter. In November of the same year he was taken prisoner by the Austrian troops, and conveyed to Mechlin. Released from confinement, he defended the university before the Congress, assembled for the regulation of Belgian affairs. In 1791 he was appointed professor, and in 1794 was promoted to the degree of doctor of theology. The French, making themselves masters of Louvain soon after, conveyed him and other professors as prisoners to Peronne. On his return to Louvain he composed the reply to the magistrates of the city, declining, on the part of himself and his colleagues, to attend the opening of the *temple of reason*. From 1795 to 1813 he experienced various fortunes, being sometimes imprisoned, and for most of the time an exile. After the overthrow of Napoleon he again stood at the head of the University of Louvain. He died at the university June 10, 1834. His principal works are, *De twee cosyns:—Eerwondige samenpraken over de religieuzen van dezen tyd* (Leuv. 1796, 12mo);—*Motifs de conscience qui empêchent les ministres de culte catholique de faire la déclaration exigée par la loi du 7 Vend. an. II* (Leuv. 1797; this was also translated into Flemish);—*De growlen van het Christen-cath. geloof, tegenover de growden der filosofie* (s Hertogenb. 1800);—*Analysis epistolærum B. Pauli apostoli ad usum seminarii Sylva-Ducensis* (Lov. 1816, 3 vols. 12mo). See Glasius, *Godgeleerd Nederland, D. i*, blz. 527 en verv.; also F. V. Goethals, *Lectures relatives à l'histoire des sciences, des arts, des mœurs, et de la politique en Belgique*, etc., ii, 298 suiv. (J. P. W.)

**Gim'zo** (Heb. *Gimzō'*, גִּמְזוֹ, a place fertile in *sycamores*; Sept. Γῆμζώ v. r. Γαμαζαῖα), a city in the plain of the kingdom of Judah, mentioned in connection with Timnah, and taken with its dependent villages (Heb. *daughters*), by the Philistines in the time of Ahaz (2 Chron. xxviii, 18); now *Jimzu*, a common and rather large village, on an eminence, on the south side of the road, about an hour south-east of Ludd (Lydda or Ramleh); with many threshing-floors and ancient cisterns used as magazines for grain (Robinson's *Researches*, iii, 56). It is mentioned in the Talmud (Schwarz, *Paest.* p. 136).

**GIN**, an old English word for *trap*, stands as the rendering of two Hebrew words in certain passages: גִּמְזוֹ, *mokesh'*, a *noose* or "snare" (as elsewhere rendered), Psa. cxl, 5; cxli, 9; Amos iii, 5; and גִּינָה, *paeh*, lit. a *plate* or thin layer, hence a *net* or *trap*, Sept.

παγίς, Job xviii, 9; Isa. viii, 14; elsewhere "snare." See HUNTING; FOWLER, etc.

**Gina** (גִּינָה), a brook or winter-stream (גִּינָה-mentioned in the Talmud as being not far from En) Gannim (q. v.) (Schwarz, *Palest.* p. 52).

**Ginath** (Heb. *Ginath'*, גִּינָתַי, a garden [Gesén.] or protection [Fürst]; Sept. Γινῆθ v. r. Γωνῆθ), the father of Tibni (q. v.), king of the northern tribes of Israel (1 Kings xvi, 21, 22). B. C. ante 926.

**Gin' metho** (Heb. *Ginmethof'*, גִּינֶמֶת, Sept. Γεναθών, Vulg. *Genthon*), a corrupt reading (Neh. xii, 4) for the name GINETHON (q. v.).

**Gin' nethon** (Heb. *Ginnethon'*, גִּינֶנֶת, *gardener* or *great garden*; Sept. Γαργαναζών and Γαναζώζ, Vulg. *Genthon*), one of the "chief" priests that returned from the captivity with Zerubbabel (Neh. xii, 4, where the reading is "Gennetho"), and subscribed the covenant with Nehemiah (x, 6); his son Meshullam is mentioned as contemporary with the high-priest Joiakim (xii, 16). B. C. 536-410.

**Gioberti**, VINCENZO, a distinguished Italian philosopher and statesman, was born at Turin, April 5, 1801. He studied theology in the university of his native city, was received doctor in 1823, and in 1825 was ordained priest and appointed professor of theology in the university. He acquired great reputation, and became court chaplain in 1831. Soon afterwards he was implicated in a republican conspiracy (said to have been instigated by the Jesuits, in order to destroy the liberal sympathies of the king), was thrown into prison, and then exiled without trial. He went first to Paris, thence to Brussels, where he remained until 1843, in the humble position of tutor in a private school. Some time after he declined a professorship of philosophy offered him by cardinal Wiseman, preferring to devote all his time to his literary labors. His first publication was the *Teoria del Sovranaturale* (Capolago, 1838). In 1839 he published his *Introduzione allo studio della Filosofia*. This remarkable work was followed in 1841 by his *Del Bello*, in which the author analyzes Christian epos, and especially Dante's *Divina Comedia*. Gioberti next employed himself against the modern German philosophers and the French encyclopedists, whose ideas outlived the Revolution. He wrote successively the *Lettres polémiques contre La Mennais* (Paris, 1840); *Del Eunoio*; and *Errori filosofici di Antonio Rosmini* (Capolago, 1842). In opposing the pantheistic tendencies of La Mennais and Rosmini, Gioberti evinces great argumentative talent, and a vivid imagination. He aimed at making Italy throw off the yoke of foreign doctrines, with the ultimate view of enabling her subsequently to expel foreign political interference. He was careful always to profess orthodox opinions, so as not to give either the Italian princes or the pope any hold against him. His new catholic system found many adherents. In order to raise the clergy in the popular esteem, he advocated such reforms as the spirit of the times required, and advised the priests to head the social movement and to disseminate instruction among the people. He also called on the learned men of Italy, inviting them to regain their former ascendancy by uniting faith with science and art. In this view he wrote his *Il Primato civile e morale degli Ital.* (Paris, 1843). This remarkable work, which proposed the plan of a Roman confederacy headed by the pope, and which has had great influence on the recent history of Italy, was not at the time in harmony with public opinion. The substance of the book is as follows: "Italy has been twice at the head of European civilization; once in antiquity, and again in the Middle Ages. In the latter period Italy owed its supremacy to the popes, who were then the natural arbiters of princes and the spiritual sovereigns of the nations. The downfall of Italy is due to the downfall of the papacy. The problem now is to restore the papal

power, as a moral dominion based on religion and public opinion." Gioberti aims at "restoring the papal arbitration between the sovereign and the people; he wishes to lead it back to the time of Gregory VII and of Alexander III, and in this restoration of the past finds the best means of repulsing foreign oppression by the unaided efforts of Italy alone. As for the form of government, he inclines to a constitutional monarchy, and, like Alfieri, considers Piedmont as the most compact, best organized, and most vital state of Italy; calls it to closer union with the other provinces, and by showing to it the perspective of a united Italy, invites it to become the champion of national independence." The work was published under the most unfavorable circumstances, during the last years of the pontificate of Gregory XVI. The Jesuits, despite a few compliments to their order, which the author had skillfully introduced in his book, were alarmed at its tendencies. Gioberti, however, answered their objections in *I Prolegomeni* (1845); *Il Gesuita moderno* (Capolago, 1847, 8 vols.; German transl. by Cornet, Lpz. 1849, 3 vols.). This work, written *ab irato*, had an immense effect; the Jesuits were expelled from Piedmont, and from all the other states of Peninsular Italy.

After the events of 1848 Gioberti was recalled from exile, and his return was a triumph. He went to Milan, started the project of union between Lombardy and Piedmont, and traversed Central Italy, inviting all parties to unite for the good of the country. He declined the office of senator which was offered him by Charles Albert, but was elected to the House of Representatives by the inhabitants of Turin, and at once chosen for its president. In 1848 he was minister of public instruction, and president of the so-called *Democratic council*. Austrian intrigues defeated Gioberti's plans, and he was obliged to withdraw from the cabinet. He then advocated his views in a newspaper entitled *Il Saggiatore*. The misfortunes of Italy and the abdication of Charles Albert rendered it necessary for him to take again an active part in state affairs. Victor Emmanuel appointed him in the Delaunay-Piellin cabinet, without any special department; yet the conservative party managed soon after to have him appointed ambassador to Paris, as a means of getting rid of him. He understood it so, sent in his resignation, and on the arrival of his successor, count Gallina, returned to private life. He afterwards published his *Del Rinascimento civile dell' Italia* (Paris and Turin, 1851, 2 vols.). In this work he examines with great impartiality into the causes of the present position of Italy. Among the chief obstacles to its independence he signalizes, on the one hand, the exaggeration of the principles of municipal and ecclesiastical power, and, on the other, the dangerous influence of Mazzinianism. Sympathizing with the loyalty and liberalism of Victor Emmanuel, he, so to say, traces out for him the line to be followed to arrive at the regeneration of Italy. Gioberti was preparing a philosophical work, entitled *Protologia*, when he died suddenly at Paris, Oct. 25, 1851. His most important work is the *Introduzione*, which has been translated into French under the title *Introduction à l'étude de la Philosophie* (Paris, 1847, 3 vols. 8vo). The *Christian Remembrancer* (July, 1853, art. i) remarks upon it as follows: "With regard to the *Introduction to Philosophy*, it is extremely difficult to express an opinion, because (speaking with the utmost seriousness) we have a great difficulty in deciding, upon internal evidence alone, whether it was the product of a sane mind. The excitement visible throughout; the lofty tone in which he passes judgment upon others, and pours forth his own utterances; the virulence with which he treats some who differ from him, combined with the obscurity and dreaminess of the opinions expressed; the extraordinary nature of the premises he assumes, and his dogmatism, not the less arrogant from his entire unconsciousness—all these things on

the one hand, and, on the other, his acuteness, depth, information, and power of argument, leave us much at a loss to discover whether the author was in his sober senses or not. We give a brief abstract of his views, so far as we have been enabled to comprehend them. He conceives that the source of all human knowledge is in God, and that it is one whole, and in a manner identical with God himself; and the name which he gives it is 'L' Idéa,' or Thought. This divine thought is communicated to man in proportion as he is capable of receiving it; and it is 'the light which enlighteneth every man that cometh into the world.' Man receives it by means of his reason, which is capable of directly beholding it; and this direct beholding (or intuition) of the 'Idéa' is the origin and first cause of all the knowledge of natural things which the mind of man possesses. It is innate, inasmuch as it rises to the mind at the same moment as the thought which apprehends it; but it does not rise within the mind, but enters it from without. It is the principle of knowledge to the human mind, from the very first exercise of its powers as a thinking being. The similarity of this view to that of Plato, revived and modified by Malebranche and Leibnitz, is sufficiently evident. But this direct intuition of the divine thought by the reason, although the origin of all thoughts in the soul, is by itself but inchoate and imperfect. In order to render it available, it requires that this intuition should be reflected on; and this can be done only by means of language, for man cannot reflect on and (so to speak) repeat the original intuition except by means of language, which renders determinate what was before imperfect. For this purpose language was given to man, and by means of language God originally reveals to man that which he has caused him to behold by internal and direct intuition; and by means of language this same revelation is repeated and carried on from generation to generation; and by the same medium, employed analogically, the knowledge of the divine thought is more and more revealed. Yet language is not the cause of human knowledge, nor is it, in the case of ordinary knowledge, the medium of the exhibition of the divine thought to the mind (for that shines immediately upon the mind), but it is the occasion of its being completely revealed. For the purposes of ordinary and natural knowledge this combination of intuition with language is the method ordained; but supernatural knowledge can be conveyed only by means of language; and divine truths are not seen by intuition, but believed. Yet all knowledge of every kind has its source in the divine thought, and consists of such views of it as the individual is capable of. Besides reason, which is capable of beholding the divine thought, man has likewise *internal and spiritual feelings* or emotions, which are modifications of the mind, and preserved by feeling; and, in addition, he possesses *material and external feelings*, having reference to the properties of bodies, and perceived by sensation and the outward senses. The ordinary range of modern metaphysics is confined to these internal and external feelings; and it is a common error to substitute the internal feeling as a first principle, instead of that which is apprehended by the reason through direct intuition, and revealed to the soul by language and reflection. It is likewise an equally common error to substitute reflection on these internal and external feelings for reason, as the initiatory instrument of that knowledge which is the basis of philosophy. (Here he is evidently alluding to Locke and his followers.) But it is by the view or intuition of the divine thought that meaning is given to these various feelings, external and internal, and to the various sensible objects by which they are surrounded. The basis of all knowledge is the knowledge of *being*; yet not of an abstract idea, but of the concrete personal Being, God himself, acting as a cause and producing *existences*, who is, in fact, the only *being*, because

he alone has being in himself. The knowledge of this being is gained by revelation, by means of the written word, where-in he declares himself, 'I am that I am;' and the mind beholds him, and has him made known to it internally, through the reason, independently of all external sensations. God being the only being, all other things are only existences; and man learns from the revealed word that the one being created existences; not that he extends himself into these various manifestations (as Hegel teaches); not that he causes these existences to emanate from himself, as other Pantheists teach, but that he *creates* them. Man thus learns their proper nature, viz. that they are distinct, individual, real things, having a kind of personality; that it is the act of creation which gives them this reality and individuality; and that it is only by the fact of their being created that their reality is assured to us; that, in short, nothing but the act of creation could assure to us the reality of external things. Gioberti holds, moreover, that all our knowledge of philosophy must begin with a knowledge of being and existences, and their relation to each other; and that not of abstract being or abstract existence, but of one concrete Being, and of many concrete individual existences; and he thinks that the divine thought gives us a knowledge of the latter by a direct view of them, which gives life and meaning to all our sensations and feelings in connection with them. He likewise teaches that principles of knowledge are objective, eternal, and absolute; that they are not the creation of the mind, nor sought out by it, but that they present themselves to the mind unsought, and are first truths—the foundation of other truths. He teaches that the permanent possession of the divine thought depends in a degree on man himself; that he may rebel against it, and thus fail to receive it, and fall into error. He teaches that it is by the participation of it that individuals possess a moral personality; that it is the vital principle, and that if it were entirely withdrawn the consequence would be annihilation; that inasmuch as the divine thought creates and governs the universe, it is the soul of the world; inasmuch as it dwells in men's minds, it is knowledge; inasmuch as it actuates, produces, determines, and classifies the powers of nature, it is the generic and specific essence of things; that the basis of generality is the Divine Being himself, having in himself the ideas of all possible things, and the power of giving effect to those ideas." He left a number of MSS., which were edited and published by G. Massari, under the title *Opere inedite di Vincenzo Gioberti* (Torino, 1856-60, 6 vols. 8vo). There is an excellent article on the life and writings of Gioberti in the *Christian Examiner*, 1861, p. 287. **Giordano Bruno.** See BRUNO.

**Gir.** See CHALK.

**Giraldus Cambrensis** (SYLVESTER), archdeacon of Brecon and titular bishop of Menavia or St. David's, was born at Pembroke, Wales, in 1146. He finished his education in Paris, and in 1175 was appointed by Richard, archbishop of Canterbury, as his legate for Wales, and was soon after made archdeacon of Brecon. In the following year he was elected bishop of Menavia, but king Henry II refused to confirm the election. He then returned to Paris, where, as he says himself, in his *De rebus a se gestis*, he passed for the most learned person in jurisprudence, and was offered the professorship of canon law, which he declined. He afterwards administered for a while the affairs of the bishopric of Menavia, and in 1184 be-

came court preacher of Henry II. He accompanied Henry's son John as adviser in the expedition against Ireland, and in 1188 accompanied archbishop Baldwin of Canterbury on a tour through Wales, for the purpose of organizing a crusade. Richard I appointed him legate of Wales, but at the fall of the latter he returned to his studies. He was again elected bishop of St. David's, but failed again to be recognised as such. He "passed the last seventeen years of his life in study, revising his former literary works and composing others, of which he has himself given a copious index. In the midst of these occupations he received once more an offer of the bishopric of St. David's, and would have met with no opposition from the court; but, from the dishonourable terms on which it was offered, he refused the ecclesiastical dignity which had so long been the object of his earnest wishes. He died at St. David's in the seventy-fourth year of his age, and was buried in the cathedral church, where his effigy still remains upon an altar-tomb beneath an ornamental arch. Giraldus appears to have been an upright and able man. As an ecclesiastic he was zealous, active, and fearless in maintaining the rights and dignities of his Church; but he was, at the same time, honest and disinterested. As a scholar he was learned, and as a collector of historical materials diligent, far beyond the measure of his age. As a historian, however, he was full of credulity, and as a man, as his works prove, one of the vainest upon record. Giraldus has himself given a catalogue of his works, as well as a long history of his actions, both printed by Wharton. Other lists will be found in Fabricius, *Bibliotheca Med. et Inf. Latinitatis* (edit. Patav. 4to, 1754), iii, 62, and in the notes to his life in the *Biogr. Britan.* (ed. 1778), i, 640; 642, 644. Sir Richard Colt Hoare has given a full account of such MSS. of his works as exist in the several libraries in the British Museum, in the Archbishopal Library at Lambeth, at Bene't (Corpus Christi) College, in the public library at Cambridge, and in the Bodleian. Those printed are, *Itinerarium Cambrie* (Lond. 1585, 8vo), and in Camden's *Angl. Norm., etc., Script.* (Francof. 1602, fol.), p. 818-878:—*Topographia Hibernie* (Camden, ut sup.), p. 692-754:—*Expugnatione Hibernie* (ibidem), p. 755-813:—*Descriptio Cambrie* (ibid.), p. 879-892. Several short pieces by Giraldus are printed in the second volume of Wharton's *Anglia Sacra*. The *Gemma Ecclesiastica*, published at Mentz in 1549, without the author's name, under the title of *Gemma Anima*, is ascribed to Giraldus. Sir Richard Colt Hoare, in 1806, published the *Itinerary of Archbishop Baldwin through Wales*, translated into English, and illustrated with views, annotations, and a life of Giraldus (2 vols. 4to). A new edition, *Giraldi Cambrensis Opera*, is now publishing, under the direction of the master of the rolls, edited by J. F. Dimock; 5 vols. were issued up to 1868. See Wharton, *Anglia Sacra*, ii, 457-513; Fabricius, *Bibliotheca Med. et Inf. Latinitatis*; *Engl. Cyclopaedia*, s. v. Barry; *Biogr. Britannica*, s. v. Barri; Herzog, *Real-Encyclopädie*, v, 164; Wright, *Biogr. Brit. Literaria*, Anglo-Norman Period, p. 380-97.

**Girdle**, an essential article of dress in the East, and worn both by men and women. The corresponding Hebrew and Greek words are: 1. חַגוֹר, *chagor'*, or חַגְוֹרָה (fem.), *chagorah'*, girdler (Prov. xxxi, 24; Ezek. xxiii, 15; Gen. iii, 7; 2 Sam. xviii, 11; Isa. xxxii, 11), which is the general term for a girdle of any kind, whether worn by soldiers (1 Sam. xviii, 4; 2 Sam. xx, 8; 1 Kings ii, 5; 2 Kings iii, 21), or by women (Isa. iii, 24). 2. עֶזֶר, *ezor'*, something bound (Isa. xi, 5), especially used of the girdles worn by men: whether by prophets (2 Kings i, 8; Jer. xiii, 1), soldiers (Isa. v, 27; Ezek. xxiii, 15), or kings in their military capacity (Job xii, 18). 3. מַעֲזָח, *mezach'*, or מַזִּיחַ, *mazi'ach*, a band ("strength," Job xii, 21), used

of the girdle worn by men alone (Psa. cix, 19; Isa. xxiii, 10). 4. These, as well as the general term *חַגוֹר*, a *belt*, Matt. iii, 4; x, 9; Mark i, 6; vi, 8; Acts xxi, 11; Rev. i, 13; xv, 6, require no special elucidation. Besides these were the following peculiar terms: 5. *אַבְנֵי*, *abnet'* (from the Sanscrit *bantha*, a *band*), the girdle of sacerdotal and state officers (Exod. xxviii, 4, 9, 40; xxix, 9; xxxix, 29; Lev. viii, 7, 13; xvi, 4; Isa. xxii, 21). See **PRIEST**. It was especially worn by the priests about the close-fitting tunic (Exod. xxviii, 39; xxxix, 29), and is described by Josephus (*Ant.* iii, 7, 2) as made of linen so fine of texture as to look like the slough of a snake, and embroidered with flowers of scarlet, purple, blue, and fine linen. It was of about four fingers' breadth, and was wrapped several times round the priest's body, the ends hanging down to the feet. When engaged in sacrifice, the priest threw the ends over his left shoulder. According to Maimonides (*De Vas. Sanct.* c. 8), the girdle worn both by the high-priest and the common priests was of white linen embroidered with wool; but that worn by the high-priest on the day of atonement was entirely of white linen. The length of it was thirty-two cubits, and the breadth about three fingers. It was worn just below the arm-pits to avoid perspiration (comp. Ezek. xliv, 18). Jerome (*Ep. ad Fabiolam, de Vest. Sac.*) follows Josephus. With regard to the manner in which the girdle was embroidered, the "needlework" (חַגְוֹרָה עֵבֶר, Exod. xxviii, 39) is distinguished in the Mishna from the "cunning-work" (חַגְוֹרָה מְעִיבָה, Exod. xxvi, 31) as being worked by the needle with figures on one side only, whereas the latter was woven-work with figures on both sides (Cod. *Yoma* c. 8). So also Maimonides (*De Vas. Sanct.* viii, 15). But Jarchi, on Exod. xxvi, 31, 36, explains the difference as consisting in this, that in the former case the figures on the two sides are the same, whereas in the latter they are different. See **EMBROIDER**. This *abnet* may be considered as fairly represented by those girdles which we observe on such persons in the Egyptian paintings.

Ancient Egyptian Sacred Girdles.

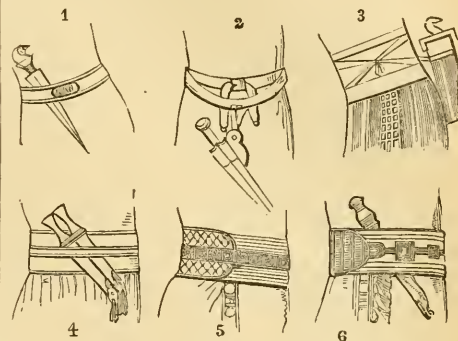

In all passages, except Isa. xxii, 21, *חַגוֹר* is used of the girdle of the priests only, but in that instance it appears to have been worn by Shebna, the treasurer, as part of the insignia of his office; unless it be supposed that he was of priestly rank, and wore it in his priestly capacity. He is called "high-priest" in the

*Chronicon Paschale*, p. 115 a, and in the Jewish tradition quoted by Jarchi ad loc. 6. The "curious girdle" (צִפְרָיִם, *che'sheb*, something requiring *inventive* art, Exod. xxviii, 8) attached to the ephod was made of the same materials and colors as the ephod, that is, of "gold, blue, and purple, and scarlet, and fine twined linen." Josephus describes it as sewed to the breast-plate. After passing once round it was tied in front upon the seam, the ends hanging down (*Ant.* iii, 7, 5). According to Maimonides, it was of woven work. See ERUOT. 7. In addition to these, פֶּתִיגִיל, *pethigil*, a covering or festive mantle ("stomacher," Isa. iii, 24), is a costly girdle worn by women. The Vulgate renders it *fascia pectoralis*. It would thus seem to correspond with the Latin *strophium*, a belt worn by women about the breast. In the Sept., however, it is translated χιτών μεσοπόρφυρος, "a tunic shot with purple," and Gesenius has "buntes Feyskleid" (compare Schröder, *De Vest. Mul.* p. 137, 404). 8. The כִּישְׁרוֹת, *kishurim*, closely-tied articles, mentioned in Isa. iii, 20 ("head-bands"); Jer. ii, 32 ("attire"), were probably girdles, although both Kimchi and Jarchi consider them as fillets for the hair. In the latter passage the Vulgate has again *fascia pectoralis*, and the Sept. στήθο-δῆσιμη, an appropriate bridal ornament. See each of the above renderings in their place.

The common girdle was made of leather (2 Kings i, 8; Matt. iii, 4), like that worn by the Bedouins of the present day, whom Curzon describes as "armed with a long crooked knife, and a pistol or two stuck in a red leathern girdle" (*Monist. of the Levant*, p. 7). In the time of Chardin the nobles of Mingrelia wore girdles of leather, four fingers broad, and embossed with silver. A finer girdle was made of linen (Jer. xiii, 1; Ezek. xvi, 10), embroidered with silk, and sometimes with gold and silver thread (Dan. x, 5; Rev. i, 13; xv, 6), and frequently studded with gold and precious stones or pearls (Le Bruyn, *Voy.* iv, 170; comp. Virgil, *Aeneid*, ix, 350). Morier (*Second Journey*, p. 150), describing the dress of the Armenian women, says, "They wear a silver girdle which rests on the hips, and is generally curiously wrought." The manufacture of girdles formed part of the employment of women (Prov. xxxi, 24).

The girdle was fastened by a clasp or buckle (2 Kings i, 8; Matt. iii, 4; Mark i, 4) of gold or silver, or tied in a knot (Jer. xiii, 1; Ezek. xvi, 10), so that the ends hung down in front, as in the figures on the ruins of Persepolis. It was worn by men about the loins, hence the expressions "girdle of the loins" or "of the reins" (אָזְנֵי הַקֶּלְבָּיִם, Isa. xi, 5; אָזְנֵי הַקֶּלְבָּיִם, Isa. v, 27). The girdle of women was generally looser than that of the men, and was worn about the hips, except when they were actively engaged (Prov. xxxi, 17). Curzon (p. 58), describing the dress of the Egyptian women, says, "Not round the waist, but round the hips a large and heavy Cashmere shawl is worn over the yelek, and the whole gracefulness of an Egyptian dress consists in the way in which this is put on." The military girdle was worn about the waist; the sword or dagger was suspended from it (Judg. iii, 16; 2 Sam. xx, 8; Psa. xlv, 3). In the Nineveh sculptures the soldiers are represented with broad girdles, to which the sword is attached, and through which two or even three daggers in a sheath are passed (comp. Q. Curtius, iii, 3). Hence girding up the loins denotes preparation for battle or for active exertion (1 Kings xviii, 46; 2 Kings iv, 29; Job xxxviii, 3; Prov. xxxi, 17; Jer. i, 17; Luke xii, 35; 1 Pet. i, 13); and to "loose the girdle" was to give way to repose and indolence (Isa. v, 27). To loose the girdle and give it to another was a token of great confidence and affection (1 Sam. xviii, 4). In times of mourning, girdles of sackcloth were worn as marks of humiliation and sorrow (Isa. iii, 24; xxii, 12).

In consequence of the costly materials of which girdles were made, they were frequently given as presents (1 Sam. xviii, 4; 2 Sam. xviii, 11), or in token of honor (Rev. i, 15), as is still the custom in Persia (comp. Morier, p. 93). Villages were given to the queens of Persia to supply them with girdles (Xenoph. *Anab.* i, 4, 9; Plato, *Alc.* i, 123).

Ancient Girdles: 1, 3, Egyptian; 2, Persepolitan; 4, 5, 6, Assyrian.

They were used as pockets, as among the Arabs still (Niebuhr, *Deser.* p. 56), and as purses, one end of the girdle being folded back for the purpose (Matt. x, 9; Mark vi, 8). Hence "zonam perdere," "to lose one's purse" (Hor. *Epist.* ii, 2, 40; compare Juv. xiv, 297). Lighthorns were also carried in the girdle (Ezek. ix, 2).

"Girdle" is often used figuratively in the Scriptures (see Psa. cix, 19; compare 1 Sam. ii, 4; Psa. xxx, 11; lxxv, 12; Eph. vi, 14).—Smith, s. v. "The girdle was a symbol of strength, activity, and power (Job xii, 18, 21; xxx, 11; Isa. xxiii, 10; xlv, 15; xi, 5; xxii, 21; 1 Kings xx, 11). The perfect adherence of the people of God to his service is figuratively illustrated by the "cleaving of the girdle to a man's loins" (Jer. xiii, 11). In the same view, "righteousness and faithfulness" are called the girdle of the Messiah (Isa. xi, 5). See ATTIRE.

**Gir'gashite** (Hebrew invariably in the sing. and with the art. *h-g-Girgashi'*, גִּרְגָשִׁי, in a collective sense; dwelling in a *clayey* soil; Sept. Γεργασαῖοι and Γεργασαῖος, Vulg. *Gergesari* and *Gergesavus*; A. V. "Girgashite" in 1 Chron. i, 14; "Girgashite" in Gen. x, 16; elsewhere "Girgashites"), a designation of one of the nations who were in possession of Canaan before the entrance thither of the children of Israel. In Gen. x, 16, they are mentioned as the descendants of the fifth son of Canaan; in other passages the tribe is merely referred to, and that but occasionally, in the formula expressing the doomed country (Gen. xv, 21; Deut. vii, 1 [and xx, 17 in Samarit. and Sept.]; Josh. iii, 10; xxiv, 11; 1 Chron. i, 14; Neh. ix, 8). The Girgashites are conjectured to have been a part of the large family of the Hivites, as they are omitted in nine out of ten places in which the nations or families of Canaan are mentioned, while in the tenth they are mentioned, and the Hivites omitted. Josephus states that nothing but the name of the Girgashites (Γεργασαῖοι) remained in his time (*Ant.* i, 6, 2). In the Jewish commentaries of R. Nachman and elsewhere, the Girgashites are described as having retired into Africa, fearing the power of God; and Procopius, in his *History of the Vandals*, mentions an ancient but doubtful inscription in Mauritania Tingitana, stating that the inhabitants had fled thither from the face of Joshua, the son of Nun. A city *Girgis* (גִּרְגִּישׁ) existed among the Phœnician tribes in Northern Africa at the Syrtis Minor (Fürst, *Heb. Lex.* p. 298). The notion that the Girgashites did migrate seems to have been founded on the circumstance that, although they are included in the list of the seven devoted nations either to be

driven out or destroyed by the Israelites (Gen. xv, 20, 21; Deut. vii, 1; Josh. iii, 10; xxiv, 11; Neh. ix, 8), yet they are omitted in the list of those to be utterly destroyed (Deut. xx, 17), and are mentioned among those with whom, contrary to the divine decree, the Israelites lived and intermarried (Judg. iii, 1-6). See CANAAN. The expression in Josh. xxiv, 11 would seem to indicate that the district of the Girgashites was on the west of Jordan. By most writers, however, they are supposed to have been settled in that part of the country which lay to the east of the lake of Gennesareth (*Jour. Sac. Lit.*, Oct. 1851, p. 167). This conclusion is founded on the identity between the word Γεργασῖοι, which the Septuagint gives for Girgashites, and that by which Matthew (viii, 28) indicates the land of the Gergesenes (Γεργεσηνοί). But as this last reading rests on a conjecture of Origen, on which little reliance is now placed, the conclusion drawn from it has no great weight, although the fact is possible on other grounds, especially the probability that some actual city of this name must have been the foundation of the reading in question. Indeed, the older reading, "Gerasenes," has sufficient resemblance to direct the attention to the country beyond the Jordan; where Eusebius also (*Onom.* s. v. Γεργασί) affirms that the Girgashites dwelt.—Kitto, s. v. See GERASA.

**Gir'gasite** (Gen. x, 16). See GIRGASHITE.

**Girl** (גַּרְלָהּ, *yallah'*, fem. of גַּרְלָהּ, a boy), lit. one born, i. e. a female child (Joel iii, 3; Zech. xiii, 5), spoken of a marriageable "damsel" (Gen. xxxiv, 4). See CHILD.

**Girzite**. See GEZRITE.

**Gisborne**, THOMAS, A.M., prebendary of Durham, a distinguished divine and author, was born at Derby in 1758, entered at Harrow School in 1773, and at St. John's College, Cambridge, in 1776; was made perpetual curate of Barton-under-Needwood, Staffordshire, in 1783, and removed in the same year to Yoxall Lodge, near Barton, where he ever after resided. He obtained the prebend of Durham in 1826, and died in 1846. His works are written in a clear and nervous style; his sermons have been recommended as models for young students in divinity. He strongly opposed Paley's Ethics, of which he published an *Examination* (2d edit. 1790). Among his works are. *A familiar Survey of the Christian Religion as connected with the Introduction of Christianity* (London, 1799, 2d ed. 8vo):—*The Principles of Moral Philosophy investigated and applied to the Constitution of civil Society* (Lond. 1798, 4th ed. 8vo):—*The Testimony of Natural Theology to Christianity* (London, 1818, 12mo):—*An Inquiry respecting Love as one of the divine Attributes* (Lond. 1828, sm. 8vo):—*Sermons* (Lond. 1808, 1809, and 1810, 3 vols. 8vo):—*A familiar Exposition of Colossians, in eight Sermons* (London, 1816, 12mo).—Darling, *Cyclopædia Bibliographica*, i, 1267; Allibone, *Dict. of Authors*, i, 675; Whewell, *History of Moral Philosophy in England*, lect. xi; *Gen. Magazine*, June, 1846.

**Gischälā** (גִּשְׁחָלָא) a small city (πολιχνία) often mentioned by Josephus in his account of the last struggle of the Jews with the Romans, especially as being the scene of the operations of the famous "John (q. v.) of Gischala" (*War*, iv, 1, 5). It was situated in Galilee (*ib.* ii, 1); and, after having been destroyed by the Jewish zealots, it was rebuilt by John (*ib.*, 10), and further fortified by the advice of Josephus himself (*War*, ii, 20, 6), and was the last stronghold of Galilee captured by Titus (*ib.* iv, 2). It is doubtless the *Gush Chalab* (גִּשְׁחָלָא) of the Talmud (*Menach.* viii, 3), famed for its oil (*Erach.* ix, 6), named in connection with Meron and Capernaum (Gemara, *Pesachim*, fol. 33, a), and also by Peter Apolloniarius (*De exciv. Hierosol.* p. 63). Jerome, on several occasions, states a tradition that the parents of the apostle Paul emigrated thence to Tarsus (Reland, *Palæst.* p. 813).

The same Hebrew name likewise occurs in Hottinger (*Cippi Hebræici*, p. 56) and in Benjamin of Tudela (p. 108). Schwarz erroneously identifies it (*Palæst.* p. 198) with the AHLAB (q. v.) of the tribe of Asher (Judg. i, 31). Dr. Robinson found the site in the modern *El-Jish*, on a hill about two hours north-west of Safed; the village had recently been totally destroyed by an earthquake, but was then partly rebuilt (*Researches*, iii, 368 sq.).

**Gislebert**. See GILBERT.

**Gislebertus Porretanus**. See GILBERT.

**Gis'pa** (Heb. *Gishpa'*, גִּשְׁפָּא, *flattery or hearkening*; Sept. Γεσπάς, Vulg. *Gaspā*), one of the two overseers of the Nethinim in Ophel at Jerusalem, after the captivity (Neh. xi, 21); but whether he was himself also of that class is not stated, although this is probable from the fact that his associate Ziba was (Ezra ii, 43). B.C. 446.

**Gitta** (גִּתָּא), a town of Samaria, mentioned by Justin Martyr (*Apol.* ii), Eusebius (*Hist. Eccles.* i, 13), Zonarus (from Justin, xi, p. 567), Theodoret (*Compend. heret. fab.* i), and by Epiphanius (*adv. Har.* p. 55) and Athanasius (*Hist. Eccles.* p. 15), as the birth-place of Simon Magus; thought by some to be the GATH (q. v.) of Scripture (Reland, *Palæst.* p. 813, 814), but discovered by Robinson (*Researches*, iii, 144) in the modern *Kuryet-Jit*, a village rather more than two hours west of Nablus (comp. Schwarz, *Palæst.* p. 134).

Another Gitta (Γιτῶ) is mentioned by Josephus (*War*, i, 17, 2) as a fortress at Machærus (q. v.).

**Git'tah-he'pher** (Heb. *Gittah'-Ché'pher*, גִּתְּתָהּ פֶּהֶר, Sept. Γετῆαίηρο, Vulg. *Gethhepher*), a prolonged form (Josh. xix, 13) of the name GATH-HEPHER (q. v.).

**Gitta'im** (Heb. *Gittā'im*, גִּתְּתַיִם, *two wine-presses*; Sept. Γετῆαίρη and Γετῆαίρη), a place incidentally mentioned in 2 Sam. iv, 3, where the meaning appears to be that the inhabitants of Beeroth, which was allotted to Benjamin, had been compelled to fly from that place, and had taken refuge at Gittaim. Beeroth was one of the towns of the Gibeonites (Josh. ix, 17); and the cause of the flight of its people may have been Saul's persecution of the Gibeonites alluded to in 2 Sam. xxi, 2; although the above text seems to intimate that the flight was through consternation at the death of Abner, and fear of vengeance for the murder of Ishboeth. See BEER. The inhabitants, doubtless, soon returned. Gittaim is again mentioned in the list of places inhabited by the Benjamites after their return from the captivity, with Ramah, Neballat, Lod, and other known towns of Benjamin to the north-west of Jerusalem (Neh. xi, 33).—Smith, s. v. Schwartz (*Phys. Descr. of Palæst.* p. 134) identifies Gittaim with *Rameh* (ARIMATHÆA) on the strength of certain Jewish traditions; which is not impossible, since Lydda was occupied by the Benjamites, and other associated cities seem to have been located in this neighborhood. See LOD; HADID.

"Gittaim occurs in the Sept. version of 1 Sam. xiv, 35.—'Out of Gethaim roll me a great stone.' But this is not supported by any other of the ancient versions, which unanimously adhere to the Hebrew text, and probably proceeds from a mistake or corruption of the Heb. word גִּתְּתַיִם; A. V. 'ye have transgressed.' It further occurs in the Sept. in Gen. xxxvi, 35, and 1 Chron. i, 46, as the representative of AVTH, a change not so intelligible as the other, and equally unsupported by the other old versions" (Smith, s. v.).

**Gittin**. See TALMUD.

**Git'tite** (Heb. *Giti'*, גִּתִּי; Sept. Γεθαίος), an inhabitant or native properly of the Philistine city GATH (Josh. xiii, 3). Obed-Edom, in whose house the ark was for a time placed (2 Sam. vi, 10), and who afterwards served in Jerusalem (1 Chron. xvi, 8), although

a Levite (1 Chron. xxvi, 4), is called a Gittite (2 Sam. vi, 10), possibly because he had been with David when at Gath, but much more probably from his being a native of GATH-RIMMON, which was a city of that family of the Levites to which he belonged (Josh. xxi, 24). There seems to be no reason for extending this interpretation to Ittai (2 Sam. xv, 19), seeing that David expressly calls him "a stranger" (foreigner), and, what is more, "an exile." He was at the head of 600 men, who were also Gittites, for they are called (ver. 20) his "brethren." They appear to have formed a foreign troop of experienced warriors, chiefly from Gath, in the pay and service of David, which they had perhaps entered in the first instance for the sake of sharing in the booty obtainable in his wars.—Kitto, s. v. See CHERETHITE.

**Git'tith** (Heb. *Gittith'*, גִּתִּיתִּי, prob. for גִּתִּיתִּי, and so kindred with NEGOTHI), a stringed instrument of music (Psa. viii, 1; lxxxii, 1; lxxxiv, 1). The term is not to be derived (with the Targums) from the city GATH, nor (with the Sept. *ὑπερ τῶν Ἀφῶν*) from a wine-press (as a *vintage-song*, Michael. *Suppl.* p. 382); but from the root גִּת, to strike (Redslob, *De præcepto Mus.*, etc., Lips. 1831, p. 24), Gesenius, *Thest. Hebr.* p. 849. On the other hand, Fürst (*Concord.* p. 256) derives it from גִּתִּי, to depen, and calls it "a musical instrument curved and hollow (syn. גִּתִּי);" whereas in his *Heb. Lex.* p. 304, he says it is the name of "a musical body of Levites who had their chief seat in the Levitical city of Gath-rimmon, the word in the titles of Psalms not being capable of an interpretation referring to instruments or airs." See PSALMS.

**Gizoh.** See GIZONITE.

**Gi'zonite** (Heb. with the art. *hag-Gizoni'*, הַגִּזּוֹנִי; Sept. ὁ Γίζωνίτης v. r. Γωζίνι, Vulg. *Gezonites*), an inhabitant of GIZOH (Heb. *Gzoh'*, גִּזּוֹה, perhaps *quarry*), a place unknown except as the residence of Hashem, the ancestor of two of the sons of David's warriors (1 Chron. xi, 34). As these are called *Hararites* (i. e. "mountaineers") in this as well as the parallel passage (2 Sam. xxiii, 32, 34), we may perhaps infer that the city in question was situated somewhere in the mountains of Judah. The conclusion of Kennicott, who examines the passage at length, is that the name should be *Gomai*, a proper name, and not an appellative (*Dissert.* p. 199-203). See GUNI.

**Gizrite.** See GEZRITE.

**Glagolita, Glagolitz, Glagolites** (derived from the Slavonic *Glagol*, a word), "an ancient Slavonic alphabet, principally used in several Roman Catholic dioceses of Istria and Dalmatia, in the psalms, liturgies, and offices of the Church. The use of this liturgy was confirmed to the priesthood by a bull of pope Innocent IV, 1248. Of the antiquity of this alphabet the savans have maintained a great variety of opinions. Dobrowsky laid the foundation of a critical investigation of the subject, and has been followed by Kopitar, Jacob Grimm, Ivan Preis, Schafarik, etc. In former times the invention was sometimes ascribed to St. Jerome; while the Orientals, according to Neale, consider it as a mere corruption and Latinization of the Cyrillic alphabet. According to the recent researches of Schafarik, it was invented by Cyril, and is, consequently, older than what is now called the Cyrillic alphabet (Kyrillischer), the author of which was bishop Clement of Welitza (died 916). Grimm found in some Glagolitic letters Runic characters. The *Glagolitic literature* embraces all South Slavonic works which are written in the Glagolitic alphabet. According to language and form of the letters, two periods may be distinguished—an earlier and a later one. Among the important documents of the earlier period which are still extant are a Glagolitic manuscript of the 11th

century, belonging to count Kloz, published by Kopitar under the title *Glagoliti Clozianus* (956 lines, Vienna, 1836); a gospel which in 1736 was brought by J. S. Assemani from Jerusalem to Rome, is preserved there in the Vatican, but is not yet printed; the *Abecedarium Bulgaricum*, at Paris (published in the *Nouveau traité de diplomatique* [Paris, 1750], and more fully by Kopitar in the *Glagolita Clozianus*); a gospel which Victor Gregorovich, of Kasan, purchased on Mount Athos (fragments in Miklosich's *Slavic Library* [Vienna, 1857, vol. i]). The resemblance between the language of these documents and the language of the Old-Slavonic documents written in the Cyrillic alphabet, is the greater the more ancient the latter are. The younger period of the Glagolitic literature embraces the translations into the South Slavonic dialects of the New Testament by Primus Truber (about the middle of the 16th century), of the whole Bible by Dalmatin (Witten. 1584), of the Augsburg Confession, of the Catechisms of Luther, etc. In some of these works partly the Glagolitic and partly the Cyrillic alphabet was used." (See Dobrowsky, *Glagolitica* [Prague, 1807]—who puts the origin of the Glagolitic alphabet erroneously in the 13th century; Höfler and Schafarik, *Glagolitische Fragmente* [Prague, 1856]; Schafarik, *Ueber Ursprung u. Heimath des Glagolitismus* [Prague, 1858]; Sillem, *Primus Truber* [Erlangen, 1861]. The Glagolitic alphabet is given in Bagster's *Bible of Every Land*, p. liv).—*Allym. Real-Encyclop.* s. v.: Neale, *Holy Eastern Church, Introduction*, ii, 823. (A. J. S.)

**Glanvil, Joseph**, an eminent English divine and philosopher, was born at Plymouth in 1636. He graduated at Exeter College, Oxford, in 1655, and in 1656 he removed to Lincoln College, where he took his degree of M.A. in 1658. Although a friend of Baxter, at the Restoration he conformed to the Church; he also became a convert to the principles of the Baconian philosophy; and when he had just entered his twenty-fifth year he wrote a treatise in defense of them, under the title of *The Vanity of Dogmatizing, or Confidence in Opinions*, with *An Apology for Philosophy* (1661, 12mo). About this time he entered into orders, and was presented to the rectory of Wimbish and to the vicarage of Frome-Selwood. In 1662 he published *Lux Orientalis, or an Inquiry into the Opinion of the Eastern Sages concerning the Pre-existence of Souls* (12mo). In 1665 he published *Sceptis Scientifica, or Confessed Ignorance the Way to Science*, a modified edition of *The Vanity of Dogmatizing* (4to). It was dedicated to the Royal Society, of which he was now chosen a member. Tennemann remarks that in this treatise Glanvil enlarged with ability on the causes of doubt, and applied them to the different departments of science, more particularly the discoveries in physics effected in his own time. His remarks on Causality, in which he coincides with those of Algazel, and appears to have forestalled Hume, deserve especial attention. "We do not," says he, "detect the existence of any cause immediately by sensational or intuitional perception, but only by mediate representations, and therefore by inference, which may be erroneous." The credit which he had acquired by his writings encouraged him in 1666 to deliver his sentiments upon the subject of witchcraft, the existence of which he endeavored to defend in *Some Philosophical Considerations touching the Being of Witches and Witchcraft* (Lond. 1666, 4to), an enlarged edition of which was published by Henry More under the title *Sudducismus Triumphans* (Lond. 1682, 8vo). He wrote also *Essays on Subjects in Philosophy and Religion* (Lond. 1676, 4to):—*Essay concerning Preaching* (London, 1678, 12mo), and other smaller works. About this time he was presented to the rectory of the Abbey Church at Bath. He died of fever Nov. 4, 1680. After his death a volume of his *Discourses, Sermons, and Remains* appeared, edited by Dr. Horneck, who wrote a eulogy upon him.—Hook, *Ecol. Biog.* v, 325; Tennemann, *Manual Hist. Philos.* § 343;

Bayle, *General Dict.* v, 435; Lecky, *History of Rationalism*, i, 121 sq.

**Glaphyra** (Γλαφύρα, *elegant*), daughter of Archelaus, king of Cappadocia; married to Alexander, son of Herod the Great (Josephus, *Ant.* xvii, 1, 2). She quarrelled with Salome (*ib.* xvii, 7, 2), who, in revenge, fomented Herod's jealousy against Alexander (*War*, i, 24, 2, 3), which eventuated in the death of the latter. See ALEXANDER 9. She remained faithful to her husband (*Ant.* xvi, 10, 7), and after his execution she returned to her father (17, 1), although her two sons by Alexander were brought up by Herod (*ib.* 2). She afterwards married Juba, king of Lydia, and at his death again returned to her father, but subsequently married Herod Archelaus, who divorced for her sake his former wife Mariamne, but she soon died, in accordance with a dream in which her first husband reproached her for her repeated inconstancy (*ib.* xvii, 13, 4).

**Glareanus**, HEINRICH LORITI, was born at Molis, in the canton of Glarus (hence his name), in Switzerland, June, 1488; studied philosophy, belles-lettres, and theology at Rottweil and Cologne, and in 1512 became poet laureate of the emperor Maximilian I. He took part in the controversies between Reuchlin and the old-school systems; went to Basel in 1514, to Italy in 1515, and in 1517 visited Paris, where he gave private instruction in the classics; returning afterwards to Basel, he opened a school there. He showed himself at first favorable to the principles of the Reformation, but abandoned them afterwards; and when Protestantism gained Basel, he retired with Erasmus to Freiburg, where he became professor of literature and history. He gave up this situation in 1560, and died March 27, 1563. Glareanus was a very learned man, and especially in the theory and history of music. His *Dodecachordon* (Basel, 1547) is valuable as a picture of the state of music in his age.—H. Schreiber, *Lebensbeschreibung* (Freib. 1837); Pierer, *Universal-Lexikon*, s. v.; Herzog, *Real-Encyclopädie*, v, 165. (J. N. P.)

**Glas or Glass**, JOHN, founder of the sect of Glassites, was born at Auchtermutty, Sept. 21, 1695. He was educated at St. Andrew's, and in 1719 became minister of Tealing. In 1727 he published a book to prove that Church establishments are inconsistent with the Gospel, for which he was deposed by the General Assembly. He imbibed a number of other peculiar opinions and gathered followers, who were called by his name in Scotland, but in England and America they were denominated Sandemanians. Glas died at Dundee in 1773. His works were published at Edinburgh in 4 vols. 8vo, and in a second edition at Perth (1782, 5 vols. 8vo). Among the most celebrated members of the sect was Michael Faraday. For the peculiar opinions of the sect, see SANDEMANIANS.

**Glass** (the material is perhaps denoted by זְכֵקִיתִי, *zekukithi*, rock "crystal," Job xxviii, 17; ἱάλαος, *crystal*, "glass," Rev. xxi, 18, 21; and hence the adj. βάλαρος, *crystalline*, "of glass," Rev. iv, 6; xv, 2 [see CRYSTAL]; the instrument or looking-glass by ἱγύλα, *gillayal*, a tablet, "roll," Isa. vii, 1; "glass," i. e. *mirror*, Isa. iii, 23; מַרְאֵה, *marah'*, a "vision," as usually rendered; "looking-glass," Exod. xxxviii, 8; ἑσπαστρον, a *mirror*, "glass," 1 Cor. xii, 12; Jas. i, 23 [see MIRROR]), according to Pliny (*H. Nat.* xxxvi, 26), was discovered by what is termed accident. Some merchants kindled a fire on that part of the coast of Phœnicia which lies near Ptolemais, between the foot of Carmel and Tyre, at a spot where the river Belus casts the fine sand which it brings down; but, as they were without the usual means of suspending their cooking vessels, they employed for that purpose logs of nitre, their vessel being filled with that substance: the fire fusing the nitre and the sand produced glass.

He proceeds to state that the Sidonians, in whose vicinity the discovery was made, took it up, and, having in process of time carried the art to a high degree of excellence, gained thereby both wealth and fame; other nations became their pupils; the Romans especially attained to very high skill in the art of fusing, blowing, and coloring glass; finally, even glass mirrors were invented by the Sidonians. This account of Pliny is in substance corroborated by Strabo (xvi, 15) and by Josephus (*War*, ii, 9). But this account is less likely than the supposition that vitreous matter first attracted observation from the custom of lighting fires on the sand "in a country producing natron or subcarbonate of soda" (Rawlinson's *Herod.* ii, 82). It has been pointed out that Pliny's story may have originated in the fact that the sand of the Syrian river Belus, at the mouth of which the incident is supposed to have occurred, "was esteemed peculiarly suitable for glass-making, and exported in great quantities to the workshops of Sidon and Alexandria, long the most famous in the ancient world" (Smith, *Dict. of Class. Ant.* s. v. Vitrum, where everything requisite to the illustration of the classical allusions to glass may be found). Some find a remarkable reference to this little river (respecting which, see Pliny, *Hist. Nat.* v, 17; xxxvi, 65; Josephus, *War*, ii, 10, 2; Tacitus, *Hist.* v, 7) in the blessing to the tribe of Zebulun, "they shall suck of the abundance of the seas, and of treasures hid in the sand" (Deut. xxxiii, 19). Both the name Belus (Reland, *Palast.* p. 267) and the Hebrew word בִּלְיָהוּ, "sand," have been suggested as derivations for the Greek ἱάλαος, which is, however, in all probability, from an Egyptian root. See BELUS. Some suppose that the proper name בִּרְיָהוּ:בִּרְיָהוּ (—"burnings by the waters'") contains an allusion to Sidonian glass-factories (Meier on Jos. xi, 8; xiii, 6), but it is much more probable that it was so called from the burning of Jabin's chariots at that place (Lord A. Hervey, *On the Genealogies*, p. 228), or from hot springs. See MISREPHOTH-MAIM.

Yet, notwithstanding the above explicit statement, it was long denied that the ancients were acquainted with glass properly so called; nor did the denial entirely disappear even when Pompeii offered evidences of its want of foundation. Our knowledge of Egypt has, however, set the matter at rest. Wilkinson, in his *Ancient Egyptians* (iii, 88 sq.), has adduced the fullest evidence that glass was known to and made by that ingenious people at a very early period of their national existence. Upwards of 3500 years ago, in the reign of the first Osirtasen, they appear to have practised the art of blowing glass. The process is represented in the paintings of Beni-Hassan, executed in the reign of that monarch. In the same age images of glazed pottery were common. Ornaments of glass were made by them about 1500 years B.C.; for a bead of that date has been found, being of the same specific gravity as that of our crown glass. Many glass bottles, etc., have been met with in the tombs, some of very remote antiquity. Glass vases were used for holding wine as early as the Exode. In Egypt they had the advantage not only of an earlier application to the art, but also of a peculiar earth, which appears to have been necessary to the production of some of the more valuable and brilliant kinds of glass (Beckman, *History of Inventions*, "Colored Glass," i, 195 sq., Eng. transl.; also iii, 208 sq.; iv, 54). Yet the perfectly clear and transparent glass was considered the most valuable (Pliny, xxxvi, 26). Indeed, a great part of the glass-ware used at Rome about the Christian æra and subsequently came from Alexandria; and the emperor Hadrian was presented by an Egyptian priest with some vases which were reckoned so fine that they were produced only on grand occasions (Strabo, l. xvii; Vopiscus in *Vita Saturnini*, c. 8). Wilkinson states respecting the Egyptians, "Such was their skill

Ancient Egyptian Glass-blowers: 1, from the monuments at Beni-Hassan; 2, from Thebes. The glass at the end of the blow-pipe *b b* is colored green; *a* is the fire; *d*, a glass bottle.

in the manufacture of glass, and in the mode of staining it of various hues, that they counterfeited with success the amethyst and other precious stones, and even arrived at an excellence in the art which their successors have been unable to retain, and which our European workmen, in spite of their improvements in other branches of this manufacture, are still unable to imitate. For not only do the colors of some Egyptian opaque glass offer the most varied devices on the exterior, distributed with the regularity of a studied design, but the same hue and the same devices pass in right lines directly through the substance; so that in whatever part it is broken, or wherever a section may chance to be made of it, the same appearance, the same colors, and the same device present themselves, without being found ever to deviate from the direction of a straight line, from the external surface to the interior" (*Ancient Egypt*, iii, 193). Winkelmann is of opinion that glass was employed more frequently in ancient than in modern times. It was sometimes used by the Egyptians even for coffins, and in wainscoting ("vitrea camera," *Hist. Nat.* xxxvi, 64; *Stat. Sylv.* i, v,

Glass Bottles and Jugs. From the Tombs of Egypt.  
"III.—K κ κ

42). They also employed it not only for drinking utensils and ornaments of the person, but for mosaic work, the figures of deities, and sacred emblems, attaining to exquisite workmanship and a surprising brilliancy of color. Their imitation of precious stones in a manner which often defied detection (Pliny, *Hist. Naturalis*, xxxvii, 26, 33, 75) is probably the explanation of the incredibly large gems which we find mentioned in ancient authors; e. g. Larcher considers that the emerald column alluded to by Herodotus (ii, 44) was "du verre coloré, dont l'intérieur était éclairé par des lampes." The art, too, of cutting glass was known to them at the most remote periods; for which purpose, as we learn from Pliny (*Hist. Naturalis*, xxxvii, 4), the diamond was used. See EX-GRAVE.

The art of manufacturing glass was also known to the ancient Assyrians (Layard, *Ninur.* ii, 42), and a glass bottle was found in the north-west palace of Nimrūd which has on it the name of Sargon, and is therefore probably older than B.C. 702 (*id. Nin. and Bab.* p. 167). This is the earliest known specimen of transparent glass. Opaque colored glass was manufactured by the Assyrians at a much earlier period, and some specimens exist of the 15th century B.C. The Sargon vase had been blown in one piece, and turned and hollowed out afterwards. In the mounds of Babylon were likewise found small glass bottles, some colored, others ribbed and otherwise ornamented, and vases of earthen-ware of various forms and sizes, sometimes glazed with a rich blue color (*ib.* p. 429).

Glass Bottle from Nimrūd.

Glass Bottles and glazed Earthen-ware Vessel from the Mound of Bab. J.

Other glass vessels of the Roman period were elsewhere discovered (*ib.* p. 504). With the glass bowls was discovered a rock-crystal lens, which must have been used as a magnifying or burning-glass (*ib.* p. 167). In later times glass was abundant for similar purposes among the Romans, as is evident from the specimens disinterred from the ruins of Pompeii. See BOTTLE.

That glass was known to the Hebrews appears beyond a doubt; but whether they brought a knowledge of its manufacture with them out of Egypt, or learned it from their Sidonian neighbors, is uncertain. Whether they used it for mirrors is doubtful. In Job xxviii, 17, *זַכְּזִיקִים* is believed to mean glass, though it is ren-

Glass Vases from Pompeii.

dered "crystal" in the English version. It comes from  $\text{קָרִישׁ}$  (*to be pure*), and, according to the best authorities, means a kind of glass which in ancient days was held in high esteem (J. D. Michaelis, *Hist. Vitri apud Hebr.*; and Hamberger, *Hist. Vitri ex antiquitate eruta*, quoted by Gesenius, s. v.). Symmachus renders it  $\text{κρῶσταλλος}$ , but that is rather intended by  $\text{קָרִישׁ}$  (Job xxviii, 18, A. V. "pearls," Sept.  $\text{γάβρις}$ , a word which also means "ice;" comp. Pliny, *H. N.* xxxvii, 2) and  $\text{קָרִישׁ}$  (Ezek. i, 22). It seems, then, that Job xxviii, 17 contains the only allusion to glass found in the O. T., and even this reference is disputed. Besides Symmachus, others also render it  $\text{διαγῆ κρῶσταλλον}$  (Schleusner, *Thesaur.* s. v.  $\text{ἄλαος}$ ), and it is argued that the word  $\text{ἄλαος}$  frequently means crystal. Thus the Schol. on Aristoph. *Nub.* 764, defines  $\text{ἄλαος}$  (when it occurs in old writers) as  $\text{ἰαφανῆς λίθος ἰοικῶς ἄλαφι}$ , and Hesychius gives as its equivalent  $\text{λίθος τήριος}$ . In Herodotus (iii, 24) it is clear that  $\text{ἄλαος}$  must mean crystal, for he says,  $\text{ἢ ἔτι σφι πολλῆ καὶ ἐνέργος ὀρύσσεια}$ , and Achilles Tatius speaks of crystal as  $\text{ἄλαος ὀρωρυμένη}$  (ii, 3; Bähr, *On Herod.* ii, 44; Heeren, *Ideen*, II, i, 335). Others consider  $\text{קָרִישׁ}$  to be amber, or electrum, or alabaster (Bochart, *Hieroz.* II, vi, 872). In the New Testament the word employed is  $\text{ἄλαος}$  (compare Aristoph. *Nubes*, 768). In Rev. xxi, 18 we read, "The city was pure gold, like unto clear glass;" ver. 21, "as it were transparent glass" (compare iv, 6). Mention is made in Rev. iv, 6, and xv, 2, of a sea of glass like unto crystal, concerning the meaning of which interpreters vary; but it is probably an allusion to the *brazen sea* spoken of in 1 Kings vii, 23, and elsewhere, containing water for the priests to wash with, that they might not minister before God under any pollution. "Molten looking-glass" also occurs in Job xxxvii, 18; but the original  $\text{סֵפֶר}$ , *speculum*, and its corresponding word in Exod. xxxviii, 8, authorize the translation "mirror"—that is, of some metal. Indeed, Beekman (*Beiträge zur Gesch. der Erfindung*, iii, 319) erroneously denies that glass mirrors were known till the 13th century, adding that they are still seldom seen in the East. It is certain, however, that glass was not applied in ancient times to windows; when these were not, as they commonly were in the East, simply open apertures by day, with wooden doors placed on them by night, a kind of semi-transparent stone, a sort of talc, called *lapis specularis*, was generally used, and continued to be so for centuries after the Christian era. See WINDOW.

It is a singular fact, that although the ancients were aware of the reflective power of glass, and although the Sidonians used it for mirrors (Pliny, *H. N.* xxxvi, 66), yet for some unexplained reason mirrors of glass must have proved unsuccessful, since even under the Roman empire they were universally made of metal, which is at once less perfect, more expensive, and more difficult to preserve. See Smith, *Diet. of Class. Ant.* s. v. *Speculum*. Accordingly, the mirrors found in Egypt are made of mixed metal, chiefly copper. So

admirably did the skill of the Egyptians succeed in the composition of metals, that their mirrors were susceptible of a polish which has been but partially revived at the present day. The mirror was nearly round, having a handle of wood, stone, or metal. The form varied with the taste of the owner. The same kind of metal mirror was used by the Israelites, who doubtless brought it from Egypt. In Exod. xxxviii, 8, it is expressly said that Moses "made the laver of brass of the looking-glasses (brazen mirrors) of the women." In the East mirrors had a connection with the observances of religion; females held them before the images of the goddesses, thereby manifesting their own humility as servants of the divinities, and betokening the prevalence in private life of a similar custom (Callimach. *Hymn. in Pallad.* 21; Senec. *Ep.* 95; Cyril, *De Adorat. in Spir.* ii, 64). That in the New Testament a mirror is intended in James i, 23, "beholding his natural face in a glass," appears certain; but the other passage, in which the word  $\text{ἑσπῆρον}$  occurs (1 Cor. xiii, 12), seems to require an imperfectly transparent medium, through which objects are beheld. What the precise substance was which the apostle thought of when he used the words it may not be easy to determine. It could not well be ordinary glass, for that was transparent. It may have been the *lapis specularis*, or a kind of talc, of which the ancients made their windows. This opinion is confirmed by Schleusner, who says that the Jews used a similar mode of expression to describe a dim and imperfect view of mental objects (Schöttgen, *Hor. Heb.* ad loc.). (See Michaelis, *Hist. Vitri ap. Heb.* in *Comment. Soc. Goetting.* iv, 57; also Dr. Falconer on "the Knowledge of the Ancients respecting Glass," in the *Memoirs of the Lit. and Phil. Soc. of Manchester*, ii, 96; Becker's *Charicles*, i, 132; Michaelis, *Suppl.* p. 613; Pareau, *Comment. on Job xxviii*, p. 316; Hamberger, *Vitri Hist.*, in the *Comment. Soc. Gott.* 1754; Hirsch, *Geschichte d. Baukunst*, iii, 66.)—Kitto, s. v.; Smith, s. v. See LOOKING-GLASS.

**Glass-painting** is of three kinds: (1) the *mosaic*, in which pieces of differently-colored glass are so cut out and arranged as to represent figures or scenes, the pieces being joined together with lead; (2) the *enamel*, in which the colors are laid on a plate of glass and then burnt in; and (3) the *mosaic-enamel*, which is a union of the two others, and is by far the most effective kind of glass-painting. The art probably had its origin in France or Germany during the tenth century. The mosaic style prevailed till the fourteenth century. Glass-painting reached its highest state in the fifteenth and sixteenth centuries. After the rise of the Renaissance architecture in the sixteenth century, glass-painting fell into decadence. It has been quite successfully revived during the last thirty years in Germany.—Warrington, *History of Stained Glass* (London, 1830); Wackernagel, *Geschichte der deutschen Glasmalerei* (Leipzig, 1855). (G. F. C.)

**Glass** or **Glassius**, SALOMO, a German theologian, eminent both for piety and learning, was born at Sondershausen, Thuringia, in 1593. He was educated at the universities of Wittenberg and Jena, and devoted himself at an early period specially to the study of Hebrew and its cognate languages. He became in 1637 professor of theology at Jena, and in 1640 was made superintendent of the churches and schools in Saxe-Gotha. In this office he acquitted himself with great zeal and success, laboring for the spiritual as well as intellectual well-being of the churches of the duchy. He died at Gotha July 27, 1656. His works are, *Philologia Sacra* (4to);—*Onomologia Messia Prophectica* (Jena, 1624, 4to);—*Disputationes in Augustanum Confessionem*;—*Eregetis Evangeliorum et Epistolatorum* (Gotha, 1647, 4to; Nuremberg, 1664, fol.);—*Christologia Mosaica* (Jena, 1649, 4to);—*Christologia Davidica* (Jena, 1638, 4to);—*Loci Theologici* (posthumous, Go-

tha, 1661, 8vo, and Jena, 1731, 8vo, with a preface on the Life and Writings of Glassius). The best edition of the *Philologia Sacra*, as Glass left it, is that of Leipzig, 1725, 4to; the edition of Dathe and Bauer (Lips. 1776-1797, 3 vols. 8vo) contains valuable additions by the editors, but is tainted with the vices of the low rationalistic period in which it appeared.—Herzog, *Real-Encyclop.* v, 167 sq.; Hoefler, *Nouv. Biog. Générale*, xx, 795-6.

**Glastonbury**, "an ancient municipal burg and market-town in the county of Somerset, twenty-five miles south-west of Bath, is built in the form of a cross, and occupies a peninsula formed by the river Brue or Brent, called the Isle of Avalon. Pop. (1861) 3593. The town owes its origin to its celebrated abbey, which, according to tradition, was founded in A.D. 60, and was one of the earliest seats of Christianity in Britain. Its traditionary founder was Joseph of Arimathea, and the 'miraculous thorn,' which flowered on Christmas-day, was, till the time of the Puritans, believed by the common people to be the veritable staff with which Joseph aided his steps from the Holy Land. The tree was destroyed during the civil wars, but grafts from it still flourish in the neighboring gardens. In A.D. 605 the monks adopted the dress and rules of the Benedictine order. This magnificent pile at one time covered sixty acres; but as most of the houses in Glastonbury, and also a causeway across Sedgemoor, have been constructed of the materials, the extent of the ruins is now much diminished. The most interesting remains are the Abbey Church, with St. Joseph's Chapel, St. Mary's Chapel, and the Abbot's Kitchen. St. Joseph's Chapel is one of the most elegant specimens in existence of the transition from Norman to early English architecture, and is supposed to have been erected during the reigns of Henry II and Richard I. It is now roofless, and the vaulting of the crypt is nearly destroyed. The entrance is adorned with sculpture. Below the floor is a Norman crypt, within which is St. Joseph's Well. Of the Abbey Church few fragments remain. The Chapel of St. Mary is roofless, but the remains of its pointed windows and arches are exceedingly elegant. The Abbot's Kitchen, now separate from the rest of the ruins, is a square massive structure, the walls strongly buttressed, and dates from about the 15th century. Glastonbury has the honor of ranking St. Patrick (A.D. 415) and St. Dunstan among its abbots. In 1539 Henry VIII summoned abbot Whiting to surrender Glastonbury and all its treasures; and on his refusal, condemned him to be hanged and quartered, and the monastery confiscated to the king's use, which sentence was immediately carried into execution. According to tradition, king Arthur and his queen Guinever were buried in the cemetery of the abbey; and Giraldus Cambrensis states that 'a leaden cross, bearing the following inscription, "Hic jacet sepultus inclytus Rex Arthurus in insula Avallonia," was found under a stone seven feet below the surface, and nine feet below this was found an oaken coffin, containing dust and bones.' This disinterment took place by order of Henry II. The only other objects of interest at Glastonbury are the Church of St. Benedict; the Church of St. John the Baptist, with a tower 140 feet high; the Weary-all Hill, where Joseph of Arimathea rested from his weary pilgrimage; and the Tor Hill, where the last abbot of Glastonbury was put to death, 500 feet above the sea-level, crowned by a beautiful tower, the ruin of a pilgrimage chapel of St. Michael."—Chambers, *Encyclopædia*, s. v.

**Glatz**, JACOB, a Protestant clergyman of Hungary, was born in 1776 at Poprad, studied theology at the university of Jena, became in 1797 professor at Schepfenthal, in 1804 professor at the Protestant school of Vienna, in 1805 minister of the Lutheran congregation in the same city, resigned in 1826, and died in 1831 at Pressburg. He wrote numerous ju-

venile books, which appeared in many editions; also several pedagogical works. He edited the *Annalen der östreich. Literatur*, the *Evangelisch-christliche Gesangbuch*, and an agenda (*Kirchenagenda*) which was introduced into the Protestant congregations of Austria.—Wenrich, *J. Glatz, eine biograph. Skizze* (Vienna, 1834). (A. J. S.)

**Glean** (prop. גִּלְעָן, *lakal'*, spoken of grain, Ruth ii, elsewhere for "gather" field crops generally, Lev. xix, 9; xxiii, 22; also גִּלְעָן, *alal'*, Lev. xix, 10; Deut. xxiv, 21; Judg. xx, 45; Jer. vi, 9; properly spoken of grape gleanings, Judg. viii, 2; Isa. xvii, 6; xxiv, 13, etc.; and figur. of a small remnant, Jer. xlix, 9; Obad. i, 5; Mic. vii, 1). See CORNER. The law of Moses directed a liberal treatment of the poor at the seasons of harvest and ingathering. See HARVEST. The corners of the field were not to be reaped—the owner was not to glean his own fields—and a sheaf accidentally left behind in the field was not to be fetched away, but left for the poor. There are equally liberal regulations respecting vineyards and olive-yards (Lev. xix, 9, 10; Deut. xxiv, 19, 21). Hence the proverb of Gideon (Judg. viii, 2). The privilege of gleaning after the reapers was conceded not as a matter of right, but as a favor granted to particular persons whom the owner wished to befriend. It did not, however, require any special interest to obtain this favor, for Naomi could scarcely have suggested it in the first instance, and Ruth might hence have hesitated to apply for it to a stranger, "the servant that was set over the reapers." On two occasions Dr. Robinson speaks of witnessing interesting illustrations of harvest scenes similar to those in Ruth (*Researches*, ii, 371, 384), and in the latter he says he frequently saw the process of women beating out with a stick handfuls of grain which they seem to have gleaned (*ib.* note). In the case of Boaz, young women, recognised as being "his maidens," were gleaning in his field, and on her claim upon him by near affinity being made known, she was bidden to join them and not go to any other field; but for this, the reapers, it seems, would have driven her away (Ruth ii, 6, 8, 9). Maimonides lays down the principle (*Constitutions de donis pauperum*, cap. ii, 1) that whatever crop or growth is fit for food, is kept, and gathered all at once, and carried into store, is liable to that law. (See also Maimon. *Constitutions de donis pauperum*, cap. iv.) With regard to the vintage, what fell to the ground (גִּלְעָן, Lev. xix, 10), or was left after the general gathering, belonged to the poor (*Peah*, vii, 3); hence any one placing a vessel under the tree to catch what might accidentally fall was held to defraud the poor (Surenhusius, *Mishna*, i, 56). See POOR.

**Glebe**, in England the soil ("gleba," clod), meadow, or pasture belonging to a parsonage besides the tithes. Glebe-house is the common designation in Ireland of the parsonage.

**Glede**, the old English name for the common kite (*milvus ater*), occurs only in Deut. xiv, 13 (רָאֵךְ, *raah'*) among the unclean birds of prey. But in the parallel passage, Lev. xi, 14, we find דָּאֵךְ, *daah'*, "vulture." That this difference has arisen from a permutation of the ר and the ד is evident, but which is the original form of the word is not certain. Bochart decides (*Hieroz.* ii, 191) for *daah* on the ground that, assuming the bird to be the kite or glede, it is more probable that it would receive its name from דָּאֵךְ, to fly swiftly than from רָאֵךְ, to see; while others, presuming that it is the vulture, prefer the latter derivation, and the reading, consequently, *raah*, on account of the sharp sikt of these birds. But both these qualities are marked traits of the vulture as well as the kite. Thus far the evidence is therefore equal, nor do the versions help us to a decision; for while the Sept. gives in

both passages  $\gamma\psi\psi$ , vulture, the Vulg. has *milvus*, kite, in both. The Codex Samar., however, reads  $\text{מִלְוִן}$  in Deut. xiv, 13, which favors the supposition that this is the proper reading; but it still remains uncertain whether by this term we are to understand the glede or the vulture. The A. V. makes it the one in the one passage and the other in the other. As the  $\text{מִלְוִן}$  is distinguished from the  $\text{כַּיִת}$  (Deut. xiv, 13), and as the latter is probably one of the vulture genus (comp. Isa. xxxiv, 14), it is probable that the former belongs to the kites. The kite has, in comparison with its bulk, very long wings, and a forked tail extending beyond them.<sup>6</sup> It is a species that rises to a towering height, hangs apparently motionless in the sky, and darts down with immense velocity; but the legs and claws being weak, it is cowardly, and feeds upon carrion, fish, insects, mice, and small birds. About Cairo kites are particularly abundant, mixing with the carrion vultures in their wheeling flight, and coming in numbers to the daily distribution of food awarded them. But the question whether the kite of Europe and that of Egypt are the same species is not decided, though there is no want of scientific names for both species found in the valley of the Nile, one of which is certainly distinct from the European, and the other, if not so, is a strongly-marked variety. We find it no-

Egyptian Kite (*Milvus Egyptianus*).

tioned in various stages of plumage as *Milvus Ictinus*, *Milvus Eolius*, Savigny; *Falco Egyptianus* and *Falco Forskahl'i*, Gmelin; *Falco cinereo-ferrugineus*, Forskahl; *Falco Arda*, Savigny; probably, also, *Falco parasiticus*, Lath. The bill of this species is dark; head and throat whitish, with brown streaks; body above dark gray brown, pale ferruginous below; tail but slightly forked; legs yellow. It is found in hieroglyphic paintings, colored with sufficient accuracy not to be mistaken. The other species, which we figure below as *Milvus ater*, is the black kite, *Falco melanop-*

Common Kite (*Milvus Ater*).

*terus*, Daudin; *Elanus Cesius*, Savigny; *Falco Sowniensis*, Lath.; *Le Blac*, Le Vaill., and the *Kouhich* of the Arabs. It has the head, neck, and back dark rusty gray; scapulars bordered with rusty; wing-coverts and primaries black, the last-mentioned tipped with white; tail rusty gray above, white beneath; bill dark; legs yellow. The manners of both species are much the same: it is likely that they are equally abundant at Cairo, and spread into Palestine.—Kiito, s. v. Daah. See Hawk.

**Glendy, JOHN, D.D.**, a Presbyterian minister, was born in Derry, Ireland, June 4, 1755, and was educated in the University of Glasgow, where, after devoting some time to the study of theology, he was licensed and ordained. He subsequently accepted a call from the Church in Londonderry, where he remained till the Irish insurrection of 1798 obliged him to leave his native land. He arrived in Norfolk, Va., in 1799, and shortly after supplied the congregations of Staunton and Bethel, in Augusta Co., for nearly two years. He made the acquaintance of Washington and Jefferson, and was held in high estimation as a minister. In 1803 he was inducted as pastor of the Second Presbyterian congregation at Baltimore, and served the House of Representatives and the Senate as chaplain. He died Oct. 4, 1832. He published *An Oration in Commemoration of Washington, 1800:—A Prayer offered on the 4th of July, 1821.*—Sprague, *Annals*, iv, 229.

**Glenorchy, LADY WILHELMINA MAXWELL**, distinguished for her benevolence and piety, was born at Preston, Scotland, Sept. 2, 1741. Her early years, though sedulously watched over by her kind and intelligent mother, were nevertheless too much devoted to the follies and gayety of fashionable life. When she had attained the age of twenty-three years, her mind was aroused by a serious illness to reflections on her present character and future prospects; and musing on the first question in the Assembly's Catechism, "What is the chief end of man?"—"It is to glorify God, and enjoy him forever," she asked herself, Have I answered the design of my being? Have I glorified God? Shall I enjoy him forever? Thus reflecting, she gradually felt the sinfulness of her nature, perceived the total alienation of her heart from God, and applied to her heavenly Father through Christ for pardon and grace. The remainder of her life was distinguished by the consistency of her deportment. She employed much of her time in acts of benevolence; in wise and pious conversation; in an extensive, judicious, and profitable correspondence; and in every other means for promoting the conversion of sinners and the edification of saints. For such benevolent actions, she was called a Methodist, and represented as a wild enthusiast; but such opposition her principles enabled her patiently to endure, and, through evil and good report, to pursue her work of faith and labor of love. She was an intimate friend of Darcy Lady Maxwell, and, like her, a friend to Mr. Wesley and his preachers. In 1774 she opened a chapel in Edinburgh called "Lady Glenorchy's chapel," where Mr. Jones, of Plymouth, preached for over fifty years. She built also several places of worship in the country. Though her health declined, her activity and usefulness were unabated, till, on the 17th of July, 1786, she was summoned to her reward. She bequeathed, by her will, five thousand pounds for the education of young men for the ministry in England; five thousand pounds to the society in Scotland for the propagation of Christian knowledge; and the greatest part of the residue of her property to charitable and pious purposes. See *Memoirs of Lady Glenorchy*, in Burder's *Pious Women.*—Jones, *Christian Biography*; Jamieson, *Religious Biography*, p. 228; Stevens, *History of Methodism*.

**Gloria in Excelsis** ("Glory be [to God] on high"), the name of one of the most ancient doxologies of the Church. It is called *doxologia major*, to distinguish it

from the *Gloria Patri*; and is also called *hymnus angelicus* (the angelic hymn), because the first part of it was sung by the angels at Bethlehem. The latter portion is ascribed to Telesphorus, about A.D. 139; but this is doubtful. The whole hymn, with very little difference, is to be found in the Apostolical Constitutions, and was established to be used in the church service by the fourth Council of Toledo. It is used by both the Greek and Latin churches. "In the Eastern Church," says Palmer, "this hymn is more than 1500 years old, and the Church of England has used it, either at the beginning or end of the liturgy, for above 1200 years." In the Roman Missal it stands at the beginning of the Office for the Communion, as it does also in the first Common Prayer of king Edward VI, where it immediately follows the Collect for Purity. In the present prayer-book of the Church of England and the Protestant Episcopal Church it stands after the communion, as it does also in the *Ritual* of the Methodist Episcopal Church. The Greek form of the hymn, as restored by Bunsen (*Analecta Antenicena*, iii, 87), is as follows: "Δόξα ἐν ὑψίστοις θεῷ καὶ ἐπὶ γῆς εἰρήνη, ἐν ἀνθρώποις εὐδοκία. Αἰνούμεν σε, εὐλογοῦμέν σε, προσκυνούμεν σε· ἐχαραστούμεν σοὶ διὰ τὴν μεγάλην σου δόξαν. Κύριε βασιλεῦ ἐπουράνιε, θεὸς πατὴρ παντοκράτωρ· Κύριε ὁ θεός· Κύριε υἱὲ μονογενῆ· Ἰησοῦ Χριστέ· Ὁ ἀμὸς τοῦ θεοῦ· ὁ υἱὸς τοῦ πατρὸς· Ὁ αἶρον τὰς ἀμαρτίας τοῦ κόσμου· ἔλεησον ἡμᾶς· Ὁ αἶρον τὰς ἀμαρτίας τοῦ κόσμου· ἔλεησον ἡμᾶς, προσδέξαι τὴν δέησιν ἡμῶν· Ὁ καθήμενος ἐν δεξιᾷ τοῦ πατρὸς· ἔλεησον ἡμᾶς. Ὅτι σὺ εἶ μόνος ἅγιος· σὺ εἶ μόνος κύριος· Ἰησοῦς Χριστός· εἰς δόξαν θεοῦ πατρὸς. Ἀμήν." The English form: "Glory be to God on high, and on earth peace, good-will towards men. We praise thee, we bless thee, we worship thee, we glorify thee, we give thanks to thee for thy great glory, O Lord God, heavenly King, God the Father Almighty, O Lord, the only-begotten Son Jesus Christ; O Lord God, Lamb of God, Son of the Father, that takest away the sins of the world, have mercy upon us. Thou that takest away the sins of the world, have mercy upon us. Thou that takest away the sins of the world, receive our prayer. Thou that sittest at the right hand of God the Father, have mercy upon us. For thou only art holy; thou only art the Lord; thou only, O Christ, with the Holy Ghost, art most high in the glory of God the Father. Amen."—Hook; Wheatly, *Common Prayer*, ch. vi, § 27; Palmer, *Orig. Liturg.* ii, 158; Procter, *On Common Prayer*, p. 353; Bingham, *Orig. Eccles.* bk. xv, chap. iii; Daniel, *Thesaurus Hymnologicus*, ii, 267; *Evangelical Quar. Rev.* April, 1869, p. 250. See ANGELICAL HYMN; DOXOLOGY.

**Gloria Patri, Glory be to the Father**, one of the primitive doxologies of the Church, the *doxologia minor*. At first almost all the fathers had their own doxologies, which they expressed, as they had occasion, in their own language, ascribing "glory and honor" sometimes to the Father only, sometimes to the Son only, and sometimes to the Father through the Son. At the rise of the Arian heresy, "Glory be to the Father, and to the Son, and to the Holy Ghost," became the standing form; to which the Western Church soon added, "As it was in the beginning, is now, and ever shall be, world without end. Amen."—Wheatly, *Com. Prayer*, chap. iii, § 7; Palmer, *Orig. Liturg.* i, 219; Procter, *On Common Prayer*, p. 212, 215. See DOXOLOGY.

**Glorify**, (1.) to make glorious or honorable, or to cause to appear so, John xlii, 28; xliii, 31, 32; xv, 8; xvii, 4, 5; xxi, 19; Acts iii, 13. In this view it particularly refers to the resurrection of Christ, and his ascension to the right hand of God, John vii, 30; xii, 16. (2.) It also expresses that change which shall pass upon believers at the general resurrection, and their admission into heaven. (3.) To glorify God (1 Cor. vi, 20) is to "show forth his praise" by obedience to his law. Thus the "heavens declare the glory of

God" in obedience to the law of creation, and much more do moral and intellectual beings glorify him by willing obedience to the moral law (1 Cor. x, 31; John xvii, 4). See GLORY OF GOD.

**Glory**, in the English Version, usually represents the words כְּבוֹד, *kabod*, and δόξα. The Hebrew, from כָּבֵד, "to be heavy," is susceptible of the various *analogical* meanings which are derived from its root, viz. "to be hard," "honored," "rich," etc. The above Heb. and Gr. terms have the following applications: (1.) *Abundance, wealth, treasures*, rendered "honor" in Psa. xlviii, 12, and "glory" in Gen. xxxi, 1; Isa. x, 3; Matt. iv, 8; Luke iv, 6; Rev. xxi, 24, 26. (2.) *Honor, glory, dignity*, as in 1 Kings iii, 13; 2 Chron. i, 11, 12; Prov. viii, 18; Heb. ii, 7; 1 Pet. i, 24; 1 Cor. xi, 7. Spoken of God, as in Psa. xix, 1; xxxix, 1; Isa. xliii, 8; of persons in high honor (Isa. v, 13; 2 Pet. ii, 10; Jude 8). Also the *honor, glory*, of any one; poetically for the *mind, the heart*, as the noblest part of man (Gen. xlix, 6; Psa. vii, 5; xvi, 9; xxx, 12; lvii, 8; cviii, 1; Acts ii, 26). Some here assign the signification of "liver," but the liver is never (like the heart and reins) assumed as the seat of the mind and affections. (3.) *Splendor, brightness, glory, majesty*—"of all my glory," i. e. *splendor* (Gen. xlv, 13; Isa. iv, 5; xi, 10; xxii, 18; 1 Sam. ii, 8; Acts xxii, 11; 1 Pet. v, 4); "the glory of Lebanon," its magnificence, beauty (Isa. xxxv, 2; lx, 13). So of the sun, stars, etc. (1 Cor. xv, 40, 41); of Moses's face (2 Cor. iii, 7); also of the celestial light which surrounds angels (Rev. xviii, 1), or glorified saints (Luke ix, 31, 32; 1 Cor. xv, 43; Col. iii, 4). Spoken especially of the *glory, majesty, of Jehovah* (Isa. lix, 19; lx, 1; 2 Thess. i, 9; 2 Pet. i, 17; Rev. xxi, 11, 23), that *fiery* glory surrounded with dark clouds in which Jehovah is represented as appearing, or God himself as surrounded by this effulgence, from which lightnings proceed (Lev. ix, 23, 24; Numb. xvi, 35; Psa. xviii, 12), such as he manifested when he showed himself at Sinai to Moses and the people (Exod. xvi, 7, 10; xxiv, 17; xxxiii, 18; Lev. ix, 6, 23), or appeared in the tabernacle (Exod. xl, 34), or in the Temple (1 Kings viii, 11; 2 Chron. vii, 1, 2; compare Luke ii, 9; ix, 32; Acts vii, 55; xxii, 11), or was seen in prophetic visions (Isa. vi, 3; John xii, 41; Ezek. i, 28; viii, 4; x, 4, 18; xliii, 2, 4; xlv, 4; Rev. xv, 8; xxi, 11, 23). To this corresponds the SIEKINAH of the later Jews (Buxtorf's *Lexicon Chald. Talmud. et Rabbinicum*, col. 2394). God appears, too, in glory to punish transgressors (Lev. x, 2); and sinners are said to "provoke the eyes of his glory," i. e. of him as thus appearing in his glory for their punishment (Isa. iii, 8). Spoken also of the expected temporal reign of the Messiah (Mark x, 37; comp. Matt. xx, 21); and also of the glory of his second coming (Matt. xvi, 27; xix, 28; xxiv, 30; Mark xiii, 26; viii, 38; Luke ix, 26; xxi, 27; Titus ii, 13). (4.) Of internal character, i. e. glorious moral attributes. Spoken of God, *infinite perfection, divine majesty and holiness* (Psa. xix, 1; Isa. xl, 5; Acts vii, 2; Rom. i, 23; Eph. i, 17); so of the divine perfections as manifested in the *power of God* (John xi, 40; Rom. vi, 4; Col. i, 11), or in his *benevolence and beneficence* (Rom. ix, 23; Eph. i, 12, 14, 18; iii, 16). So of Jesus, as the *fulfillment of the divine perfections* (Heb. i, 3; John i, 14; ii, 11); also of the Spirit (1 Pet. iv, 14). (5.) Of that exalted state of blissful perfection which is the portion of those who dwell with God in heaven; e. g. spoken of Christ, and including also the idea of his regal majesty as Messiah (Luke xxiv, 26; John xvii, 5, 22, 24; 2 Thess. ii, 14; 1 Tim. iii, 16; 1 Pet. i, 11). Spoken of glorified saints, i. e. salvation, eternal life, etc. (Rom. ii, 7, 10; v, 2; viii, 18; 1 Cor. ii, 7; 2 Cor. iv, 17; 1 Thess. ii, 12; 2 Tim. ii, 10; Heb. ii, 10; 1 Pet. v, 1, 10). So to glorify, when spoken of God and Christ, is to render conspicuous and glorious the divine character and attributes of God as glorified by

the Son (John xii, 28; xiii, 31, 32; xiv, 13; xv, 8; xvii, 1, 4); of Christ as glorified by the Father (John viii, 54; xiii, 32; xvii, 1, 5; Acts iii, 13), or by the Spirit (John xvi, 14), or by Christians (John xvii, 10), or generally (Lev. x, 3; John xi, 4; xiii, 31).—Bastow, s. v. See GLORIFY.

Other terms less frequently rendered "glory," "glorious," etc., are: *גָּדְלוֹ*, *large*; *נִפְלְאוֹת*, *to swell*; *כְּבוֹד*, *honor*; *יְפִיאוֹת*, *beauty*, etc.; *κλέος*, *renown*; *καυχῆσθαι*, *to boast*. On these and the above, consult the Heb. and Gr. Lexicons.

We may be said to give glory to God when we confess our sins, when we love him supremely, when we commit ourselves to him, are zealous in his service, walk humbly, thankfully, and cheerfully before him, and recommend, proclaim, or set forth his excellencies to others (Matt. v, 16; John xv, 8; Gal. ii, 20). In Exod. viii, 9 we read, "And Moses said unto Pharaoh, Glory over me." The margin has for "glory" "honor," and for "over me" "against me." Pharaoh had besought Moses to pray that the Lord might take away the frogs, and Moses wished the king to have the honor and glory (in preference to himself) of appointing a time when he should thus pray to the Lord to take them away. This was not only complimentary to Pharaoh, but it would have a strong tendency to convince him that the Lord had heard the prayer of Moses, because he himself had appointed the time.

As man's real glory on earth consists in submitting to the will of God, and in doing it, so will his glory in heaven consist in being eternally pleasing to God, and in finding in him his perfect happiness. There can be no real glory, either in this world or in the next, aside from virtue. The glory we seek here consists in the esteem of our fellow-men, and it would never be a false or a dangerous glory if men were wise enough not to esteem anything but what is virtuous. Christ commands us to practice virtue, not in view of gaining the approbation of men, but to please God. At the first glance his instructions on this point may appear somewhat contradictory. He says: "Let your light so shine before men, that they may see your good works, and glorify your Father which is in heaven (Matt. v, 16); then: Take heed that ye do not your alms before men, to be seen of them; otherwise ye have no reward of your Father which is in heaven. Therefore, when thou doest thine alms, do not sound a trumpet before thee, as the hypocrites do in the synagogues and in the streets, that they may have glory of men. Verily I say unto you, they have their reward," etc. (Matt. vi, 1 sq.). But these passages are really not contradictory. Christ means that he does not want the desire of being admired and praised by men to be the motive of our good actions; but he wants us to do those good actions in order to edify our neighbors, to lead them by our example to the practice of virtue, so that they may glorify God, and not us. There is a great difference between these two motives: the first is very wrong, the second right and praiseworthy. We are consequently to keep secret our good actions, whenever an opposite course is not necessary for public edification; but when it is, then we are to let them be seen. St. Paul says: "Our rejoicing (or glory) is this, the testimony of our conscience that in simplicity and godly sincerity, not with fleshly wisdom, but by the grace of God, we have had our conversation in the world, and more abundantly to you-ward" (2 Cor. i, 12).

The word glory, in St. Paul's writings, has often been misunderstood. In speaking of the destiny of the Jews and Gentiles with regard to faith (Rom. ix, 22, 23), he says: "What if God, willing to show his wrath, and to make his power known, endued with much long-suffering the vessels of wrath fitted to destruction; and that he might make known the riches of his glory on the vessels of mercy, which he had afore prepared unto glory," etc. We do not think that

the word glory here refers to eternal glory, but rather to God's glory here below and to the glory of his Church; for God has really showed its riches in the virtues of those who have been called to faith. St. Paul uses the expression again in the same sense when he speaks (1 Cor. ii, 7) of "the hidden wisdom which God ordained before the world unto our glory," and when he says (Eph. i, 5, 6) that God predestined us for adoption "to the praise of the glory of his grace." So Augustine (*Enarr. in Psa. xxvii*, 3, and in *Psa. xxxix*, 4) understands these passages.—Bergier, *Dict. de Théologie* (Paris, 1854), iii, 139.

GLORY OF GOD. In numerous passages of Scripture it is said that God has done certain acts *for His own glory* (e. g. Isa. xlii) that man should glorify God (1 Sam. vi, 5; 1 Cor. vi, 20; x, 31, etc.). But how can man "glorify" the Supreme Being, who is absolutely glorious in holiness and perfection? To this question infidels answer that it is "absurd to suppose that God is a 'vain' being; that so insignificant a creature as man can bring to God any kind of pleasure or satisfaction; or that God would demand from man a fictitious 'glory' which he does not require, and by which he could not feel flattered without exhibiting weakness, and consequently imperfection." All this argument is based on the misconception of a word. It is in the nature of an intellectual and free being, like God, to act in view of a certain aim and motive. But God can have no higher aim, no object more worthy of himself, than to exert his perfections, his power, his wisdom, and especially his benevolence. Hence the creation of beings endowed with sense, intellect, and freedom, and susceptible of feeling affection, esteem, thankfulness, and obedience. God willed, as says St. Augustine, the existence of beings to whom he could manifest his love. Hence, also, God has established physical and moral laws, and made the happiness of reasonable beings to depend from their submission to these. President Edwards treats this point with profound insight. "It is," he says, "a thing infinitely good in itself that God's glory should be known by a glorious society of created beings. And that there should be in them an increasing knowledge of God to all eternity, is an existence, a reality infinitely worthy to be, and worthy to be valued and regarded by him to whom it belongs to order that to be which, of all things possible, is the fittest and best. If existence is more worthy than defect and nonentity, and if any created existence is in itself worthy to be, then knowledge or understanding is a thing worthy to be; and if any knowledge, then the most excellent sort of knowledge, viz. that of God and his glory. The existence of the created universe consists as much in it as in any thing; yea, this knowledge is one of the highest, most real, and substantial parts of all created existence, most remote from nonentity and defect. As there is an infinite fulness of all possible good in God, a fulness of every perfection, of all excellency and beauty, and of infinite happiness, and as this fulness is capable of communication or emanation *ad extra*, so it seems a thing amiable and valuable in itself that it should be communicated or flow forth, that this infinite fountain of good should send forth abundant streams, that this infinite fountain of light should, diffusing its excellent fulness, pour forth light all around—and as this is in itself excellent, so a disposition to this, in the Divine Being, must be looked upon as a perfection or an excellent disposition, such an emanation of good is, in some sense, a multiplication of it; so far as the communication or external stream may be looked upon as any thing besides the fountain, so far it may be looked upon as an increase of good. And if the fulness of good that is in the fountain is in itself excellent and worthy to exist, then the emanation, or that which is as it were an increase, repetition, or multiplication of it, is excellent and worthy to exist. Thus it is fit, since there is an infinite fountain of light

and knowledge, that this light should shine forth in beams of communicated knowledge and understanding; and as there is an infinite fountain of holiness, moral excellence, and beauty, so it should flow out in communicated holiness. And as there is an infinite fulness of joy and happiness, so these should have an emanation, and become a fountain flowing out in abundant streams, as beams from the sun. From this view it appears in another way to be a thing in itself valuable that there should be such things as the knowledge of God's glory in other beings, and a high esteem of it, love to it, and delight and complacency in it; this appears, I say, in another way, viz. as these things are but the emanations of God's own knowledge, holiness, and joy. Thus it appears reasonable to suppose that it was what God had respect to as an ultimate end of his creating the world, to communicate of his own infinite fulness of good; or, rather, it was his last end, that there might be a glorious and abundant emanation of his infinite fulness of good *al extra*, or without himself; and the disposition to communicate himself, or diffuse his own fulness, which we must conceive of as being originally in God as a perfection of his nature, was what moved him to create the world" (p. 219).

... "God and the creature, in this affair of the emanation of the divine fulness, are not properly set in opposition, or made the opposite parts of a disjunction. Nor ought God's glory and the creature's good to be spoken of as if they were properly and entirely distinct. This supposeth that God's having respect to his glory, and the communication of good to his creatures, are things altogether different; that God's communicating his fulness for himself, and his doing it for them, are things standing in a proper disjunction and opposition; whereas, if we were capable of having more full and perfect views of God and divine things, which are so much above us, it is probable it would appear very clear to us that the matter is quite otherwise, and that these things, instead of appearing entirely distinct, are implied one in the other—that God, in seeking his glory, therein seeks the good of his creatures. Because the emanation of his glory (which he seeks and delights in, as he delights in himself and his own eternal glory) implies the communicated excellency and happiness of his creatures. And in communicating his fulness for them, he does it for himself; because their good, which he seeks, is so much in union and communion with himself. God is their good. Their excellency and happiness is nothing but the emanation and expression of God's glory. God, in seeking their glory and happiness, seeks himself, and in seeking himself, i. e. himself diffused and expressed (which he delights in, as he delights in his own beauty and fulness), he seeks their glory and happiness" (*Dissertation on the End of God in Creation*, § 2, 3).

In thus manifesting his power, wisdom, holiness, and goodness, we say that God has established his "glory;" and so, also, when men acknowledge and worship these divine perfections, they "glorify" God. In this language there is nothing absurd or injurious to the divine majesty. In Scripture the object of divine revelation is stated sometimes to be the sanctification of man, sometimes the glory of God, as these are identical, whether considered from the divine or the human point of view. Moreover, it is an effect of the divine wisdom, holiness, and goodness, that man should find happiness in virtue, not in vice; in submission to the physical and moral laws established by God, not in violating them. And when man submits to these laws he glorifies God, since he renders homage to the divine perfections. Hence it cannot be wrong to say that the glory of God consists in the submission of all creatures to his law, and that the glory of all reasonable creatures consists in absolute submission to God. If we are to recognise the glory of God as one of his rights, as one of his regal prerogatives, it

takes *eo ipso* the form of a duty, which becomes obligatory for us. The heavens declare the glory of God, but they only declare it to reasonable beings, for the glory of God is only realized when its revelation is understood by moral beings, willingly received by them, and independently reflected. "*The Lord hath made all things for himself*" (Prov. xvi, 4). Not that he made "all things" for his own use, to supply his own wants, or to increase his own essential happiness, but that he made all in accordance with the requirements of his divine perfections, and so as better to manifest his glory. When the adversaries of Christianity reproach it with making God like unto man, supposing him vain, thirsting for praise and incense, they fall themselves into the very error which they denounce. They say: "If man seeks for glory, it is because he needs it; because he is weak; hence, if God seeks his own glory, it is also from need and weakness." This is pure sophistry: man is weak and poor because finite; God is self-sufficient because essentially happy and perfect; and it is on account of this very perfection that he acts for his glory, because he could not have any higher or more worthy aim.

"But," it is said, "to speak of 'glory' accruing from man to God is as if a nest of ants should imagine themselves working for the glory of some great king." This comparison is absurd. God did not need to create man, to give him laws, to promise him rewards and punishments, yet he has done so. No king could do this towards insects. It was not unworthy of God to create reasonable beings, neither is it any less worthy of him to take care of his creatures, to take an interest in their actions; the one is no more difficult for him than the other; it is all done by a simple act of his will. Philosophers may do their utmost to degrade man under pretence of rendering him independent, but there is implanted in man a feeling stronger than all their sophisms which assures him that he is the child of God, and that the grandeur of the supreme Being does not consist in a sort of philosophical pride and absolute indifference, but in the power and will to do good to all his creatures. It is one of God's great gifts to man that the creature finds his highest happiness, both for this world and the next, in working for the "glory" of his Maker. St. Paul says, 1 Cor. x, 31, "Whether, therefore, ye eat, or drink, or whatsoever ye do, do all for the glory of God." In this passage (compared with 1 Pet. iv, 11) we find the broad ethical law laid down, viz. all our actions should tend to the greater glory of God, which is done when every action does not merely conform to his commandment, but is really inspired by God the Holy Ghost. Chrysostom, in his New-Year sermon at Antioch (A.D. 387, on 1 Cor. x, 31), by a series of isolated examples, shows that the most insignificant things can be made to glorify God. This ethical doctrine has been distorted by the Roman Catholic Church, which substantially puts the glory of the Church in place of the glory of God.—President Edwards, *Works* (N. Y. 4 vols.), ii, 204 sq.; Farinon, *Sermons*, ii, 502; Beveridge, *Works*, v, 349; Tillotson, *Sermons*, xi, 29; Sharp (Abp.), *Works*, iii, 211; Dwight, *Theology*, i, 393; Bergier, *Dictionnaire de Théologie*, iii, 138; Herzog, *Real-Encykl.* iii, 707 sq.

**Glory, Aureole, or Nimbus**, are names applied to rays, circles, or bodies of light placed around the heads (or the entire bodies) of Christ, angels, and saints in Christian art. The glory was first used in Egyptian art. From this it passed to the Grecian, and especially to the Roman. In both of these branches of classic art, it was used in both sculpture and painting to adorn the heads of deities, kings, and apotheosized emperors. In classic art the glory was mostly composed of gilded rays. (The disc used to protect the heads of statues from rain has been improperly considered by some to be the original, from which the glory of Christian art was copied.) In Christian art the glory was first used, as far as we know, in the glasses or

*patere* of the Catacombs, about the 3d century, being in them applied to the head of Christ. About the close of the 6th century it was first applied to angels, and to the apostles and saints.

The glory was used in ancient art to signify power and dominion. In this sense it was occasionally used in Christian art, as when it was placed around the head of Constantine, of the empress Theodora, around six heads of the beast of the Apocalypse, and even around that of Satan. But usually it signified holiness and purity. The oblong glory, or the "vesica piscis," envelops the whole person only in representations of Christ, the Virgin Mary, or other saints who are represented as ascending to heaven. The glory had many forms; thus it was a simple circle of light, or it contained a cross in the monogram A Ω or X P. It was sometimes applied to the head of a dove, a lamb, or other symbol of the Saviour.—Mrs. Jameson, *Sacred and Legendary Art*; Martigny, *Dictionnaire des Antiquités Chrétiennes*. (G. F. C.)

**Gloss, Glossary.** A *gloss* is a note appended to any word or phrase for the purpose of interpretation or illustration. "Sacred glosses" are such notes appended to words or phrases occurring in the Scriptures. A *glossary* is a collection of such explanatory notes properly arranged.

The word *gloss* is borrowed from the Greek γλῶσσα. But in the sense above explained it has no support from classical usage. The process, however, by which the word passed from its original meaning to that in which it was used by mediæval writers, and in which it is now used, may be traced. The Greek word γλῶσσα, meaning *tongue* or *speech*, came to be used by the Greek grammarians in the sense of a word requiring to be explained. In process of time words often become obsolete, or come to be used in senses different from those in which they were originally used; new words are introduced; and words frequently have special meanings attached to them of a professional or technical character, familiar only to a portion of the community. To the multitude such words need to be explained; and such words the Greek grammarians called γλῶσσαι. Thus Plutarch speaks of certain expressions in the poets which were not commonly understood, and which belonged to the idiotisms of particular regions or tribes, as τὰς λεγομένας γλῶσσας (*De audient. poet.* c. 6). Galen applies the same name to the antiquated words of Hippocrates, and explains the term thus: ὅσα τοίνυν τῶν ὀνομάτων ἐν μὲν τοῖς πάλαι χρόνος συνήθη ἢν νῦν δὲ οὐκ ἔτι ἴσται, τὰ μὲν τοιαῦτα γλῶσσαι καλοῦσι (*Exeg. Gloss. Hippocrat. Proem.*). Aristotle applies the same term to provincialisms (*De arte poet.* c. xxi, § 4-6; xxii, 3, 4, etc.). And, not to multiply quotations, a scholiast on Dion. Halicarn., quoted by Wetstein on 1 Cor. xii, 10, expressly says γλῶσσα· φωνὰ ἀρχαία καὶ ἀποξενισμενὰ ἢ ἐπιχωριζόμενα. Quintilian also says of the synonymous word *glossemata*, "Id est voces minus usitatas" (*Inst. Orat.* i, 8, 15; comp. also i, 1, 35).

The next step was from calling a word needing explanation a *gloss*, to apply this term to the explanation itself. These explanations at first consisted merely in adhibiting the word in common use (ὄνομα κίριον, Aristot.) to the obsolete and peculiar word; and thus the two viewed as one whole came to be called a gloss; and ultimately this name came to be given to that part which was of most interest to the reader, viz. the explanation.

These explanations constituted the beginnings of Greek Lexicography. They did not continue, however, to be merely lexical; they often embraced historical, geographical, biographical, and such like notices. Nor were they arranged at first in an alphabetical order; nor did they embrace the whole range of the language, but only such parts of it as the glossographer was interested in (hence such works as the Ἀπτικά Γλῶσσαι of Theodorus, etc.); nor were the words pre-

sented in their uninflected forms, but in the form in which they occurred in the course of the glossographer's reading. More methodical collections of these explanations began to be made in the Middle Ages, and such as have been preserved to us in the works of Hesychius, Suidas, Phavorinus, Zonaras, Photius, and in the *Etymologicum Magnum*.

I. The first class of extant scriptural glosses consists of explanations drawn from the Greek glossarists, a large number of the notes collected by whom are on words occurring in Scripture. Their works thus become valuable as exegetical aids, especially as they convey not the individual opinion of the collector so much as opinions which he had gathered from older writers. A *Glossarium Græcum in N. T.*, collected from these works, was published by Alberti in 1735. Valckenaer collected from Hesychius the explanations of scriptural words (*Opp.* i, 173 sq.); but this has been best done by J. Ch. Gottl. Ernesti, in his *Glossæ Sacræ Hesychii Græcæ*, etc. (Lips. 1785), which was followed by a similar collection from Suidas and Phavorinus, with specimens from the *Etymologicum Magnum* (Lips. 1786). These are extremely convenient books of reference. Comp. Fabricius, *Bibl. Græca*, iv, 540 sq.; Rosenmüller, *Histor. Interpr.* iv, 356 sq. Suicer's *Thesaurus Ecclesiasticus* (Amst. 1682, 1728, 2 vols. fol.) contains nearly all these explanatory words or glosses, and the most important of them are also usually in the best modern Greek Lexicons of the N. T.

II. The second class of glosses is due to the habit, as old perhaps as the art of writing itself, of readers inscribing on the margin of MSS. or books observations of their own, explanatory or otherwise of the text. This was especially the case with the sacred books, partly because after the establishment of Christianity they were more read than other books, partly because their contents gave abundant occasion for theological, historical, or philological annotation. Hence, from an early period, marginal notes intended to illustrate in some way the text came to have a place in the codices containing the sacred books. At first very brief, often confined to a single word, these glosses grew into more extended remarks, written in a smaller hand on the margin, and sometimes between the lines of the codex. In the ancient Hebrew codices these marginal notes were the source of not a few of the *Keri* readings; and the glosses on the margins of the codices of the Sept, and the N. T. have given rise to many of the various readings which exist in both of these. It is believed also, as marginal notes are apt to be transferred, by ignorant or careless copyists, into the text, that some such interpolations are to be found in the received text of the N. T., and it is considered to be one of the problems which criticism has to solve to detect these, and eliminate them. The exercise of a sound and cautious judgment, however, is required to preside over this, lest rash and unauthorized alterations be made (Valckenaer, *Dissert. de Glossis Sacris* [Franeq. 1737]; J. A. Ernesti, *De vero usu et indole Glossariorum Gr.* [Lug. Bat. 1742]; Tittmann, *De Glossis N. T. æstimandis et judicandis* [Wittenb. 1782]; Wassenb. *De Glossis N. T.*, prefixed to Valckenaer's *Scholia in Libros quosdam N. T.* [Amst. 1795]; Bornemann, *De Glossemat. N. T. caute diducendis*, in his *Scholia ad Luc. Evang.* 1830). It has been proposed to restrict the term *gloss* to the marginal annotations as such, and to use *glossemæ* to designate those which are supposed to have been introduced into the text; but the usage of writers is not uniform in this respect.

The longer marginal annotations (*Glossæ Marginales*) were made principally on the text of the Vulgate. These were of various kinds; some grammatical, some historical, some theological, some allegorical and mystical. The most famous collection of these is that made in the 9th century by Walafrid Strabo from the writings of Augustine, Ambrose, Jerome, Gregory, Isidore, Bede, Alcuin, and Rabanus Maurus, with addi-

tions by himself. This became the great exegetical thesaurus of the Middle Ages, and was known as the *Glossa Ordinaria*. Of notes written between the lines (*Glossa Interlineares*), a collection was made by Anselm of Laon in the beginning of the 12th century. Both these works were printed together about the end of the 15th century, 4 vols. fol.; they have often been reprinted since, with the commentary of Lyra. Other glossaries are those of Peter the Lombard on the Psalms (Par. 1535); of Hugo and S. Caro (*Postille in universa Biblia*, Ven. 1487, fol.)—Kitto, s. v.; Davidson in Horne's *Introd.* ii, 252; Herzog, *Real-Encyklop.* v, 188.

**Glosses and Glossatores** of the Roman and canon law. In the 12th century the Roman law, which after the downfall of the Western Roman empire had retained but little of its former importance, was again brought into notice, and studied with great zeal. The law school of Bologna, founded towards the end of the 11th century or the beginning of the 12th by Irnerius (Warnerius, Guarnerius), was the centre of this new movement. The reputation of the school and of its professors brought students from all parts of Europe to Bologna. The activity of the teachers did not confine itself to the expounding of the sources of the law, but also made these researches the foundation of a literary activity, and created a body of *Glossatores* (Glossarists), so called. The written interpretation of the *Corpus juris* appeared in the form of glosses, consisting sometimes in the explanation of some particular word or expression, sometimes in full and complete elucidations, and this sometimes between the lines of the text (*interlinear* glosses), sometimes on the margin (*marginal* glosses). Besides these the glossatores also wrote *summe*, reviews of the contents of some particular chapter of law; *casus*, real or imaginary cases intended as illustrations of particular points in connection with *questiones* and *distinctiones*; and also *brocarda* or *brocardica*, etc. (see Savigny, *Gesch. des Röm. R. i. Mittelalter*, iii, 537-574, 2d ed.). This literary activity of the glossatores of Roman law was an example for scientific treatment of canon law, which afterwards (in the 12th century) gave rise in Bologna and in Paris to lectures on the subject, and thus by the side of the legists rose the schools of the canonists, the decretists, and the decretalists. A number of the pupils and disciples of Gratian (q. v.) composed glosses (probably interlinear) on his *Decretum*. Among the oldest of these glossatores was Sicardus of Cremona, who was made bishop of Cremona in 1185. When the number of glosses in different MSS. became very great, it was naturally found expedient to collect and arrange them. This labor was undertaken by John Teutonicus, who wrote in 1212 a commentary on the *Decretum*, compiled from the glosses of his predecessors, and this *Apparatus*, augmented and improved by Bartholomew of Brescia about 1236, became the *Glossa ordinaria*; i. e. was indorsed by the school, appended to the MS. copies of the *Decretum*, and subsequently printed with it. Glosses on the collection of decretals of Gregory IX were written by Vincentius Hispanus (about 1240), Goffredus Tranensis († 1245), and Simbaldus Flisens, who afterwards sat on the pontifical throne (1243-54) under the name of Innocent IV. From these glosses Bernhard de Botono of Parma († 1266) compiled his *Apparatus*, which was also recognised as *glossa ordinaria*. Among the glossatores of the *Liber sextus* are to be named Johannes Monachus († 1313), Guido de Baysio, and Johannes Andrea († 1348). The glosses of the latter were originally written in his youth; he afterwards improved them, and they have been copied and printed as *glossæ ordinariæ*. He also wrote the first glosses on the *Clementines*, and they were also recognised as *glossæ ordinariæ*. Among the other glossatores of the same collection we remark Zenzelinus de Cassanis, a teacher of Toulouse, Johannes de Lignano, Petrus de Ancharano, Franciscus Zabarella († 1417), etc. The glosses on

the *Extravagantes* were the work partly of Gulielmus de monte Lauduno, and partly of Johannes Monachus. Those on the collection of John XXII were chiefly by Zenzelinus de Cassanis. The glosses have to this day great scientific value for the history of law. They have also exerted an important influence in the practice of the law. See Sarti, *De claris archigymnasiis Bonon. profess. vribus*, t. i, p. i, ii (Bonon. 1769, folio); Herzog, *Real-Encyklop.* v, 191. (J. N. P.)

**Gloucester**, a cathedral city of England, on the Severn, 107 miles northwest of London. The cathedral is of several different eras of ecclesiastical architecture, 427 feet in length, and 154 in width; the height of the central tower, its greatest external ornament, is 223 feet; the cloisters, also of great beauty, form a large square. Formerly the church of a Benedictine abbey, it was converted into a cathedral in 1541. Gloucester is the official residence of the bishop of Gloucester and Bristol, whose diocese embraces Gloucestershire, and parts of Somersetshire and Wiltshire. The diocese belongs to the province of Canterbury, and in 1869 had 13 deaneries, 459 benefices, 188 curates, and about 210,000 church sittings. The incumbent (1869) is Charles John Ellicott, D.D. (consecrated in 1863).

**Gloves**, part of the insignia of a bishop. See BISHOP.

**Glutton** (גִּלְטוֹן, *zolel'*, Deut. xxi, 20; Prov. xxiii, 21; a "riotous" person, Prov. xxiii, 20; xxviii, 7, i. e. prodigal, voluptuous debauchee; φαίλος, given to eating, "gluttonous," Matt. xi, 19; Luke vii, 34).

**Gnapheus** (or FULLONICUS), WILHELMUS, was born at the Hague in 1493. He was one of the earliest reformers in the Netherlands. He was rector of the school in his native place, and afterwards counsellor of the Margrave Albert of Brandenburg. He was a man of learning, and specially versed in Latin literature. He shared in the afflictions of his friends, Jan de Bakker or Pistorius, and Cornelis Hoon or Hoen, who became victims to Roman Catholic intolerance and persecution. Released from captivity, he was again seized and condemned to spend three months in a monastery on bread and water. He was permitted to see the cause of the Reformation prosper, and to enjoy the esteem and confidence of his countrymen. He died in 1568, at Norden, of which he was burgo-master. He wrote several works in Latin, which bear evidence of his familiarity with the writings of Erasmus. His most important work is his *Life of Johannes Pistorius*. It was probably written in 1526, and was published at Prasburg in 1529. Its title is *Joh. Pistorii Woerdensis, ob evangelicæ veritatis assertionem, apud Hollandos primò omnium exusti martyrium*. A new edition was brought out in 1649 by Prof. Reuis of Leyden. See Glasius, *Godegeleerd Nederland*, 1 D. blz. 531, 532; Ypeij en Dermot, *Geschiedenis der Nederlandsche Hervormde Kerk*, 1 D. blz. 104, Aanteek. blz. 40 (79); also, Harckenrothii *vite Gnaphei descriptio*, in *Bibl. Bremens. class.* viii, fasc. i, p. 111 sq.; Herzog, *Real-Encykl.* xix, 566. (J. P. W.)

**Gnash** (גָּרַשׁ, *charak'*, to grate the teeth; βρῖχω, Acts vii, 54; τριζω, Mark ix, 18). "To gnash with the teeth," and "gnashing of teeth," are expressions that occur in several parts of Scripture, denoting rage or sorrow (Job xvi, 9; Psa. cxii, 10; Lam. ii, 16; Matt. viii, 12). See TOOTH.

**Gnat** (κίωνωψ, Vulgate *culex*, occurs only in Matt. xxiii, 24), a small two-winged stinging fly, belonging to the genus *culex* (Linn. *diptera*, Latroune *culicidae*), which includes the mosquitoes. The common gnat scarcely yields to any insect in regard to the interesting facts which it presents to the naturalist. The following outline will recall the chief of them to the reader: The boat-shaped *raft of eggs*, which the parent gnat forms and leaves upon the water, so admirably constructed that, though hollow, it neither becomes

filled with water, nor sinks even under the torrents of a thunder-shower; the aquatic larva, breathing, head downwards, through its *tufted spiracle*; its *hook* with which it seizes the animalcules on which it feeds; the variations and even *reverses of structure* it undergoes in the *pupa* state, now swimming, head upwards, by means of its finlike tail, and breathing through spiracles placed behind the *head*; the amazing transformation it undergoes when raising its shoulders out of the water, and upon the bursting of the skin which had enveloped them, the *perfect insect* emerges, its former covering now serving as a life-boat during those few critical moments while it disengages and trims its wings for flight, and commences its existence a winged creature in a new element, and instantly begins to suck the juices of animals or vegetables, while "its shrill horn its fearful larum rings;" the complicated mechanism of its *tube*, which serves the purposes both of lancet and cupping-glass, and of inserting a fluid for liquefying the blood, and making it flow more freely. The various organs, comprehended in so small a structure, excited the wonder of Pliny (*Hist. Nat.* xi, 2), and attracted the notice of Socrates, as we learn from his poetical adversary Aristophanes (*Nubes*, 158); but the further discoveries of the microscope raise our wonder into a still higher principle. "I dare boldly affirm," says Swammerdam, "th it the incomprehensible greatness of Deity manifests itself in these mysterious operations in a particular manner, and affords an opportunity of examining, as it were with our senses, the divine nature" (p. 2, 51). The word *κῶνωψ* seems to be the *generic* term for the gnat among the ancient Greek writers, under which they included several *species*, as we use the word "fly;" and "the fly;" though they give distinct names to *some* species, as the word *σείρφορ*, etc. Rosenmüller observes that the *κῶνωπες* of the Greeks seem to be the *ephemeræ* of Linnaeus (apud Bochart, iii, 44, 4to, Lips. 1793-6). Aristotle gives the name to a species whose larvæ are bred in the lees of wine, which is thence called the *culex vinarius* (*Hist. An.* 5, 19). Pliny also refers to various species of gnats (*Hist. Nat.* xi, 35; xvii, 27). We ourselves recognise several kinds under the common name, as gall-gnats, horse, wheat, winter (see Kirby and Spence, *Introduct. to Entomology*). See FLY.

Our Saviour's allusion to the gnat is a kind of proverb, either in use in his time, or invented by himself, "Blind guides, who strain out a gnat, and swallow down [bold, as we say] a camel." He adopts the antithesis of the *smallest insect* to the *largest animal*, and applies it to those who are superstitiously anxious in avoiding small faults, yet do not scruple to commit the greatest sins. The typographical error, "strain at a gnat," first found its way into King James's translation, 1611 (Trench, *Auth. Vers.* p. 131). It is "strain out" in the previous translations. The custom of filtering wine, among the Jews, for this purpose, was founded on the prohibition of "all flying, creeping things" being used for food, excepting the *saltatorii* (Lev. xi, 23). The custom seems alluded to by the Sept., which in Amos vi, 6 reads *ἠλωσιμῆνος οἶνος*, "filtered wine"—a passage having a similar scope. According to the Talmud, eating a gnat incurred scourging or excommunication (Vorstinus, *De Adagiis*, N. T., p. 771, ed. Fischer; Grief, *Oraculum Christi contra percolantes culicem*, etc., Lips. 1749).—Kitto, s. v.

The species referred to in the N. T. is thought by Bochart (*Hieroz.* iii, 444) to be the *Culex vinarius*, the *יבבכושׁ*, *yabchush'*, of the Talmud (Buxtorf, *Lex. Talm.* p. 927, a). The Heb. *כִּנְמִי*, *kinmim'* (sing. *כִּנְמִי*, Isa. li, 6), which constituted one of the plagues upon Egypt (Exod. viii, 16 sq.; comp. *Psa.* cv, 31), are thought to have been a species of *culex* or *gnat* (comp. Herod. ii, 95), as these insects are very numerous in Egypt (Hasselquist, *Trav.* p. 69; Maillet, *Descr. de l'Égypte*, ii, 134, ed. Mascrier).—Winer, ii, 118. See LICE.

The weapon with which the gnat or mosquito makes its attack is a long and slender proboscis, projecting from the mouth like a very fine bristle, and appearing to the naked eye quite simple. Under the magnifying power of the microscope, however, it is seen to be a flexible sheath (*b*) inclosing six distinct pieces, two of which are cutting blades or lancets (*g*), two notched like a saw with reverted teeth (*f*), a tubular canal (*e*), and the central one an exceedingly acute point, which is also tubular (*b*). When the attack is made, the gnat brings the tip of the organ within its sheath to press upon the skin, into which it presently enters, the sheath remaining without and bending into an angle as the lancets descend. When the weapon has penetrated to its base—a distance of one sixth of an inch or more—the lancets move laterally, and thus cut the flesh on either side, promoting the flow of blood from the superficial vessels; at the same moment a highly irritable fluid is poured into the wound, which has the effect of diluting the blood, and thus of rendering it more capable of flowing up the slender central tube into the throat of the insect. It then sucks, if undisturbed, till its stomach is filled to repletion, leaving a painful tumor accompanied with an intolerable itching. It is the female gnat alone which is noxious; the male, whose proboscis is feathered, has no power of sucking blood.—Fairbairn, s. v.

**Gnesen**, a town in the Prussian province of Posen, with (in 1865) 8950 inhabitants. It is believed to be the most ancient town of the former Polish empire. The cathedral church contains the relics of St. Adalbert, the apostle of the Prussians, which were purchased and deposited there by duke Boleslav I. Soon after, at the beginning of the 11th century, Gnesen was made the see of an archbishop, Gaudentius, the brother and companion of St. Adalbert, being the first incumbent of that dignity. The archbishops of Gnesen were primates of the Polish empire, the first after the king, and the regents of the empire during the vacancy of the throne. In 1821 the united archbishopric of Posen and Gnesen was organized, the archbishop residing at Posen, but Gnesen retaining the seat of a chapter. See Neher, *Kirchl. Statistik*, vol. ii. (A. J. S.)

**Gnosimachi** (γνώσις and μάχονται), a name given to those in the 4th century who were the avowed enemies of the Gnostics. A certain Rhetorius is said to have formed a sect on the principle that matters of doctrine are indifferent, as no certainty can be obtained as to doctrine; but that a good life is all that is essential to Christianity. "It may be a question whether there was ever a regularly constituted sect professing such indifference to doctrines; whether the fact ever amounted to anything more than this, that individuals at different times and in different places were led by the same opposition and the same tendency of mind to entertain these views, of which individuals the above-mentioned Rhetorius may have been one."—Neander, *Church History* (Torrey's), ii, 702.

**Gnosis**. See GNOSTICISM.

**Gnosticism**. A. *Gnosis*.—The New-Testament writers were occasionally determined in their choice of prominent words by the expressions which were current among the people they addressed. Such words as *logos* and *gnosis*, having acquired a peculiar signification in the schools, were recognised by them, and

Organs and Mouth of a Gnat.

appropriated to a sacred use. We concede, indeed, that the latter word (*γνώσις*) usually denotes in their writings simply what its etymology implies, the mere act of knowing, or the objective knowledge thus acquired. In those primitive times it was seldom that any systematic or scientific exposition of Christian truth was demanded. The contest was with reference to the simple facts of the Gospel, and Christianity was fain to secure an existence in the world before it had leisure to speculate upon abstract points. Not only was it unwise to divert men's minds from practical religion, but many true believers were too carnal to be intrusted with a higher wisdom. Paul, therefore, and his fellow-laborers determined to confine their apostolic ministrations to such a historical presentation of Jesus Christ and him crucified as might be called the simplest milk of the world. He declares, however (1 Cor. ii, 6), that he sometimes made known a higher wisdom among such as were perfect, though a wisdom, he is careful to say, very different from that which some heathen and Jewish philosophers had claimed. In other passages he applies the word *gnosis* to this kind of wisdom. He specifies "the word of knowledge" among those peculiar gifts of the Spirit which were possessed by the more eminent teachers (1 Cor. xii, 8), and commends a knowledge through which the more discerning believers rose above the fear of the heathen gods, and ate of the things offered to idols as of things in themselves indifferent (1 Cor. viii, 7). He speaks also of a *gnosis* falsely so called, and thus implies that there was another which truly deserved the name (1 Tim. vi, 20). In subsequent times this use of the word became common, and great pains were taken to make obvious the distinction between the true (*γνώσις ἀληθινή*) and the false *gnosis* (*γνώσις ψευδώνυμος*). A lately (1715) discovered treatise of Irenæus (entitled *γνώσις ἀληθ.*), and an extended description of the true Gnostic at the close of the Stromata of Clement of Alexandria, have preserved to us the views of the Church on this subject near the close of the 2d century.

It was admitted on all sides that there was a knowledge of divine things superior to that of the multitude, not in its importance to the salvation of the soul, but in its intellectual power. It belonged not so much to the pulpit as to the schools, and was important not so much to the personal salvation as to the comfort and growth of believers, and to the acceptance of the Gospel among the more educated classes. It took up those facts which were objects of the common faith, and made them subjects of speculation and profound thought. It arranged them, drew from them logical conclusions, reconciled their apparent discrepancies with each other and with the conclusions of science, and applied them to long-agitated questions which were only hinted at, but not solved, in the Christian Scriptures. At this point, however, the true and the false *gnosis* separated, and took different directions. The former submitted itself without reserve to the authority of the Scriptures, and professed never to venture beyond what was written. It presented itself to all men without discrimination of natural talents or social condition. The latter claimed to be above the reach of the vulgar, and to be derived from sources superior to the written word. Clement describes the true Gnostic as one who grows gray in the study of the Scriptures. A scientific culture may be indispensable to the higher departments of that study, and a true spiritual discernment can be acquired only by divine grace, but the natural talents which must be used in its acquisition have been given to all, and each one's success will be proportioned to his prayerful diligence. The sources of knowledge, too, were the same for the humblest believer and the most eminent Gnostic, for all had access to the Scriptures and the common tradition (*παράδοσις*) which had been transmitted in all the churches. The *gnosis* was simply a faith

made perfect, an expansion of what faith had received, a building constructed wholly of materials supplied by faith. Its advocates made much use of a passage in Isa. vii, 9 (Septuagint): "If ye believe not, neither shall ye understand;" from which they inferred not only that faith is indispensable to knowledge, but that knowledge should spring from faith. And yet it cannot be denied that many, especially of the Alexandrian school, gave an undue prominence to this higher knowledge, as if it were indispensable to all religion, and disparaged the great body of believers (*πιστικοί*) as incapable of a true spiritual life, as in communion only with the Christ of an earthly and sensuous life, and as actuated only by a fear of punishment and a desire of personal benefits. The true Gnostic, on the other hand, they believed to be favored with such an intuitional faculty for the discernment of truth, and such a perpetual tuition under the divine Logos, that he could dispense, in a great degree, with outward demonstrations; and they claimed that his love of knowledge was so intense and disinterested, that if it could even be separated from his eternal salvation he would not hesitate still to choose it. The subjects on which they delighted to expatiate were chiefly: God, as he must be conceived of in his absolute being, the incarnation and redeeming work of Christ, the influence of these upon our race and upon other beings, the vast chain of existence between man and God, the fall of some links in this chain and their probable recovery, the origin of this world, the source of moral evil and its elimination from the universe, and the future history and destiny of all things. In the discussion of such themes, we need not be surprised to find that they not unfrequently transcended the province both of reason and of faith, and that some of their speculations were condemned by their more temperate brethren (Neander, *Hist.* i, 544-52; Hase, *Hist.* § 85; Schaff, *Hist. Christ. Church*, vol. i, ch. iv).

B. *Heretical Gnosticism.*—I. *General Character.*—The name Gnosticism has been applied to a variety of schools which had sometimes little in common except the assumption of a knowledge higher than that of ordinary believers. Most of them claimed a place in the Church, and complained bitterly when this was denied them; and yet they generally spoke of Christianity as insufficient to afford absolute truth, and not unfrequently they assumed a hostile attitude towards it. They seldom pretended to demonstrate the principles on which their systems were founded by historical evidence or logical reasonings, since they rather boasted that these were discovered by the intuitional powers of more highly endowed minds, and that the materials thus obtained, whether through faith or divine revelation, were then worked up into a scientific form according to each one's natural power and culture. Their aim was to construct not merely a theory of redemption, but of the universe—a cosmogony. No subject was beyond their investigations. Whatever God could reveal to the finite intellect, they looked upon as within their range. What to others seemed only speculative ideas, were by them hypostatized or personified into real beings or historical facts. It was in this way that they constructed systems of speculation on subjects entirely beyond the range of human knowledge, which startle us by their boldness and their apparent consciousness of reality.

II. *External Origin.*—And yet we have reason to believe that Gnosticism originated no speculations which were essentially new. It only recognised and selected what seemed to it true in earlier systems, and then combined these fragments in new relations—not in the way of a crude syncretism, but with mutual affinities and living power. No question, however, has more perplexed historians than that which refers to the direct origin of Gnosticism. We are in possession of scarcely any authenticated documents which have come down to us from persons living at the time and

in countries in which it had its birth. We are dependent for our information respecting it almost entirely upon the representations of opponents, who knew almost nothing of Oriental systems, and were acquainted with it only in its maturity. Unfortunately, too, the question of the origin of Gnosticism has recently become complicated with others on which violent party feelings have been exercised. Those who have denied the apostolic origin of the epistles in which traces of Gnosticism have been discovered, have felt an interest in removing both the epistles and Gnosticism to as late a period as possible. From the discussion of this subject, however, there are some facts which may now be regarded as incontrovertible. 1. Ever since the conquests of Alexander the Great, an intense interest had been felt throughout Asia Minor and Egypt in Hellenistic philosophy and Oriental theosophy; and while the old mythologic fables and professed systems of positive revelation had lost their authority, many thoughtful persons had discovered under these what they looked upon as a uniting bond of truth and the elements of a universal religion. 2. The result was that, near the time of the first promulgation of Christianity, a number of new systems of religious philosophy sprung up independently in different countries, and exhibited similar characteristics. They were usually formed by incorporating with the national religion what seemed attractive elements in foreign systems, and softening down what was harsh and incredible in the popular faith and worship. In this way we discover a nearly simultaneous origin of the Judaistic philosophy at Alexandria, of Essenism and Therapeutism in Egypt and southern Palestine, of the Cabalistic literature in Syria and the East, and of New Platonism among the Hellenistic nations. These were all offshoots from the same general root, and not necessarily deriving anything original, but unquestionably drawing much assistance from one another. Similar circumstances everywhere called forth similar phenomena with no conscious interdependence. 3. We thus account for the origin of Gnosticism, and easily reconcile the conflicting views of different writers respecting it. As the early ecclesiastical writers were themselves acquainted almost exclusively with Occidental literature, they were in the habit of ascribing the rise of Gnosticism to the study of Grecian philosophy, and especially of Platonism, and they appeal to the cosmogonies of Hesiod and others for the exemplars of the Gnostic speculations. Modern historians, however, have found in most of the Gnostic systems such a predominance of Oriental elements, that they have been led to infer a direct influence not merely from Alexandrian Judaism, but dualistic Parsism, and even from pantheistic Buddhism. There can, in fact, be no question regarding the influence of all these systems. The Platonic doctrines of a God, without distinctions in his nature, withdrawn entirely within himself, intelligible only to the initiated, and that only through the mediation of the Nous, a higher ideal sphere reflecting itself in a lower phenomenal world, a hyle (ἔϋ) and an undefined dualism between it and God, a fall of spiritual beings from the divine to the sensuous sphere, the derivation of sin from a contact with the material element; the Pythagorean doctrine of numbers; the Brahminic doctrine of emanation and hypostatizing of the divine attributes; the Parsic representation of the divine essence as light, of a dualism in which God is subject to the continual aggression of a world of matter, and of a good principle in eternal conflict with the prince of darkness; and the Buddhist notions of a God in process of development, of souls longing to be freed from the bonds of matter, and to be raised above all sensible things, and reunited with the divine source of life, are all unmistakable, and indicative of their respective sources. We need not, however, suppose that these elements were derived directly from their original sources. The Alexandrian

literature, in which most of these elements had found a place, was diffused among the educated classes in all those countries in which Gnosticism flourished, and might have been the mediating agency through which the mind of the East was brought into communication with that of the West. From the heterogeneous commingling of such diverse systems, and especially from their contact with the young energies of Christianity, the Gnostic spirit might easily draw forth such materials as suited its purpose. The sources of Gnosticism, however, like those of the Nile, are to a great extent concealed, and those who imagine they have discovered its principal head not unfrequently learn that another remains far beyond. As its friends boasted, there were secret agencies by which truth was conveyed to the elect race under symbols and an outward letter which only they could understand. (See Baxmann, in the *Amer. Theol. Review* for 1862, p. 666-76).

III. *Classification.*—It has been found very difficult to arrange the several Gnostic sects according to any principle of classification. They have been grouped together by different writers according to their origin, their geographical position, and their speculative views. Neander (*Hist. Christ. Religion*, i, 379-86) divides them into Judaizing and anti-Judaizing Gnostics, according to their agreement or opposition to ancient Judaism. Gieseler (*Ecl. Hist.* vol. i, § 44) arranges them according to their geographical order, as Alexandrian, Syriac, and miscellaneous. Hase (*Hist. Chr. Ch.* § 76) makes four classes, Syrian, Hellenistic, Judaizing, and specially Christian. Similar to this is Matter's division into those of Syria, Asia Minor, Egypt, and the rest of the Roman world (*Hist. crit. du Gnost.*). Baur (*Chr. Gnosis*, 1835) arranges the several sects into three principal classes, according to their relation to the three earlier religions with which they came in contact: 1. Those who combined Christianity with Judaism and heathenism; 2. Those who entirely separated it from them, and opposed it to them; and, 3. Those who identified it with Judaism, but opposed it to heathenism. This ingenious, and, in many respects, satisfactory division, fails to bring out the historical progress and internal development of the Gnostic systems, and offers no suitable place for Manichæism. It has, however, found much favor on account of its simplicity, and has been adopted with some modifications by Niedner, Marheineke (*Weltalter*, th. ii, p. 246), Tennemann (*Manual of the Hist. of Phil.* § 200), and others. Dr. Schaff proposes a classification, according to an ethical point of view, into the speculative and theosophic, the practical and ascetic, and the Antinomian and libertine (*Hist. of the Chr. Ch.* i, 234). It is evident that no classification can combine together a chronological, local, and logical distribution, and hence we shall probably gain something by presenting these separately.

IV. *History.*—In attempting to give a historical outline of the course of Gnosticism, our object is not so much to present particular details of the several schools, since these will be found, as far as possible, under their several heads in this work, but to indicate in general the order and position of each. Lipsius, in a recent work (*Gnosticism, its Essence, Origin, and Development*, 1860), endeavors to show that this course of development was a curve which commenced with only a slight departure from orthodoxy, and, after diverging more and more from it, finally comes back again gradually to the true path. Another writer (Hilgenfeld) has attempted a distinct definition of the three stadia of this development. It is difficult to discover in the actual history the regularity of departure and return implied in such a figure, and yet we may derive from it a correct notion of the general direction. In the first stadium we have the Judaizing Gnostics, and then the several classes who, in their opposition to Judaism, deify nearly all the godless characters of the Old Testament. In the second we have not merely

Old-Testament history, but Greek philosophy, a contempt of the common faith, the opposition of the psychic and pneumatic natures, and mythical personifications of speculative ideas. In the third and last stadium this opposition between the pneumatic and psychic natures begins to be modified, and finally, under the Marcionites, the Gnostic speculation approximates very nearly that of the more liberal Catholic teachers. It is in this last stadium that we find the greatest difficulty in seeing how the curve approximates with much uniformity the orthodox highway, for some classes of the later Marcionites, and, above all, the Manichees, seem rather to have been the extreme consummation of Gnosticism.

As there were strong tendencies towards Gnosticism both in Judaism and heathenism, we might reasonably infer that the Gnostics must have been powerfully attracted by Christianity. It was, however, more consistent with the essential spirit of that movement to attempt to mould the new system to its fancy than to submit with docility to the exclusive authority of the Gospel. Among the remnants of Oriental tribes in Samaria we are not surprised to find such a man as Simon, who succeeded in making the multitude believe that he was the great power of God. It is said that he called himself the creative world-spirit, and his female companion the receptive world-soul. We have here a likeness of the Gnostic doctrine of æons and syzygies. In the tradition of the subsequent Church, this half-mythical personage became the patriarch of all heretics, but especially of heathen Gnostics (Irenæus, *Adv. hæc.* lib. i, c. xxvii, § 4; Hippol. i, 62 sq.). During the twenty years which intervened between the first Christian Pentecost and the later epistles of Paul, we know that theosophic speculations were everywhere prevalent in Syria and Asia Minor, and that these were strangely mingled with Christian doctrines. Great freedom was allowed to religious thought, even among the early Christians, as long as the moral and religious life of the people was not perverted. But Paul very soon discovered dangerous tendencies in the churches which he had recently established in Asia Minor. Josephus tells us that Alexander the Great had sent into the provinces of Lydia and Phrygia 2000 Mesopotamian and Babylonian Jews to garrison the disaffected towns there, and we are informed that the inhabitants of that region have always since been prone to mystical and Oriental superstitions (Alford, *How to use the Epistles*, Epistle to the Colossians, *Sunday Mag.* 1867, p. 829). The errors which he reproved at Colossæ were doubtless a curious commixture of Jewish and heathen speculations. The ancient historian Hegesippus informs us (Euseb. *Ecl. Hist.* iii, 32) that the heretical head did not make its appearance with an uncovered head until after the death of the apostles, but that it previously worked in secret. After all the contentions of various writers on the question how far this error prevailed in apostolic times, there is a general agreement that, while most of the heresies of that period were Judaistic, there was an obvious difference between those reproved in the Galatian churches and those noticed in the epistles to the Colossians and Timothy. The latter are treated much more mildly, and we readily perceive that they must have been much less developed and less subversive of the Christian system. They are expressly called (1 Tim. vi. 20) a false gnosis, and were characterized by empty sounds without sense and subtle oppositions to the truth, a depreciation of the body, and a worship of angels (Col. ii, 18, 23), and interminable genealogies and myths (1 Tim. i, 4). These seem more akin to Jewish than to heathen speculations, and imply not the completed Gnosticism of the second century, but the manifest germs of Docetic emanations and Gnostic dualism. Irenæus, on the authority of Polycarp, relates (*Adv. hæc.* i, 26) that John was acquainted with Cerinthus, and wrote the fourth gospel to refute his errors. Both

he and Epiphanius (*Hæc.* p. 28) say that Cerinthus taught that the world was not made by the Most High God, but by a lower power; or by angels, and that Jesus was an ordinary man, whom the supreme Logos became united with at his baptism, but forsook during his last sufferings, to reunite with him in the future kingdom of Messianic glory. See CERINTHUS. Here the Gnosticism becomes plainly perceptible, and we can certainly understand a number of passages in John's Gospel and Epistles better if we suppose a reference in them to these and similar errors. The Nicolaitans of the Apocalypse and the false teachers of the Epistle of Jude despised Judaism as the work of evil angels, ridiculed and trampled upon the law that they might insult these limited powers, and thus fell into a strange complication of gross licentiousness and bodily mortifications (Burton, *Heresies of the Apost. Age*; Potter in the old and W. L. Alexander in the new edition of Kitto's *Cyclop.*; Conybeare, in Conybeare and Howson's *Life of St. Paul*, note at the end of vol. i. Comp. C. C. Tittmann, *De vestigiis Gnosticor. in N. T. frustra questis*, Leips. 1773; transl. and publ. in *Contributions to Foreign Literature*, New York, 1827). No sooner had the direct influence of the apostles and their immediate successors ceased than the speculative interest and numbers of the Gnostics began to increase mightily. Near the commencement of the 2d century, flourished about the same time Basilides in Alexandria and his son Isidore [see BASILIDES], the dualistic and ascetic Saturninus in Antioch, Carpocrates of Alexandria, and his son Epiphaneus. The last two maintained that every one who could soar to the same height of contemplation might attain the same powers with Christ, and that Christ differed in no respect from the wise and good of all nations. About the same time we first become acquainted with the party commonly called Ophites, though Origen says that it was founded by a certain Euphrates, who must have lived as early as the time of Christ. Their common appellation (Ophites, Heb. Naasenes) was given them by their opponents (for they always called themselves simply Gnostics), because they were said to pay great honor to the serpent as the instrument of the temptation in Eden. As the prohibition then transgressed was designed to keep man back from knowledge, what is commonly called the Fall was, in fact, a transition to a higher state. When first known they resided principally in Egypt and in Phrygia. They afterwards became numerous, and branched off into various subdivisions. See OPHITES. Great differences, however, are discoverable between those who bear the same name. In the next generation (A. D. 140-160) belongs Valentinus, who flourished first in Egypt and then in Rome, and finally died in the island of Cyprus (about A. D. 160). The school named after him was the most influential of all the Gnostic parties, and contained a large number of talented and eminent teachers. It was divided into an Oriental and an Italian branch, in both of which was inculcated a highly exalted style of religion. Among its most esteemed writers may be mentioned Heracleon of Alexandria, who wrote a commentary on John's Gospel, some extracts from which, preserved in Origen, admirably bring out the profound spirit of this evangelist; Ptolemy, whose epistle to Flora has come down to us in Epiphanius, and endeavors to show that his system was not inconsistent with the Catholic faith; Marcus, probably a Jew of Palestine, in whose poetic and symbolical work divine æons discourse in liturgical forms; and Bardesanes, an Armenian of Edessa (about 170), who, with his son Harmonius, was immensely popular as a writer of hymns and imitations of David's Psalms. (See the articles under these names.) Contemporary with Valentinus lived Cerdon, a Syrian, and his pupil Marcion of Sinope, in Pontus, who carried their zeal for Pauline and primitive Christianity to such an extreme that they rejected not only all secret traditions, but large portions of the

New Testament. They opposed heathen religions as the work of the devil, and Judaism as the product of an inferior and wrathful deity, who was to be put down by Christ and the revelation through him of the supreme God. Kindred with him were Apelles of Alexandria, and his pupils Lucas and Marcus, who approximated still nearer a Christian orthodoxy, though with singular inconsistencies. Tatian, a Syrian, a rhetorician in Rome, during the latter part of his life is said to have fallen into Gnostic errors, and to have prescribed a system of extreme abstinence as the only means of disengaging ourselves from the world. A party of Encratites, calling themselves by his name or by that of his pupil Severus, continued as late as the 4th century. A class of persons represented by the Clementine Homilies at Rome, and sometimes reckoned among the Gnostics, ought rather to be classed with the Ebionites. See CLEMENTINES. We now come in contact with several classes of the Ophites, many of whom, according to Origen, went so far in their opposition to ordinary views that they admitted none to their assemblies who did not curse Christ (Nehander, i, 446 sq.). The whole system of the God of the Jews was looked upon by this sect as oppressive to man, and whoever is represented in the scriptural history as rebelling against it were regarded as saints. Hence some of the worst characters of the Old and New Testament were held in the highest honor. Even Jesus was reckoned among agents of the Jewish Jehovah, and his betrayal by Judas Iscariot was extolled as done with the best of motives and results. Those who maintained this position were called Cainites, while such as dissented from such extravagances were distinguished as Sethites. The Perates, who have recently become known to us through the Philosophoumena, appear to have approximated much nearer the Catholic doctrine. During the 3d century Gnosticism appears to have lost its power, for the orthodox party had now attained more scientific precision of thought, and their formulas of faith presented scriptural doctrine in a style consistent with the highest culture of the age. Towards the close of that century, however, arose in the distant East one more attempt to combine Christianity with Oriental theosophy. Manichæism sprang up in a region where neither Hellenism nor Judaism was familiar; and its object appears to have been to reform the corrupted Parsism of that day by incorporating with the original system of Zoroaster numerous elements taken from a gnosticized Christianity and Buddhism. To Christianity, however, it seems to have been indebted more for its names and symbols than for its essential history or characters. Personages and facts taken from scriptural records find in that system an entirely new significance. Its founder (Mani or Manes, a Magian banished from Persia) discovered many points of agreement between the doctrines of Parsism, Buddhism, and Gnostic Christianity, and endeavored to combine these three systems into one universal religion. He accounted for all things on dualistic principles. His followers were soon driven by persecution from their earliest seats, but were numerous during the fourth century in every part of the East, and in Africa, Sicily, and Italy. Many persons of noble spirit were attracted by it, but it soon fell into gross licentiousness by its professed exaltation above outward things, and of course lost its place in common esteem, and fell into contempt. Some vestiges, however, both of Marcionism and Manichæism, remained even into the Middle Ages, and by means of the Priscillianists, the Paulicians, the Bogomiles, and the Cathari, transmitted the leading features of Gnosticism to distant ages and countries.

Many of these sects can hardly be recognised as within the pale of Christianity. While some of them claimed a place within the Church, and refused to leave it when they were disowned by its authorities, others openly abjured the Christian name. Certainly such

complete subverters of the essentials of the Gospel as the Carpoerians, Perates, Sethites, Cainites, and Manichæans deserve to be called rather gnosticized heathen than Christian Gnostics. In the history of the Church they deserve a place only because they, like other heathen, influenced it from without. In a history of Gnosticism even these must have no unimportant position. Indeed, no history of this system is quite complete without embracing some still more remote systems — Cabalistic Judaism, Neo-Platonism, etc., which had their origin under Gnostic influences.

V. *General Principles.*—The ultimate aim of Gnosticism was to present a perfect solution of the great problem of the origin and destiny of the universe, and especially of the origin of evil, *πολυζούλιγον ζήτημα, πόθεν ἡ κακία*. The three ideas which were fundamental to all its speculations were: 1. A supreme being, unconnected with matter, and incapable of being affected by it; 2. Matter, *ἄλη*, eternal, the source of evil, and opposed to God; and, 3. A series of beings intermediate between these two. The primary source of all spiritual existence was an eternal abyss (*βυζύς*), so utterly beyond human representation that no one should venture to name him, or even to conceive of him. He was the absolute one, and virtually and logically non-existent (*οὐκ ὄν*). In his nature, however, there was some inconceivable ground of self-evolution (*προβολή*), in consequence of which his infinite powers became revealed in a series of æons, or hypostatized divine attributes. It is only through these that he can have communication with finite natures. They are called æons (*αἰώνες*) because they are *eternal ones*, representing the eternal Source of all (*αἰών*). According to Valentinus, they emanated in pairs (*syzygies*) of different sexes. Basilides and Marcion ascribed their existence to an act of love and to a creative word, but the more pantheistic sects to a necessary process of emanation which is usually spoken of as by generation. Their number varies in different systems; sometimes it is determined by planetary relations (12), sometimes by the days of the year (365), sometimes by the years in the life of Christ (32), but not unfrequently it is left indefinite. The first æons were Nous, Logos, Sophia, Dunamis, Aletheia, Zoe, etc., generated either by the original being or by one another in ever-increasing imperfection as they recede from their source. Together they constitute the Pleroma, the world of light and divine fulness, but far removed from the infinite abyss with which none can directly communicate. 2. Over against this Pleroma and this eternal abyss stands the world of matter (*ἕλη*), sometimes contradistinguished as the Kenoma, or the world of emptiness or darkness. This was usually spoken of as eternal, but chaotic, and disordered by internal strifes. It was generally described as far removed from the kingdom of light, but sometimes as very near, and even on the confines of that kingdom. Some conceived of it as dead and powerless until it became animated by influences from the Pleroma, but others, and especially Manes and his followers, represented it as active and aggressive. According to the former, one of the lowest and feeblest of the divine æons (called by Valentinus Sophia, the lower wisdom or Achamoth, the *κάτω* in distinction from the *ἄνω σοφία*) fell from the abode of light and came under the power of matter. Though Valentinus makes this, to some extent, a free act of apostasy on the part of the divine æon, as she was wandering beyond the bounds of the Pleroma, and agitated by her intense desire to get out of her proper sphere and enter into more direct communication with the infinite Source, it was usually described as the result of an incapacity to retain a hold upon the superior world, and a consequent precipitation into the darkness of the Kenoma. 3. At this point we meet with the idea of the Demiurge. The name signifies a public worker (*δημιουργός*), and he is the same with the Avelion of Basilides and the Jaldabaoth (גַּלְדַּבְּאֹוּת), the chaos-

born) of the Ophites. He came into being from the commingling of the light-nature in the *Sophia* (the *πνευματικόν σπέρμα*) with matter. As the fruit of such a parentage, he was possessed of a nature neither pneumatic nor material, but psychical, and he occupies an intermediate position between the supreme God and the material world. He is not, of course, an evil, but only a limited and imperfect being, and yet evil springs from the defects of his work and of his plans. He acts in general with sincerity according to his power and light. By him the chaos of matter was transformed into an organized universe. The planetary heavens, and the sidereal spirits who are over them, and the whole course of the world, are under his control. In all this, however, he is the unconscious instrument of higher powers in the world of light, who secretly influence all his movements. Of this control he finally and gradually became aware, and by some teachers he is said to have become vexed and goaded into opposition by the discovery, and by others to have gladly welcomed and submitted to it. He was the author of Judaism, and to some extent of Christianity; and hence by many Gnostics the former system was looked upon as defective, if not false, and even the latter, especially in its mere letter, as incapable of imparting the highest wisdom. Only by Marcion was he regarded as entirely independent of the supreme God in the work of creation and providence, since he was here in a department which belonged wholly to him. He remained the God of this world until the coming of Christ, who vanquished him at the crucifixion. 4. With respect to anthropology, the Gnostics held that the whole kingdom of the Demiurge was fallen. He was himself the creature of a fallen æon, and the world he created and rules is subject to imperfection. From his connection with matter there was produced a human race, which in its totality is a microcosm, representing within itself the three principles of the great universe, the supreme God, the Demiurge, and matter. This was in consequence of the creation of three classes of men, higher or lower in proportion to their freedom from matter. Marcion alone made this distinction dependent upon the will of man himself; the other Gnostics made it a result of creation, or of a divine communication of the spark of light and life from the upper world. The highest of these, i. e. the *spiritual* (*πνευματικοί*), share largely in the nature of the lowest æon (*σοφία*), who originally fell from the Pleroma, and hence they are the only ones who can attain perfection. They alone are capable of recognising and receiving the light which is communicated from above. The second class, the *psychical* (*ψυχικοί*), have the nature of the Demiurge himself, who has power to raise them to some extent above the debasement of matter, and, by giving them legal forms, to impart to them a legal righteousness, but not to afford them a recognition of those divine mysteries which are beyond his own reach. The third class are the *fleshy or hylic* (*σαρκικοί, ἡλικοί*) natures, in whom matter has usurped human form and passion (*πάθος*), has entire control, and who are therefore destined to share the fortunes of matter alone. Historically, the spiritual predominated under the Christian dispensation, the psychical under the Jewish, and the fleshy among the heathen of all ages. Individuals, however, of each class are numerous under all these dispensations. In the aristocratic spirit of ancient Platonism, many Gnostics allowed of no transition from the one to the other of these classes, while others looked upon it as possible for the lower to rise to the higher in consequence of a divine communication of special powers. 5. The Gnostic idea of redemption was simply that of a liberation of the light-spirit from its connection with matter. Of course it is confined to the two higher classes of our race in whom that spirit is found. In every condition of humanity, some favored individuals are represented as sighing for deliverance. In this way

were explained some glimpses of a higher knowledge, which break forth at intervals in the prophecies and psalms of the Jewish Scriptures, and in the writings of pagan philosophers. Some sparks of light were supposed to have been thrown into the breasts of nobler persons, and the rational creation, as a whole (*κτίσις*), is represented as sighing for redemption (Rom. viii, 22). A recently discovered work (*Pistis Sophia*) contains the penitential sighings and longings of the æon (*σοφία*) when she had herself fallen from her original condition of divine intuition to that of mere faith. In pity for this sighing spirit, Christ, one of the highest of all the æons, descends, and brings her, after innumerable sufferings, back to the Pleroma, and undertakes the deliverance of all pneumatic natures. To accomplish this, he assumes, not a material form, since he can have no contact with matter, but only the appearance of one. In answer to the longings of the Jews, the Demiurge had promised and actually sent among them a Messiah with only psychical powers. Most of the Gnostics suppose that the heavenly Christ (*Soter*) took possession of this Messiah, who had proved himself unable to accomplish what had been promised in his behalf, and that from the baptism by John until the crucifixion this true Redeemer acted through this personage. Some, however, held that the man Jesus, with whom the æon Christ then became connected, combined in his own nature all human elements with the powers of an ætherial spirit. As this Christ cannot suffer, everything in him which seemed like it, or like any imperfection, was either a doctetic illusion, or wholly in the human personage with which he was united. This work of Christ, however, commenced not wholly with the life of Jesus, but, to some extent, with creation itself, in which the Redeemer inspired the unconscious Demiurge with many divine ideas, and during the whole process of the world's government he is drawing congenial spirits to himself, and correcting many errors of the world-ruler. His redeeming work, however, is effected entirely by the communication of the Gnosis, and especially the revelation of the true God. In the end, all pneumatic and psychical natures capable of redemption will be gathered and raised to the Pleroma. Valentinus supposes that all psychical natures are exalted only to a lower degree of blessedness in a peculiar kingdom of the Demiurge. Matter with all fleshy natures will either be consumed by its own powers, or sink back into its original condition of utter deadness and absolute separation from the light, or of internal confusion. 6. The sources from which the Gnostics professed to derive their knowledge were, (a.) Tradition, not so much that of the Church, which they generally looked upon as unphilosophical, and fit only for the multitude, but that which was said to have been communicated by Christ to a narrow circle of congenial spirits, and by them transmitted to others. Marcion alone made this tradition accessible to all. (b.) The ordinary Christian Scriptures were only partially received among them. Marcion and the more strenuous Judaistic Gnostics entirely rejected the Old Testament, and the more moderate recognised a distinction between its pneumatic, psychic, and hylic elements. Many of them disparaged portions of the New Testament also, while others accepted only of Paul's writings and an expurgated gospel of Luke. (c.) Other writings of highly enlightened persons belonging to particular sects. Thus Manes's writings were much venerated among his followers, and the prophecies of Cain and of a pretended seer named Parchor among the followers of Basilides, and the apocryphal books of Adam, Enoch, Moses, Elias, Isaiah, Baruch, and others. (d.) Even the writings of the heathen poets and philosophers were much used by some, who, by a course of allegorical explanations, like those which they applied to the Scriptures, discovered ineffable mysteries under the most unpromising outward letter. 7. With the

exception of the followers of Manes, we have no evidence that the Gnostics ever attempted a distinct ecclesiastical organization. Many of them were never excluded from the orthodox churches, within which they only sought to form schools and social circles. They practised baptism, and believed that in this rite, as in the baptism of Christ, the higher spirit was more abundantly imparted, and the human spirit was emancipated from the power of the Demiurge. Most of them were inclined by their poetic fancies and their love of symbols to a gorgeous style of worship, but the more common ordinances and observances of the Church were neglected as useful only to such as were on the ground of mere faith. 8. Their ethics and practical morality were usually dependent upon dualistic principles. Among the Hellenistic Gnostics it took the form of a struggle against matter, which not unfrequently ran into asceticism, and sometimes into the use of charms and astrological practices. The Oriental Gnostics, on the other hand, are said in many instances to have plunged into immoralities, sometimes with the view of showing their contempt for the Demiurge and his laws, or because they regarded the body as an indifferent thing to a spirit united with the supreme God, and subject to no inferior law. Saturninus, Marcion, and Manes rejected marriage; but many Gnostics not only submitted to it, but looked upon it as the highest law of pneumatic natures. We have no evidence that the standard of morality was lower among the Gnostics generally than among orthodox Christians in general.

One is amazed at the boldness, the fanciful nature, and the high pretensions of Gnosticism. In the course of a century and a half it comes and goes before us like a splendid vision. And yet its influence upon Christianity was profound and permanent. It gave occasion to a great expansion of Christian thought, to a clearer idea of the historical relation of Christianity to earlier and surrounding religions, and to a better definition of the basis of true faith. It deserves a more careful study than it has usually received.

VI. *Literature*.—The original authorities are the ecclesiastical writers of the period generally, but especially Irenæus and Epiphanius, *Adv. hereses*; Tertullian, *De prescript. her.*, *contra Gnost. scorp.*, *adv. Valentinianos*, *adv. Marcianum*; Hippolytus, *Karà παρ. αἰρ.* *ἐλεγχος*, and the *Philosophumena* usually ascribed to him; Theodoret, *Har. Fabb.* Also Clemens Alex. and Origen in many passages; Gnostic fragments in Grabe's *Spicilegium*; Münter's *Ode Gnostica* (Kopenh. 1812); *Pistis Sophia* (a Gnostic work translated from a Copt. Codex by Schwartz and edited by Petermann, Berlin, 1851); *Cerdus Nazareus* (ed. by Norberg, and sometimes called the Bible of Gnosticism); *Bardanes Gnosticus Syrorum primus Hymnologus*, and *Antitheses Marcionis Gnostici* (two Gnostic works published by Aug. Hahn, Leips. 1819, 1823); also the Neo-Platonist work of Plotinus, *Ἠθὸς τ. γνωστικῶν* (Emend. ii, lib. ix). The English reader can gain access to many of these ecclesiastical writers by means of the *Ante-Nicene Chr. Lib.*, edited by Drs. Roberts and Donaldson, now in course of publication at Edinburgh.

The modern literature of Gnosticism is very abundant. Besides the general ecclesiastical histories of Gieseler, Neander, Hase, and Schaff, the doctrinal histories of Hagenbach, F. K. Meier, F. C. Baur, A. Neander, L. Noack, and Shedd, and the histories of philosophy by H. Ritter, Tennemann, F. D. Maurice, and the French history translated by C. S. Henry, the more important special works on the subject are, A. Neander, *Genet. Entwickl. d. vorn. gnost. Syst.* (Berl. 1818); J. Matter, *Histoire crit. du Gnosticisme* (Par. 1828 [1843], 2 vols.); Dr. Edward Burton, *Bampton Lectures on the Heresies of the Apost. Age* (1829; Oxford, 1830); F. C. Baur, *Die chr. St. Gnosis* (Tub. 1835), and *Das Christenthum* (Tub. 1853), p. 159-213; J. A. Mœhler, *Versuch ü. d. Urspr. d. Gnost.* (Tub. 1837); Möller, *Gesch. der*

*Kosmologie d. Griech. Kirche* (1862); R. A. Lipsius, *Gnosticismus*, etc. (Leips. 1860); Norton's *Hist. of the Gnostics* (1845); C. A. Lewald, *De doctrina Gnost.* (1818); H. Roscell, *Gesch. d. Untersuch. ü. d. Gnost. in Theol. Nachl.* (Berl. 1847). Articles on Gnosticism have been published by F. R. Lücke in *Berl. theol. Zeitschr.* (1819); J. C. L. Gieseler, in *Hal. lit. Zeit.* (1823) and *Stud. u. Krit.* (1830); F. C. Baur, *Stud. u. Krit.* (1837); H. T. Cheever, in *Amer. Bibl. Repository*, Oct. 1840; R. Baxmann, in *Deutsche Zeitschr.* (1861), and transl. in *Amer. Theol. Rev.* Oct. 1862; and on the later history of the Nazoreans, or Mandai Jahia, in the *Christian Review*, Jan. 1855; an excellent article by J. L. Jacobi may be found in Herzog's *Real-Encyclop. für prot. Theol.* See also Appleton's, Brande's, and Chambers's *Cyclopedias*. (C. P. W.)

**Goa**, the largest of the Portuguese possessions in India, embracing the provinces of Salfette and Kan-kara and six islands. Its population was, in 1869, about 364,000, of whom two thirds were connected with the Roman Catholic Church. The city of Goa, the capital of Portuguese India, is the seat of an archbishop. The jurisdiction of the archbishop of Goa has been in modern times the subject of a violent dispute between the popes and the kings of Portugal. See PORTUGAL. (A. J. S.)

**Goad** (𐤀𐤒𐤁𐤀, *malmaʿ*, an instrument for guiding; the Greeks used the term *βοδολῆξ*, *Iliað*, vi. 135, also *βοδονητρον*, or simply *κέντρον*; see *Schöten, De stimulo boum*, Francof. 1717; Hager, *De pōtōn κέντρον λακτιζέον*, Lips. 1738). "Shamgar, the son of Anath, slew of the Philistines six hundred men with an ox-goad" (Judg. iii, 31). Maundrell gives us the best account of the ox-goad, which is no doubt the same as that used in the days of Shamgar. "At Khan Leban the country people were now everywhere at plough in the fields in order to sow cotton. 'Twas observable that in ploughing they used goads of an extraordinary size; upon measuring of several I found them to be about eight feet long, and at the bigger end six inches in circumference. They are armed at the lesser end with a sharp prickle for driving the oxen, and at the other end with a small spade or paddle of iron, strong and massy, to clear the plough from the clay that encumbers it in working" (*Journal of a Journey from Aleppo to Jerusalem*, p. 110). This was in the north of Syria. Prof. Hackett says, "The ox-goads that I saw in the south I should judge to be quite as large. It is manifest that such an instrument, wielded by a strong arm, would do no mean execution. It is easy, therefore, to credit the account of Shamgar's achievement. We may suppose, however (so fragmentary is the notice), that he was not entirely alone; that some others rallied to his aid with such instruments of labor as they could snatch at the moment" (*Illustrations of Scripture*, p. 155). See AGRICULTURE.

In the other passages where the word "goad" occurs it is the representative of a different term in the original; 𐤁𐤒𐤁𐤀, *doban'*, something pointed (1 Sam. xiii, 21), or 𐤁𐤒𐤁𐤀, *dobon'* (Eccles. xii, 11), which is, perhaps, properly the iron point to which the rod or handle, denoted by the previous term, was fixed. This, at least, is the explanation adopted by Jahn (*Archæol.* i. 4, § 9) from Rabbinical writers (Gesenius, *Theos.* p. 349). According to others, it may refer to anything pointed, and the tenor of Eccles. xii allows the sense of a peg or nail—anything, in short, which can be fastened; while in 1 Sam. xiii the point of the ploughshare is possibly intended (which is likewise understood by the Sept. and Vulg. as Judg. *ἐν τῷ ἀποσπῶστί, vomere*). There are undoubted references to the use of the

goad in driving oxen in *Eclus.* xxxviii, 25, and *Acts* xxvi, 14. The expression "to kick against the goads" (*Acts* ix, 5; *A.V.* "the prick's") was proverbially used by the Greeks for unavailing resistance to superior power (comp. *Æschyl. Agam.* 1633; *Prom.* 323; *Eurip. Bacch.* 791). The same means of inciting animals to greater speed is probably alluded to in *2 Kings* iv, 24. (See generally Buckingham, *Travels in Palestine*, i, 91; *Kitto, Daily Bible Illustr.* ii, 341; Thomson, *Land and Book*, i, 501.) See **OX**.

**Goad**, THOMAS, D.D., a learned English divine, was elected to King's College, Cambridge, in 1592. He became rector of Milton, Cambridgeshire, and afterwards, successively, prebendary of Winchester and Canterbury, precentor of St. Paul's, rector of Notley, Essex, and of Hadley, Suffolk. He died in 1638. He was one of the deputies to the Synod of Dort in 1618, as a Calvinist, but he afterwards altered his opinions. His principal works are, *A Disputation concerning the Contingency of Events in respect of God's eternal Decrees* (to be found in the *Cambridge Tracts* and in Womack, *Result of False Principles*).—Darling, *Cycl. Bibliographica*, i, 1276.

**Goadby**, ROBERT, a printer and publisher of Sherborne, Dorsetshire, who died in 1778. He compiled and published a commentary under the title *An Illustration of the Holy Scriptures by Notes and Explications on the O. and N. T.*, etc. (Lond. 1759-70, 6th ed. 3 vols. fol.). Dr. A. Clarke says of it that, "while it seems to be orthodox, it is written entirely on the Arian hypothesis." Sellon wrote a reply to it (London, 1765, 12mo).—Darling, *Cyclop. Bibliog.* s. v.; Allibone, *Dict. of Authors*, i, 680; Horne, *Bibliographical Appendix*.

**Goar**, JACQUES, a French Dominican monk, was born at Paris in 1601. He entered into the order of Preaching Friars in 1619, and taught rhetoric in several houses of the Dominicans for some years. He was then sent on a mission into the Levant, and lived eight years at Chios, where he made the doctrines and ceremonies of the Greek Church the subjects of his investigation, and then came to Rome with many collections of MSS., etc. In 1647 he published at Paris, in Greek and Latin, his *Εἰρηολόγιον, Euchologium sive Rituale Græcorum* (Paris, 1647, folio; Venice, 1780). For the history of liturgies, this is a very valuable and useful work. Goar died at Amiens in 1653. See Échard, *Script. Ord. Præd.* vol. ii; Hoefler, *Nouv. Biog. Générale*, xx, 860.

**Goar**, ST., a French anchorite, was born in Aquitaine about the year 885. The legend says that, after being ordained priest, he devoted himself to the propagation of Christianity, and left his family to retire to the neighborhood of Oberwesel (Germany), where he erected a small chapel (at the place since called St. Goar), beside his cell, to receive pilgrims, and succeeded in converting a large number of heathen. Some of his enemies, having accused him as "an impostor and a man fond of good living" to Rusticus, bishop of Treves, he cleared himself by performing several miracles. Sigebert III offered to appoint him bishop in the place of Rusticus, but Goar preferred remaining in his humble position. He died July 6, 649, and was buried in the chapel he had erected by Agrippin and Eusebins, two of Sigebert's priests. The Church of St. Goar, on the Rhine, was dedicated to him in 1768. See Hoefler, *Nouv. Biog. Générale*, xx, 859. (J. N. P.)

**Goat**, an animal of the genus *Capra*, found in every part of the world, and easily domesticated. There are various names or appellations given to the goat in the original text of the Scriptures. See **CATTLE**.

1. Most frequently  $\text{זֵּב}$ , *ez*, generally said to denote the *she-goat* (as it is rendered in *Gen.* xv, 9; xxx, 35; xxxi, 38; xxxii, 14; *Numb.* xv, 27), and in several passages undoubtedly so used (*Gen.* xxxi, 38; xxxii, 14; *Numb.* xv, 27; *Prov.* xxvii, 27); but it is equally certain that it is used also to denote the *he-goat* (*Exod.*

xii, 5; *Lev.* iv, 23; *Numb.* xxviii, 15; *2 Chron.* xxix, 21; *Dan.* vii, 5, 8, etc.), which the etymology would seem to show was the original sense. In most of the passages in which it occurs it may denote either the male or the female animal (*Gen.* xxvii, 16; xxx, 32, 33; xxxvii, 31; *Lev.* i, 10; iii, 12; vii, 23; xxii, 19; *1 Sam.* xxv, 2; *1 Kings* xx, 27). It is used also to designate a *kid* (as rendered in *Gen.* xxxviii, 17, 20; *Numb.* xv, 11; *Judg.* vi, 19; xiii, 15, 19; xv, 1; *1 Sam.* xvi, 20 [*1 Kings* xx, 27; *2 Chron.* xxxv, 7]). From this we are led to conclude that properly it is the generic designation of the animal in its domestic state, a conclusion which seems to be fully established by such usages as  $\text{זֵּבֵי הָרִים}$ , *a kid of the goats*,  $\text{זֵּבֵי הָרִים}$ , *a flock of "goats,"* i. e. any of the goat species (*Gen.* xxvii, 9; *Deut.* xiv, 4). Bochart (*Hieroz.* bk. ii, c. 51) derives the word  $\text{זֵּב}$  from  $\text{זָב}$ , *oz*, *strength*; Gesenius and Fürst prefer tracing it up to  $\text{זָבַע}$ , *azaz'*, *to become strong*; in either case the ground-idea is the superior strength of the goat as compared with the sheep; *Syr. ozo*; *Arab. onaz* (where the *n* represents the rejected  $\text{נ}$  of  $\text{זָבַע}$ ); *Phen. oz*, of which *ozza* or *azza* is the feminine form. Whether there is any affinity between this and the Sansc. *ága*, fem. *agá*, Gr. *αἴζ*, *αἴζος*, Goth. *gaitan*, and our *goat*, may be doubted. In the Sept.  $\text{זֵּב}$  is usually represented by *αἴζ*, in a few instances by *εἰρηός*; and when  $\text{זֵּבֵי הָרִים}$  is used elliptically to denote *goat's hair* (as in *Exod.* xxvi, 7; xxxvi, 14; *Numb.* xxxi, 20), the Sept. renders *σκήτινος, τρίχινος*, or *αἰγίως*; in *1 Sam.* xix, 13 it gives the strange rendering *ἦπαρ τῶν αἰγῶν*, reading  $\text{בְּבֵרִי}$  (comp. *Joseph. Ant.* vi, 11, 4). See **BOLSTER**.

2. The next most frequent term is  $\text{אַתּוּד'$ , which is used only in the plur.  $\text{אַתּוּדִים}$ . In the *A.V.* it is translated sometimes "rams" (*Gen.* xxxi, 10, 12), often "he-goats" (*Numb.* vii, 17-18; *Psa.* l, 9; *Isa.* i, 11; *Jer.* li, 40; *Ezek.* xxxiv, 17), but usually simply "goats" (*Deut.* xxii, 14; *Psa.* l, 13; *Isa.* i, 15; *Prov.* xxvii, 26; *Isa.* xxxiv, 6; *Ezek.* xxvii, 21; xxxix, 18; *Zech.* x, 3). The singular occurs frequently in Arabic *atud*, and is defined in the *Kanús* as a young goat of a year old (Bochart, *Hieroz.* bk. ii, ch. 53, p. 646, where other authorities are adduced). The name is derived from  $\text{אַתּוּד'$ , *atud'*, *to set, place, prepare*, and hence Bochart infers it describes the animal as fully grown, and so prepared for all its functions and uses; Gesenius, a goat four months old; while others think no more is implied by the name than that this animal was strong and vigorous. The *attudim* were used in sacrifice (*Psa.* lxxvi, 15), and formed an article of commerce (*Ezek.* xxxvii, 21; *Prov.* xxvii, 26). In *Jer.* i, 8, the word is employed for the leaders of a flock ("chief ones"); and in *Isa.* xiv, 9, and *Zech.* x, 3, it is used metaphorically for princes or chiefs. See **HE-GOAT**.

3.  $\text{גִּדִּי}$ , *gadi'*, is the young of the goat, a *kid*. The name is derived by Fürst from the obsolete verb  $\text{גָּדַח}$ , *gadach'*, *to cast forth*, so that it is equivalent to the Latin *fatus*, but was afterwards restricted to one kind, that of the goat. Gesenius traces it to  $\text{גָּדַח}$ , *gadach'*, *to crop*, and supposes the name was given to it from its cropping the herbage. Both etymologies are purely conjectural. The phrase  $\text{הַגִּדִּים הַזֵּבִים}$ , *gadi' kid of the goats*, is frequently used. See above. The reason of this Kinchi finds in the generic sense of  $\text{גִּרִּי}$ , as applicable originally to the young either of the sheep or goat, so that it required the addition of  $\text{הַזֵּבִים}$  to specialize its meaning, until it came by usage to denote only the latter. Ibn-Ezra thinks the addition was made because the *gadi'*, being yet tender, could not be separated from its mother. The flesh of the kid was esteemed a delicacy by the Hebrews (*Gen.* xxvii, 9, 14, 17; *Judg.* vi, 19; xiii, 15, etc.).—Kitto. See **KID**.

4. שַׁיִר, *sa'ir'*, signifies properly a *he-goat*, being derived from שָׁרַף, *to bristle*, i. e. the *shaggy* ("he-goat," only 2 Chron. xxix, 23; "goat," in Lev. iv, 24; ix, 15; x, 16; xvi, 7-27; Numb. xxviii, 22; xxix, 22-38; Ezek. xlili, 25; "satyr," in Isa. xlii, 21; xxxiv, 14; "devil," in Lev. xvii, 7; elsewhere "kid"). It occurs frequently in Leviticus and Numbers (שַׁיִר הַחַטָּאת), and is the goat of the sin-offering (Lev. ix, 3, 15; x, 16). The word is used as an adjective with שַׁיִר in Dan. viii, 21, "—and the goat, the rough one, is the king of Javan," and also in Gen. xxvii, 11, 23, "a hairy man." See SATYR. The fem. שַׁיִרָה, *se'irah'*, a *she-goat*, likewise occurs ("kid," Lev. iv, 28; v, 6). See SACRIFICE.

5. צִפְּרִי, *tsaphir'*, occurs in 2 Chron. xxix, 21, and in Dan. viii, 5, 8; it is followed by צִפְּרִיִּים, and signifies a "*he-goat*" of the goats. Gesenius derives it from צָפַר, *tsaphar'*, *to leap*, indicative of the sex. It is a word found only in the later books of the O. T. In Ezra vi, 17, we find the Chald. form of the word, *tsaphir'*.

6. יָגִישׁ, *ta'gish*, a *buck*, is from a root יָרַשׁ, *to strike*. It is invariably rendered "he-goat" (Gen. xxx, 35; xxxii, 15; Prov. xxx, 31; 2 Chron. xvii, 11).

7. In the N. T. the words rendered *goat* in Matt. xxv, 32, 33, are *ἔρμφος* and *ἐρίφων* = a young goat or *kid*; and in Heb. ix, 12, 13, 19, and x, 4, *τράγος* = *he-goat*. *Goat-skins*, in Heb. xi, 37, are in the Greek *αἴγια ἄφρατα*; and in Judg. ii, 17, *αἴγες* is rendered *goats*.

8. For the undomesticated species several Heb. terms are employed: (1.) צִבְּרִי, *ya'al'*, only in the plur. צִבְּרִים, *will* or *mountain goats*, rendered "wild goats" in the passages of Scripture in which the word occurs, viz. 1 Sam. xxiv, 2; Job xxxix, 1; and Psa. civ, 18.

The word is from a root צָבַר, *to ascend* or *climb*, and is the Heb. name of the *ibex*, which abounds in the mountainous parts of the ancient territory of Moab. In Job xxxix, 1, the Sept. have *τραγελάφου πέρραι*. In Prov. v, 19, the fem. צִבְּרָה, *yaalah'*, "roe" occurs. See ROE. (2.) אֶקֶז, *akko'*, rendered *wild goat* in Deut. xiv, 5, and occurs only in this passage. It is a contracted form of אֶנְקִיָּה, according to Lee, who renders it *gazelle*, but it is probably larger, more nearly approaching the *tragelaphus* or *goat-deer* (Shaw, *Supplement*, p. 76).—Smith, s. v. See WILD GOAT.

9. Other terms less directly significant of this animal are, (1.) שִׁפְיָה, *chasiph'*, a *flock*, i. e. little flock: "two little flocks of kids" (1 Kings xx, 27); and (2.) שֵׁה, *seh*, one of the *flock* of sheep and goats mixed (Lev. xxii, 28, and frequently "goat" or "kid" in the margin). See FLOCK.

10. For the אֶזְזֵל, *Azazel* ("scape-goat," Lev. xvi, 8, 10, 26), see AZAZEL.

The races either known to or kept by the Hebrew people were probably, 1. The domestic Syrian long-eared breed, with horns rather small and variously bent; the ears longer than the head, and pendulous; hair long, often black. 2. The Angora, or rather Anadoli breed of Asia Minor, with long hair, more or less fine. 3. The Egyptian breed, with small spiral horns, long brown hair, very long ears. 4. A breed from Upper Egypt, without horns, having the nasal bones singularly elevated, the nose contracted, with the lower jaw protruding the incisors, and the female with udder very low, and purse-shaped.—Kitto.

There appear to be two or three varieties of the

Long-eared Syrian Goat.

common goat (*Hircus agagrus*) at present bred in Palestine and Syria, but whether they are identical with those which were reared by the ancient Hebrews it is not possible to say. The most marked varieties are the Syrian goat (*Capra Mambrica*, Linn.), with long, thick, pendent ears, which are, says Russell (*Nat. Hist. of Aleppo*, ii, 150, 2d edit.), a foot long, and the Angora goat (*Capra Angorensis*, Linn.), with fine long hair. The Syrian goat is mentioned by Aristotle (*Hist. An.* ix, 27, § 3). There is also a variety that differs but little from British specimens. Goats have from the earliest ages been considered important animals in ru-

Common Syrian Goat.

ral economy, both on account of the milk they afford and the excellency of the flesh of the young animals. The goat is figured on the Egyptian monuments (see Wilkinson's *Ancient Egypt*, i, 223). Col. Ham. Smith (Griffiths, *An. King*, iv, 308) describes three Egyptian breeds: one with long hair, depressed horns, ears small and pendent; another with horns very spiral, and ears longer than the head; and a third, which occurs in Upper Egypt, without horns.—Smith.

Besides the domestic goats, Western Asia is possessed of one or more wild species—all large and vigorous mountain animals, resembling the ibex or bouquetin of the Alps. Of these, Southern Syria, Arabia, Sinai, and the borders of the Red Sea contain at least one species, known to the Arabs by the name of *Beden* or *Beddan*, and *Taytal*—the *Capra Jela* of Ham. Smith, and *Capra Sinaïtica* of Ehrenberg. We take this animal

to be that noticed under the name of *בָּזָז*, *yaal* or *jaal* (1 Sam. xxiv, 2; Job xxxix, 1; Psa. civ, 18; Prov. v, 19). The male is considerably taller and more robust than the larger he-goats, the horns forming regular curves backwards, and with from 15 to 24 transverse elevated cross-ridges, being sometimes near three feet long, and exceedingly ponderous: there is a beard under the chin, and the fur is dark brown; but the limbs are white, with regular black marks down the front of the legs, with rings of the same color above the knees and on the pasterns. The females are smaller than the males, more slenderly made, brighter rufous, and with the white and black markings on the legs not so distinctly visible. This species live in troops of 15 or 20, and plunge down precipices with the same fearless impetuosity that distinguishes the ibex. Their horns are sold by the Arabs for knife handles, etc.; but the animals themselves are fast diminishing in number. See **IBEX**.

Wild Goat of Sinai.

In Deut. xiv, 5, *בָּזָז*, *akko* is translated "wild goat." Schultens (*Origines Hebraice*) conjectures that the name arose from its shyness, and Dr. Harris points out what he takes to be a confirmation of this conjecture in Shaw's travels, who, from the translations of the Sept. and Vulgate, makes it a goat-deer or tragelaphus, under a mistaken view of the classification and habitat of that animal. *Akko*, therefore, if it be not a second name of the zemer, which we refer to the kebsch, or wild sheep [see **CHAMOIS**], as the species must be sought among ruminants that were accessible for food to the Hebrews, we should be inclined to view as the name of one of the gazelles, probably the alu (*Ant. Subgutturosa*), unless the Abyssinian ibex (*Capra Walie*) had formerly extended into Arabia, and it could be shown that it is a distinct species.—Kitto. See **WILD GOAT**.

From very remote antiquity goats have formed an important part of pastoral wealth in the East. They are not mentioned by name in the enumeration of Abram's possessions (Gen. xii, 16), nor in those of Job (Job i, 3; xlii, 12); but perhaps they are included under the generic term of "flocks," which Lot (Gen. xiii, 5), and, *à fortiori*, Abram possessed; and a she-goat formed part of the sacrifice offered by Abram on the occasion of the promise of Isaac (Gen. xv, 9). In the account of the miraculous increase of Jacob's cattle (Gen. xxxi, 10, 12) we find goats conspicuously mentioned. Their milk has always constituted an important article of food in Palestine (Kitto, *Pict. Palestine*, ii, 304).—Fairbairn. Goats were extensively reared among the Israelites (Lev. iii, 12; ix, 15; Exod. xii, 5, etc.); their milk was used as food (Prov. xxvii, 27); their flesh was eaten (Deut. xiv, 4; Gen. xxvii, 9); their hair was used for the curtains of the tabernacle (Exod. xxvi, 7; xxxvi, 14) and for stuffing bolsters (1 Sam. xix, 13); their skins were sometimes used as clothing (Heb. xi, 37).—Smith. Notwithstanding the offensive lasciviousness which causes it to be significantly sep-

arated from sheep, the goat was employed by the people of Israel in many respects as their representative. It was a pure animal for sacrifice (Exod. xii, 5), and a kid might be substituted as equivalent to a lamb: it formed a principal part of the Hebrew flocks, and both the milk and the young kids were daily articles of food. Among the poorer and more sober shepherd families, the slaughter of a kid was a token of hospitality to strangers, or of unusual festivity; and the prohibition, thrice repeated in the Mosaic law, "not to seethe a kid in its mother's milk" (Exod. xxiii, 19; xxxiv, 26; and Dent. xiv, 21), may have originated partly in a desire to recommend abstemiousness, which the legislators and moralists of the East have since invariably enforced with success, and partly with a view to discountenance a practice which was connected with idolatrous festivals, and the rites they involved. It is from goatskins that the leathern bottles to contain wine and other liquids are made in the Levant. For this purpose, after the head and feet are cut away, the case or hide is drawn off the carcass over the neck, without opening the belly; and the extremities being secured, it is dried with the hair in or outside, according to the use it is intended for. The old worn-out skins are liable to burst: hence the obvious propriety of putting new wine into new bottles (Matt. ix, 17). Harmer (*Obs.* iv, 162) appears to have rightly referred the allusion in Amos iii, 12 to the long-eared race of goats: "As the shepherd taketh out of the mouth of the lion two legs or a piece of ear, so shall the children of Israel be taken out that dwell in Samaria and Damascus."—Kitto. The passage in Cant. iv, 1, which compares the hair of the beloved to "a flock of goats that eat of Mount Gilead," probably alludes to the fine hair of the Angora breed. In Prov. xxx, 31, a he-goat is mentioned as one of the "four things which are comely in going;" in allusion, probably, to the stately march of the leader of the flock, which was always associated in the minds of the Hebrews with the notion of dignity. Hence the metaphor in Isa. xiv, 9, "all the chief ones (margin, "great goats") of the earth." So the Alexandrine version of the Sept. understands the allusion *καὶ τράγος ἠγορήμενος αἰπόλιον* (comp. Theoc. *Id.* viii, 49; Virgil, *Ecl.* vii, 7).—Smith. Goats, from their offensiveness, mischievous and libidinous disposition, etc., are symbols of the wicked, who are, at the day of judgment, to be finally separated from the good (Matt. xxv, 23).—Weniyss. See **SHEEP**.

From Lev. xvii, 7, it appears that the rebellious Hebrews, while in the desert, fell into the idolatrous worship of the *he-goat* (rendered "*dev's*," comp. 2 Chron. xi, 15), after the example of the Egyptians, under whose influences they had grown up. Herodotus says (i, 46) that at Mendes, in Lower Egypt, both the male and female goat were worshipped; that the god Pan had the face and thighs of a goat; not that they believed him to be of this figure, but because it had been customary to represent him thus. They paid divine honors, also, to real goats, as appears in the table of Isis. The *Sairim* ("wild beasts") of Isa. xiii, 21 were, according to the popular notion, supposed to be wild men [see **APE**] in the form of he-goats, living in unfrequented, solitary places, and represented as dancing and calling to each other.—Calmet. See **SPECTRE**.

A he-goat was the symbol of the Macedonian empire in the prophetic vision of Daniel (chap. viii, 5)—a

Coin of Archelaus, king of Macedon.

goat that had a notable horn between his eyes. It is interesting to know that this was the recognised symbol of their nation by the Macedonians themselves.

There are coins of Archelaus, king of Macedonia (B.C. 413), having as their reverse a one-horned goat; and there is a gem in the Florentine collection, on which are engraved two heads united at their occiputs, the one that of a ram, the other that of a one-horned goat. By this is expressed the union of the Persian and

Perso-Macedonian Gem.

Macedonian kingdoms, and Mr. T. Combe, who gives us the information, thinks that "it is extremely probable that the gem was engraved after the conquest of Persia by Alexander the Great" (Taylor's *Cabinet*, ii, 83 sq.). See MACEDONIA.

GOATS' HAIR (Heb. *goats* simply; see above) was used by Moses in making the curtains of the tabernacle (Exod. xxv, 4), and, from what we now know of it, seems to have been particularly suitable. The hair of the goats of Asia, Phrygia, and Cilicia, especially of the Angora breed, which is at the present day manufactured into stuffs, is very bright and fine, and hangs to the ground; in beauty it almost equals silk, and is never sheared, but combed off. The shepherds carefully and frequently wash these goats in rivers, and the women of the country spin the hair; it is then worked and dyed. The natives attribute the quality of the hair to the soil of the country. (See a treatise on the *Pastoral Life and Manufactures of the Ancients*, N. Y. 1845, chap. iv.) "The Cashmere breed has long been celebrated as the source from which are obtained those elegant Indian shawls which fetch so high a price in Europe. It is carried on men's backs over the ridges of the Himalayas, across frightful precipices, along narrow ledges over sharp, snow-covered peaks climbed by wooden ladders, across rattling canebidges over foaming torrents, until it arrives, loaded with extortionate taxes, at Cashmere, where the shawls are woven. Thence they are sent by mountain roads similarly beset with dangers and difficulties, and subject at every step to extortionate tribute, into Europe, either through Turkey, or over the Caucasus through Russia" (Fairhairn). See TENT.

GOAT, SCAPE. See SCAPE-GOAT.

GOAT, WILD. See WILD GOAT.

Go'ath (or, rather, GOAH', גֹּאֵה, a *lowing*; the final ה being local in גֹּאֵה־הַ, "to Goath," Sept. ἡ ἐκλεκτὴν λίθων; Vulg. *Goutha*), a place in the vicinity of Jerusalem, mentioned only in Jer. xxxi, 39 as lying beyond "the hill Gareb," in the compass of the city from between the corner-tower (on the north-west) and the valley of Tophet (on the south); hence, perhaps, some eminence on the western bank of the valley of Gihon. See JERUSALEM. In accordance with the etymology is the rendering of the Targum, which has for Goah גֹּאֵה־הַ = the heifer's pool. The Syriac, on the other hand, has *leromto*, "to the eminence," perhaps reading גֹּאֵה (Fürst, *Handb.* p. 269 b). Barclay (*City of Great King*, p. 118) essentially agrees with the above location, although he seeks to identify the name with *Golgotha* (p. 78), which is forbidden by the presence of the ך in *Goah*, and other philological considerations. See GOLGOTHA.

Gob (Heb. גֹּב, גֹּבִי, a *pit*; Sept. Γόβ v. r. Γέβ and Γόμ, Vulg. *Gob*), the scene of two of David's encounters with the Philistines, in the former of which Sibbechai slew the giant Saph, and in the latter Elhanan slew the brother of Goliath (2 Sam. xxi, 18, 19). In the parallel passage (1 Chron. xx, 4) it is called by its more usual name GEZER (see Schwarz, *Palest.* p. 131); and this, as well as the omission of any locality for the second event, is supported by Josephus (*Ant.* vii, 12, 2). On the other hand, some copies of the Sept. and the Syriac have *Gath* in the first case, a name which in Hebrew much resembles Gob; and this appears to be borne out by the account of a third and subsequent fight, which all agree happened at Gath (2 Sam. xxi, 20; 1 Chron. xx, 6), and which, from the terms of the narrative, seems to have occurred at the same place as the others. The suggestion of Nob—which Davidson (*Hebr. Text.*) reports as in many MSS., and which is also found in the Compl. ed. of the Sept.—is not admissible, on account of the situation of that place. See DAVID.

Gob. See LOCUST.

Gobel, JEAN BAPTISTE JOSEPH, a Roman Catholic bishop of France, was born in 1727 at Thann, in Upper Alsace. He was educated in the Collegium Germanicum in Rome, became canon at Porentruy, Switzerland, and in 1772 bishop in part. of Lydda, and coadjutor of the bishop of Basle. In 1789 he went as a delegate of the clergy to the *États Généraux*, allied himself with the Jacobins, became constitutional bishop of Paris, Upper Marne and Upper Rhine, voted on November 7, 1793, for the abolition of Christianity, and laid down his ecclesiastical dignities in the hands of the Convention. Having fallen into disfavor with Robespierre, he was executed April 13, 1794. (A. J. S.)

Goblet (גֹּבֵל, *aggul*, prop. a *trough* for washing garments, hence a *laver*; Cant. vii, 2, where it is described as being round; elsewhere a sacrificial "basin," Exod. xxiv, 6, or pensile drinking-"cup," Isa. xxii, 24). In form and material these utensils were probably like those found in the Egyptian ruins, some being of gold or silver, others of bronze, porcelain, and even wood. See BOWL; BASIN, etc.

Ancient Egyptian Goblets and Vases.

Gobolitis. See GEBAL.

Goch, JOHN OF, more properly *John Pupper*, was born in the little city of Goch in the beginning of the 15th century. Dissatisfied with the Church of Rome, he, like some others at that time, wished for a reformation, and insisted on the free use of the Scriptures. There is no accurate history of his life; all that is known is that he established an order of canonesses at Mechlin in 1451, attempted to introduce reform in the convents of that place, and for twenty-four years acted as father confessor of the deaconesses at Thabor. He died March 28, 1475. He was a man of great piety, and, though less vigorous than his friend Wessel, he was a better theologian than Thomas à Kempis. His principal works are, *De libertate christiana*, edited by Corn. Grapheus (Antw. 1521), and *Dialogus de quatuor erroribus circa legem evangelicam exortis*, in Walch's *Monumenta mediæ ævi*. The writings of Goch contain many reformatory ideas. He demanded that the Bi-

ble should chiefly be explained by itself, and laid great stress on love, on living piety, and especially on evangelical freedom. As an obstacle to the latter, he regarded the episcopal dignity, with its hierarchical elevation, above the priestly, which, in his opinion, was the highest in the Church. An excellent sketch of Goch, and of his relations to theology and Church reform, is given by Ullmann, *Reformers before the Reformation*, i, 17-157; Herzog, *Real-Encyclop.* v, 220 sq.

**God**, from the same Saxon root as *good*, thus beautifully expressing the divine benignity as the leading attribute of the most general term for the Deity, and corresponding almost invariably to two Hebrew words, both from a common root (עָזַר, *ul*, to be strong). Hengstenberg, however, regards the simpler of these words (אֱלֹהִים, *El*) as a primitive (*Auth. of Pent.* i, 251), while some consider the extended form (אֱלֹהֵינוּ, *Elo'üh*) as derived from a different root (the obsolete אֱלֹהִים, found in Arabic = to worship). The corresponding Shemitic terms are: Arabic, *Al* or *Allah* (q. v.); Syriac, *Ilo* or *Eloho*; Samar. *El* or *Chilah* (=powerful; Castell, in Walton's Polyglot Bible, vi, s. v.); Phœnician *El* (עֵל or אֵל), as in En-el (Ἐνυλος, Γαγελ (Gagilus, Γαγίμ), Ἐνοεῖμ (Sanchon.). See ALMIGHTY.

The only other Hebrew word generally employed in naming the Supreme Being is *Jehovah*, יְהוָה, which some (so Hävernick, *Historische-critische Einleitung ins alte Testament*, Berlin, 1839) propose to point יְהוֹה, *Jahveh*, meaning "the Existing One," holding that *Elohim* is used merely to indicate the abundance and super-richness contained in the Divine Being. With such, therefore, *Jehovah* is not of the same origin as the heathen *Jove*, but of a strictly peculiar and Hebrew origin. Both names are used by Moses discriminately, in strict conformity with the theological idea he wished to express in the immediate context; and, pursuing the Pentateuch nearly line by line, it is astonishing to see that Moses never uses any of the names at mere random or arbitrarily, but is throughout consistent in the application of the respective terms. *Elohim* is the abstract expression for absolute Deity apart from the special notions of unity, holiness, substance, etc. It is more a philosophical than devotional term, and corresponds with our term *Deity*, in the same way as *state* or *government* is abstractly expressive of a king or monarch. *Jehovah*, however, seems to be the revealed *Elohim*, the Manifest, Only, Personal, and Holy *Elohim*: *Elohim* is the Creator, *Jehovah* the Redeemer, etc. See **Jehovah**.

The translators of the Eng. A. V. have invariably translated this last Hebrew word by "Lord," which is printed in those passages in small capitals in our common Bibles, but whenever the two words which they thus render occur together, *Adonai-Jehovah*, the latter is rendered "God," in order to prevent the repetition of "Lord." The Greek has θεός (either with or without the art.). Jerome and the Rabbins enumerate ten Heb. words as meaning *God*; but they relate rather to his attributes. See **Lord**.

I. *Usage of the Hebrew terms properly rendered "God."*

1. אֱלֹהִים, *El*. This term is used in the most general way as a designation of Deity, whether of the true God or of the false gods, even the idols, of the heathen. In the latter reference it occurs Isa. xlv, 10, 15; xlv, 20; xlv, 6; and in the plur. אֱלֹהִים, *E'im'*, Exod. xv, 11; Dan. xi, 36; though in both these last instances it may be questioned whether the word is not used in the sense of *mighty ones*. To render the application of the term in this reference more specific, such epithets as אֲחֵרִים, *other, foreign* (Exod. xxxiv, 14), קָדְוִים, *strange, hostile* (Psa. lxxx, 10), קְדָוִים, *strange* (Deut. xxxii, 12), are used. When used of the true God, אֱלֹהִים is

usually preceded by the article (אֱלֹהֵינוּ, Gen. xxxi, 13; Deut. vii, 9), or followed by such distinctive epithets as אֱלֹהֵינוּ, *Almighty* (Exod. vi, 3); אֱלֹהֵינוּ, *eternal* (Gen. xxi, 33; Isa. xl, 28); אֱלֹהֵינוּ, *Supreme* (Gen. xv, 18); אֱלֹהֵינוּ, *living* (Josh. iii, 10); אֱלֹהֵינוּ, *mighty* (Isa. ix, 5); or such qualifying adjuncts as קְבוֹדוֹ, *of glory* (Psa. xxxix, 3); אֱמֶתוֹ, *of truth* (Psa. xxxi, 6); נִקְמָתוֹ, *of retributions* (Jer. li, 56); אֱלֹהֵינוּ, *of Bethel* (Gen. xxxi, 13). אֱלֹהֵינוּ, *of Israel* (Gen. xxxiii, 20); אֱלֹהֵינוּ (Deut. xxxiii, 26). In poetry אֱלֹהֵינוּ sometimes occurs as a sign of the superlative; as אֱלֹהֵינוּ, *hills of God, very high hills* (Psa. xxxvi, 7); אֱלֹהֵינוּ, *cedars of God* (lxxx, 11). The phrase אֱלֹהֵינוּ occurs Psa. xxix, 1; lxxxix, 7; and is supposed by some to refer to *angels*; but others take אֱלֹהֵינוּ here for אֱלֹהֵינוּ, and translate *Sons of the mighty* (see Rosenmüller, ad loc.). There is no instance of אֱלֹהֵינוּ in the singular being used in the sense of *mighty one* or *hero*; for even if we retain that reading in Ezek. xxxi, 11 (though thirty of Kennicott's codices have the reading אֱלֹהֵינוּ, and the probability is that in those which present אֱלֹהֵינוּ the ה is implied), the rendering "God of the nations" may be accepted as conveying a strong but just description of the power of Nebuchadnezzar, and the submission rendered to him; compare 2 Cor. iv, 4. In proper names אֱלֹהֵינוּ is often found sometimes in the first member of the compound word, e. g. אֱלֹהֵינוּ, *Elijah*, אֱלֹהֵינוּ, *Eldad*, etc., and sometimes as the last member, e. g. אֱלֹהֵינוּ, *Samuel*; אֱלֹהֵינוּ, *Lemuel*; אֱלֹהֵינוּ, *Tabeel*, etc. See **El**.

2. אֱלֹהֵינוּ, *Elo'üh*, plur. אֱלֹהֵינוּ, *Elohim'*. The singular form occurs only in poetry, especially in Job, and in the later books, such as Daniel, Nehemiah, and Chronicles. It is used as well of idol deities as of the true God (Dan. xi, 37, 38; Habak. i, 11; Deut. xxxii, 15; Psa. l, 22; Habak. iii, 3, etc.); once in the former case with the addition of אֱלֹהֵינוּ (Dan. xi, 39), and in the latter with that of אֱלֹהֵינוּ (Psa. cxiv, 7). The more common usage is that of the plural. This pervades all the books of the Old Test., from the earliest to the latest. Thus it is used principally of the true God, and in this case frequently with the article prefixed (Gen. v, 22; vi, 9, 11; xvii, 18), as well as with such adjuncts as אֱלֹהֵינוּ (Neh. i, 4), or with the addition of אֱלֹהֵינוּ (Gen. xxiv, 3); אֱלֹהֵינוּ (Isa. lxxv, 16); אֱלֹהֵינוּ (Psa. iv, 2); אֱלֹהֵינוּ (Amos iii, 13), etc. When the relation of Israel to God is to be indicated, the phrases *God of Israel, Jacob, Abraham* are used (Ezek. v, 1; Psa. xx, 2; xlvii, 10, etc.); and in this case, as the term *Elohim* is equivalent in effect to *Jehovah*, it is often used interchangeably with that term; thus Moses, who is designated אֱלֹהֵינוּ, *Ebed-Jehovah* (Deut. xxxiv, 5), is called in the same sense אֱלֹהֵינוּ, *Ebed-Elohim* (Dan. ix, 11); and the same object is designated indifferently אֱלֹהֵינוּ, *Ruach-Jehovah*, and אֱלֹהֵינוּ, *Ruach-Elohim* (comp. Judg. iii, 10, and Exod. xxxi, 3, etc.). Not unfrequently the two terms are combined (Lev. xviii, 2, 4, etc.; xix, 2, etc.; 2 Sam. v, 10; 1 Kings i, 36; xiv, 13; Psa. xviii, 29, etc.). Most commonly, however, they are used distinctively, with respect, probably, to the difference between their primary meanings (see Hengstenberg, *Auth. d. Pent.* i, 181 sq.). In the Pentateuch this discriminative usage has given ground for certain hypotheses as to the composition of that work. See **Pentateuch**. In the earlier historical books, *Jehovah* is more frequently used than *Elohim*; in Job, *Jehovah* is more frequently used in the poetical, *Eloah* or *Elohim* in the prosaic portions; in the Psalms, sometimes the one,

sometimes the other predominates, and this has been thought to afford some criterion by which to judge of the age of the psalm, the older psalms being those in which Elohim is used; in Proverbs it was chiefly Jehovah; in Ecclesiastes, Daniel, and Jonah, almost exclusively Elohim, and in the other prophets chiefly Jehovah. Elohim is also used of idol deities or false gods, because these are worshipped as if they were God (Exod. xix, 20; xxxii, 31; Josh. xxiv, 20; Jer. ii, 11; Jonah i, 5, etc.); and, like El, it is used as a superlative (Psa. lxxviii, 16; lxx, 10, etc.). Kings and judges, as the vicegerents of Deity, or as possessing a sort of representative majesty, are sometimes called *Elohim* (Psa. lxxxii, 1, 6; Exod. xxi, 6; xxii, 8). Whether the term is used of *angels* may be made matter of question. This is the rendering given to אֲלֹהִים by the Sept., Vulg., Targ., Syr., etc., in Gen. iii, 5; Psa. viii, 6; lxxxii, 1, 6; xxvii, 7; and cxxxviii, 1; but in the majority of these instances there can be little doubt that the translators were swayed by mere dogmatical considerations in adopting that rendering; they preferred it because they avoided thus the strongly anthropomorphic representation which a literal rendering would have preserved. In all these passages the proper signification of אֲלֹהִים may be retained, and in some of them, such as Gen. iii, 5; Psa. lxxxii, 1, 6, this seems imperatively required. In Psa. viii, 6 also the rendering "angels" seems excluded by the consideration that the subject of the writer is the grace of God to man in giving him *dominion over the works of his hands*, in which respect there can be no comparison between man and the angels, of whom nothing of this sort is affirmed. In Psa. xxvii, 7, the connection of the last clause with what precedes affords sufficient reason for our giving Elohim its proper rendering, as in the A. V. That the author of the epistle to the Hebrews should have adopted the Sept. rendering in citing these two passages (ii, 7; i, 6), cannot be held as establishing that rendering, for, as his argument is not affected by it, he was under no call to depart from the rendering given in the version from which he quotes. But, though there be no clear evidence that Elohim is ever used in the sense of angels, it is sometimes used vaguely to describe unseen powers or superhuman beings that are not properly thought of as divine. Thus the witch of Endor saw "Elohim ascending out of the earth" (1 Sam. xxviii, 13), meaning thereby some beings of an unearthly, superhuman character. So also in Zech. xii, 8 it is said, "The house of David shall be as Elohim, as the angel of the Lord," where, as the transition from Elohim to the angel of the Lord is a *minori ad majus*, we must regard the former as a vague designation of supernatural powers. Henzenberg would explain Psa. viii, 6 in accordance with this; but the legitimacy of this may be doubted.—Kitto, s. v. See ELOHIM.

On the use or absence of the article with אֱלֹהִים, see Quarry (*Genesis*, p. 270 sq.), who, after an elaborate examination of the subject, sums up the results as the following: "The dispelling of the supposition that any essential difference existed, at least in the earlier books, between Elohim with and without the article—any difference at all, but such as the exigencies of each occasion with respect to sense or grammar would have made in the case of any common appellation; the illustration of the use of the article with particles and prepositions, elucidating many passages of Scripture, and explaining many seeming causes of perplexity; and the establishment of an important characteristic difference as regards the usage in the case of Elohim with or without the article, between the earlier and later books of the sacred canon." See ARTICLE (IN GRAMMAR).

II. The attributes ascribed to God by Moses are systematically enumerated in Exod. xxxiv, 6, 7, though we find in isolated passages in the Pentateuch and

elsewhere additional properties specified, which bear more directly upon the dogmas and principles of religion, such as, e. g. that he is not the author of sin (Gen. i, 31), although since the fall man is prone to sin (Gen. vi, 5; viii, 21, etc.). But, as it was the avowed design of Moses to teach the Jews the unity of God in opposition to the polytheism of the other nations with whom they were to come in contact, he dwelt particularly and most prominently on that point, which he hardly ever omitted when he had an opportunity of bringing forward the attributes of God (Deut. vi, 4; x, 17; iv, 39; ix, 16, etc.; Numb. xvi, 22; xxxiii, 19, etc.; Exod. xv, 11; xxxiv, 6, 7, etc.).

In the prophets and other sacred writers of the Old Testament these attributes are still more fully developed and explained by the declarations that God is the first and the last (Isa. xlv, 6); that he changes not (Hab. iii, 6); that the earth and heaven shall perish, but he shall endure (Psa. cii, 26)—a distinct allusion to the last doomsday—and that he is omnipresent (Prov. xv, 3; Job xxxiv, 22, etc.).

In the New Testament also we find the attributes of God systematically classified (Rev. v, 12, and vii, 12), while the peculiar tenets of Christianity embrace, if not a further, still a more developed idea, as presented by the apostles and the primitive teachers of the Church (compare Semisch's Justin Martyr, ii, 151 sq., translated by J. E. Ryland, 1843).

The expression "to see God" (Job xix, 26; xlii, 5; Isa. xxxviii, 11) sometimes signifies merely to experience his help; but in the Old-Testament Scriptures it more usually denotes the approach of death (Gen. xxxii, 30; Judg. vi, 23; xiii, 22; Isa. vi, 5). See DEATH.

The term אֱלֹהֵי מֶלֶךְ, "son of God," applies to kings (Psa. ii, 7; lxxxii, 6, 27). The usual notion of the ancients that the royal dignity was derived from God may here be traced to its source: hence the Homeric *εὐωγήμενος βασιλεύς*. This notion, entertained by the Oriental nations with regard to kings, made the latter style themselves *gods* (Psa. lxxxii, 6). אֱלֹהִים בְּנֵי, "sons of God," in the plural, implies inferior gods, angels (Gen. vi, 2; Job i, 6); as also faithful adherents, worshippers of God (Deut. xiv, 1; Psa. lxxxiii, 15; Prov. xiv, 26). אֱלֹהֵי אֱדָוָה, "man of God," is sometimes applied to an angel (Judg. xiii, 6, 8), as also to a prophet (1 Sam. ii, 27; ix, 6; 1 Kings xiii, 1).

When, in the Middle Ages, scholastic theology began to speculate on the divine attributes as the basis of systematic and dogmatic Christianity, the Jews, it appears, did not wish to remain behind on that head, and, collecting a few passages from the Old Testament, and more especially from Isa. xi, 2, and 1 Chron. xxix, 11, where the divine attributes are more amply developed and enumerated, they strung them together in a sort of cabalistic tree, but in reality representing a human figure.—Kitto, s. v. See CABBALA.

III. The Scriptures contain frequent notices of *false gods* as objects of idolatrous worship: 1. *By the Hebrews.* These were of two kinds: a. Adoration of other beings than Jehovah, held as divine (Ehrlen, *De diis et deab. Gentil. in S. S. memoratis*, Argent. 1750; Leusden, *De idolis V. T.* in his *Philolog. Hebr. mixt.* p. 291 sq.; Kalkar, *Udsigt over den idolatr. Cultus som omtales i bibelen*, Odense, 1838 sq.). Such false deities (which are generally identified with their images, Deut. iv, 28 sq.; Psa. cxv, 4 sq.; cxxxv, 15 sq.; 2 Macc. ii, 2; comp. also אֱלֹהֵי אֱדָוָה, *idols*, in passages like 1 Sam. xxxi, 9; Hos. iv, 17) are called אֱלֹהֵי אֱדָוָה, *nothing's* (perhaps a play upon אֱלֹהֵי אֱדָוָה), in the Jewish Church phraseology (Lev. xix, 4; xxvi, 1; comp. Hab. ii, 18), or אֱלֹהֵי אֱדָוָה, *breaths*, i. e. vanities (Jer. ii, 5; viii, 19; xv, 22), אֱלֹהֵי אֱדָוָה, *utter vanities* (Jon. ii, 9; comp. *ἄ μάρανα*, Acts xiv, 15), אֱלֹהֵי אֱדָוָה, *abominations* (1 Kings xi, 5;

2 Kings xxiii, 13); derisively גִּלְגָּלִים, *logs* (Ezek. vi, 4; xiv, 3); their sacred rites גִּלְגָּלִים, *frivolity* (1 Sam. xv, 23; Isa. lxvi, 3), and their whole worship harlotry (Ezek. xxiii; compare גִּלְגָּלִים, and derivatives, in Wiener, *Simonis Lex.* p. 286 sq.), in contrast with which Jehovah is called the *true God* (אֱלֹהֵי יְהוָה, Jer. x, 10 sq.; Dan. vi, 20, 26 [compare גִּלְגָּלִים, Psa. cxvi, 28]; Acts xiv, 15; 2 Cor. vi, 16), the *God of Heaven* (Judith v, 7; compare Jer. x, 11, etc.). Indeed idolatry was reprobated as a capital offence in the Mosaic law, under penalty of extirpation and destruction in the case of the whole people (Lev. xix, 4; Deut. vi, 15; vii, 19; xi, 16 sq.; xxviii, 15 sq.; xxx, 17 sq.; xxxi, 16 sq.; comp. Josh. xxiii, 16; 1 Kings ix, 6 sq.), and stoning for individuals (Exod. xxii, 20; Deut. xvii, 2 sq.; comp. vi, 14 sq.; vii, 16; viii, 19; xiii, 2 sq.; Exod. xx, 3, 23); and the Israelites were admonished in their campaigns utterly to demolish idolatrous images (Exod. xxiii, 24; xxxiv, 13; Deut. vii, 5, 25; xii, 2 sq.; comp. 1 Chron. xiv, 12; 1 Macc. x, 84), and not to tolerate any heathen whatever in their land (Exod. xxiii, 33; Deut. xx, 17), and, furthermore, to shun all connection (even civil and political) with idolatrous nations (Exod. xxiii, 32; xxxiv, 15 sq.; Deut. vii, 1 sq.). Even instigation to idolatry was liable to punishment by death (Deut. xiii, 6 sq.). In spite, however, of these severe statutes, we find the Israelites, not only during the passage through the wilderness and the unsettled period of their polity (Numb. xxv, 2; Deut. xiii, 13; Josh. xxiv, 23; comp. Amos v, 25 sq.), but also under the monarchy, sadly departing from the worship of Jehovah, and addicting themselves to the adoration of Phœnicæo-Philistine-Syrian and Arabico-Sabeæan (in the time of the Maccæes also to Græco-Syrian) deities (see Gramberg, *Religionszûdenk.* i, 436), such as Baal, Ashtaroth, Moloch, Chemosh, Thammuz, etc., and connecting therewith soothsaying and sorcery (Deut. xviii, 10 sq.; comp. Dale, *De divinationib. idolol.* V, T. in his work *De origine et progr. idolol.* p. 363 sq.). See each of these names in its place.

The service rendered to foreign deities was very multiform (Mishna, *Sanhedrim*, vii, 6), but consisted principally of vows (Hos. ix, 10), incense (1 Kings xi 8; 2 Kings xxii, 17; xxiii, 5; Jer. i, 16; vii, 9; xi, 12; xiii, 15; xxxii, 29), bloodless (Jer. vii, 18) and bloody offerings (2 Kings v, 17), including even human beings. See **MOLOCH**. The incense and offerings were presented on high places and hills (Isa. lvii, 7; Jer. ii, 20; iii, 6; xiii, 27; Hos. iv, 13; 1 Kings xi, 7; 2 Kings xxiii, 5; comp. Philostr. *Apoll.* ii, 4; Spanheim, *ad Callim. Del.* 70; see **HIGH PLACE**), on roofs (Jer. xix, 13; xxxii, 29; Isa. lxx, 3), under shady trees (1 Kings xiv, 23; 2 Kings xvi, 4; xvii, 10; Hos. iv, 13; Isa. i, 29; Jer. ii, 20; iii, 13; xvii, 2; 2 Chron. xxviii, 4; Ezek. vi, 13; xx, 28; see **Movers, Phœnic.** p. 577 sq.), also in valleys (Jer. ii, 23; 2 Chron. xxviii, 3) and gardens (Isa. i, 29; lxx, 3). See **GROVE**. The votaries of many of these deities made an offering of their own chastity to them, and illicit commingling of the sexes was a chief element of such cultus. See **BAAL**; **ASTARTE**. Sitting upon graves formed also a part of idolatry, either as a propitiation to the manes or in necromancy (Isa. lxx, 4). Lustration even was not wanting (Isa. lxxi, 17). The priestly castes of these idolatrous systems were numerous (1 Kings xviii, 22; 2 Kings x, 21) and in good station (Hos. x, 5). One kind of them was called *Kemarim* (קִמְרִים), *Zeph.* i, 4; 2 Kings xxiii, 5; a Syriac word, Gesen. *Thes.* p. 693; Mishna, *Megil.* iv, 9). See **IDOLATRY**.

b. The worship of Jehovah, under the form of any image whatever, was strictly forbidden (Exod. xx, 4; Deut. iv, 16; v, 8; xxvii, 15; comp. Tacit. *Hist.* v, 5). Such symbols as the Golden Calf (q. v.) were borrowed from Egypt (Josh. xxiv, 14; Ezek. xx, 7 sq.). See Ewald, *Isr. Gesch.* ii, 109 sq.; Gerritsen, *Cur Hebræi*

*ante exil. Babyl.* se ad *idolorum et plurium deor. cultum valde pronos ostenderint*, in the *Annal. Acad. Rheno-Traject.* 1822-3, p. 120 sq.; Michaelis, *Mos. Rech.* v, 98 sq.; Otho, *Lex. Rabb.* p. 286 sq. See **IMAGE**.

2. *Idolatry of non-Israelitish Nations.*—See each in its place. This was frequently portrayed by the prophets in all its grossness (1 Kings xviii, 27; comp. Deyling's *Observ.* i, 136 sq.), especially by exhibitions of the (mechanical) construction of these gods (images, Isa. ii, 8, 20; xlv, 10 sq.; Jer. x, 3 sq.; Hos. xiii, 2; Psa. cxv, 4; Baruch vi, 3 sq.; Wisd. xiii, 11 sq.; xv, 7 sq.; compare Philo, ii, 472; Horace, *Sat.* i, 81 sq.; Arnob. iii, 12; vi, 13 sq.; Augustine, *Cir. Del.* vi, 10), and their powerlessness (Isa. xli, 29; xlii, 17; xlv, 1, 2; Jer. ii, 28; compare Deut. iv, 28; xxviii, 36; Psa. cxv, 5 sq.; Hab. ii, 18). The images of the gods (מַצֵּבֹת) were sometimes *cast* (metallic, Judg. xvii, 4; Isa. ii, 20; xl, 19; Hos. xiii, 2), מִצֵּבֹת, *cast*; sometimes *carved* (of wood, Isa. xliv, 13; Jer. x, 3; comp. Pliny, xii, 2; xiii, 17; Pausan. ii, 19, 3), מַצֵּבֹת, *carved* [see **DIANA**], or even moulded of clay (Wisd. xv, 8; Pliny distinguishes "*lignea* et *ficilia* simulacra," xxxiv, 16). They were fastened with chains, so as not to fall down or be carried away (Isa. xli, 7; Jer. x, 4; comp. Pausan. iii, 15, 5; viii, 41, 4; Arnob. vi, 13), and were usually overlaid with gold or silver, and were, besides, richly decked with apparel (Isa. ii, 20; xxx, 22; xxxi, 7; xl, 19; Jer. x, 4; Hos. viii, 4; Baruch xii, 16; compare Douglæi *Analect.* ii, 179 sq.; Bähr, *Symbol.* i, 277 sq.). They were also painted with red (vermillion) color (Wisd. xiii, 14; compare Pliny, xxxiii, 7, 36; xxxv, 12, 45; Virgil, *Ecol.* vi, 22; x, 26 sq.; Plutarch, *Quest. Rom.* 98; Arnob. vi, 10; Bähr, *Symbol.* i, 334). They were taken by armies with them into battle (2 Sam. v, 21; comp. Curtius, viii, 14, 11; Polyæn. vii, 4). Victors were accustomed to carry them about in triumph, in order to despoil the subject nations of their divinities (Isa. x, 10; xxxvi, 19; xxxvii, 12), or to bind them to greater fidelity (Isa. xlv, 1 sq.; Jer. xlviii, 7; xlix, 3; Hos. x, 5; Dan. xi, 8; compare Pausan. viii, 46, 1; see Borchart, *Hieroz.* i, 372; Withof, *Opusc.* p. 143 sq.). The weapons of slain enemies were hung as trophies in the temples of the gods (1 Sam. xxxi, 10; Pausan. i, 13, 3; Xenoph. *Anab.* v, 3, 4; Euseb. *Chron. Arm.* i, 67). Soothsaying and sorcery ever stand in connection with this cultus (Isa. xix, 3).—Wiener, i, 433. See also **MARK IN THE FLESH**.

IV. *The Christian Doctrine of God.*—1. *Source.*—The Christian idea of God is derived from the Scriptures. The statement **GOD IS GOD** suffices for the wants of theology in itself, and is given as a complete proposition in the Scriptures (Exod. iii, 14; Isa. xliii, 12). But the Scriptures afford many indications, not merely as to the character of God, but also as to his nature. The substance of these teachings may be summed up in the statements, God is a Spirit, God is Love, God is Lord. These statements include the idea of an immaterial, intelligent, and free personal Being, of perfect goodness, wisdom, and power, who made the universe and continues to support it, as well as to govern and direct it, by his providence. Dr. Adam Clarke gives the following general statement of the doctrine of the Great First Cause: "The eternal, independent, and self-existent Being; the Being whose purposes and actions spring from himself, without foreign motive or influence; he who is absolute in dominion; the most pure, the most simple, the most spiritual of all essences; infinitely benevolent, beneficent, true, and holy; the cause of all being, the upholder of all things; infinitely happy, because infinitely perfect; and eternally self-sufficient, needing nothing that he has made; illimitable in his immensity, inconceivable in his mode of existence, and indescribable in his essence; known fully only to himself, because an infinite mind can only be fully comprehended by

itself. In a word, a Being who, from his infinite wisdom, can not err or be deceived, and, from his infinite goodness, can do nothing but what is eternally just, and right, and kind." The Christian doctrine of God, in its development, involves the idea of the Trinity: God the Father, God the Son, and God the Holy Ghost. See TRINITY.

2. *Connotation of the term God.*—The word *Θεός*, *God*, taken to signify "an object of religious veneration," was formerly applied to the pretended deities of the heathen, and accordingly *Θεός* and *Deus* were employed by the promulgators of the Gospel when calling on the heathen to transfer their *worship* from their idols to Jehovah. But the word "God" has come to signify in Christian use the Maker and Ruler of the world, and is absolutely and exclusively applied to him. There is "one God" in the Christian sense, and there can be but one. "It is not meant merely that we believe this as a *fact*, but that it is moreover implied in the very meaning we attach to the *word*. And this is a distinction which should always be carefully attended to. The word 'Mohammedan' means nothing more or less than a believer in Mohammed, though the Christian regards Mohammed as having been in fact an impostor, and the Mohammedans regard him as a true prophet; but neither of these is implied (or connoted) by the word 'Mohammedan' when used by a Christian. On the contrary, the word 'God' does imply what has been above stated, as is evident from this: that any one who should deny that there *exists* any such being as a Maker and Governor of the world, would be considered by Christians not only as in error, but as an *Atheist*—as holding that there is *no* God (while whoever should affirm the existence of more than one God would be held to be an idolater); and this not the less though he should admit the existence of some being superior to man, such as the fairies, demons, nixes, etc., which are still feared by the vulgar in almost all parts of Christendom; the genii of the Eastern nations, and the gods and goddesses of the ancient heathens, which were all of this description. None of them was accounted the 'Creator,' and the births of most of them are recorded in their mythology; and altogether the notions entertained of them seem to have been very nearly the same as the vulgar superstitions still prevailing in most parts of Europe relative to the fairies, etc., these being doubtless no other than the ancient heathen deities of those parts, the belief in their existence and dread of their power having survived the introduction of Christianity, though the title of 'gods' has been dropped, as well as the words 'sacrifice' and 'worship' in reference to the offerings, invocations, and other tokens of reverence with which they are still in several places honored. It appears, therefore, that as the ancient heathens denounced the early Christians as Atheists for contemning the heathen deities, so they may be considered as being, in the Christian sense of the word, themselves Atheists (as indeed they are called in Ephes. ii, 12), and that consequently the word 'God,' in the Christian sense and in the heathen, must be regarded as having two meanings. Wide, therefore, of the truth is the notion conveyed in Pope's 'Universal Prayer,' the Pantheism, as it is called, of the ancient heathen philosophers and the Brahmins of the present day, who applied the word God to a supposed soul of the universe:

"Mens agitat molena, et toto se corpore miscet,"

a spirit pervading all things (but not an *agent* or a *person*), and of which the souls of man and brutes are portions. In the Book of Revelation, 'Jehovah, the self-existent and all-perfect Being, with the world which he created and which he is ever ruling, alone meets our view. Though intimately present with all his works, he is yet entirely distinct from them. In him we live, and move, and have our being. He is infinitely high to us, and he is intimately present with us,

while we remain infinitely distant from his all-perfect and incommunicable essence' (Eden).

3. *Can God be known?*—The Scriptures declare that God is invisible (Exod. xxxiii, 20; John i, 18; 1 John iv, 12; 1 Tim. vi, 16, etc.) and unsearchable (Job xi, 7; xxxvii, 23). But the very existence of the idea of God, and even the use of the name God, with its connotation as given above, imply, not indeed that it is possible for man to *comprehend* God, but that it is not impossible to *know* God. And so the Scriptures make it man's duty to become "acquainted with God" (1 Chron. xxviii, 9; Jer. ix, 24; 2 Pet. i, 2; John xvii, 3, etc.). Even Atheists are bound to explain the *res in intellectu* manifested in the thought and language of men. To deny absolutely that God can be known is to deny that he exists; and, on the other hand, the proof, or even the admission that God exists, implies that it can not be absolutely unknown *what* or *how* he is: the knowledge of his existence implies as a necessary condition some knowledge of the mode of his existence, i. e. his power, wisdom, justice, etc. The passages cited above, declaring that God is invisible, etc., are not to be tortured to favor the idea that the human mind is absolutely incapable of knowing God. On the contrary, their purpose is to vindicate the claims of revelation as the source of knowledge of God. The Scriptures teach that God is made known in Christ (1) by his works (Rom. i, 20; 1 Sa. xix, 1, 2); (2) through his Son, which is, in part, his essence. True, God revealed his "glory" to Moses (Exod. xxxiii, 18-23), but the manifestation was given through a medium, or, rather, reflection, making "the goodness" of God to "pass before" Moses. Not sight, but faith, is the condition and means of our knowledge of God in this life (2 Cor. v, 7). God, then, can be known, but only so far as he *gives the knowledge of himself*, and so far as the capacity of man can reach. Johannes Damascenus said truly, "It is not possible to know God altogether; neither is it altogether impossible to know God." To see him with the bodily eyes would be fatal to a sinful creature (see citations above). But there is a dead "knowledge of God" (Rom. i, 21; James ii, 19); and, in contrast with it, there is a living knowledge of God, which includes a spiritual *seeing* of the invisible, the privilege of all who are in vital union with God through faith in his Son (Heb. xi, 27).

*Science* trusts to the functions and laws of the human mind as its instruments for the discovery of truth. But to know the truth, and to recognise the ground and object of phenomena in their connection and unity, is a process which leads invariably to the knowledge of the original and perfect Being; for every science which recognises truth and goodness in the world, in nature and in reason, recognises therewith a power of wisdom and goodness. But as we cannot recognise such a power abstractly, in recognising it at all we recognise the eternal God (Suabedissen, *Metaphysik*, 1836, p. 143). Yet as man, by science, can know the works of God only very imperfectly and incompletely, criticism and skepticism are always the companions of science; and she can be, at best, only the pioneer of true religious knowledge, or its servant. For the true religious knowledge of God is not founded upon science, but upon life—the life of communion with God. In the religious life the consciousness of God is before and apart from all reflection, all speculation; the soul, in its rapid dialectics, under the pressure of religious needs, has no need of syllogism to prove the existence of God. So Tertullian declares (in his *Testimonium Animæ*) that even the common heathen mind, apart from philosophy, reached a truer knowledge of God and of divine things than the heathen mythology and philosophy could teach. Even the Platonic philosophy taught that the longing of the soul for the truth and beauty of goodness leads to a renunciation of the outward and visible in behalf of an apprehension of the spiritual and real. Spiritual Christianity transforms

this teaching into a higher one, viz. that the longing of the soul for God, the search for God in Christ, is always rewarded, and that the "pure in heart" see God with the spiritual eyes of faith. Luther's doctrine that God may be taught, named, and apprehended in Christ, and in Christ *alone*, is quite in harmony with the early theology of the Church (e. g. Clement of Alexandria, *Stromata*, ii). Not that a mere intellectual faith in Christ brings this knowledge of God. With the conversion of the soul begins its new, spiritual capacity to receive and apprehend God; and as the soul is emptied of self and purged from sin by the Holy Spirit, it grows in knowledge of God, in light and love, until the "life of God" becomes the "life of the soul." Dr. Nevin (*Reply to Dornier*, 1869) has the following striking passage as to the specifically Christian conception of God: "There is a sense in which the absolute being of God, as related immediately and directly to our created being, must be considered the necessary ground of our *knowing* him and coming into union with him in the way of religion. The whole possibility of religion for us starts in the God-consciousness, or direct sense of Deity, which is as much a part of our original nature as the sense we have of the world around us or of our own existence. It is not put into us by any outward evidence or argument. It authenticates and necessitates itself as a fundamental fact in our life; and in doing this it certifies, to the same extent, the truth of the object on which it is exercised. Or, rather, we must say, the truth of the object on which it is exercised, which is the Divine Being, or the existence of the Absolute, certifies itself, makes itself sure in and through the consciousness into which it enters. In this sense, the idea of God comes before Christianity, as it comes before religion in every other form. But who will say that this general idea of God can be for us, therefore, the actual root of Christianity, so that any among us, starting with that alone, could ever by means of it come to a full construction of what God is for true Christian faith? It lies at the ground of pantheism, dualism, polytheism, deism, and all false religions, no less than at the ground of Christianity. For the distinctive knowledge of Christianity, then, we need some other specific principle or root, which, however it may be comprehended in the general principle of all religion, must be regarded at the same time nevertheless as the ground and beginning, exclusively and entirely, of religion under this its highest and only absolutely complete form. Where, now, is that principle to be found? Where does the whole world of Christianity, the new creation of the Gospel (life, power, doctrine, and all), take its rise and start? Where do we come to the source of its perennial revelation, the ground of its indestructible life? Where, save in the presence of the Word Incarnate, the glorious Person of him who is the Root and the Offspring of David, the bright and morning Star—the faithful and true Witness, the BEGINNING of the creation of God!"

But *Religion* has had her errors and excesses as well as Science. As the latter seeks in its pride, by purely intellectual effort, to apprehend the absolute, so the former has at certain periods allowed mysticism to take the place of the simple revealed truth as to the life of God in the soul, and, in the spirit of the Oriental theosophy, has called the "redeemed soul but a drop in the ocean of God" (see MYSTICISM). The orthodox Christian doctrine keeps the golden mean between these extremes. It asserts, and has asserted from the beginning, that a real and objective knowledge of God comes only from God's revelation, and that only *κατὰ τὸ ἐκπέπαιον*, *pro virili* (Arist. *De Mund.*), according to the best capacity of man. It teaches not only that God is "incomprehensible," but also that every step taken in the true knowledge of God by the soul makes his "incomprehensibility" more obvious. It does not pretend that the scriptural doctrine of one God in three persons

is perfectly within the scope of the human intellect to comprehend as well as to apprehend; but all Church history shows that a genuine and even scientific knowledge of God has been better maintained *with* the doctrine of the Trinity than without it. When the Arians attacked the Nicene doctrine of the Trinity on the ground that it transcended human reason, the orthodox replied that it was easier to know God by receiving the doctrine of the Trinity than by rejecting it. Naked monotheism, whether in Judaism, Islamism, or elsewhere, has always ended in bald pantheism (q. v.), while on the other hand the Christian doctrine of the Trinity, though stigmatized by infidel and rationalistic opponents as Tritheism, has, from the beginning, preserved in the Church the idea of God as the eternal, spiritual, and personal Being, and has kept up, also, a pure and spiritual worship of the Great Supreme. See Ritter, *Ueber die Erkenntniss Gottes in der Welt*, 1856; Nitzsch, *Syst. d. Christlichen Lehre*, § 7, 60-80; Nitzsch, in Herzog's *Real-Encyclop.* s. v. Gott.

V. *Substance and Mode of the Scripture Teaching.*—"In the Scriptures no attempt is made to *prove* the *existence of a God*. The error of men consisted not in denying a God, but in admitting too many; and one great object of the Bible is to demonstrate that there is but one. No metaphysical arguments, however, are employed in it for this purpose. The proof rests on facts recorded in the history of the Jews, from which it appears that they were always victorious and prosperous so long as they served the only living and true God, Jehovah (the name by which the Almighty made himself known to them), and uniformly unsuccessful when they revolted from him to serve other gods. What argument could be so effectual to convince them that there was no god in all the earth but the God of Israel? The sovereignty and universal providence of the Lord Jehovah are proved by predictions delivered by the Jewish prophets, pointing out the fate of nations and of empires, specifying distinctly their rise, the duration of their power, and the causes of their decline; thus demonstrating that one God ruled among the nations, and made them the unconscious instruments of promoting the purposes of his will. In the same manner, none of the attributes of God are demonstrated in Scripture by reasoning: they are simply affirmed and illustrated by facts; and instead of a regular deduction of doctrines and conclusions from a few admitted principles, we are left to gather them from the recorded feelings and devotional expressions of persons whose hearts were influenced by the fear of God. These circumstances point out a marked singularity in the Scriptures, considered as a repository of religious doctrines. The writers, generally speaking, do not reason, but exhort and remonstrate; they do not attempt to fetter the judgment by the subtleties of argument, but to rouse the feelings by an appeal to palpable facts. This is exactly what might have been expected from teachers acting under a divine commission, and armed with undeniable facts to enforce their admonitions. The sacred writers furnish us with information on the existence and the character of God (1) from the *names* by which he is designated; (2) from the *actions* ascribed to him; and (3) from the *attributes* with which he is invested.

"1. The *names of God* as recorded in Scripture convey at once ideas of overwhelming greatness and glory, mingled with that awful mysteriousness with which, to all finite minds, and especially to the minds of mortals, the divine essence and mode of existence must ever be invested. Though ONE, he is אֱלֹהִים, EL-OHIM, GODS, *persons adorable*. He is יְהוָה, JEHOVAH, *self-existing*; אֱלֹהֵי, EL, *the Mighty, Almighty*; שֵׁנַי, SHADDAI, *omnipotent, all-sufficient*; אֲדֹנָי, ADONAI, *Lord, Ruler, Judge*. These are among the adorable appellatives of God which are scattered throughout the

revelation that he has been pleased to make of himself. But on one occasion he was pleased more particularly to declare his *name*, that is, such of the qualities and attributes of the divine nature as mortals are the most interested in knowing, and to unfold not only his natural, but also those of his moral attributes by which his conduct towards his creatures is regulated: 'And the Lord passed by and proclaimed, The Lord, the Lord God, merciful and gracious, long-suffering, and abundant in goodness and truth, keeping mercy for thousands, forgiving iniquity, transgression, and sin, and that will by no means clear the guilty; visiting the iniquity of the fathers upon the children and upon the children's children unto the third and fourth generation' (Exod. xxxiv). This is the most ample and particular description of the character of God, as given by himself in the Old Testament" (Watson). The name "which is above every name" (Phil. ii, 9), is the name *JESUS* (Col. iii, 17). The name in Exod. iii, 14 is peculiar in denoting God as the "God who reveals himself." The declaration "*I am that I am*," or "*I will be that I will be*," does not so much include a predicate of God as a declaration of the eternal being of God, as *revealing* himself and his kingdom in time; it involves not merely the sense of existence (to which it is limited by the Septuagint version  $\delta\ \acute{\omicron}\nu\varsigma$ ), but also the idea of the continual self-revealing of God, and thus *unifies*, so to speak, all the successive steps and epochs of revelation. He is "*the Alpha and Omega, the beginning and the ending, which is, and which was, and which is to come—the Almighty*" (Rev. i, 8). The name *Jehovah* was too holy to be uttered, and others were substituted for it by the Jews; the fearful penalty for blaspheming it was death (Lev. xxiv, 16; see Clarke's note *ad loc.*). In the names *Father* and *Redeemer* (Isa. lxiii, 16), new elements of the character of the self-revealing *Jehovah* are set forth; he shows himself as the God of grace and love to his people who turn unto him.—Watson, *Institutes*, pt. ii, c. i; Nitzsch, in Herzog's *Real-Encyclop.* s. v. Gott; Hengstenberg, *Die Gottsnamen des Pentateuch*; Knapp, *Theology* (Wood's ed. p. 84); Lange, *On Genesis*, *Introd.* § 7.

2. *Actions*.—The second means by which the Scriptures convey to us the knowledge of God is by the *actions* which they ascribe to him. They contain, indeed, the important record of his dealings with men in every age which is comprehended within the limit of the sacred history, and by prophetic declaration they also exhibit the principles on which he will govern the world to the end of time; so that the whole course of the divine administration may be considered as exhibiting a singularly illustrative comment upon those attributes of his nature which, in their abstract form, are contained in such declarations as those which have been just quoted. (1.) The first act ascribed to God is that of *creation*. By this were manifested: his *eternity* and *self-existence*, as he who creates must be before all creatures, and he who gives being to others can himself derive it from none; his *almighty power*, shown both in the act of creation and in the number and vastness of the objects so produced; his *wisdom*, in their arrangement and in their fitness to their respective ends; and his *goodness*, as the whole tended to the happiness of *sentient* beings. The foundations of his natural and moral government are also made manifest by his creative acts. In what he made out of nothing he had an absolute right and prerogative; it awaited his ordering, and was completely at his disposal; so that to alter or destroy his own work, and to prescribe the laws by which the intelligent and rational part of his creatures should be governed, are rights which none can question. Thus, on the one hand, his character of *Lord* or *Governor* is established, and, on the other, our duty of *lowly homage* and *absolute obedience*. (2.) *Providence*.—Agreeably to this, as soon as man was created he was placed under a rule of conduct. Obedience was to be followed with the continuance of the

divine favor; transgression, with death. The event called forth new manifestations of the character of God. His tender *mercy*, in the compassion showed to the fallen pair; his *justice*, in forgiving them only in the view of a satisfaction to be hereafter offered to his justice by an innocent representative of the sinning race; his *love* to that race, in giving his own Son to become this Redeemer, and in the fulness of time to die for the sins of the whole world; and his *holiness*, in connecting with this provision for the pardon of man the means of restoring him to a sinless state, and to the obliterated image of God in which he had been created. Exemplifications of the divine *mercy* are traced from age to age in his establishing his own worship among men, and remitting the punishment of individual and national offences in answer to prayer offered from penitent hearts, and in dependence upon the typified or actually offered universal sacrifice; of his *condescension*, in stooping to the cases of individuals, in his dispensations both of providence and grace, by showing respect to the poor and humble, and principally by the incarnation of God in the form of a servant, admitting men into familiar and friendly intercourse with himself, and then entering into heaven to be their patron and advocate until they should be received into the same glory, 'and so be forever with the Lord,' of his strictly *righteous government*, in the destruction of the old world, the cities of the plain, the nations of Canaan, and all ancient states, upon their 'filling up the measure of their iniquities,' and, to show that 'he will by no means clear the guilty,' in the numerous and severe punishments inflicted even upon the chosen seed of Abraham because of their transgressions; of his *long-suffering*, in frequent warnings, delays, and corrective judgments inflicted upon individuals and nations before sentence of utter excision and destruction; of *faithfulness* and *truth*, in the fulfilment of promises, often many ages after they were given, as in the promises to Abraham respecting the possession of the land of Canaan by his seed, and in all the 'promises made to the fathers' respecting the advent, vicarious death, and illustrious offices of the 'Christ,' the Saviour of the world; of his *immutability*, in the constant and unchanging laws and principles of his government, which remain to this day precisely the same in every thing universal as when first promulgated, and have been the rule of his conduct in all places as well as through all time; of his *prescience* of future events, manifested by the predictions of Scripture; and of the depth and stability of his *counsel*, as illustrated in that plan and purpose of bringing back a revolted world to obedience and felicity which we find steadily kept in view in the scriptural history of the acts of God in former ages—which is still the end towards which all his dispensations bend, however wide and mysterious their sweep, and which they will finally accomplish, as we learn from the prophetic history of the future contained in the Old and New Testaments. Thus the course of divine operation in the world has from age to age been a manifestation of the divine character, continually receiving new and stronger illustrations until the completion of the Christian revelation by the ministry of Christ and his inspired followers, and still placing itself in brighter light and more impressive aspects as the scheme of human redemption runs on to its consummation. From all the acts of God as recorded in the Scriptures we are taught that he alone is God; that he is present every where to sustain and govern all things; that his wisdom is infinite, his counsel settled, and his power irresistible; that he is holy, just, and good—the Lord and the Judge, but the Father and the Friend, of man.

3. *Nature and Attributes*.—"More at large do we learn what God is from the declarations of the inspired writings. As to his *substance*, that 'God is a Spirit.' As to his *duration*, that 'from everlasting to everlasting he is God;' 'the King, eternal, immortal, invis-

ble.' That, after all the manifestations he has made of himself, he is, from the infinite perfection and glory of his nature, *incomprehensible*: 'Lo, these are but parts of his ways, and how little a portion is heard of him!' 'Touching the Almighty, we cannot find him out.' That he is *unchangeable*: 'The Father of Lights, with whom there is no variableness, neither shadow of turning.' That 'he is the fountain of life,' and the only independent Being in the universe: 'Who only hath immortality.' That every other being, however exalted, has its existence from him: 'For by him were all things created which are in heaven and in earth, whether they are visible or invisible.' That the existence of every thing is upheld by him, no creature being for a moment independent of his support: 'By him all things consist;' 'upholding all things by the word of his power.' That he is *omnipresent*: 'Do not I fill heaven and earth with my presence? saith the Lord.' That he is *omniscient*: 'All things are naked and open before the eyes of him with whom we have to do.' That he is the absolute Lord and *Owner* of all things: 'The heavens, even the heaven of heavens, are thine, and all the parts of them;' 'The earth is thine, and the fullness thereof, the world and them that dwell therein;' 'He doeth according to his will in the armies of heaven and among the inhabitants of the earth.' That his *providence* extends to the minutest objects: 'The hairs of your head are all numbered;' 'Are not two sparrows sold for a farthing? and one of them shall not fall on the ground without your Father.' That he is a Being of unspotted *purity* and perfect *rectitude*: 'Holy, holy, holy Lord God of hosts!' 'A God of truth, and in whom there is no iniquity;' 'Of purer eyes than to behold iniquity.' That he is *just* in the administration of his government: 'Shall not the Judge of the whole earth do right?' 'Clouds and darkness are round about him; judgment and justice are the habitation of his throne.' That his *wisdom* is unsearchable: 'O the depth of the wisdom and knowledge of God! How unsearchable are his judgments, and his ways past finding out!' And, finally, that he is *good* and *merciful*: 'Thou art good, and thy mercy endureth forever;' 'His tender mercy is over all his works;' 'God, who is rich in mercy, for his great love wherewith he loved us, even when we were dead in sins, hath quickened us together with Christ;' 'God was in Christ, reconciling the world unto himself, not imputing their trespasses unto them;' 'God hath given to us eternal life, and this life is in his Son.' See **ATTRIBUTES**; also VI below.

"Under these deeply awful but consolatory views do the Scriptures present to us the supreme object of our worship and trust; and they dwell upon each of the above particulars with inimitable sublimity and beauty of language, and with an inexhaustible variety of illustration. Nor can we compare these views of the divine nature with the conceptions of the most enlightened of pagans without feeling how much reason we have for everlasting gratitude that a revelation so explicit and so comprehensive should have been made to us on a subject which only a revelation from God himself could have made known. It is thus that Christian philosophers, even when they do not use the language of the Scriptures, are able to speak on this great and mysterious doctrine in language so clear and with conceptions so noble; in a manner, too, so equitable, so different from the sages of antiquity, who, if on any time they approach the truth when speaking of the divine nature, never fail to mingle with it some essentially erroneous or groveling conception. 'By the word God,' says Dr. Barrow, 'we mean a Being of infinite wisdom, goodness, and power, the Creator and the Governor of all things, to whom the great attributes of eternity and independency, omniscience and immensity, perfect holiness and purity, perfect justice and veracity, complete happiness, glorious majesty, and supreme right of dominion belong, and to whom

the highest veneration and most profound submission and obedience are due' (Barrow, *On the Creed*). 'Our notion of Deity,' says Bishop Pearson, 'doth expressly signify a Being or Nature of infinite perfection; and the infinite perfection of a being or nature consists in this, that it be absolutely and essentially necessarily, an actual being of itself, and potential or causative of all beings beside itself; independent from any other, upon which all things else depend, and by which all things else are governed' (Pearson, *On the Creed*). 'God is a Being,' says Lawson, 'and not any kind of being, but a substance which is the foundation of other beings; and not only a substance, but perfect. Yet many beings are perfect in their kind, yet limited and finite; but God is absolutely, fully, and every way infinitely perfect, and therefore above spirits, above angels, who are perfect comparatively. God's infinite perfection includes all the attributes, even the most excellent. It excludes all dependency, borrowed existence, composition, corruption, mortality, contingency, ignorance, unrighteousness, weakness, misery, and all imperfections whatever. It includes necessity of being, independency, perfect unity, simplicity, immensity, eternity, immortality; the most perfect life, knowledge, wisdom, integrity, power, glory, bliss, and all these in the highest degree. We can not pierce into the secrets of this eternal Being. Our reason comprehends but little of him, and when it can proceed no farther faith comes in, and we believe far more than we can understand; and this our belief is not contrary to reason, but reason itself dictates unto us that we must believe far more of God than it can inform us of' (Lawson, *Theo-Politica*). To these we may add an admirable passage from Sir Isaac Newton: 'The word God frequently signifies *Lord*, but every Lord is not God: it is the dominion of a spiritual Being or Lord that constitutes God; true dominion, true God; supreme, the Supreme; feigned, the false god. From such true dominion it follows that the true God is living, intelligent, and powerful, and from his other perfections that he is supreme, or supremely perfect; he is eternal and infinite, omnipotent and omniscient; that is, he endures from eternity to eternity, and is present from infinity to infinity. He governs all things that exist, and knows all things that are to be known; he is not eternity or infinity, but eternal and infinite; he is not duration or space, but he endures and is present—he endures always and is present every where; he is omnipresent, not only virtually, but also substantially, for power without substance can not subsist. All things are contained and move in him, but without any mutual passion; he suffers nothing from the motions of bodies, nor do they undergo any resistance from his omnipresence. It is confessed that God exists necessarily, and by the same necessity he exists always and every where: hence also he must be perfectly similar, all eye, all ear, all arm, all the power of perceiving, understanding, and acting; but after a manner not at all corporeal, after a manner not like that of men, after a manner wholly to us unknown. He is destitute of all body and all bodily shape, and therefore can not be seen, heard, or touched, nor ought he to be worshipped under the representation of any thing corporeal. We have ideas of the attributes of God, but do not know the substance of even any thing; we see only the figures and colors of bodies, hear only sounds, touch only the outward surfaces, smell only odors, and taste tastes, and do not, cannot, by any sense or reflex act, know their inward substances, and much less can we have any notion of the substance of God. We know him by his properties and attributes.'—Newton, *Principia*, ii, 311, ed. 1803; Watson, *Instit.* pt. ii, c. i.

VI. *Dogmatical Treatment of the Doctrine of God.*  
—1. The exposition of the doctrine of God is the province of *Theology* proper, as distinguished from *Anthropology*, *Soteriology*, etc. See **THEOLOGY**. The doctrine is set forth by writers on systematic theology

according to their views of the relations of the subject to the other branches, but in general it constitutes the first topic treated, and is divided very much as follows:

2. *Division*.—1. The NATURE OF GOD: 1. As the original and unoriginated personal *Being*: (a) One; (b) self-existent; (c) infinite. 2. As the original *Word* and *Will*: (a) Creator; (b) preserver; (c) governor of the world. 3. As the original *Spirit*: (a) Essential Spirit; (b) origin of all moral and spiritual laws and existences. And hence, II, the TRINITY of three persons in the one Godhead: Father, Son, Holy Ghost. See MONOTHEISM; TRINITY. III. The ATTRIBUTES of God. These are not parts of the divine essence, but conceptions of the idea of God in his relations to the world and to human thought (Suabedissen, p. 150). *Perfectiones Dei, que essentiam divinum nostro concipiunt modo per se consequuntur, et de Deo paronymice predicantur* (Hollaz, p. 234). So Aquinas: "The name of God does not express the divine essence as it is, as the name of man expresses in its signification the essence of man as it is; that is to say, by signifying the definition which declares the essence" (*Summa*, pt. i, q. xiii, art. i). The ground of this distinction was the conviction that finite things cannot indicate the nature of the infinite God otherwise than by imperfect analogies. "The attributes of God must be represented to our minds, so far as they can be represented at all, under the similitude of the corresponding attributes of man. Yet we cannot conceive them as existing in God in the same manner as they exist in man. In man they are many, in God they must be one. In man they are related to and limit each other; in God there can be no relation and no limitation. In man they exist only as capacities at times carried into action; in God, who is *purus actus*, there can be no distinction between faculty and operation. Hence the divine attributes may properly be called mysterious; for, though we believe in their coexistence, we are unable to conceive the manner of their co-existence" (*Quarterly Review*, July, 1864, art. iii). There have been many divisions of the attributes of God. The scholastic theology set forth the attributes in three ways: 1. by causality (*via causalitatis*), in which all the perfections we observe in creation, and especially in man, are necessarily to be attributed to their Creator; 2. by negation (*via negationis*), under which the imperfections of created beings are kept out of the conception of God; 3. by analogy or eminence (*via analogie, via eminentiæ*), by which the highest degree of all known perfections is attributed to God. Accordingly, the attributes of God were classed as *negative* and *positive*, the negative being such as remove from him whatever is imperfect in creatures—such as infinity, immutability, immortality, etc.; while the positive assert some perfection in God which is in and of himself, and which in the creatures, in any measure, is from him. This distinction is now mostly discarded. Among modern writers, Dr. Samuel Clarke sums up the attributes as ultimately referable to these three leading ones: omnipotence, omniscience, and perfect goodness. Others distinguish them into *absolute* and *relative*: absolute are such as belong to the essence of God, as Jehovah, Jah, etc.; relative ones are such as may be ascribed to him in time, with relation to his creatures, as creator, governor, preserver, redeemer, etc. Others, again, divide them into *communicable* and *incommunicable* attributes. The communicable are those which can be imparted to the creature, as goodness, holiness, wisdom, etc.; the incommunicable are such as cannot be so imparted, as independence, immutability, immensity, and eternity. Another division makes one class of *natural* attributes, e. g. eternity, immensity, etc., and another of *moral*, e. g. holiness, goodness, etc. The later German theologians attempt more scientific discriminations; e. g. Böhme (*Lehre v. d. Göttl. Eigenschaften*, 1821; last ed.

Altenburg, 1842) distinguishes the attributes into those which refer to the *world in general*, and those which refer to the *moral world* in particular. Schleiermacher makes two classes: (1.) attributes which refer to the *universal* sense of dependence on God, viz. omnipotence, omniscience, omnipresence; (2.) attributes which refer to the *Christian* sense of redemption and of dependence on God, viz. holiness, justice, wisdom, love. Pelt (*Theolog. Encycl.* § 74) classes them as (1.) attributes of God as absolute *cause* (a) in *himself*—eternal, infinite, self-sufficient; (b) in relation to the *world*—omnipotent, omnipresent; (2.) attributes of God as the original and *self-revealing will*—good, holy, just, benevolent, etc. Rothe's scheme of the attributes is thus set forth by Babut in the *Bulletin of the Revue Chrétienne* (1868, No. 3, Juillet): 1. *Absolute or immanent Attributes*: 1. self-sufficiency of God as a pure and absolute Being; 2. majesty; the divine will; 3. blessedness. II. *Relative Attributes*, implied in God's relation to the universe; the *love* of God is the source of creation and being, while the *essence* of God is expressed in infinity, immensity, immutability. The *personality* of God is manifested to the world in goodness, wrath, grace; the *intelligence* of God in omniscience, holiness, truth. The *will* of God is manifested in omnipotence, justice, faithfulness; and the *divine nature* is manifested in the one attribute of omnipotence. See Bates, *Harmony of the Divine Attributes*, Charnock, *Existence and Attributes of God* (Lond. 1845, 8vo, last edit.); Elwert, in *Tüb. Zeitschrift*, 1830; Blasche, *göttl. Eigenschaften* (Erfurd, 1831); Andree, *De Attrib. Divin.*, etc. (Lugdun. 1824); Bruch, *Lehre v. d. göttl. Eigenschaften* (Hamb. 1842); Moll, *De justo attributorum Dei discrimine* (Hal. 1855); Shedd, *History of Doctrine*, i, 240; Hase, *Evang. Dogmatik*, § 102 sq., and writers on systematic theology generally. See CREATION; TRINITY; PROVIDENCE.

VII. *History of the Doctrine of God*.—The history of the argument for the being of God will be found under NATURAL THEOLOGY. We treat here briefly the history of the doctrine of the nature and attributes of God. The first office of Christianity was to vindicate the spirituality of God against the material and anthropomorphic ideas of paganism, and even of corrupted Judaism. The proposition "God is a Spirit" was therefore a fundamental one; yet at an early period *anthropomorphic* ideas were developed in the Church. Melito, bishop of Sardis, in his treatise *Ἐπεὶ ἐναοπά-  
του Θεοῦ* (Eusebius, *Hist. Eccl.* iv, 26), taught a corporeal representation of God. Tertullian (*adv. Praxeam*, c. vii) declares *Deum corpus esse, etiam Spiritus est; nihil enim incorporate nisi quod non est*; and thus plainly shows that he could not distinguish reality from corporeity, even in God. The Anthropomorphites took the phrase "image of God" in a material sense, and taught that God is man per *eminentiam*. (2.) The second error was *Dualism* (q. v.), brought in by the Gnostic distinction between the supreme God and the Demiurge. See GNOSTICISM. (3.) Opposed to both these was the *philosophical* mode of conceiving God, including the idea of immateriality, proved negatively, e. g. Minucius Felix: *Hic nec rideri potest—visu clarior est; nec comprehendi potest—tactu purior est; nec estimari—sensus major est: infinitus, immensus, et soli sibi tantus quantum est notus*. "The Alexandrians opposed all crude anthropomorphisms, but they were not successful in correctly separating the real and the sensuous view, and hence were led into a subtilizing of the divine attributes. Clement attributes all errors in the apprehension of the Old Testament to the sensuous and liberal mode of understanding it, which led men to represent, after human fashion, the nature of God, who is exalted above all human passions. The prophets could represent God to us, not as he is, but only as we sensuous men can understand it (*Strom.* p. 391). Origen also sees in the Old Testament a condescension of God to the weakness of man,

In fact, there is no wrath in God, but he must appear as if wrathful to the bad, on account of the sufferings which their own evil conduct entails upon them (*Hom.* 18, in *Jerem.*). The Alexandrians disputed the self-subsistence of God's primitive justice, and merged it in the idea of a *καταστροφή σωτηρίας*, a disciplining reformatory love." Augustine speaks of God as the *ipsa incommutabilis veritas* . . . illud solum quod non tantum non mutatur, verum etiam mutari non potest, etc. But he declares that no complete definition of God can be given: *Deus ineffabilis est: factibus dicimus quod Deus non sit, quam quid sit* (Comm. in *Psal.* lxxxv). In the period of the Arian controversy, all questions as to the nature of God were bound up with the discussion of the Trinity (q. v.); and in the period from Gregory I to the scholastic age (11th century), with that of the doctrines of the Holy Spirit and the Person of Christ. See *CHRISTOLOGY*. In the scholastic period Anselm supposed an analogy (before used by Augustine) between the divine mind and the human. "We cannot know," he says, "the supreme Being in himself, but only after a certain analogy with created beings, therefore most of all with the rational spirit. The more this spirit enters into itself and observes itself, the more will it succeed in raising itself to the knowledge of the absolute Spirit. The human spirit is a mirror in which we may see the image of that which we do not directly behold. The supreme Spirit presupposes his own existence, knows himself; the Word begotten from himself is one with his own essence. Thus the supreme Being expressed himself. As everything which is produced by human art was before in the idea of the formative spirit, and as this idea remains even when the work perishes, and is, in this respect, one with the art of the formative spirit itself, so it is not another, but the same word by which God knows himself and all creatures. In the divine Word creatures have a higher being than in themselves; the ideal being rests in the divine thoughts. The relation of the Son to the Father is something elevated above all language. The expression *generation* is best suited to represent the relation, but yet it is symbolical. Further, as God knows himself, he loves himself; his love to himself presupposes his being and knowing. This is also denoted by the procession of the Holy Spirit from both; all three pass completely into one another, and thus constitute the unity of the Supreme Being" (*Monologium*, c. 64). The view of God taught by Scotus Erigena—*In deo immutabiliter et essentialiter sunt omnia*—led, in the hands of David Dinanto and Amalrich of Bena, to a pantheistic theory, which was opposed by Aquinas and the later schoolmen, especially by Albertus Magnus. As to the attributes of God, the principal discussions of the scholastic period related to his omnipotence and omnipresence. The confessions of faith of the *Reformation* period generally agree as to the doctrine of the nature, attributes, and works of God: the discussions that have arisen in the bosom of Protestantism on this subject refer chiefly to the doctrines of the Trinity (q. v.) and predestination (q. v.). The later theories of the *philosophical* period, on the sceptical side, are those of Idealism, Materialism, and Pantheism (see the several heads). Some later Christian writers, in opposing the extremes of German Rationalism, have denied the possibility of any scientific knowledge of God. Mansell (*Limits of Religious Thought*, Bampton Lectures for 1859) maintains that only a *regulative* (as distinguished from a *speculative*) knowledge of God is possible. "To conceive," says he, "the Deity as he is, we must conceive him as first cause, as absolute, and as infinite. But do not these three conceptions imply contradiction to each other, when viewed in conjunction, as attributes of one and the same being? A cause cannot, as such, be absolute: the absolute cannot, as such, be a cause. How can the infinite become that which it was not from the first?" Mr. Mansell here

pushes his opposition to the use of reason too far; and finding the words "absolute" and "infinite" used in transcendental senses by the Germans, he adopts those senses, and reasons as if no other definitions were possible. For criticisms of his work, see *London Review*, July, 1860, p. 390 sq.; Young, *The Province of Reason* (London, 1860); McCosh, *Method of the Divine Government* (Edinb. 1859, 6th edit.). The Christian conception of God over against the modern speculative idea is well set forth in the following passage: "The problem in regard to God is simply this: The human mind is compelled to think a unity or synthesis of all things. But how is this to be thought? Are we to think it inside nature, or outside and above it? Here it is that the Christian idea breaks off from the speculative. The Christian, realizing his own personality, feeling intensely that he himself in his inmost being is numerically different from and above nature, is compelled to think of the divine as in like manner supernatural. Having attained to this stage, the next question that arises is, How are we to image forth the divine Being? and the answer is, not surely by the lowest kind of natural existence, but by the highest. The human personality itself, not the immutabilities of the material world, which are lower in the scale of being, must be the image which shall shadow forth the divine Being. That which comprehends all things must, at least, equal in perfection the highest of these things. Thus the human personality becomes in the Christian system the image and likeness of God. God may, indeed, be far higher than man—so high that to call him a person may be as inadequate as to call the human soul a power. But, at least, we are sure of this, that whatever he is in himself, all that we mean by personality is comprehended in him. Just as man is a power and something more, so God is a person and perhaps something more. There is an indestructible belief in man, that all the pure feelings of the soul find a response in the infinite Author of all things. Under the impress of this universal conviction, men fall on their knees and worship. Such is the pure Christian idea, and it involves this consequence, that each individual soul stands in a *special and personal* relation to the infinite Author of all. There is an eye which is ever over us; a fatherly heart which yearns for us. There is One whose wisdom never fails, who is ever about our path and about our bed, and provides for us in all things. In like manner as he is all this to us, so we in turn are his children; we are responsible to him as to a father, and must be judged by him. Intellectually, too, the same Christian idea involves this consequence—that it is a grander and worthier conception of his providence to think him as dealing with and disciplining individual souls, than as contriving and arranging a world of dead laws. The one reveals heart and soul, the grandeur of personality and kingly might; the other, if taken by itself, only ingenuity, not necessarily personality at all. The speculative idea of God is the antithesis of this. It, too, recognises a central unity; but, looking away from the world of mind and soul, it concentrates its attention on the world of matter. It takes the laws of the material world as the image of the divine. God is revealed in the evolutions of nature. His attributes consequently are such as these: perfect wisdom, infinite power, absolute invariability of purpose. He has neither heart nor soul, nor even consciousness, as we understand it. He is impersonal, and can have no personal relation to us. He has neither knowledge nor care of the individual, but acts purely by general law. We need not, however, pursue the consequences, which are sufficiently apparent. It will be enough if we point out their bearing on practical life. Here are two opposing systems which hold a very different language to the human soul. The one says in the fine language of St. Augustine, *O homo, agnosce dignitatem tuam*; the other, *O man, rejoice in thy degradation*. The one digni-

fies and ennobles the soul, and, supplying it with a lofty ideal and immortal hopes, raises it from the depth of selfishness; the other degrades it to the level of the brute, and, depriving it alike of hope and fear, bids it snatch what enjoyment it can from the passing hour. That lofty conception of God, which has done so much for modern Europe, is purely the creation of Christianity. Were this latter taken away, it would instantly collapse, and there would only remain, for the upper classes, hopeless, selfish atheism; for the lower, degrading superstition" (*Christian Remembrancer*, July, 1866, art. xiii). On the *history of the doctrine of God* in general, see a series of able articles by Ritschl, in the *Jahrbücher f. deutsche Theologie*, vols. x, xiii.—Nander, *History of Dogmas*, p. 102, 285, 485, 460; Beck, *Dogmengeschichte*, p. 104-138; Hagenbach, *Dogmengeschichte*; Hase, *Evangelische Dogmatik*, p. 93-111; Meiners, *Hist. doct. de vero deo* (Lemgo, 1780, 8vo); Perrone, *Prælect. GOD, FRIENDS OF. See FRIENDS OF GOD.

GOD, PEACE OF. See PAX DEI.

**Goddard, JOSIAH**, a Baptist minister, missionary, and translator of the Scriptures, was born at Wendell, Mass., in 1813; graduated at Brown University in 1835, and at Newton Theological Seminary in 1838. He was appointed a missionary to the Chinese in Siam, China being not yet open to the residence of foreigners. There he labored with success as a preacher, translated the Gospel of John, and prepared tracts and an Anglo-Chinese vocabulary. Being taken with bleeding from the lungs, he removed to Ningpo, one of the treaty ports then recently assigned for foreign trade and residence. Here he continued, with conscious and growing weakness, holding upon life by a peculiarly uncertain tenure, yet with courage and patience, to labor on for six years—preaching, journeying, preparing and circulating tracts, and carrying to completion his version of the New Testament. This is a valuable contribution to the difficult work of Biblical translation in the Chinese language. He was an excellent scholar, and made high attainments in the study of that language. He proved himself a sensible and cautious, but brave and earnest worker. The disease against which he had borne up so long proved fatal in 1854. (L. E. S.)

**Godeau, ANTOINE**, a Roman Catholic bishop, was born at Dreux in 1605. He was destined by his parents for public life, but, having been disappointed in love, entered the ministry. He was one of the ornaments of the Hotel Rambouillet at Paris, where his talent for verse gained him distinction. Richelieu made him bishop of Grasse in 1636. After his consecration he retired to his diocese, and devoted himself to its duties. He subsequently quitted the see of Grasse for that of Vence, where he died April 21, 1672. He wrote *Morale Chrétienne* (1705, 3 vols. 12mo);—*Paraphrases des Epîtres de St. Paul et des Epîtres Canoniques* (1640, 1641, 4to);—*Psaumes de David, traduits en vers Français*;—*Nouveau Testament traduit et expliq.* (1668, 2 vols. 8vo), besides other smaller works, chiefly biographical. The most important of his productions is the *Histoire de l'Eglise*, from the commencement of the world to the end of the 9th century (Paris, 1653-1678, 5 vols. fol.). He left MSS. continuing the work. The first volume exposed the author to a charge of heresy, and the threats of a powerful ecclesiastic induced him to write the rest of his work with less impartiality.—Dupin, *Eccles. Writers*, 17th cent.;

Hook, *Eccles. Biog.* vol. v; Nicéron, *Mémoires*, xviii-xx; Hofer, *Nouv. Biog. Génér.* xx, 885.

**Godfrey of Bouillon**, duke of Lorraine, was born at Bézy, in Brabant, probably about A. D. 1060. He served with high distinction in the armies of the emperor Henry IV. When, near the end of the 11th century, the first crusade was set on foot, he entered into the movement, and was the first in rank among the Crusaders. "He not only signalized himself by valor among the valorous, and by enthusiasm among the enthusiastic, but he showed also disinterestedness, probity, skill, and prudence, which were of a higher and rarer order. He maintained the most complete discipline among his division of the Christian army, which he brought safely to the appointed muster-place beneath the walls of Constantinople in the winter of 1096. By his sagacity and firmness he prevented hostilities breaking out between the host of the Crusaders and the Greek emperor, Alexius Comnenus, and in the spring of 1097 Godfrey led the Frankish nations into Asia Minor, to the siege of the capital of the Turkish sultan of Nice. This city was captured after a siege, in which the personal valor of Godfrey, as well as his generalship, was frequently displayed. He was tall, well-proportioned, and of such remarkable strength and dexterity in the use of his weapons that he is said, in more than one encounter, to have cloven his foe by a single sword-stroke from skull to centre. After Nice was captured, the Crusaders marched forward and defeated a Turkish army in the great battle of Dorylaeum. They reached Antioch, in Syria, late in the winter of 1097. The city was captured after an obstinate resistance, and the weakened army of the victors was in turn besieged in its walls by an innumerable host of the Mohammedans. After enduring much suffering and loss, Godfrey led the Crusaders in a sudden sortie upon their enemies, which was completely victorious. The enthusiasm caused among the Christian army by the supposed discovery of the relic of the holy lance was one great cause of this success. It was not till 1099 that the Crusaders reached Jerusalem, and their numbers were then reduced by the sword and by disease to only 1500 horse and 20,000 foot fit for service. The Mohammedan garrison was far more numerous, and the city was formidably strong. But the zeal of the Crusaders was indomitable" (Rich, s. v.), and the Holy City was carried by storm July 15, 1099. Godfrey was proclaimed first Latin king of Jerusalem, but he rejected the title, and assumed the style of "Defender and Baron of the Holy Sepulchre." He defeated the sultan of Egypt at Ascalon, August 12, 1099. Godfrey compiled and promulgated a code named *Les Assises de Jerusalem*, which, as finally revised towards the close of the 14th century for the use of the Latin kingdom of Cyprus, is printed in old law French in Beaumanoir's *Coutumes de Beauvaisis* (Bourges and Paris, 1630). He died in 1100. See Creasy, in Rich's *Cyclop. of Biography*; *English Cyclopaedia*; Michaud, *Histoire des Croisades*.

**Godhead**, the nature or essential being of God (Acts xvii, 29; Rom. i, 20; Col. ii, 9).

**Godliness**, strictly taken, is right worship or devotion, but in general it imports the whole of practical religion (1 Tim. iv, 8; 2 Pet. i, 6). It is difficult, as Saurin observes, to include an adequate idea of it in what is called a definition. "It supposes knowledge, veneration, affection, dependence, submission, gratitude, and obedience; or it may be reduced to these four ideas: *knowledge* in the mind, by which it is distinguished from the visions of the superstitions; *rectitude* in the conscience, that distinguishes it from hypocrisy; *sacrifice* in the life, or renunciation of the world, by which it is distinguished from the unmeaning obedience of him who goes as a happy constitution

leads him; and, lastly, *zeal* in the heart, which differs from the languishing emotions of the lukewarm." The advantages of this disposition are honor, peace, safety, usefulness, support in death, and prospect of glory; or, as the apostle sums up all in a few words, "It is profitable unto *all things*, having the promise of the life that now is, and of that which is to come" (1 Tim. iv. 8). In 1 Tim. iii. 16, it means the substance of revealed religion as furnished in the various particulars enumerated.—Barrow, *Works*, i, 9; Scott, *Christ, Life*; Scougal, *Life of God in the Soul of Man*; Saurin, *Sermons*, Engl. trans. v, serm. 3; Buck, *Theol. Dictionary*, s. v.

**Godman, JOHN D.**, an American naturalist and physician, was born at Annapolis, Maryland, in 1794, and, being early left an orphan, was bound apprentice to a printer, and afterwards entered the navy as a sailor-boy. At nineteen he commenced the study of medicine, and on completing his studies he settled in Philadelphia as a physician and private teacher of anatomy, and for some time was an assistant editor of the *Medical Journal*. In 1826 he was elected to the professorship of anatomy in Rutgers' Medical College, and removed to New York, where he soon acquired extensive practice as a surgeon. Ill health, however, obliged him to relinquish his practice, and spend a winter in the West Indies. He died of consumption at Germantown, Pa., April 17, 1830. He wrote a number of professional works of value; but he is mentioned here because of the fact that, having at one time adopted the infidelity and atheism of the French naturalists of the last century, the death of a friend in 1827 led him to reflection and to the reading of the Scriptures, and he became eminent for Christian piety. An account of him by Dr. T. Sewall is published by the American Tract Society.—Davenport, *Biogr. Dictionary*; Allibone, *Dictionary of Authors*, i, 681.

**God-man.** See INCARNATION.

**Godwin, Francis**, an eminent English prelate and Church historian, was born at Havington, Northamptonshire, in 1561. In 1578 he entered the college of Christ Church, Oxford, of which his father, Thomas Godwin, was dean. Here he took successively the degrees of B.A. in 1580, M.A. in 1583, B.D. in 1593, and D.D. in 1595. He held divers ecclesiastical offices until his publication of the *Catalogue of the Bishops of England* caused him to be appointed bishop of Llandaff. A Latin translation of this work, dedicated to James I, secured him the bishopric of Hereford. He died April, 1633. His works are, *A Catalogue of the Bishops of England since the first planting of Christianity in the Island, with a history of their lives and memorable actions* (1601, 4to; 2d ed. with additions, and Latin translation, 1615. This translation, with a continuation, was republished by Richardson, under the title *De Prasulibus Angliæ Commentarius*, Cambridge, 1743, folio);—*Rerum Anglicarum Henrico VIII, Edwardo VI, et Maria regnantibus, Annales* (1616, fol.; London, 1628, 4to; English, by his son Morgan, 1630, fol.);—*Nuncius inanimatus in Utopia* (1629, 8vo);—*A Computation of the Value of the Roman Sesterce and Attic Talent* (1630);—*The Man in the Moon, or a Discourse of a Voyage thither by Domingo Gonzales* (1638, 8vo; another edit. of 1657 contains a translation of the *Nuncius inanimatus*). See *Biographia Britannica*; Chalmers, *General Biog. Dictionary*.

**Godwin, Thomas, D.D.**, an English theologian, was born in Somersetshire in 1587. He entered Magdalen Hall, Oxford, in 1602, became head master of the free school of Abingdon in 1609, and afterwards rector of Brightwell, Berkshire. He died in 1643, leaving a great reputation both as a teacher and as an author. He wrote *Moses and Aaron; or the civil and ecclesiastical Rites used by the ancient Hebrews, observed and at large opened for the clearing of many obscure Texts throughout the whole Scripture*, etc. (London, 1685, 4to, 12th ed.); translated into Latin, *Moses et Aaron, cum Hottingeri*

*Notis* (Ultraj. 1690; often reprinted);—*Romanæ historicæ Antiquologia*, an English Exposition of the Roman Antiquities (Lond. 1686, 4to, 16th ed.);—*Dissertatio de theocratia Israelitarum:—Three Arguments to prove Election upon Foresight by Faith*, a work which brought him into a controversy with the ultra-Calvinist, Dr. Twiss (q. v.). See Horne, *Bibliographical Appendix*; Darling, *Cyclop. Bibliog.* i, 1279; Allibone, *Dictionary of Authors*, i, 682.

**Goël** (גוֹעַל, *goel*, part. of גָּאַל, *gaal*, to redeem; in full, עֲדָרָה לְגוֹעַל, *avenger of blood*, rendered "kinsman," "redeemer," "avenger," etc., in the A. Vers.). Among the Hebrews, the right of repurchasing and redeeming, as well as that of avenging blood, appertained only to the next relative; hence *goel*, simply, is used for the next relative (Lev. xxv, 25). Similar usages prevail universally among the modern Arabs. See BLOOD-REVENGE. Connected with the duties of the *Goel* was, according to custom, also that of marrying the childless widow of the deceased relative (Deut. xx, 5-10). See LEVIRATE LAW.

The fact of the close consanguinity renders the *Goel* an eminent type of the Redeemer of mankind, as is especially evinced in that famous passage in the Oriental epic of Job. The afflicted man, by a striking anticipation of the incarnate Mediator, standing in immortal self-existence over the sleeping ashes of his kindred saint, who was misunderstood and maligned even by his best earthly friends, thus touchingly exults in the prospect that his disembodied spirit should survive to witness the posthumous vindication of his fame (Job xix, 25-27):

[Be this my dying testimony.]

That I have known my living *Goël*;  
And last upon [the] dust he will arise:  
Yes, after my skin has decayed, [even] thus;  
Yet without my flesh shall I behold Deity!

Whom I shall behold [as] mine;  
(Yes, my eyes, they have [already] seen [him],  
Nor has he been strange [to me]),  
[Though] they have failed, my reins within me.

The sentiment was well worthy to be "engraved with an iron style, and set with lead in the rock forever," as the epitaph of the noble patriarch (ver. 24). Although it does not (as erroneously rendered in the A. V.) contain any allusion to the resurrection of the body, yet it distinctly recognises the doctrines of a fellow-feeling on the part of God towards man, and of the immortality of the soul; and it shows how these tenets, which lie at the basis of all true religion, whether natural or revealed, are alone adequate to support the human spirit under the sorrows of life, and in view of death. (See Stör, *De vindice sanguinis*, Lips. 1694; Stickel, *De Goële*, Jen. 1832; and the dissertations on the passage by Rosshirt [Herbip. 1791] and Kosegarten [Griefsw. 1815].) See REDEEMER.

**Goëpp, JEAN JACQUES**, a French Protestant theologian, was born at Heiligenstein, Alsace, April 6, 1771. He studied at the University of Strasburg under Oberlin and Schweighaeuser, and had already begun his career as a preacher when the French Revolution broke out. Appointed secretary of the Central Committee of Strasburg, he opposed the cruelty of Schneider, the Republican commissioner, and would perhaps have paid dear for his courage but that he was drafted into the army, in which he served until 1796, when he returned to finish his theological studies at Strasburg. In 1802 he was appointed pastor of the French Protestant congregation at Strasburg, almoner of the Lyceum of that city in 1803, director of St. Thomas's Seminary in 1808, and, finally, pastor of the Lutheran Church in Paris in 1805. There, together with Boissard, he opened the church called the *Billetes*, took care of over 14,000 souls dispersed all over Paris, attended to the poor, the schools, and all the other details of his charge. He was one of the founders of the *Missions Évangéliques*, of the *Société Biblique*,

the *Société protestante de Provoyance et de Secours mutuels*, and the *Société de la Morale Chrétienne*. In 1815, at the time of the massacre of the Protestants at Nîmes, a London society had made proposals to the French Protestants to help them. Had the proposal been accepted, the position of Protestantism in France would have become even much worse than it had been. Goëpp, while gratefully acknowledging the offer, declined, in the name of the French Protestants, accepting the protection of any foreign power. The French government acknowledged the service thus rendered by Goëpp by creating him a member of the Legion of Honor. Goëpp died at Paris June 21, 1855. Besides his immense pastoral work, Goëpp did a great deal of literary labor. He wrote, besides numerous pamphlets and funeral discourses, *Précis de la doctrine chrétienne exposée par le texte de l'Écriture Sainte* (in collaboration with Boissard, Paris, 1815, 8vo).—*Prières à l'usage du culte domestique, suivies des exercices et préparation à la sainte Cène* (same, Paris, 1821, 12mo).—*Principes de la Religion chrétienne, à l'usage des écoles élémentaires* (Paris, 1826, 12mo).—*Discours sur le nom et le but de la Société de la Morale chrétienne* (Par. 1834, 8vo), etc. See Villenave, *Notice sur J.-J. Goëpp*.—Hoefler, *Nouv. Biog. Générale*, xx, 949 sq.

**Goering**, JACOB, a Lutheran minister, was born in York County, Pa., Jan. 17, 1755. His father was a farmer, and had designed his son for the same occupation, but, as the youth showed promising talents and hopeful piety, his father consented to his becoming a minister of the Gospel. He studied theology with Dr. Helmuth, and in 1786 became pastor of the Lutheran Church at York, Pa. Here he continued to labor until his death in 1807. Mr. Goering was regarded as an extraordinary man, a profound scholar, and an eloquent preacher. Nothing could check his ardor in the prosecution of his studies, or divert him from his purpose. In the pulpit he would often electrify his audience, and sway them at his will. It was his practice to present to his people systematic doctrinal instruction, always accompanied with a pointed application and an earnest appeal. On the afternoon of the Lord's day, in connection with the catechetical exercise, he examined the whole congregation on the subject of the morning's discourse. Although he wrote much, he published very little—only two small works on *Baptism* and one on *Methodism*. His MSS. contained discussions of theological questions, inquiries into the Oriental languages, and translations from the Arabic poets, but these valuable papers, with all his letters, in compliance with his directions in his last illness, were committed to the flames. (M. L. S.)

**Goerres**, JOHANN JOSEPH VON, an eminent German Roman Catholic writer, was born Jan. 25, 1776, at Coblenz, and educated at the gymnasium at that place. In early life he was involved in politics, and in 1798 he set up a Republican newspaper, the "*Rothe Blatt*." Being sent on a deputation to Paris in 1799, he saw French "freedom" under Bonaparte, and became disgusted with it. In that year he gave up his journal, and devoted himself to the study of medicine, and afterwards to philosophy and natural science. In 1802 appeared his *Aphorismen über Kunst* (Aphorisms on Art); in 1805, *Exposition der Physiologie* (Physiology) and *Glaube und Wissen* (Faith and Knowledge). In 1806 he went to Heidelberg, and lectured on Physics there till 1808, when he returned to Coblenz. 1810 he published *Mythengeschichte der Asiatischen Welt* (Mythology of the Asiatic World, Heidelberg, 8vo). In 1814 he again entered the political field against the French as editor of the *Rheinischer Merkur* (The Rhenish Mercury), a journal which stirred the whole public mind of Germany. It was prohibited by the Prussian government in 1816—a strange reward for the services it had rendered. In 1819 he had to take refuge in Strasburg, in consequence of

publishing *Deutschland und die Revolution*, in which he pleaded for the liberal party of Germany. He afterwards published a number of political works of the same vein, and tinged with mysticism. In Strasburg he was surrounded with Roman Catholic influences, and began to despair of reforming society by politics. In 1825 he accepted the professorship of history in the new University of Munich, and there he spent the remainder of his days. In 1836-42 appeared his *Christliche Mystik* (Christian Mysticism, Ratisbon, 4 vols. 8vo). During the conflict of the Prussian government and the archbishop of Cologne he wrote, in the interest of the ultramontane party, *Athanasius* (Ratisbon, 1837, 4 editions), and *Triarier* (Ratisbon, 1838). He wrote several other works in the interest of Roman Catholicism, and died January 27, 1848. Goerres was a prominent adherent of the first philosophic system of Schelling, but he found in the abstruse speculations of German philosophy no elements adequate to content his restless spirit of investigation. He was then swept away by that current of conservative Roman-Catholic restorationism, which, in the early part of the present century, carried a number of German politicians, historians, and poets into the bosom of the Church of Rome. Like most of them, Goerres never regarded Romanism as it appears in the light of history, but invested it with all the brilliant features and colors of the ideal religio-political society which he had previously conceived in his own mind. Still, under the influence of his former studies, he went down to the deep grounds of mysticism to discover there a light in the darkness, which he had found besetting the sources of all sciences. He persuaded himself that he had made there a great discovery in finding new and wonderful relations between the fables and myths of paganism as a shadow, and Roman-Catholic Christianity as the full truth; between the myriads of mysteries in all sciences, and the Roman-Catholic doctrine as a key to disclose them. At the beginning and end of every science he posted a Roman Catholic dogma as a watchman; by it he measured all the manifold inventions of our age, boldly pretending that everything true in them came from and pointed to a "Catholic" truth; and then he called upon the youths of his Church to rewrite from this stand-point the history of every science, since it had been too long monopolized and disfigured by Protestant erudition. All this, set forth in mystic, self-confident, and passionate language, could not fail to attract general attention on the part of his coreligionists. The influence of Goerres was so much the greater, as he made himself, at a critical moment, also the political champion of the Roman Catholic interests, principally through the "*Historische-politische Blätter*" of Munich, a periodical edited, although not under his name, yet under his guidance and controlling superintendence. In one thing, however, Goerres was greatly disappointed. He found many readers, hearers, and admirers, but only a very few disciples. They could not master the sense of their teacher's words; a bad omen, indeed, for his anticipated dominion over the literature of the world. The first volume of his collected works (*Gesammelte Werke, herausg. von Marie Goerres*) appeared at Ratisbon in 1854. See *Meth. Quart. Rev.* Jan. 1855, p. 146; Sepp, *Joseph von Goerres, eine Skizze*, etc. (Ratisbon, 1848); Haneberg, *Zur Erinnerung an J. v. G.* (Munich, 1848); Heinrich, *J. v. G., ein Lebensbild* (Frankf. 1867); *Hist. Polit. Blätter*, t. xxvii; Brühl, *Geschichte d. kath. Literatur Deutschlands* (Leips. 1854); Hoefler, *Nouv. Biog. Générale*, xx, 957; Herzog, *Real-Encyclop.* v. 224 sq.

**Goertner**, JOHN PETER, a minister of the Lutheran Church, was born April 26, 1797, at Canajoharie, N. Y. He was graduated at Union College in 1822, the *Reformation of Luther* being his commencement exercise. For a time he prosecuted his studies at Hartwick Seminary under the direction of professor Hagelius, and then received private instruction from

Dr. Christian Schaeffer, of New York City, whom he aided in his pastoral work. He was licensed to preach by the New York Ministerium in 1824, and, after performing extensive missionary labor among the destitute Lutherans in the northern and western countries of the state and in Canada, he accepted a call to Johnstown, N. Y. He was loved and venerated not only by his own people, but by all who witnessed the results of his earnest labors, and the salutary influence he was exercising. His career was a brief one. He died when only thirty-two years of age of pulmonary disease. The impress of his life and efforts in the sanctified members of believing and loving hearts will descend to children and children's children. He left a valuable MS. *Journal of six Months' Residence at Rome, and Visit to interesting Cities in Europe.* (M. L. S.)

**Goeschel, Karl Friedrich**, a German writer on philosophy, was born in 1784 at Langensalza. After studying law at Leipzig he became judge in Langensalza, and in 1818 published a history of that town. In 1844 he received an appointment in the ministry of justice as "Geheimer Oberregierungs-rath," from 1845 to 1848 he was president of the consistory of Magdeburg. In 1848 he withdrew from the public service and lived in retirement at Naumburg, where he died, Sept. 22, 1862. He at first endeavored (*Aphorismen über Nichtwissen und absolut. Wissen*, 1829) to show the agreement of the Hegelian philosophy with Christianity, also to refute Strauss from this stand-point (*Beiträge zur specul. Philosophie*, 1838); but gradually he joined more and more the party of the Confessional Lutherans. He conducted the judicial proceedings against Wislicenus, Uhlich, and the Friends of Light (q. v.), and in 1848 had to leave Magdeburg in consequence of the excitement of the people against him. He had previously tendered his resignation because the government had allowed the Free Congregation of Magdeburg the use of one of the Protestant churches of the city. Goeschel wrote several works on Dante which are highly valued.—Herzog, *Real-Encyclopädie*, xix, 567. (A. J. S.)

**Goettingen**, a town of Prussia, with 12,674 inhabitants (in 1864). It is the seat of a celebrated German university (Georgia Augusta), which was founded in 1737 by king George II. of England, and opened in 1737, and which numbered, in 1868, 106 teachers and 805 students. The library of the university contains over 360,000 volumes and 5000 MSS. Among the best-known theological professors of the university belong Gieseler (q. v.), Lücke (q. v.), and Ewald. See Pütter, *Versuch einer akadem. Gelehrten-gesch. der Universität Göttingen* (2 vols. Goett. 1765-88; continued by Saalfeld, Hamb. 1820; and by Osterley, Goett. 1838). (A. J. S.)

**Goetze, Georg Heinrich**, a German writer, was born at Leipzig, Aug. 11, 1667. In 1687 he passed M. A. at the University of Leipzig, and in 1690 became Protestant pastor of Bury, in the duchy of Magdeburg. In 1702 he became superintendent of the churches of Lubeck, in which office he continued until his death, March 29, 1729 (according to others, April 25, 1728). He left over one hundred and fifty works, mostly on literary or historical questions. The most important are, *De Virgilitis paschalibus veterum christianorum* (Lpz. 1687, 4to);—*De Archilochonis reteris Ecclesie* (Leipzig, 1687, 4to);—*De dubiis Athanasii Scriptis* (Lpz. 1689, 4to);—*De Lutheranismi D. Bernardi* (Dresden, 1701, 4to), in which he attempts to prove that St. Bernard preached the same doctrines as Luther;—*Parallelismus Jude proditoris et Romane Ecclesie* (Lubeck, 1706, 4to);—*Elogia Germanorum quorundam Theologorum* (Lub. 1709, 4to); this work contains eighty-four biographical sketches; etc.—Hoefler, *Nov. Biog. Gén.* xxi, 62 sq.

**Goetze, Johann Melchior**, a German divine, was born in Halberstadt Oct. 16, 1717, and studied at Jena and Halle. He was for nine years (1741-50) as-

sistant preacher at Aschersleben, was then called to Magdeburg, and finally became pastor of St. Catharine, at Haamburg, in 1755. He was an orthodox Lutheran, and attacked especially the semi-infidel writings of such men as Lessing, Goethe, Semler, etc. He died May 19, 1786, leaving behind him more than sixty works, the most remarkable among which are, *Von des Herrn Christi hochwürdigem Abendmahl* (1757);—*Theol. Untersuch. d. Sittlichk. der Deut. Schaubühne* (2d edit. 1770), against the latent neologism of Schlosser and Alberti;—*Exercitatio historico-theologica de patrum primitivæ Ecclesie feliciori successu in profliganda gentium superstitione quam in confirmanda doctrina christiana* (Halle, 1738, 4to);—*Gedanken ü. d. Betrachtung von der Bestimmung des Menschen* (Halle, 1748, 8vo);—*Vertheidigung des richtigen Begriffs v. d. Auferstehung der Todten, gegen Bascdow* (Hamburg, 1764, 4to), etc. His autobiography was published in 1786 (8vo). See F. L. Hoffmann, *Hamb. Biblioph.* iv; *Serapeum*, 1852, No. 21 a, 22; Thies, *Gelehr. Hamb. Deutsch. Bibliotheca*, xvii, 615-629; Lessing, *Mendelssohn, Rischek und Goetze* (Offenbach, 1787, 8vo); *Wartakte Nachrichten v. d. Leben des M. Götz* (Hamb. 1786, 8vo).—Herzog, *Real-Encyclop.* v, 226; Hoefler, *Nov. Biog. Gén.* xxi, 64 sq.

**Goffine, Leonard**, a Roman Catholic priest, was born at Cologne in 1648, joined in 1669 the order of the Premonstratenses in the abbey of Steinfeld, labored many years as a priest at Oberstein and Coerfeld in Westphalia, and died August 11, 1719. He is the author of a devotional work (*Christkathol. Unterrichts und Erbauungsbuch*) which has passed through a very large number of editions and is still in common use. There are new revised editions of the work by Steck (Tubingen, 9th ed. 1869), and by Diez (2 vols. Würzburg, 1864). (A. J. S.)

**Gog** (Heb. גֹּג גֹּג; Sept. and N. T. Γῳγ, but Γῳβ in 1 Chron. v, 4; Vulg. *Gog*), the name of two men, but whether they have any connection is doubtful. It also occurs in the Samaritan and Sept. for AGAG, in Numb. xxiv, 7, apparently for the sake of specialty, tradition (Mishna, *Shabb.* 118) making the Messianic time to be distinguished by an antecedent struggle with Gog, as the Apocalypse does the millennium. See also HANON-GOG.

As to the significance of Gog, it appears to mean *mountain*, i. e. Caucasus (Persic *koh*, Ossetic *ghogh*, i. e. mountain; and even the classical name "Caucasus" originated in *Koh-Kaf*), since Caucasus was the chief seat of the Scythian people. The hardening of the last sound (*h*) into *g* (*gog* from *kch*) seems to have taken place early, and when the name had already become that of a people, the other names, Magog, Agog (Samaritan *Agog*, gentile *Agagi*, Phenic. *Agog*) also arose. Another explanation from the Pehliv *koka*, "moon" (see *Grabschrift des Darius*, p. 64), because they prayed to the moon, is improbable. A Shemitic etymology is also possible. From the reduplicated form גֹּגֹג (from the root גֹּג, whence גֹּג, a roof), in the sense of "to be high or overtopping," גֹּגֹג might signify a *mountain* or summit (compare Arabic *juju*, *breast* of a ship, i. e. something heightened). Figuratively, this stem would mean *gigantic*, great of stature, *powerful*, warlike (cognate with גֹּגֹג of Isa. xviii, 2); comp. Sanskrit *kū*, to be mighty, *kavī* (in the Vedas, Persic *kav*), *king*, modern Persian *kav*, *warlike* or *valiant*; in which sense the Amalekite name Agag or Agog, the Heb. name Gog, and the Phoen. Agog in the story of Ogyges, may be taken. In Gen. xiv, 1 Symmachus has taken גֹּג, *Goy*, i. e. heathen, for גֹּג, *Gog*, and therefore translates it by "Scythians."—Fürst, *Heb. Lex.* s. v.

1. Son of Shemaiah, and father of Shimei, and one of the descendants (apparently great-great-grandson) of Reuben (1 Chron. v, 4). B. C. post 1856. Most copies of the Sept., however, read, very different names here.

2. In Ezekiel Gog is (1.) the name of a mixed race dwelling in the extreme north, comprehended by the Greeks under the name of the *Scythians*; thence transferred (2.) to the centre and representative of their race, i. e. their king (chap. xxxviii, 39). Gog comes forth from the distant north (xxxviii, 15; xxxix, 2), the prince of Rosh, Meshech, and Tubal (apparently also of Siras), with his army of cavalry (xxxviii, 15), marching against the people of Israel, where he is miraculously encountered (xxxviii, 17-23) and annihilated (xxxix, 1-8). In the later tradition which sprang from Ezekiel's description, Gog along with Magog represents the mixed population of the north, the Scythians, Caucasians, etc. (3.) Gog is the name of the country of the people Gog, i. e. of the Scythians; but this only in the somewhat modified language of the Apocalyptic seer (Rev. xx, 8, Γῶγ, together with Μαγῶγ), as it has become a geographical name in Arabic likewise; and this corresponds with the assertions of other Oriental authors, in whose traditions this people occupy an important place, as the name of a country (see D'Herbelot, *Bibl. Or.* p. 528).—Fürst, s. v.

Interpreters have given very different explanations of the terms Gog and Magog; but they have generally understood them as symbolical expressions for the heathen nations of Asia, or more particularly for the Scythians, a vague knowledge of whom seems to have reached the Jews in Palestine about that period. Thus Josephus (*Ant.* i, 6, 3) has dropped the Hebrew word *Magog*, and rendered it by Σκόθα; and so does Jerome, while Suidas renders it by Ηίρρα;—a difference that matters but little in the main question, since Σκόθα, in the ancient authors, is but a collective name for the northern but partially-known tribes (Cellarius, *Notit.* ii, 753 sq.); and, indeed, as such a collective name, *Magog* seems also to indicate in the Hebrew the tribes about the Caucasian mountains (comp. Jerome on Ezek. *ibid.*). Bochart (*Phal.* iii, 13) supports the opinion of Josephus, though by very precarious etymologies. According to Reinegge (*Descrip. of the Caucasus*, ii, 79), some of the Caucasian people call their mountains *Gog*, and the highest northern points *Magog*. The Arabians are of opinion that the descendants of Gog and Magog inhabit the northern parts of Asia, beyond the Tartars and Selavonians, and they put *Yajuj* and *Majuj* always in conjunction, thereby indicating the extreme points of north and north-east of Asia (Bayer, in *Comment. Acad. Petrop.* i). Nor are there wanting interpreters who understand by the Gog of Revelations the anti-Christ, and by the Gog of Ezekiel the Goths, who invaded the Roman empire in the 5th century of the Christian era. (See Danderstad, *Gog et Magog*, Lips. 1663; *Zeitschr. f. wissenschaftl. Theol.* 1862, p. 111.) In the Apocalypse these names appear to symbolize some future barbarian or infidel enemy that is to arise against Christianity (Stuart's *Comment.* ad loc.).—Kitto, s. v. See MAGOG.

**Gogerly**, DANIEL JOHN, a Wesleyan Methodist missionary and scholar, was born in London in August, 1792, and at fourteen united with the Wesleyan Methodist Society. He showed signs of remarkable talent, and at an early age became a local preacher. In 1818 he was sent to Ceylon to take charge of the Wesleyan mission press at Colombo. In 1822 he entered the regular missionary service, and was one of the first missionaries to preach extempore in Cingalese. He devoted himself earnestly to the study of the languages of the country, especially the Páli, which is, to the Buddhist, what Sanscrit is to the Brahmin. He was the first European who gave any critical or scientific study to this dialect. In 1834 he was stationed at Madura, where he had special opportunities to study Páli under learned native priests. He arranged about 15,000 words for a dictionary, and succeeded in having copies made of all the sacred books, with their glosses. This copy is now in the possession of the Wesleyan mission. In 1838 Mr. Gogerly became chair-

man of the mission, and afterwards general superintendent. The government appointed him one of the Central School Commission of Ceylon. In 1822 he had become one of the translators for the British and Foreign Bible Society, and the Cingalese version is largely due to his labors. Every word of all the editions of the Bible printed by the society passed under his eye as editor and corrector. Among his most important literary labors were contributions to the *Journal of the Royal Asiatic Society*, and to other periodicals, in illustration of the Páli literature of Buddhism. He was vice-president of the Ceylon branch of the Royal Asiatic Society. As a polemic work against Buddhism, he published *Christiáni Pragnyapiti; the Evéidences and Doctrines of the Christian Religion*: in Cingalese (Colombo, Wesleyan Mission Press, 1862). A native gentleman offered fifty dollars for a Buddhist refutation of this work, but it never has appeared. Mr. Gogerly died September 6, 1862. Both in England and France, he was recognised as the master of Páli literature. His writings on the subject are to be collected, it is said, and published in Paris.—*London Quarterly Review*, April, 1863, art. v.

**Goguet**, ANTOINE-YVES, a French juriconsult, was born at Paris Jan. 18, 1716, and became counselor to the parliament of Paris. He applied himself closely to literature, and especially to historical studies. His name is chiefly preserved by his great work *Origine des Lois, des Arts, et des Sciences, chez les Anciens Peuples* (3 vols. 4to, Paris, 1758, in which he was assisted by his friend Fugère). It treats the history of civilization among the Assyrians, Babylonians, Egyptians, Phœnicians, and the early Greeks, in vol. i; and in vol. ii, the period from the death of Jacob to the establishment of monarchy among the Hebrews, with the usages, etc. of the Lydians and Phrygians, with the states of Greece and the people of Crete. The third volume carries the subject down to the time of Cyrus, and upon the same plan as the other two. Goguet adds also dissertations on ancient coins; on the astronomical periods of the Chaldeans; on the antiquities of the Babylonians, Egyptians, and Chinese; on Sanchoniatho; and on the authenticity and antiquity of the book of Job. Goguet died in 1758. His work has passed through several editions in France, of which the last is that of Paris, 1809, 3 vols. 8vo. There is an English translation, *Origin of Laws, etc.* (Lond. 1775, 3 vols. 8vo).—*English Cyclopædia*; Hofer, *Nouv. Biog. Générale*, xxi, 75.

**Goim** is thought to be the proper name of a people in northern Palestine (גויים, *Goyim'*, Josh. xii, 23; Sept. Γοιμ, Vulg. *gentes*, A.V. "nations"), whose king lived at Gilgal (q. v.). A similar designation is employed also in Gen. xiv, 1 respecting Tidal (q. v.), "king of nations" (Sept. ἔθνη, Vulg. *gentes*). It is, however, the universal term for GENTILES (q. v.).

**Going**, JONATHAN, D.D., an influential Baptist minister, was born in 1786, and graduated at Brown University in 1809. He was licensed to preach while a member of college, and pursued the study of theology under the direction of Dr. Messer, then president of the college. Dr. Messer's orthodoxy was not above suspicion, and Mr. Going became unsettled in his doctrinal views for a time, but afterwards and finally became solidly grounded in "the doctrines of the Reformation." He was ordained in 1811, and settled at Cavendish, Vt. At this time, out of forty-five Baptist ministers in that state, he was the only one who had been liberally educated, and had an extensive influence. He was called in 1815 to Worcester, Mass. Here his labors were the means of building up a large and efficient church. He took an active interest in public education, and aided in founding the Newton Theological Institution. A journey, in 1831, into what was then "the West," awakened his interest in home missionary enterprises. The American Baptist Home

Missionary Society was formed the following year, and Dr. Goings was appointed corresponding secretary. After five years' successful service, he accepted a call to the presidency of Granville College, Ohio, now Denison University. His administration of the college did much to give it a substantial foundation and to insure its healthful growth. He died in 1844. He was strong, active, indefatigable, and his whole energy was kindled by a passion for usefulness. (L. E. S.)

**Golan** (Heb. *Golan'*, גֹּלָן, *exile accord.* to Gesen., but *circle accord.* to Fürst; Sept. Γαὺλαν; once *Galon'*, גֹּלָן, "keri" at Josh. xxi, 27, Sept. Γολάν), a city of Bashan (Deut. iv, 23) allotted out of the half tribe of Manasse east to the Gershonite Levites (Josh. xxi, 27; 1 Chron. vi, 71), and one of the three cities of refuge east of the Jordan (xx, 8). We find no further notice of it in Scripture; and though Eusebius and Jerome say it was still an important place in their time (*Onomast.* s. v. Γαὺλαν, Gaulon; Reland, *Palest.* p. 815), its very site is now unknown. The word is recognised in the present *Jaulán*, mentioned by Burckhardt (*Syria*, p. 286) as giving name to a district lying east of the lake of Tiberias, and composed of the ancient Gaulonitis, with part of Bashan and Argob (see also Robinson's *Researches*, iii, 308, 312; Append. p. 149, 162). It is indeed clear that the Gaulonitis of the later Jewish history must have included part of the more ancient Bashan, if Golan gave name to the province, seeing that Golan was certainly in Bashan. The city itself may have been situated on *tell el-Feras*, which, although destitute of ruins, is the most prominent part of the Jebel Heish that principally constitutes the modern district. Some have supposed that the village of *Nawa*, on the eastern border of *Jaulán*, around which are extensive ruins (see Porter, *Handb. for Syr. and Palest.*), is identical with the ancient Golan; but for this there is not a shadow of evidence; and *Nawa*, besides, is much too far to the eastward.

Some difficulty has been suggested as arising from the fact that the Judas whom Josephus (*Ant.* xviii, 1, 1) calls a Gaulonite is called by Luke (Acts v, 37) a Galilean. This is the more remarkable, as Josephus elsewhere (*War.* ii, 20, 4) carefully distinguishes Galilee and Gaulonitis. Yet he himself elsewhere calls this very Judas a Galilean (*Ant.* xviii, 1, 6; xx, 5, 2; *War.* ii, 9, 1). It is, from this, probable that Judas had a double cognomen, perhaps because he had been born in Gaulonitis, but had been brought up or dwelt in Galilee; as Apollonius, although an Egyptian, yet was, from his place of residence, called Rhodius (see *Kühnöl.* in *Act.* v, 37). See **JUDAS (THE GALILEAN)**.

The city of Golan is several times referred to by Josephus (Γαὺλαν, *War.* i, 4, 4, and 8); he, however, more frequently speaks of the province which took its name from it, *Gaulonitis* (Γαυλανίτις). When the kingdom of Israel was overthrown by the Assyrians, and the dominion of the Jews in Bashan ceased, it appears that the aboriginal tribes, before kept in subjection, but never annihilated, rose again to some power, and rent the country into provinces. Two of these provinces at least were of ancient origin [see **TRACHONITIS** and **HAURAN**], and had been distinct principalities previous to the time when Og or his predecessors united them under one sceptre. Before the Babylonish captivity Bashan appears in Jewish history as one kingdom; but subsequent to that period it is spoken of as divided into four provinces—Gaulonitis, Trachonitis, Auronitis, and Batanaea (Josephus, *Ant.* iv, 5, 3, and 7, 4; i, 6, 4; xvi, 9, 1; *War.* i, 20, 4; iii, 3, 1; iv, 1, 1). It seems that when the city of Golan rose to power it became the head of a large province, the extent of which is pretty accurately given by Josephus, especially when his statements are compared with the modern divisions of Bashan. It lay east of Galilee and north of Gadarithis (Gadara, Josephus, *War.* iii, 3, 1). Gamala, an important town on the

eastern bank of the Sea of Galilee, now called El-Husn, and the province attached to it, were included in Gaulonitis (*War.* iv, 1, 1). But the boundary of the provinces of Gadara and Gamala must evidently have been the river Hieromax, which may therefore be regarded as the south border of Gaulonitis. The Jordan, from the Sea of Galilee to its fountains at Dan and Cæsarea-Philippi, formed the western boundary (*War.* iii, 3, 5). It is important to observe that the boundaries of the modern province of *Jaulán* (the Arabic form of the Hebrew גֹּלָן, from which is derived the Greek Γαυλανίτις) correspond so far with those of Gaulonitis; we may therefore safely assume that their northern and eastern boundaries are also identical. *Jaulán* is bounded on the north by Jedúr (the ancient Ituræa), and on the west by the Haurán [q. v.]. The principal cities of Gaulonitis were Golan, Hippos, Gamala, Julias or Bethsaida (Mark viii, 22), Seleucia, and Sogane (Josephus, *War.* iii, 3, 1, and 5; iv, 1, 1).

The greater part of Gaulonitis is a flat and fertile table-land, well watered, and clothed with luxuriant grass. It is probably to this region the name *Mishor* (מִשׁוֹר) is given in 1 Kings xx, 23, 25—"the plain" in which the Syrians were overthrown by the Israelites, near Aphek, which perhaps stood upon the site of the modern Fik (Stanley, App. § 6; Porter, *Handbook for Syr. and Pal.* p. 425). The western side of Gaulonitis, along the sea of Galilee, is steep, rugged, and bare. It is upwards of 2500 feet in height, and when seen from the city of Tiberias resembles a mountain range, though in reality it is only the supporting wall of the plateau. It was this remarkable feature which led the ancient geographers to suppose that the mountain range of Gilead was joined to Lebanon (Reland, p. 342). Further north, along the bank of the Upper Jordan, the plateau breaks down in a series of terraces, which, though somewhat rocky, are covered with rich soil, and clothed in spring with the most luxuriant herbage, spangled with multitudes of bright and beautiful flowers. A range of low, round-topped, picturesque hills extends southward for nearly twenty miles from the base of Hermon along the western edge of the plateau. These are in places covered with noble forests of prickly oak and terebinth. Gaulonitis was once densely populated, but it is now almost completely deserted. Among the towns and villages which it once contained are still left the names of 127 places, all of which, with the exception of about *eleven*, are now uninhabited. Only a few patches of its soil are cultivated; and the very best of its pasture is lost—the tender grass of early spring. The flocks of the Turkmáns and el-Fudhl Arabs—the only tribes that remain permanently in this region—are not able to consume it; and the 'Anazeh, those "children of the East" who spread over the land like locusts, and "whose camels are without number" (*Judg.* vii, 12), only arrive about the beginning of May. At that season the whole country is covered with them—their black tents pitched in circles near the fountains, their cattle thickly dotting the vast plain, and their fierce cavaliers roaming far and wide, "their hand against every man, and every man's hand against them."

For fuller accounts of the scenery, antiquities, and history of Gaulonitis, see Porter's *Handbook for Syria and Palest.* p. 295, 424, 461, 531; *Five Years in Damascus*, ii, 250; *Journal of Sac. Lit.* vi, 292; Burckhardt's *Trav. in Syria*, p. 277; Wilson, *Lands of Bible*, ii, 319; Thomson, *Land and Book*, ii, 12 sq.; Schwarz, *Palest.* p. 220.—Smith, s. v.; Kitto, s. v. See **BASHAN**.

**Gold** (Gr. χρυσός or χρυσίον, the last being prob. a diminutive of the former and more general term, and therefore expressing gold in a small piece or quantity, especially as wrought, e. g. a golden ornament, 1 Pet. iii, 3; Rev. xvii, 4; [xviii, 16;] or gold coin, Acts iii, 6; xx, 33; 1 Pet. i, 18; but also used of the metal generally, Heb. ix, 4; 1 Pet. i, 7; Rev. iii, 18; xxi,

18, 21), the most valuable of metals, from its color, lustre, weight, ductility, and other useful properties (Pliny, *H. N.* xxxiii, 19). As it is only procured in small quantities, its value is less liable to change than that of other metals, and this, with its other qualities, has in all ages rendered it peculiarly available for coin. There are six Hebrew words used to denote it, and four of them occur in Job xxviii, 15, 16, 17. These are:

1. צהב, *zahab'*, the common name, connected with צהב, *tzahab'* (to be yellow), as Germ. *geld*, from *gelb*, yellow. Various epithets are applied to it, as "fine" (2 Chron. iii, 5), "refined" (1 Chron. xxviii, 18), "pure" (Exod. xxv, 11). In opposition to these, "beaten gold" (צהב י) is probably *mixed* gold; Sept. *δαράς*; used of Solomon's shields (1 Kings x, 16). In Job xxxvii, 22 it is rendered in the A.V. "fair weather;" Sept. *πέψη χρυσανγούρα* (comp. Zech. iv, 12). The corresponding Chald. word is צהב, *dehab'* (Dan. ii, 32; iii. i, 5, 7).

2. סגור, *segor'* (Job xxviii, 15), elsewhere as an epithet, סגור, *segur'* (Sept. *κειμελιον*), either from its *compactness*, or as being *inclosed* or *treasured*, i. e. fine gold (1 Kings vi, 20; vii, 49, etc.). Many names of precious substances in Hebrew come from roots signifying concealment, as סגור (Gen. xliiii, 23, A. V. "treasure").

3. פז, *gaz'*, pure or native gold (Job xxviii, 17; Psa. xix, 10; xx. 3; ex, 127; Prov. viii, 19; Cant. v, 11, 15; Isa. xiii, 12; Lam. iv, 2; invariably "fine" [once "pure"] gold), probably from פז, *gazaz'*, to separate. Rosenmüller (*Alterthumsk.* iv, 49) makes it come from a Syriac root meaning *solid* or *massy*; but צהב (2 Chron. ix, 17) corresponds to צהב (1 Kings x, 18). The Sept. render it by *λιθος τιμος, χρυσιον απυρον* (Isa. xiii, 12; Theodot. *απεθρον*; comp. Thuc. ii, 13; Pliny, xxxiii, 19, *obrusit*). In Psa. cxix, 127, the Sept. render it *τοπαζιον* (A. V. "fine gold"); but Schleusner happily conjectures *το παζιον*, the Hebrew word being adopted to avoid the repetition of *χρυσος* (Thes. s. v. *τοπαζ*; Hesych. s. v. *παζιον*).

4. פז, *betzar'* (Job xxxvi, 19, fig. of riches), or פז, *betzar'*, gold earth, or a mass of raw ore (Job xxii, 24; Sept. *απυρον*; A. V. "gold as dust").

The poetical names for gold are:

5. צהב, *ke'them* (also implying something *concealed* or *separated*, Job xxviii, 16, 19; xxxi, 24; Psa. xlv, 9; Prov. xxv, 12; Cant. v, 11; Lam. iv, 1; Dan. x, 5; Sept. *χρυσιον*; and in Isa. xiii, 12 *λιθος πολυτιμης*).

6. חרות, *churats'* = "dug out" (Prov. viii, 10, 18), a general name (Prov. iii, 14; xvi, 16; Zech. ix, 3) which has become special (Psa. lxxviii, 13, where it cannot mean gems, as some suppose, Bochart, *Hieroz.* ii, 9). Michaelis connects the word with the Greek *χρυσος*.

Gold was known from the very earliest times (Gen. ii, 11). Pliny attributes the discovery of it (at Mount Pangæus), and the art of working it to Cadmus (*H. N.* vii, 57); and his statement is adopted by Clemens Alexandrinus (*Stromat.* i, 363, ed. Pott.). It was at first chiefly used for ornaments, etc. (Gen. xxiv, 22); and although Abraham is said to have been "very rich in cattle, in silver, and in gold" (Gen. xiii, 2), yet no mention of it, as used in *purchases*, is made till after his return from Egypt. Coined money was not known to the ancients (e. g. Homer, *I.* vii, 473) till a comparatively late period; and on the Egyptian tombs gold is represented as being weighed in rings for commercial purposes (comp. Gen. xliiii, 21). No coins are found in the ruins of Egypt or Assyria (Layard's *Nin.* ii, 418). "Even so late as the time of David gold was not used as a standard of value, but was considered

merely as a very precious article of commerce, and was weighed like other articles" (Jahn, *Bibl. Arch.* § 115; comp. 1 Chron. xxi, 25).

Gold was extremely abundant in ancient times (2 Chron. xxii, 11; Nah. ii, 9; Dan. iii, 1); but this did not depreciate its value, because of the enormous quantities consumed by the wealthy in furniture, etc. (1 Kings vi, 22; x, passim; Cant. iii, 9, 10; Esth. i, 6; Jer. x, 9; comp. Homer, *Od.* xix, 55; Herod. ix, 82). Probably, too, the art of gilding was known extensively, being applied even to the trappings of a city (Herod. i, 98; and other authorities quoted by Layard, ii, 264). Many tons of gold were spent in the building of the Temple alone, though the expression *plentiful as stones* (2 Chron. i, 15) may be considered as hyperbolic. It is, however, confirmed by the history of the other Asiatic nations, and more especially of the Persians, that the period referred to really abounded in gold, which was imported in vast masses from Africa and the Indies (Heeren, *Ideen*, i, 1, 37 sq.). The queen of Sheba brought with her (from Arabia Felix), among other presents, 120 talents of gold (2 Chron. ix, 9).

The chief countries mentioned as producing gold are Arabia, Sheba, and Ophir (1 Kings ix, 28; x, 1; Job xxviii, 16; in Job xxii, 24 the word *Ophir* is used for gold). Gold is not found in Arabia now (Niebuhr's *Travels*, p. 141), but it used to be (Artemidor. ap. Strabo, xvi, 3, 18, where he speaks of an Arabian river *ψηγμα χρυσου καταφειων*). Diodorus also says that it was found there native (*απυρον*) in good-sized nuggets (*βολαιμα*). Some suppose that Ophir was an Arabian port to which gold was brought (compare 2 Chron. ii, 7; ix, 10). Other gold-bearing countries were Uphaz (Jer. x, 9; Dan. x, 5), Parvaim (2 Chron. iii, 6), and (at least primævally) Havilah (Gen. ii, 11). No traveller in Palestine makes any mention of gold except Dr. Edward D. Clarke. At the lake of Tiberias, he observes, "Native gold was found here formerly. We noticed an appearance of this kind, but, on account of its trivial nature, neglected to pay proper attention to it, notwithstanding the hints given by more than one writer upon the subject." However, for every practical purpose, it may be said that Palestine has no gold. It is always spoken of by the Jewish writers as a foreign product. As gold was very common, relatively, in Egypt at a very early date, much of that in the hands of the early Hebrews was probably obtained thence (Exod. xii, 33; xxxii, 2, 4; xxxviii, 24).

Metallurgic processes are mentioned in Psa. lxxvi, 10; Prov. xvii, 3; xxvii, 21; and in Isa. xlvii, 6 the trade of goldsmith (compare Judg. xvii, 4, *סגור*) is alluded to in connection with the overlaying of idols with gold-leaf (Rosenmüller's *Minerals of Scripture*, p. 46-51).—Smith, s. v. See GOLDSMITH.

Gold, in the Scriptures, is the symbol of great value, duration, incorruptibility, and strength (Isa. xiii, 12; Lam. iv, 2; 2 Tim. ii, 20; Prov. xviii, 11; Job xxxvi, 19). In Dan. ii, 38, the Babylonian empire is a "head of gold," so called on account of its great riches; and Babylon was called by Isaiah, as in our version, "the golden city" (xiv, 4), but more properly "the exactness of gold." In Eccles. xii, 6, some explain the expression "or the golden bowl be broken" of the human head or skull, which resembles a bowl in form. In Rev. iv, 4, "the elders," and ix, 7, "the locusts, had on their heads crowns of gold." In the costume of the East, a linen turban with a gold ornament was reckoned a crown of gold, and is so called in the language of Scripture (Lev. viii, 9). Gold denotes spiritually the redeeming merits of Christ (Rev. iii, 18; "I counsel thee to buy of me gold tried in the fire, that thou mayst be rich"), though others interpret it of being rich in good works before God. In 1 Cor. iii, 12, it seems to denote sincere believers, built into the

Christian Church, who will stand the fiery trial.—Wemyss, *Symbol. Dict.* s. v. See METAL.

**Golden Calf** (הַגִּזְיָה, *e'gel massekah'*, a *steering image*, Exod. xxxii, 4, 8; Deut. ix, 16; Neh. ix, 19, lit. a *calf*; a *moltten image*, and therefore massive, not a mere wooden idol plated with gold), an idolatrous representation of a young bullock, which the Israelites formed at Mount Sinai (Exod. xxxii, 3 sq.; compare Psa. cvi, 19; Acts vii, 39 sq.), interdicted by Jehovah (Hengstenberg, *Pentat.* i, 159); and eventually, in the time of Jeroboam I of the kingdom of Israel, erected into a national object of worship (1 Kings xii, 28 sq.; 2 Kings x, 29; comp. xvii, 16; Hos. viii, 5 sq.; x, 5; Tobit i, 5) at Bethel and Dan (q. v.). See IMAGE. The symbol was undoubtedly borrowed from Egypt (comp. Ezek. xx, 7, 8; Acts vi, 39; see Philo, ii, 159; Hengstenberg, *Pentat.* i, 156 sq.), where living bullocks, *Apis* (q. v.), as a living symbol of sins (Plutarch, *Isid.* 33) in Memphis (Herod. iii, 25; Diod. Sic. i, 21; Strabo, xvii, 805), and *Mnevis* (q. v.) as a representation of the sun-god [see EGYPT] at Heliopolis (Diod. Sic. i, 21; Strabo, xvii, 903), were objects of worship (see Jablonsky, *Panth. Ægypt.* i, 122 sq.; 258 sq.; Creuzer, *Symbol.* i, 480 sq.). One of these two, possibly *Apis* (Lactant. *Instit.* iv, 10; Jerome, in *Hos.* iv, 15; comp. Spencer, *Leg. Rit. Heb.* i, i, 1, p. 32 sq.; Witsii *Ægypt.* II, ii, p. 61 sq.; Selden, *De diis Syr.* I, iv, p. 125 sq.; Lengerke, *Ken.* p. 464), but more probably *Mnevis* (Wilkinson, *Anc. Eg.* 2d ser. ii, 97), was the model of the golden calf which the Israelites in the desert, and perhaps Jeroboam afterwards, set up. On the contrary, Philo (*Opp.* i, 371), with whom Mill (*Dissert. Sacr.* p. 309 sq.) agrees, asserts that the Israelitish calf was an imitation of the Egyptian *Typhon*; but this view was dictated rather by theological prejudices than historical considerations. Nevertheless, the bovine symbol is found in the ornamentation of the Temple (Ezek. i, 10; 1 Kings vii, 29), and is one of wide prevalence in antiquity (Movers, *Phönice.* p. 373 sq.). See CHERUBIM.

How Moses was able to consume the golden calf with fire (שָׂרַף), and reduce it to powder (פָּרַח, pulverize), as stated in Exod. xxxii, 20, is difficult to say; for although gold readily becomes weak and to some extent friable under the action of fire, yet it is by no means thus burnt to such a degree as to be reducible to dust, and be susceptible of dissolution in drink. Most interpreters, e. g. Rosenmüller (*Schol.* ad loc.), think of some chemical process (which Moses may have learned in Egypt, see Wilkinson, *Ancient Egypt.* abridgm. ii, 136 sq.), by which gold may have been calcined, and so have been triturated as a metallic salt. Others (Ludwig, *De modo quo comminatus est a Moses vitulus aureus*, Altdorf, 1745) believe that Moses beat the fire-checked gold into leaves, and then ground these into fine particles in a mill, or filed the melted gold into dust (*scobis aurea*; comp. Josephus, *Ant.* viii, 7, 3; see Bochart, *Hieroz.* i, 363). The difficulty lies in the double procedure, and in the expression "burned with fire" (שָׂרַף), which does not seem applicable to a chemical, but rather to a mechanical process.—Winer, i, 644. See CALF, GOLDEN.

**Golden City** (מַדְבְּהָב, *madhebah'*; Sept. *ἐπισημοσύνη*, *tributum*), a term applied as an epithet of Babylon (Isa. xiv, 4), and occurring nowhere else. Some derive it from the Aramaic מַדְבְּהָב, *gold*, as a verb-form (in the Hip. part. fem.) = *gold-making*, i. e. exactress of gold, a not inapt emblem of the imperial mart (parallel hemistich מַדְבְּהָב, *grinding*); or else = a heap or *treasury* of gold (בַּיִת pref. formative of place). So Gesenius prefers with hesitation (*Thes. Heb.* p. 322 b), after Kimchi, Aben-Ezra, etc. Others (so Fürst, *Heb. Lex.* s. v.), following the Targums, Sept., Aquila, Syriac, and Arab. of Sadias, prefer to read מַדְבְּהָב, *marhebah'*,

in the sense of *oppression*, from מַדְבְּהָב, *rahab'*, to *scare* (compare Isa. iii, 5, where מַדְבְּהָב occurs in parallelism with מַדְבְּהָב). See BABYLON.

**Golden Legend** (Lat. *Aurea Legenda*), a collection of legendary accounts of saints, long very popular, in almost all the European languages. It was compiled by a Dominican, James de Voragine, also written Vragine and Varagine, about A.D. 1230. It has 177 sections, each giving an account of a particular saint or festival. It is of no historical value.

**Golden Number**, the number in the ecclesiastical calendar by which the age of the moon, and consequently the time of Easter, is determined. Easter-day being the first Sunday after the full moon, which happens upon or next after the 21st of March, to determine the time of Easter, it is only necessary to find out the precise time of the above full moon. As at the end of nineteen years the moon returns to have her changes on the same days of the solar year and of the month on which they happened nineteen years before, it follows that by the use of a cycle consisting of nineteen numbers, the various changes of the moon for every year may be found out without the use of astronomical tables. The numbers of this cycle, from their great usefulness, were usually written in the calendar in *letters of gold*: hence the name, golden number. Another account of the origin of the name is that the metonic cycle of nineteen years [see CHRONOLOGY] was originally engraved in letters of gold on marble columns. The rule for finding the golden number for any particular year is, "Add 1 to the number of years, and divide by 19; the quotient gives the number of cycles, and the remainder gives the golden number for that year; and if there be no remainder, then 19 is the golden number, and that year is the last of the cycle."—Farrar, *Eccles. Dict.* s. v.

**Golden Rose**, a rose set in precious stones, consecrated by the pope, and sent to crowned heads and others whom the pope delights to honor. This rose was first sent in 1366 by Urban V to Joan, queen of Sicily. The pope consecrates one every year on the 4th Sunday in Lent. The golden rose was sent to the queen of Spain just before her downfall in 1868.

**Golden Wedge** (כֶּתֶם, *kethem'*, Isa. xiii, 12; a poetical term, fine *gold*, as elsewhere rendered). See GOLD.

**Goldsmith** (מַטְרֵפִי, *tsoref'*, Neh. iii, 8, 32; Isa. xl, 19; xli, 7; xlvi, 6; a *founder* or *finer*, as elsewhere rendered), a *melter of gold* (i. q. מַטְרֵפִי, *matsref'*, "refiner," Mal. iii, 2, 3). See GOLD. In Neh. iii, 31, the word so rendered (מַטְרֵפִי) is rather a proper name, ZORPHEI (q. v.). "The use of gold for jewelry and various articles of luxury dates from the most remote ages. Pharaoh having 'arrayed' Joseph 'in vestures of fine linen, put a gold chain about his neck;' and the jewels of silver and gold borrowed from the Egyptians by the Israelites at the time of their leaving Egypt (out of which the golden calf was afterwards made), suffice to prove the great quantity of precious metals wrought at that time into female ornaments. It is not from the Scriptures alone that the skill of the Egyptian goldsmiths may be inferred; the sculptures of Thebes and Beni-Hassan afford their additional testimony, and the numerous gold and silver vases, inlaid work, and jewelry, represented in common use, show the great advancement they had made in this branch of art. At Beni-Hassan, the process of washing the ore, smelting or fusing the metal with the help of the blow-pipe, and fashioning it for ornamental purposes, weighing it, and taking an account of the quantity so made up, and other occupations of the goldsmith, are represented; but, as might be supposed, these subjects merely suffice, as they were intended, to give a general indication of the goldsmith's trade, without attempting to

describe the means employed" (Wilkinson, *Anc. Egypt*, *Atlas*, abridgment, ii, 138 sq.). See METALLURGY. | however, that neither Eusebius, nor Cyril, nor Jerome, nor any of the earliest historical writers ever speak of

Ancient Egyptian Goldsmiths.

1, 2, and 3, 4, are wringing out the water from the gold in a bag, *b, d*; *a, c*, frames supporting the bag while draining; *f, g*, are articles of jewelry on a frame, *e*; *h*, a box containing implements, *i*, and perhaps a crucible, *k*. The hieroglyphics (consisting of the bowl in which the metal was washed, the cloth through which it was strained, and the dropping of the water, united) read "goldsmith" or "worker in gold."

**Gol'gotha** (Γολγοθᾶ, for Aram. ܩܘܠܓܘܬܐ, *Gulgaltā'* [comp. Heb. ܩܘܠܓܘܬܐ, 2 Kings ix, 35], the skull, as being globular; the Syr. version has *gogultā'*, the vulgar name of the spot where Jesus was crucified, and interpreted by the evangelists as meaning "the place of a skull," and hence interpreted by the equivalent term CALVARY (Matt. xxvii, 33; Mark xv, 22; John xix, 17).

Three explanations of this name have been given: (1.) A tradition at one time prevailed (see Jerome *in Ephes.* v, 14; *Epist.* xlixi; *De Sanct. Locis*) that Adam was buried on Golgotha, that from his skull it derived its name, and that at the crucifixion the drops of Christ's blood fell on the skull and raised Adam to life, whereby the ancient prophecy quoted by Paul in *Eph.* v, 14 received its fulfilment—"Awake, thou Adam that sleepest"—so the old versions appear to have run—"and arise from the dead, for Christ shalt touch thee" (ἐπιψύσει for ἐπιφάσει). See the quotation in *Reland, Palest.* p. 869; also *Kaewulf, in Early Travellers*, p. 39. The skull commonly introduced in early pictures of the crucifixion refers to this. (2.) Jerome says elsewhere (*in Matt.* xxvii, 33) that it was a spot where executions ordinarily took place, and therefore abounded in skulls; but, according to the Jewish law, these must have been buried, and therefore were no more likely to confer a name on the spot than any other part of the skeleton. In this case, too, the Greek should be *τόπος κρανίου*, "of skulls," instead of *κρανίον*, "of a skull," still less a "skull," as in the Aramaic, and in the Greek of Luke. If this had been the usual place of execution, there is no reason why all the evangelists should have been so explicit in the name. That it was a well-known spot, however, has been inferred by many from the way in which it is mentioned in the gospels, each except Matthew having the definite article—"the place Golgotha"—"the place which is called a skull"—"the place (A. V. omits the article) called of, or after, a skull." That it was the ordinary spot for such purposes has been argued from the fact that, to those at least who carried the sentence into effect, Christ was but an ordinary criminal; and there is not a word to indicate that the soldiers in "leading him away" went to any other than the usual place for what must have been a common operation. But the act of crucifixion was so common a punishment among the Romans, especially upon Jews, that it seems to have been performed almost anywhere. See CRUCIFIXION. (3.) The name has been held to come from the look or form of the spot itself, bald, round, and skull-like, and therefore a mound or hillock, in accordance with the common phrase "Mount Calvary." It must be remembered,

city" (John xix, 20), at a place called Golgotha (Matt. xxvii, 33), and apparently beside some public thoroughfare (xxvii, 39) leading to the country (Mark xxv, 21). The tomb in which he was lain was hewn out of the rock (Mark xv, 46), in a garden or orchard (κῆπος), at the place of crucifixion (John xix, 41, 42). Neither Golgotha nor the tomb is ever afterwards mentioned by any of the sacred writers. No honor seems to have been paid to them, no sanctity attached to them during the apostolic age, or that which immediately succeeded it. It is not till the beginning of the 4th century that we find any attempt made to fix the position of, or attach sanctity to Golgotha. Eusebius then informs us that the emperor Constantine, "not without divine admonition," resolved to uncover the holy tomb. He states that wicked men had covered it over with earth and rubbish, and had erected on the spot a temple of Venus. These were removed, and the tomb and Golgotha laid bare. A magnificent church was built over them, and consecrated in A.D. 335 (*It. Constantin.* iii, 26-33). There can be little doubt that the present Church of the Sepulchre occupies the site of that built by Constantine. The only writer who seriously impugns their identity is Mr. Fergusson (*Essay on the ancient Topography of Jerusalem*, London, 1847), who asserts that Golgotha was on Mount Moriah, and that the building now called the Mosque of Omar, or Dome of the Rock, is the church erected by Constantine over the Holy Sepulchre. Beneath its dome is a projecting rock with a cave in it; this, he says, is the real tomb. The arguments on which his theory rests are mainly architectural, and are unquestionably forcible; but his topographical and historical argument is a complete failure. He says the site was transferred at the time of the Crusaders; but for this there is not a shadow of evidence. Any one who has examined on the spot the topography of Mount Moriah, and who has closely inspected the masonry of the massive wall which surrounds the whole of the Haram area, must see that this theory is untenable. The only point to be settled is, whether the church of Constantine stood on the real Golgotha. Eusebius is our first witness, and he lived 300 years after the crucifixion. His story is repeated with some changes, and numerous embellishments, by subsequent writers (Socrates, *H. E.* i, 17; Sozom. *H. E.* ii, 1; Theodoret, *Hist. Eccl.* i, 18). That the spot is now marked by the Church of the Sepulchre was the almost universally accredited tradition down to the last century; for though many were struck by the singular position of the church, yet they got over that difficulty by various means (Robinson, *Bib. Res.* i, 408). The first who openly opposed the tradition was Korte, a

Golgotha as a hill. Yet the expression must have become current at a very early period, for the Bordeaux pilgrim describes it in A.D. 333 as *Monticulus Golgotha* (*Itinerarium Hierosol.*, ed. Wessel., p. 593). Dr. Robinson suggests that the idea of a mound originated in the fact that a rounded rock or monticule existed on the place where, in the beginning of the 4th century, tradition located the scene of the crucifixion (*Bib. Res.* ii, 376).

All the information the Bible gives us regarding the site of Golgotha may be stated in a few words. Christ was crucified "without the gate" (Heb. xiii, 12), "nigh to the

German traveller who visited Jerusalem in 1738. He was followed by Dr. Clarke (*Travels*), Scholz (*Reise, and De Golgotha Säu*), Robinson, Tobler (*Golgotha*), and others. The identity of Golgotha has been maintained by Von Raumer (*Palästina*), Krafft (*die Topographie Jerusalems*), Tischendorf (*Reise*, ii, 17 sq.), Schulz (*Jerusalem*, p. 59 sq., 96 sq.), and especially Williams in his *Holy City*. The tradition that fixes the site of Golgotha upon that of the present Church of the Holy Sepulchre is not older than the 4th century, being first mentioned by Eusebius, and attributed to the miraculous discovery of the holy cross by the empress Helena. Yet, in the absence of any other tradition respecting a site which could not well have been forgotten, and in the difficulty of finding any other position answering to the requirements of the case, we may well coincide in the belief that it represents the true locality (see Strong's *Harm. and Expos. of the Gosp.* Append. i, p. 4, etc.). The question mostly depends upon the course of Josephus's second wall, and the position of Aera as determined by that of the valley of the Tyropeon. Dr. Robinson's views of the relative position of these leading portions of Jerusalem seems to be unnatural and untenable, being apparently influenced by an excessive jealousy of all traditional evidence. He therefore decides against the identity of the site of Calvary and the Holy Sepulchre (*Bib. Researches*, i, 408-516). His arguments, however, are vehemently combated by Mr. Williams (*Holy City*, ii, 13-64), and a long and bitter controversy has ensued (see the *Bibliotheca Sacra* for 1843, p. 154-202; 1846, p. 413-460, 605-652; 1848, p. 92-96). Dr. Robinson to the last maintained his former opinion (new ed. of *Researches*, i, 407-418; iii, 254-263). Other travellers are equally divided as respects the identity of these places, but it may be remarked that Dr. Robinson's reasoning has failed to satisfy even German scholars of the impossibility of this position of Golgotha. The evidence of locality to be gathered from the Gospel statements as to the scene of the tomb of our Lord is as follows: The palace of Pilate and the judgment hall stood at the north-west angle of the Haram area, where the house of the pasha still stands. There Jesus was condemned, scourged, and mocked. Thence the soldiers "led him out" (Mark xv, 20) to crucify him. They met a man called Simon "coming out of the country," and compelled him to bear the cross. They brought him unto Golgotha, and there they crucified him. The passers by reviled him. His mother and some others stood by the cross (John xix, 25). "All his acquaintance stood afar off beholding these things" (Luke xxiii, 49). A combination of these statements of the evangelists shows that it lay just outside the walls of the city, opposite the tower of Antonia, and therefore probably at the north-west. See JERUSALEM. The traditional Golgotha is now a little chapel in the side of the Church of the Sepulchre, gorgeously decorated with marble, and gold, and silver. The monks profess to show the hole in which the cross was planted, and a rent in the rock made by the earthquake! (Porter, *Hand-book for Syr. and Pal.* p. 166; Williams, *Holy City*, ii, 226 sq.)—Kitto, s. v.; Smith, s. v. See Plessing, *Ueb. Golgotha u. Christi Grab* (Hilf. 1789); Scholz, *De Golgotha et J. C. sepulcri situ* (Bonn, 1825); Schultze, *De vera causa nominis Golgotha* (Nurnb. 1732); Themis, *Golgotha et sanctum sepulchrum* (in Illgen's *Zeitschr. f. hist. Theol.* 1842, iv, 3-34); Zorin, *De Christi extra portam supplicio* (in his *Opusc.* ii, 193-7); Finlay, *Site of the Holy Sepulchre* (Lond. 1847); Berggren, *Bibel und Josephus u. Jerusalem u. des Heilige Grab, wider Robinson und neuer Zionspülger* (Lund, 1862); Tobler, *Golgotha, seiner Kirchen u. Klöster* (Berl. 1850). See CALVARY.

**Goli'ath** (Heb. *Golyath'*, גִּלְיָת; Sept. Γολιάθ, Josephus Γολιάζος), a famous giant of Gath, who "morning and evening for forty days" defied the armies of Israel; but was eventually slain by David, in the re-

markable encounter, with a sling (1 Sam. xvii). B. C. 1063. Although repeatedly called a Philistine, he was possibly descended from the old Rephaim, of whom a scattered remnant took refuge with the Philistines after their dispersion by the Ammonites (Dent, ii, 20, 21; 2 Sam. xxi, 22). Some trace of this condition may be preserved in the giant's name, if it be connected with גִּלְיָת, an exile, as thought by Gesenius (*Thes. Heb.* p. 285). Simonis, however, derives it from an Arabic word meaning stout (*Onom.* s. v.); while Fürst merely indicates it as of Philistian etymology (*Heb. Lex.* s. v.). Hitzig (*Gesch. u. Mythol. der Philist.* p. 7) regards it as merely = Γαυλείτης, i. e. sorcerer. His height was "six cubits and a span," which, taking the cubit at 21 inches, would make him 10½ feet high. But the Sept. (at 1 Sam. xvii, 4) and Josephus (*Ant.* vi, 9, 1) read "four cubits and a span." This will make him about the same size as the royal champion slain by Antimenidas, brother of Alcæus (*ἀπολείποντα μίαν μόνον παχέων ἀπὸ πέμπων*, ap. Strabo, xiii, p. 617, with Müller's emendation). Even on this computation Goliath would be, as Josephus calls him, ἀνὴρ παρμεγέθιστατος—a truly enormous man. (See Wichmannshausen, *De armatura Gol.* Viteb. 1711.) After the victory David cut off Goliath's head (1 Sam. xvii, 51; compare Herod. iv, 6; Xenoph. *Anab.* v, 4, 17; Niebuhr mentions a similar custom among the Arabs, *Beschr.* p. 304), which he brought (ver. 54) to Jerusalem (probably after his accession to the throne, Ewald, *Gesch.* iii, 94), while he hung the armor in his tent. See FIGURE. His sword was afterwards received by David in a great emergency from the hands of Abimelech at Nob, where it had been preserved as a religious trophy (1 Sam. xxi, 9). See GIANT.

The scene of this famous combat (see Trendelenburg, *De pugna Dav. cum Goliatho*, Gedan. 1792) was the Valley of the Terebinth, between Shochoh and Azekah, probably among the western passes of Benjamin, although a confused modern tradition has given the name of *Ain-Jahlad* (spring of Goliath) to the spring of Harod, or "trembling" (Stanley, *Palest.* p. 342; see Judg. vii, 1). See ELAH, VALLEY OF. This modern name, however, may rather be (= the spring of Gilead) a reminiscence of Gideon's exploit (Judg. vii, 3). See GILEAD. The circumstances of the combat (q. v.) are in all respects Homeric, free from any of the puerile legends which Oriental imagination subsequently introduced into it; as, for instance, that the stones used by David called out to him from the brook, "By our means you shall slay the giant," etc. (Hottinger, *Hist. Orient.* i, 3, p. 111 sq.). The fancies of the Rabbis are yet more extraordinary. By the Mohammedans Saul and Goliath are called Taluth and Kaluth (*Jabul* in Koran, ii, 131 sq.), perhaps for the sake of the homoioteleuton, of which they are so fond (Hottinger, *Hist. Orient.* i, 3, p. 28). Abulfeda mentions a Canaanite king of the name Jalut (*Hist. AnteiSam.* p. 176); and, according to Ahmed al-Fassi, *Gialout* was a dynastic name of the old giant-chiefs of the Philistines (D'Herbelot, *Bibl. Or.* s. v. Gialont). In the title of the psalm added to the psalter in the Sept. we find τῷ Δαυὶδ πρὸς τὸν Γολιάθ; and although the allusions are vague, it is thought by some that this psalm may have been written after the victory. This psalm is given at length under DAVID, p. 687 (see Hilscher, *Psa. centes. quinquages. prim. illustr.*, acced. vita Goliathi, Bautzen, 1716). It is strange that we find no more definite allusions to this combat in Hebrew poetry; but it is the opinion of some that the song now attributed to Hannah (1 Sam. ii, 1-10) was originally written really in commemoration of David's triumph on this occasion (Thenius, *Die Bücher Sam.* p. 8; comp. Bertholdt, *Eind.* iii, 915; Ewald, *Poet. Bücher des A. B.* i, 111). See PSALMS.

In 2 Sam. xxi, 19, we find that another Goliath of Gath, of whom it is also said that "the staff of his

spear was like a weaver's beam," was slain by Elhanan, also a Bethlehemite. St. Jerome (*Quest. Heb. ad loc.*) makes the unlikely conjecture that Elhanan was another name of David. The A.V. here interpolates the words "the brother of," from 1 Chron. xx, 5, where this giant is called "Lahmi." See Stiebritz, *Die Davidische Erlegung des Goliath's* (Halle, 1742).—Smith, s. v. See ELHANAN.

**Golius, Jacobus**, was born at the Hague in 1596. After finishing his studies at the University of Leyden, he was called to give instruction in the Greek language at Rochelle. In 1624 he became professor of the Arabic language, and in 1629 also of mathematics at the University of Leyden. He died Sept. 28, 1667. He brought out an edition of the New Testament in modern Greek. He also had the Confession of Faith of the Reformed Church of Holland, the Heidelberg Catechism, and the Liturgy translated into modern Arabic by an Armenian for circulation in the Levant. His principal work is his *Lexicon Arab.-Latinum cum ind. Lat.* It was first published in London, and subsequently at Leyden, 1653, in fol. See Glasius, *Godgeleerd Nederland*, i, 534; Bayle, *Dict. hist. et Crit.* (J. P. W.).

**Golius, Petrus**, brother of J. Golius, was brought up by his maternal uncle, Jan Hemelaar, canon at Antwerp, in the Roman Catholic Church, in which he remained through life. He shared his brother's fondness for Oriental studies. After spending several years in Palestine, he was appointed professor of Oriental languages at Rome. He translated Thomas à Kempis's work, *De Imitatione Christi*, into Arabic, and labored on an edition of the Bible in the same language. At the age of seventy-four he went to convert the heathen on the coasts of Malabar. He died at Surat. See Glasius, *Godgeleerd Nederland*, i, 536; Bayle, art. Hemelar. (J. P. W.).

**Gomar, Francis**, an eminent Calvinistic divine and polemic, was born Jan. 30, 1563, at Bruges, and educated at Strasburg under John Sturmius, and at Neustadt, where the professors of Heidelberg found a refuge when Louis, the elector palatine, had banished them. In 1582 he came to England, and attended at Oxford the divinity lectures of Dr. John Rainolds, and at Cambridge those of Dr. William Whittaker, and at this latter university he was admitted to the degree of B. D. in 1584. The elector Louis dying in 1583, prince Casimir, his brother, restored the professors of Heidelberg, to which place Gomar returned from Cambridge, and spent two years there. In 1587 he became pastor of the Flemish church at Frankfurt, and exercised the functions of that office until 1593. In 1594 he was appointed professor of divinity at Leyden. Here he remained teaching quietly until 1603, when he became the zealous opponent of his new colleague Arminius. Arminius, as is well known, opposed, and Gomar defended, the peculiarities of Calvin, and in this controversy Gomar displayed a most violent, virulent, and intolerant spirit, and endeavored by various publications to excite the indignation of the States of Holland against his rival. The combatants disputed before the States in 1608. See ARMINIUS. On one of these occasions Barneveldt, in a short address to them, declared that he thanked God their contentions did not affect the fundamental articles of the Christian religion; Gomar replied that he "would not appear before the throne of God with Arminius's errors." On the death of Arminius, Gomar, 1609, retired to Middleburg, whence he was invited by the University of Saumur to be professor of divinity, and four years after he exchanged this office for the professorship of divinity and Hebrew at Groningen. He attended the Synod of Dort in 1618, where he took an active part in the condemnation of the Arminians. See DORT. He visited Leyden in 1633 to revise the translation of the Old Testament, and died at Groningen Jan. 16, 1641.

His works were published at Amsterdam in 1645 (fol.); also in 1664, *Opera omnia theologica* (Amsterd. fol.). See Bayle; Hook, *Eccles. Biog.* v, 332; Mosheim, *Ch. Hist.* cent. xvii, pt. ii. ch. ii, § 11; Hoefler, *Nouv. Biog. Générale*, xxi, 136; Herzog, *Real-Encyclop.* v, 231.

**Gomè.** See BULRUSH.

**Go'mer** (Heb. *id.* גֹּמֶר, *vanishing*, or perh. *heat*, i. e. passion; Sept. Γαμῆρ and Γομῆρ or Γόμερ), the name of a man and of a race descended from him, also of a woman.

**I.** The eldest son of Japheth (B.C. post 2514), son of Noah, and father of Ashkenaz, Riphath, and Togarmah (Gen. x, 2), whose descendants seem to have formed a great branch of the south-eastern population of Europe (Gen. x, 3; compare 1 Chron. i, 5). In the Scriptures, however, the people named Gomer (mentioned with Togarmah in the armies of Magog, Ezek. xxxviii, 6) imply rather an obscure and but vaguely-known nation of the barbarous north (Rosenmüller, *Alterth.* 1, i, 235 sq.). The Jerusalem Targum renders Gen. x, 3 by גֹּמֶר אֲפִרְכָּי, *African*; Arab. *ġ-ġ-r*, *Turk*. Bochart (*Phaleg*, iii, 81) identifies the name, on etymological grounds, with *Phrygia* (from *ῥῆμα*, to consume, and *φούρια*, from *φούριον*, to roast); Phrygia being, according to ancient testimony, a χώρα ἐπιπέδωτος, and part of it bearing the name of κατακλιναμένη, or burnt (Strabo, xiii, 628; Diod. iii, 138). But to this it seems a fatal objection that the Phrygians formed only a branch of the Togarmians (Josephus, *Ant.* i, 6, 1; Jerome, *Quest. in Gen.* x, 3), and therefore cannot be regarded as the stem whence the Togarmians themselves sprang. The same objection applies to the suggestion that Gomer is the German race (Talm. *Yoma*, 10 a); for this comes under Ashkenaz, a branch of Gomer. Wahl (*Asien*, i, 274) compares *Gamir*, the ancient name for Cappadocia, and Kalisch (*Comm. in Gen.*) seeks to identify it with the *Chomari*, a nation in Bactriana, noticed by Ptolemy (vi, 11, § 6). Most of the interpreters take Gomer to be the ancestor of the Celts, and more especially of the *Cimmerii*, *Κυμῆριοι* (Herodotus, i, 6, 15, 103), who were already known in the time of Homer (*Odys.* xi, 14). To judge from the ancient historians (Herodotus, Strabo, Plutarch, etc.), they had in early times settled to the north of the Black Sea, and gave their name to the Crimea (from the Arab. *krim*, by transposition from the Heb.), the ancient *Chersonesus Taurica*, where they left traces of their presence in the ancient names, Cimmerian Bosphorus, Cimmerian Isthmus, Mount Cimmerium, the district Cimmeria, and particularly the Cimmerian walls (Herod. iv, 12, 45, 100; Æsch. *Prom. Vinct.* 729), and in the modern name *Crimea*. They forsook this abode under the pressure of the Scythian tribes, and during the early part of the 7th century B.C. they poured over the western part of Asia Minor, committing immense devastation, and defying for more than half a century the power of the Lydian kings. They were finally expelled by Alyattes, with the exception of a few who settled at Sinope and Antandrus. It was about the same period that Ezekiel noticed them as acting in conjunction with Armenia (Togarmah) and Magog (Scythia). The connection between Gomer and Armenia is supported by the tradition, preserved by Moses of Chorene (i, 11), that Gamir was the ancestor of the Haichian kings of the latter country. After the expulsion of the Cimmerians from Asia Minor their name disappears in its original form; but there can be little reasonable doubt that both the name and the people are to be recognised in the *Cimbri* of the north of Europe, described by the classical writers sometimes as a German, sometimes as a Celtic race. The preponderance of authority is in favor of the latter (Sallust, *Jug.* 114; Florus, iii, 3; Appian, *De Reb. Ill.* 4; *Bell. Cirtli.* i, 29; iv, 2; Diodor. v, 32; xiv, 114; Plutarch, *Cam.* 15; *Mar.* 25, 27; Dion. Cass.

xliv, 42; Justin, xxiv, 8; xxxviii, 3, 4); and the probability is that the Cimbrri were Celtic, and of the same tribe as the Cymry of Britain (Prichard, *Eastern Origin of the Celtic Nations*, by Latham, p. 142; Latham, *Germania of Tacitus*, Epilegom. p. clxv sq.). By the ancients the Cimmerii and the Cimbrri were held to be one people; and the abodes of the latter were fixed during the Roman empire in the north and west of Europe, particularly in the Cimbric Chersonese (Denmark), on the coast between the Elbe and Rhine, and in Belgium, whence they had crossed to Britain, and occupied at one period the whole of the British isles, but were ultimately driven back to the western and northern districts, which their descendants still occupy in two great divisions, the Gael in Ireland and Scotland, the Cymry in Wales. The latter name preserves a greater similarity to the original Gomer than either of the classical forms, the consonants being identical. The link to connect "Cymry" with "Cimbrri" is furnished by the forms *Cambria* and *Cumberland*. The whole Celtic race may therefore be regarded as descended from Gomer, and thus the opinion of Josephus (*Ant.* i, 6, 1), that the Galatians were sprung from him, may be reconciled with the view propounded (Michaelis, *Supplem.* p. 335 sq.). From the place Gomer occupies in the roll of nations in Genesis, it may be presumed that the people descended from him was one of the oldest, and this would fall in with the half-mythic character of the Cimmerii as they appear in Homer. It is plain also from Ezek. xxxviii, 6 that the race of Gomer was regarded by the Hebrews as living to the far north of Palestine, and this accords exactly with the site assigned to the Cimmerii by Herodotus, who places them on the Caucasus, and represents them as skirting the Euxine and coming down on Asia Minor by way of Colchis, and across the river Halys. If the Cimmerii and the Cimbrri are identified, and the latter be regarded as a Celtic-speaking people, the statement of Jerome that the Galatæ spoke a language not greatly differing from that of the Treveri (*Proleg. Lib. ii, ad Ep. ad Galatas*) may have an important bearing on the subject of the migrations of the original Gomerian stock.—Smith, s. v.; Kitto, s. v. See ETNOLOGY.

2. The name of the daughter of Diblaim, a harlot who became the wife or concubine (according to some, in vision only) of the prophet Hosea (Hos. i, 3). B.C. cir. 725.

**Gomor'rah** (Heb. *Amorah'*, גֹּמֹרְרָה, prob. *submer-sion*; Sept. ἡ or τὰ Γόμορρα, N. T. "Gomorrha"), one of the four cities in or near the vale of Siddim (Gen. x, 19; xiii, 10), apparently overwhelmed by the destruction which caused the Dead Sea (Gen. xix, 24, 28). B.C. 2064. See SIDDIM. Its king, Birsha, was one of those that joined battle with the forces of Chedorlaomer, and in the rout Lot's family became involved until rescued by Abraham (Gen. xiv, 2, 8-11). B.C. cir. 2080. The allusions in Scripture to the "cities of the plain" appear to indicate that they stood close together (Gen. xiii, 10; xiv, 8-11), and that they lay near the southern extremity of the present lake, for Abraham, on going to the brow of the mountain near Hebron, "looked toward Sodom and Gomorrah, and all the plain" (Gen. xix, 28), and this he could not have done had they been situated further north. The battle between the eastern kings and the people of the plain took place "in the vale of Siddim, which is the Salt Sea" (Gen. xiv, 3). The phrase, however, is not quite decisive as to the precise position; for, as Reland observes (*Palæst.* p. 254), it is not stated that the five cities stood in the vale of Siddim, although this perhaps may be inferred, and seems to be implied in the name of Gomorrah. This city appears to have been next in importance to Sodom, as it is always mentioned second, and often these two of the four cities alone are named, as types of impiety and wicked-

ness (Gen. xviii, 20; Rom. ix, 29). What that atrocity was may be gathered from Gen. xix, 4-8. Their miserable fate is held up as a warning to the children of Israel (Deut. xxix, 23); as a precedent for the destruction of Babylon (Isa. xiii, 19, and Jer. i, 40), of Edom (Jer. xlix, 18), of Moab (Zeph. ii, 9), and even of Israel (Amos iv, 11). By Peter in the N. T., and by Jude (2 Pet. ii, 6; Jude ver. 4-7), it is made "an ensample unto those that after should live ungodly," or "deny Christ." Similarly, their wickedness rings as a proverb throughout the prophecies (see Deut. xxxiii, 32; Isa. i, 9, 10; Jer. xxiii, 14). Jerusalem herself is there unequivocally called Sodom, and her people Gomorrah, for their enormities; just in the same way that the corruptions of the Church of Rome have caused her to be called Babylon. On the other hand, according to the N. T., there is a sin which exceeds even that of Sodom and Gomorrah, that, namely, of which Tyre and Sidon, Capernaum, Chorazin, and Bethsaida, were guilty when they "repented not," in spite of "the mighty works" which they had witnessed (Matt. x, 15); and Mark has ranged under the same category all those who would not receive the preaching of the apostles (vi, 11). See SODOM.

To turn to their geographical position, one passage of Scripture seems expressly to assert that the vale of Siddim had become the "salt," or dead, "sea" (Gen. xiv, 3), called elsewhere too the "sea of the plain" (Josh. xii, 3); the expression, however, occurs antecedently to their overthrow. Josephus (*Ant.* i, 9) says that the late Asphaltites, or Dead Sea, was formed out of what used to be the valley where Sodom stood; but elsewhere he declares that the territory of Sodom was not submerged in the lake (*Jar.* iv, 8, 4), but still existed parched and burnt up, as is the appearance of that region still; and certainly nothing in Scripture would lead to the idea that they were destroyed by submersion (though they may have been submerged afterwards when destroyed), for their destruction is expressly attributed to the brimstone and fire rained upon them from heaven (Gen. xix, 24; see also Deut. xxix, 22, and Zeph. ii, 9; also Peter and Jude before cited). St. Jerome, in the *Onomasticon*, merely says of Sodom, "civitas impiorum divino igne consumpta juxta mare mortuum" (s. v. Σόδομα, Sodom; comp. s. v. Γόμορρα, Gomorra). The whole subject is ably handled by Cellarius (ap. Ugol. *Thesaur.* vii, dcxxxix-lxxviii), though it is not always necessary to agree with his conclusions. Among modern travellers, Dr. Robinson shows that the Jordan could not have ever flowed into the gulf of Akal ah; on the contrary, that the rivers of the desert themselves flow northwards into the Dead Sea. See ARABAH. This, added to the configuration and deep depression of the valley, serves in his opinion to prove that there must have always been a lake there, into which the Jordan flowed; though he admits it to have been of far less extent than it now is, and even the whole southern part of it to have been added subsequently to the overthrow of the four cities, which stood, according to him, at the original south end of it, Zoar probably being situated in the mouth of wady Kerah, as it opens upon the isthmus of the peninsula. In the same plain, he remarks, were slime-pits, or wells of bitumen (Gen. xiv, 10); "salt-pits" also (Zeph. ii, 9); while the enlargement of the lake he considers to have been caused by some convulsion or catastrophe of nature connected with the miraculous destruction of the cities—volcanic agency, that of earthquakes, and the like (*Bibl. Res.* ii, 187-192, 2d ed.). He might have adduced the great earthquake at Lisbon as a case in point. The great difference of level between the bottoms of the northern and southern ends of the lake, the former 1300, the latter only 13 feet below the surface, singularly confirms the above view (Stanley, *S. & P.* p. 287, 2d ed.). Pilgrims of Palestine formerly saw, or fancied that they saw, ruins of towns at the bottom of the sea, not

far from the shore (see Maundrell, *Early Travellers*, p. 451).—Smith, s. v.; Kitto, s. v. M. de Sauley is confident he has discovered the remains of Gomorrah in certain ruins which he reports in a valley by the name of *Gumrar*, on the N. W. shore of the Dead Sea, just north of Ain el-Feshkah (*Dead Sea*, ii, 49); but Van de Velde makes light of this account (*Narrative*, ii, 115 sq.), which, indeed, lacks confirmation, especially as it is generally believed that the sites of these cities are all buried under the southern shallows of the lake. See DEAD SEA.

**Gomorrha**, the manner in which the name GOMORRAH (q. v.) is written in the A. V. of the apocryphal books and the N. T., following the Greek form of the word Γομόρρα (2 Esd. ii, 8; Matt. x, 15; Mark vi, 11; Rom. ix, 29; Jude 7; 2 Pet. ii, 6).—Smith, s. v.

**Gondulf**, or **Gundulf**, a Norman priest, was born in the neighborhood of Rouen in 1023. After entering the Church, he made a pilgrimage to Jerusalem in company with the archdeacon William, afterwards archbishop of Rouen. On his return, being in danger of shipwreck, he vowed to become a monk, and in 1059 he entered the convent of Bec, where he became intimate with Anselm. Lanfranc, prior of Bec, being in 1063 appointed abbot of St. Stephen of Caen, chose Gondulf for his coadjutor, and still retained him when called in 1070 to the archbishopric of Canterbury. Through his influence Gondulf was created archbishop of Rochester March 19, 1077, and restored that see to its former importance. After the death of Lanfranc he administered for four years the archbishopric of Canterbury, to which Anselm was then appointed. The pleasure of their meeting was soon disturbed by difficulties occurring between the new archbishop, William Rufus, and Henry I. Gondulf, while faithful to his Church and to his friend, managed, however, to remain on good terms with both parties, and after king William's death exerted himself to prevent civil war, and to secure the crown for Henry. The services gave him great influence, which he used for the benefit of his diocese. He died at Rochester in 1108. Gondulf enjoyed great reputation for learning; he devoted his time largely to the correction of the text of the Vulgate version. He was also renowned for his eloquence, but none of his sermons are extant now. Of his correspondence with Anselm there remains but one letter, which, with an epistle to the monks of Bec, is all we have of his writings. See *Vita Gondulphi* (in Wharton, *Anglia sacra*); *Hist. littéraire de la France* (vol. ix); Rémusat, *Hist. de St. Anselme*; Hofer, *Nouv. Biog. Générale*, cxxi, 196.

**Gonesius**, PETER (*Conyza*, *Goniuszki*, *Gonionizki*), one of the early Unitarians of Poland, was born in Goniadz in 1525. His opposition to the doctrines of the Reformation in the early part of his public career won him the support of the Roman Catholics; but having in 1554 undertaken a journey through Germany and Switzerland, he became imbued with the doctrines of Servetus, and on his return to Poland he rejected all creeds except the Apostles', and openly advocated Unitarianism. He declared himself against infant baptism also. Chiefly through his influence, the Reformed Church of Poland was divided in 1565 into two parties, Trinitarians and Unitarians. See Sandii *Bibliotheca Antitritin.* p. 40; Fock, *Der Socinianismus* (Kiel, 1847); Lukaszewicz, *Geschichte d. reformirten Kirche in Lithauen*, ii, 69 (Lips. 1848-50); Mosheim, *Ch. Hist.* iii, 228, note 12; Herzog, *Real-Encyclop.* v, 245; Krasinski, *Reformation in Poland* (Lps. 1841).

**Gonfalon**, a large colored banner, cut at the bottom so as to leave pendant points. The name is applied principally to ecclesiastical banners, carried around to raise the vassals of a church fief to defend church property. The color was varied according to the character of the patron saint of the church or monastery, e. g. red for a martyr, green for a bishop, etc. The

bearers were called *gonfaloniers*. Some writers ascribe to these the origin of the practice of carrying banners in the Roman Catholic processions.

**Gonorrhœa**. See ISSUE.

**Gonsalvi**. See CONSALVI.

**Gonzaga**. See ALOYSIUS OF GONZAGA.

**Gonzalez** (**GONZALO**) **de Berceo**, JUAN, the most ancient Spanish poet, was born in 1196 at Avila, in Castile, entered the Benedictine order, and died in 1266. He is the author of poetical works on the Mass, on Doomsday, on the Virgin Mary, on the Life of St. Dominic, etc. They are printed in Sanchez's *Colleccion de poesias castellanas anteriores al siglo xv* (Madrid, 1775-90, 3 vols.). Some writers on Spanish literature attribute to his works a decisive influence on the peculiar development of Spanish poetry. (A. J. S.)

**Gonzalez**, TIRSO, a Spanish Roman Catholic theologian of the 17th century. Having entered the order of Jesuits, he became professor at the University of Salamanca, and was elected general of his order about 1685. He opposed the doctrine of *probabilism* (q. v.), which was upheld by the casuists of the order, and affirmed that it originated not among the Jesuits, but among the Augustinians, one of whom, Michael Saloniis (1592), was its author. According to Gonzalez, it was only in the year after it was promulgated by Saloniis that it was adopted by the Jesuit Valentinia, and developed in 1698 by Vasquez. While admitting that the doctrine was held by the majority of the Jesuits, he pointed at Fernand Rebello, Paolo Comitelo, and Andrea Le Blanc (*Candidus Philoletes*), who had opposed it in their writings. Yet Gonzalez did not consider it obligatory for all the members of his order to adopt his views; he permitted each one to follow his opinions and *his interest*. The work he wrote on the subject encountered so much opposition that it remained twenty-five years in MS. before being printed, and afterwards appears to have found but few partisans among the Jesuits. Father Oliva, director of the Index, greatly opposed the book, notwithstanding the approbation given to it by pope Innocent IX. The first edition bore the title *Fundamentum Theologie moralis, id est tractatus theologicus de recto uso opinionum probabilium* (Dillingen, 1689; Naples, Rome, Lyons, Antwerp, 1694, 4to). The text of the latter editions has been altered in several passages, and the earlier ones have been destroyed. Gonzalez wrote also *De Infallibilitate Romani Pontificis in definiendis fidei et morum controversiis extra concilium generale* (Rome, 1689, 4to; printed by order of Innocent IX, and suppressed by Alexander VIII); — *Manuductio ad conversionem Mahometanorum* (Dillingen, 1680, 4to); — *Veritas Religiois catholice demonstrata* (Lille, 1696, 12mo). See Dupin, *Bibli. des Auteurs ecclés. du 17<sup>me</sup> siècle* (pt. iv); *Jour. des Savants* (1695, 1698); Richard et Giraud, *Bibl. sacrée*; Hofer, *Nouv. Biog. Générale*, cxxi, 252.

**Good** (Lat. *bonum*) is variously defined by moralists, according to the nature of their ethical theories. The Stoic would define it to be that which is according to nature; the Epicurean, that which increases pleasure or diminishes pain; the Idealist, that which accords with the fitness of things; the Christian theologian, that which accords with the revealed will of God. So the philosophical schools give various and even contradictory definitions of the highest good (*summum bonum*). Thus Aristippus placed it in pleasure in activity; Epicurus, in pleasure in repose; Zeno, in tranquillity of mind; Kant, in well being conditioned on morality; the Materialists, in self-love.

Schleiermacher states his views of the subject as follows: In ethics there are three fundamental conceptions—duty, virtue, good. Duty is the obligation of moral action; virtue is the moral power of the agent; the highest good is the objective aim of both. In the systems of Kant and Fichte, ethics is the doc-

trine of *duty*, and its development becomes simply a treatment of individual virtues. In opposing this view, Schleiermacher maintains that a system of moral precepts, or *formulas of duty*, even though it might embrace the whole life of man, could only be applied in isolated cases and single acts, leaving the moral life as a whole still unexplained. It is only in a very limited sphere that a moral agent acts *alone*, and without reference to other agents; and his *virtue* has relation to a general state of things, to produce which other agents co-operate. Schleiermacher charges the existing ethical systems with making an unnatural schism between the law of action (*duty*) and the active power (*virtue*) on the one hand, and the resulting *actions* on the other hand; and also with leaving entire spheres of human action, of unquestionably moral character, in the domain of *adiaphora* (things indifferent), instead of bringing them under the authority of moral law. To remedy these alleged confusions, Schleiermacher seeks for an *organic principle* of ethics, which shall be at once objective, systematic, and comprehensive. He finds it in the *highest good*, which can be completely apprehended, not in its relations to the individual merely, but with reference to the human race as a whole. From this principle the whole sphere of ethics may be mapped, placing universal nature on the one hand, and the organizing reason (the universal reason of humanity) on the other. In this theory Schleiermacher expressly recognises the authority of Plato, who, in his *Philebus* investigated the "highest good." Aristotle, in whom the idea of *virtue* was the highest, places the highest good in *εὐδαιμονία*, individual happiness—not, however, in the Epicurean sense, but in the sense of *ζωῆς τελείας ἐνέργεια κατ' ἀρετὴν τελείαν*, the working out or realization of a perfect life through perfect virtue.

In the further development of the history of ethics, so far as relates to the definition of the "highest good," we must particularly notice the distinction (1) between the individual and the general, indicated in Plato and Aristotle, and carried to the greatest extent by Epicurus and the Stoics; (2) the resulting distinction between the objective and subjective, according to which the "highest good" is, on the one hand, a *condition* of man (e. g. Epicurean enjoyment, Stoical endurance); or, on the other hand, a *product* of human activity, the end of humanity as a whole; (3) the consequent moral theories of *pleasure* or of *activity*, according to the former of which the "highest good" lies in enjoyment, while according to the latter it lies in moral activity. In the language of Christian theology, "the highest good" is the *kingdom of God*, which includes within itself all ethical elements, the individual and the general, activity and happiness, theory and practice, means and end. The *means* of securing the "highest good" is to promote the advancement of that kingdom; the *end*, the "highest good" itself, is the coming of that kingdom, to the individual, in his personal salvation; to the universal race, in the realization of the promise "God shall be all in all!" See Schleiermacher, *Ethische Abhandlungen*, in his *Phil. Nachlassen*, ii, 12, 13; Herzog, *Real-Encyclop.* s. v. Ethik, Tugend.

**Good**, JOHN MASON, M. D., a physician and general scholar, was born at Epping, England, May 25, 1764, and commenced practice as a physician in London, 1820. He was an indefatigable student and writer, and his learning was multifarious rather than profound. Besides a number of medical works, he published *The Song of Solomon, in English verse, with notes, etc.* (Lond. 1803, 8vo).—*Memoirs of Alex. Geddes, LL.D.* (Lond. 1803, 8vo) [see GEDDES]:—*Lucretius, translated, with notes* (Lond. 1805-7, 2 vols. 4to):—*The Book of Job, newly translated, with notes* (Lond. 1812, 8vo):—*The Book of Proverbs, translated* (Lond. 1822, 8vo):—*The Book of Psalms, translated, just finished at the time of his death, Jan. 2, 1827.* Dr. Good also contributed largely to several periodicals, not only in medi-

cal science, but in almost every branch of literature, "The extent and variety of Dr. Good's works are sufficient to indicate their character; they evince great industry, with a retentive and orderly mind, and every mark of sincerity and piety; but they show that he was deficient in judgment, critical acumen, and personal observation; and his medical writings especially are hence of far less value than the labor that must have been bestowed upon them might have given them, had it been better directed. But he seemed to have no suspicion of his unfitness for any literary task, and hence never hesitated to undertake any project, though most unsuited to his habits and requirements. Thus, although wanting every requisite qualification for such a duty, his overweening self-confidence led him not only to consent to edit the letters of Junius, but to select, merely from his own opinion of resemblance of style, other letters which had been published, under a great variety of names, in Woodfall's *Advertiser*, and without scruple assign them to the great unknown, to the utter confusion, as it has proved, of almost all subsequent investigations respecting the author of the Junius letters, and judgment of his character and conduct. Dr. Good's principal faculty seems to have been a facility of acquiring languages; he had learned Latin, Greek, and French in his father's school; while an apprentice he acquired Italian, and soon after commenced Hebrew. While engaged in the translation of Lucretius he studied German, Spanish, and Portuguese; and afterwards, at different times, Arabic, Persian, Russian, Sanscrit, and Chinese. Of his knowledge of all these, evidence is presented in unpublished translations, in reviews of their literature, and in the constant references made to their works in his medical and other writings. A biography of Dr. Good was published by his friend, Dr. Olinthus Gregory, in 1 vol. 8vo." In early life Dr. Good was a Socinian, but about 1817 he embraced fully the doctrine of the Trinity. He led an earnest, religious life, "seen and known of all men." See Jamieson, *Cyclop. of Biography*, p. 229; *English Cyclopædia*; Allibone, *Dictionary of Authors*, i, 698.

**Good Friday**, the sixth day of the week before Easter, called Good Friday in acknowledgment of the benefit derived from the death of Christ. Among the Saxons it was denominated Long Friday, perhaps in allusion to the length of the fast.

(1.) In the earliest ages of the Church the day of our Lord's crucifixion was religiously observed, not independently, but as a part of the sacred season of Easter, which was celebrated by Christians instead of the Jewish passover, in commemoration at once of the death and resurrection of Christ. Two terms were used to designate Good Friday and Easter-day, which had reference, in name at least, to the passover: *πάσχα σταυρώσιμον*, and *πάσχα αναστάσιμον*, *passover of the crucifixion*, and *passover of the resurrection*. The day was observed as a strict fast. The usual acclamations and doxologies were omitted, and nothing but the most plaintive strains of music, such as the *Κίριε ἔλεησον*, etc., were allowed to be sung. No bell was rung. None bowed the knee in prayer, because thus the Jews reviled Christ. The kiss of charity was omitted, for Judas betrayed his Master with a kiss. The Lord's supper was celebrated; but the elements were not consecrated on this day, but on the day before. Communion-tables and reading-desks were stripped of ornaments; and the gospel of St. John was read, because he was a faithful and true witness of our Lord's passion. In reference to the Jewish ritual, the day was sometimes called *παρασκευή*, *the preparation*.

(2.) In the Roman Church the day is celebrated with great care. "The Church in her whole office expresses the deepest mourning and compunction. The altars are naked, except at the priest's communion, when the ornaments are black, and the crucifix is covered with a black veil till the prostration, after which it is left uncovered." Instead of the ordinary mass, the "Mass

of the Presanctified" is said, without the consecration of the Host. The sacrament, reserved the day before, is received in one kind only by the priest, who recites the Lord's prayer and a small part of the prayers of the mass. "No others receive the holy communion except the priest who celebrates the divine office, and the sick in mortal danger of death, to whom it is administered by way of viaticum."

(3.) Among the Protestant churches Good Friday is observed as a fast, and by special services and prayers by the Church of England, the Lutherans, German Reformed, and many Methodists.—*Coleman, Ancient Christianity*, p. 516; *Wheatly, Common Prayer*, ch. v, § 15; *Butler, Feasts and Fasts*, tr. vi, ch. v.

**Good Tidings.** See GOSPEL.

**Good Works.** See WORKS.

**Goode, WILLIAM**, a clergyman of the Church of England, rector of Allhallows the Great and Less, London, and later dean of Ripon, died in 1868. He was a prominent and prolific writer of the Low-Church school. Among the best known of his works are: *The Extraordinary Gifts of the Spirit* (London, 1834);—*The Established Church* (1834);—*Traacts on Church-rates* (1840);—*The Divine Rule of Faith and Practice* (1842, 2 vols.; 2d ed. 1853, 3 vols.), directed against the views of Dr. Pusey concerning the value of tradition as a rule of faith;—*Tract XC historically refuted* (1845);—*Doctrine of the Church of England as to the Effects of Baptism in the case of Infants* (1849);—*Vindication of the Church of England on the Validity of the Orders in the Scotch and Foreign non-Episcopal Churches* (3 pamphlets, 3d ed. 1852).

**Goodell, WILLIAM, D. D.**, a Congregational minister and eminent missionary, was born at Templeton, Mass., Feb. 14, 1792. In early youth he manifested great energy of character. At fifteen he went sixty miles on foot, carrying his trunk, to Phillips Academy, in Andover; and there, and afterwards in Dartmouth College, he overcame all difficulties until he graduated in 1817. He spent three years in Andover Theological Seminary, and in 1820 was accepted as a missionary of the American Board. He travelled for some time as agent for raising funds for the society from New England as far as Alabama, and also visited the Cherokee and Choctaw missions east of the Mississippi. In Dec., 1822, he sailed for Malta. After preaching in English and studying other languages during nine months, he left Malta for Beirut, where he arrived Nov. 16, 1823. "By the residence there of Messrs. Goodell and Bird, Beirut became a regular station of the Board. After some attention to the Arabic, Mr. Goodell went, in June, 1824, to Sidon, to study the Armeno-Turkish language with an Armenian ex-bishop, Yakob Aga, where he became acquainted with another Armenian bishop, Dionysius Carabet, who, a year and a half later, was received into the mission church at Beirut. Thus singularly did the 'Mission to Syria and the Holy Land,' at the very outset, take hold of a people who were not thought of in its establishment, and of whom but a few individuals were found by it except as pilgrims to the sacred places. In March, 1826, after the repulse of the Greeks in an attack on Beirut, Mr. Goodell's house was plundered and his life endangered by Arab soldiers. In May, 1828, war being imminent between Turkey and England, the missionaries were obliged to flee to Malta. There Mr. Goodell labored in connection with the press until the summer of 1831, when he repaired to Constantinople, and commenced the mission to Turkey, with special reference to the Armenians, in which he was joined a few months later by the Rev. H. G. O. Dwight. From that time on his work lay specially among the Armenians. Mr. Goodell's early experience and natural temperament combined, with divine grace, to fit him eminently to meet them with a cheer-

ful patience. With a true Christian heroism, in which his wife had an equal share, he encountered such incidents of life as being obliged, by conflagrations, visitations of pestilence, convulsions and war, the extortions of landlords, hierarchial persecutions, interference of government, etc., 'to pack up and move' his residence 'some thirty times in twenty-nine years,' and battled with the opposition and obstacles that were ever before him as a missionary. Indomitable in his purpose to do good, affable and courteous in manner, of ready tact, and abounding in resistless pleasantries, he gained access wherever he chose to go, and exercised a magnetic attraction that never left him without subjects on whom to pour, in some form, the light of truth. He commanded the respect of foreign ambassadors and travellers, of dignitaries of the Oriental churches, bankers, and the highest in society, with whom, at different periods, he had no little intercourse, as well as the common people; and even enemies to his work were constrained to honor him. Few possess in so high degree as he did the admirable faculty of doing good without offence, and of recommending personal religion to the world." One of his most important labors was the translation of the Bible into Armeno-Turkish, commenced in 1843, and finished (the last revision) in 1863. In 1855 he returned to America, worn out with labor, and died in Philadelphia Feb. 18, 1867. "In the future history of the kingdom of Christ in the lands which include the site of the garden that was planted in Eden, and the scenes of events most sacred to Christian hearts, the name of William Goodell will be precious to successive generations of sanctified souls, even to the end of the world."—*Missionary Herald*, May, 1867.

**Goodly Trees** is the rendering of *עֵץ יָפֵה*, *ets hadar*, 'tree of splendor, the fruit (*פֵּרוֹת*, "boughs") of which (Sept. *καρπὸς ἕδων ἰσραήλ*, Vulg. *fructus arboris pulcherrime*), the Israelites were directed to take (i. e. carry about in festive procession) on the first day of the Feast of Tabernacles, in memory of the inhabiting dwelt in booths in the wilderness (Lev. xxiii, 40). The tree generally conceded to be meant is the *citron* (Celsius, *Hierobot.* i, 252), the fruit of which Josephus states was that in the hands of the Jews on the day of the festival of the *Scenopogia*, when they pelted king Janneus with it (*Ant.* xiii, 13, 5). See CITRON. Others regard the *olive* as meant, this being the tree mentioned in the parallel account of Neh. viii, 15. It would seem, however, that no specific tree is intended, but any one of sufficient size and beauty to be suitable to the occasion (Ursini *Arboret. Bibl.* p. 577. See TREE.

**Goodman OF THE HOUSE**, *οἰκοδεσπότης*, Matt. xx, 11; xxiv, 43; Mark xiv, 14; Luke xxii, 11, *master of the house*, as usually elsewhere rendered (Matt. x, 25; Luke xiii, 25; xiv, 21); "householder," Matt. xiii, 27, 52; xx, 1; xxi, 33). In Prov. vii, 19, "goodman" is the rendering of *אִישׁ*, *ish*, *man*, i. e. husband.

**Goodman, Christopher**, an English divine, was born at Chester in 1520. He studied at Brazenose College, Oxford, and afterwards held offices in that university during the reign of Henry VIII and Edward VI. When queen Mary ascended the throne he withdrew to Frankfort and thence to Geneva, where, with Knox, he became pastor of the English church. After Mary's death he went to Scotland, and became rector of St. Andrews in 1560. About 1565 he returned to England, and accompanied Sir Henry Sidney in his expedition against Ireland. He was afterwards rector of Chester, and died there in 1602. He wrote, *How far superior Powers are to be obeyed of their Subjects* (Geneva, 1558, 16mo), against queen Mary;—*A Commentary upon Amos*. Wood erroneously attributes to him Knox's *The First Blast of the Trumpet against the Monstrous Regiment of Women*. See WOOD, *Athenæ Oxonienses* (vol. i); Scott, *Lives of the Scotch Reform-*

ers; Peck, *Desiderata* (vol. i); Hoefler, *Now. Biogr. Générale*, xxi, 261; Allibone, *Dict. of Authors*, s. v.

**Goodman, Godfrey**, was born at Ruthven, in Denbighshire, 1583, and educated at Westminster School, and at Trinity College, Cambridge. In 1607 he got the living of Stapleford Abbots, in Essex; in 1617, a canonry of Windsor; in 1620, the deanery of Rochester; and in 1625, the bishopric of Gloucester. Bishop Goodman was a Romanizer, even beyond Laud's tolerance. In 1640 the new canons were set forth, which he refused to subscribe, "and it appeared afterwards," says Fuller, "that he scrupled about some passages on the corporeal presence, but whether upon popish or Lutheran principles he best knoweth." Laud, then archbishop, after the clergy had subscribed, advised him "to avoid obstinacy and irregularity therein, but he refused." It was in Henry VII's chapel, and being greatly offended, Laud said to him, "My Lord of Gloucester, I admonish you to subscribe." Goodman remained silent, and Laud again said, "My Lord of Gloucester, I do admonish you a second time to subscribe," and immediately after, "I do admonish you a third time to subscribe." Goodman "pleaded conscience," and was in consequence suspended. He was committed to the Gatehouse, "where," says Fuller, "he got by this restraint what he could never have got by his liberty, namely, of one reputed a papist, to become for a short time popular, as the only consequent suffering for not subscribing to the new canons." He died January 19, 1655, in open profession of popery. He wrote, 1. *The Fall of Man, and Corruption of Nature, proved by Reason* (London, 1624, 4to).—2. *Arguments and Animadversions on Dr. George Hakewill's apology for Divine Providence*.—3. *The two Mysteries of the Christian Religion, viz. the Trinity and the Incarnation explicated* (Lond. 1653, 4to).—*The Court of King James*, by Sir Anthony Weldon (edited by Breuer, Lond. 1839, 2 vols, 8vo).—Hook, *Ecol. Biography*, v, 335; Darling, *Cyclop. Bibliographica*, s. v.; *Gentleman's Magazine*, vol. lxxviii; Fuller, *Church History*, bk. xi.

**Goodness of God** denotes "both the absolute perfection of his own nature, and his kindness manifested to his creatures. Goodness, says Dr. Gill, is essential to God, without which he would not be God (Exod. xxxiii, 19; xxxiv, 6, 7). Goodness belongs only to God; he is solely good (Matt. xix, 17), and all the goodness found in creatures is only an emanation of the divine goodness. He is the chief good, the sum and substance of all felicity (Psa. cxliv, 2, 15; xxv, 7; lxxiii, 25; iv, 6, 7). There is nothing but goodness in God, and nothing but goodness comes from him (1 John i, 5; James i, 13, 14). He is infinitely good; finite minds cannot comprehend his goodness (Rom. xi, 35, 36). He is immutably and unchangeably good (Zeph. iii, 17). The goodness of God is communicative and diffusive (Psa. cxix, 68; xxxiii, 5). With respect to the objects of it, it may be considered as general and special. His general goodness is seen in all his creatures; yea, in the inanimate creation, the sun, the earth, and all his works; and in the government, support, and protection of the world at large (Psa. xxxvi, 6; cxlv). His special goodness relates to angels and saints; to angels, in creating, confirming, and making them what they are; to saints, in election, calling, justification, adoption, sanctification, perseverance, and eternal glorification." See Charnock, *Works*, v, i, 574; Paley, *Nat. Theol.* ch. xxvi; South, *Sermons*, vol. viii, serm. iii; Tillotson, *Sermons*, p. 143-146; Watson, *Institutes*, i, 420; Henderson's *Buck*, s. v. See God.

**Goodrich, Chauncey Allan**, D.D., was born in New Haven, Conn., Oct. 23, 1790. He graduated at Yale in 1810; was tutor in Yale College from 1812 to 1814; and in 1816, having completed a course of theological study, was installed as pastor of the First Church in Middletown, Conn. On the accession of Dr. Day to the presidency of Yale College in 1817,

Mr. Goodrich was elected professor of rhetoric and oratory in that institution, but relinquished the office in 1839, to accept the chair of pastoral theology in the theological seminary, a position which he occupied until his death—a period of twenty years. In 1820 he was elected president of Williams College, but declined to accept that honor. In 1835 he received the degree of doctor of divinity from Brown University. "In 1814 he prepared a Greek grammar, which passed through several editions. In 1827 he superintended the abridgment of *Webster's Quarto American Dictionary*. In 1829 he established the *Quarterly Christian Spectator*, which he edited for nearly ten years. In 1846 and '47 he prepared revised editions of *Webster's Dictionary*, and in 1856, the university edition of the same work. In 1852 he published his admirable work on *British Eloquence*, which has been extensively circulated, both in England and America. Besides performing the literary labor involved in preparing and editing these various works, Prof. Goodrich was prominently connected with many of the most important benevolent societies of the country. At the time of his death he was laboriously engaged, as one of the 'Committee on Versions' of the American Bible Society, in preparing a new edition of the English text. As an instructor, Prof. Goodrich was enthusiastic, untiring, and effective, always impressing himself upon his pupils, inspiring them to the highest effort. He guided them to imitate models of clear and eloquent thinking, and taught them to express their own thoughts in a chaste and manly style. As an officer of the college, he was singularly active and energetic, never shrinking from any duty or responsibility, and always making the interests of the institution the object of his own personal care and anxious solicitude." He died at New Haven, Feb. 25, 1860.—*New York Observer*, March 1, 1860; *New Haven Journal*; *Congregational Quarterly*, 1860, p. 241.

**Goodrich, Elizur**, D.D., a Congregational minister, was born in Wethersfield, Conn., Oct. 26, 1784. He graduated at Yale College in 1752. He now studied theology, but was called to be tutor at Yale College in 1755. In 1756 he was invited to the Congregational church in Durham, Conn. In 1766, to aid in the support of his growing family, he began to prepare students for college. His thorough scholarship made him a highly successful teacher, and during the next twenty years more than three hundred young men passed under his instructions. He was repeatedly sent by the General Association of Connecticut as a delegate to a convention held by that association, and the synods of New York and Philadelphia, from 1766 to 1776. He received the degree of doctor of divinity from Princeton College. In 1776 he was elected to the corporation of Yale College, and, as a member of the Prudential Committee, his labors in behalf of the college for twenty years were among the most useful of his life. He died of apoplexy at Norfolk, Conn., Nov. 22, 1797. He published a number of occasional discourses.—Sprague, *Annals*, i, 506.

**Goodrich, Thomas**, an eminent English divine, was born at East Kirby, Lincolnshire, about 1480. He studied at Corpus Christi College, Cambridge, graduated at Jesus College in 1510, and became proctor of the university in 1515. In 1529 he gained great favor with Henry VIII by pronouncing himself against the validity of that prince's marriage with Catharine. He was successively appointed rector of St. Peter's, London, canon of St. Stephen's, Westminster, and chaplain of the king. In 1534 he was elected bishop of Ely, and showed himself a zealous supporter of the Reformation. He took an active part in the organization of the English Church, was one of the theologians commissioned to examine the translation of the N. T., to compile the Common Prayer-book of 1548, and the Institution of a Christian Man, called also the Bishops'

Book, with the collaboration of Cranmer, Stokesley, Gardiner, Sampson, Latimer, etc. Goodrich was a member of the privy council under Henry VIII and Edward VI, who also employed him several times as ambassador. In 1551 he was appointed lord chancellor of England. This office he lost when queen Mary ascended the throne, but he retained his bishopric, and died May 10, 1554.—Hoefler, *Nouv. Biog. Générale*, xxi, 261; Hook, *Eccles. Biog.* v, 338; Burnet, *Hist. of Engl. Reformation*, ii, 214, 291, 427.

**Goodwin, John**, an eminent Arminian divine, was born in 1593, and was educated at Queen's College, Cambridge, where he became fellow in 1617. In 1633 he became vicar of St. Stephen's, Coleman Street, London, from which he was ejected in 1645 for refusing to administer baptism and the Lord's supper promiscuously. He was a man of great courage, eloquence, and energy; and, though an Independent in Church government, he was a zealous Arminian in doctrine. At the Restoration he was exempted from pardon; but no measures were taken against him, and he died in 1665. He wrote *The divine Authority of the Scriptures asserted* (Lond. 1648, 4to).—*Redemption redeemed, wherein the most glorious Work of the Redemption of the World by Jesus Christ is vindicated against the Encroachments of latter Times* (Lond. 1651, fol.; new ed. 1840, 8vo).—*Exposition of Romans in* (new ed. by T. Jackson, London, 1835, 8vo).—*Imputatio Fidei, a Treatise of Justification* (Lond. 1642, 4to). This last treatise was published in an abridged form (12mo) by Mr. Wesley, who held Goodwin's works in high esteem. A summary of *Christian Theology selected from Goodwin* was published by S. Dunn (Lond. 1836, 12mo); and Goodwin's *Life* has also been written by Rev. T. Jackson (Lond. 1839, 8vo). John Goodwin was in advance of his age, not only in his theology, but also in his broad views of the nature of the Church and of toleration. His writings contributed greatly to the diffusion of sound doctrines on religious liberty. "Had *Redemption Redeemed* been his only publication, it should have been enough of itself to perpetuate his fame. Its great learning, clear reasoning, sound judgment, and admirable spirit, render it worthy of the study of all lovers of this glorious doctrine, and the name of its author one which all Arminians should delight to honor. A volume so ably written, and going to the bottom of the controversy, could not, in that polemic age, fail of creating a storm. The pulpits rang with charges of heresy. The press groaned with sermons, pamphlets, and books. Some were bitterly scurrilous. Dr. Hill, master of Trinity College, Cambridge, charged him with falsifying his quotations, and with the errors of Pelagius. Resbury wrote very much in the spirit of Edwards. Robert Baillie seems to have taken Prynne for his model. Barlow, afterwards bishop of Lincoln, alone among the crowd addressed him in a style of manliness and Christian candor, speaking of his learning and talents with compliment and respect. George Kendall filled two folios, and actually removed to London that he might watch Goodwin and the better oppose him and his doctrine. He says of himself that though he sometimes sneers, he never snarls or bites. He doubtless tells the truth about the sneering and the biting. Toplady thought the '*Redemption Redeemed* was effectually answered' by Kendall. 'If it was,' says Sellon, 'I will eat it, as tough a morsel as it is.' Dr. John Owen, then vice-chancellor at Oxford, and overwhelmed with labors, deemed it necessary to employ eight hundred and fifty octavo pages in a reply to the seven chapters on the Perseverance of the Saints" (D. A. Whedon, in *Methodist Quart. Rev.* July, 1863, p. 371; *Meth. Q. Rev.* Oct. 1869, art. 1).—Hook, *Eccles. Biog.* v, 339; Allibone, *Dict. of Authors*, i, 704; Neal, *Hist. of the Puritans*.

**Goodwin, Thomas, D.D.**, a nonconformist Calvinistic divine of the 17th century, was born at Rolles-

by, Norfolk, Oct. 5, 1600. He was educated at Christ Church College and Catharine Hall, Cambridge, of which he afterwards became fellow. In 1628 he became lecturer of Trinity Church, Cambridge, and four years afterwards was presented by the king to the vicarage of the same church. Refusing the terms of conformity, he relinquished his preferments, and in 1634 quitted the university. During the subsequent persecution of the Puritans he fled to Holland, where he became minister of a congregation at Arnheim. At the beginning of the Long Parliament he returned to London, and was one of the Assembly of Divines, with whom, however, he did not always agree. He became a great favorite with Cromwell, through whose influence, in 1649, he was made one of the commissioners for licensing preachers, and appointed president of Magdalen College, Oxford. He was ejected at the Restoration. Anthony Wood styles him and Dr. Owen "the two Atlases and patriarchs of Independency." He died Feb. 23, 1679. A portion of his works were published in five vols. folio (Lond. 1681); and besides those to be found there he wrote *Certain select Cases resolved, specially tending to the Comfort of Believers in Temptation* (Lond. 1647, 4to). The following have been recently reprinted, viz. *Child of Light* (Lond. 1840, 12mo).—*Ephesians and Revelations* (Lond. 1842, 8vo).—*Christ the Mediator* (Lond. 1846, 8vo).—*Glories of Christ* (1847, 8vo).—*Government of the Church* (1848, 8vo).—*Justifying Faith* (1848, 8vo).—*Divine Decrees* (1844, 8vo).—*Works*, condensed by J. Babb (Lond. 1847-49, 4 vols. 8vo). A new and complete edition of Goodwin's works has just been completed in Nicholls's *Series of standard Divines*, making 12 vols. 8vo (Edinb. 1861-66), containing (vol. ii) a *Memoir of Goodwin*, by Robert Halley, D.D.—Jones, *Christian Biography*, p. 187; Darling, *Cyclop. Bibliographica*, i, 1289; Calamy, *Nonconformists' Memorial*; Neal, *Hist. of the Puritans*.

**Gopatata.** See JOTAPATA.

**Gō'pher** (Heb. גֹּפֶר; according to Gesenius, i. q. גֹּפֶר, pitch; acc. to Fürst, connected with גֹּפֶרֶת, brimstone, i. e. resin; Sept. *τεργύρονος*, Vulg. *levigatus*), a kind of tree, the wood of which is mentioned only once in Scripture, as the material of which Noah was directed to build the ark (Gen. vi, 14): "Make thee an ark of gopher wood; rooms shalt thou make in the ark, and shalt pitch it within and without with pitch" (probably *bitumen*). In endeavoring to ascertain the particular kind of wood which is mentioned in the above passage, we can get assistance only from the name, the country where the wood was supposed to have been procured, or the traditional interpretations. The Sept. renders it "squared timbers," and the Vulgate "*planed wood*" (apparently understanding גֹּפֶר). Some have adopted the opinion that a kind of pine-tree is intended; and others that several species may be included, as they all yield resin, tar, and pitch. The Persian translator has also adopted the *pine*; but Celsius objects that this was never common in Assyria and Babylonia. The Chaldee version and others give the *cedar*, because it was always plentiful in Asia, and was distinguished by the incorruptible nature of its wood. But cedar is a very general term, and correctly applied only to different kinds of juniper. These, though yielding excellent wood, remarkable for its fragrance, never grow to a large size in any warm country. Eutychius, patriarch of Alexandria, relates in his *Annals* (p. 31), as quoted by Celsius (*Hierobot.* i, 331), that the ark (q. v.) was made of a wood called *sag* or *saj*, which is the *teak*, and not likely to have been the wood employed. The Chaldee Samaritan translator, for *gopher*, gives, as a synonym, *sissam*, of which Celsius says (*Hierobot.* i, 332), "Vocein obscuream, sive referas ad *ἑβλα ἀναφύρα*, quæ ex Indiis adferri scribit Arrianus (*Peripl. Mar. Erythr.* p. 162), et *Ebano similia* perhibent alii (Salmasius, in *Solun.* p. 727)." The *sissam* is probably the *sissu*, mentioned by Forskål as import-

ed in his time into Arabia, and is a highly-valued, dark-colored wood, of which one kind is called black-wood (*Dalbergia latifolia*). The greatest number of writers have been of opinion that by the gopher wood we are to understand the cypress; and this opinion is supported by such authorities as Fuller (*Sacred Miscellanies*, iv, 5), Bochart (*Geogr. Sacra*, i, 4), as well as by Celsius (*Hierobot.* i, 328). It has been stated that gopher is the Greek *κνπάρσσοσ*, with a mere addition to the root. It is argued, further, that the wood of the cypress, being almost incorruptible, was likely to be preferred; that it was frequently employed in later ages in the construction of temples, bridges, and even ships; and that it was very abundant in the countries where, according to these authors, the ark is supposed to have been built, that is, in Assyria, where other woods are scarce.—Kitto, s. v. Ets-Gopher. See TREE.

**Gophna** (Γόφνα in Josephus; Γούφνα in Ptolemy; see Reland, *Palest.* p. 461), a town of Palestine, which gave its name to one of the ten toparchies, *Gophnitica* (ἡ Γοφνιτικὴ τοπαρχία, Josephus, *War*, iii, 3, 5; "toparchia Gophnitica," Pliny, v, 14). Josephus reckons it second in importance to Jerusalem, and usually joins it with Arcaballa. It was one of the four cities taken by Cassius (*War*, i, 11, 2) and reduced to slavery (*Ant.* xiv, 11, 2), but restored to freedom by a decree of Marc Antony after the battle of Philippi (*ib.* 12, 2 and 3). It was taken by Vespasian in his last campaign in Palestine (*War*, iv, 9, 9), and, as Titus marched on Jerusalem by way of Casarea and Samaria, he passed through Gophna (*ib.* v, 2, 1). It was to this place that the latter allowed certain important Jewish refugees to retire temporarily during the siege of Jerusalem (vi, 2, 2, 3). Eusebius probably gives the true origin of the name (from *ג'פן*, *ge'phen*, a vine, from the vineyards in the vicinity), although he errs (or is, rather, himself uncertain) in identifying it with the Eschol of the spies (*Onomast.* p. 157, ed. Clericus); and he states that it lay (ἡ Γόφνα) fifteen miles from Jerusalem towards Neapolis, in near agreement with the Peutinger Table, which makes it sixteen miles. It was identified by Dr. Robinson with *Jufna*, a small Christian village, rather more than one hour north-west of Beitina (Bethel), with many ruins of the Middle Ages, and situated in a very fertile valley (*Bib. Res.* iii, 77-9). It is probably the *OPHNI* (q. v.) of Benjamin (*Josh.* xviii, 24).

**Gophrith.** See BRIMSTONE.

**Gor.** See WHELP.

**Gordianus**, the name of three Roman emperors. Marcus Antonius Gordianus I, descended from a noble family, and distinguished for his literary education, was twice consul, under Caracalla and Severus. By the latter he was appointed proconsul of the province of Africa, in which position he gained the affection of the people of the province to so high a degree, that on the assassination of the emperor Maximinus, he was, at the age of 80 years, proclaimed emperor in 238, together with his son, who assumed the name of Marcus Antonius Gordianus II. The Roman Senate recognised them; but after a reign of only a few weeks Gordianus II fell in a battle at Carthage against Capellianus, the governor of Mauritania, and Gordianus I, on learning the news, killed himself. At the demand of the Roman people, a minor grandson of Gordianus I was placed as Cæsar by the side of Pupienus Maximus and Balbinus, who had been elected emperors against Maximinus; and when all these three emperors were killed by their own soldiers, he was still in the same year (238) proclaimed as Augustus by the Prætorians. He carried on a successful war against the Persians, and had an excellent adviser in his father-in-law Misithenus. He reigned until 244, when Philip the Arabian, who for some time had been his colleague, caused him to be assassinated. The Christian Church during the reign of Gordianus was undisturbed. (A. J. S.)

**Gordon, George N.**, a Presbyterian minister and missionary, was born in Prince Edward Island in 1821. He studied at the Free-Church College, Halifax, N. S., and was sent by the Presbyterian Church of Nova Scotia to the New Hebrides, and settled at Enomanga, in 1857, with his wife, whom he married in England. On the 20th of May, 1861, he and his wife were killed by the natives.—Wilson, *Presb. Hist. Atlantic*, 1862, p. 330.

**Gordon, James Huntley**, an eminent Scotch Jesuit, was born in 1543. He was educated at Rome, and entered the order of Jesuits Sept. 20, 1563. For nearly fifty years he taught Hebrew and theology at Rome, Paris, and Bordeaux. He travelled also, as missionary, through England and Scotland, where his zeal for making converts to the Roman Catholic Church caused him to be twice put in prison. He died at Paris, April 16, 1620. Gordon was a learned and skillful man, and very zealous for his order. He wrote *Controversiarum christianæ fidei Epitome*, 3 parts (i, Limoges, 1612; ii, Paris; iii, reprinted with the two others, Cologne, 1620, 8vo). See Alegambe, *Bibliotheca Scriptorum Societatis Jesu*; Hoefler, *Nouv. Biog. Générale*, xxi, 280.

**Gordon, James Lesmore**, a Scotch Jesuit, was born at Aberdeen in 1553. He became a member of the Society of Jesus, and taught theology in the colleges of his order, at Toulouse and Bordeaux. Later in life he was appointed confessor to Louis XIII. He died at Paris, Nov. 17, 1641. We have from him *Diatriba de catholica veritate* (Bord. 1623, 12mo):—*Biblia Sacra, cum commentariis ad sensum litteræ et explicatione locorum omnium que in sacris litteris obscuritatem habent* (Paris, 1632, fol.):—*Theologia moralis univ. viii libris comprehensum* (Paris, 1634, fol.). Dupin highly commends his commentary.—Hoefler, *Nouv. Biog. Générale*, xxi, 280.

**Gordon, Robert, D.D.**, a Scotch divine, was born in Dumfries. "His first settlement in the ministry was at Kinfauns, 1816; in 1820 he was translated to the old Chapel of Ease, Edinburgh. In 1825 he became one of the ministers of the High Church. In 1843 he joined the 'Free-Church movement' and resigned his preferment. Most of his people went with him, and formed the 'Free High Church,' of which he remained minister to the time of his death, October, 1853. He published *Sermons* (3d ed. Edinburgh, 1826, 8vo):—*Christ as made known to the Ancient Church:—An exposition of the revelation of Divine Grace, as unfolded in the O. T. Scriptures* (posthumous; Edinburgh, 1854, 4 vols. 8vo)." —Darling, *Cyclop. Bibliographica*, i, 1292; *Bibliotheca Sacra*, July, 1854, p. 631.

**Gorgias** (Γοργίας, a frequent name among the Oriental Greeks), one of the generals of Antiochus Epiphanes, was chosen by Lysias, the general and minister of Antiochus Epiphanes and at this time in sole command of the provinces from the Euphrates to the sea, to undertake an expedition in company with Ptolemy, the son of Dorymenes, and with Nicanor, against Judæa, B.C. 166 (1 Macc. iii, 38; Joseph. *Ant.* xii, 7, 2, 3, where he is styled "a mighty man of the king's friends"). These generals were, however, totally defeated near Emmans by Judas Maccabæus (1 Macc. iv, 1 sq.; Joseph. *Ant.* l. c.). In B.C. 165, Joseph, the son of Zacharias, and Azarias, two captains in the service of Judas Maccabæus, anxious to get themselves a name, and acting without the orders of Judas, attacked the garrison of Jamnia. Gorgias, the governor of the forces at Jamnia, defeated them with great loss (1 Macc. v, 56 sq.; Joseph. *Ant.* xii, 7, 6).

The account of Gorgias in 2 Macc. is very confused. In one passage he is described simply as "a captain, who in matters of war had great experience," and therefore sent with Nicanor, the son of Patroclus, one of the special friends of Ptolemaus, the governor of Cæle-Syria and Phœnicæ (comp. 1 Macc. iii, 38; Jo-

seph. *Ant.* xii, 7, 3), to root out the whole nation of the Jews (2 Macc. viii, 9). In another passage he is represented as "governor of the holds" (στρατηγός τῶν τόπων [Alex. MS. τρώπων], 2 Macc. x, 14), and apparently of the holds of the Idumæans (?) (Acrabittene [?], comp. 1 Macc. v, 3; Joseph. *Ant.* xii, 8, 1; see Ewald, *Geschichte*, iv, 91, 358). He is afterwards, according to the present text, described as "governor of Idumæa" (2 Macc. xii, 32).

Grotius (see Wernsdorff, *De fid. Libr. Macc.*, § 73) suggests that the reading "governor of Idumæa" is an error for "governor of Jamnia" (as at 1 Macc. v, 58). Josephus warrants this correction (ὁ τῆς Ἰαμνίας στρατηγός, *Ant.* xii, 8, 6). From the epithet applied to Gorgias, he seems to have been held in the highest detestation by the Jews (A. V., "that cursed man," τὸν κατάρατον, 2 Macc. xii, 35). The description of his flight to Marisa and his defeat by Dositheus, one of Judas's generals, is given at some length, though in an obscure and confused manner (2 Macc. xii, 34-38; comp. Joseph. *Ant.* xii, 8, 6).—Kitto, s. v.

**Gorham Case**, a case in law involving the doctrine of the Church of England as to baptismal regeneration. In August, 1847, the lord chancellor (lord Cottenham) offered to present Mr. Gorham to the vicarage of Bramford-Speke. The bishop, on being requested to countersign his testimonials, stated on the paper his doubts as to Mr. Gorham's views, both of discipline and doctrine. The lord chancellor, however, presented Mr. Gorham, who applied for institution. The bishop then intimated his intention of examining Mr. Gorham before he instituted him. The examination took place, and continued for several days. The result was, that the bishop of Exeter declined to institute Mr. Gorham to the vicarage of Bramford-Speke. "The alleged ground of this refusal was, that after examination the bishop found Mr. Gorham to be of unsound doctrine as to the efficacy of the sacrament of baptism, inasmuch as he held that spiritual regeneration is not given or conferred in that sacrament in particular, that infants are not made therein 'members of Christ and the children of God,' as the catechism and formularies of the Church declare them to be. The case was brought before the Arches Court of Canterbury, which decided (1849) that baptismal regeneration is the doctrine of the Church of England, and that Mr. Gorham maintained doctrines on the point opposed to those of the Church, and that consequently the bishop had shown sufficient cause for his refusal to institute, and that the appeal must be dismissed with costs. From this decision Mr. Gorham appealed to the judicial committee of privy council. The committee complained that the bishop's questions were intricate and entangling, and that the answers were not given plainly and directly. Their decision was in substance as follows, and it must be noted what points they undertook to decide, and what not. The court declared that it had no jurisdiction to settle matters of faith, or to determine what ought, in any particular, to be the doctrine of the Church of England, its duty being only to consider what is by law established to be her doctrine upon the legal construction of her articles and formularies. It appeared that very different opinions as to the sacrament of baptism were held by the promoters of the Reformation; that differences of opinion on various points left open were always thought consistent with subscription to the articles; and also, that opinions in no important particular to be distinguished from Mr. Gorham's had been maintained without censure by many eminent prelates and divines. Without expressing any opinion as to the theological accuracy of Mr. Gorham's opinions, the court decided that the judgment of the Arches Court should be reversed. Mr. Gorham was accordingly instituted to Bramford-Speke. During the two years that the suit was pending, the theological question was discussed with all degrees of ability and acrimony in

sermons and pamphlets."—*History of Christian Church* (Encyc. Metrop., Glasgow, 1858, p. 387 sq.); Chambers, *Encyclopædia*, s. v.; *Theological Critic*, April, 1852, art. iii; *English Review*, vols. xiii, xiv; Marsden, *Churches and Sects*, i, 42; Cunningham, *Discussion of Church Principles* (Edinburgh, 1863), chap. vi.

**Gorion** (Γωρίων), son of Josephus (? Caiaphus), and one of those of eminent family who incited the Jewish populace to resist the anarchy of the Zealots (Josephus, *War*, iv, 3, 9), but was eventually slain by them (*ib.* 6, 1).

**Gorion**, surnamed SKANTCHELI (*the Admirable One*), an Armenian theologian, lived in the 5th century of the Christian era. After studying philosophy, theology, and the Syriac and Greek languages under St. Mesrop (q. v.) and patriarch Isaac I, he was sent to Constantinople to complete his studies. On returning to his country, he engaged with Esnig (q. v.) and four others in a translation of the Bible, and of several works of the Greek fathers, into the Armenian. He subsequently became bishop of a diocese bordering upon Georgia. He is the author of a work on *The Life of Mesrop*, which is of importance for the early history of the Armenian Church, and was published by the Mekhitarists at Venice in *Opere di antichi Scrittori Armeni del quinto secolo* (Ven. 1833). See De Welte, *Gorion's Lebensbeschreib. d. heil. Mesrop* (Tüb. 1844). (A. J. S.)

**Gorkum, the Martyrs of**, the name given in the Roman Catholic Church to nineteen monks and priests of Dordrecht who had fled to Gorkum, were captured at the conquest of that town by the Guenx in 1572, and hung. On account of pretended miracles wrought by their relics, Pope Clement X, in 1674, allowed them to be venerated in Holland. In 1867 they were canonized by Pius IX. (A. J. S.)

**Görres**. See GOERRES.

**Gorski**, THEOPHYLACT, a Russian theologian, died bishop of Kolonna in 1788. He wrote *Orthodoxe orientalis Ecclesie Dogmata* (Lpz. 1784), and a *Compendium of Christian Dogmas*, in Latin and Russian, which has since been translated into German and French (St. Petersburg, 1792). These books, although in general use in the Russian seminaries, openly advocate Protestant views, and are opposed both to the Roman Catholic and to the orthodox Greek dogmas. See *Dict. hist. des Ecrivains de l'Eglise greco-russe*; P. Gagarin, *De la Théologie dans l'Eglise russe* (Paris, 1837); Hoefer, *Nouv. Biog. Générale*, cxxi, 309.

**Gorton**, SAMUEL, founder of a sect called *Gortonians*, was born at Gorton, England, about 1600. He says himself, in one of his letters, "I have never studied in the schools of human learning, and I bless God for it." He was first in the employ of a linen-draper in London, but left that city in 1636 and went to Boston, U. S., in the hope of enjoying religious liberty; but the Church there not being disposed to put up with his extravagant ideas, he went to Plymouth, where he fared still worse, being fined, imprisoned, and finally expelled in the midst of winter. In June, 1639, he became an inhabitant of Aquidneck, or Rhode Island, where fresh persecution befel him. Driven from place to place, he finally bought some land at Pawtuxet, R. I., where he settled. Complained of by his neighbors as encroaching on their property, he refused to appear before the court of Massachusetts, and in 1642 settled at Shawmut, where he had bought land of the sachem Miantonomoh. His claims under this purchase were, however, contested by two inferior sachems, who appealed to the general court of Massachusetts for assistance. Gorton and ten of his disciples were captured soon after and taken before the court, where the land question soon gave place to a trial for their lives as "damnable heretics," and they were condemned to hard labor at Charlestown for an unlimited time. In 1644 the sentence was

changed into banishment. Gorton then returned with his partisans to Rhode Island, where he persuaded the Indians to put themselves under the protection of England, and to abandon to that country a part of their territory. He then proceeded to England, where, in consideration of this service, he received letters patent guaranteeing to him the peaceful possession of his property at Shawmut. He called the place Warwick, in remembrance of services rendered him by the earl of Warwick. Gorton died about 1677. His sect became soon extinct. He wrote, *Simplicities' Defence against seven-headed Policy* (1646, 4to):—*An incorruptible Key, composed of the ex Psalme, wherewith you may open the rest of the holy Scriptures* (1647, 4to):—*Saltmarsh returned from the Dead* (1655, 4to):—*An Antidote against the common Plague of the World*. See Mackie's *Life of Gorton* in "Sparks's *Amer. Biography*;" Duyckinck, *Cyclop. of American Literature*, i, 78; *New American Cyclopædia*, viii, 384; Bartlett, *Bibliog. of Rhode Island*, 134 sq.; Hutchinson, *History of Massachusetts*, i, 117. (J. W. M.)

**Gortyna** (Γόρτυνα; in classical writers, Γόρτυν or Γόρτυνα; on a coin, Κόρτυνα [Κορτυνίον]), a city of Crete, mentioned in the Apocrypha in the list of cities to which the Romans sent letters on behalf of the Jews, when Simon the Maccabee renewed the treaty which his brothers Judas and Jonathan had made with Rome (1 Macc. xv, 23; comp. 1 Macc. viii, 1 sq.; xii, 1 sq.). There is no doubt that the Jews were settled in great numbers in Crete (Josephus, *Ant.* xvii, 12, 1; *War*, ii, 7; Philo, *Leg. at Caium*, sec. 36), and Gortyna may have been their chief residence. Ptolemy Philometor, who treated the Jews kindly, and who had received a numerous body in Egypt when they were driven out of Judæa by the opposite party (Josephus, *Ant.* xiii, 3; *War*, i, 1, 1), rebuilt part of Gortyna (Strabo, x, Didot. ed., p. 411). When Paul, as a prisoner, was on his voyage from Caesarea to Rome, the ship, on account of a storm, was obliged to run under the lee of Crete, in the direction of Cape Salmone, and soon after came to a place called Fair Havens, which was near a city called Lasea (Acts xxvii, 8). Lasea is probably the Lasia of the Pentingerian Tables, and is there stated to be sixteen miles east of Gortyna. It is very uncertain how long the vessel was detained at Fair Havens, though "much time had been spent" (Acts xxvii, 9), not since they had sailed from Caesarea, but at the anchorage (Alford, ad loc.). Doubtless the sailors, soldiers, and prisoners had frequent intercourse with Lasæa, and perhaps Gortyna. Paul may then have preached the Gospel at one or both of these places, but of this there is not the slightest proof (comp. Conybeare and Howson, *Life of St. Paul*, ii, 394-396). See PAUL.

Gortyna, according to Ptolemy (iii, 17, 10), was situated in 54° 15' and 34° 50'. Simon proposes a Shemitic etymology for the name (*Onom.*, p. 50; but see Sickler, *Hawlbuch*, p. 470). Next to Cnossus, it was the most important city in the island for power and magnificence. At one time Gortyna and Cnossus in union held the whole of Crete in their power except Lyttus (Polyb. iv, 53, 54). In later times they were in a continual state of warfare (Strabo, x, Didot. ed., p. 410). Gortyna was founded by a colony from Gortys of Arcadia (Plato, *Leges*, iv, Didot. ed., p. 320). It was of very considerable size, its walls being fifty stadia in circuit, whilst those of its rival, Cnossus, were not more than thirty (Strabo, x, Didot. ed., p. 409-411). Homer bestows upon it the epithet "walled" (τεύχιδεσσα, *Il.* ii, 646). It was situate on the south side of the island, on the river Lethæus (Messara), and at a distance of ninety stadia from the Libyan Sea (Strabo, *l. c.*). In the Peloponnesian war Gortyna seems to have had some relations with Athens (Thuc. ii, 85). Its connection with Philopœmen in B.C. 201 is shown by the Gortynians having invited him to take the command of their army (Plutarch, *Philop.* 13). When the Achæ-

III.—N X

an League was in alliance with the Romans, B.C. 197, against Philip V of Macedon, 500 Gortynians joined Quinctius Flaminius when on his march to Thessaly, previous to the battle of Cynoscephalæ (Livy, xxxiii, 3). It is only recently that a coin bearing the well-known types of the League has been found, struck at Gortyna. The late Col. Leake has shown that the coin with the legend ΚΟΡΤΥΝΙΩΝ ΑΝΑΙΩΝ, which had previously been assigned to Gortys in Arcadia by the late Mr. Burgon (*Num. Chron.* xix, 235-36), certainly belongs to the Cretan Gortyna (*Supp. Num.*

Coin of Gortyna.

*Hell.* p. 110), thus proving that cities beyond the continent were admitted into the League (R. S. Poole, *Num. Chron.*, new ser., i, 173). About the same period there are evidences of an alliance, political or commercial, between Athens and several of the Cretan towns. Some of the coins of six of these—Cnossus, Cydonia, Gortyna, Hierapytna, Polyrrenium, and Priansus—are tetradrachms, with exactly the types of those of Athens of the same age, but distinguished by having the distinctive badges of the Cretan towns. They were probably struck by the Cretan cities of the great alliance against Philip V of Macedon about B.C. 188 (Pausan. i, 36, 5, 6; comp. Eckhel, *Doct. Num. Vet.* ii, 221; Leake, *Num. Hell. Insular Greece*, p. 19; Poole, *l. c.*). As Cnossus declined, Gortyna rose to eminence, and became the metropolis of Crete. About A.D. 200 a brother of Septimius Severus held at Gortyna the office of proconsul and quaestor of the united provinces of Crete and Cyrene (Böckh, No. 2591). In the arrangement of the provinces by Constantine, Gortyna was still the metropolis of Crete (Hieroc. *Synecd.* p. 649; comp. Leake, *Supp. Num. Hell.* p. 157).

The remains of Gortyna near Aghius Dhæka (the ten Saints), and the cavern in the mountain, have been described by Tournefort (*Relation d'un Voyage du Levant*) and Pococke (*Description of the East*), and the cavern, more recently, by Mr. Cockerell (Walpole, ii, 402). The modern Gortynians hold this cavern to be the Labyrinth, thus claiming for themselves the honors of the myth of the Minotaur; but it does not appear from the Gortynian coins, which date from the time of the Persian war to that of Hadrian (and there are none later), that their ancestors ever entertained such an idea (Leake, *Num. Hell. Insular Greece*, p. 18). The famous Labyrinth is represented on the coins of Cnossus, and Col. Leake says that "it is difficult to reconcile this fact with the existence of the Labyrinth near Gortyna, for that the excavation near Aghius Dhæka, at the foot of Mount Ida, is the renowned Cretan labyrinth, cannot be doubted after the description of Tournefort, Pococke, and Cockerell" (*Supp. Num. Hell.* p. 156). This opinion is given notwithstanding the assertion of Pausanias (ὁ ἐν Κνωσσίῳ λαβύρινθος, i, 27, 9). One of the coins of Cnossus bears, besides the Labyrinth on its reverse, the Minotaur on the obverse. It cannot be much later than the expedition of Xerxes, and thus affords evidence of the antiquity of the tradition of the Labyrinth, if not of its real existence; whereas Höck (*Kreta*, i, 56 sq.), relying on the silence of Hesiod and Herodotus, and the assumed silence of Homer—though the *Iliad* contains what looks very like an allusion to the Cretan wonder (*Il.* xviii, 590 sq.)—has supposed it to have been an invention of the later poets borrowed from Egypt (Poole, *ut sup.* i, 171-72). A full account of the remains of the old site and the modern place is given in the *Museum of Clas-*

sical Antiquities (ii, 277-286). Mr. Falkener here describes the cavern near Gortyna from Sieber, who spent three days in examining it, and says that certainly it had been nothing more than a quarry, which probably supplied the stone for building the city (*Reise nach der Insel Kreta*, i, 511-520). Höck seems to hold similar views (*Kreta*, i, 447-454).—Kitto, s. v. See CRETE.

**Goshen** (Heb. *id.* גֹּשֶׁן, prob. of Egyptian origin, but unknown signif.), the name of at least two places.

1. (Sept. usually Γέσην or Γεσίμ.) A province or district of Egypt in which Jacob and his family settled through the instrumentality of his son Joseph, and in which they and their descendants remained for a long period (Gen. xlv, 10; xlvii, 28, 29, 34; xlvii, 1, 4, 6, 27; 1, 8; Exod. viii, 22; ix, 26). (B.C. 1874-1658.) It is usually called the "land of Goshen" (גֹּשֶׁן מִצְרָיִם, "country of Goshen," Gen. xlvii, 27), but also "Goshen" simply (Gen. xlv, 28, first clause, 29). It appears to have borne another name, "the land of Rameses" (רַעֲמֵסִים מִצְרָיִם, Gen. xlvii, 11), unless this be the name of a district of Goshen. (See below.) That Goshen lay on the eastern side of the Nile may be justifiably inferred from the fact that Jacob is not reported to have crossed that river; nor does it appear that the Israelites did so in their flight out of Egypt. The various opinions that have been held on the subject may be found classified and considered by Beller-mann in his *Handb. der Bibl. Lit.* iv, 191-220. Lake-macher (*Obs. Phil.* vi, 297 sq.) locates Goshen in the vicinity of Bubastis, not far from Tanis; but this is too far from Palestine. Bryant (*Obs. upon the ancient Hist. of Egypt*, p. 75 sq.) prefers the Saitic name, which likewise is too far west (comp. Eiechhorn, *Bibl.* vi, 854 sq.). Jablonsky (*De terra Gosen*, Freft. a. V. 1756; also in his *Opusc.* ii, 73) holds it to be the Heraeotic name; but this lay even west of the Nile (Michaelis, *Suppl.* i, 379 sq.). By comparing Exod. xiii, 17 and 1 Chron. vii, 21, it appears that Goshen bordered on Arabia (see Gen. xlv, 10, Sept. Γεσίμ 'Αραβίας) as well as Palestine, and the passage of the Israelites out of Egypt shows that the land was not far removed from the Red Sea. It appears probable that we may fix the locality of Goshen in Lower Egypt, on the east side of the Pelusiac branch of the Nile, in the district around Heroöpolis. The Sept. renders the words "land of Goshen" (Gen. xlvii, 28), καθ' Ἡρώων πόλιν, εἰς γῆν Παρμεσῶν, thus identifying Goshen with Rameses, or the district of Pithom or Heroöpolis. See, however, RAMESES. This would make Goshen correspond with one of the divisions of what was anciently termed the Præfectura Arabica, Ti-Arabia, the eastern district, lying, that is, on the eastern or Arabian side of the Nile. This division was that of Heliopolis or On, Matriyyeh, or Ain-Sheems. An attempt has been made to define it accurately, so as to identify Goshen (Rosenmüller, *Altertham.* iii, 245) with the Nomos Arabia (Ptol. iv, 5), or the country of Esh-shar Kijah (the eastern land), which stretches south from Pelusium as far as Belbeis (north-east from Cairo), and to the north-east borders of the desert El-Jefar. Traces are found here, it is thought, of the residence of the Israelites, in large heaps of ruins, a few hours' journey to the north-east of Cairo, which the Arabs call Tell el-Jehud (Jews' hills), or Turbeh el-Jehud (Jews' graves) (Niebuhr, i, 100; comp. Setzen, in Zach's *Corresp.* xx, 460; Hurlmann, *Eribschr.* d. *Aeg.* p. 880 sq.). Robinson (*Researches*, i, 37) makes light of the evidence supposed to be supplied by "the mounds of the Jews" just mentioned. He says, "If there is any historical foundation for this name, which is doubtful, these mounds can only be referred back to the period of the Ptolemies, in the centuries immediately before the Christian era, when great numbers of Jews resorted to Egypt and erected a temple at Leontöpolis." This opinion, however, appears to us somewhat arbitrary.

Whatever the actual origin of these mounds, the ordinary account of them may be the transmission or echo of a very ancient tradition. Robinson, however, does not deny that Goshen is to be found about where the best authorities ordinarily place it (*Researches*, i, 76). The district east of the Pelusiac Nile was suitable for a nomadic people, who would have been misplaced in the narrow limits of the valley of the Nile (Hackett's *Illust. of Script.* p. 27). "The water of the Nile soaks through the earth for some distance under the sandy tract (the neighborhood of Heliopolis), and is everywhere found on digging wells eighteen or twenty feet deep. Such wells are very frequent in parts which the inundation does not reach. The water is raised from them by wheels turned by oxen, and applied to the irrigation of the fields. Whenever this takes place the desert is turned into a fruitful field. In passing to Heliopolis we saw several such fields in the different stages of being reclaimed from the desert; some just laid out, others already fertile. In returning by another way more eastward, we passed a succession of beautiful plantations wholly dependent on this mode of irrigation" (Robinson, *Researches*, i, 36). J. D. Michaelis was of opinion (*Syriac.* p. 371) that Goshen extended from Palestine along the Mediterranean as far as the Tanitic mouth of the Nile, and thence inland up to Heliopolis, embracing a sweep of country so as to take in a part of Arabia bordering on Egypt. According to Bois Aymé (*Descrip. de l'Égypte*, viii, 111) Goshen was the valley Sabal-yar, which begins in the vicinity of Belbeis, and embraces the district of Heroöpolis. Laborde (*Arabia Petraea*, p. 58) fixes Goshen in the country around Belbeis, on the eastern side of the Nile. M. Quatremère has endeavored to define the locality, and, by comparing several passages collected from different writers, he infers that the wady Tumilat (wady Tomlate in Laborde), in which the canal of Cairo terminates, is the land of Goshen: such, at least, seems to have been the opinion of Saadias and Abu Saïd, the authors of the earliest Arabic versions of the Old Testament—the one for the use of the Jews, and the other for that of the Samaritans (*Mém. Géogr. sur l'Égypte*, i, 61). This position is confirmed by the Biblical notices. The first mention of Goshen is in Joseph's message to his father (Gen. xlv, 10), which shows that the territory was near the usual royal residence, or the residence of Joseph's Pharaoh. The dynasty to which this king belonged appears to have resided part of the year at Memphis, and part of the year, at harvest-time, at Avaris, on the Bubastite or Pelusiac branch of the Nile: this, Manetho tells us, was the custom of the first Shepherd king (Josephus, *c. Ap.* i, 14). From the account of the arrival of Jacob (Gen. xlvii, 28, 29) it is evident that Goshen was between Joseph's residence at the time and the frontier of Palestine, and apparently the extreme province towards that frontier. The advice that Joseph gave his brethren as to their conduct to Pharaoh further characterizes the territory as a grazing one (Gen. xlvii, 33, 34). (It is remarkable that in Coptic *shis* signifies both "a shepherd" and "disgrace," and the like, Rossellini, *Monumenti Storici*, i, 177.) This passage shows that Goshen was scarcely regarded as a part of Egypt Proper, and was not peopled by Egyptians—characteristics that would positively indicate a frontier province. But it is not to be inferred that Goshen had no Egyptian inhabitants at this period: at the time of the ten plagues such are distinctly mentioned. That there was, moreover, a foreign population besides the Israelites seems evident from the account of the calamity of Ephraim's house (1 Chron. vii, 20-30) [see BETHAN], and the mention of the "mixed multitude" (מִצְרַיִם וְעַמֵּי מִצְרָיִם) who went out at the Exodus (Exod. xii, 38), notices referring to the earlier and the later period of the sojourn. The name Goshen may possibly be Hebrew, or Shemitic—although we do not venture with Jerome

to derive it from **גושן**—for it also occurs as the name of a district and of a town in the south of Palestine (see below, No. 2), where we could scarcely expect an appellation of Egyptian origin unless given after the Exodus, which in this case does not seem likely. It is also noticeable that some of the names of places in Goshen or its neighborhood, as certainly Migdol and Baal-zephon (q. v.), are Shemitic, the only positive exceptions being the cities Pithom and Rameses, built during the oppression. The next mention of Goshen confirms the previous inference that its position was between Canaan and the Delta (Gen. xlvii, 1). The nature of the country is indicated still more clearly than in the passage last quoted in the answer of Pharaoh to the request of Joseph's brethren, and in the account of their settling (Gen. xlvii, 5, 6, 11). Goshen was thus a pastoral country where some of Pharaoh's cattle were kept. The expression "in the best of the land" (**בְּטֵיבֵי הָאָרֶץ**) must, we think, be relative, the best of the land for a pastoral people (although we do not accept Michaelis's reading "pastures" by comparison with the Arabic, *Suppl.* p. 1072; see Gesen. *Thes.* s. v. **בְּטֵיבֵי**), for in the matter of fertility the richest parts of Egypt are those nearest to the Nile, a position which, as has been seen, we cannot assign to Goshen. The sufficiency of this tract for

the Israelites, their prosperity there, and their virtual separation, as is evident from the account of the plagues, from the great body of the Egyptians, must also be borne in mind. The clearest indications of the exact position of Goshen are those afforded by the narrative of the Exodus. The Israelites set out from the town of Rameses, in the land of Goshen, made two days' journey to the "edge of the wilderness," and in one day more reached the Red Sea. At the starting-point two routes lay before them, "the way of the land of the Philistines . . . that [was] near," and "the way of the wilderness of the Red Sea" (Exod. xiii, 17, 18). It is also represented, in conformity with this position, at the last great struggle, as comparatively near to Palestine, by the route that lay through the land of the Philistines (Exod. xiii, 17). Then, while the Israelites do not appear to have had any considerable settlements on the further side of the Nile, yet it is clear they were in a position that admitted of ready access to it: it was on the river (whether the main stream or one of the branches) that the infant Moses was exposed; in connection with it also that several of the miracles wrought by Moses were performed; and the fish of which they had been wont to partake, and the modes of irrigation with which they were familiar, bespoke a residence somewhere in its neighborhood (Exod. ii, 5; vii, 19; viii, 5; Numb.

Map of the Land of Goshen and its Vicinity.

vi, 5; Deut. xi, 10). Yet the locality occupied by the Israelites could not have been very near the Nile, since three days were sufficient for their going into the wilderness to keep a feast to the Lord (Exod. v, 3). From these indications we infer that the land of Goshen must in part have been near the eastern side of the ancient Delta, Ramesses lying within the valley now called the wady et-Tumeylat, about thirty miles in a direct course from the ancient western shore of the Arabian Gulf. See EXODE. The superficial extent of this wady, if we include the whole cultivable part of the natural valley, which may somewhat exceed that of the tract bearing this appellation, is probably under sixty square geographical miles. If we suppose the entire Israelitish population at the time of the Exodus to have been 1,800,000, and the whole population, including Egyptians and foreigners other than the Israelites, about 2,000,000, this would give no less than between 50,000 and 40,000 inhabitants to the square mile, which would be half as dense as the ordinary population of an Eastern city. It must be remembered, however, that we need not suppose the Israelites to have been limited to the valley for pasture, but, like the Arabs, to have led their flocks into fertile tracts of the deserts around, and that we have taken for our estimate an extreme sum, that of the people at the Exodus. For the greater part of the sojourn their numbers must have been far lower, and before the Exodus they seem to have been partly spread about the territory of the oppressor, although collected at Ramesses at the time of their departure. One very large place, like the Shepherd stronghold of Avaris, which Manetho relates to have had at the first a garrison of 240,000 men, would also greatly diminish the disproportion of population to superficies. The very small superficial extent of Egypt in relation to the population necessary to the construction of the vast monuments, and the maintenance of the great armies of the Pharaohs, requires a different proportion to that of other countries—a condition fully explained by the extraordinary fertility of the soil. Even now, when the population is almost at the lowest point it has reached in history, when villages have replaced towns, and hamlets villages, it is still denser than that of many parts of England. It is not necessary, however, to suppose that during the whole period of the sojourn in Egypt the Israelites continued to dwell altogether within the same region: as they multiplied in number, and in process of time began to devote themselves to other occupations, they would naturally extend their settlements, and, at various points, become more intermingled with the population of Egypt. It is quite possible that certain of their number crossed the Pelusiac arm of the Nile, and acquired dwellings or possessions in the tract lying between it and the Tanitic (Robinson, *Researches*, i, 76; Hengstenberg, *Egypt and Books of Moses*, p. 45). Particular families may have also shot out in other directions; and in this way would naturally arise that freer intercourse between them and the families of Egypt which appears to be implied in some of the later notices (Exod. xi, 2; xii, 12-23). Still, what we have indicated above as the land of Goshen, the district in which the original settlers from Canaan were assigned a home, continued to the last the head-quarters of the covenant people (see Geiger, *De regno Ebraeorum in Egypto*, Marb. 1759). From the field of Zoan being mentioned in connection with the wonders of Moses (Psa. lxxviii, 12, 43), some have supposed that the town of that name, situated in the Tanitic nome, must have been the capital of Pharaoh at the time. Borchart and Hengstenberg, among others, have advocated this view, and said nearly all that is possible for it, but they have not been able to establish the point altogether satisfactorily; and it is quite probable that Zoan, in the passage referred to, is used in a general sense, as a kind of representative city in the land of

Egypt for the land itself (see Kurtz, *Hist. of Old Cor.* § 41).—Smith, s. v.; Kitto, s. v.; Fairbairn, s. v. See EGYPT.

2. (Sept. Γοσόμ; Vulg. *Gessen, Gozen*), the "land" or the "country" [both גֹּשֶׁן of Goshen," twice named as a district in southern Palestine, included in the conquests of Joshua (Josh. x, 41; xi, 16). From the first of these it would seem to have lain between Gaza and Gibeon, and therefore to be some part of the maritime plain of Judah; but in the latter passage that plain, the *Shefelah*, is expressly specified (here with the article) in addition to Goshen. In this place, too, the situation of Goshen—if the order of the statement be any indication—would seem to be between the "south" and the *Shefelah* (A. V. "valley"). If Goshen was any portion of this rich plain, is it not possible that its fertility may have suggested the name to the Israelites? On the other hand, the name may be far older, and may retain a trace of early intercourse between Egypt and the south of the promised land. For such intercourse comp. 1 Chron. vii, 21.—Smith, s. v. The name may even have been extended from No. 3 below (see Keil, *on Josh.* p. 280).

3. (Sept. Γόσομ, Vulg. *Gosen*.) A town of the same name is once mentioned (between Anin and Holon) in company with Delir, Socoh, and others, as in the mountains of Judah (Josh. xv, 51), in the group on the south-western part of the hills (see Keil, *Josh.* p. 384). It is probably the origin of the application to an adjacent region (No. 2, above), for it is not likely that two entirely different places would be called by the same name, both in the southern quarter of Judah. From the mention of Gaza (Josh. x, 41) and the route of Joshua (ver. 10), the locality in question would seem to be situated in the gore of Judah, running up between the territories of Benjamin and Dan, now occupied by the Beni-Malik, south of Kirjath-Jearim (comp. Robinson's *Researches*, ii, 337). See JUDAH, TRIBE OF.

**Gospel.** This word, "conformably to its etymological meaning of *Good-tidings*, is used to signify. (1.) *The welcome intelligence of salvation to man, as preached by our Lord and his followers.* (2.) It was afterwards transitively applied to each of the four *histories of our Lord's life*, published by those who are" therefore called "Evangelists," writers of the history of the Gospel (εὐαγγέλιον). (3.) "The term is often used to express collectively the *Gospel-doctrines*; and 'preaching the Gospel' is accordingly often used to include not only the 'proclaiming' of the good tidings, but the 'teaching' men how to avail themselves of the offer of salvation;" the declaring of all the truths, precepts, promises, and threatenings of Christianity. It is termed "the Gospel of the grace of God," because it flows from God's free love and goodness (Acts xx, 24); and, when truly and faithfully preached, is accompanied with the influences of the divine Spirit. It is called "the Gospel of the kingdom," because it treats of the kingdom of grace, and shows the way to the kingdom of glory. It is styled "the Gospel of Christ" because he is the author and great subject of it (Rom. i, 16); and "the Gospel of peace and salvation," because it publishes peace with God to the penitent and believing, gives, to such, peace of conscience and tranquillity of mind, and is the means of their salvation, present and eternal. As it displays the glory of God and of Christ, and ensures to his true followers eternal glory, it is entitled "the glorious Gospel" and "the everlasting Gospel," because it commenced from the fall of man, is permanent throughout all time, and produces effects which are everlasting. This use of the word "gospel" has led some to suppose that Gospel-truth is to be found exclusively or chiefly in the "Gospels," to the neglect of the other sacred writings; and others, to conclude that the discourses of our Lord and the apostolic epistles must exactly coin-

cide; and that in case of any apparent difference, the former must be the standard, and the latter must be taken to bear no other sense than what is implied by the other. Whereas, it is very conceivable, that though both might be, in a certain sense, "good tidings," yet one may contain a much more full development of the Christian scheme than the other (Eden; Watson). It has been disputed whether the Gospel consists merely of promises, or whether it can in any sense be called a law. The answer plainly depends upon adjusting the meaning of the words *gospel* and *law*. If the gospel be taken for the declaration God has made to men by Christ, concerning the manner in which he will treat them, and the conduct he expects from them, it is plain that this includes commands, and even threatenings, as well as promises; but to define the Gospel so as only to express the favorable part of that declaration, is indeed taking the question for granted, and confining the word to a sense much less extensive than it often has in Scripture (comp. Rom. ii, 16; 2 Thess. i, 8; 1 Tim. i, 9-11); and it is certain that, if the Gospel be put for all the parts of the dispensation taken in connection one with another, it may well be called, on the whole, a good message. In like manner the question, whether the Gospel be a law or not, is to be determined by the definition of the law and of the Gospel, as above. If *law* signifies, as it generally does, the discovery of the will of a superior, teaching what he requires of those under his government, with the intimation of his intention of dispensing rewards and punishments, as this rule of their conduct is observed or neglected; in this latitude of expression it is plain, from the proposition, that the Gospel, taken for the declaration made to men by Christ, is a *law*, as in Scripture it is sometimes called (James i, 25; Rom. iv, 15; viii, 2). But if law be taken, in the greatest rigor of the expression, for such a discovery of the will of God and our duty, as to contain in it no intimation of our obtaining the divine favor otherwise than by a perfect and universal conformity to it, in that sense the Gospel is not a law. See Witsius, *On the Covenants*, vol. iii, ch. i; Doddridge, *Lectures*, lect. clxxii; Watts, *Orthodoxy and Charity*, Essay ii; Buck, s. v.

**GOSPEL SIDE OF THE ALTAR**, the right side of the altar or communion-table, looking from it, at which, in the English Church service, the Gospel appointed for the day is read. It is of higher distinction than the epistle side, and is occupied by the clergyman of highest ecclesiastical rank who happens to be present. In some cathedrals, one of the clergy has this special duty to perform, and is designated the Gospeller.

**Gospeller.** (1.) A term of reproach, though really an honorable epithet, applied by the Romanists to those who advocate the circulation of the Scriptures. It was first given in England to the followers of Wickliffe, when that eminent reformer translated the New Testament (Eden). (2.) A term applied in the Reformation period to certain Antinomians. "I do not find anything objected to them as to their belief, save only that the doctrine of predestination having been generally taught by the reformers, many of this sect began to make strange inferences from it, reckoning that since everything is decreed, and the decrees of God could not be frustrated, therefore men were to leave themselves to be carried by these decrees. This drew some into great impiety of life, and others into desperation. The Germans soon saw the ill effects of this doctrine. Luther changed his mind about it, and Melancthon openly writ against it; and since that time the whole stream of the Lutheran churches has run the other way. But both Calvin and Bucer were still for maintaining the doctrine of these decrees; only they warned the people not to think much of them, since they were secrets which men could not penetrate into; but they did not so clearly show how these consequences did not flow from such opinions. Hooper,

and many other good writers, did often dehort people from entering into these curiosities; and a caveat to that same purpose was put afterwards into the article of the Church about predestination" (Burnet, *History of Reformation*, pt. ii, bk. i, p. 180). (3.) It is customary in the Church of England for the ministers to read the gospel and epistle for the day at the communion-table. He who read the gospel, standing at the north side of the altar, was formerly called the *Gospeller*; and he who read the epistle at the opposite side, was called the *Epistoler*. In the canons of queen Elizabeth, we find that a special reader, entitled an Epistoler, is to read the epistle in collegiate churches, vested in a cope (Farrar).

**Gospels**, a term evidently of Anglo-Saxon origin (according to some, i. q. *God's Spell*, i. e. Word of God; but according to most and better authorities, i. q. *good spell*, i. e. glad news) is the rendering of εὐαγγέλιον, lit. *good message* (originally spoken of a *revival for good news*, Homer, *Odyssey*, xiv, 152, 166; Plutarch, *Ages*, 33; then of glad tidings itself, and so Sept. for מְבִרָה, 2 Sam. xviii, 20, 22), constantly used in the N. T. (but not in Luke nor by John, and only twice in Acts, once in Peter, and once in Rev.) to denote, 1. The announcement of the kingdom of the Messiah, as ushered in by the coming and life of Christ; 2. The Gospel scheme or plan of salvation thus inaugurated, especially in its promulgations; and, 3. The records or histories which constitute the original documents of this system of faith and practice. Justin Martyr employs for the last the less appropriate term ἀπομνημόματα, *memoirs*; and other ancient writers occasionally style them βίαι, *lives*; but they were not so much designed as biographical sketches, whether complete or otherwise, but rather as outlines of the divine economy introduced in the New Dispensation. The central point of Christian preaching was the joyful intelligence that the Saviour had come into the world (Matt. iv, 23; Rom. x, 15); and the first Christian preachers, who characterized their account of the person and mission of Christ by the term εὐαγγέλιον, were themselves called εὐαγγελιστῆαι (Ephes. iv, 11; Acts xxi, 8). The former name was also prefixed to the written accounts of Christ; and as this intelligence was noted down by various writers in various forms, the particle κατά, "according to" (e. g. εὐαγγέλιον κατὰ Ματθαίου) was inserted. We possess four such accounts; the first by Matthew, announcing the Redeemer as the promised King of the kingdom of God; the second by Mark, declaring him "a prophet mighty in deed and word" (Luke xxiv, 19); the third by Luke, of whom it might be said that he represented Christ in the special character of the Saviour of sinners (Luke vii, 36 sq.; xv, 18-9 sq.); the fourth by John, who represents Christ as the Son of God, in whom deity and humanity became one. The ancient Church gave to Matthew the symbol of the ox, to Mark that of the lion, to Luke that of the man, and to John that of the eagle; these were the four faces of the cherubim. The cloud in which the Lord revealed himself was borne by the cherubim, and the four evangelists were also the bearers of that glory of God which appeared in the form of man.

**I. Relative Position.**—Concerning the order which they occupy in the Scriptures, the oldest Latin and Gothic versions, as also the Codex Cantabrigiensis, place Matthew and John first, and after them Mark and Luke, while the other MSS. and old versions follow the order given to them in our Bibles. As dogmatical reasons render a different order more natural, there is much in favor of the opinion that their usual position arose from regard to the chronological dates of the respective composition of the four gospels (see Seiler, *De tempore et ordine quibus tria Evang. priora scripta sunt*, Erlang. 1805 sq.): this is the opinion of Origen, Irenæus, and Eusebius. All ancient testimonies agree that Matthew was the earliest and John the

latest evangelist.—Kitto, s. v. For the dates, see each gospel. See also Tischendorf's tract, *Wann wurden unsere Evangelien verfasst?* (2d ed. Lpz. 1865).

II. *Authenticity.*—It may fairly be said that the genuineness of these four narratives rests upon better evidence than that of any other ancient writings. They were all composed during the latter half of the 1st century. Before the end of the 2d century there is abundant evidence that the four gospels, as one collection, were generally used and accepted. Irenæus, who suffered martyrdom about A.D. 202, the disciple of Polycarp and Papias, who, from having been in Asia, in Gaul, and in Rome, had ample means of knowing the belief of various churches, says that the authority of the four gospels was so confirmed that even the heretics of his time could not reject them, but were obliged to attempt to prove their tenets out of one or other of them (*Contr. Har.* iii, 11, § 7). Tertullian, in a work written about A.D. 208, mentions the four gospels, two of them as the work of apostles, and two as that of the disciples of apostles (*apostolici*); and rests their authority on their apostolic origin (*Adv. Marcion.* iv, ch. ii). Origen, who was born about A.D. 185, and died A.D. 253, describes the gospels in a characteristic strain of metaphor as "the [four] elements of the Church's faith, of which the whole world, reconciled to God in Christ, is composed" (*In Johann.*). Elsewhere, in commenting on the opening words of Luke, he draws a line between the inspired Gospels and such productions as "the Gospel according to the Egyptians," "the Gospel of the Twelve," and the like (*Homil. in Luc.* iii, p. 932 sq.). Although Theophilus, who became sixth (seventh?) bishop of Antioch about A.D. 168, speaks only of "the gospels," without adding, at least in that connection, the names of the authors (*Ad Autol.* iii, p. 124, 125), we might fairly conclude with Gieseler that he refers to the collection of four, already known in his time. But from Jerome we know that Theophilus arranged the records of the four evangelists into one work (*Epist. ad Algas.* iv, p. 197). Tatian, who died about A.D. 170 (?), compiled a *Diatessaron*, or Harmony of the Gospels. The Muratorian fragment (Murator, *Antiq. It.* iii, 854; Routh, *Relig. S.* vol. iv), which, even if it be not by Caius and of the 2d century, is at least a very old monument of the Roman Church, describes the gospels of Luke and John; but time and carelessness seem to have destroyed the sentences relating to Matthew and Mark. Another source of evidence is open to us in the citations from the gospels found in the earliest writers. Barnabas, Clemens Romanus, and Polycarp quote passages from them, but not with verbal exactness. The testimony of Jun-fun Martyr (born about A.D. 99, martyred A.D. 165) is much fuller; many of his quotations are substantially found in the gospels of Matthew, Luke, probably of John, and possibly of Mark also, whose words it is more difficult to separate. The quotations from Matthew are the most numerous. In historical references, the mode of quotation is more free, and the narrative occasionally unites those of Matthew and Luke: in a very few cases he alludes to matters not mentioned in the canonical gospels (see *Sernisch, Apost. Denkwürdigk. d. M. Justin.* Hamb. 1848). Besides these, Matthew appears to be quoted by the author of the epistle to Diognetus, by Hegesippus, Irenæus, Tatian, Athenagoras, and Theophilus. Eusebius records that Pantænus found in India (the south of Arabia?) Christians who used the gospel of Matthew. All this shows that long before the end of the 2d century the gospel of Matthew was in general use. From the fact that Mark's gospel has few places peculiar to it, it is more difficult to identify citations not expressly assigned to him; but Justin Martyr and Athenagoras appear to quote his gospel, and Irenæus does so by name. Luke is quoted by Justin, Irenæus, Tatian, Athenagoras, and Theophilus; and John by all of these, with the addition of Ignatius, the epistle to Di-

ognetus, and Polycrates. From these we may conclude that before the end of the second century the Gospel collection was well known and in general use. There is yet another line of evidence. The heretical sects, as well as the fathers of the Church, knew the gospels; and as there was the greatest hostility between them, if the gospels had become known in the Church after the dissension arose, the heretics would never have accepted them as genuine from such a quarter. Both the Gnostics and Marcionites arose early in the 2d century; and therefore it is probable that the gospels were then accepted, and thus they are traced back almost to the times of the apostles (Ols-hausen). Upon a review of all the witnesses, from the apostolic fathers down to the Canon of the Laodicean Council in 364, and that of the third Council of Carthage in 397, in both of which the four gospels are numbered in the Canon of Scripture, there can hardly be room for any candid person to doubt that from the first the four gospels were recognised as genuine and as inspired; that a sharp line of distinction was drawn between them and the so-called apocryphal gospels, of which the number was very great; that, from the citations of passages, the gospels bearing these four names were the same as those which we possess in our Bibles under the same names; that unbelievers, like Celsus, did not deny the genuineness of the gospels, even when rejecting their contents; and, lastly, that heretics thought it necessary to plead some kind of sanction out of the gospels for their doctrines: nor could they venture on the easier path of an entire rejection, because the gospels were everywhere known to be genuine. As a matter of literary history, nothing can be better established than the genuineness of the gospels; and if in these latest times they have been assailed, it is plain that theological doubts have been concerned in the attack. The authority of the books has been denied from a wish to set aside their contents. Out of a mass of authorities the following may be selected: Norton, *Genuineness of the Gospels* (Bost. 1846-8, 3 vols.); Kirchofer, *Quellenammlung zur Geschichte des N.-T. Canons* (Zurich, 1844); De Wette, *Lehrbuch der hist.-krit. Einleitung*, etc. (6th ed., Berlin, 1860; tr. Bost. 1858); Hug's *Einleitung* (tr. with notes, Andover, 1836); Ols-hausen, *Biblischer Commentar*. Introduction, and his *Echtheit der 4 Canon. Evangelien* (Königsb. 1823); Jones, *Method of settling the canonical Authority of the N. T.* (Oxf. 1798, 2 vols.); Baur, *Krit. Untersuchungen über die Canon. Evangelien* (Tüb. 1847); Reuss, *Gesch. des N. T.* (4th ed., Brunswick, 1864); Alford's *Greek Testament*, Prolegomena, vol. i; Westcott's *History of N.-T. Canon* (2d ed. Lond. 1866); Gieseler, *Historisch-kritischer Versuch über die Entstehung, etc., der schriftlichen Evangelien* (Lpz. 1818).—Smith, s. v.

III. *Mutual Relation and Origin.*—"Many portions of the history of Jesus" (remarks Mr. Norton, who has minutely investigated the subject) "are found in common in the first three gospels, others are common to two of their number, but not found in the third. In the passages referred to, there is generally a similarity, sometimes a very great similarity, in the selection of particular circumstances, in the aspect under which the event is viewed, and the style in which it is related. Sometimes the language found in different gospels, though not identical, is equivalent or nearly equivalent; and not unfrequently, the same series of words, with or without slight variations, occurs throughout the whole or a great part of a sentence, and even in larger portions" (*Genuineness of the Gospels*, i, 240). Mr. Westcott exhibits the proportion of correspondences and peculiarities in several numerical tables: "If the extent of all the coincidences be represented by 100, their proportionate distribution will be, Matthew, Mark, and Luke, 53; Matthew and Luke, 21; Matthew and Mark, 20; Mark and Luke, 6. . . . Looking only at the general result, it may be said that of the

contents of the synoptic gospels, about two fifths are common to the three, and that the parts peculiar to one or other of them are little more than one third of the whole." He adds, "in the distribution of the verbal coincidences a very simple law is observable; they occur most commonly in the recital of the words of our Lord or of others, and are comparatively rare in the simple narrative. Thus, of the verbal coincidences in Matthew, about seven eighths; of those in Mark, about four fifths; and of those in Luke, about nineteen twentieths, occur in the record of the words of others" (*Introduction to the Study of the Gospels*, p. 179). The following instances may be referred to for illustration, Matt. viii, 2, 3 = Mark i, 40, 42 = Luke v, 12, 13; Matt. ix, 5, 6 = Mark ii, 9, 11 = Luke v, 23, 24; Matt. xix, 23, 24 = Mark x, 23-25 = Luke xviii, 24, 25. The amount of agreement, however remarkable, ought not to be overrated; it occurs chiefly in reporting the words of Christ. Norton gives, as the most striking instance of verbal coincidence in the case of narrative, Luke ix, 16 (comp. Matt. xiv, 19; Mark vi, 41). Along with the instances of correspondence, there are also many instances of difference. This renders the problem difficult of solution. No explanation can be satisfactory which does not account for both the correspondences and differences. Such is the phenomenon which has provoked so many attempts at explanation. The literature of the subject is of vast extent, and the question is regarded as still unsettled. Our aim in the present article is to inquire how near the principal hypotheses which have been proposed approach to a solution of the difficulty.

1. In order to account for this singular relationship between the synoptic gospels, the first supposition is that the evangelists copied from one another, or that one evangelist used the gospels of his predecessors, making such extracts as he thought necessary, with alterations and additions of his own. It is a curious circumstance, however, that the supposition of any one of the evangelists copying from the others is attended with insuperable difficulty. Whichever of them we suppose to be the original evangelist, and whichever we suppose to be the last, having one or both the others before him, we are unable in this way to explain the phenomenon. There are six possible ways of putting the case, every one of which has had learned advocates, and this variety of opinion itself is a strong argument against the hypothesis. Griesbach thought that Mark copied from Matthew and Luke, and this opinion is still held by some; but an opinion in favor of the originality of Mark has of late been gaining ground (Thiersch, Meyer, Weiss). It must, we think, be evident to any one who attentively compares the gospels of Matthew and Mark, that the latter cannot with any propriety be called a copy or abridgment of the former. There is an air of originality and freshness in Mark's narrative which proves the work to be anything but a compilation; and besides, in several important particulars, Mark differs from Matthew. No explanation can be satisfactory which does not account for the want of agreement as well as the agreement between the gospels. Indeed, it is not easy to see what object Mark or any other of the evangelists could have in compiling a new gospel out of one or more which were acknowledged to be the works of apostles or their companions. "In its simple form, the 'supplemental' or 'dependent' theory is at once inadequate for the solution of the difficulties of the relation of the synoptic gospels, and inconsistent with many of its details; and, as a natural consequence of a deeper study of the gospels, it is now generally abandoned, except in combination with other principles of solution" (Westcott, *On the Gospels*, p. 184).

2. We are thus brought to consider Eichhorn's famous hypothesis of a so-called *original gospel*, now lost. A brief written narrative of the life of Christ is supposed to have been in existence, and to have had addi-

tions made to it at different periods. Various copies of this original gospel, with these additions, being extant in the time of the evangelists, each of the evangelists is supposed to have used a different copy as the basis of his gospel. In the hands of bishop Marsh, who adopted and modified the hypothesis of Eichhorn, this original gospel becomes a very complex thing. He supposed that there was a Greek translation of the Aramaean original gospel, and various transcripts with alterations and additions. But when it is considered that all these suppositions are entirely gratuitous, that they are made only to meet the emergencies of the case as they arise, one cannot help feeling that the license of hypothesis is carried beyond just bounds. The grand objection to this original gospel is the entire want of historical evidence for its existence. If such an original gospel ever had existed, it must have been of the very highest authority, and, instead of being tampered with, would have been carefully preserved in its original form, or at least in its Greek translation. The alterations and additions supposed to have been made in it are not only inconsistent with its sacred and authoritative character as the original gospel, but also with the habits of the Jews. Even if this hypothesis did adequately explain the phenomena presented in the first three gospels, it is far too artificially contrived to be true; but it fails of its aim. The original work, supposed to consist of the sections common to the three gospels, cannot be made out; and the individuality of character belonging to each of the evangelists is irreconcilable with the supposition that several different writers contributed materials. Notwithstanding the identity of subject among the three gospels, each writer is distinguished by his own characteristic style. It is remarkable that Dr. Weiss, of Königsberg, has quite recently (*Stud. u. Kritik*, 1861, i, iv) propounded a theory of explanation very much akin to that of Marsh. He supposes that the first evangelist, the writer of Matthew's Gospel, as well as Luke, used a copy of Mark's Gospel, and, along with this, a second more ancient, perhaps immediately apostolic written source, which Mark also had already made use of in the composition of his gospel. In this way he thinks all the phenomena are simply and easily explained. He endeavors to establish his view by a detailed examination and comparison of the three synoptic gospels, and holds that these results of criticism are confirmed by the ancient tradition that Matthew wrote his gospel in Hebrew, while there is no trace of the Hebrew gospel itself. The conclusion is that the Hebrew gospel of Matthew must have been displaced at an early period by another containing its essential contents, but richer and more generally accessible in its Greek form. Hence the later Greek gospel was held to be the work of Matthew the apostle, the more ancient Hebrew one having been really the apostle's work. This revival in the present day of what is substantially the hypothesis of Eichhorn and Marsh is significant of the still unsettled state of the question.

3. That our present gospels are to be traced mainly to the oral teaching of the apostles as their source, was the opinion of Herder and Gieseler, and more recently of De Wette, Guericke, Norton, Westcott, and others. "They have correctly apprehended" (says De Wette) "the spirit of Christian antiquity who regard the *oral tradition* of the gospel (the *oral original gospel*) as the basis and source of all the Christian gospels, and who endeavor to apprehend the history of the origin of the latter in a definite relation to the former" (*Introd. to N. T.*, sec. 87). The gospel was published orally before it was committed to writing, and the preaching of the apostles must, from the nature of the case, have consisted chiefly of a narration of the facts recorded in our present gospels. It is naturally supposed that very soon a certain agreement or uniformity of narrative would be the result, and that we have a transcript, as it were, of this type or form of narrative in the first

three gospels. The verbal coincidences in the gospels are found especially in those cases in which it might have been expected that the first preachers of the gospel would be exact, namely, the recital of the words of Christ, and quotations from the O. T. This account of the probable origin of the gospels is not only in accordance with the character of the period as an age of oral tradition rather than of writing, but is also substantially the same as that which Luke gives in the preface to his gospel (Luke i, 1-4). While Luke refers to written accounts of the ministry of Christ in the possession of some Christians at that time, he mentions that these accounts were founded directly or indirectly upon the oral accounts of the apostles (*καθὼς παρέδουσαν ἡμῖν οἱ ἀπ' ἀρχῆς αὐτόπται καὶ ὑπηρεταὶ γενόμενοι τοῦ λόγου*). The statement of Papias respecting the origin of Mark's Gospel is, that it was derived from the preaching of Peter, and we have already quoted the important testimony of Irenæus to the same effect. To prevent misapprehension, however, it ought to be observed that our written gospels date from the latter half of the first century, and that, "so long as the first witnesses survived, so long the tradition was confined within the bounds of their testimony; when they passed away it was already fixed in writing" (Westcott, p. 192). The theory of the oral origin of the gospels, while it has much evidence in its favor, cannot be accepted as a complete solution of the problem. It does not explain the striking instances of verbal coincidence in the narrative portions common to the three synoptists, or to two of them; nor the instances in which either two or all the three evangelists agree with each other in their quotations from the Sept., and at the same time differ from the Sept. itself (Matt. iii, 3; Mark i, 3; Luke iii, 4; compared with Isa. xl, 3, Sept., and Matt. iv, 10; Luke iv, 8, compared with Deut. vi, 13, Sept.). De Wette would combine "the two hypotheses of a common oral source, and of the influence through writing of one evangelist on another."

There is a striking difference between the fourth gospel and the synoptic gospels in respect both to contents and form; but, with all this difference, there is a general and essential agreement. John relates in part the same things as the synoptists, and in a similar manner, but not with the verbal agreement. The following are parallel: The purification of the Temple, ii, 13-22 = Matt. xxi, 11 sq.; the feeding of the multitude, vi, 1-15 = Matt. xiv, 13-21; the walking upon the sea, vi, 16-21 = Matt. xiv, 22-36; the anointing, xii, 1-8 = Matt. xxvi, 6-13; the entry into Jerusalem, xii, 9-19 = Matt. xxi, 1-11; the prediction of the denial of Peter, xiii, 36-38 = Matt. xxvi, 33-35. In some of these instances the expressions are verbally parallel; also in the following: xii, 25 = Matt. x, 39; xiii, 20 = Matt. x, 40; xiv, 31 = Matt. xxvi, 46. There is a similarity between iv, 44, and Matt. xiii, 57; between xiii, 16 and Matt. x, 24, and Luke vi, 40 (De Wette, *Evangel. Handb.*, zum N. Test.). On the other hand, however, much important matter has been omitted and much added by John, while his manner of narration also differs from that of the synoptists. In the first three gospels, the scene of our Lord's ministry is chiefly laid in Galilee, but in the fourth gospel it is chiefly in Judæa and Jerusalem. This may partly account for the different style of our Lord's discourses in the synoptic gospels, as compared with the Gospel of John (Hug, p. 433). In the former, Christ often makes use of parables and proverbial sayings; in the latter, John records long and mystical discourses. Yet we find proverbial maxims and parables also in John xii, 24-26; xiii, 16, 20; x, 1 sq.; xv, 1 sq. Many points of difference between the fourth gospel and the others may be satisfactorily accounted for from the fragmentary character of the narratives. None of them professes to be a complete biography, and, therefore, one may contain what others omit. Besides, the fourth gospel was

composed after the others, and designed to be in some respects supplemental. This was the opinion of Eusebius, and of the still more ancient writers whose testimony he cites, Clement of Alexandria and Origen; and the opinion appears to be well founded. Whether John was acquainted with the works of his predecessors or not is uncertain, but he was no doubt acquainted with the evangelical tradition out of which they originated. We have, then, in this circumstance, a very natural explanation of the omission of many important facts, such as the institution of the supper, the baptism of Jesus by John, the history of his temptation and transfiguration, and the internal conflict at Gethsemane. These his narrative assumes as already known. In several passages he presupposes in his readers an acquaintance with the evangelical tradition (i, 32, 45; ii, 1; iii, 24; xi, 2). It is not easy to reconcile the apparent discrepancy between John and the synoptists with reference to the day on which Christ observed the last passover with his disciples. Lücke decides in favor of John, but thereby admits the discrepancy to be real. Again, in the synoptic gospels, the duration of our Lord's ministry appears to be only one year, whereas John mentions three passovers which our Saviour attended; but neither the synoptists nor John determine the duration of the Saviour's ministry, and, therefore, there is no contradiction between them on this point. It has been alleged that there is an irreconcilable difference between the synoptic and the Johannæan representation of Christ, so that, assuming the historical reality of the former, the latter must be regarded as ideal and subjective; particularly, that the long discourses attributed to Christ in the fourth gospel could hardly have been retained in John's remembrance, and that they are so unlike the sayings of Christ in the other gospels, and so like John's own style in his epistles, that they appear to have been composed by John himself. If the allegation could be made good that the Christ of John is essentially different from the Christ of the synoptists, the objection would be fatal. On the contrary, however, we are persuaded that, on this all-important point, there is an essential agreement among all the evangelists. We must remember that the full and many-sided character of Christ himself might be represented under aspects which, although different, were not inconsistent with each other. It is by no means correct to say that the fourth gospel represents Christ as God, while the others describe him as a mere man. Yet we may find in the fact of his wondrous person as the God-man an explanation of the apparent difference in their respective representations. That the synoptists do not differ essentially from John in their view of Christ is shown by Dorner in an admirable comparison (Dorner, *Entwickelungsgeschichte*, i, 81 sq.; E. tr. i, 50 sq.). Lücke and Frommann, as well as De Wette, greatly incline to the view that John has mingled his own subjectivity with the discourses of Christ, which he professes to relate. That the evangelist does not transfer his own subjective views to Christ appears from the fact that while he speaks of Christ as the Logos, he never represents Christ as applying this term to himself. We may also refer to those passages in which, after quoting obscure sayings of the Redeemer or remarkable occurrences, he either adds an explanation or openly confesses his ignorance of their meaning at the time (ii, 19-22; vi, 70; vii, 37-39; xi, 11; xii, 16, 32; xiii, 27; xx, 9).

The susceptible disposition of John himself, and the intimate relation in which he stood to Christ, make the supposition reasonable that he drank so deeply into the spirit of his master, and retained so vivid a recollection of his very words, as to reproduce them with accuracy. Instead of transferring his own thoughts and expressions to Christ, John received and reproduced those of Christ himself. In this way the similarity between John's language and that of Christ is

accounted for. It is acknowledged, even by Strauss and De Wette, that the most characteristic expressions in John were really used by Christ himself. When it is objected that John could not retain in remembrance, or hand down with accuracy, such long discourses of Christ as he records in his gospel, far too little regard is paid to the assistance of the Holy Spirit, to be expected especially in such a case as this, according to the Saviour's promise, "He shall teach you all things, and bring all things to your remembrance, whatsoever I have said unto you" (John xiv, 26).—Kitto, s. v.

See Bp. Marsh's *Translation of Michaelis's Introd. to N. T.* iii, 2 (1803) for an account of Eichhorn's earlier theory and of his own. Veyssie's *Examination of Mr. Marsh's Hypothesis* (1808) has suggested many of the objections. In Bp. Thirlwall's *Translation of Schleiermacher on St. Luke* (1825, Introduction) is an account of the whole question. Other principal works are, an essay of Eichhorn, in the 5th vol. *Allgemeine Bibliothek der Biblischen Literatur* (1794); the Essay of Bp. Marsh, just quoted; Eichhorn, *Eiuleitung in das N. T.* (1804); Gratz, *Neuer Versuch die Entstehung der drei ersten Evang. zu erklären* (1812); Bertholdt, *Histor.-kritische Einleitung in sämtliche kanon. und apok. Schriften des A. und N. T.* (1812-1819); and the work of Gieseler quoted above. See also De Wette, *Lehrbuch*, and Westcott, *Introd.*, already quoted; also Weiss, *Evangelienfrage* (Lpz. 1856); Schlichthorst, *Verhältn. d. synopt. Evang. zu einander* (Götting, 1835); Wilke, *Der Urangelig* (Dresden and Leipzig, 1838); Lücke, *Komment. üb. d. Ev. Joh.*; Frommann, *Der Johannische Lehrbegriff*; Schwarz, *Untersuchungen über d. synopt. Evangelien* (Tüb. 1844); Anon. *Die Evangelien, ihr Geist, Verfasser und Verhältnis zu einander* (Leipzig, 1845); Rietsch, in the *Theol. Jahrb.* 1851; Köstlin, *Ursprung und Kompos. d. synopt. Evangelien* (Stuttg. 1853); Smith (of Jordanhill), *Origin and Connection of the Gospels* (Edinb. 1853). For the mythical theory of the origin of the gospels, as developed by Strauss and others, see RATIONALISM, and the art. JESUS. For dissertations on the Gospels, see HARMONIES OF THE GOSPELS.

IV. *Commentaries*, expressly on the whole of the four gospels alone, have been numerous; the most important are here designated by an asterisk (\*) prefixed: Theophilus, *Commentariorum fragmenta* (in Grabe, *Spicilegium*, ii, 223 sq.); Athanasius, *Questiones* (in *Opp.* [Spur.], ii, 253 sq.); Jerome, *Expositio* (in *Opp.* [Supp.] xi, 733 sq.); Augustine, *Questionum lib. ii* (in *Opp.* iv, 311 sq.); Juvenius, *Carmina* (in *Bibl. Patr.* Gallandii iv); Sedulius, *Expositiones* [on Matt., Mark, and Luke] (in *Maii Script. Vet.* ix, 159 sq.); Arnobius, *Annotationuula* (in *Bibl. Max. Patr.* viii); Theophylact, *Commentarius* (in *Opp.* i); Anselm, *Explanations* (in *Opp.* ed. Picard); Rupert, *In Evang. lib. i* (in *Opp.* i, 534 sq.); Euthymius, *Commentarius* (Gr. and Lat., Lips. 1792, 3 vols. in 4, 8vo); Aquinas, in *Aurea Catena* (Paris, 1637, fol.); also in *Opp.* iv, 5; in *Bibl. Patr.* Gall. xiv, 297, et al.; *Catena from the Fathers*, by Pusey, etc., Oxf. 1841-5, 4 vols. in 8, 8vo); Gorraun, *Commentaria* (Colon. 1472, 1537, Hag. 1502, Antw. 1617, Lugd. 1693, fol.); Zuingli, *Adnotationes* [ed. Leo Juda] (in *Opp.* iv); Faber, *Commentarii* (Meld. 1522, Basil. 1523, Col. 1541, fol.); Bucer, *Enarrationes* (Argent. 1527, 1528, 2 vols. 8vo; Basil. 1537, Geneva, 1553, fol.); Arboreus, *Commentarius* (Paris, 1529, 1551, fol.); Cajetan, *Commentarii* (Venice, 1530, Paris, 1532, 1536, 1540, 1543, fol.; ib. 1542, Lugd. 1558, 1574, 8vo); Sarcer, *Scholia* (on the gospels successively, Freft. and Basel, 1538-50, 4 vols. 8vo); Broeckweg, *Enarrationes* (Par. 1543, 8vo; Ven. 1648, 4to); Herboren, *Enarrationes* (Colon. 1546, 4to); Brunfeld, *Adnotationes* [including Acts] (Argent. 1553, fol.); Delreio, *Commentarii* (Hispal. 1554, fol.); Lessii *Adnotationes* (Francft. 1559, 2 vols. fol.); Bullinger, *Commentarius* (on successive gospels; together, Tigurini, 1561, fol.); Aretius,

*Commentarii* (Lausanne, 1578, 2 vols. 8vo; also in his *Comment.* on the N. T.); Rande, *Erklärung* (Francfort, 1597, fol.); Biniot, *Commentaria* (Paris, 1581); Sa, *Scholia* [compiled] (Antwerp, 1591, Lugd. 1602, Colon. 1612, 4to); Bulliond, extracts of old and new comments (in French, Lyons, 1596, 1628, 4to); \*Maldonatus [Rom. Catholic], *Commentarius* (Mussipont. 1596, 2 vols. fol.; and often later in various forms; his own last. ed. Lugd. 1615, fol.; lately, Mogunt. 1841-55, 5 vols. fol.); Gualtha, *Homiliæ* [including Acts] (Tigur. 1601, fol.); Lucas, *Commentarius* (Antw. 1606, 2 vols. fol., with a supplement in two vols. fol. on ib., 1612-16; complete, ib. 1712, 5 vols. in 2, fol.); Scultetus, *Exercitationes* (Amst. 1624, 4to; also in the *Critici Sacri*, vi); Heraeus, *Scholia* [founded on Aquinas] (Antw. 1625, 12mo); Coutzen, *Commentaria* (Colon. et Mog. 1626, 2 vols. fol.); Munster and others, *Annotationes* (in the *Critici Sacri*, vi); Masius, *Note* (ib. vi); Jansen, *Commentarius* (1631); Crell, *Explicatio* (in *Opp.* iii, 1 sq.); Ebert, *Tetrasticha Hebræa* (in Ugolini, xxxi, 117 sq.); De Rance, *Réflexions* (Paris, 1639, 4 vols. 12mo); De Dieu, *Animadversiones* (L. B. 1633, 4to); Spanheim, *Dubia Evangelica* [polemic] (Geneva, 1634-9, and later, 3 vols. 4to); Bounet's *Commentary* (in French, Par. 1634, 4to); Panonus, *Commentarius* (Naples, 1636, fol.); De Sylveria, *Commentarii* (in 6 successive vols., some of them often, chiefly at Lyons, 1642-75); Trapp, *Commentary* [including Acts] (London, 1647, 4to; 1748, 1668, 8vo); Walaus, *Commentarius* [from Beza and others] (L. B. 1653, 4to); Boys, *Collatio* [chiefly in favor of the Vulgate] (Lond. 1655, 8vo); Ferrerus, *Commentarius* (Lugd. 1661, fol.); Wolzogen, *Commentarius* (in *Opp.* [Amst. 1668, fol.] p. 1-1038); Sandys, *Interpretationes* (Amst. 1669, 8vo); Lightfoot, *Horæ Hebræicæ* [valuable for Talmudical comparisons] (ed. Carpzov, Lips. 1675, 4to); Keuchen, *Adnotata* [including Acts] (Amst. 1689, and later, 4to); \*Alex. Natalis [Roman Cath.] *Expositio* [chiefly extracted] (Paris, 1703, fol.); \*Dorsche, *Commentarius* (Hamb. 1706, 4to); Ulric, *Bibelübung* [compiled by Wirz] (Tigur. 1713-39, 4 vols. 8vo); S. Clarke, *Paraphrase* (first in parts, Lond. 1721-2, and later, 2 vols. 8vo; also in *Works*, iii; transl. in Germ. by Wilmsen, Berl. 1763, 3 vols. 4to); Hagiophilus, *Observationes* [incomplete] (Gardeleg, 1741, 4to); Hoehler, *Analecæ* (ed. Wolfii, Altenb. 1766, 4to); Lynnar, *Erklär.* (Halle, 1775, 8vo); Bp. Pearce, *Commentary* [including Acts] (London, 1777, 2 vols. 4to); Thalemann, *Version* [including Acts] (Berlin, 1781, 8vo); Bp. Mann, *Notes* [including Acts] (2d ed. London, 1783, 12mo); Campbell, *Notes* (Aberdeen, 1789, 2 vols. 8vo; 3d ed. ib. 1814, 4 vols. 8vo; Andover, 1837, 2 vols. 8vo); Quesnel, *Comment* (Bath, 1790, 2 vols. 8vo; London, 1830, 3 vols. 12mo); Bossuet, *Réflexions* (in *Œuvres*, xiv, 117 sq.); Erskine, *Songs* (in *Works*, x, 627 sq.); Schulz, *Anmerk.* (Halle, 1794, 4to); Elsley, *Annotations* [including Acts] (Lond. 1799, 1821, 1827, 3 vols.; 1841, 2 vols.; 1844, 1 vol. 8vo); Brameld, *Notes* (Lond. 1803, 8vo); \*Kuimol, *Commentarius* [including Acts] (Lips. 1807-12, and since, 4 vols. 8vo; London, 1835, 3 vols. 8vo); Jones, *Illustrations* (Lond. 1808, 8vo); Staback, *Annotations* [including Acts] (Falmouth, 1809, 2 vols. 8vo); St. Gilly, *Observations* (Lond. 1818, 8vo); Kistemaker, *Erklärung* (Münst. 1818-20, 4 vols. 8vo); Möller, *Ansichten* (Gotha, 1819, 8vo); \*Fritzsche, *Commentarii* [Matt., Mark, and Luke] (Lips. 1825-30, 2 vols. 8vo); Sumner, *Exposition* (Lond. 1832, 8vo); Barnes, *Notes* (New York, 1832, 1847, 2 vols. 8vo); \*Watson, *Exposition* [Matthew and Mark] (London, 1833, 8vo; New York, 1841); Page, *Notes* (London, 1834, 12mo); Glöckler, *Erklärung* [Matt., Mark, and Luke] (Frankfort, 1834, 8vo); Slade, *Remarks* (Lond. 1835, 12mo); Lingard, *Notes* (London, 1836, 8vo); Adam, *Exposition* (ed. Westoby, London, 1837, 2 vols. 8vo); Ripley, *Notes* (Boston, 1837-8, 2 vols. 8vo); Rule, *Notes* (Gibraltar, 1841, 4to); Longking, *Notes* (N. Y. 1841-4, 4 vols. 16mo); Kenney, *Commentary* [including epistles] (Lond. 1842, 2 vols. 12mo); Paulus, *Exec. Handbk.*

[first 3 gospels] (Heidelb, 1842, 3 vols. 8vo); Baumgarten-Crusius, *Commentar* [Matt., Mark, and Luke] (Leipzig, 1844, 2 vols. 8vo); Livermore, *Commentary* (Lond. 1844, 8vo; Boston, 1850, 12mo); Paige, *Notes* (Boston, 1844-5, 2 vols. 12mo); Mackenzie, *Commentary* [including Acts] (London, 1847, 8vo); \*Ewald, *Erklärung* (first 3 gospels, Göttingen, 1850, 3 vols. 8vo; John, ib. 1861-2, 2 vols. 8vo); Brown, *Discourses of Christ* (Edinburgh, 1850, 3 vols. 8vo; New York, 1864, 2 vols. 8vo); also *Commentary* (ib. 1854-5, 4 vols. in 7, 8vo); Girdlestone, *Lectures* (new ed. Lond. 1853, 4 vols. 8vo); \*Stier, *Reden Jesu* [on Christ's words only] (Barmen, 1853-5, 7 vols. 8vo; tr. Edinb. 1855 sq., 8 vols. 8vo; N. Y. 1864-8, 2 vols. in 3, 8vo); Stebbing, *Hebels* (Lond. 1855, 8vo); \*Norton, *Notes* (Boston, 1855, 2 vols. 8vo); Lyttleton, *Notes* [including Acts] (Lond. 1856, 8vo); Ryle, *Expos. Thoughts* (London and N. Y. 1856-66, 6 vols. 8vo); Hall, *Notes* (N. Y. 1857, 2 vols. 12mo); Owen, *Notes* (N. York, 1857-60, 3 vols. 12mo); Whedon, *Commentary* (N. Y. 1860-6, vols. i, ii, 12mo); \*Bleek, *Erklärung* [first 3 gosp.] (Lpz. 1861-2, 2 vols. 8vo); Jacobus, *Notes* (N. York, 1848-56; Edinb. 1863, 3 vols. 8vo); Burger, *Erklärung* [Matthew, Mark, and Luke] (Nördlingen, 1863, 8vo); Burgon, *Commentary* (new ed. London, 1865, 5 vols. 12mo); Bisping, *Ereg. Handb.* (Münster, 1865, 8vo); Warren, *Notes* (Boston, 1867, vol. i, 12mo). See NEW TESTAMENT.

GOSPEL, SPURIOUS (PSEUDEPIGRAPHAL). The canon of the New Testament, as we have already seen, having been finally settled before the close of the 4th century, the rejected writings which bore the names of the apostles and evangelists soon sank into oblivion, and few, if any, have descended to our times in their original shape. From the decree of Gelasius and a few other sources we have the names and a few detached notices of a good many of these productions.

I. Of those still extant the following claim special notice:

1. THE HISTORY OF JOSEPH THE CARPENTER, which has been preserved in the East in an Arabic translation, was first made known in Europe in the commencement of the 16th century by Isidore de Isolanis in his *Summa de donis Sti. Josephi*. He observes that the "Catholics of the East" commemorate St. Joseph on the 19th of March, and read the legend of the saint, omitting certain parts which are not approved in the Roman Church. This work was first published by Wallin, at Leipsic, in 1722, from an Arabic MS. of the 13th century, in the *Bibliothèque du Roi*, accompanied with a Latin translation. It was divided by Wallin into chapters and verses. It is also found in Coptic, Sahidic, and Memphic. It is highly esteemed by the Copts. The former part, to chap. ix, appears to have been derived from an ancient Gospel of the Infancy. The Latin was republished by Fabricius.

THE GOSPEL OF THE INFANCY was first published by Henry Sike, at Utrecht, in 1697, from an Arabic MS. Sike's Latin version was republished by Fabricius, who divided it into chapters. The Arabic was divided into corresponding chapters by Thilo in 1852.

There are several MSS. of this gospel extant, the oldest of which known is that in the Medicean Library, written in 1299. The narratives which it contains were current in the 2d century, and the account contained in this gospel respecting Christ's learning the alphabet is mentioned by Irenæus (*Adv. Hæres.* i, 20) as a fabrication of the Marcosians. The Gospel of the Infancy is found in the catalogue of Gelasius, and it is especially remarkable from the fact that it was most probably this gospel which was known to Mohammed, who seems to have been unacquainted with any of the canonical Scriptures, and who has inserted some of its narrations in the Koran. The *Sepher Tobloth. Jesu*, a well-known publication of the Jews, contains similar fables with those in this gospel (Wagenseil's *Sota*). This gospel was received as genuine by many of the

Eastern Christians, especially the Nestorians and Monophysites. It was found to have been universally read by the Syrians of St. Thomas, in Travancore, and was condemned by the Synod of Diamper, in 1599, by archbishop Menezes, who describes it as "the book called the *Gospel of the Infancy*, already condemned by the ancients for its many blasphemous heresies and fabulous histories." Wherever the name Jesus occurs in this gospel he is universally entitled *el-Rab*, while Christ is called *el-Sheik*. This was a distinction introduced by the Nestorians. The blessed Virgin is also entitled the Lady Mary. The Persians and Copts also received this gospel (De la Brosse's *Lexic. Pers.* s. v. *Tinetoria Ars*). The original language was probably Syriac. It is sometimes called the Gospel of Peter, or of Thomas.

2. THE GOSPEL OF THOMAS THE ISRAELITE (Gr.), a work which has flowed from the same source with the former, was first published by Cotelierius (*Notes on the Constitutions of the Apostles*, l. vi, c. xvii, tom. i, p. 348), from an imperfect MS. of the 15th century. It was republished and divided into chapters by Fabricius. The most perfect edition was that of Mingarelli, in the *Nuova Raccolta d'Opuscoli scientifiche e filosofice* (Venet. 1764), from a Bologna MS. of the 15th century. Mingarelli (who believed it to have been a forgery of the Manichees) accompanied his text with a Latin translation. Thilo has given a complete edition from a collation of Mingarelli's work with two MSS. preserved at Bonn and Dresden. This gospel relates the fable of Christ's learning the Greek alphabet, in which it agrees with the account in Irenæus. In other Gospels of the Infancy (as in that published by Sike) he is represented as learning the Hebrew letters. It has been questioned whether this is the same work which is called the Gospel of Thomas, by Origen, Ambrose, Bede, and others. This gospel probably had its origin among the Gnostics, and found its way from them, through the Manichees, into the Church; but, having been more generally received among the heretics, it was seldom copied by the monks, which accounts for the paucity of MSS. Nicephorus says that the Gospel of Thomas contained 1300 *στίχοι*. This pseudepigraphal work is probably the foundation of all the histories of Christ's infancy, but it is supposed to have been recast and interpolated.

3. THE PROTEVANGELION OF JAMES has descended to us in the original Greek, and was first published by Bibliander at Basel in 1552, in a Latin version by William Postell, who asserted that it was publicly read in the Greek churches, and maintained that it was a genuine work of the apostle James, and intended to be placed at the head of St. Mark's Gospel. These commendations provoked the wrath of the learned Henry Stephens, who insinuated that it was fabricated by Postell himself, whom he calls "a detestable monster" (*Introduction au Traité de la Conformité des Merveilles Anciennes avec les Modernes*, 1566). It was reprinted in the *Orthodoxographia* of J. Herold (Basel, 1555), and again in the *Orthodoxographia*, vol. i (1569), of Jacob Grynæus, who entertained a very favorable opinion of it. Subsequent discoveries have proved that, notwithstanding the absurdity of Postell's high pretensions in favor of the authenticity of this gospel, Stephens's accusations against him were all ill founded. There had, even at the time when Stephens wrote, been already a Greek translation published by Neander, of which Stephens was not aware: it appeared among the Apocrypha annexed by Oporin to his edition of Luther's Catechism (Basel, 1564). It was republished by Fabricius (who divided it into chapters), and subsequently by Birch, Thilo, and Tischeidorf. Thilo collated for his edition six Paris MSS., the oldest of which is of the 10th century. From the circumstance of these MSS. containing a Greek calendar or martyrology, and from other internal evidences, there seems little doubt that this gospel was formerly read in the

Greek Church (Montfaucon, *Paleogr. Græc.* p. 304). There are also extant versions of the Gospel of the Infancy in the Arabic and other languages of the Eastern churches, among which they appear to have possessed a high degree of authority.

Although this work is styled by Postell the *Protevangeliom*, there is no MS. authority for this title, nor for the fact of its being ascribed to James the apostle. It only appears that the author's name is James. The narrations of this gospel were known to Tertullian (*Advers. Gnost. c. viii*), Origen (*Com. in Matt.* p. 223), Gregory Nyssen (*Orat. in diem Nat. Christ. : Opp.* iii, 346), Epiphanius (*Hæc.* 79, § 5), the author of the *Imperfect Work on Matt.*, Chrysostom (*Opp.* vi, 24), and many others among the ancients. (See Suckow, *De arg. et inl. Protev. Jacobi*, Bresl. 1830.)

4. THE GOSPEL OF THE NATIVITY OF MARY (Latin). Although the Latins never evinced the same degree of credulity which was shown by the Greeks and Orientals in regard to these fabulous productions, and although they were generally rejected by the fathers, they were again revived about the 6th century. Notwithstanding their contemptuous rejection by Augustine and Jerome, and their condemnation by popes Innocent and Gelasius, they still found readers in abundance. Gelasius expressly condemns the book concerning the *Nativity of St. Mary and the Midwife*.

The Gospel of the Nativity of Mary, which most probably, in its present form, dates its origin from the 6th century, has even been recommended by the pretended authority of St. Jerome. There is a letter extant, said to be written by the bishops Chromatius and Heliodorus to Jerome, requesting him to translate out of Hebrew into Latin the history of the *Birth of Mary*, and of the *Birth and Infancy of Christ*, in order to oppose the fabulous and heretical accounts of the same contained in the apocryphal books. To this Jerome accedes, observing, at the same time, that the real author of the book was not, as they supposed, the evangelist Matthew, but Seleucus the Manichee. Jerome observes that there is some truth in the accounts, of which he furnishes a translation from the original Hebrew. These pretended letters of Jerome are now universally acknowledged to be fabrications; but the apocryphal gospel itself, which is the same in substance with the *Protevangeliom of James*, is still extant in Jerome's pretended Latin version. This gospel was republished by Mr. Jones from Jerome's works. It is from these Gospels of the Infancy that we have learned the names of the parents of the blessed Virgin, Joachim (although Bede reads Eli) and Anna. The narratives contained in these gospels were incorporated in the *Golden Legend*, a work of the 13th century, which was translated into all the languages of Europe, and frequently printed. There are extant some metrical accounts of the same in German, which were popular in the era of romance. These legends were, however, severely censured by some eminent divines of the Latin Church, of whom it will be sufficient to name Alcuin, in his *Homilies*, in the 9th, and Fulbert and Petrus Damianus (bishop of Ostia) in the 11th century. "Some," says the latter, "boast of being wiser than they should be when, with superfluous curiosity, they inquire into the names of the parents of the blessed Virgin, for the evangelist would surely not have failed to have named them if it were profitable to mankind" (*Sermon on the Nativity*). Eadmer, the monk, in his book on the *Excellence of the Virgin*, writes in a similar strain (cap. ii, Anselm. *Opp.* p. 435, Paris, 1721). Luther also inveighs against the readers of these books (*Homil.* ed. Walch, tom. xi; and *Table-Talk*, ch. vii, tom. xxii, p. 396).

There were several editions of Jerome's pretended translation published in the fifteenth century, one of them by Caxton. It is printed by Thilo from a Paris MS. of the 14th century, and divided by him into twenty-four chapters, after a MS. of the 15th century

in the same library. One of the chief objects of the writer of these gospels seems to be to assert the Davidical origin of the Virgin, in opposition to the Manichees.

Mr. Jones conceives that the first author of these ancient legends was a Hellenistic Jew, who lived in the second century, but that they were added to and interpolated by Seleucus at the end of the third, who became their reputed author; and that still further additions were made by the Nestorians, or some late Christians in India. Lardner (*Credibility*, vol. viii) so far differs from Mr. Jones as to believe the author not to have been a Jew. That these legendary accounts have not altogether lost their authority appears from the *Life of St. Joseph*, in the *Catholic Magazine* for December, 1843).

The Gospel of the Nativity of Mary was received by many of the ancient heretics, and is mentioned by Epiphanius, St. Augustine, and Gelasius. The Gnostics and Manichees endeavored to found on its authority some of their peculiar opinions (such as that Christ was not the Son of God before his baptism, and that he was not of the tribe of Judah, but of that of Levi); as did also the Collyridians, who maintained that too much honor could not be paid to the blessed Virgin, and that she was herself born of a virgin, and ought to be worshipped with sacrifices.

5. Although the GOSPEL OF MARCON, or rather that of Luke, as corrupted by that heretic in the second century, is no longer extant, professor Hahn has endeavored to restore it from the extracts found in ancient writers, especially Tertullian and Epiphanius. See MARCON. This work has been published by Thilo.

6. Thilo has also published a collation of a corrupted Greek GOSPEL OF ST. JOHN, found in the archives of the Knights Templars in Paris. This work was first noticed (in 1828) by the Danish bishop Mueuter, as well as by abbé Grégoire, ex-bishop of Blois. It is a vellum manuscript in large 4to, said by persons skilled in palæography to have been executed in the 12th or 14th century, and to have been copied from a Mount Athos MS. of the 12th. The writing is in gold letters. It is divided into nineteen sections, which are called *gospels*, and is on this account supposed to have been designed for liturgical use. These sections, corresponding in most instances with our chapters (of which, however, the twentieth and twenty-first are omitted), are subdivided into verses, the same as those now in use, and said to have been first invented by Robert Stephens. See VERSES. The omissions and interpolations (which latter are in barbarous Greek) represent the heresies and mysteries of the Knights Templars. Notwithstanding all this, Thilo considers it to be modern, and fabricated since the commencement of the 18th century.

7. One of the most curious of the apocryphal gospels is the GOSPEL OF NICODEMUS, or ACTS OF PILATE. It is a kind of theological romance, partly founded on the canonical gospels. The first part, to the end of ch. xv, is little more than a paraphrastic account of the trial and death of Christ, embellished with fabulous additions. From that to the end (ch. xxviii) is a detailed account of Christ's descent into hell to liberate the spirits in prison, the history of which is said to have been obtained from Lenthius and Charinus, sons of Simeon, who were two of those "saints who slept," but were raised from the dead, and came into the holy city after the resurrection. This part of the history is so far valuable, that it throws some light upon the ancient ideas current among Christians on this subject. It is therefore considered by Birch (*Anctarium*, Proleg. p. vi) to be as valuable in this respect as the writings of the fathers.

The subscription to this book states that it was found by the emperor Theodosius among the public records in Jerusalem, in the hall of Pontius Pilate (A. D. 380). We read in ch. xxvii that Pilate himself wrote all the

transactions from the relation of Nicodemus, who had taken them down in Hebrew; and we are informed by Epiphanius that the Quartodecimans appealed to the *Acts of Pilate* in favor of their opinions as to the proper time of keeping Easter. It was written in these Acts that our Saviour suffered on the eighth Kal. of April, a circumstance which is stated in the subscription to the present *Acts*. It is uncertain, however, when this work was first called by the name of Nicodemus.

The two ancient apologists, Justin Martyr and Tertullian, both appeal in confirmation of our Saviour's miracles and crucifixion to the *Acts of Pilate* (Justin Martyr, *Apol.* p. 76, 84; Tertullian, *Apol.* c. 21, or English transl. by Chevallier, 1833). From this circumstance it has generally been held that such documents must have existed, although this fact has been called in question by Tanaquil Faber and Le Clerc (Jones, *On the Canon*, vol. ii, p. 282, pt. iii, ch. 29). These appeals, however, in all probability first furnished the idea of the present pious fraud. Mr. Jones supposes that this may have been done in order to silence those pagans who denied the existence of such Acts. The citations of those fathers are all found in the present work. (See Henke, *De Pontii Pilati actis in causa J. C. ad Tiber. missis*, 1784.)

We have already seen that a book entitled the *Acts of Pilate* existed among the Quartodecimans, a sect which originated at the close of the third century. We are informed by Eusebius that the heathens forged certain Acts of Pilate, full of all sorts of blasphemy against Christ, which they procured (A.D. 303) to be dispersed through the empire; and that it was enjoined on schoolmasters to put them into the hands of children, who were to learn them by heart instead of their lessons. But the character of the Gospel of Nicodemus, which contains no blasphemy of the kind, forbids us to identify it with those *Acts*. This gospel probably had its origin in a later age. From the circumstance of its containing the names of Lenthinus and Charinus, Mr. Jones conceives it to have been the work of the celebrated fabricator of gospels, Lucius Charinus, who flourished in the beginning of the 4th century. It is certainly not later than the 5th or 6th. "During the persecution under Maximin," says Gieseler (*Eccles. Hist.* vol. i, § 24, note), "the heathens first brought forward certain calumnious *Acts of Pilate* (Euseb. ix, 5), to which the Christians opposed others (Epiph. *Her.* 79, § 1), which were afterwards in various ways amended. One of these improved versions was afterwards called the Gospel of Nicodemus." See ACTS OF PILATE.

Beausobre suspected that the latter part of the book (the descent into hell) was taken from the *Gospel of Peter*, a work of Lucius Charinus now lost. Thilo (*Codex Apocryphus*) thinks that it is the work of a Jewish Christian, but it is uncertain whether it was originally written in Hebrew, Greek, or Latin. The only Greek writer who cites it is the author of the *Synaxarion*, and the first of the Latins who uses it is the celebrated Gregory of Tours (*Hist. Franc.* i, 20, 23).

The Gospel of Nicodemus (in Latin) was one of the earliest books printed, and there are subsequent editions in 1490, 1516, 1522, and 1538, and in 1569 in the *Orthodoxographia* of Grynaeus. It was afterwards published by Fabricius (*Cod. Apoc.*), who divided it into chapters. Fabricius gives us no information respecting the age or character of his MS., which is extremely defective and inaccurate. Mr. Jones republished this, with an English version.

The Greek Gospel of Nicodemus was first published from an incorrect Paris MS. by Birch (*Auctarium*), and subsequently from a collation of several valuable manuscripts, the most ancient of which are of the 13th century, by Thilo, with the Latin text of the very ancient MS. at Einsiedel, described by Gerbert in his *Iter Alemanniense*. It has been shown by Smidt (*Bibl. für Critik und Exegese*) that the present MSS. exhibit in their citations from the canonical books a text of the

6th century, and consequently that this gospel is extremely useful in a critical point of view.

The esteem in which this work was held in the Middle Ages may be seen from the number of early versions which were in popular use, of which innumerable MSS. have descended to our times. The earliest of these is the Anglo-Saxon translation, printed at Oxford in 1698, from a Cambridge MS. (Thwaites's *Herpetuchus*). This is a translation from the Latin, as none of the Greek MSS. contain Pilate's letter to Claudius. There are also MSS. of the same in the Bodleian and Canterbury libraries. That in the Bodleian is divided into thirty-four chapters. There are several MSS. of the English version in the Bodleian, one in Sion College, and one in English verse in Pepys's collection. It was also translated by Wickliffe; and there were versions printed in London, in 1507 and 1509, by Julian Notary and Wynkyn de Woide, which ran through several editions (Panzi's *Annals*). The latest published before Mr. Jones's work was by Joseph Wilson in 1767. He says nothing of the age of his MS., but the following specimen from the prologue may not prove uninteresting: "It befel in the 18th year of the signiory of Tiberius Cæsar, emperor of Rome, and in the signiory of Herod, who was king of Galilee, the 8th kalend of April, which is the 25th day of March, the fourth year of the son of Vellum, who was counselor of Rome, and *Olympius had been afore two hundred years and tuo*; at this time Joseph and Annas were lords above all justices of peace, mayors, and Jews. Nicodemus, who was a worthy prince, did write this blessed history in Hebrew, and Theodosius the emperor did translate it out of Hebrew into Latin, and bishop Turpin did translate it out of Latin into French, and hereafter did ensue the blessed history called the Gospel of Nicodemus." The regard, indeed, in which this book was held in England will be understood from the fact that, in 1524, Erasmus acquaints us that he saw the Gospel of Nicodemus affixed to one of the columns of the cathedral of Canterbury.

Translations were also common in French, Italian, German, and Swedish. In the French MSS. and editions it is united with the old romance of *Perceforest, King of Great Britain*. There was also a Welsh translation (Lhuys's *Archæologia*, p. 256), and the work was known to the Eastern Christians, and has been even supposed to be cited in the Coptic liturgy; but this has been shown by Ludolf to be a mistake, as the lesson is from the history of Nicodemus, in John iii (see Brunn, *De indol. atate et usu Evang. Nicod.* Berl. 1794; Tischendorf, *Pilati circa Chr. judicio quid lucis afferat ex Actis Pilati*, Lips. 1855). See NICODEMUS.

II. Of the gospels no longer extant, we know little more than that they once existed. We read in Irenæus, Epiphanius, Origen, Eusebius, and other ecclesiastical writers, of the Gospels of Eve or of Perfection, of Barnabas (ancient and modern), of Bartholomew, of Basilides, of Hesyclus, of Judas Iscariot, of the Valentinians, of Apollon, of Cerinthus, of the Twelve Apostles, and several others. Some of these were derived from the Gnostics and other heretics; others, as the Gospel of Matthias, are supposed by Mill, Grabe, and most learned men to have been genuine gospels, now lost. Those of which we have the fullest details are the following:

1. THE GOSPEL OF THE NAZARENES. This is most probably the same with that of the Hebrews, which was used by the Ebionites. It was supposed by St. Jerome to have been a genuine Gospel of Matthew, who, he says, wrote it in the Hebrew language and letters. He copied it himself from the original in the library of Casarea, translated it into Greek and Latin, and has given many extracts from it. Grabe conceived this gospel to have been composed by Jewish converts soon after our Lord's ascension, before the composition of the canonical Gospel of Matthew. Baronius, Grotius, father Simon, and Du Pin look upon

it as the Gospel of Matthew—interpolated, however, by the Nazarenes. Baronius and Grabe think that it was cited by Ignatius, or the author of the epistles ascribed to him. Others look upon it as a translation altered from the Greek of Matthew. Mr. Jones thinks that this gospel was referred to by Paul in his Epistle to the Galatians. It is referred to by Hegesippus (Eusebius, *Eccles. Hist.* iv, 22), Clemens Alexandrinus (*Strom.* ii, p. 280), Origen, *Comm. on John*; *Hom. viii in Matthew*, and Eusebius (*Hist. Eccles.* iii, 25, 27, 39). Epiphanius (*Hær.* § 29, 30) informs us that it was held in great repute by the ancient Judaizing Christians, and that it began thus: "It came to pass in the days of Herod, king of Judæa, that John came baptizing with the baptism of repentance in the river Jordan," etc. It consequently wanted the genealogy and the first two chapters.

2. The GOSPEL OF THE EGYPTIANS is cited by Clemens Alexandrinus (*Strom.* iii, p. 445, 452, 453, 465), Origen (*Hom. in Luc.* p. 1), Ambrose, Jerome (*Prof. to his Comm. on Matt.*), and Epiphanius (*Hær.* lxii, § 2). Grabe, Mill, Du Pin, and father Simon, who thought highly of this gospel, looked upon it as one of the works referred to by Luke in the commencement of his gospel. Mill ascribes its origin to the Essenes, and supposes this and the former gospel to have been composed in or a little before A.D. 58. It is cited by the Pseudo-Clement (*Second Epistle to the Corinthians*, Chevallier's translation, 1835), who is generally supposed to have written not before the 3d century.—Kitto, s. v.

III. *Literature.*—See Car. Chr. Schmidt's *Corpus omnium vet. Apocr. extra Biblia*; Klenker, *De Apocr. N. Test.* (Hamburg, 1798); Birch's *Actuarium*, fasc. 1 (Hafn. 1804); Cave, *Hist. Lit.*; Oudin, *Script. Eccl.*; Ant. v. Dale, *De Orig. idolor.* p. 253 sq.; Pritius, *Introduct.* in *N. Test.* p. 6, 58; Mosheim, *Dissert. ad Hist. Eccl. spect.* i, 217; Nitzsch, *De apocr. Evang.* (Viteb. 1808); Tischendorf, *De Ev. apocr. origine et usu* (Hag. 1851); Reuss, *Gesch. der H. S. neuen Test.* § 258 sq.; Hofmann, *Das Leben Jesu nach den Apocryphen* (Lpz. 1851). A list of most of these apocryphal addenda to the N. Test. may be seen in Toland's *Amygdon* (1699); and a fuller list in Toland's reply to Dr. Blackhall's (bishop of Exeter) attack on the *Amygdon*, found in Des Maizeaux's edition of Toland's *Miscellaneous* (posthumous) *Works* (London, 1747, 2 vols. 8vo), i, 350–403. Most of these spurious fragments were collected and published by Fabricius in his *Coder Apocryphus Novi Testamenti* (3 vols. 8vo, Hamb. 1719–43). This work, with additions by Thilo and others, was republished by Dr. Giles (London, 1852). English translations of some of these early forgeries will be found in the works of Jones, Lardner, Whiston, Cotton, and Laurence. Hone's *Apocryphal N. T.* (London, 1820) contains a translation of many of them. Other collections (in the original languages), more or less complete, have been made by Grabe (*Spicileg. Patrum et Hæret. sect.* i–iii, Oxon. 1698), Schmid (*Corpus Apocryph. extra Biblia*, Had. 1804), and especially Thilo (*Cod. Apocr. N. Test. coll. et illustr.* Lips. 1832, vol. i). Still later, Tischendorf has edited (in some cases for the first time published) the following apocryphal gospels (*Evangelia Apocrypha*, Lips. 1843, 8vo): "Protevangel of James" (Gr.); "Pseudo-Matthew's Gospel" (Lat.); "Gospel of the Nativity of Mary" (Lat.); "History of Joseph the Carpenter" (Latin, from the Arabic); "Gospel of Thomas" (Greek A); "Gospel of Thomas" (Greek B); "Gospel of Thomas" (Lat.); "Gospel of the Infancy of Christ" (Lat. from the Arab.); "Deeds of Pilate" (Greek A); "Deeds of Pilate" (Gr. B); "Descent of Christ into hell" (Latin A); "First Epistle of Pilate" (Lat.); "Descent of Christ into hell" (Lat. B); "Second Epistle of Pilate" (Lat.); "Anaphora of Pilate" (Gr. A); "Anaphora of Pilate" (Gr. B); "Paradosis of Pilate" (Gr.); "Death of Pilate" (Lat.); "Narrative of Joseph of Arimathea" (Gr.); "Defence of the

Saviour" (Lat.). See also H. Cowper, *The Apocryphal Gospels*, etc., translated, with notes, etc. (London, 1867, 8vo); A. Hilgenfeld, *Nor. Testam. extra canonem*, embracing the apocryphal gospels, epistles, etc., with notes, etc. (Lips. 1866 sq.). See APOCRYPHA.

Gösschel. See GOESCHEL.

**Gossip** (from "God" and "sib," a Saxon word signifying "kindred"), a name given in England to sponsors as bearing a spiritual relationship to the children for whom they stand.—Procter, *On Common Prayer*, p. 361.

**Gossner**, JOHANNES EVANGELISTA, a prominent divine of the Evangelical Church of Germany, was born in 1773, of Roman Catholic parents, at Hausen, near Augsburg. He studied at Dillingen under Sailer (q. v.) and Zimmer, entered in 1793 the College of Ingolstadt, and, having been ordained priest, was in 1797 appointed chaplain. The profoundly evangelical convictions which he had already had for several years were strengthened by personal intercourse and correspondence with Martin Boos (q. v.), and they were certainly not weakened by persecutions from ultramontane zealots. In 1804 he was appointed parish priest at Dirlwang, which position he resigned in 1811 in order to accept a small benefice at Munich, which allowed him greater liberty in his evangelistic and literary labors. Having been deposed in 1817 on account of his evangelical views, he was in 1819 appointed professor at the gymnasium of Dusseldorf. From 1820 to 1824 he was pastor of a German congregation in St. Petersburg; in 1826 he openly joined the Evangelical Church; in 1827 he became pastor of the Bethlehem church at Berlin. He died March 20, 1858. He wrote a great deal to the last. At seventy he learned English, and translated some of Ryle's tracts when he was upwards of eighty. His writings, numbering (exclusive of many posthumous works) forty-six, occupy the presses of a separate book and tract society. They enjoy unusual popularity, some having run through annual or semi-annual editions for many years. Among the best known of his works are the *Schatzkästlein* (1824) and *Goldkörner* (1859). Up to the spring of 1858 he corrected proofs and continued his correspondence. The summer previous he was still able to train his vines. He established a missionary society, which during his lifetime sent out more than 140 missionaries. His life was, like the life of Abraham, one of wonderful faith. From humble little Hausen and the unnoticed struggles of a country priest, he rose to be the *Father Gossner* of a reverent, religious Germany. The story of his life is well told in a little volume published by the Carters, of New York.—Bethmann-Hollweg, *J. Gossner* (Berlin, 1858); see also Prochnow, *J. Gossner, Biographie aus Tagebüchern u. Briefen* (Berl. 1863–4, 2 vols.); Herzog, *Real-Encyclopädie*, xix, 572. (A. J. S.)

**Gotama**, a Hindoo philosopher, the exact time of whose life is not known. The Indians consider him as the author of the philosophical system which, under the name of *Nyaya* (logic), is still in use among them. All we know of him is derived from the mythical tradition contained in the *Ramayana* and the *Puranas*. According to this legend, Gotama was born in Mount Himalaya, and for a long time lived as a hermit in the woods; he then married Ahalya, one of the daughters of Brahma, but subsequently divorced her for having been led astray by Indra. He spent the remainder of his life in prayer and ascetic practices, and when he died he left his disciples precepts which they commented on, and which together form the *Nyaya*. The work in which his system is expounded has been published, for the use of the Indian schools, under the title *Nyaya sutra vritti* (*The logical Aphorisms of Gotama*), with a Commentary by Vishvanath Battacharya, published under the authority of the Committee of Public Instruction, Calcutta, 1828, 8vo. The book is

divided into five parts: the first and most important contains the dogmatic exposition of the doctrine of the *Nyaya*. The author proceeds by axioms, of which there are sixty in his first part. He distinguishes sixteen points in the art of reasoning, the first nine teaching to demonstrate truth, and the seven others to defend it against objections. He begins by pointing out the general sources of certainty, of which he recognises four: perception, induction, comparison, and divine or human testimony. He next inquires into the objects of certainty, i. e. the objects presented to human investigation, and recognises twelve. Each of these objects can be considered in different ways, and they can all be brought down to one—the knowledge of man and of his destiny. After having thus established his general dialectic principles, Gotama proceeds to their application. His third point is doubt: when anything has been presented to our knowledge by one of the above-named sources of certainty, we must first doubt it, and only affirm its truth after thorough investigation. Affirmation is the fourth point. After a thing is affirmed it has yet to be proved, and first of all exemplified: this forms the fifth point. When once the illustrative example is found, the object of the demonstration has to be stated: this is the sixth point. The seventh is the enumeration of the five members of the demonstration. Colebrooke gives the following illustration of this process of argumentation, in which some think they recognise Greek syllogism: 1. *proposition*, This mountain is burning; 2. *reason*, for it smokes; 3. *explanation*, whatever smokes is burning, as, for instance, a kitchen fire; 4. *application*, and the mountain smokes; 5. *conclusion*, hence it is burning. The eighth point, which is called *reductio ad absurdum* by Colebrooke, and *raisonnement supplétif* by Barthélemy Saint-Hilaire, is a sort of confirmation of the argument. Finally, the ninth point is the definitive conclusion, the absolute affirmation which closes the argument. The last seven points treat of all the objections which can be opposed to a demonstrated fact. These objections are sophisms, and he who uses them will necessarily be overcome by his opponent if the latter follows strictly the rules laid down in the *Nyaya*. As for the defender of truth, Gotama promises him not only the pleasure of defeating his adversary, but also everlasting happiness. This brief account of the first part of the *Nyaya* will suffice to show how inadequate the system of the Indian philosopher is as an analysis of the operations of the human mind. Still there is much to be admired in the doctrine of the *Nyaya*. The method was an immense progress for India, and as such deserves a high place in the history of philosophy. It would deserve a still higher one if it had, as was advanced by Sir William Jones, served as a model for the *Organon*, and if the fifth point of Gotama had been the origin of Aristotle's syllogism. Jones maintained, on the strength of a more than doubtful tradition, that Callisthenes gathered during Alexander's expedition a number of details on Indian doctrines, and afterwards transmitted them to Aristotle. According to him the logic of the latter would be but a development of Gotama's system. This strange assertion is completely disproved by Barthélemy Saint-Hilaire, who has shown that there is no relation between the *Nyaya* and the *Organon*, and that those who spoke of their resemblance must have been unacquainted with either. His conclusion is that the Greek system owed nothing to the Indian. But might not the question be reversed so as to inquire whether the Indian system may not to some extent be derived from the Greek? Greek civilization hovered for centuries near the Indus and Himalaya. The Greek kingdoms of Bactria appear to have exerted great influence over the poetry of India: may they not also have had some influence over its philosophical systems? And may not the *Nyaya* in particular, which differs so much in its analytical process from the other Indian system,

owe its peculiarities to the influence of Greece? These are questions which it has so far been impossible to solve, since none has yet been able to find out the dates of the various Indian systems. Barthélemy Saint-Hilaire believes the *Nyaya* older than the *Organon*, but admits that it is only authentically named in works posterior to the Christian era. See Sir William Jones, *Asiat. Research.*; Ward, *View of the History, Literature, and Mythology of the Hindoos*; Colebrooke, in the *Transact. of the As. Soc. of Gt. Britain and Ireland*, 1823, i, 76, and *Miscel. **Gothic Architecture**, the style of architecture that prevailed in central and western Europe from the middle of the 12th till the 16th century, being preceded by the Romanesque (q. v.), and followed by the Renaissance style (q. v.). Under the influence of the revival of taste for classic art, the Renaissance architects applied the name *Gothic*, meaning thereby *barbaric*, to the styles of architecture that were developed north of the Alps during the Middle Ages. The name Gothic is now limited by critics of all nations to the architecture of the period above indicated.

In the extraordinary activity that pervaded every department of social, industrial, intellectual, and religious life during the 12th century, many churches were founded upon a scale of grandeur and magnificence which, with the exception of a few isolated cases (as the Santa Sophia, q. v.), was entirely unprecedented in the history of Christianity. These churches embodied, in the style and spirit of their architecture, and the grand scale upon which they were projected, more of the sublime aspiration of the Christian faith, of confidence in its endurance, and love and sacrifice in its behalf, than do the churches of any other period. Many elements of the Gothic architecture had been developed during the classic, Byzantine, and Romanesque periods; others were taken from the Sarcenic architecture; and others still were developed within the Gothic itself. The typical features of the Gothic architecture are: the universal use of the pointed arch (Fig. 1); a general tendency to vertical lines;

Fig. 1. Pointed Arches (from Lübke's *Geschichte der Baukunst*).

Fig. 2. Section of an Arch in the Cathedral at Nevers (ibid.).

Fig. 3. a, b, Capital and Base, and c, Section of a Pillar in the Cathedral at Cologne (ibid.).

Fig. 4. Window in St. Lambert's Church in Münster (ibid.).

all mouldings are traced by mathematical lines (Fig. 2), whereas in the Greek architecture they were drawn with a free hand; the mouldings, capitals, pillars, etc., have lost all traditional classical forms and proportions, the pillars being often many times their diameter in height; the pillars have their outlines cut by numerous and often deep upright mouldings (Fig. 3), or are composed of a round nucleus surrounded by many smaller columns; the windows are greatly enlarged, and the walls are proportionally diminished; paintings, being thus crowded away from the walls, are replaced by paintings upon the windows [see GLASS PAINTING]; the windows are ornamented with delicate and complicated tracery (Fig. 4); the walls

are sustained against lateral thrust by prominent buttresses and by flying-buttresses (Fig. 5); the ornamen-

Fig. 5. Flying-buttress of the Cathedral at Cologne (ibid.).

tation is conventionalized from various forms of foliage, and is distributed freely over all prominent parts of the building, being thrown in great profusion over the façades, and especially around the main entrances; the towers are square at the base, octagonal above, and terminate in lofty spires, which are richly decorated with ornament; the plan is cruciform, the apsis being replaced by a choir, which is surrounded by a row of chapels (Fig. 6).

Fig. 6. Plan of the Cathedral at Cologne (ibid.).

While these are the typical features of the Gothic architecture, great variety prevailed in their adaptation in the different periods of the style, and in the various lands where it was employed.

Gothic architecture owes its character mainly to the adoption of the pointed arch. There is no longer a

Fig. 7. Interior of the Cathedral of Cologne (ibid.).

discussion as to the origin or the invention of the pointed arch, as it is to be found occasionally in all the most ancient styles of architecture, as the Egyptian, the early Greek, the Etruscan, and the Roman. It is found in the court of a monastery in Sicily, which was built in the 6th century after Christ. It was adopted in Saracenic edifices in Cairo as early as the 9th century. Probably a knowledge of its effects in architecture was brought to Europe from the Orient by the Crusaders, though the production of the pointed arch by the crossing of round arches in the external ornamentation of Romanesque churches could not have escaped the notice of architects. The contest for supremacy of the pointed over the round arch lasted a long time, the two being often employed in different parts of the same edifice. The earliest church in which the pointed arch only was adopted is the cathedral of St. Denis, founded 1144. The Gothic style, being thus fully developed, spread rapidly over the Isle de France, Normandy, England, Spain, and the countries bordering on the Rhine. A large number of the most magnificent churches in the world were founded between 1150 and 1300, and thus the new style had immediate opportunity for full development. (Fig. 7.)

Three chief periods are usually marked in the history of Gothic architecture. During the first (1144-1280), called by English writers the "early English" period, the general effect of the style was very grand, though rather severe. The ornamentation was rather meagre, and sculpture was used rather sparingly on ex-

teriors. During the second period (1280-1380), termed by many writers the "decorated" or "complete Gothic" period, greater freedom and lightness were introduced into all the ornamentation, without diminishing the boldness of the general effect. The windows were enlarged and filled with rich flowing tracery. The third, usually termed the "perpendicular" period (1380-1550), and extending till the revival of classic architecture, was marked by a general decadence of style, and finally by a loss of all true Gothic spirit. The arches were depressed; beauty of outline disappeared from the mouldings; a minuteness, and finally a triviality, was introduced into all the ornamentation. The rapid decadence of the style was contemporaneous with the revival of taste for ancient classic art. In less than a century it was banished from all the countries where it had held sole dominion for nearly four centuries.

The Gothic churches in France are distinguished for the magnificence of their façades and the grandeur of their interiors. As the true object of a church is to have a good interior, the French Gothic churches are to be esteemed superior to those of any other land. The cathedral at Rheims (Fig. 8) is esteemed the finest Gothic church in existence. The other most important churches are the cathedrals of Paris, Amiens, Rouen, Dijon, Chartres, Beauvais, etc. In the cathedral at Paris (Notre Dame), and in some other French Gothic churches, there is a greater tendency to horizontalness in the lines of the exterior than is found in the English or German Gothic.

Fig. 8. Façade of the Cathedral of Rheims (ibid.).

The English Gothic cathedrals surpass those of all other lands in the varied combinations of striking effects in the exteriors. The windows often overpower the doors and other features of the façade, and the nave is usually too long and narrow for fine effect. The plan is frequently rectangular, and is sometimes crossed by two transepts. The finest examples of English Gothic are the cathedrals of York (Fig. 9), Salisbury, Canterbury, Lincoln, Peterborough, and the Westminster Abbey. The richest interior in English churches is that of Henry's chapel in the Westminster Abbey. The grandeur of the effect of this interior is diminished, however, by the minuteness of the ornamentation.

In the German Gothic churches the spires are more beautifully wrought, and are more harmoniously joined to the towers than in the churches of any other country. The spires of the cathedrals of Freiburg and of Vienna are considered the finest in the world. The

round choir, with a row of chapels, that prevails in the plans of most French Gothic churches, is generally adopted. The cathedral of Cologne (founded 1248) is the largest Gothic church ever erected. Its towers are now (1869) being finished. When they are completed, this edifice will be the most glorious work of ecclesiastical architecture ever erected. The style is somewhat affected by the too great minuteness of the detail. The harmonious perpendicular tendency of the lines is unexampled in any other edifice (Fig. 10). The other chief Gothic churches of Germany are the cathedrals of Strasburg, Freiburg, Ulm, Vienna, Magdeburg, Meissen.

The Spanish surpassed the French, English, or German Gothic in the varied richness of outline; but there were frequently too many horizontal lines in the interior as well as the exterior, and the ornament was often overlaid. The cathedral of Burgos (Fig. 11), begun in 1224 and finished in 1567, is marked by a

Fig. 10. Cathedral of Cologne (Gut.).

Fig. 9. Facade of the Cathedral of York (Gut.).

Fig. 11. Cathedral of Burgos (ibid.).

prodigality of external ornamentation. But, with all this richness, there is a lack of repose and of lightness in the general effect. Other important Gothic churches in Spain are the cathedrals of Orvieto, Toledo, Barcelona, Oviedo, Leon, and Valencia. The influence of the Moorish architecture is visible in many of the Gothic churches in Spain. There are several excellent examples of the Gothic architecture in Portugal, as the cloister church in Batalha and the church in Belem. The entrance to the mausoleum of Manoel, in the church of Batalha, is one of the most gorgeous specimens of Moro-Gothic architecture.

In Scotland, Belgium, and Holland, Gothic architecture took the general characteristics of this style in the adjacent countries of England, France, and Germany. The cathedral of Antwerp is remarkable for the beauty of some of the details of the interior. On the other hand, the violations of constructive and aesthetic laws, both in the interior and in the exterior,

are striking proofs of the decadence of artistic feeling, during the latter part of the history of Gothic architecture. In Scandinavia, also, Gothic architecture is marked by the development of few, if any, native elements. The cathedral of Upsala is essentially a French, and that of Drontheim an English edifice. The interior of the latter is marked by a number of exceedingly picturesque effects.

Gothic architecture was never fully naturalized in Italy. The traditions of classical and basilican architecture in favor of round arches and horizontal lines overpowered the Gothic tendency to perpendicular lines. The predilection for paintings on walls prevented the adoption of glass-painting in the windows. Towers surmounted by spires were replaced by campaniles adjacent to the church. Marble of two colors is usually employed in the exteriors, and mosaic paintings frequently replace sculpture in the façades. The fronts, though very impressive in themselves, are

Fig. 12. Cathedral of Siena (ibid.).

often false, not representing the true size of the church. The finest examples are the cathedrals of Siena (Fig. 12), Orvieto, Florence, Perugia, and Milan. The cathedral at Milan has a magnificent interior, and its roof is covered by a forest of statuary and turrets. The tower of the cathedral of Florence, designed by Giotto, is the most beautiful ever erected. Its cost was over \$5,000,000.

It is a mistake to consider Gothic architecture to be adapted only to ecclesiastical edifices. During the Middle Ages this style was applied with marked effect to edifices of all kinds—to castles and fortified gates of cities, as well as to city halls, courts of justice, and palatial residences.

As to the material employed in the erection of Gothic edifices, stone was generally used. In Italy especially, the finest marbles were often employed. With marble of two colors very pleasant variations of surface effects were produced, many of which were inconsistent with the extensive use of buttresses and flying buttresses that were so generally introduced in the Gothic edifices north of the Alps. Brick was also employed with excellent success in the erection of Gothic edifices, both ecclesiastical, civil, and domestic; this was especially the case in North Germany. Fine contrasts of surface color also were produced in North Italy by the alternation of brick and colored marble.

But few Gothic churches have been completed, and in fewer yet has the original design been carried out. At least one, and sometimes both spires are generally lacking. This incompleteness or defect in design is

often copied in modern Gothic churches, frequently producing very absurd effects.

With all its beauty and even grandeur, Gothic architecture has some features that make its adoption in modern, and especially in Protestant church edifices, a most dangerous experiment. The pillars are apt to obstruct the view and sound. The clerestory is so high that it often detracts from the harmony of the interior, while its ornamentation is also lost to the view; high pointed ceiling is apt to produce an echo; and the churches are very difficult to heat. But the great error in modern Gothic edifices is the indiscriminate copying of unfinished churches, built in the age of decadence of Gothic architecture. See Kugler, *Geschichte der Baukunst*; Lübke, *Geschichte der Baukunst*; Ferguson, *Styles of Architecture*; Huggins, *Course and Current of Architecture*; Pugin, *Gothic Ornaments*; Viollet-le-Duc, *Dictionnaire de l'Architecture Française*; Street, *Gothic Architecture in Spain*. G. F. C.

**Gothic Version of the Bible.** The Mæso-Goths were a German tribe which settled on the borders of the Greek empire, and their language is essentially a German dialect. Their version of the Bible was made by Ulphilas, in the fourth century, after Greek MSS. in the N. T., and after the Septuagint in the Old. The author is generally regarded as an Arian; but his peculiar doctrinal sentiments do not seem to have influenced his translation. Of the O.-T. portion, nothing but a fragment of Nehemiah has been printed, although parts of other books have been discovered. A great part of the New has been published at different times in fragments. The four gospels ex-

ist in the very celebrated MS. called the *Codex Argenteus*, now preserved in the library of the university at Upsal, and minutely described by Dr. E. D. Clarke and Zahn. See ARGENTEUS CODEx. This MS., however, has considerable chasms. The gospels have been several times printed from it, but not very correctly. The ed. of Uppström is the most exact and beautiful (1854). Bosworth has lately published the Gothic and Anglo-Saxon Gospels together (Lond. 1865). Knittel discovered fragments of Paul's Epistle to the Romans in a *codex rescriptus* belonging to the Wolfenbüttel library, which he published in 1762, 4to, and which were republished by Zahn in the complete edition of the Gospels issued in 1808, 4to. In 1817, Angelo Mai discovered important parts of the Gothic version among five *codices rescripti* in the Ambrosian library at Milan. They contain, for the most part, the Pauline Epistles, with the exception of that to the Hebrews, and two fragments of Matthew. Various portions were printed by Mai, in conjunction with Castillionægus, in 1819. In 1829 the latter published the fragments of Paul's Second Epistle to the Corinthians. In 1834 fragments of the Epistle to the Romans, the First to the Corinthians, and that to the Ephesians; and in 1835, the fragments of the Pauline Epistles to the Galatians, Philippians, Colossians, and the First to the Thessalonians. In 1839 the same scholar published the fragments of the Second Epistle to the Thessalonians, to Timothy, Titus, and Philemon. These were all combined in the edition by Gabelentz and Loebe, 2 vols. 1836, 1847.—Kitto, s. v. See VERSIONS OF THE BIBLE.

**Gothólías** (Γοθολίας), father of Josias, which latter was one of the "sons of Elam" who returned from Babylon with Esdras (1 Esd. viii, 33); the same as ATHALIAH (q. v.) of the Heb. text (Ezra viii, 7).

**Gothóniel** (Γοθονίη), i. e. Othniel, father of Charbris, who was one of the governors (ἀρχοντες) of the city of Bethulia (Judith vi, 15).

**Goths**, THE, appeared in the countries of the Lower Danube, the former seat of the Getæ, in the 3d century A. D. Yet from this we are not to infer that the former drove away and replaced the latter, but, on the contrary, they are to be considered as one and the same people, as has been shown by J. Grimm (*Gesch. d. deutsch. Sprache*, 2 vols. 2d ed. Leipz. 1853). This consideration sheds an important light on a period in the religious history of the Goths which had before been involved in deep obscurity, and gives us an insight into their deeply-rooted predisposition to embrace Christianity. The mighty confederacy of the Getæ, founded by Borebistes, was dissolved even before the emperor Augustus took up arms against them. Some of the dispersed tribes entered the Roman empire in the provinces of the Lower Danube about the first century A. D., and from them sprung a new nation, composed of these different tribes again united, which, under the name of Goths, appeared during the reign of Caracalla, in the beginning of the 3d century A. D. Their unity emboldened them to attack the Roman empire; and in the reign of Alex. Severus we already find them receiving tribute to preserve the peace, and the issue of the struggle with Decius led to new invasions. Commodian, the Christian apologist of the times, regarded them as instruments of divine justice, and precursors of the anti-Christ: according to his statement, the seventh persecution of the Christians ended on their approach. Three of their armies again invaded the Roman empire during the reign of Valerian and Gallienus, and, among the monuments of antiquity, destroyed the splendid temple of Diana at Ephesus. Finally, after a fierce conflict, Constantine the Great concluded with them a peace, which lasted so long as his family reigned. Some Christians, carried away as prisoners by the Goths during the invasion above spoken of, became the instruments of their conversion. Sozomen says (ii, 6): "The priests

taken captives healed the sick and cast out devils by calling on the name of Christ, the Son of God; and they, besides, overcame all the prejudices existing against the name of Christian by the purity of their life and by their virtues. The barbarians, full of admiration of the life and deeds of these men, saw that it would be well to gain the favor of the Christian God; and when they sought for it, they were instructed, baptized, and organized into congregations." The Arian historian, Philostorgius, gives a similar account of the propagation of Christianity among them. In the reign of Constantine, Athanasius speaks of the triumphs of the Gospel over the barbarians, and especially the Goths, now civilized. At the Council of Nice in 325, Theophilus, a Gothic bishop, subscribed the decrees. Ulphilas (see the article), having become bishop in 348, labored with great zeal for the propagation of Christianity among the Goths, even in the tribes beyond the Danube, notwithstanding the persecutions of Athanaric, the heathen king of the Visigoths, who commanded Christians to worship idols he caused to be drawn up in front of their houses, under penalty of being burned in their dwellings (*Acta S. S.*, Sept. 15). In the middle of the 4th century, Eutyches and Audius, which latter had separated from the Syrian Church, both labored among the Goths beyond the Danube, and the result was the erection of several monasteries for the converts, which, however, disappeared in the persecution of 370. These persecutions ceased only when Fritigern, rival of Athanaric, took the Christians under his protection, and embraced Arianism, the general form of Christianity among the Goths. In 370 Ulphilas translated the Scriptures into Gothic; but soon after, the hordes of Huns crowding from Asia upon the Ostrogoths, whose king, Hermanrich, was unable to resist them, drove part of the Visigoths south of the Danube into the Roman territory, while others followed Fritigern into Thrace, where war, and the persecutions of the Roman prefects, interrupted the missions for a time. Finally, Fritigern, victorious in 378, marched with his troops on Constantinople, but died; and Theodosius, the new emperor, concluded a peace with Athanaric, who had once more joined the Goths, and who died also soon after. Theodosius then induced them to become *federati* of Rome; and, in order to unite them still more to the empire, the council of Constantinople (A. D. 383), attempted, but unsuccessfully, to frame a creed acceptable to both the Arians and the Nicene party; the latter also prevented the assembling of another council promised to the former for 388. Religious divisions among the Goths afterwards permitted Chrysostom to attempt uniting the secessionists from Arianism with the Catholic Church, and he ordained presbyters, deacons, and lectors who spoke the Gothic language; he also sent bishop Unila to the Goths in the Crimea. Gothia, along the Cimmerian Bosphorus, was, during the whole of the Middle Ages, a see of the Byzantine Church, and the bishop of Capha was also named bishop of Gothia as late as the 18th century. The Catholic Goths of the Crimea, mentioned in the 16th century by Busbek, disappeared with the surname of the bishop. The *Gothi minores* near Nicopolis seem to have disappeared among the nations which invaded the Danubian countries in the 7th century, and the two principal Gothic tribes returned West. The Visigoths, under Alaric, invaded the countries south of the Danube to the Peloponnesus, destroying the temples and altars of the heathen gods; the sacking of Eleusis put an end to the famed mysteries of Ceres; pagan priests and philosophers were put to death; and finally, in 408, after the death of Stilicho, Alaric appeared before Rome, demanding tribute. To satisfy him, the statues of the gods—among them the *Virtus Romana*—were melted. Alaric came again in 410, when he made the Christian prefect Attalus emperor of Rome; yet, finding that his end was not accomplished, he returned a third time and lay waste

the city, with the exception of the Christian churches, sparing only such of the inhabitants as had taken refuge in them. After Alaric's death, his brother-in-law Athaulf succeeded him; and, having married Galla Placidia, daughter of Theodosius the Great (in which marriage some saw a fulfilment of Dan. ii, 32), he attempted to reanimate the decaying Roman empire by Gothic help. Finally, the Visigoths were rewarded for conquering Spain to Rome by permanent possessions in Gaul, where they founded an independent empire. See VISIGOTHS. The Ostrogoths settled for a while in Pannonia, then some of them united with the Visigoths in Gaul, where the greater part followed Theodoric into the Eastern empire. The emperor Zeno finally induced them to remove to Italy, where Theodoric, in 489, founded the Ostrogoth kingdom (see that art.). —Herzog, *Real-Encyclop.* v, 251 sq.; Dr. J. Aschbach, *Geschichte der Westgothen* (Frank. a. M. 1827); Krafft, *Kirchenesch. d. germ. Völker* (Berlin, 1854); Helfferich, *Der westgotische Arianismus* (Leipz. 1860).

**Gotthardt.** See GODEHARD.

**Gottschalk** (GOTTESCHALC, GODESCHALC, GOTHESCHALC, surnamed Fulgentius from his scholarship), a theologian of the 9th century, celebrated for his share in the controversy on the subject of predestination and grace. He was born about 806 at or near Mentz, and was intrusted to the monks at Fulda (q. v.) at an early age. Growing up, he wished to abandon the monastic life, and obtained an ecclesiastical release from his vow, but the abbot, Rabanus Maurus, retained him against his will, on the ground that no human power could annul the contract entered into by his parents. After studying at Paris he entered the Benedictine convent at Orbais, and was ordained. He was soon distinguished in the cloister for his paradoxes, his love of novelty, his zeal for science, his bold opinions, and, above all, for the warmth with which he supported them. At this period Augustine's works were the favorite study of all ecclesiastics; the learned young men occupied their time in copying them out, the professors in expounding, and the old men in recommending them. Gottschalk passed his life in endeavoring to understand them, and lost himself in the field of metaphysics and mystery. He wished to explain, understand, and penetrate everything. He believed that he found in Augustine the twofold predestination, viz. of some to everlasting life, and of others to eternal death. He visited Rome, Casarea, Alexandria, and Constantinople, everywhere sowing his opinions, and only reaping disappointment. On his return to Italy in 847, he had several conversations with Nothingus, bishop of Verona, on the subject of his doctrines; and this prelate, alarmed at his principles, thought it his duty to combat them; and, after having vainly endeavored to convince Gottschalk of his danger, he referred him to Rabanus, now archbishop of Mentz. He judged, as Nothingus had done, that Gottschalk taught a dangerous and fatal predestinarianism, that is to say, the doctrine that "God had, from all eternity, predestinated men to their salvation or damnation; which doctrine takes away a man's liberty, destroys all idea of good and evil, and reduces the human will to a kind of automaton." In Gottschalk's system, foreknowledge was identified completely with predestination; and predestination was arbitrary, both with regard to the saved and to the lost: the one infallibly attaining eternal life, "the other being so necessitated to continue in his sins that he can only be in name a subject of God's grace, and only in appearance a partaker of the sacrament." See PREDESTINATION. Gottschalk, hearing that Rabanus had declared against him, went to Mentz hoping to undeceive or convert him, but he was unsuccessful. After several useless conferences, they wrote against each other; and in one of his writings Gottschalk accuses his adversary

of Semi-pelagianism. The bishop, offended by this recrimination, assembled a council at Mentz, A. D. 848, to which he cited Gottschalk, condemned him as a heretic, and sent him for justice to the archbishop of Rheims, Hincmar, his proper judge, to whom he wrote a synodal letter, concluding with these words: "We send to you this vagabond monk, in order that you may shut him up in his convent, and prevent him from propagating his false, heretical, and scandalous doctrine." Hincmar was one of the most learned men of his time, but he was also the vainest of his knowledge, and the most fiery. He was delighted to have an occasion for showing his talent for controversy and his zeal for the Church. Having ordered Gottschalk to appear before him, he questioned him, and found him to be firm to his principles; from that time he became his irreconcilable enemy. He assembled a council of thirteen bishops at the castle of Quiercy, in Picardy, A. D. 849, to which he invited Charles the Bald, and had the doctrine of Gottschalk examined before that prince. The unfortunate, but intrepid monk was condemned as a heretic, suspended from the sacerdotal office, declared incapable of teaching, and unworthy of liberty, cruelly flogged before the king and bishops, and shut up for the remainder of his life in the abbey of Hautvillers. Such barbarous treatment, far from restoring Gottschalk to the Church, only revolted his proud and independent spirit, and confirmed him in his opinions. He died in prison, in the monastery of Hautvillers, Oct. 30, 867. When he was at the point of death, the monks who had the care of him gave notice of it to Hincmar, and asked him how they were to treat him. Hincmar had the cruelty to send to Gottschalk a formulary of faith, with an order to sign it, on pain of being deprived of the last sacraments, and of ecclesiastical burial. Gottschalk rejected it with indignation, and Hincmar's order was executed in all its rigor: nevertheless, the treatment he had undergone was censured by a large portion of the clergy of France. Lupus, abbot of Ferrières, Fulgentius, bishop of Troyes, and Remi, bishop of Lyons, highly disapproved of it. Remi, among others, said, and repeated many times, that heretics had formerly been censured, not by blows, but by reasoning. Rattramus of Corby published an apology for Gottschalk, and proved, as far as it could be proved, that the doctrine he had professed was that of St. Augustine, and had always been that of the Catholic Church. John Scotus Erigena wrote against Gottschalk in his treatise *De divina predestinatione contra Gottschalcum Monachum*. The creed of the opponents of Gottschalk may be found set forth in four articles in Harduin, *Concilia*, v, 18, 19. Archbishop Usher published a life of Gottschalk (Dublin, 1631, 4to, and Usher's *Works*, iv, 1) which was reprinted at Hanau in 1662 (8vo). Full accounts of the controversy may be found in Vossius, *Historia Pelagiana*, lib. vii; Manguin, *Œt. auctorum, qui sœc. ix. de predestinatione et gratia scripserunt Opera et Fragmenta* (forming the first part of his *Œt. de predestinatione et Gratia*, Paris, 1650, 2 vols. 4to); Natalis Alexander, *Hist. Eccles. sœc. ix. x.* See also Hook, *Ecc. Biogr.* v, 341; Gieseler, *Ch. History*, per. iii, div. i, § 16; Mosheim, *Ch. **Gouge, Thomas**, son of William, was born at Bow, Middlesex, in 1605, was educated at Cambridge, and settled at St. Spulchre's, London. He was a learned divine, an earnest preacher, most exemplary

in attending to all the duties of his pastoral charge, and, by the excellent qualities and accomplishments that distinguished and adorned his character, he possessed great and extensive influence among his clerical brethren, as well as in general society. "The virtue, however, which above all others shone brightest in him," says archbishop Tillotson, "and was his reigning attribute, was his cheerful and unwearied diligence in acts of pious charity. In this he left behind him all that ever I knew, and had a singular sagacity and prudence in devising the most effectual ways of doing good. For the last nine or ten years of his life, he did almost wholly apply his charity to Wales, because there he judged there was most occasion for it; he did not only lay out whatever he could spare out of his own estate, but employed his whole time and pains to excite and engage the charity of others for assisting him in it. By the large and bountiful contributions thus obtained, to which he constantly added two thirds of his own income (amounting to £200 a year), there were every year 800, and sometimes 1000 poor children educated by his means; and by this example several of the most considerable towns in Wales were excited to bring up, at their own charge, the like number of poor children in the like manner, and under his care and instruction. But which was the greatest work of all, and amounted indeed to a mighty charge, he procured a new and very fair impression of the Bible, and the liturgy of the Church of England, in the Welsh tongue, to the number of 8000; the former impression being spent, and not twenty of them to be had in all London. This was a work of such a charge that it was not likely to have been done in any other way. And always, but usually twice a year, he travelled over a great part of Wales, none of the easiest countries to travel in; but for the love of God, and all things cheerfully endured all privations; so that, all things considered, there have not, since the primitive times of Christianity, been any among the sons of men to whom that glorious character of the Son of God might be better applied, that he *'went about doing good.'*" He died October, 29, 1681. Among his writings are *The Principles of Religion* (1679);—*Young Man's Guide to Heaven* (1681), and other practical treatises. His *Works* are collected in one vol. 8vo, with a sketch of his life and Tillotson's funeral sermon at his burial (Lond. 1706). His sermon on *The Surest and Safest Way of Thriving* was reprinted in 1856, with a sketch of his life by T. Binney (Lond. 12mo).—Jamieson, *Cyclop. of Biography*, p. 230; Tillotson, *Works*, i, 265 sq.; Neal, *History of the Puritans*, iii, 233; Allibone, *Dictionary of Authors*, i, 710.

**Gouge, William, D.D.**, an eminent Puritan divine, was born in Bow in 1575, and educated at Eton and Cambridge. He entered the ministry at the age of thirty-one, and was minister of St. Ann's, Blackfriars, London, for forty-five years. He was esteemed as the father of the London ministers, and the spiritual oracle of his time. In 1643 he was called to be a member of the Assembly of Divines, and was in such reputation that in the moderator's absence he frequently filled the chair. He was appointed one of the annotators on the Scriptures, and performed, as his part, from the beginning of 1 Kings to the book of Job, in a manner that gained high approbation. He also published several works, the principal of which are: *Domestic Duties*, and *The Whole Armor of God*;—*The Lord's Prayer Explained*; all to be found in his *Works*, revised and enlarged (Lond. 1626, fol.);—a learned and very useful *Commentary on the Hebrews* (Lond. 1655, 2 vols. fol.), containing a thousand of his Wednesday lectures. He died December 12, 1653.—Neal, *History of the Puritans*, ii, 611; Darling, *Cyclop. Bibliog.* s. v.; Middleton, *Evangelical Biography*, iii, 267; *Life*, by his Son, prefixed to his *Works* (1665).

**Goulart, Simon**, a French Protestant theologian,

was born at Senlis, October 20, 1543. He embraced the Reformation in 1565, went to study theology at Geneva in 1566, and was consecrated pastor on the 20th of October of the same year. He obtained at once charge of a rural congregation, and in 1571 became pastor of the parish of St. Jervais, Geneva. Here his plain speaking brought him repeatedly into trouble with the civil authorities, yet he remained at Geneva, notwithstanding numerous calls from other places. After the death of Beza (January 2, 1607), the pastors chose him for their president, but he resigned that office December 18, 1612. He died at Geneva, February 3, 1628. Goulart was a very prolific writer, both of original works and of translations and compilations.

Among his scores of publications we name: *Imitations chrestiennes*, etc. (1574, 8vo);—*Expositio verissima et succincta de rebus nuper bello gestis inter Allobrogum regulum et Helveticos regis Galliarum auxiliares copias* (1589, 4to);—*Vingt-huit Discours chrétiens touchant l'estat du monde et de l'Eglise de Dieu* (1591, 16mo);—*Apophtegmatum sacrorum Loci communes, ex sacris, ecclesiasticis et secularibus libris collecti* (Geneva, 1592, 8vo); French transl. Gen. 1604, 12mo);—*Vrai Discours de la miraculeuse déliurance envoyée de Dieu à la ville de Genève, le 12 dec. 1602* (Gen. 1603, 8vo);—*Le sage Vieillard* (Lyon, 1605, 12mo); English, London, 1621, 4to);—*Quarante-deux Tableaux de la mort représentés* (last ed. Lyon, 1606, 12mo); German, Cassel, 1605);—*Considérations de la Conscience humaine* (Gen. 1607, 8vo);—*Considérations sur divers articles de la doctrine chrétienne* (Saumur, 1608, 8vo); this may have been written by his eldest son, also called Simon, see next art.);—*Traité de l'Assurance chrétienne; plus un autre Traité de l'Assurance prophane* (Genève, 1609, 8vo);—*Vingt-cinq Méditations chrétiennes*, etc. (Gen. 1610, 16mo);—*Considérations de la mort et de la vie heureuse* (Gen. 1621, 8vo);—*Considérations de la sagesse de Dieu au gouvernement du monde* (Gen. 1623, 8vo);—*Recueil des choses mémorables advenues sous la Ligue*, etc. (Gen. 1537-40, 3 vols. 8vo); last ed. by ablé Goujet, under the title *Mémoires de la Ligue sous Henri III et IV*, etc. (Amst. [Paris], 1758, 6 vols. 4to). He also edited a number of authors, ancient and modern, with annotations, and translated numerous works on history and theology. Some of his letters were published in the *Epistres françaises des personages illustres et doctes à J. J. de la Scala, mises en lumière par Jacques de Rives* (Hardenwyck, 1624, 8vo).—See Tronchin, *Oratio funebris S. Goulartii Sylvaectini, in Ecclesia Genevensi pastoris*, etc. (Gen. 1628, 4to); Bayle, *Dict. Hist.*; Nieéron, *Mémoires*, xxix, 363-374; Senebier, *Hist. littér. de Genève*; Haag, *La France Protestante*; Hoefter, *Novæ Biog. Générale*, xxi, 409 sq.

**Goulart, Simon**, a Swiss Protestant theologian (son of the preceding), was born at Geneva about 1576. He was at first pastor of the French Protestant church at Wesel, and in 1601 was called to Amst. dam to take charge of the Walloon church. Being a zealous Arminian, he engaged in a controversy with his colleagues, who as zealously defended Calvinism, and he was finally ejected. He wrote two works in defence of his views, which attracted great attention, and in 1618 the Remonstrants chose him as one of their defenders at the Synod of Dort. He was, however, forbidden to appear, as being under interdict. When the Arminian ministers were banished in 1619, he followed Episcopius to Antwerp. When hostilities were renewed between Holland and Spain he went to Calais. In 1623 he was accused of conspiring against the prince of Orange, but proved his innocence, and the next year removed to Frederickstadt, where a large number of Remonstrants had sought refuge. He died there March 19, 1628. He wrote, *Brief Traité de la grâce de Dieu envers les hommes et de l'éternelle élection des fidèles et réprobation des infidèles* (Amst. 1616, 8vo);—*Examen des opinions de M. Fulrice Dussacourt contenues en un livre de disputes intitulé L'élection éternelle et ses dé-*

pendences (Amst. 1618, 8vo):—*Épître aux Remonstrants Wallons* (1620, 8vo):—*Traité de la providence de Dieu et autres points indépendans, avec une Réfutation du sermon de Jos. Ponjade contre les cinq articles des Remonstrants* (1627, 12mo); and eight letters, two in Latin and six in French, in the *Epistole Remonstrantium ecclesiastica et theologica* (Amst. 1684, fol.). See Nicéron, *Mémoires*; *Bibl. remonstrantium*; Bayle, *Dict. Hist.*; Senebier, *Histoire litt. de Genève*; Haag, *La France Protestante*; Hoefler, *Nouv. Liog. Gén.* xxi, 414.

**Goulding**, THOMAS, D. D., a Presbyterian minister, was born at Midway, Liberty County, Ga., March 14, 1786. He was educated at Walcott, Conn., studied law for a time, and was licensed in 1813. He supplied the church at White Bluff soon after, and labored successfully there for about six years. In 1822 he removed to Lexington, Oglethorpe County, and was subsequently elected professor in the Theological Seminary of the Synod of South Carolina and Georgia. After many years of laborious service in the departments of ecclesiastical history and Church government, he resigned, and was called in 1835 to his last charge in Columbus. He was for several years in succession elected president of the board of trustees of Oglethorpe University, and died June 26, 1848.—Sprague, *Annals*, iv, 491.

**Gourd** is the rendering in the Auth. Vers. of two Heb. words.

1. JONAH'S GOURD (גִּיבֹרִית, *kikayon'*, Sept. κολοκύνθη, Vulg. *hedera*), the name of a plant that occurs only in Jon. iv, 6-10; according to the Sept. and Peshito, a gourd; but according to Jerome (who underwent much obloquy for substituting "ivy" for the "gourd" of the old Italic vers.; see Davidson's *Lib. Crit.* i, 267), the Talmud, and the Hebrew interpreters generally, a species of *ricinus*, the *palma Christi*, Arabic *el-kherwa*, Egyptian *kis* or *koiki* (Diod. Siculus, i, 3). From the statements of the text, it appears that the growth of the *kikayon* was miraculous, but that it was probably a plant of the country, being named specifically; also that it was capable of affording shade, and might easily be destroyed. There does not appear anything in this account to warrant us in considering it to be the ivy, which is a plant of slow growth, cannot support itself, and is, moreover, not likely to be found in the hot and arid country of ancient Nineveh, but which was adduced by Jerome probably only as a conjecture from the resemblance of its Greek name κισσός to *kikayon*. That the *kikayon* was thought to be a gourd seems to have arisen from the *kiki* of the Egyptians being the *kherwa* of the Arabs, often incorrectly written *kerwa*, that is, without the aspirate, which makes it very similar to *kura* when written in Roman characters, which last in the East is applied to the gourd or pumpkin (Avicenna, c. 622), and is probably the *Lagenaria vulgaris*. To this plant, no doubt, the following passages refer: "The Christians and Jews of Mosul (Nineveh) say it was not the *kerwa* whose shadow refreshed Jonah, but a sort of gourd, *el-khera*, which has very large leaves, very large fruit, and lasts but about four months" (Niebuhr, *Arabia*, p. 148). So Volney: "Whoever has travelled to Cairo or Rosetta knows that the species of gourd called *kerwa* will, in twenty-four hours, send out shoots near four inches long" (*Travels*, i, 71). In Jerome's own description of the plant, however (Comment, ad loc.), called in Syr. *kara*, and Punic *el-kerwa*, Celsius recognises the castor-oil plant (*Hiobot.* ii, 273 sq.; Bochart, *Hierez.* ii, 293, 623). The *Ricinus* was seen by Rauwolf (*Trac.* p. 52) in great abundance near Tripoli, where the Arabs called it *el-kherwa*, while both Hasselquist and Robinson observed very large specimens of it in the neighbor-

hood of Jericho ("Ricinus in altitudinem arboris insignis," Hasselquist, *Trac.* p. 555; see also Robinson, *Res.* i, 553). The Hebrew name *kikayon* is so similar to the *kiki* of Dioscorides, that it was early thought to indicate the same plant. Dioscorides (iv, 164, περὶ κικωνῶν) states that the *kiki*, or *eroton*, is called *will sesamum* by some; and proceeds to give in a few words a graphic description of the *Ricinus communis*, or castor-oil plant.

Castor-oil Plant (*Ricinus Communis*).

It has also been called *Pentactylus* and *Palma Christi*, from the palmate division of its leaves. It was known at much earlier times, as Hippocrates employed it in medicine; and Herodotus mentions it by the name of σαλλακίριον (ii, 94) when speaking of Egypt: "The inhabitants of the marshy grounds make use of an oil which they term *kiki*, expressed from the Silycyprian plant." That it has been known there from the earliest times is evident from Caillaud having found castor-oil seeds in some very ancient sarcophagi. That the Arabs considered their *kherwa* to be the same plant is evident from Avicenna on this article, or *kherwa* of the translation of Plempius (p. 301); so Serapion (iii, c. 79). But most decisive of all seems the derivation of the Hebrew word from the Egyptian *kiki* (Herodot. ii, 94; comp. Bähr, ad loc.; and Jablonsky, *Opusc.* pt. i, p. 110), established by Celsius, with whose arguments Michaelis declares himself entirely satisfied (J. D. Mich. *Supplem.*); and confirmed by the Talmudical קִיבֹרִית קִיבֹרִית, *kik-oil*, prepared from the seeds of the *ricinus* (Buxtorf, *Lex. Chald. Talmud.* col. 2029), and Dioscorides, iv, 164, where κρότων (= *Palma Christi*) is described under the name of *kika*, and the oil made from its seeds is called *kikivon elaton* (Rosenmüller, p. 127). Lady Calcott states that the modern Jews of London use this oil, by the name of oil of *kik*, for their Sabbath lamps, it being one of the five kinds of oil which their traditions allow them to employ. The castor-oil plant attains a considerable size in one season; and though in Europe it is only known as an herb, in India it frequently may be seen, especially at the margins of fields, of the size of a tree. So at Busra, Niebuhr saw an *el-kerwa* which had the form and appearance of a tree. From the erect habit, and the breadth of its foliage, this plant throws an ample shade, especially when young. From the softness and little substance of its stem, it may easily be destroyed by insects, which Rumphius describes as sometimes being the case. It would then necessarily dry up rapidly. As it is well suited to the country, and to the purpose indicated in the text, and as its name *kiki* is so similar to *kikayon*, it is generally thought by interpreters to be the plant which the sacred penman had in view.—Kitto, s. v.; Smith, s. v.

This opinion, however, that the first-named plant

above is the true representative of Jonah's gourd, is reviewed by the Rev. H. Loddell, M.D., missionary in Assyria, in a letter published in the *Bibliotheca Sacra*, April 6, 1855, p. 395 sq., who says, "The Mohammedans, Christians, and Jews all agree in referring the plant to the *kerā*, a kind of pumpkin peculiar to the East. The leaves are large, and the rapidity of growth astonishing. Its fruit is for the most part eaten in a fresh state, and is somewhat like the squash. It has no more than a generic resemblance to the gourd of the United States, though I suppose that both are a species of the *cucurbita*. It is grown in great abundance on the alluvial banks of the Tigris, and on the plain between the river and the ruins of Nineveh, which is about a mile wide. . . . The castor-oil plant is cultivated, indeed, to some extent here, but is never trained, like the *kerā*, to run over structures of mud and brush to form booths in which the gardeners may protect themselves from the terrible heats of the Asiatic sun. I have seen at a single glance dozens of these booths—these lodges in the fields of melons and cucumbers around the old walls of Nineveh (Isa. i, 8)—covered with the vines of the *kerā*, of which there are numerous species, the fruit of which weighs from one to fifty pounds. One species, growing in Kurdistan, a few days' distant from Mosul, is a genuine gourd; but there is no probability that it ever flourished on the hot plains of Mosul." The same view is taken by Thomson (*Land and Book*, i, 96 sq.), who says that "Orientals never dream of training a castor-oil plant over a booth, or planting it for shade; and they would have but small respect for any one who did. It is in no way adapted for that purpose, while thousands of arbors are covered with various creepers of the gourd family. . . . The gourd grows with extraordinary rapidity. In a few days after it has begun to run the whole arbor is covered. It forms a shade absolutely impenetrable to the sun's rays even at noonday. It flourishes best in the very hottest part of summer. Lastly, when injured or cut, it withers away with equal rapidity." See JONAH.

Oriental Arbor covered with a Gourd-vine.

2. WILD GOURDS (כִּרְבָּבִים, *pakkuṭh*; Sept.  $\tau\omicron\delta\acute{\nu}\iota\pi\eta$ , Vulg. *colocynthis*). It is related in 2 Kings iv, 38-40 that Elisha, having come again to Gilgal, when there was a famine in the land, and many sons of the prophets were assembled there, he ordered his servant to prepare for them a dish of vegetables: "One went out into the field to gather herbs (*oroth*), and found a wild vine (כִּרְבָּבִים, *field-vine*), and gathered thereof wild gourds (כִּרְבָּבִים, *field pakkuṭh*) his lap-full, and came and shred them into the pot of pottage, for they knew them not." "So they poured out for the men to eat; but as they were eating of the pottage, they cried out, O thou man of God, there is death in the pot; and they could not eat thereof." Though a few other plants have been indicated, the *pakkuṭh* has almost universally been supposed to be one of the family of the gourd or cucumber-like plants, several of which are conspicuous for their bitterness, and a few poisonous, while others, it is well-known, are edi-

ble. The reasons are given in detail by Celsius (*Hierobot.*, i, 393). (1.) The name is supposed to be derived from כִּרְבָּבִים, *pakū'*, "to split," or "to burst," from the exploding of the fruit, and scattering the seeds on being touched; and this is the characteristic of the species called the wild cucumber by the ancients. (2.) The form of the fruit appears to have been ovoid, as the name is essentially the same with that of the "knops," or כִּרְבָּבִים, *pekain'*, of 1 Kings vi, 18; vii, 24, rendered "eggs" in the Chaldaic version of Jonathan, to whom the form of the fruit could not have been unknown. (3.) The seeds of the *pakkuṭh*, moreover, yielded oil, as appears from the tract *Shabbath* (ii, § 2). The seeds of the different gourd and cucumber-like plants are well known to yield oil, which was employed by the ancients, and still is in the East, both as medicine and in the arts. (4.) The bitterness which was probably perceived on eating of the pottage, and which disappeared on the addition of meal, is found in many of the cucumber tribe, and conspicuously in the species which have usually been selected as the *pakkuṭh*, that is, the Colocynth (*Cucumis Colocynthis*), the Squirting Cucumber (*Momordica elaterium*), and *Cucumis prophetarum*; all of which are found in Syria, as related by various travellers. The first, or *Coloquintida*, is essentially a desert plant. Kitto says: "In the desert parts of Syria, Egypt, and Arabia, and on the banks of the rivers Tigris and Euphrates, its tendrils run over vast tracts of ground, offering a prodigious number of gourds, which are crushed under foot by camels, horses, and men. In winter we have seen the extent of many miles covered with the connecting tendrils and dry gourds of the preceding season, the latter exhibiting precisely the same appearance as in our shops, and when crushed, with a crackling noise, beneath the feet, discharging, in the form of a light powder, the valuable drug which it contains" (*Pict. Bible*, note ad loc.). In the Arabic version, *hunzal* (which is the Colocynth) is used as the synonyme for *pakkuṭh* in 2 Kings iv, 39. The third, or Globe Cucumber, "derives its specific name (*Cucumis prophetarum*) from the notion that it afforded the gourd which 'the sons of the prophets' shred by mistake into their pottage, and which made them declare, when they came to taste it, that there was 'death in the pot.' This plant is smaller in every part than the common melon, and has a nauseous odor, while its fruit is to the full as bitter as the *Coloquintida*. The fruit has a rather singular appearance,

from the manner in which its surface is armed with prickles, which are, however, soft and harmless" (Kitto, *Pict. Palestine; Physical Geog.* p. cclxxxix). But this plant, the fruit not being bigger than a cherry, does not appear likely to have been that which was shred into the pot. Celsius, however, is of opinion that the second of the above-named species, the *Cucumis agrestis* of the ancients, and which was found by Belon in descending from Mount Sinai, was the plant, being the *Cucumis asinus* of the druggists. This plant is a well-known drastic purgative, violent enough in its action to be considered even a poison. Its fruit is ovate, obtuse, and scabrous, and likely to have been the plant mistaken for *oroth*, as it might certainly be mistaken for young gherkins.—Kitto, s. v. The wild cucumber bursts at the touch of the finger, and scatters its seeds, which the colocynth does not (Rosenmüller, *Alterthumsk.* iv, pt. i, etc.). The etymology of the word from כִּרְבָּבִים has been thought to favor the identification of the

Colocynthis (*Citrullus Colocynthus*), with Fruit and Section of the latter.

plant with the *Ecbalium elaterium*, or "squirting cucumber," so called from the elasticity with which the fruit, when ripe, opens and scatters the seeds when touched. This is the *ἀγριοὺς σίκυος* of Dioscorides (iv, 152) and Theophrastus (vii, 6, § 4, etc.), and the *Cucumis sylestris* of Pliny (*Hist. Nat.* xx, 2). Celsius (*Lib. i*, 393), Rosenmüller (*Bib. Bot.* p. 128), and Gesenius (*Thes.* p. 1122) are in favor of this explanation, and, it must be confessed, not without some reason. The old versions, however, understand the colocynthis, the fruit of which is about the size of an orange. The drastic medicine in such general use is a preparation from this plant. Michaelis (*Suppl. Lex. Heb.* p. 344) and Oedmann (*Vern. Samml.* iv, 88) adopt this explanation.—Smith, s. v.

**Gousset, Jacques** (Lat. *Gussetius*), a French Protestant theologian, and distinguished Hebrew scholar, was born at Blois Oct. 7, 1635. He studied theology at Saumur, and acquired Greek under Lefèvre, and Hebrew under Louis Cappel. Having become pastor of the church at Poitiers in 1662, he remained in that office until the revocation of the Edict of Nantes, refusing on three several occasions the professorship of theology at Saumur. In 1665 he went to England, and soon after to Holland, where he became pastor of the Walloon church of Dort in 1687. In 1692 he went to the University of Groningen as professor of Greek and of theology, and remained there until his death, Nov. 4, 1704. Gousset advocated a very different system of Hebrew grammar from the one generally followed in Holland. While the Dutch scholars considered, like Erpenius, a knowledge of Arab and Syriac as of the utmost importance for the correct understanding of Hebrew, Gousset held that error must inevitably result from attempts to find out the meaning of words and the grammatical construction of sentences in Hebrew by comparing it with the other Semitic dialects which are but derivatives from it, and have often undergone changes to which the original language remains a stranger. He considered the old versions and the writings of the Rabbins as of little use in the interpretation of the O. T. Schultens, who, at the age of eighteen, had a public discussion with Gousset on that subject, refutes his views in his *Origines Hebraeae* and *Vetus et regia via hebraizandi*. Gousset wrote largely. We name, out of his numerous works, the following: *Examen des endroits de l'accomplissement des prophéties de M. Jurieu qui concernent la supputation des temps* (Anon. 1687, 12mo);—*Jesu Christi Evangelique Veritas salutariter demonstrata in confutatione libri Chizzuk Emounu* (Amst. 1712, 4to);—*Considérations théologiques et critiques sur le projet d'une nouvelle version française de la Bible, publiée l'an 1696, sous le nom de M. Ch. Lecene, etc.* (Amst. 1698, 12mo), a violent Calvinistic attack, accusing Lecene's translation of favoring Arminianism at the expense of correctness;—*Commentarii Linguae Ebraicae*, etc. (Amst. 1702, fol.; Lpz. 1743, 4to);—*Disputationes in Epistolam Pauli ad Hebraeos et ad Leviticum xviij, 4* (Amst. 1712, fol.);—*Vesperae Groninganae, sive amicae de rebus sacris colloquia. ubi varia sacrae Scripturae loca selecta explicantur* (Amst. 1698, 8vo; 2d edit. 1711, 8vo);—*De vita deque mortua Fide, doctrina Jacobi apostoli evoluta* (Amst. 1693, 8vo);—*Theses theologicae de typorum intrinsecorum methodo apostolica* (at the end of the *Schediasma Theologiae practicae* of Herm. Witsius, Groning. 1729, 8vo). See Bayle, *Oeuvres diverses*, iii, 629; iv, 766, 773, and 837; Nicéron, *Mémoires*, vols. ii and x; *Journal des Savants*, 1702, No. 40; Meyer, *Gesch. d. Schriftklärung*, vol. iv; Haag, *La France Protestante*; Hoefer, *Nouv. Biog. Générale*, xxi, 465 sq.

**Gouttes, Jean Louis**, a French Roman Catholic priest and political economist, was born at Tulle in 1740. He first entered the army, and soon after the Church. He was for a time curate of a place near Bordeaux, then of Argilliers (Languedoc), where he remained until the beginning of the French Revolution. He had acquired great influence over the clergy of the diocese of Béziers, and was in 1789 sent as their representative to the States General. Here, on Oct. 3, 1789, he advocated the abolition of the usury laws. He also seconded the motion of Talleyrand-Perigord, bishop of Autun, proposing the sale of the property of the clergy. In February, 1791, he succeeded Talleyrand as bishop of Autun. But afterwards, opposing the excesses of the Republican party, he was accused of reactionary sympathies, arrested, judged, condemned, and executed, all in one day, March 26, 1794. He wrote *Théorie de l'intérêt de l'argent*, etc. (Paris, 1780, 12mo; 2d edit., with a *Défense*, etc., 1782);—*Projet de Réforme, ou réflexions soumises à l'Assemblée nationale* (1790, 8vo);—*Discours sur la vente des biens du clergé* (April 12, 1790, 8vo);—*Exposé des Principes de la Constitution civile du Clergé, par les évêques députés à l'Assemblée nationale* (1790, 8vo); this latter work is under a collective name, but Gouttes was its principal author. See *Moniteur universel* (1789, 1790); Quéraud, *La France littéraire*; Hoefer, *Nouv. Biog. Générale*, xxi, 470. (J. N. P.)

**Government of God.** See THEODICY.

**Government of the Hebrews.** This we shall here treat in its secular or political relations, so far as these can be severed from the divine ordinances which underlie them all. See MONARCHY.

1. *Constitutional Form.*—This varied materially in different ages. With the Israelites, as with all other nations, unquestionably the earliest form of government was the patriarchal, and it subsisted among them long after many of the neighboring countries had exchanged it for the rule of kings. The patriarchs, that is, the heads or founders of families, exercised the chief power and command over their families, children, and domestics, without being responsible to any superior authority. Such was the government of Abraham, Isaac, and Jacob. So long as they resided in the land of Canaan they were subject to no foreign power, but tended their flocks and herds wherever they chose to go (Gen. xiii, 6-12), and vindicated their wrongs by arms whenever they had sustained any injury (Gen. xiv). They treated with the petty kings who reigned in different parts of Palestine as their equals in dignity, and concluded treaties with them in their own right (Gen. xiv, 13, 18-21; xxi, 22-32; xxvi, 16, 27-33; xxxi, 44-54). See PATRIARCHY.

The Hebrews having greatly increased in numbers in Egypt, it appeared very evident that they could not live among nations given to idolatry without running

the hazard of becoming infected with the same evil. They were, therefore, in the providence of God, assigned to a particular country, the extent of which was so small, that they were obliged, if they would live independently of other nations, to give up, in a great measure, the life of shepherds, and devote themselves to agriculture. Besides, very many of the Hebrews, during their residence in Egypt, had fallen into idolatrous habits. These were to be brought back again to the knowledge of the true God, and all were to be excited to engage in those undertakings which should be found necessary for the support of the true religion. All the Mosaic institutions aim at the accomplishment of these objects, and the fundamental principle was this—that the true God, the creator and governor of the universe, and none other, ought to be worshipped. To secure this end the more certainly, God became king to the Hebrews. Accordingly, the land of Canaan, which was destined to be occupied by them, was declared to be the land of Jehovah, of which he was to be the king, and the Hebrews merely the hereditary occupants. God promulgated, from the summit of Mount Sinai, the prominent laws for the government of his people, considered as a religious community (Exod. xx); and these laws were afterwards more fully illustrated and developed by Moses. The rewards which should accompany the obedient, and the punishments which should be the lot of the transgressor, were at the same time announced, and the Hebrews promised by a solemn oath to obey (Exod. xx-xiv; Deut. xxvii-xxx). See LAW.

In order to preserve the true religion, God governed the whole people by a striking and peculiar providence, which has rightly been termed a theocracy. But, although the government of the Jews was a theocracy, it was not destitute of the usual forms which exist in civil governments among men. God, it is true, was the king, and the high-priest, if we may be allowed so to speak, was his minister of state; but still the political affairs were, in a great measure, under the disposal of the elders, princes, etc. It was to them that Moses gave the divine commands; he determined their powers, and submitted their requests to the divine decision (Num. xiv, 5; xvi, 4; xxvii, 5). Josephus pronounced the government to be aristocratical, but Lowman and Michaëlis are in favor of considering it a democracy, and in support of their opinion such passages are exhibited as the following: Exod. xix, 7, 8; xxiv, 3-8; Deut. xxix, 9-14. The Hebrew government, however, putting aside its theocratical feature, was of a mixed form, in some respects approaching to a democracy, in others assuming more of an aristocratical character. See THEOCRACY.

In the time of Samuel, the government, in point of form, was changed into a monarchy. The election of a king, however, was committed to God, who chose one by lot; so that God was still the ruler, and the king the vicegerent. The terms of the government, as respected God, were the same as before, and the same duties and principles were inculcated on the Israelites as had been originally (1 Sam. viii, 7; x, 17-23). In consequence of the fact that Saul did not choose at all times to obey the commands of God, the kingdom was taken from him and given to another (1 Sam. xiii, 5-14; xv, 1-31). David, through the medium of Samuel, was selected by Jehovah for king, who thus gave a proof that he still retained, and was disposed to exercise, the right of appointing the ruler under him (1 Sam. xvi, 1-3). David was first made king over Judah; but as he received his appointment from God, and acted under his authority, the eleven other tribes submitted to him (2 Sam. v, 1-3). The paramount authority of God as the king of the nation, and his right to appoint one who should act in the capacity of his vicegerent, are expressly recognised in the books of Kings and Chronicles. See KING.

The rebuilding of Jerusalem was accomplished, and

the reformation of their ecclesiastical and civil polity was effected, by the two divinely-inspired and pious governors, Ezra and Nehemiah; but the theocratic government does not appear to have been restored. The new temple was not, as formerly, God's palace; and the cloud of his presence did not take possession of it. After the deaths of Ezra and Nehemiah, the Jews were governed by their high-priests, in subjection, however, to the Persian kings, to whom they paid tribute (Ezra iv, 13), but were ruled by their own magistrates, and were in the full enjoyment of their liberties, civil and religious. Nearly three centuries of uninterrupted prosperity ensued, although during that time they had passed to the rule of the Greeks, until the reign of Antiochus Epiphanes, king of Syria, when they were most cruelly oppressed, and compelled to take up arms in their own defence. Under the able conduct of Judas, surnamed Maccabæus, and his valiant brothers, the Jews maintained a religious war for twenty-six years with five successive kings of Syria; and after destroying upwards of two hundred thousand of their best troops, the Maccabees finally established the independence of their country, and the royal station of their own family. This illustrious house, whose princes united the regal and pontifical dignity in their own persons, administered the affairs of the Jews during a period of one hundred and twenty-six years; until disputes arising between Hyrcanus II and his brother Aristobolus, the latter was defeated by the Romans under Pompey, who captured Jerusalem, and reduced Judæa to the rank of a dependent kingdom, B.C. 59.—*Pict. Dict.* s. v. See JEWS.

2. *Executive Despotism.*—The organs through which these various forms of administration were exhibited always partook of that absolute and arbitrary character, both in their appointment and their exercise, which prevails among Eastern nations. The government of the Israelitish state under the monarchy was, so far as we can understand its political organization, very simple, and in its principal features analogous to modern Oriental forms (see Paulsen, *Die Regierung Morganiänder*, Altona, 1755, vol. i). The king, not simply the central figure, but more properly the embodiment of civil power, had around him as advisers and supreme executors of his commands several "counsellors," or סֹפְרֵי (2 Sam. xv, 12; 1 Chron. xxvii, 32; 1 Kings xii, 2), at whose head stands almost always the chancellor, סֹפֵר, "recorder," whose chief duty, however, was that of historiographer (comp. 2 Kings xix, 18, 37), and who is immediately recognised as the prime minister, such as is to this day the organ of royal communication in Persia (see Chaudin, *Voyage*, v, 258). Co-ordinate with him probably stood the "scribe," סֹפֵר, or state (cabinet) secretary (2 Sam. viii, 17; xx, 25; 2 Kings xviii, 18; xix, 2; xxii, 3, 10 sq.; Jer. xxxvi, 10). Sometimes we find several of these officers mentioned as existing at the same time (1 Kings iv, 3); their bureau is called "the scribe's chamber," סֹפֵר הַסֵּפֶר (Jer. xxxviii, 12). By the side of this officer was also the prefect of the palace, שֹׁרֵט הַבַּיִת, whose functions, however, were not entirely confined to the royal household (such as commissions and messages, 2 Kings xviii, 19 sq.; xix, 4, 8; Neh. i, 11), but who was also employed on state business (1 Kings xviii, 3; 2 Kings xviii, 18; Jer. xxxvi, 3), and often assumed a high degree of importance (Isa. xxiii, 15 sq.), as he then became an officer of marked rank (like the modern *major-domo*). Sometimes a prophet enjoyed the confidence of the king as extraordinary civil counsellor, and grew influential as "the king's friend," חֵן הַמֶּלֶךְ (a title of most trusty minister or prime vizier in the modern East; see Gesenius, *Comment.* on Isa. xxii, 15; Paulsen, *Regier.* p. 286), such as Nathan under David and Solomon, and Isaiah under Hezekiah. The superior

functionaries appear under the kings to have conducted the civil administration. It was the duty of the priests and Levites to care for the maintenance of justice (Deut. xvii, 8 sq.). The king himself rendered decisions in the highest cases, not seldom in less weighty causes, or even altogether. See TRIAL. As officers of the exchequer, at least so far as to provide for the wants of the royal kitchen, under Solomon, twelve commissioners were appointed (1 Kings iv, 7 sq.). Besides, each branch of the royal household or establishment, the domains and manors, had their particular superintendent. See PURVEYOR. All these constitute together, as we may say, the regal board or court. On the other hand, under the 550 officials of Solomon alluded to in 1 Kings ix, 23 must be reckoned under-officers, of whose department of service we know nothing further. Among these intermediate jurisdictions are, at all events, included the lieutenants of provinces, מְשָׁרְטֵי הַמְּדִינֹת ("princes of the provinces," 1 Kings xx, 14 sq., i. q. district-superintendents), who are first mentioned under Ahab of Israel. In conjunction with them may be classified the municipal officers, the elders and magnates of cities, to whom were addressed and who executed the royal behests (1 Kings xxi, 8; 2 Kings x, 1). See OLD MEN. The oldest and leading men of the tribes (q. v.) also formed a kind of national representatives. The scribes (q. v.) further had a certain official position. See GOVERNOR.

Under the Chaldaean rule, Gedaliah (q. v.) appears as governor (שָׂרֵי) of desolated and depopulated Judaea (2 Kings xxv, 22), which after this time became, in connection with Egypt, Cælo-Syria, and Phœnicia, a mere satrapy of the Babylonian empire (Berosus, in Josephus, *Ant.* x, 11, 1). The Persian court committed all the provinces lying west of the Euphrates to satraps, שַׂרְטָאִי (Ezra viii, 36; Neh. ii, 9), associated with whom for civil administration was a governmental chamber, with chancellor, secretary, and assessors (Ezra iv, 8, 9). Yet the same title, שַׂרְטָאִי (i. q. *pasha*), was also borne by the (Jewish) prefects of the new Israelitish colony (Ezra vi, 7; Neh. vii, 14, 18; comp. Hag. i, 1, 14; ii, 2, 21), which it had over its own people, exclusive of the circuit or ministerial officers (Neh. iii, 9, 14, 15, etc.), municipal officials, or שַׂרְטָאִי (Neh. ii, 16; iv, 19; v, 7, etc.), and judges (Ezra vii, 25). See TIRSHATHAI. Besides the Persian civil functionaries, there were likewise in the subject territories tax-commissioners or treasury-officers appointed, שַׂרְטָאִי (Ezra vii, 21), and under them a general forest-keeper (Neh. ii, 8). During the Seleucid-Syrian rule Judaea belonged, while their relations were peaceful, to the precinct of a general or *στρατηγός* of Phœnicia and Cæle-Syria (2 Macc. iii, 5; iv, 4; viii, 8), who was a provincial officer endowed with civil and military jurisdiction. The administration of the revenue was intrusted to special functionaries (2 Macc. iii, 3; 1 Macc. x, 41; xiii, 37). The chief management of the finances, however, was in the hands of the royal chamberlain (2 Macc. iii, 7 sq.). During the government of Antiochus Epiphanes we find military appointees (1 Macc. vii, 8) and extraordinary commissioners (1 Macc. i, 53; ii, 15; 2 Macc. v, 22) in Judaea. During the contests for the throne between Demetrius Soter and Alexander, the Jewish high-priests still retained the dignity of vassal-chiefs over Judaea (1 Macc. x), and Jews were intrusted with executive authority, even beyond the limits of that territory (1 Macc. xi, 59). Simon was absolute hereditary prince over Judaea, and held also the right of coinage (1 Macc. xv). In all this period, as well as earlier under the Egyptian dominion, the imposts were not unfrequently farmed out to the high-priests, or to wealthy Jews (1 Macc. xi, 28; xiii, 15; Josephus, *Ant.* xiii, 4, 4 sq., 16), which brought them into close connection with the royal functionaries, and even conferred upon them a

certain executive authority.—Winer, ii, 205. See ASSESSMENT.

For the government of Judaea under the Romans, see ROMAN EMPIRE.

3. *Democratic Powers.*—Notwithstanding the apparently unlimited and independent authority of these different kinds of rulers, the Hebrew people, especially during the earlier and purer ages of the commonwealth, reserved to themselves a large measure of directive or vetatory and magisterial influence, which enabled the popular will to express itself on all great emergencies, and even in minor points, in a clear and decided manner, through regularly constituted channels, the general assembly or the select committee.

The supreme political body of the Hebrew nation, duly met in congress, is designated in the original by two words of nearly equal frequency in the sacred writings, קָהָל, *edah*, from קָהַל, to appoint, also to bring together; and קַהָל, *kahal*, from קָהַל, i. q. *καλείν*, to convoke (Sept. *ἐκκλησία, συναγωγή*; Vulgate, *Congregatio, Cænis, Ecclesia*). The phrase "tabernacle of the Congregation," however, which so frequently occurs as indicating the place of meeting, is described by neither of these words, but by מִדְבַּר [מִדְבָּר]; the versions consistently mark the difference also, the Sept. invariably translating this phrase by *ἡ σκηνή τοῦ μαρτυρίου*, and the Vulg. by *tabernaculum testimonii*; although when the word מִדְבַּר occurs without the מִדְבָּר (as in Numb. xvi, 2), it has somewhat of the ambiguity of the Latin *Curia*, which equally well signifies the *Senate* and the *Senate-house*. In this passage מִדְבַּר is translated by *Βουλή* and *Tempus Concilii*; in many other passages the word is variously rendered, but generally bears reference to a set time or place, e. g. in Lam. i, 15, A. V. renders it *assembly*; but in ii, 6, *place of assembly* and *solenn feast*; the Sept. and Vulgate are equally capricious—*καρπός* and *tempus* standing in Lam. i, 15, and *ἐοσθή, tabernaculum* and *festivitas* in ii, 6. This word מִדְבַּר is the most frequent original equivalent of our noun "congregation." Apart from מִדְבָּר (tabernacle), it has a highly generic sense, including all the holy assemblies of the Jews.

There is good reason to believe that, not unlike the Servian constitution of the Roman people (Arnold's *History of Rome*, i, 70), the Hebrew nation from the first received a twofold organization, *mi'itary* as well as political (comp. Exod. xii, 51; Numb. i, 3, and throughout; Numb. xxvi, 3; and 1 Chron. vii, 4 and 40. See also Lowman's *Dissertation on the Civil Government of the Hebrews*, p. 159, 186, etc.). The classification of the people is very clearly indicated in Josh. vii, 14–18. (1.) The *Tribe* (שֵׁבֵט or שֵׁבֵט) was divided into clans, *gates*, A. V. "families," בָּיִת (בָּיִת). (2.) Each *Mishpachah* comprised a number of *familie*, Auth. Vers. "houses," בֵּית. (3.) Each בֵּית or "house" was made up of qualified "men," fit for military as well as political service, being twenty years old and upward (Numb. i, 3). The word which describes the individual member of the body politic, אִישׁ (*flur.* אִישׁ), is very significant; for it means *vir* a *robore dictus* (Gesenius, *Thes.* i, 262), "a man of valor," from אָזַק, to be strong (Fürst, *Heb. Wörteb.* i, 239; Meier, *Hebr. Wurz. W.-b.* p. 251). Now it was the organic union of the twelve tribes which constituted in the highest and truest sense the קָהָל, or קַהָל, i. e. "Congregation," convened duly for a competent purpose (Kurtz, *Hist. Old Test.* i, 163). As with the Greeks there was an *ἀγμία*, and with the Latins a *Deminitio Capitis*, so there were sundry faults which deprived a *home-born* Israelite (יִשְׂרָאֵלִי, Sept. *αἰ-τόξων*, Vulg. *inhiligna*; or אִישׁ, *ἀέλωός, civis*, in Deut. i, 16) of his privilege as a member of the national assembly (see Deut. xxiii, 1–8 [comp. with Neh. xiii, 1-

3]; also Exod. xii, 17, 19; xxx, 33, 38; xxxi, 14; Lev. vii, 20, 21, 25, 27; xvii, 4, 9, 10, 14; xviii, 29; xix, 8; xx, 3, 6, 17, 18; xxx, 3, 6, 17, 18; xxii, 3; xxiii, 29; Numb. ix, 13; xv, 31; xix, 20). On the other hand, the franchise or *civitas* was conferred (with certain exceptions, such as are mentioned in Deut. xxiii, 3) on foreigners, עֲרָבִים (A. V. "strangers;" Sept. προσήλυται; Vulg. peregrini), after they had qualified themselves by circumcision (Exod. xii, 19; Lev. xix, 34; Deut. xxix, 11, comp. with Isa. lvi, 6, 7).

The above words, expressive of the national congregation, sometimes imply (1) a meeting of the whole mass of the people; sometimes (2) a congress of deputies (Jahn's *Hebrew Republic*, p. 243). (1.) At first, when the whole nation dwelt in tents, in their migration from Egypt to Canaan under the immediate command of the great legislator, the Congregation seems to have comprised every qualified Israelite who had the right of a personal presence and vote in the congress. In Exod. xxxv, 1, this ample assembly is designated עֲבֹדֵי הַקֹּדֶשׁ, *the entire Congregation of the Sons of Israel* (πᾶσα συναγωγή υἱῶν Ἰσραὴλ, *omnis turba filiorum Israel*). Similarly in Num. xxvii, 19, the phrase is כָּל־עַמְּךָ, *all the Congregation* (πᾶσα ἡ συναγωγή, *omnis multitudo*), while in Lev. xvi, 17 we have כָּל־עַמְּיִשְׂרָאֵל, *the entire assembly of Israel* (πᾶσα συναγωγή Ἰσραὴλ, *universus catus Israel*). We would have no difficulty in supposing that every member of the *Edah* was present at such meetings as these, in the lifetime of Moses and before the nation was dispersed throughout its settlements in Canaan, were it not that we occasionally find, in later times, an equally ample designation used, when it is impossible to believe that the nation could have assembled at one place of meeting; e. g. in Josh. xxii, 12, where "the whole congregation of the children of Israel" is mentioned; and again still later, as at the dedication of Solomon's Temple in 1 Kings viii, 14; 2 Chron. i, 5. (2.) From this impossibility of personal attendance in the national congregation, we should expect to find a *representative* constitution provided. Accordingly, in Num. i, 16, we read of persons called זְבָנֵי הָעָם, not, as in the A. V., "renowned of the Congregation," but *went to be called to the Congregation* (Michaelis, *Lives of Moses*, i, 250). In xvi, 2, they are still more explicitly styled זְבָנֵי הָעָם, *i. e. chiefs of the Congregation who are called to the Convention* (στέφανοι βουλευτῆς, *qui tempore consilia vocabantur*). While in Exod. xxxviii, 25 occurs the phrase זְבָנֵי הָעָם, *those deputed to the assembly*, which exactly describes delegated persons. From Josh. xxiii, 2, and xxiv, 1, it would appear that these deputies were—(1) "The elders" (called זְבָנֵי הָעָם, "elders of the Congregation," in Lev. iv, 15), as if deputed thereto; and "elders of Israel," or "of the people," as if representing them and nominated by them (Deut. i, 13). (2) "The heads," זְבָנֵי הָעָם, *i. e. "the princes of the tribes"* (Numb. i, 4, 16), and the chiefs of the *Mishpachoth*, or "families" (xxvi, *passim*). (3) "The judges;" not, of course, the extraordinary rulers, beginning with Othniel, but the זְבָנֵי הָעָם, referred as in Deut. xvi, 18, stationed in every great city, and summoned probably as *ex-officio* members to the congregation. (4) "The officers" (זְבָנֵי הָעָם, γαρμαστῆς, *magistri*; whom Jahn calls *genealogists*, and Gesenius *magistrates*), whether central, as in Numb. xi, 16, or provincial, as in Deut. xvi, 18. These four classes of men, in addition to official duties, seem to have had attached to their offices the prerogative of representing their countrymen at the national convention or *Edah*. We have not classed among these delegates either the "Jethronian prefects" (Exod. xviii, 15; Deut. i, 13-15) or the seventy elders (Numb. xi, 16), for they were undoubtedly included already in one or other of the

normal classes (comp. Numb. xi, 16, and Deut. i, 15). The members of the Congregation were convened by the ruler, or judge, or king, for the time being; e. g. by Moses, *passim*; by Joshua (xxiii, 1, 2); probably by the high-priest (Judges xx, 27, 28); frequently by the kings—by David (1 Chron. xiii, 2), by Solomon (1 Kings viii, 5, etc.), by Jehoshaphat (2 Chron. xx, 4, 5), by Hezekiah (2 Chron. xxx, 2), probably by the Tirshathahs afterwards (see Ezra x, 8, 9, 12), and by Judas Maccabæus (1 Macc. iii, 42-46). The place of meeting was at the door of the Tabernacle of the Congregation; sometimes, however, some other place of celebrity was selected, as Shechem by Joshua (xxiv, i); Mizpeh (Judg. xx, i); Bezek by Saul; and Gilgal by Samuel (1 Sam. xi, 8, 15).

As long as the Israelites were encamped in the wilderness, the *Edahs* were convened by the sound of silver trumpets. From Numb. x, 2-4, it appears that the blowing of one trumpet only was the signal for a more select convention, composed only of the heads of the *Mishpachoth* and the princes of the tribes; whereas when both trumpets sounded the larger congregations met. But after the occupation of Canaan, when this mode of summons would be clearly ineffectual, the congregations seem to have been convened by messengers (Judg. xx, 1, 12; 1 Sam. xi, 7, 8).

As to the powers and authority of the congregation—it was not a *legislative* body (Conringius, *D. Rep. Hebr.* sec 10, p. 246). The divine law of Moses had already foreclosed all *legislation*, properly so-called; there was only room for by-laws (Sherlock, *Dissert.* iii, 317). Nor was the *tating* power within the competency of the Israelite *Edah*: "the national revenues of the state were so settled in the tithes and other offerings, and there being no soldiery in pay, all holding their estates by military service, there was no room for new or occasional taxes; so that the Hebrew parliament could have no business either to make new laws or to raise money" (Lowman, *Dissert.* p. 135). But there was, for all that, a large residue of authority, which sufficiently guaranteed the national autonomy. (1) The divine law itself was deliberately submitted to the *Edah* for acceptance or rejection (Exod. xix, 3, 9, and xxiv, 3). (2) Their chiefs were submitted to this body on appointment for its approval; e. g. Joshua (Numb. xxvii, 19); Saul (1 Sam. x, 24); Saul again; on the renewal of the kingdom (1 Sam. xi, 15); David (2 Sam. v, 1-3); Solomon (1 Chron. xxix, 22); so the later kings—we take as an instance Joash (2 Chron. xxiii, 3). (3) The *Edah* seems to have the power of staying the execution of a king's sentence (as in Jonathan's case, where "the rescue" was not by force or violence, but by constitutional power [צִדְקָה] carries with it the idea of authority), 1 Sam. xiv, 44, 45). (4) As in parliament, if it had not actually the prerogative of making peace and war, it possessed the power of checking, by disapprobation, the executive authority (see Josh. ix, 15; comp. with ver. 18). In later times, indeed, the prince seems to have laid questions of foreign alliance, etc., before the congregation, either for deliberation or approbation, or both (see the case of Simon Maccabæus in 1 Macc. xiv, 18-28). (5) But in the absence of a ruler, the *Edah* itself apparently decided on war or peace (Judg. xx, 1, 11-14; also xxi, 13-20). (6) The congregation was a high court of appeal in cases of life and death (Numb. xxxv, 12, 24, 25). (7) Capital punishment was not inflicted without the cognizance of the *Edah*, and the execution of the sentence was one of its functions (Lev. xxiv, 10-14; Numb. xv, 32-36). Lastly, the congregation was consulted by Hezekiah and Josiah in their pious endeavors to restore religion (2 Chron. xxx, 2-4; xxxiv, 29). When David mentions his "praises in the great congregation" (הַקְּהִלָּה, Psal. xxii, 26, etc.), it is probably in reference to his "composition of Psalms for the use of the Israelitish Church, and the establishment

in its full splendor of the choral Levitical service" (Thrupp, *Psal.* i, 141), in all which he would require and obtain the co-operation and sanction of the *Edah*. After the rejection of the theocratic constitution by Jeroboam, the congregation sometimes receives a more limited designation, e. g. כְּלֵי־הַקֹּדֶשׁ בְּרֵאשִׁית־הַיָּמִים, "All the Congregation of Jerusalem" (2 Chron. xxx, 2), and כְּלֵי־הַקֹּדֶשׁ בְּרֵאשִׁית־הַיָּמִים, "All the Congregation of Judah," πᾶσα ἡ ἐκκλησία Ἰουδα (ver. 25). The phrase "Congregation of Israel" is used, indeed, twice in this later period (see 2 Chron. xxiv, 6, and xxx, 25); but in the former passage the expression directly refers to the original institution of Moses, and in the latter to the company whom Hezekiah invited out of the neighboring kingdom to attend his passover.—Kitto, s. v. Congregation. See CONGREGATION.

4. *Literature*.—See the *Crítica Biblica*, vol. i: Couring, *De politica Hebræorum* (Helmstadt, 1648); Cungens, *De republica Hebræorum* (Leyden, 1617; Cur. 1666; with notes by Nicolai, Leyd. 1705); Dietrich, *De jure et statu Judæorum* (Marb. 1648, 1661); Hüllmann, *Staatsverfassung der Israeliten* (Lpz. 1834); Leidekker, *Antiquitates Judæorum* (Amst. 1704); id. *De varia republica Hebræor.* (ib. 1710); Lowman, *Civil Government of the Hebrews* (Lond. 1740, with an appendix, ib. 1741); Menoche, *De republica Hebræorum* (Par. 1648); Paalzow, *De civitate Judæorum* (Berlin, 1803); Reimer, *De republica Hebræorum* (Havn. 1657); Reiske, *Theocratia* (Jena, 1670); Sigonius, *De republica Hebræorum* (F. a. M. 1585; also in his *Annotat. et Antiq.* Leyden, 1701); Waleh, *Monarchie der Hebræer* (from the Spanish of Vinc. Marques de S. Philippe, Nürnberg. n. d. s. l. vol. i); Welner, *De republica Hebræorum* (Vitemb. 1657).

**Governor**, a term used by the A. V. to denote various degrees of authority and power: absolute and limited, acquired by birth or by election, military and civil. The numerous and mostly vague original terms are found in other passages translated by "ruler," "chief," "prince," "captain," etc.

1. נָגִיד, *nagid'* (Phen. נָגִיד; Ar. *najid*; Syr. *ngida*; from נָגַד, a verb only used in Hiph. and Hoph. in the signification of *to tell*). The original meaning of this root is *to rise*, to become conspicuous, visible, to be in front (comp. נָגַד, *presto, vorstehen*, to lead, to be first (compare Germ. *Fürst*=prince). The noun נָגִיד, therefore, denotes a prominent personage, whatever his capacity, and is used of a chief or prefect, "governor" of the royal palace, Azrikam (2 Chron. xxviii, 7; compare 1 Kings iv, 6; Isa. xxii, 15; οὐκράτορας, chamberlain, secretary of state), whose power (נָגִיד־הַמֶּלֶךְ) seems to have been very considerable (compare Isa. xxii, 21 sq. "Shelnah . . . a nail to the throne"), and who, it would appear, was distinguished from the other court officers by a particularly brilliant uniform (girdle and robe), and to whose insignia belonged a key worn over the shoulder. In a wider sense the word is applied to the chief of the Temple: Azariah, the high-priest, "ruler of the house of God" (1 Chron. ix, 11; comp. 2 Chron. xxxi, 13); Pashur, "chief governor of the house of God" (Jer. xx, 1); further, to the "leader of the Aaronites," Jehoiadab (1 Chron. xii, 27). Again, it is used of the keeper of the sacred treasury, "Shebuel, ruler of the treasures" (1 Chron. xxvi, 24); of the chieftains of a tribe, "Zebadiah, the ruler of the house of Judah" (2 Chron. xix, 11); of the "captains" of the army (1 Chron. xiii, 1; 2 Chron. xxxii, 21); of the oldest son of the king, the heir-apparent, "Abijah, the son of Maachah [the chief], to be ruler among his brethren" (2 Chron. xi, 22). It is finally applied to the king himself: to Saul (A. Vers. "anoint him to be captain," 1 Sam. ix, 16, etc.), to "Messiah [the Anointed], the Prince" (Dan. ix, 25, etc.). In the plural the word occurs in the more general sense of aristocracy, "Nobles" (Prov. viii, 16),

The Targum renders נָגִידִים, "their judges," by בניגדיהון; and in the Talmud נָגִיד is used parabolically for "leader of a flock." "When the shepherd is angry with his flock he gives it a blind leader" (*Baba K.* 52)—a corrupt generation to which God appoints a bad king. How far the Talmudical use of נָגִיד, in the sense of "flagellate" (*Pes.* 52) and of "extend" (*Baba Mez.* 74), may be connected with the notion of supremacy, reign, we cannot decide here.

2. נָסִי, *nasí'* (from נָסַף, *to carry, lift up*; lit. *raised*, exalted, elected; Sept. ἡγούμενος, ἀρχων), a word applied to the chiefs of the families of which a tribe was composed (Numb. iii, 24, 30, 32, 35; xvi, 2, etc.; as many as 250 on one occasion, Numb. xvi, 2); and who, as deputies (commoners) at the National Assembly, are also called *Nasís* of the congregation, or *Nasís* of Israel (elected, called to the assembly). But it was also used of the twelve supreme chiefs of the tribes themselves (Numb. ii, 3 sq.; vii, 2 sq.; iii, 32, etc.). Both these dignities, the chiefdom of a family as well as that of a tribe, would appear to have been elective—corresponding to the word נָסִי—*not* hereditary, as Michaelis and Winer hold. The *Nasí* of Judah, e. g. Nathson ben-Aminadab, does not descend from the first line of the tribe (Numb. ii; compare 1 Chron. ii, 9, 10). The *Nasí* of Issachar, again, is called Nathaniel ben-Shuar, a name not found among the eldest sons of this tribe (1 Chron. vii, 1-3). Finally, in the table of the *Nasís*—no doubt the chiefs of the tribes—to whom the division of the Promised Land was intrusted by Moses at his death, no son of the *Nasís* of the desert occurs (Munk, *Palest.* p. 194). נָסִי is further employed for generals, under a head (נָסִי), 1 Chron. vii, 40; of Abraham, a *Nasí* of God, a mighty sheik; for non-Israelitish "princes:" of the Midianites (Josh. xiii, 21), and of the Hivites (Shechem) (Gen. xxxiv, 2). On the Macebaean coins Simeon is called "*Nasí* of Israel." *Nasí* was also the official name of the president of the Sanhedrim (under whom stood the "father of the tribunal, or vice-president"), whose seat was in the middle of the seventy-one members (Maim. *Jed. Chaz.* xiv, *Syn.* i).

3. פָּקִיד, *pakid'* (from פָּקַד, *to appoint*), an *officer*, official, magistrate, applied to the ecclesiastical delegate of the high-priest, who, together with the king's scribe, had to empty the chest containing the contribution to the Temple (2 Chron. xxiv, 11); to the Levites (Neh. xi, 22); to the "chief" of the Temple (Jer. xx, i, 2); to "officers in the house of the Lord" (Jer. xxix, 26); to a military commander (2 Kings xxv, 19; Jer. liii, 25), and to his adjutant or principal manager (Judg. ix, 28). Further, to the officers whom Joseph suggested that Pharaoh should put over Egypt during the years of the famine (Gen. xli, 34); to those who were to gather all the virgins unto Shushan for Ahasuerus (Esth. ii, 3); to prefects, "overscers," etc. (Neh. xi, 9; xii, 42); and, finally, to the nobles or "princes" of the king (Jer. xx, 1; 2 Chron. xxxv, 8).

4. שָׁלִיט, *Shallit'*, Heb. and Aram. (from שָׁלַט, *to rule*, have power, Arab. id. comp. Sultán); "one who hath power" (Eccles. viii, 8); "Arioch, the king's captain" (Dan. ii, 15); "Joseph, the governor over the land" (Gen. xlii, 6); a "mighty man" or hero (Eccles. vii, 19); a "king" or satrap (Ezra iv, 20); Daniel, the third "ruler" (Dan. v, 29), etc. The verb שָׁלַט is also used in later Hebrew in the sense "to have power," of evil hours, evil spirits, etc.

5. מֵאֵלֶּפֶת, *Alliph'* (from מָלַף; Arab. id. *to join*, etc.); originally, one who is put over a "thousand," or מֵאֵלֶּפֶת, viz. the round number of families which constitute a clan or subdivision of a tribe (comp. old Saxon "Hundred"). It is first used of the chiefs, "dukes," of Edom (Gen. xxxvi; 1 Chron. i, 51); we find it at a

later period also applied to Jewish chiefs (Zech. ix, 7; xii, 5, 6). This word is not to be confounded either with the captain of a body of a thousand men, or with the "rulers of thousands," a kind of magistrates selected by Moses, on the advice of Jethro, for the purpose of judging the smaller matters during the sojourn of the Israelites in the desert; and who were, at a later period, superseded by the regular institution of the judges. The further use of the word in the sense of "friend" (parallel with עֵתָר, companion, Mic. vii, 5; Prov. xvi, 28, or יְרֵדָה, acquaintance, Psa. lv, 14) must be traced directly to the root (עָטַר, to accustom one's self). It may further be noticed here that Matt. ii, 6 seems to have read the passage in Mic. v, 2, בְּצֵלְפָחַר הַהִרָה, "among the thousands [clans] of Judah," as בְּצֵלְפָחַר הַהִרָה, "among the princes of Judah."

Derived from the partic. act. (Kal and Piel) are the following four: 6. חֲכֵקֵק, חֲכֵקֵק, חֲכֵקֵק, *Chakékék, Mechvékék'* (from חָקַק, lit. an engraver, a writer—scil. of laws (חָקַק, חֲכֵקֵק, law, decree); a lawgiver (Gen. xlix, 10; Deut. xxxiii, 21); one who decides by the law: a judge (Isa. x, 1, parallel with "they that write;" with "they that handle the pen of the writer," Judg. v, 14); "the Lord is our judge, the Lord is our lawgiver, the Lord is our king" (Isa. xxxiii, 22); "princes decree justice" (Prov. viii, 15), etc. The Talmud has retained the original meaning of engraving, painting, writing, e. g. יִיבְנוּ הַקִּיְקָה (Gem. Pes. 1, a), is explained by "of the engravers, scribes" (*Aruch*, s. v.), and the imitation implied in the notion of "drawing" has become fixed in the word חֲכֵקֵק (Talm. *Chul.* 41, b, "that he shall not imitate the Sadducees").

7. מִשְׁחֵל, *Moshel'* (מָשַׁל, to be strong), one who reigns, holds dominion, "rules;" used for nearly all degrees of power: of the taskmaster of the ant (Prov. vi, 7), the husband who rules his wife (Gen. iii, 16), Eliezer, who had the management of Abraham's house (Gen. xxiv, 2), Joseph, the second in command over a country (Gen. xlv, 8), an absolute king (Psa. cv, 20; Isa. xvi, 1); also in the bad sense of despot (Isa. xiv, 5); of the Messiah (Mic. v, 1); of God (1 Chron. xxix, 12; Psa. ciii, 19), etc. No less is the word applied to the sway which the sun and moon hold over day and night (Gen. i, 18 ["omnium moderator et dux sol," Cic. *Tusc.* i, 68; "sol cæli rector," Pliny, ii, 4]). In the Talmudical tract *Jal.* 76, מִשְׁחֵל is used for Pharaoh.

8. שָׂר, *Sar* (from שָׁרַר, to rule, reign; comp. Phœn. סַרְגַר, סַרְגַר; Assy. סַר, king, e. g. "Nabukudur-rusur Sar Babilu," Nebuchadnezzar, king of Babylon, Inscr. Borsippa, etc.), a word used of nearly all degrees of chiefdom or wardenship. It is applied to the chief baker of Pharaoh (Gen. xl, 16), to the chief butler (xl, 2), to the "ruler over the cattle" (xlvii, 6), to the keeper of the prison (xxxix, 21), to the taskmaster of the Israelites (Exod. i, 11), to the "prince of the eunuchs" (Dan. i, 7), to the "master of the song," Chenaniah (1 Chron. xv, 27); further, to præfects, civil or military, of very limited or very extensive authority: Zebul, the "ruler of Shechem" (Judg. x, 30); "Amon, the governor of the city" (1 Kings xxii, 26); præfects of the provinces (1 Kings xx, 15); "decurion" (Exod. xviii, 21); "a captain of fifty," *πεντηκωνταρχος* (2 Kings i, 19); captains (judges) over hundreds (Deut. i, 15); over a thousand (1 Sam. xviii, 3); over many thousands (1 Chron. xv, 25); "captain over half of the chariots of war" (1 Kings xvi, 9); "captain of the host" (2 Sam. xxiv, 2); general-in-chief (Gen. xxi, 22; 1 Sam. xii, 9); hence used—after God of hosts—of God himself (Dan. vii, 11). It occurs by itself in the absolute state as a parallel to "judge;" "who has made thee a prince and a judge over us?" (Exod. ii, 14); to "elder" (Ezra x, 8), to

"counsellor" (Ezra viii, 25), to "king" (Hos. iii, 4). The merchants of Tyre are called מַרְכָּלִים, merchant-princes (Isa. xxiii, 9); the same term is applied to noblemen and courtiers, "the princes of Pharaoh" (Gen. xii, 15); "princes of Zoan" (Isa. xix, 11, 13). The priests are called chiefs or princes of the sanctuary (Isa. xliii, 28; 1 Chron. xxv, 5), and the chief-priests again are called *princes of the priests*. Gradually the word came to be used of angels, as patrons and representatives of special nations (guardian angels): of Persia (Dan. x, 13, 20); of Greece (Dan. x, 20); of Israel (x, 21); Michael, "the great prince" (xii, 1); the chief princes (x, 13); "the Prince of princes"—God (viii, 25; comp. Sept. in Deut. xxxii, 8). The use of שָׂר as guardian angel is retained in the Midrash, but the word is also applied in the Talmud to "a hero at the table, a mighty drinker" (*Nidd.* 16, etc.). See CAPTAIN.

Of foreign origin is, פֶּחָה, *Pechah'*, פֶּחָה, פֶּחָה; Josephus, *ἐπαρχος*, of Tatnai (*Ant.* xi, 4, 4). This word has been variously derived from the Persian for "magrates" (Bohler); Persic "to cook" (Ewald); Persic for "Satelles," "Pedisequus" (Gesenius); from the Turkish for "general" (Frähn); from the Assyrian *Pakha* (Sanscr. *Pakshah*); whence *pasha*—friend [of the king], adjutant, governor of a province (Benfey, Stern); from the Arab. *Pé*, "the lower," and *gáh*, "royal office" = Pégáh, sub-king (Först); from "the Arab. verb *فاح*, *wallat*" (Jahn); and, finally, from the Hebrew פֶּחָה = חָקַק, *rayéto*. It is applied to a sub-præfect of a province, who is subject to the authority of the præfect or real governor, in contradistinction from מִשְׁחֵל הַשָּׂרָה, a satrap (Esth. viii, 9); from שָׂר (ib.); from שָׂרָה, "sagan," municipal officer (Jer. li, 28); and from מֶלֶךְ, "king" or sub-king (2 Chron. ix, 14). It is used of the "chiefs" of provinces in the Assyrian (2 Kings xviii, 24; Isa. xxxvi, 9), Babylonian [Chaldee] (Jer. li, 57; Ezek. xxiii, 6, 23; Dan. iii, 2), Median, and Persian empires (Jer. li, 28; Esth. iii, 12; viii, 9). Palestine stood, while under Persian dominion, under such officers, called "præfects over the river" (Euphrates), whose official residence [בֵּיתֵם] was in Jerusalem (Neh. iii, 7; Ezra v, 3; vi, 6; Neh. ii, 7, 9). They were also called *præfects* of Judah (Hagg. i, 1); e. g. Zerubbabel (Ezra ii, 63; Hagg. ii, 21, etc.); Nehemiah, who succeeded Sheshbazzar (Neh. v, 14, 15; xviii, 12). The word seems to have been adopted into the Hebrew idiom at an early period, since we find it used in 1 Kings x, 15 (2 Chron. ix, 14) of the tributary chieftains "of the country"—together with the "kings of Arabia;" further, of Syrian captains to be put in the room of the (vice-) kings at the time of Benhadad (1 Kings xx, 24); and, finally, it passed current for any person in high authority who was to be propitiated by gifts (Mal. i, 8). With respect to the שָׂר of Judæa, introduced by Persian rule, it would appear that their remuneration ("bread of the governor," Ezra iv, 14) consisted partly in kind, partly in money ("bread, wine, and forty shekels of silver," Neh. v, 15), chargeable upon the people (Neh. v, 18: "One ox and six choice sheep, also fowls, and once in ten days store of all sorts of wine"). Their office seems chiefly to have consisted in collecting the taxes of the province (Ezra vi, 8); an office at a later period in the hands of the high-priest, and still later let out on lease.—Kitto, s. v. See PAMATI-MOAB.

10. The Chaldee term שָׂגַן, *Segan'* (in the plur. שָׂגָנִים) is applied (Dan. iii, 2, 27; vi, 8) to the governors of the Babylonian satrapies, in a general way, in connection with other official terms, from which it is not clearly distinguishable, except that it appears to designate the provincial præfects or viceroys; and elsewhere (Dan. ii, 48) it is applied to the præfects

over the Magi, of whom one is especially entitled as chief or supreme (𐤇) over his colleagues. The corresponding Heb. term *שָׂגָן*, *sagan'*, is spoken of the provincial rulers under the Chaldee supremacy (Jer. li, 23, 28, 57, where it distinguished by *שָׂגָן אֲבוּיָהוּ*, above; Ezek. xxiii, 6, 12, 23; comp. Isa. xli, 25); also to the chiefs and rulers of the people of Jerusalem under the Persian supremacy (Ezra ix, 2; Neh. ii, 16; iv, 8, 13; v, 7, 17; vii, 5; xii, 40; xiii, 11; in many of which passages it is associated with other titles of office or honor); and in the Targums it is used of the *vicar* of the high-priest, or the presiding officer of the Temple. Corresponding to this term are the modern Persian, Arabic, and Syriac words for satrap. It is apparently of Sanscrit origin.—Gesenius, s. v.; Fürst, s. v.

The Greek terms rendered in the N. T. "governor" are the following, of which the first two relate to public or military officers, and the last two to domestic usages:

11. *Ἐθνάρχης*, *Ethnarch* (2 Cor. xi, 32), an officer of rank under Aretas, the Arabian king of Damascus. It is not easy to determine the capacity in which he acted. The term is applied in 1 Macc. xiv, 47; xv, 1, to Simon the high-priest, who was made general and *ethnarch* of the Jews as a vassal of Demetrius. From this the office would appear to be distinct from a military command. The jurisdiction of Archelaus, called by Josephus (*War*, ii, 6, 3) an ethnarchy, extended over Idumæa and all Judæa, the half of his father's kingdom, which he held as the emperor's vassal. But, on the other hand, Strabo (xvii, 13), in enumerating the officers who formed part of the machinery of the Roman government in Egypt, mentions ethnarchs apparently as inferior both to the military commanders, and to the monarchs, or governors of districts. Again, the præfect of the colony of Jews in Alexandria (called by Philo *γενάρχη*, *lib. in Flacc.* § 10) is designated by this title in the edict of Claudius given by Josephus (*Ant.* xix, 5, 2). According to Strabo (*Joseph. Ant.* xiv, 7, 2), he exercised the prerogatives of an ordinary independent ruler. It has therefore been conjectured that the ethnarch of Damascus was merely the governor of the resident Jews, and this conjecture receives some support from the parallel narrative in Acts ix, 24, where the Jews alone are said to have taken part in the conspiracy against the apostle. But it does not seem probable that an officer of such limited jurisdiction would be styled "the ethnarch of Aretas the king; and as the term is clearly capable of a wide range of meaning, it was most likely intended to denote one who held the city and district of Damascus as the king's vassal or representative. See ETHNARCH.

12. *Ἡγεμών*, the *Procurator* of Judæa under the Romans (Matt. xxvii, 2, etc.). The verb is employed (Luke ii, 2, etc.) to denote the nature of the jurisdiction of Quirinus over the imperial province of Syria (see Gerlach, *Die römischen Statthalter in Syrien und Judæa*, Berl. 1865). See PROCURATOR.

13. *Οικονομός* (Gal. iv, 2), a *steward*, apparently intrusted with the management of a minor's property. See STEWARD.

14. *Ἀρχιτρικλινός* (John ii, 9), "the *governor* of the feast." It has been conjectured, but without much show of probability, that this officer corresponded to the *συνεπιτάρχος* of the Greeks, whose duties are described by Plutarch (*Sympos. Quest.* 4), and to the *arbiter bibendi* of the Romans. Lightfoot supposes him to have been a kind of chaplain, who pronounced the blessings upon the wine that was drunk during the seven days of the marriage feast. Again, some have taken him to be equivalent to the *τραπέζοποιός*, who is defined by Pollux (*Onom.* vi, 1) as one who had the charge of all the servants at a feast, the carvers, cup-bearers, cooks, etc. But there is nothing in the narrative of the marriage feast at Cana which would lead to the supposition that the *ἀρχιτρικλινός* held the rank of a

servant. He appears rather to have been on intimate terms with the bridegroom, and to have presided at the banquet in his stead. The duties of the master of a feast are given at full length in Ecclus. xxxv (xxxii). See ARCHITRICLINUS.

In the apocryphal books, in addition to the common words *ἄρχων*, *ὑεσπότης*, *στρατηγός*, which are rendered "governor," we find *ἑπιστάτης* (1 Esdr. i, 8; Judith ii, 14), which closely corresponds to *ἐπαρχος* used of Zerubbabel and Tatnai (1 Esdr. vi, 3, 29; vii, 1), and *προστάτης*, applied to Sheshbazzar (1 Esdr. ii, 12), both of which represent *ἑπιστάτης*; *ἑπιστάτης* (1 Esdr. vii, 2) and *προστάτης τοῦ ἱεροῦ* (2 Macc. iii, 4), "the governor of the temple" = *ἑπιστάτης* (comp. 2 Chron. xxxv, 8); and *σατράπης* (1 Esdr. iii, 2, 21), "a satrap," not always used in its strict sense, but as the equivalent of *στρατηγός* (Judith v, 2; vii, 8).—Smith, s. v. See PRINCE.

15. In James iii, 4, the Greek term rendered "governor" is *ἐξέτινος*, a guide or *director*, i. e. helmsman (prop. *κυβερνήτης*, whence Lat. *gubernator*, Eng. *governor*, the last in a different sense). See SHIP.

The following list (modified from the *Biblical Repository*, 1832, p. 381, 382) of the presiding officers of Judæa (q. v.) will be found useful in comparing the history of those times. See each name in its place. For those of Syria, see SYRIA.

PROCURATORS OF JUDEA.	A. D.
(1) Coponius .....	6-9
(2) Marcus Ambivivus .....	9-12
(3) Annus Rufus. These three were appointed by Augustus; the two following by Tiberius .....	12-15
(4) Valerius Gratus .....	15-16
(5) Pontius Pilatus .....	16-36
(6) Marcellus, sent by Vitellius, the governor of Syria, in place of Pilate .....	36-37
(7) Marullus, sent by Caligula .....	37-40
(8) Publius Ieronius, who was at the same time governor of Syria, managed the affairs of the Jews himself. Under his successor Mar-us 41-0, there seems to have been no distinct procurator of Judæa for two or three years .....	40-42
(9) Cuspius Fadus, sent by Claudius .....	42-46
(10) Tiberius Alexander .....	47-49
(11) Ventidius Cimmanus .....	49-53
(12) A. Claudius Felix .....	53-55
(13) Portius Festus, under Nero .....	55-62
(14) Albinus .....	62-64
(15) Gessius Florus, the last procurator of Judæa .....	65
(16) Josephus, however, speaks ( <i>War</i> , vi, 4, 3) of a Marcus Antonius Julianus as being (or having been) procurator ( <i>ἑπιστάτης</i> ) of Judæa in the last struggle with the Romans, A. D. 70.	

**Govinda**, SIXTH, the tenth and last *guru* (teacher) of the sect of the Sikhs, was born at Patnah, in Behar, in 1661. He was a son of Tegh Bahadur, the ninth *guru*. He was educated at Madra Des, in the Punjab, where the Sikhs have always been very numerous. His father, whose power was offensive to the Great Mogul Aurungzebe, was put to death by order of the latter in 1675. Govinda himself had to retire to the mountains surrounding Djemnah, where he passed twenty-five years, devoting his time to religious meditation, to the study of the Koran, of the religious books of the Hindoos, and the Persian language. He then undertook a religious reformation of the Sikhs (q. v.). He claimed to be a special envoy of God, though he at the same time always declared that he was only a mortal man. He sanctioned the abolition of caste; all the Sikhs are to be equal. They must only adore the one God. The worship of saints and of images of the Deity are regarded as acts of superstition. The precepts contained in the Koran and the Puranas cannot procure salvation. The faithful, on the contrary, must totally separate from the Mussulmans and the Hindoos. They are permitted to kill animals and to use their flesh. Govinda declared all to be infamous, who would kill female children; but to exterminate the Mongols was, on the other hand, declared to be a meritorious act. War was to be the occupation of all his followers, to every one of whom

he gave the title *singh* (lion or soldier), and threatened with excommunication and everlasting damnation all who would abandon the chief in a battle at the moment of danger. For admission into the sect a kind of baptism was prescribed, and it was declared to be a meritorious act to bathe from time to time in the lake of Amritsir. Govinda declared that he would be everywhere where five of his disciples would be assembled; and he introduced a kind of council, at which the prominent chiefs met to discuss public affairs. Govinda gained many converts for the sect of the Sikhs. His relative, Ram Rae, who disputed with him the title guru, was put to death by his order. Having become involved in a war with the Mongols, he twice defeated them; but finally, as all his allies abandoned him, he had to withdraw into the interior of his states. While he endeavored to defend his strongholds, all his children perished. When the last stronghold, Tehamkor, fell, he made good his escape in the disguise of a dervish, and safely reached the desert of Bhutinda. Having been joined by many of his adherents, he was able to repulse his enemies. He finally accepted an invitation to the court of the Great Mogul Aurungzebe; but, before he reached Delhi, Aurungzebe died; but the successor of the latter, Bahadur Shah, received him with marked honor, and is said to have made him governor of a province in the valley of the Godavery. There he died soon after. The Sikhs regard Govinda as superior to the preceding gurus, and none of his successors has been deemed worthy to bear the title. Govinda is the author of a part of *Desven Padshah ka Greuth* (Book of the Tenth King), one of the sacred books of the Sikhs, which is written in Hindoo verses, with a conclusion in the Persian language. Of the sixteen parts of this work, the five first and a portion of the sixth are from Govinda. He also made additions to the other sacred book of the Sikhs, the *Greuth* (Book), a collection of sentences of several gurus. Besides these works, he wrote *Rehet nameh* (Book of Rules) and *Tenka nameh* (Book of Restrictions).—Hofer, *Nouv. Biog. Générale*, xxi, 596 sq.; McGregor, *History of the Sikhs*, vol. i. (A. J. S.)

**Gozal.** See FLEDGLING.

**Go'zan** (Heb. *Gozan'*, גֹּזָן, according to Gesenius, *quarry*; according to Fürst, *ford*; Sept. Γωζάν [v. r. Γωζάν and Νοζάν]), the tract to which the Israelites were carried away captive by Pul, Tiglath-Pileser, and Salmanser, or possibly Sargon (2 Kings xvii, 6; 1 Chron. v, 26). It is also mentioned as a region of Central Asia, subject to the Assyrians (2 Kings xix, 12; Isa. xxxvii, 12), situated on the Habor (2 Kings xvii, 6; xviii, 11). Ptolemy, in his description of Media, mentions a town called *Gauzania* (*Geogr.* vi, 2, 10), situated between the Zagros mountains and the Caspian Sea. Bochart (*Opp.* i, 194) and others (so Rosenmüller, *Bibl. Geogr.* I, ii, 102) have attempted to identify this town with Gozan. Rennell further states that the river Gozan (1 Chron. v, 26) is the modern *Kizil Ozm*, which rises near Sinna, in the eastern part of the Zagros chain, and, after a winding course, joins the Sefid-rud, which flows into the Caspian (*Geography of Herodotus*, i, 521, 2d ed.; see also Ritter, *Erdkunde*, viii, 615; Ker Porter, *Travels*, i, 267; Kinnier, *Memoir on the Persian Empire*, p. 121; Morier's *Second Journey*, i, 267). This theory, however, places Gozan too far east for the requirements of the Scripture narrative. Dr. Grant supposes that the word *Gozan* signifies "pasture," and is the same as the modern *Gozan*, the name given by the Nestorians to all the highlands of Assyria which afford pasturage to their flocks. He thinks that the ancient province of Gozan embraced the mountainous region east of the Tigris, through which the Khabûr and the Zab flow (*Nestorian Christians*, p. 125 sq.). A close examination of the notices in Scripture, and a comparison of them with the Geography of Ptolemy and modern researches, enable us to fix, with a high

degree of probability, the true position of Gozan. It appears from 2 Kings xvii, 6 (also xviii, 11), that Gozan was in Assyria, which is there distinguished from Media; and that Habor was a "river of Gozan." There can be little doubt that the Habor is identical with the Khabûr of Mesopotamia. See HABOR. Gozan must, therefore, have been in Mesopotamia. The words of 2 Kings xix, 12 appear to confirm this view, for there Gozan and Haran are grouped together, and we know that Haran is in Mesopotamia. The conjunction of Gozan with Haran or Harran in Isaiah (xxxvii, 12) is in entire agreement with the position here assigned to the former. As Gozan was the district on the Khabour, so Haran was that upon the Bilik, the next affluent of the Euphrates. See CHARRAN. The Assyrian kings, having conquered the one, would naturally go on to the other. In 1 Chron. v, 26, Gozan is, by an erroneous rendering in the A. V., called a *river*, and is distinguished from Habor. The true explanation seems to be, that in this passage Habor is the name of a district, probably that watered by the lower Khabûr; while the upper part of the same river, flowing through the province of Gozan, is called גֹּזָן הַיָּבֵיט, *the river of Gozan*. Gozan seems to be mentioned on the cuneiform inscriptions (q. v.). Ptolemy states that *Gauzanitis* (Γαυζανίτις) was one of the provinces of Mesopotamia adjoining Chalcedis (*Geograph.* v, 18, 4). The same province Strabo calls *Mygdonia* (xvi, 1, 27), which may probably be, as suggested by Rawlinson, another form of the same name (*Ancient Monarchies*, i, 245), ζ being prefixed and ι rendered into δ. As we find Halah, Habor, and Haran grouped together in Mesopotamia; as we find beside them a province called Gauzanitis; and as in Scripture Gozan is always mentioned in connection with the above places, we may safely conclude that Gozan and Gauzanitis are identical. Gauzanitis lay along the southern declivities of Mons Masius, and extended over the region watered by the upper Khabûr and Jeruher rivers to the ranges of Sinjar and Hamma. The greater part of it is an undulating plain, having a poor soil and scanty vegetation (Layard, *Nineveh and Babylon*, p. 275). On the other hand, Mr. Layard describes the tract immediately along the Khabûr as one of remarkable fertility (*ib.* p. 227).—Kitto, s. v.; Smith, s. v. See CAPTIVITY.

**Graal** (Grâl, from the old French, but originally Celtic word *Gréal*, Provençal *grazal*, and in mediæval Latin *gradatis*) signified originally a "bowl-shaped vessel." The poetry of the Middle Ages makes numerous mention of the Saint Grâl (in old French *San grâl*), a vessel said to have been made of a precious stone, and endowed with wonderful virtues. According to the legend, the vessel was brought to the earth by angels, and kept first by them, then by a company of knights commanded by a king, in a temple built expressly for it, at the summit of the unapproachable mountain Montsalvage. The legend was developed in the early part of the 12th century by the addition of Arabic, Jewish, and Christian elements during the wars between the Moors and Christians, and especially in the wars of the Templars in Spain and Southern France. In these countries it became a favorite theme for poets. In 1170 it had become confounded with the legends of Arthur and of the Round Table, by Chrétien de Troyes and other Troubadours of Northern France. In the legend of the Round Table the Saint Graal is considered as the vessel used by Christ at the last supper, and in which Joseph of Arimathea caught the blood that fell from the side of Christ (hence the erroneous meaning attached to the word, as *Sang réal*, i. e. royal blood, blood of the Lord). The legend was made the subject of a poem in old French by Guiot de Provins, which has been lost. This tale furnished Wolfram von Eschenbach the materials for his *Parzival* and *Titurel*, but he gave the subject a deeply allegorical meaning of his own. The subject was more

thoroughly treated by the author of the second *Tituel* in 1270; yet he connects it with the legends of Lohengrin and of Prester John.

The legend of the Saint Graal is of some importance in the history of the Church. Attempts have been made to show the derivation of the word itself, *graal*, from Garalah (גַּרְלָה), i. e. *foreskin*, in allusion to the blood shed in circumcision as the type of the blood of Christ. But it appears certain that it means a vessel, cup, or shell. A costly cup was really found by the first crusaders at Caesarea. It was allotted to the Genoese, who brought it to Genoa, where it remained for several centuries in the chapel of John the Baptist in the Church of St. Lorenzo, from whence it was transported to Paris. There appears to be some connection between the legend of Prester John, as joined with the *San Graal*, and the still existing remains of the Gnostic sect known by the appellation of *Disciples of John* (Sabians, Zabians, Nazareans, Mendeanes, Baptists). Not only the name *John*, but the *locality* assigned in the legend (viz. the interior of Asia, on the southern frontier of the Turkish empire), as well as the fact that in this Gnostic sect the king is at the same time high-priest, seems to favor the idea of a connection. The *use* of the Graal, according to the tradition, is as follows: It is claimed on every Good Friday there comes into it, from heaven, a holy wafer, which is intended as the food for many; thus the Graal is a sort of continuation of the miracle of feeding the multitude (Matt. xv, 32). It provides food and drink in abundance for the *initiated*, but to them *alone* it is visible. It cannot be obtained by violence, but is to be received by faith. At the bottom of the legend we find the doctrine of the real presence in the Lord's Supper. The *wanderings* of the Saint Graal, which came from the East to the West, afterwards to return again to the East, points the Church to the duty of missionary enterprise, etc. In all these poetical legends one point is especially deserving of notice: it is the evidence they afford of the tendencies of the Christian mind in all ages to fathom the unfathomable, and to cling to the memory of past events, and to reproduce them. But for this very reason it becomes the more necessary for us to distinguish between the original and the image, between the real facts and the errors which have grown up around them. By a just criticism, the poetry of the Middle Ages, which in latter times has been much studied, can be made very useful for the history of theology.—See Büsching, *Der heil. Gral u. seine Hüter* (*Altd. Museum*, Berl. 1809, vol. i.); Boissiercé, *Ueber d. Beschreibung d. heil. Grals* (Mun. 1834); C. Lachmann, *Wolfram von Eschenbach* (Berlin, 1833, 2d ed. 1854); San Marte (Schultz), *Die Sage v. heil. Gral* (*Leben u. Dichten W's v. Eschenbach*, 1841, vol. ii.); K. Sinrock, *Parcival und Tituel* (Stuttg. and Tubing, 1842); C. F. Göschel, *Die Sage v. Parcival u. v. Gral*, etc. (Berlin, 1855); Herzog, *Real-Encyclop.* v. 314; Dunlop, *History of Fiction*, p. 73 sq. (London, 1845, 1 vol. 8vo); Bullfinch, *Age of Chivalry*, p. 185–226 (Boston, 1865, 8vo).

**Grā'ba** (Γραβά v. r. Ἀργαβά, Vulg. *Armacha*), given (1 Esdras v, 29) as the name of one of the Nethinim ("servants of the Temple") whose "sons" returned from the captivity; evidently the HAGABAII (q. v.) or HAGABA of the Heb. texts (Ezra ii, 45; Neh. vii, 48).

**Grabe**, JOHANN ERNST, a Protestant theologian, was born at Königsberg, Prussia, July 10, 1666. He studied theology in order to enter the ministry in the Lutheran Church, but, having imbibed the High-church theory of apostolical succession, he thought of joining the Roman Catholic Church, but, by the advice of Spener, he went in 1697 to England, where he was well received by William III, who settled upon him a pension of £100 a year. In 1700 he was ordained a deacon, and was presented to a chaplaincy of Christ Church, Oxford, which was the only ecclesiastical appointment he ever held. Upon the accession of Queen

Anne his pension was continued, and in 1706 the University of Oxford conferred upon him the degree of D.D. He now devoted himself to literary labors, in which he was industriously occupied until his death, Nov. 14, 1711.

Of his numerous works the most celebrated is his edition of the *Septuagint*, the text of which is founded upon the Alexandrian MS, then in St. James's Library, but now in the British Museum. Vol. I (Oxford, 1707) contains the Pentateuch and the three following books. Vol. II was to contain all the historical books of the Old Testament; vol. III all the prophetic books; and vol. IV the Psalms, the Books of Solomon, etc. But after Grabe had begun to print the second volume, he was induced to postpone the appearance of that, and also of the third volume, by the expectation of being furnished with important MSS. and other materials, which would enable him to render them more complete. That no time might be lost, however, in expediting the whole work, he published in 1709 vol. IV, *Continens Psalmorum, Jobi, ac tres Salomonis Libros, cum Apocrypha ejusdem, necnon Syriacæ Sapientia* (fol., and 8vo). In the following year he published a Latin dissertation, giving a particular account of the reasons why he had departed from his original order of publication, and of the materials which he expected to receive in order to perfect his plan. These were, a Syriac MS. of the original books of the Old Testament, with Origen's remarks upon them; and two MSS., one belonging to Cardinal Chigi, and the other to the college of Louis XIV. Afterwards he received these MSS., and made collations from them; in the mean while he had prepared a volume of annotations upon the whole work, and also collected the materials for the *Prolegomena*. It required, however, so much time to digest the whole into proper method, that the second and third volumes were not published until after his death, the former in 1719 and the latter in 1720. He also published *Spicilegium SS. Patrum et hæreticorum sæc. i, ii* (Oxon. 1714, 2 vols. 8vo); *Justinus Apologia Prima; Irenæi adversus Hæreses Libri V; Epistola ad Millium* (to show that the Alexandrian MS. of the Septuagint contains the best version of the Book of Judges, and that the version of the Vatican MS. is almost a new one, made in the third century); *An Essay upon two Arabic MSS. of the Eodæian Library; De Formâ Consecrationis Eucharistiæ, hoc est, Defensio Ecclesiæ Græcæ contra Romanam*. He had also published in 1705 a beautiful edition of *Bishop Bull's* works (fol.), with notes, for which he received the author's thanks.—Hook, *Ecc. Biog.* v, 347; Herzog, *Real-Encyclop.* v, 310.

**Grace** (Lat. *gratia*; Gr. χάρις; Heb. חַסֵּד and חֶסֶד), a word of various import in Scripture and in theology.

1. *Scriptural Uses*.—(1.) Physical beauty (*grace* of form and person) (Prov. i, 9; iii, 22; xxxi, 30; Psa. xlv, 2, etc.). (2.) Favor, kindness, goodness, benevolence, friendship of God towards men, or of men towards one another (Gen. vi, 8; xviii, 3; xix, 19; 2 Sam. x, 2; 2 Tim. i, 9). (3.) God's forgiving mercy, as gratuitous and opposed to merit (Rom. xi, 6; Ephes. ii, 5; Colos. i, 6, etc.). (4.) The Gospel generally, as contradistinguished from the law (John i, 17; Rom. vi, 14; 1 Pet. v, 12, etc.). (5.) Certain gifts of God, freely bestowed; e. g. miracles, prophecy, tongues, etc. (Rom. xv, 15; 1 Cor. xv, 10; Ephes. iii, 8, etc.). (6.) Christian virtues; e. g. charity, liberality, holiness, etc. (2 Cor. viii, 7; 2 Pet. iii, 18). (7.) The glory to be revealed, or eternal life (1 Pet. i, 13). Wilson (*Bampton Lecture on the Communion of Saints*, Oxford, 1851, 8vo) remarks as follows on the scriptural use of the word: "Χάρις occurs in the Sept. version sixty-six times, of which number it stands sixty-one times for חֶסֶד, and its signification in the New Test. cannot be fairly estimated without reference to the idea expressed by that Hebrew word. This is drawn alto-

gether from Oriental life, and implies properly the good will and inclination of a superior towards an inferior, so much below him as to seek only for a spontaneous and gratuitous favor, or to invite the favor only by his needs, humility, and supplications. The favorable inclination is manifested in a kind of condescending aspect. Hence constantly the phrase 'find favor in the sight of' (רָצוֹן רָצוֹן): compare particularly Numb. vi, 25, 'The Lord make his face to shine upon thee, and be gracious unto thee' (רָצוֹן רָצוֹן). Upon an examination of the use of the words רָצוֹן and רָצוֹן in the Old Test. it will appear that a quality is sometimes implied in the object which has invited the favor of the superior; sometimes the favor is altogether gratuitous; a few instances are subjoined. 1. A quality or antecedent merit is supposed: Gen. xxxii, 5; xxxix, 4, 21; xlvii, 29; 1, 4; 1 Sam. xvi, 22; xxv, 8; 2 Sam. xvi, 4; Esth. ii, 15, 17; v. 2; Prov. i, 9; iii, 22; iv, 9 (in these three places χάρις, *spiritual graces*); Prov. v, 19, *hinnuli gratie*; xiii, 15, *bona mens dat gratium*; xi, 16, *mulier gratie* (ἐὺνοητος); in Nah. iii, 4, *pulchritudo meretricis*. 2. On the other hand, the idea of merit or pleasing quality is excluded in Gen. xxxiv, 11; Exod. iii, 21; xi, 3; xii, 36; Numb. xxxii, 5; Ruth ii, 2; 1 Sam. i, 18; xxvii, 5; Jer. xxxi, 2; but particularly in Exod. xxxiii, 19, where רָצוֹן רָצוֹן רָצוֹן is translated by εὐχαισῶ ὑν ἂν ἐλθῶ; and Psa. li, 3, where, and in other places, רָצוֹן has nearly the meaning of רָצוֹן, to pity and commiserate. רָצוֹן stands for a gift of free love in Psa. lxxxiv, 12; Prov. iii, 34. A merit or pleasing quality in the object is neither excluded nor necessarily implied in Psa. lxxvii, 2, and elsewhere. But some exciting cause of the favor is supposed in Deut. xxvii, 50; 2 Kings xiii, 23; Job xix, 21 (*Have pity on me*); Psa. exxxiii, 6; Prov. xiv, 35; xix, 17 (*He that hath pity on the poor*); xxi, 10; Isa. xxx, 18, 19; xxxiii, 2; Lam. iv, 16; Amos v, 15; Mal. i, 9. But the best illustration of the Hebrew idea of 'grace' will be derived from observing that רָצוֹן רָצוֹן, the form of which implies to make one's self an object of grace, means not to deserve, but to pray; and רָצוֹן רָצוֹן are not merits, but supplications; the humility and abject condition of the suppliant is thus the exciting cause of the favor (1 Kings viii, 33, 47, 59; ix, 3; 2 Chron. vi, 24, 37; Job ix, 15; xix, 16; Esth. iv, 8). רָצוֹן רָצוֹן is sometimes prayer and sometimes the favor gained by it." The word *grace* occurs 128 times in the New Test. (Cruden). Wilson presents all these passages in a tabular form, with explanations, and remarks that a comparison of them will show that "there is not one text in which the word *grace* occurs in any connection with either of the sacraments." See SACRAMENTS.

II. *Theological*.—The word "grace" is the hinge of three great theological controversies: (1) that of the nature of depravity and regeneration, between the orthodox doctrine of the Church and Pelagianism; (2) that of the relation between grace and free will, between the Calvinists and the Arminians; (3) that of means (*media*) of grace, between the Romanists and Puseyites on the one hand and Protestants on the other. For the treatment of the first, see PELAGIANISM; on the second, see ARMINIANISM; ELECTION; PREDESTINATION; WILL. On the third, see SACRAMENTS.

**Grace, LETTERS OF, gratia, gratiosa rescripta**, is the name given to particular rescripts, by which the pope sometimes grants especial privileges, indulgences, exemptions, etc. to all who have participated in extraordinary processions; when a prebend or the reversion of an office is the reward, then the letter of grace constitutes a *gratia expectativa* (see EXPECTANTIE). For the canon law on the subject, see WETZER u. WELTE, *Kirchen-Lex.*

**Grace, MEANS OF.** See MEANS OF GRACE; SACRAMENTS.

**Grace AT MEALS**, a short prayer at table, imploring the divine blessing, and expressing thanks to God for the food he has provided. The propriety of such an act is evident both from the scriptural injunction (1 Cor. x, 31) and from the example of our Lord (Mark viii, 6, 7).

**Gradmontains.** See GRANDMOUNTAINS.

**Gradual**, an anthem, psalm, or part of a psalm chanted in the mass between the epistle and the gospel. So called because the chanter stood on the pulpit steps. The name is also given to the book containing the psalms chanted at mass, which was called *gradale*, or *graduale*.—Palmer, *Orig. Liturg.* ii, 46; Procter, *On Common Prayer*, p. 8, 317.

**Graduate**, one who has obtained a degree in a university: the name is usually given to those who have obtained merely the lowest degree, that of A. B. See DEGREES.

**Græcia.** See GRECIA.

**Graeffe, JOHANN FRIEDRICH CHRISTOPH**, a German philosophical and theological writer, was born at Göttingen Feb. 15, 1754. He studied in the university of that city, became pastor of Oberjesa in 1784, and in 1792 became pastor of a parish and professor of catechetics and of philosophy at Göttingen. He died at Göttingen Oct. 27, 1816. He wrote several works on philosophy and theology, all more or less on the system of Kant. Among them are *Vollständiges Lehrbuch d. allgemeinen Katechetik nach Kantischen Grundsätzen* (Gott. 1795-1799, 3 vols. 8vo);—*Grundsätze d. allgen. Katech. nach Kantisch. Grundsätzen* (Gött. 1799);—*De Miraculorum Natura, philosophie principis non contradicente* (Helmstadt, 1797);—*Commentar über eine der schwersten Stellen in Kants metaphysischen Anfangsgründen d. Naturwissenschaft* (Celle, 1798);—*Die Pastoralthologie nach ihrem ganzen Umfange* (Celle, 1803, 2 vols.).—See Beyer, *Allg. Mag. für Predig.* vol. xii; Doering, *Gel. Theol.* i, 525; Hofer, *Now. Biog. Générale*, xxi, 584.

**Graft** (ἐγκεντρίζω, to prick in or spur on, Wisd. xvi, 11; hence to insert by an incision, Rom. xi, 23, A. V. "graft in"), the process of inoculating fruit-trees, often resorted to in order to preserve the quality of the fruit; by taking shoots or buds from approved trees and inserting them on others, where, with proper precautions, they continue to grow (Rom. xi. 17-24). By this process particular sorts of fruit may be kept from degenerating, which they are very apt to do when raised from the seed; for the grafts, though they receive their nourishment from the stocks, always produce fruit of the same sort as the tree from which they were taken. This process is peculiarly appropriate to the olive-tree (Stuart, *Comment.* ad loc.). An insect of the gnat species is said to breed in the male fig-tree, and, being covered with the pollen of the male flowers, impregnates with it the stigma of the female tree. The flowers of the palm-tree yield fruit only on the female tree, when its stigmata have been fecundated by pollen from the male; and as it is precarious to leave this process to be effected by insects or the wind, it is commonly done by manual labor. See FIG. The Hebrews appear to have pinched off the blossoms of the fruit-trees during the three first years of their growth, in order to improve their fruitfulness (Numb. xviii, 12, 13). See TREE.

**Grafton, JOSEPH**, a highly respected and useful Baptist minister, was born at Newport, R. I., in 1757. His father was a sailor, but abandoned the sea to set up the business of sail-making in Providence. Joseph, at the age of fourteen, began working at his father's trade. He was hopefully converted in 1775, and joined the Congregational Church, which included Baptists dissatisfied with strict communion. He began

preaching in 1776. While preaching to a congregation of "Separates" in Plainfield, Conn., he reconsidered his views on communion, and joined in 1787 the Baptist Church. He was ordained a pastor of the First Baptist Church in Newton, Mass., in 1788, where for nearly fifty years he continued his studies and labors in a successful pastorate and in habitual activity on behalf of missionary and benevolent undertakings. He was actively engaged in founding the theological seminary at Newton, and was for many years one of its trustees. He died in 1836. He published four sermons and some occasional addresses. (L. E. S.)

**Graham, Isabella**, a woman noted for piety and intelligence, one of the "saints" of modern times. She was born in Lanarkshire, Scotland, and was piously educated by her parents, Mr. and Mrs. John Marshall. At seventeen she was admitted by Dr. Witherspoon (afterwards president of Princeton College) to the Lord's Supper. In 1765 she was married to Dr. Graham, and accompanied him to Canada, where his regiment was stationed. Her husband died at Antigua in 1774. She returned to Scotland, and supported her father and her four children by opening a school for young ladies. In 1789 she returned to New York, and opened a seminary. In 1799 a society was instituted at New York for the relief of poor widows with small children. The original plan of the society was formed at the house of Mrs. Graham, and a school for the instruction of orphans was opened, and taught by Mrs. Graham's former pupils. Besides establishing this school, Mrs. Graham selected some of the widows best qualified for the task, and engaged them for a small compensation to open day schools for the instruction of the children in distant parts of the city. She also established two Sunday-schools. In 1806 a society of ladies was organized to procure or build an asylum for orphan children. Mrs. Graham remained in the office of directress of the Widows' Society, but felt also much interest in the success of the Orphan Asylum Society, and herself, or one of her family, taught the orphans daily until the friends of the institution were sufficient to provide a teacher and superintendent. In 1811 some gentlemen of New York established a Magdalen Society, and Mrs. Graham became its president until her death. In 1814 she united with some ladies in forming a society for the promotion of industry among the poor. For some weeks previous to her last illness she was favored with unusual health, and much enjoyment of religion. She died on the 24th of July, 1814. Few books have been more widely circulated than her *Life and Letters* (last ed. London, 1838, 8vo). In America, Dr. Mason's sketch of her has been widely scattered by the Tract Society. See Mason, *Life of Isabella Graham* (N. York, 12mo); Bethune (Mrs.), *Letters and Correspondence of Mrs. Graham* (1838, 8vo); Jones, *Christian Biography*, p. 189.

**Graham, Mary Jane**, was born in London in 1803, and was so carefully educated, and so industrious in study, that she acquired a knowledge of nearly all the modern languages, as also of Latin, Greek, and mathematics. In her eighteenth year she fell into infidel doubts, but soon emerged from them into Christian light and hope. To save others from a like experience, she wrote the *Test of Truth* (London, 12mo, 7th ed. 1852), giving an account of her mental exercises, her infidelity, and her conversion. She also wrote a treatise on *The Freedom and Sovereignty of God's Grace*, published after her death (12mo). Her last years were full of suffering, but she died in great peace and joy at Stoke Fleming, Devonshire, in Dec. 1830. See Bridges, *Life of Mary Jane Graham* (London, 1832, 12mo 1833, 1840, and 1853, 12mo).

**Grain** (occurs only as a rendering of תְּרֹר, *terror*, a small stone or kernel, Amos ix, 9; κόκκος, a berry or individual seed, e. g. of mustard, Matt. xiii, 31, etc.; or wheat, John xii, 24; 1 Cor. xv, 37) is not used in the A. V. in our American collective sense of corn (q. v.) in general, which is the signification of תְּרֵבֶה, or תְּרֵבֶה. The Hebrews planted only wheat, barley, and spelt (comp. Isa. xxviii, 25; Ezek. iv, 9); rye and oats are not mentioned in the Bible (in the Talmud five species of grain are named, Mishna, *Nedar*, vii, 2; and some find even rye and oats in the שְׂבֵלַת שֵׁיטֵל וְהַשֵּׁיטֵל *Menach*, x, 7). On the other hand, some (e. g. Michaelis) think that rice is referred to by תְּרֵבֶה (Isa. xxviii, 25), in opposition to Rosenmüller and Gesenius. As diseases of seed-grain, תְּרֵבֶה קָלִין, *paleness* ("mildew"), and תְּרֵבֶה בִּישָׁן, *blight* ("blasting"), are mentioned. See CEREALS.

**Grál or Grail.** See GRAAL.

**Gramma, Graphè** (γράμμα, γραφή), terms ordinarily used in the ancient Church to signify the Holy Scriptures. They were also occasionally employed as names of the Apostles' Creed, perhaps because it was gathered entirely from Scripture; or else because it was used in reference to the learning of the Creed by the catechumens, just as the word μάθημα, *the lesson*, was used to designate the Creed, because the catechumens were bound to commit it to memory.—Valesius, *Not. in Socrat.* i, 8; Bingham, *Orig. Eccl.* bk. x, ch. iii, § 4.

**Granary.** Originally corn was kept in subterranean storehouses, and even in caverns; but in progress of time granaries were erected, both in Egypt and Palestine. In the former country granaries were often of an extensive character. They were laid out in a very regular manner, and varied of course in plan as much as the houses, to which there is every reason to believe they were frequently attached, even in the towns; and they were sometimes only separated from the house by an avenue of trees (Wilkinson, *Anc. Egypt.* abridgment, i, 13). They had vaulted roofs, and complete arrangements for depositing and removing the grain. Dr. Robinson, when visiting Huj, a village not

Ancient Egyptian Granary, showing how the grain was put in through the top of the bin, c, from a ladder, d, by sacks borne upon the shoulder, c, and the small sliding doors, a, b, intended for taking it out.

far from Gaza, says, "Here were several subterranean magazines for grain, like cisterns, with a mouth like a well, such as we have seen in several villages" (*Eib. Res.* ii, 385). The peasantry in the East generally prefer these subterranean storehouses, not so much for the preservation of the corn as for the greater security against marauding parties, while erected barns are generally confined to more populous districts (Deut. xxviii, 8; Prov. iii, 10; Gen. xli, 35; Exod. i, 11; 1 Chron. xxvii, 25; Luke xii, 18). See GARNER.

**Grandier, URBAIN**, a French priest of the 17th century of unhappy memory. He was educated among the Jesuits, entered the order, and became curé of St. Peter's, and canon of the Holy Cross in Loudun. His preaching became very popular, and not the less so because of his attacks upon the vices of the clergy. Bitter enmities were excited, and he was charged with favoring Protestantism. A manuscript essay against the celibacy of the clergy was found among his papers. He was condemned by the bishop of Poitiers in 1630 to do penance, and interdicted from service as a priest for five years. From this penalty he was freed, on appeal, by the archbishop of Bordeaux. This triumph increased his boldness; he returned to Loudun, and soon got into new trouble. In 1632 the nuns of the Ursuline convent of Loudun became, as they said, possessed with devils; hysterical convulsions and all sorts of extravagances abounded among them. Grandier was charged with "bewitching" them, and sending "legions of devils into their bodies." A libel on cardinal Richelieu, published in 1632, was charged upon Grandier, with no ground whatever. He was arrested and conducted to Angers Dec. 7, 1633. The charges against him were sacrilege, adultery with the wife of a magistrate of Loudun, and with bewitching the Ursuline nuns. The records of the trial are very curious. One of the necessary signs of "possession," according to the Romish law, is the knowledge of languages not acquired in the ordinary way. The exorcist who was appointed to test the nuns asked one of them in Latin "Quem adoras?" She answered, with convulsive contortions, "Jesus Christus." One of the judges could not help remarking, "This devil, at least, does not know syntax." The trial lasted a long time, and ended in the condemnation of Grandier, who was burnt alive Aug. 18, 1634. But the devils still kept possession of the nuns; it was not till Nov. 5, 1635, that "Leviathan" was dislodged from the head of the superior of the convent; and "Behemoth," the strongest of all the demons, stubbornly kept his place till Aug. 15, 1637. The affair, of course, caused immense scandal, and a small library of pamphlets and books was written upon the subject. Alfred de Vigny recounts the story of Grandier at length in his *Cinq-Mars*. A similar trial took place in 1647 with regard to certain cases of possession (or of crime) in the convent of Louviers. See Michelet, *Louis Quatorze*, p. 455 sq.; *Journal des Savans*, Mai, 1689; Audin, *Hist. des Diables de Loudun* (Amst. 1693, 12mo); Bayle, *Dictionnaire*; Hoefcr, *Novæ Biog. Générale*, xxi, 644 sq.

**Grandmont** or **Grammont**, ORDER OF. This religious order was founded by Stephen of Thiers, who in 1076 withdrew to the mountains of Muret, near Limoges, France, to lead an ascetic life. He wore a penitent's shirt made of meshes of steel, and slept in a bed made of boards in the shape of a coffin. His extravagant asceticism found many imitators, who joined him in his retreat. Unwilling to take the title of prior or of abbot, he only called himself their *corrector*. To avert the evils which had ruined so many other monkish orders, he required his followers to make vows of poverty as well as of obedience and humility; and would not even permit them to possess a church or a piece of land. Gregory VII, however, recognised the order only on the express condition of its submitting to the rule of Benedict. It is evident, however, that the founder had more in view than a mere return to the original strictness of the rules. St. Stephen said to his disciples, "When you are asked to what order you belong, answer, to Christianity, which is the mother and the model of all the other orders." Two cardinals who were going to France as nuncios went to visit Stephen in his retreat, and while there happened to ask him whether he considered himself a canon, a monk, or a hermit. "I am none of these," answered Stephen. Being pressed to define more clearly his position and

that of his followers, he said, "We are poor sinners whom God has mercifully called to the wilderness to do penance; and the pope, in compliance with our request, has himself appointed the duties we fulfil here. We are too imperfect and too weak to emulate the example of the saint hermits who were so absorbed in their divine contemplations as to make them forget the natural wants of the body. You see, besides, that we do not wear the habit either of canons or of monks; and we do not desire to be called either, as we are far from having the merits of the one or the sanctity of the others." After the death of their founder (1124) the order withdrew to the wilderness of Grandmont, near Muret, whence they derive their name. Stephen had given them no written code of rules; they were transmitted verbally from one to another, until Stephen of Lisiac, fourth prior of Grandmont, caused to be collected and written all that could be ascertained of the words and acts of their founder. He even represents himself in several instances as the author of the rules. The order of the Grandmontains spread only in France. In 1170 there were sixty convents following their rule, and so great was the respect they had gained that they were generally known under the name of Good Men (*boni homines*). The relaxations which were subsequently introduced in the observance of their rules are to be attributed to the popes. The later history of the order is chiefly a record of quarrels and contentions. It was extinguished in the time of the French Revolution.—Joseph Fehr, *Allgemeine Geschichte d. Mönchsorden*; Herzog, *Real-Encyclop.* v, 315; Butler, *Lives of the Saints*, Feb. 8. (A. J. S.)

**Grange**, a farming establishment, especially such as belonged to ancient monasteries. Most monasteries had farm-houses on their estates, to which were attached chapels, as well as barns and other offices. Many of these buildings, as well as the chapels, were built in fine architectural taste. (G. F. C.)

**Grant, Asahel**, M.D., an American missionary, was born in Marshall, N. Y., August 17, 1807. He early commenced the study of medicine, and at the age of twenty he married and settled in Braintrim, on the Susquehanna; but, losing his wife four years after, he removed to Utica, where he acquired a large and lucrative practice as a physician. The meeting of the American board at this place in 1834 wrought an entire change in his destiny. His attention was strongly directed to foreign missions, and, after carefully considering the subject, he made an offer of his services to Dr. Anderson. Having expressed a preference for the mission contemplated among the Nestorians, he was directed to join Dr. Perkins, who was already on his way to Persia. Accompanied by his second wife, he sailed from Boston May 11, 1835, and on the 27th of October they arrived at Oroomiah, their future home. "The district of Oroomiah is in the western part of Azerbaijan, the ancient Atropatane, and forms the frontier line of Persia in the direction of the Turkish empire. The scenery is unrivalled even beneath a Persian sky." To the missionary the scene was endeared by the most sacred associations. "In the city of Oroomiah, and amid the three hundred villages of the plain, there still lingered the scattered remnant of a once illustrious church—a church which had disputed with Rome herself the spiritual dominion of half the world." See NESTORIANS. When they were first visited by American missionaries, the vast jurisdiction which had once comprehended twenty-five metropolitan provinces had shrunk to a petty sect, hardly able to maintain itself against Mohammedan oppression. The checkered history of the Nestorians had made a deep impression on the mind of Dr. Grant; and being, moreover, buoyed up for the belief that the Nestorians were treasured up for final restoration as remnants of the lost tribes of Israel, he entered upon his work with the utmost zeal. Dr. Perkins was already in the field, and

Mr. Merrick had joined him at Constantinople. Together they commenced the work of establishing the mission. Dr. Grant's character as a physician secured the favor of the Persian governor, and the Nestorian bishops and priests gave him a hearty welcome. A school was at once commenced, and the work soon extended in every direction. (For details, see NESTORIANS.) In 1839 Dr. Grant visited the almost inaccessible region in which the Nestorian patriarch, Mar Shimon, resided. On the sides of the rugged hills of Koordistan, and within their deep ravines, dwelt the "Waldenses of the East—the Protestants of Asia." Among those hills were thousands who had preserved, with few corruptions, an apostolic faith. The difficulties in the way of missionary labor among them were numerous and formidable; but Mr. Grant was not to be deterred, and finally received an invitation from the patriarch, with the promise of a guard through the Koord villages. His fame as a physician had been carried to the mountain districts, and, indeed, his professional character not only gave him many opportunities of doing good, but often saved his life. Dr. Grant remained among them five weeks, gaining all the information he could, and, soon after, his wife's death and the failure of his own health compelled his return to America (1840). In consequence of his report, the board decided at once to establish a mission among the mountains. Being appointed to that work, he returned to his labors in April, 1841. In company with the patriarch, Mar Shimon, he now made an extensive tour through the different villages and districts (1842). A school was opened at Ashita in April, 1843, and Mr. and Mrs. Laurie took charge of the station. Soon after, Dr. Grant ascertained that the barbarous Mohammed, pacha of Mosul, was forming an alliance with the Koords against the Nestorians, who had always before maintained their independence. Dr. Grant was convinced that this independence was now at an end, and tried to persuade them to make terms with the Turks. This the infatuated Nestorians refused to do; but Dr. Grant did not relinquish his hopes of sustaining the mission; and, though abandoned by all his native assistants, when hostilities commenced he hastened with Mr. Stocking to the Persian emir, and gained the promise of his protection. They then proceeded to the patriarch, but all their efforts were unavailing to induce him to unite with the Persians against the Turks and Koords. The infatuated patriarch had entered into correspondence with Mohammed of Mosul. The wily Turk deceived him with promises, and the unsuspecting Nestorians allowed the enemy to close against them without resistance. At last the storm burst, and there ensued such a massacre as has few parallels in history. The bodies filled the valleys and choked the mountain streams. All the efforts of Dr. Grant to avert the catastrophe were useless, though for some time the protection of the emir was observed, and the missionary buildings were left undisturbed. Soon, however, they too were destroyed, and the missionaries fled for their lives. After Dr. Grant reached Mosul, "all his energies were devoted to the work of relieving the wretched fugitives who crowded the city." In the spring he looked forward to a return home, but early in April his health began to fail, and on the 25th he died at Mosul. Dr. Grant published *The Nestorians, or the Lost Tribes, with Sketches of Travel in Assyria, Armenia, Media, and Mesopotamia* (Lond. 1841; Bost. 1843, 2d ed.).—See Lothrop, *Memoir of Asahel Grant, M.D.* (N.Y. 1847, 18mo); Laurie, *Grant and the Mountain Nestorians* (Bost. 1853; 3d ed. 1856, 12mo); Dismar, in *New Englander*, August, 1853, art. vii; Newcomb, *Cyclop. of Missions*, p. 561 sq.

**Grant, Johnson**, an English divine, and an author of some merit, was born in Edinburg in 1773, and was educated at St. John's College, Oxford, where he passed A.M. in 1805. He became rector of Binbrook in 1818; minister of Kentish Town Chapel in

1822; and died in 1845. He was a faithful, and, at the same time, a popular preacher. Among his writings are a *History of the Church of England, and of the Sects which have departed from her* (Lond. 1811-25, 4 vols., 8vo);—*Lectures and Sermons* in six vols. (Lond. 1821-43);—*Sketches in Divinity* (Lond. 1840, 8vo).—Darling, *Cyclop. Bibliographica*, i, 1302.

**Grantham**, THOMAS, an English Baptist minister of distinction, was born in 1633. He was selected to deliver to Charles II the confession of faith drawn up by the Baptists, and also at a later period to present a remonstrance against persecution, both of which were kindly received by the king, and redress of grievances promised. He was often engaged in public disputations, in which he displayed great logical skill. He also had a long controversy with the Rev. John Cennolund, vicar of Norwich, who yet remained his friend through life. Among his writings is *Christianismus Primæivus, or the Christian Religion in its nature, certainty, excellency*, etc., vindicated (Lond. 1678, fol.).—Benedict, *History of the Baptists*, vol. i; Darling, *Cyclop. Bibliographica*, i, 1305.

**Granvelle**, ANTOINE PERRENOT, cardinal, one of the most eminent politicians and diplomatists of the 16th century, was born at Ornans, Burgundy, Aug. 20, 1517. He studied law at Padua, and afterwards theology at Louvain. He became canon of Liege, then bishop of Arras, and was often employed by the emperor Charles V in diplomatic missions. He went with his father to the diets of Worms and Augsburg, and was also present at the Council of Trent, where he defended the rights of the emperor, but vainly endeavored to array the Council against France. After the battle of Mühlberg he managed the capitulation of the electors John Frederick of Saxony and Philip of Hesse, and is said to have altered the articles so that the latter, instead of being free from imprisonment, was rendered liable to it. He was also very active in upholding the Augsburg Interim. In 1550 he became counsellor of state and keeper of the great seal; he accompanied the emperor to Innsbruck, drew up the treaty of Passau in 1552, and in 1553 negotiated underhand for the marriage of queen Mary of England and Philip II of Spain. When Charles V resigned the crown, Granvelle entered the service of his son, Philip II; in 1559 he signed the treaty of Château-Cambresis with France, and afterwards remained in the Netherlands as prime minister and counsellor of Margaret of Parma. Here he shared largely in the persecution of the Protestants, and was very active in strengthening Romanism. He founded 12 new bishoprics. The School of Baius (q. v.) found an earnest and persevering opponent in Granvelle. For these services he was created archbishop of Mechlin by the king, and cardinal by the pope. Being subsequently accused by his enemies of too great leniency towards the Protestants, he left the Netherlands in 1564. He was finally appointed archbishop of Besançon in 1584, and died at Madrid Sept. 21, 1586. His letters and memoirs were collected by abbot Boisot; they form 80 vols. under the title of *Trésor de Granvelle*, in the Archives of Besançon. The most interesting of them are published in the *Documents inédits pour l'hist. de la France*. See Gerlach, *Philip II et Granvelle* (Brussels, 1842); Motley, *History of the Dutch Republic* (N. Y. 1855, 3 vols., 8vo); Prescott, *Hist. of Philip II* (Bost. 1855, 2 vols.). (J. N. P.)

**Grape** is the representative in the A. V. of the following Heb. and Greek words: properly גָּרַב, *gab'*, grapes in the berry (Gen. xl, 10, 11; xlix. 11; Lev. xxv, 5; Numb. vi, 3; xiii, 20, 23; Deut. xxiii, 24; xxxiii, 11, 32; Neh. xiii, 15; Isa. v, 2, 4; Jer. viii, 13; Hos. ix, 10; Amos ix, 13; "wine," Hos. iii, 1); not in the bunch, σάραφλι ("grapes," Matt. vii, 16; Luke vi, 44; Rev. xiv, 18); improperly for σάραφλι, *pe'ret* (lit. *scattering*); grapes that drop off spontaneously (Lev. xix, 10);

grape -gleanings, עֲלֵלוֹת, *olecloth*, (Judg. viii, 2; Isa. xvii, 6; xxiv, 13; Jer. xlix, 9; Obad. 5; Mic. vii, 1); "tender grape," סֵמָדָר, *semadar*, prob. a *vine-blossom* (Cant. ii, 13, 15; vii, 12); *warlike grape*, בֶּ'סֵר, *be'ser* (Job xv, 33), and *sour grape*, בֹּסֵר, *bo ser* (Isa. xviii, 5; Jer. xxxi, 29, 30; Ezek. xviii, 2); *wild grapes*, בְּשִׁימ', *be'shim'* [see COCKLE], a worthless species (French *lambrusques*, so Jerome and Jarchi); not poisonous (Gesenius, in his *Comment. on Isa.* i, 230; ii, 364, has shown that the common sense of *aconitum* or *wolf's-bane*, monk's-hood, rests upon an error of Celsus, *Hiërobot.* ii, 199), Isa. v, 2, 4. See RAISINS; KERNELS; BITTER.

In more than one passage of Scripture grapes are used in a figurative sense, as in Rev. xiv, 18: "Gather the clusters of the vine of the earth; for her grapes are fully ripe;" i. e. the appointed time for the execution of divine vengeance has come, and the iniquities of the inhabitants of the earth have made them fully ripe for destruction. In Mic. vii, 1, the figure is well expressed by Newcome: "As the early fig of excellent flavor cannot be found in the advanced season of the summer, or the choice cluster of grapes after vintage, so neither can the good and upright man be discovered by diligent searching in Israel." So in Jer. vi, 9, an address to the Chaldeans, exhorting them to return and pick up those few inhabitants that were left before, like the grape-gleanings, and to carry them also into captivity. The Chaldeans did so, as may be seen (lii, 28, 29, 30). In Jer. xlix, 9, the meaning is, that when the enemy came to spoil they should meet with no interruption,

Palastine Grapes (of natural size).

but should glean quite clean, and leave nothing behind through haste. (See Blayney.) Ezek. xviii, 2: "The fathers have eaten sour grapes, and the children's teeth are set on edge;" a proverbial expression, explained by the Chaldee, "The fathers have sinned, and the sons are smitten." In the second commandment it is expressly declared that the children should be punished in this life for the idolatry of the fathers. In the destruction by the Babylonians the good were to escape (Ezek. vi, 4, 5); but they were only to deliver themselves (xiv, 14, 20, 21). Whenever the children had suffered temporal evils for the idolatry of their fathers, they had justly incurred a punishment solemnly denounced. With respect to the impending calamity from Nebuchadnezzar, God's purpose was to observe another rule of conduct (Newcome). See VINE.

**Grapheus**, CORNELIUS, was born in 1482 at Aalst, in Flanders. He was secretary of the city of Antwerp, and in 1520 published a translation of Goch's *De libertate christiana*, with a Preface, in which he severely censured the condition of the Roman Catholic Church.

He was consequently arrested (1521), imprisoned at Brussels, compelled to recant, and deposed from his office. The later years of his life he spent in literary retirement at Antwerp, sympathizing with reformatory movements, without, however, daring to be their avowed champion. He died at Antwerp Dec. 19, 1558.—*Herzog, Real-Encycl.* xix, 577. (A. J. S.)

**Grass** is the somewhat indistinct rendering in the Eng. Vers. of several Heb. terms:

1. It is the ordinary rendering of the Hebrew word חֲסִיר, *chetsir'*, which signifies properly an *inclosed spot*, from the root חָסַר, *to inclose*; but this root also has the second meaning *to flourish*, and hence the noun frequently signifies "fodder," "food of cattle." It designates *ripe grass* fit for mowing and for feed, and in this sense it occurs in 1 Kings xviii, 5; Job xl, 5; Psa. civ, 14; Isa. xv, 6, etc. As the herbage rapidly fades under the parching heat of the sun of Palestine, it has afforded to the sacred writers an image of the fleeting nature of human fortunes (Job viii, 12; Psa. xxxvii, 2), and also of the brevity of human life (Isa. xl, 6, 7; Psa. xc, 5). The Sept. renders חֲסִיר by βοτάνη and πῶα, but most frequently by χόσρος, a word which in Greek has passed through the very same modifications of meaning as its Hebrew representative: χόσρος = *gramen*, "fodder," is properly a *court* or *inclosed space* for cattle to feed in (Homer, *Il.* xi, 774), and then any feeding-place, whether inclosed or not (Eurip. *Iph. T.* 134, χόσροι εὐδένχοροι). Gesenius questions whether חֲסִיר, χόσρος, and the Sansc. *harit* = green, may not be traceable to the same root. See LECK.

In the N. T., wherever the word grass occurs, it is the representative of the Greek χόσρος. The dry stalks of grass, etc. were often used as fuel for the oven (Matt. vi, 30; xiii, 30; Luke xii, 28). See FUEL.

2. The next most usual, and, indeed, more appropriate word, is אֲשֵׁר, *de'she'*, green grass, from the root אָשַׁר, *to germinate*. This is the word rendered *grass* in Gen. i, 11, 12, where it is distinguished from עֵשֶׂב, *e'seb*, the latter signifying *herbs* suitable for human food, while the former is *herbage* for cattle. Gesenius says it is used chiefly concerning grass, which has no seed (at least none obvious to general observers), and the smaller weeds which spring up spontaneously from the soil. It properly signifies the first shoots from the earth, *tender grass*, young *herbage*, as clothing the meadows, and as affording the choice food of beasts (Gen. i, 11; Isa. lxvi, 14; Deut. xxxii, 2; 2 Sam. xxiii, 4; Job vi, 5; Psa. xxxvii, 2, etc.). The sickly and forced blades of grass which spring up on the flat plastered roofs of houses in the East are used as an emblem of speedy destruction, because they are small and weak, and, being in an elevated part, with little earth, exposed to the scorching rays of the sun, they soon wither away (2 Kings xix, 26; Psa. cxxix, 6; Isa. xxxvii, 27). (See Hackett's *Illustra. of Scrip.* p. 125.) The Sept. renders it by χλόη, as well as by χόσρος, βοτάνη, and πῶα. In Dan. iv, 15, 20, the corresponding Chaldee אֲשֵׁר, *de'the'*, is used. See HERB.

In Jer. i, 11, the A. V. renders אֲשֵׁר as the *heifer at grass*, and the Sept. ὡς βοῦδία ἐν βοτάνῃ. It should be taken as "as the heifer treading out corn" (comp. Hos. x, 11). אֲשֵׁר, *dasha'*, the word here employed, comes from אָשַׁר, *to triturate*, and has been confounded with the preceding term. See FODDER.

3. אֲשֵׁר, *e'seb*, is used in Deut., in the Psalms, and in the Prophets, and as distinguished from the foregoing אֲשֵׁר, signifies *herbs* for human food (Gen. i, 30; Psa. civ, 14), but also fodder for cattle (Deut. xi, 15; Jer. xiv, 6). It is the grass of the field (Gen. ii, 5; Exod. ix, 22) and of the mountain (Isa. xlii, 15; Prov. xxvii, 25). See HAY.

4. In Numb. xxii, 4, where mention is made of the ox licking up the grass of the field, the Heb. word is קֶרֶךְ, *ye' rek*, which elsewhere is rendered *green* when followed by אֲשֶׁר or אֲשֶׁר־עָשָׂה, as in Gen. i, 30, and Psa. xxxvii, 2. It answers to the German *das Gr ne*, and comes from the root קֶרַךְ, to flourish like grass.—Smith, s. v. See GREEN.

תֶּרֶםֶּ, *le' kesh* (from תֶּרַםֶּ, to be late ripe), in the "after-math" or "rowen" that springs up on meadows after being once mown ("latter growth," Amos vii, 1). See MEADOW.

"Mown grass" is מֶזֶז, *gez*, a mowing or mown meadow (Psa. lxxii, 6; Amos vii, 1). See MOWER.

Dry grass or self-made hay is called חֶשֶׁת, *chash-ash*, "chaff" (Isa. v, 24; xxxiii, 11). See STUBBLE.

As in Matt. vi, 30, where a lily is called "the grass of the field," it is evident that, like the Latin *gramen* and the English "grass," the Hebrew equivalent had a very extensive range, and was not restricted to the "grasses" (*Gramineae*) of the botanist. These are themselves a very ample order, ranging from diminutive plants like our own mouse-ear barley to the bamboo which shoots up to a height of fifty or sixty feet in an Indian jungle, and including productions as various as the *Arundo donax* of Southern Europe, which furnishes the fisherman with his rod and the weaver with his "reed," the cereals which supply to all mankind the staff of life, and the sugar-cane which, on the table of the humblest artisan in Europe or America, places luxuries unknown to a Roman emperor. See REED.

But when we speak of grass we are usually thinking of the narrow blades, so thickset and tender, which form the sward on a meadow, or the matchless turf on an English lawn. Or, if we are thinking of a separate plant, it is a hollow glossy stem rising up from the midst of these spiry blades, and throwing out similar leaves from its joints, till it ends in blossoming spikelets, loose or more compact, which, when the flowering time is over, show the taper corn-like seeds inclosed in the chaffy glumes, and which we destine as food for the cattle, even as we reserve the fruit of the cereal grasses as food for ourselves. The fescues, darnels, and peas, which clothe the meadows and build up the hay-ricks at home, are pigmies, however, when compared with the grass "which grows for the cattle" of other lands; with the "tussac," for instance, whose enormous tufts form an inexhaustible supply to the herds both amphibious and terrestrial of the Falkland Isles, and the beautiful pampas-grass, under which the huntsman can ride and see high overhead its "plume of silvery feathers."

The imperfect enumeration which we possess of grasses native to Palestine is of less importance, as the scriptural allusions may very well be understood without being able to identify the species. The psalmist wishes (Psa. cxxix, 6) that the haters of Zion may be "as the grass upon the house-tops, which withereth afore it groweth up," or, as it should be rendered, "before it is plucked up" (see Hengstenberg, Walford, etc.); and Isaiah (xxxvii, 27) speaks of vanquished populations "as the grass of the field, as the grass on the house-tops, blasted before it be grown up." On the flat roofs at the present day any one may see grass which has sprung up in the rainy season, withered away by the first weeks of sunshine. "When I first came to reside in Jerusalem," says Dr. Thomson, "my house was connected with an ancient church, the roof of which was covered with a thick coat of grass. This being in the way of a man employed to repair my house, he actually set fire to it and burned it off; and I have seen others do the same thing without the slightest hesitation. Nor is there any danger; for it would require a large expense for fuel sufficient to burn the present city of Jerusalem" (*Land and Book*,

ii, 574). Indeed nearer home we may often see grass and even oats springing up on the roof of a thatched cottage, and a goat peradventure nibbling the herbage before it is withered. The dew "distilling" on the grass, and the rain descending on the mown grass, or rather on the grass which has been close-browsed by the cattle, furnish the sacred poetry with a frequent and exquisite image (Deut. xxxii, 2; Psa. lxxii, 6; Prov. xix, 12; Micah v, 7); and still more frequently does that emblem occur in which our fleeting generations are compared to the grass "which in the morning groweth up, and which in the evening is cut down and withereth" (Psa. xc, 6; xxxvii, 2; xcii, 7; cii, 11; ciii, 15; Isa. xl, 6; James i, 10; 1 Pet. i, 24).—Fairbairn, s. v.

Grasshopper is the rendering in certain passages of the Auth. Vers. of three Heb. words: אֲרֶבֶךְ, *arbeh* (Judg. vi, 5; vii, 12; Job xxxix, 20; Jer. xli, 26), a locust (as elsewhere rendered), sometimes a particular species, the migratory kind (Lev. xi, 22; Joel i, 4); גֹּב, *gob* (Amos vii, 1; Nah. iii, 17), a locust in general; חַגָּב, *chagab* (Lev. xi, 22; Num. xiii, 33; Eccles. xii, 5; Isa. xl, 22), a locust (2 Chron. vii, 13), winged and edible (Lev. xl, 22), and therefore evidently not a proper grasshopper. See LOCUST. In Numb. xiii, 33; Isa. xl, 22, this insect is used to express comparative insignificance. In Eccl. xii, 5 reference is probably made to that degree of weakness and infirmity in old age which makes the weight, or even the chirping of this insect, to be burdensome. For the curious illustration of this passage from the fable of Tithonus, see Kitto's *Daily Bible Illustr.* ad loc. See OLD AGE.

The true grasshopper (*Gryllus grossus*) belongs to a tribe of neuropterous insects styled Gryllidæ, and it appears from modern travellers that it is not unknown in Palestine. Its habits greatly resemble those of its congener, the Oriental locust: it has mandibles or jaws peculiarly fitted for devouring green vegetables, and in many parts even of America its ravages often become quite formidable. See INSECT.

Grate (מִקְבָּרִים, *mikbar*'), something twined, from קָבַר, to braid; Sept. ἰσχυρά), a network of brass for the bottom of the great altar of sacrifice (Exod. xxvii, 4; xxxv, 16; xxxviii, 4, 5, 30; xxxix, 39), placed horizontally in the fire-bed so as to allow the cinders, ashes, etc. to pass through, and a draught of air to supply the fire upon it. See ALTAR.

Gratiæ. See GRACE.

Gratian or Gratianus, an Italian Benedictine and distinguished canonist, was born towards the close of the 11th century. He appears to have first entered the convent of Classe, near Ravenna, from whence he removed to that of St. Felix de Bologna, where he wrote his *Decretum*. According to his contemporary, Robert of Mont St. Michel, he became subsequently bishop of Chiusi, which fact is also asserted by an Italian biographer in the 14th century. The latter adds that Gratian, having sent his *Decretum* to the pope by a priest, the latter claimed to be the author of it, but the fraud having been detected, the pope indemnified

Antique representation of an Old Man under the form of a Grasshopper, presenting an offering at the shrine of Venus. From the Florentine collection of Gems.

Gratian by creating him bishop of Chiusi. Many others, before Gratian, had attempted to make a comprehensive collection of the canons issued by the popes and councils. See CANONS AND DECREALS, COLLECTIONS OF. Making special use of the works of Burchard of Worms and of Anselm of Luca, Gratian classified the canons and commented on them. He called his works *Discordantia concordantia Canonum*, but his contemporaries, and especially Alexander III, called it *Decreta*, which was afterwards changed into *Decretum*. The *Decretum* is composed of three parts, called in Gratian's time *De Ministeriis*, *De Negotiis*, and *De Sacramentis*, and subsequently *Distinctiones*, *Causa*, and *De Consecratione*. The first part was divided into 101 *distinctiones* by Paucapalea, disciple of Gratian. The first 20 treat on the subjects and authority of law, the remaining 71 on the details of canonical legislation as regards the appointment, ordination, etc. of the clergy. The second part, divided by Gratian himself into 36 *causae*, treats of the practical application of the law, and is the distinguishing feature of the *Decretum*. In the *Causa*, Gratian was the first to apply the scholastic method to canon law. The third part, treating chiefly on some points of liturgy, was divided into five *distinctiones* by Paucapalea. Gratian's plan, as can be seen, was very inferior; yet the *Decretum* was vastly superior to the collections which preceded it. "Fleury, in his *Troisième Discours sur l'Hist. Ecclesiastique*, says that Gratianus, besides so consolidating the authority of the false decretals that for three centuries after no other canons were referred to but those of his collection, went even further in extending the authority of the pope by maintaining that he was not himself subject to the canons; an arbitrary assertion destitute of evidence, but which contributed to establish in the Latin, or Western Church, a confused notion that the authority of the pope was without bounds. Gratianus also maintained, upon apocryphal or mutilated authority, that clergymen are not subject to secular jurisdiction. This principle is illustrated in a celebrated answer of Innocent III to the Eastern emperor, in which that pope contends that the temporal sovereign has the jurisdiction of the sword over those who bear a sword, that is to say, over laymen only, as no one can be the judge of the servants of another. The grosser errors and the apocrypha of the *Decretum* were corrected and expurgated in the improved edition executed by order of Gregory XIII, 1582; but still many assertions favorable to the absolute supremacy, as well as to the temporal authority of the popes, were allowed to remain in it, as being sanctioned by ages, though contrary to the ancient discipline of the Church. These are what are styled in France, and other countries north of the Alps, the ultramontane doctrines of the Roman Curia." The true reason of its success was its adoption by the school of Bologna as the most comprehensive and systematic collection, and its subsequent adoption in all the schools. This was but right, for Gratian is the real author of the science of canon law, which before him was only incidentally taught in the theological schools. The *Decretum* soon found hosts of commentators. Towards the end of the Middle Ages there were as many glosses and commentaries on the *Decretum* as on the *Pandects*, yet no one had ever thought of verifying the text of Gratian in the original sources from whence they were taken until Pius IV instituted the *Correctores Romani* for that purpose. The work was completed in 1580, under Gregory XIII, and two years after the corrected *Decretum* was published at Rome (fol.) as the first part of the *Corpus Juris canonici*. It is to be found in all the editions of the latter, and has also been often printed separately, sometimes with glosses and sometimes without. The first edit. is Strasburg, 1471, fol. There have been seventy-six others in the space of a century and a half. The best text is in Richter's *Corpus Juris canonici* (Lpz. 1833-39, 4to). Among the commentaries we remark those of Joan. a Turrecre-

mata, *Commentarii super toto Decreto* (Lyons, 1519 and 1520, 3 vols. fol.; Venice, 1578, 4 vols. fol.); Bellemera, *Renissarius, seu commentarii in Gratiani Decretum* (Lyons, 1550, 3 vols. fol.); Berardus, *Gratiani Canones genuini ab apocryphis discreti, corrupti, ad emendatorem collicum julian eacati, difficultiores commoda interpretatione illustrati* (Turin, 1752, 4 vols. 4to). **Gratiānus**, emperor of Rome, son of Valentinian I, was born in 359, and on the death of his father, A. D. 375, succeeded to a share of the Western Empire. On the death of his uncle Valens, A. D. 378, he obtained control of the whole empire; but in 379 he appointed Theodosius his colleague, giving him the Eastern provinces. He was killed A. D. 383, in a revolt in Gaul. Gratian was tolerant towards the various sects which divided Christianity, but he displayed a stern determination against the remains of the heathen worship. At Rome he overthrew the altar of Victory, which continued to exist; he confiscated the property attached to it, as well as the property belonging to the other priests and the Vestals. He also refused to assume the title and the insignia of Pontifex Maximus, a dignity till then considered as annexed to that of emperor. These measures gave a final blow to the old worship of the empire; and although the senators, who for the most part were still attached to it, sent him a deputation, at the head of which was Symmachus, they could not obtain any mitigation of his decrees.—*Engl. Cyclopædia*; Mosheim, *Church Hist.* cent. iv, pt. ii, ch. v, § 15.

**Gratus** (*pleasing*, Græcized Γράτος), VALERIUS, procurator of Judæa from A. D. 15 to 26, being the first appointed by Tiberius, and the immediate predecessor of Pilate (Josephus, *Ant.* xviii, 6, 5). The government of Gratus is chiefly remarkable for the frequent changes which he made in the Jewish high-priests. He deposed Ananus and substituted Ishmael, son of Fabi; next Eleazar, son of Ananus; then Simon, son of Camithus; and lastly Joseph Caiaphas, son-in-law of Ananus (*ib.* 2, 2). He put down two formidable bands of robbers that infested Judæa during his procuratorship, and killed with his own hand the captain of one of them, Simon, formerly a slave of Herod the Great (*ib.* xvii, 10, 6, 7; *War*, ii, 4, 2, 3). Gratus assisted the proconsul Quintilius Varus in quelling an insurrection of the Jews (*War*, ii, 5, 2).—Smith, *Dict. of Class. Biog.* s. v. See JUDÆA.

**Graul**, KARL, D. D., a German theologian, was born Feb. 6, 1814, at Wörlitz, near Dessau. After studying theology at Leipzig, he was for a time tutor in an English family residing in Italy. On his return he was appointed teacher in a school at Dessau, and in 1844 director of the missionary society of Dresden. During his management, which lasted for 18 years, this society had an almost tenfold increase of its annual revenue, and from being a society merely of the little kingdom of Saxony, became a general Lutheran missionary society of Continental Europe. In order to give to the pupils of the missionary seminary an opportunity to attend the lectures of a university, Graul caused, in 1848, its transfer from Dresden to Leipzig. He concentrated

all the efforts of the Church upon the missionary work among the Tamuls in South India, and from 1849 to 1853 made himself a journey through Palestine and Egypt to India, to examine the condition and the prospects of the mission. While in India he devoted a special attention to the study of the language and literature of the Tamuls, as the result of which he published the *Bibliotheca Tamilica* (Leipz. 1854-56, 3 vols.). He also published an account of his journey in 5 vols. (*Reise nach Ostindien*, Leipz. 1854-56). In the question of caste, Graul was opposed to the practice of all the English and American missionary societies, and in favor of tolerating the differences of caste among the Christian converts. He published, in defense of his views, in 1852, a pamphlet in the English language at Madras, and in 1861 another in the German language at Leipzig (*Die Stellung der evangel.-luther. Mission in Leipzig zur ostind. Kastenfrage*, 1861). He resigned his place as director of the missionary seminary at Leipzig, and in 1862 went to Erlangen with a view of connecting himself with the university, but a serious sickness prevented him from carrying out this design. He died Nov. 10, 1861. Of the numerous works of Graul, that which had the greatest circulation was a small treatise on the differences of doctrine between the Christian denominations (*Die Unterscheidungslehren der verschiedenen kirchl. Bekenntnisse*, Lpz. 1845; revised by Harnack, 1867), in which he shows an extreme unfairness in his remarks on Pietists and Methodists. The most noteworthy among his other works is one on Irenaeus (*Die christl. Kirche an der Schwelle des 2ten. Zeitalters*, Lpz. 1860).—Herzog, *Real-Encyklop.* xix, 578. (A. J. S.)

**Grave** (properly קֶבֶר, *ke'ber*, a *sepulchre*; Greek *μνημα* or *μνηματιον*, a *tomb*, as a *monument* [see **TRIAL**]) is also in some passages of the common version the rendering of שְׂדֵה, *sheol'*, ᾠδης, *hadēs* [see **SHEOL**; **HADēs**]; once of שַׁח'אֵת, *shach'ath* (Job xxxiii, 22), the *pit* or open sepulchre, as elsewhere rendered; and once erroneously of בַּיְת, *bei'*, *prayer* (Job xxx, 24). See **TOMB**.

Sepulchres among the ancient Hebrews were, as still among all Orientals (Schweigger, *Reisen*, p. 199; Shaw, *Travels*, p. 192; Hasselquist, p. 35 sq.), outside of cities (see Lightfoot, *Hor. Heb.* p. 167; according to the Talmud, *Baba Bathra*, ii, 9, at least fifty yards distant from the city walls), in the open field (Luke vii, 12; John xi, 39; compare Cicero, *Leg.* ii, 23; *ad famul.* iv, 12, 9; Plutarch, *Arot.* 53; Theocrit. vii, 10; Homer, *Il.* vii, 435 sq.; Michaelis, *Mos. Recht.* iv, 307). Only kings (1 Kings ii, 10; xvi, 6, 28; 2 Kings x, 35; xiii, 9; 2 Chron. xvi, 14; xxviii, 27) and prophets (1 Sam. xxi, 1; xxviii, 3) were allowed to be buried within cities (Harmer, *Obs.* ii, 129 sq.; compare Theuyl. v, 11; Potter, *Gr. Ant.* ii, 427 sq.; when it is said that any one was interred in his house [1 Kings ii, 34; 2 Chron. xxxiii, 20], we must understand the grounds or environs of the house to be meant, i. e. the garden [comp. Numb. xix, 16]; it was otherwise among the ancient Romans, Isidore, *Orig.* x, 2). Generally the graves were pits or grottoes (Gen. xxiii, 17; xxxv, 8; 1 Sam. xxxi, 13; 2 Kings xxi, 18, 26; John xix, 41; comp. Strabo, xiv, 636; Virgil, *Æn.* xi, 851), shady spots under trees or in gardens being preferred (Eck, *De sepulchris in hortis*, Meining, 1738 sq.; Walch, *Observ. in Matt. ex inscript.* p. 89); and these excavations were either natural, with which Palestine abounds [see **CAVE**], or often artificial, dug for this purpose (and walled up; see Knobel, *Jesa.* p. 99), or hewn in rocks (Isa. xxii, 16; 2 Chron. xvi, 14; Matt. xxvii, 60; John xi, 38; Luke xxiii, 53), sometimes very spacious and with numerous side-passages and chambers (*Baba Bathra*, vi, 8); there are also instances of graves sunk perpendicularly in the ground (Luke xi, 44), and such were occasionally situated on hills (2 Kings xxiii, 16; comp. Isidore, *Orig.* ii, 11). Not only in the case of

kings and nobles (2 Kings ix, 28; 2 Chron. xxxii, 33; xxxv, 24; 1 Macc. ii, 70; ix, 19; xiii, 25, etc.), but in every good family (Gen. xxiii, 20; Judg. viii, 32; 2 Sam. ii, 32; 1 Kings xiii, 22; Tobit xiv, 12; 1 Macc. ii, 70), were there hereditary vaults (it was a deep disgrace to the remains of persons of distinction to be buried among those of the populace, Jer. xxvi, 23); and it appears the very natural desire of those dying abroad to repose in such family cemeteries (Gen. xlvii, 29; 1, 5; 2 Sam. xix, 37; 1 Kings xiii, 22, 31; Neh. ii, 3; comp. Sophocles, *Electra*, 1131 sq.; *Anthol. Gr.* ii, 25, 75; Justin. iii, 5; see Zeibich, *De sepultura in terra sancta a Jacobo et Josepho expetita*, Viteb. 1742; Semler, *De patriarcharum ut in Palest. spelæventur desiderio*, Halle, 1756; Carpozov, in Ugolini *Thesaur.* xxxiii). But whoever had not such a hereditary sepulchre wished none the less to rest in the land of his fathers (2 Macc. v, 10), in the sacred soil (Josephus, *Ant.* x, 4, 3). For the poor were (later) public burial-places assigned (Jer. xxvi, 23; 2 Kings xxiii, 6; comp. Matt. xxvii, 7). As a protection chiefly against the carnivorous jackals (Pliny, viii, 44), the graves were closed with doors or large stones (Matt. xxvii, 60; xxviii, 2; John xi, 38); and in the month Adar (March), after the rainy season (*Shekal.* i, 1), they were (in the post-exilic period) whitewashed afresh (*Maaser Shenit*, v, 1), in order to warn the great multitudes of strangers visiting the Passover against contact (Matt. xxiii, 27; see Lightfoot and Schöttgen, *ad loc.*; comp. Walch, *Observ. in Mt. ex inscr.* p. 65 sq.; and Reusstech, *De sepulchris calce notatis*, in Ugolini *Thesaur.* xxxiii), which caused pollution (Numb. xix, 16; comp. Josephus, *Ant.* xviii, 2, 3). There are still many such sepulchral grottoes in Palestine, Syria, and Idumea generally (see Pococke, *East*, ii, 70, 100, etc.; Burekhardt, i, 220 sq.; Robinson, i, 78 sq.; ii, 175 sq., 663; iii, 317, 692). They descend sometimes vertically, sometimes horizontally in the earth, the former by steps. Within are usually found several chambers or apartments, of which one sometimes lies deeper than another. Most of them have on the side-walls cells, six to seven feet long, in which the bodies are deposited. Among those found at Jerusalem, for which tradition assigns special names and origin, are the *Sepulchres of the Kings* (perhaps derived from 2 Chron. xxi, 20; xxviii, 27; compare Neh. iii, 16; Acts ii, 29; see Niebuhr, *Travels*, iii, 63; Rosenmüller, *Alterth.* II, ii, 269 sq.; Robinson, i, 398 sq.; ii, 183; compare Hottinger, *Cippi Hebraici*, Heidelb. 1659 [also in Ugolini *Thesaur.* xxxiii]). They consist of an anteroom and seven chambers, lying on the north of the city, east of the main road to Nablus, and seem to have belonged to the nobility, and not merely, if at all, to the ancient Jewish kings. See **JERUSALEM**. Far more imposing are the sepulchres of Egypt, and especially celebrated by the ancients is the tomb of king Osymandyas (Diod. Sic. i, 47 sq.), of which the ruins are still extant (Pococke, i, 159). Above the tombs were from the earliest times erected monuments (Gen. xxxv, 20. קֶבֶר וְזָכָר, as often on the Phœnician grave-stones), originally of rough stone or earth (Job xxi, 32; comp. Homer, *Il.* xxiii, 255 sq.; Virgil, *Æn.* vi, 365), later in the form of splendid mansions (1 Macc. xiii, 27 sq.; Josephus, *Ant.* vii, 10, 3; xx, 4, 3; comp. Pausanias, viii, 16, 3; see Salmasius, *ad Solin.* p. 851; Zorn, in the *Nov. Miscell. Lips.* v, 218 sq.) with various devices (? 2 Sam. xviii, 18). To open a grave forcibly in order to abstract the ornaments (Josephus, *Ant.* xv, 3, 4; xiii, 8, 4), weapons (Ezek. xxxii, 27; 1 Macc. xiii, 29; Curtius, x, 1, 31), or other articles deposited with the body (comp. Sept. Vat. at Josh. xxiv, 30; Jerome, *ad Jer.* vii; Rosenmüller, *Morgenl.* iii, 10), or even the bones of the interred, was in all antiquity regarded as a shameful piece of barbarity (Jer. viii, 1; Baruch, ii, 24; comp. Diod. Sic. iii, 86; xv, 63; see Wächter, *Ueber Ehescheid. bei d. Röm.* p. 209 sq.; Abegg, *Straf-*

*rechtsweßs.* p. 726 sq.). That the relics of the dead were thus pillaged for magical purposes (Apul. *Metam.* ii, p. 38, Bip.; Horace, *Epod.* xiv, 47 sq.; Lucan, vi, 533; comp. Brouckhus. *ad Tibull.* i, 2, 47 sq.) does not appear very clearly from Isa. lxxv, 4. There are scriptural traces of the popular idea that graves were the residence of demons (comp. Matt. viii, 28), who were perhaps connected with soothsaying (Acts xvi, 16); others, however, refer such allusions to the superstitious notions respecting offering to the manes of the departed (*inferie, februationes*; compare Athen. iii, 98; Macrobi. *Sat.* i, 13, p. 263, Bip.; Barhebr. *Chron.* p. 256), or a species of necromancy practised in such spots (see Gregor. Nazianz. *Or. in Julian.* p. 91; Otho, *Lex. Rabb.* p. 171). The graves of the prophets and holy persons were (in post-exilian times) sedulously repaired and adorned (Matt. xxiii, 29; see Schöttgen, *Hor. Hebr.* i, 205; Eckhard, *De adificatione et exornatione sepulcrorum*, Jena, 1746), a tribute of reverence (and eventually of grateful reparation, Matt. xxiii, 30 sq.), which was not unknown likewise in Greek antiquity (Elian, *Var. Hist.* xii, 7; Diod. Siculus, xi, 33; Athen. xiii, 593; Suetonius, *Octav.* xviii; the Greeks even anointed the tombs of honored men, Plutarch, *Alex. c.* 15), and still general in the East (Kämpfer, *Amen.* p. 109 sq.; Robinson, ii, 708). See generally Nicolai, *De sepulcris Hebr.* (L. B. 1706; also in Ugolino, xxxiii); Fuhrmann, *Hist. Untersuch. üb. der Begräbnisplätze der Alten* (Halle, 1800).—Winer, i, 443. See SEPULCHRE.

**Gravel** (גַּרְבֵּל, *chatsats'*, something broken off small; gravel-stone, Prov. xx, 17; Lam. iii, 16. In Psa. lxxvii, 7, גַּרְבֵּלֵי אֵשׁ, "thine arrows," is regarded by Fürst as a reduplicative form from גַּרְבֵּל; in Isa. xlviii, 19, גַּרְבֵּלֵי אֵשׁ, erroneously "the gravel thereof," is undoubtedly the same as in גַּרְבֵּלֵי אֵשׁ preceding, and stands elliptically for "[the issue of] its bowels," sc. the sea's, i. e. the fish that spawn so numerously), comminuted rock, coarser than sand, but smaller than stones, forming a large part of what is known geologically as "drift" or diluvium over the surface of the earth. See LAND.

**Graven Image** (פֶּסֶל, *pe'sel*, plur. פְּסֵלִים, *a carrying*). From the passage in Deut. xxvii, 15, "Cursed be the man that maketh any graven or molten image, an abomination unto the Lord, the work of the hands of the craftsman, and putteth it in a secret place; and all the people shall answer and say, Amen," we may fairly infer with Michaelis, in his *Commentaries on the Laws of Moses*, that there was a marked distinction between idols and images, or rather between idolatry and image-worship, which appears to have prevailed from the earliest times. See IDOL. *Pesel*, or graven image, seems to refer to the household gods; an idol is termed פֶּסֶלֵי, *elil'*, and in some places פֶּסֶלֵי, *he'bel*, both words having a similar signification, that of "vain, null, void." The distinction is particularly marked in Psa. xc, 7: "Confounded be all they that serve graven images, that boast themselves of idols." Jahn says (*Archæol.* § 400), "Every nation and city had its own gods, which at first had acquired some celebrity by the worship of some particular family merely, but were at length worshipped by the other families of that town or nation, yet every family had its separate household or tutelary god. No one felt himself bound to worship every god, but paid his honors, as he chose, to those he deemed most propitious or most powerful. But still he did not think it advisable wholly to neglect other gods, lest perchance, thinking themselves contemned by such neglect, they should revenge themselves by sending some evil retribution." (See Keinecius, *De non faciendis sculptilibus*, Weissenfels, 1724.) See TERAPHIM.

"There has been a good deal of discussion as to the

extent of the prohibition contained in the second commandment; some (including early Jewish commentators) have contended that all imitative art was forbidden: against this extreme view Michaelis protests (*Laws of Moses*, art. 250), on the reasonable ground that certain figures were in fact made by God's own command. Both in the Tabernacle and the Temple many objects were provided which would put under contribution largely the arts of carving and engraving, e. g. the two cherubim in the holy of holies (Exod. xxv, 18, 20); the floral ornaments of the golden candlestick (xxv, 34); the various embroidered hangings of the sanctuary (ch. xxvi); and the brazen serpent (Numb. xxi, 8, 9). So again in the Temple, besides the cherubim, there were on the walls various figures of all kinds, as well as the brazen sea, as it was called, which rested on twelve brazen oxen. Ezekiel's temple, in like manner, has cherubim with the heads of men and lions. Even after the return from Babylon, when men severely interpreted the prohibition of the commandment, there were figures of animals on the golden candlestick (Reland, *De Spoliis Templi Hier. in Arcu Titiano*), and vines with pendent clusters on the roof of the second Temple, and the golden symbolic vine over the large gate. Not the making of images as works of art, but the worship of them, was excluded by the Decalogue. Among the Mohammedans, the more liberal Persians (followers of Ali) allow themselves the fullest latitude, and paint and mould the human figure, while their stricter rivals confine their art to representations of trees and fruits, or inanimate objects; but all alike abhor all attempts to represent God, or even their saints (Kitto, *Pictorial Bible*, Deut. v, 8, 9). There were, however, from whatever cause, limitations in fact, which the artisans who ornamented the Tabernacle and the Temple observed. In the former, nothing is mentioned as fabricated of iron; nor is skill in manipulating this metal included among the qualifications of the artificer Bezaleel; while 'in the Temple there is no mention made of sculptured stones in any part of the building. All the decorations were either carved in wood and then overlaid with metal, or wholly cast in metal. Even the famous pillars of Jaclin and Boaz were entirely of brass' (Kitto on 2 Chron. iii, 6). The qualifications of the accomplished men who built the Tabernacle (Bezaleel and Aholiab) and the Temple (Hiram) are carefully indicated; to the former, especially Bezaleel, is attributed skill in 'carving' and 'sculpture' (Exod. xxxi, 5), whereas the latter seems to have rather executed his decorative works by fusile processes (comp. 1 Kings vii, 14, 15 with 46; Müller's *Ancient Art*, by Leitch, p. 216; and De Wette's *Archæol.* § 106") (Kitto, s. v. Carved Work). See GRAVING.

**Graverol**, JEAN, a French Protestant theologian, was born at Nismes, July 28, 1647 (Sept. 11, 1636, according to Graverol de Floghrevat). After studying theology at Geneva, he was appointed minister of Pradel (Vivarais) in 1671. In 1672 he removed to Lyons. After the revocation of the edict of Nantes he went to Holland, remained a while in Amsterdam, and finally went to take charge of a French congregation in London. He died there in 1730, according to Menard; in 1718, according to Watt. He wrote *De Religionum Conciliatoribus* (Lansanne, 1674, 12mo, under the pseudonym of J. Rolegravius):—*L'Église protestante justifiée par l'Église romaine sur quelques points de controverse* (Geneva, 1682, 12mo, Anon.):—*Projet de réunion entre les protestants de la Grande-Bretagne* (Lond. 1689, 8vo):—*Moses vindicatus adv. Th. Burnetii archeologias philosophicas* (Amst. 1694, 12mo):—*Des Points fondamentaux de la Religion chrétienne* (Amst. 1697, 8vo). See Moréri, *Dict. hist.*; Bayle, *Œuvres diverses*, iv, 605 and 610; Michel Nicholas, *Hist. littér. de Nismes*, vol. ii; Haag, *La France Protestante*; Hoefler, *Nouv. Biog. Générale*, xxi, 746.

**Graves**, Hiram Atwill, a Baptist pastor and

writer, was born at Wendell, Mass., in 1813. In boyhood he was a precocious student. He graduated at Middlebury College, Vt., in 1834. On account of impaired health he did not pursue a regular course of study for the ministry, but was ordained in 1837 at Springfield, Mass. He became in 1840 pastor of a church in Lynn, and in 1842 editor of the *Christian Reflector*, a paper which has since, in conjunction with another, become a journal of extensive influence. Infirm health sent him to Cuba in 1845, and to reside in Jamaica in 1846-49. He returned without essential benefit, and died in 1850. He was author of *The Family Circle:—The Attractions of Heaven*. (L. E. S.)

**Graves, Richard, D.D.**, a learned Irish divine, was born at Kilfinnan, Limerick, Oct. 1, 1763, and was educated at Trinity College, Dublin, of which he became fellow in 1786. In 1813 he became dean of Ardagh, and regius professor of divinity. He died Mar. 29, 1829. Horne pronounces his *Lectures on the Pentateuch* (1807, 2 vols. 8vo) "indispensably necessary to the Biblical student." Besides that learned work, which passed through several editions, he wrote *The Apostles and Evangelists not Enthusiasts* (1798)—*Scriptural Proofs of the Trinity* (four discourses)—*Absolute Predestination compared with the Scripture statement of the Justice of God:—Predestination repugnant to the general tenor of Scripture* (Lond. 1825, 8vo). These, with a number of *Sermons*, are given in his *Whole Works now first collected* (London, 1840, 4 vols. 8vo), of which vol. i contains a memoir of his *Life and Writings* by his son, R. H. Graves, D.D.

**Graving.** There is much indistinctness in the terms of this ancient art of the Jews, arising from the fact that one and the same artisan combined, in skill and practice, many branches, which the modern principle of "division of labor" has now assigned to different pursuits. Thus Aholiab was not only "an engraver," but also "a cunning workman" in general art, "and an embroiderer in blue, and in purple, and in scarlet and fine linen" (Exod. xxxviii, 23). In like manner Bezaleel is described as accomplished "in all manner of workmanship; and to devise curious works, to work in gold, and in silver, and in brass, and in the cutting of stones to set them, and in carving of wood, to make any manner of cunning work" (Exod. xxxv, 31-33). These numerous gifts they both possessed and practiced themselves, and imparted to others; so that they formed an early school of art to supply the demand created by the institution of the Mosaic ritual, the members of which school were as comprehensive in their attainments as their great teachers (Exod. xxxv, 34; xxxvi, i, 2). The same combination of arts seems to have characterized the later school, which was formed under the auspices of David, when preparing for the erection of the Temple (1 Chron. xxii, 15; xxviii, 21). Many of these artificers were Phœnicians, whom the king had invited to his new capital (2 Sam. v, 11; 1 Chron. xiv, 1). In the next reign, Hiram, to whose genius the Temple of Solomon owed much of the beauty of its architectural details, as well as its sacred vessels (1 Kings vii, 15-45), was a native of Tyre, the son of a Tyrian artificer by an Israelitish mother. This man's skill was again as comprehensive as that of his great predecessors (v, 14).

1. חֲטָטָב, *chatsab*, although once in the A. V. (Job xix, 24) translated "graven" (with an undoubted reference to the ancient art of engraving), is generally used to indicate the rougher work of *hewing* stone or wood, in quarry or forest. In Prov. ix, 1, indeed, it is applied to the finer art of *hewing* or fashioning pillars; but its usual objectives of חֲטָט (cistern, Jer. ii, 13), סֶפֶלֶת (sepulchre, Isa. xxii, 16), כֶּסֶף (wine-press, Isa. v, 2), prove that חֲטָט has to do with rougher operations than those which fall under our idea of "engraving."

(But see below, under חֲטָט.) This word is *contrasted* with

2. חֲרָשׁ, *charash'* (or, as it once occurs, חֲרָשׁ, *charath'*, in Exod. xxxii, 16), which is used to describe "engraving" in Jer. xvii, 1. In Gen. iv, 22 the participial derivative of this root is employed in the description of Tubal-cain, the Biblical progenitor of all artificers of the kind indicated in this article. But it is less in the verbal forms than in the noun חֲרָשׁ that this word expresses the art before us. As a noun it occurs more than thirty times, and is rendered variously in A. V. ("engraver," "craftsman," "smith," "artificer," etc.). Though it indicates artistic work by *fine* instruments, in metal, wood, and stone, and is thus opposed to the rougher operations of חֲטָט, it yet includes other usages, which remove it from the specific sense of our art. (Thus, while with חֲרָשׁ alone, Exod. xxviii, 11, it may well refer to the fine work of the *engraver in stone*, yet in the phrase חֲרָשׁ חֲרָשׁ, literally, *hewer of the stone of the wall*, 2 Sam. v, 11; or more simply חֲרָשׁ חֲרָשׁ [workers of wall], 1 Chron. xiv, 1, it can hardly describe a higher art than what is attributed to it in A. V.—that of the ordinary "mason;" similarly with חֲרָשׁ חֲרָשׁ, timber, it points to the work of the "carpenter," 1 Chron. xiv, 1, etc.; and with חֲרָשׁ חֲרָשׁ, iron, to that of the "smith" or iron-founder.) The prevalent idea, however, of חֲרָשׁ is the subtle work of the finer arts; and with this well agree such passages as Prov. vi, 18, where the word describes the "heart that deviseth wicked imaginations," and 1 Sam. xxii, 9, where it is predicated of Saul, "secretly practising mischief" (Hiiph. part. חֲרָשׁ חֲרָשׁ). Gesenius (*Theol. Heb.* p. 529) has collected instances of the like meaning of the word in the other Shemitic languages, and compares it with the "doli fabricator" of Virgil, *Æneid*, ii, 264; and the cognate phrases, "fabricare quidvis," Plautus, *Asin.* i, 1, 89; and εὐδολον τέλειον, κακὰ τέλειον, of Hesiod and Homer, and τεκταίνεσθαι μίτην, *Iliad*, x, 19. In connection with the word חֲרָשׁ, we have in 1 Chron. xiv, 14, an indication that, even in early times, encouragement was given to associations of art among the ancient Jews, by providing for their members a local habitation in which to pursue their calling, which is proved to have been an *honorable* one from the illustrious names that are associated with its pursuit (ver. 13, 14). From this passage (of ver. 14, compared with ver. 21 and 23), we further learn that the various arts were *hereditary* in certain families. (The word "stone-squarers," in 1 Kings v, 18, is a different term. See GIBLITE.)

3. חֲכָלֵךְ, *chakal'*, describes a branch of art which more literally coincides with our idea of engraving. In Ezek. iv, 1 the word is used of engraving a *plan* or *map*; in Job xix, 23, of inscribing upon tablets (of stone or metal), a very early instance of art; similarly in Isa. xxx, 8; while in Ezek. xxiii, 14 (חֲכָלֵךְ חֲכָלֵךְ) the word seems to indicate painting, *portraying in colors* (חֲכָלֵךְ חֲכָלֵךְ); and the addition of חֲכָלֵךְ חֲכָלֵךְ, upon the wall, raises the suspicion that *fresco* art, which was known to very ancient nations, including the Egyptians, was practiced by the Babylonians, and admired, if not imitated by the Jews; comp. ver. 14, 15, 16. (On the art of coloring as known to the Assyrians, Egyptians, Greeks, etc., see Sir G. Wilkinson, *On Color and Taste*, p. 153.) The Sept. renders the remarkable phrase before us, ἰσχυροῦς ἐν γραφῆτι, without specifying color; but Symmachus, the Vulgate, the Peshito, and the Chaldee paraphrase all include in their versions the express idea of color. The idea of *careful* and *accurate art* which is implied in the term under consideration imparts

much beauty to the passage in Isa. xl, 16, "Behold, I have graven thee upon the palms of my hands," where the same word is used. (There is here an allusion to the Eastern custom of tracing out on the hands the sketches of eminent cities or places, and then rubbing them with the powder of the *hemah* or cypress, and so making the marks perpetual. Maundrell (*Journey from Aleppo to Jerusalem*, p. 100 [London, 1810]) describes the process of "pilgrims having their arms and hands marked with the usual ensigns of Jerusalem." See also Rosenmüller, ad loc., and J. D. Michaelis, *Nota in Loethii Prælect.* [Oxford, 1821], p. 501, 502; and Burder's *Oriental Customs* [Lond. 1840], p. 149.) The second clause of this passage, "Thy walls are continually before me," may be compared with Isa. xxii, 16, where our verb קָרַח is also employed to describe the engraved plan or sketch of a house for architectural purposes. Among other applications of the art indicated by this word may be mentioned monumental stones, such as the קָרַח־בְּרֵיחַ of 1 Sam. vii, 12, with suitable inscriptions; see especially Deut. xxvii, 2-8.

4. In קָרַח, *pasal'*, and its noun קָרַח־פֶּסֶל (*pasel'* (always rendered in A. V. "graven image"), we have the operation rather of the sculptor's or the carver's art than the engraver's. In several passages of Isaiah (xxx, 22; xl, 19; xli, 7; xlv, 12-15) curious details are given of the fabrication of idols, which afforded much employment to the various artificers engaged in the complicated labor of image-manufacture (see also Jer. x, 3-9, from which it would seem that the wrought and prepared metal for covering the idol was imported, and put on by Jewish artisans). Working in ivory was common to the ancient Egyptians (Wilkinson's *Anc. Egyptians*, iii, 169), the Assyrians (Layard's *Nineveh*, ii, 420), the ancient Greeks (Grote's *Greece*, vi, 30-32), and the artificers of Jerusalem (Solomon's ivory throne, 1 Kings x, 18; ivory palaces, Psa. xlv, 8; ivory beds, Amos vi, 4) and of Samaria (Ahab's ivory house, 1 Kings xxii, 39; which was not an uncommon luxury, Amos iii, 15). No doubt the alliance of the royal houses of Israel and (indirectly) of Judah with the Phœnician monarch (1 Kings xvi, 31) was the means of attracting many of the artificers of Tyre, and Sidon, and Gebal to the metropolis of each of the Jewish kingdoms; both in Solomon's time and in Ahab's, ivory-sculpture was probably a Phœnician art. The neighboring idolators, whose example was so disastrous to Israel, were skilled in image-manufacture. From Deut. vii, 25 it appears that the body of the idol was of sculptured wood, overlaid with one or other of the precious metals. The passage, 1 Sam. vi, 2-12, seems to prove that the Philistines had artificers in the precious metals capable of forming the figures of small animals; and their idols that were taken from the spoils of the great battle of Baal-perazim were probably graven of wood (1 Chron. xiv, 12).

5. קָרַח־בְּרֵיחַ, *pathach'* (in Piel and Pual), is perhaps distinguished from the term we have just considered (קָרַח) by being used to describe figures in relief rather than statues, such as the cherubic figures on the walls of the Temple (see 1 Chron. iii, 7). Compare the cognate noun קָרַח־בְּרֵיחַ, *pitlu'ach*, engraved figure, in 1 Kings vi, 29, which passage informs us that the Temple walls were lavishly adorned with these figures, standing out probably in various degrees of relief (see also other but similar work, described by this verb, 1 Kings vii, 36). The chief application, however, of the word is to the cutting and engraving of precious stones and metals (*intaglio* work, as distinguished from the raised work of *cameos*, etc.), such as the breastplate of the high-priest (Exod. xxviii, 9-11, 21), and the plate of his mitre (ver. 36, 37). The mystic engraving of Zech. iii, 9 is likewise described in the same terms. The splendid jewelry of Solomon's time, as referred to in

the Canticles, i, 10, 11, is best classed under the art indicated by קָרַח and its derivatives. From Isa. iii, 18, 24, it appears that this art of the goldsmith continued rife in later reigns, and was not unknown even after the captivity (see Zech. vi, 11). The neighboring nations were no less skilled in this branch of art; for instance, the *Egyptians*, Exod. xii, 35, compared with xxxii, 2, 3; the *Canaanites*, Josh. vi, 19; the *Midianites*, Numb. xxxi, 50, and (afterwards) Judg. viii, 24-26; the *Ammonites*, 1 Chron. xx, 2; the *Syrians* of Zobab and Hamath, 2 Sam. viii, 7-11.

6. קָרַח־בְּרֵיחַ, *miklu'ath*, like our last term of art, describes sculpture in relief (First, *Hebr. Wörterb.* i, 780); it occurs 1 Kings vi, 18, 29 ("carved figures" of cherubims), 32; vii, 31 ("gravings").

7. קָרַח־בְּרֵיחַ, *che'ret*, occurs only in Exod. xxxii, 4 (A. V. "a graving tool"), and in Isa. viii, 1 (A. V. "a pen"). This was rather the *scalpurn fabrilis* of the Romans (Livy xxvii, 49) than the *stylus* (see Smith's *Dict. of G. and R. Antiq.* s. v. *Sculptura*). For two other opinions as to the meaning of קָרַח־בְּרֵיחַ in Exod. xxxii, 4, see Gesenius, *Thes.* p. 520.

קָרַח־בְּרֵיחַ, *et* (which in Psa. xlv, 2 and Jer. viii, 8, means a writer's style or reed), has the same meaning as the previous word in the other places of its occurrence (Job xix, 24; Jer. xvii, 1); here it has the epithet קָרַח־בְּרֵיחַ, i. q. "pen of iron." The occurrence of קָרַח־בְּרֵיחַ in Job xix, 24, imparts to the קָרַח־בְּרֵיחַ the idea of a finer art than is usually expressed by that verb (see De Sauley's *Hist. de l'art Judaique*, Paris, 1858).—Kitto, s. v. *Engraving*. See CARVE.

**Gray** (some form of the root קָרַח־בְּרֵיחַ, *sib*), applied to the hair as an indication of *old age* (q. v.), which in the East is universally respected (Prov. xx, 29). See HAIR.

**Gray Friars.** One of the mendicant orders, otherwise called Franciscans, Minorites, etc. The name was given from the color of the dress which they wore. See FRANCISCANS.

**Gray, James, D.D.**, a minister of the Associated Reformed Church, was born at Corvoam, Ireland, Dec. 25, 1770. He entered the college of Glasgow in 1790; graduated in 1793; afterward studied theology under the Rev. John Rogers, and was licensed by the Presbytery of Monaghan. In 1797 he sailed for America. After laboring with great acceptance at Washington, N. Y., until 1803, he accepted a unanimous call to the Spruce-street Church, in connection with the Associate Reformed Synod, Philadelphia. In 1805 he received the degree of D. D. from the University of Pennsylvania. He was one of the most important agents in establishing the theological seminary of the Associated Reformed Church in the city of New York. In 1808 he took an active part in the organization of the Philadelphia Bible Society, and was for a long time its corresponding secretary. At this time, in connection with Dr. S. B. Wylie, he opened a classical academy, which soon obtained great repute. After several years of this labor he resigned the school, and also his pastoral charge, and removed to Baltimore, where he devoted himself especially to the study of certain points in theology until his death, which occurred at Gettysburg, Pa., Sept. 20, 1824. His literary reputation rests chiefly on his *Mediatorial Reign of the Son of God*. He also edited for one year a *Theological Review*, and published several *Occasional Sermons*.—Sprague, *Annals* (Associate Ref.), ix, 94.

**Gray, Robert, D.D.**, bishop of Bristol, was born at London in 1762. He studied at Eton and Oxford, took orders, and became successively vicar of Farrington (Berkshire), rector of Craik (Yorkshire) in 1802, and canon of Durham in 1804. His benevolence, and the talents evinced in his works, caused him to be appoint-

ed by lord Liverpool's cabinet to the bishopric of Bristol in 1827. He was very popular in this position, and the duke of Wellington offered him the see of Bangor. He declined, and died soon after at Rodney House, Sept. 28, 1834. He wrote: *Key to the O. T. and Apocrypha*, or an account of their several books, their contents, and authors, and of the times in which they were respectively written (Lond. 1790, 8vo; 9th ed. 1829, 8vo):—*Discourses illustrative of the Evidence, Influence, and Doctrines of Christianity* (Lond. 1793, 8vo):—*Sermons on the Principles of the Reformation of the Church of England* (Baumton Lecture, 1796, 8vo):—*The Theory of Dreams* (Lond. 1808, 8vo):—*The Connection between the sacred Writings and the Literature of Jewish and heathen Authors, etc., with a View to Evidence in Conformation of the Truth and revealed Religion* (Lond. 1819, 2d ed. 2 vols, 8vo).—Rose, *New General Biograph. Dict.*; Hoefel, *Nouv. Biog. Générale*, xxi, 760; Darling, *Cyclop. Bibliographica*, i, 1309.

**Grease** (גֶּרֶס, *che'leb*, Psa. cxix, 70, fat [q. v.], as elsewhere rendered).

**Great Britain** AND IRELAND, THE UNITED KINGDOM OF, is, since the union of Ireland, the full official designation of the country more generally known as Great Britain, Britain, or the United Kingdom. It includes the two large islands of Great Britain (England and Scotland) and Ireland, and the adjacent smaller islands, together with the Channel Islands and the Isle of Man. The island of Great Britain—so called to distinguish it from Britannia Minor, or Little Britain [see BRETAGNE], in France—lies between lat. 49° 57' 30" and 58° 40' 24" N., and between long. 1° 46' E. and 6° 13' W., and is the largest island in Europe. It is bounded on the N. by the Atlantic, on the E. by the North Sea, on the S. by the English Channel, and on the W. by the Atlantic, the Irish Sea, and St. George's Channel. The most northerly point is Dunnet Head, in Caithness; the most southerly, Lizard Point, in Cornwall; the most easterly, Lowestoft Ness, in Norfolk; and the most westerly, Ardnamurchan Point, in Argyshire. Its greatest length is about 608 miles, and its greatest breadth (from Land's End to the east coast of Kent) about 320 miles, while its surface contains about 89,600 square miles. In addition to the home territories composing the kingdom, Great Britain possesses a multitude of dependencies, some of them of vast extent, scattered over every part of the globe, and constituting "an empire over which the sun never sets." According to the official census held in 1861 in the United Kingdom, and nearly all the colonies except British India, the extent and population of all the British dominions were in that year as follows:

	Sq. Miles.	Inhabitants.
United Kingdom (inclusive of soldiers and sailors) .....	121,115	29,321,288
Colonies and possessions (exclusive of soldiers, 47,514 men) .....	3,364,722	9,264,243
British India (exclusive of British army, 62,593 men) .....	933,722	135,571,351
European Possessions .....	122	165,317
North American Colonies .....	512,193	3,323,507
West Indian Possessions .....	106,449	1,114,508
African Possessions .....	130,756	1,004,595
Islands in the South Atlantic Ocean .....	7,647	7,426
Possessions in the Indian Ocean .....	25,485	2,363,767
Australia and New Zealand .....	2,582,070	1,322,937
Total .....	4,419,559	174,156,882

Not included in this enumeration is the vast territory in North America which heretofore belonged to the Hudson's Bay Company, which in 1869 ceded its right of sovereignty. Added to the above total of square miles, this territory would increase the total extent of the British dominions to about seven millions of square miles, and make it, in point of extent, the first empire of the world. The total population was estimated in 1869 at 200,000,000; and in this respect the British empire was the second of the world, being exceeded only by the Chinese empire.

In England and Wales the Anglican Church is recognised as the state Church [see ENGLAND, CHURCH OF], and the sovereign must belong to it. In Ireland the Anglican Church was also the established Church until 1869, when, after a long and violent struggle between the Conservative and Liberal parties, it was disestablished. See IRELAND. In Scotland the established Church is Presbyterian. See SCOTLAND. According to the census returns of 1851 (in the census returns of 1861 religious statistics were not included), the number of places of worship, together with the sittings provided in England and Wales, and the estimated number of attendants on a particular day, were as follows:

ENGLAND AND WALES.	Places of Worship.	Sittings Provided.	Estimated Number of Attendants.
Established Church .....	14,977	5,317,915	3,773,474
Wesleyan Methodists (comprising seven distinct sects) .....	11,207	2,194,298	1,385,382
Independents or Congregationalists .....	3,244	1,067,760	793,142
Baptists (comprising six distinct sects) .....	2,789	751,343	587,978
Calvinistic Methodists .....	937	250,678	180,725
Scottish and Irish Presbyterians .....	161	86,812	60,131
Isolated Congregations .....	539	104,481	63,572
Roman Catholics .....	570	186,111	305,393
Society of Friends .....	371	91,599	18,172
Unitarians .....	229	68,554	37,156
Latter-day Saints, or Mormons .....	222	30,753	18,800
Sandemanians .....	6	956	587
Jews .....	53	3,438	4,150
Brethren .....	132	18,529	10,414
Moravians .....	32	9,305	7,364
New Church .....	50	12,107	7,082
Apostolic Church .....	32	7,437	4,908
Foreign Protestant, Catholic, and Greek churches .....	16	4,457	2,612
Established Church .....	14,077	5,317,915	3,773,474
Other Denominations .....	20,390	4,894,720	3,487,568
Total .....	34,467	10,212,635	7,261,032

SCOTLAND.	Places of Worship.	Sittings Provided.	Estimated Number of Attendants.

Total .....	3395	1,834,805	1,689,049

"In England the chief institutions for education are the ancient national universities of Oxford and Cambridge; the more recent institutions of London, Durham, and Lampeter in Wales; the classical schools of Eton, Westminster, Winchester, Harrow, Charterhouse, and Rugby; the various military schools; the colleges of the dissenting denominations; the middle-class schools, either started by individual teachers, and hence called 'adventure' schools, or by associated bodies, acting as directors, to whom the teachers are responsible; the schools of design, and the various elementary schools and training-colleges in connection with the different religious denominations. The number of day-schools in England and Wales in 1851 was 46,042, of which 15,518 were public—i. e. schools deriving a portion of their income from some source besides

the scholars—and 30,524 private—i. e. sustained entirely by the payments of scholars. The total number of scholars was 2,144,378, of whom 1,422,982 attended the public, and 721,396 the private schools. As the population then amounted to 17,927,609, this gives a proportion of one scholar to every 8½ of the inhabitants.

“Scotland possesses four universities for the higher branches of education, viz. those of Edinburgh, Glasgow, St. Andrew’s, and Aberdeen, besides a variety of minor colleges connected with the Episcopalian, Free Church, and other non-established churches; a complete system of parish schools, grammar-schools, or academies in the chief towns, which serve as preparatory gymnasia for the universities, and a large number of ‘denominational schools.’ In 1851 the number of day-schools was 5242, of which 3349 were public, and 1893 private. The number of scholars was 368,517, of whom 280,045 belonged to the public, and 88,472 to the private schools. Out of a population of 2,888,742, this gives a percentage of 12.76, or 1 scholar to every 7½ of the inhabitants. According to the education statistics of 1861, the number of children from 5 to 15 years of age attending school in Scotland were 441,166, which, out of a population of 3,061,251, gives 1 scholar to every 6⅘ of the inhabitants” (Chambers, *Cyclop.*).

For the Church History of Great Britain, see ENGLAND, CHURCH OF; SCOTLAND, CHURCH OF; IRELAND, and the articles on the several dissenting denominations. The most important works on the Church History of Great Britain have been referred to in the art. on ENGLAND, CHURCH OF; besides them must be mentioned Bogue and Bennett, *History of Dissenters* (Lond. 1808-14, 4 vols.); J. Bennett, *History of Dissent during the last thirty Years* (Lond. 1849). (A. J. S.)

**Great Sea.** See SEA.

**Greaves** (הַצִּנְחָה, *mitschah*’, lit. a facing; Sept. *κρημῖνες*, Vulg. *ocreee*) occurs in the A. V. only in 1 Sam. xvii, 6, in the description of the equipment of Goliath—“He had greaves of brass (הַצִּנְחָה, *copper*) upon his legs” (רַגְלָיו רַבְּצִינִי, lit. on his feet, whence some have supposed only a kind of boot to be meant). Its ordinary meaning is a piece of defensive armor reaching from the foot to the knee, and thus protecting the shin of the wearer. This was the case with the *κρημῖνις* of the Greeks, which derived its name from its covering the *κρημῖνον*, i. e. the lower part of the leg, and was a highly esteemed piece of defensive armor (see Smith, *Dict. of Class. Ant.* s. v. *Ocrea*). The Heb. term is de-

they appear to have extended over the whole thigh (Layard, *Nineveh*, ii, 261). See ARMOR.

Ancient Assyrian Greaves.

**Gre’cia** (Heb. *Yavan*’, יָוָן, i. e. *Javan* [q. v.], as usually rendered), the Latin form (Dan. viii, 21; x, 20; xi, 2) of the country elsewhere termed GREECE (q. v.).

**Gre’cian** (Heb. in the plur. *Beney hay-Yevanim*’, בְּנֵי הַיָּוָנִים, *sons of the Ionians*, Joel iii, 6; in the Apocr. Ἑλλημ, 1 Macc. vi, 2; viii, 9, 18; 2 Macc. iv, 15; xiii, 2; in the N. T. Ἑλληνιστής, a *Hellenist*, Acts vi, 1; ix, 29; xi, 20), the name of the people elsewhere called Greeks (q. v.).

**Greecian Architecture.** Greecian architecture differs from other styles of ancient architecture in this, that it was devoted almost solely to religious uses. Its chief aim was to supply permanent and worthy temples, as residences of the deities, as, during the early history of Greece, the images and statues of the deities were placed in the hollow trunks of trees and under canopies for protection.

Most of the elements from which the Ionic order of architecture was developed are easily traced to an Assyrian origin, as is seen in the ornamentation of the

Ancient Grecian Greaves.

rived from הַצִּנְחָה, the fore part of anything. Hence all the ancient versions and Josephus (*Ant.* vi, 9, 1) agree in regarding it as designating a defensive armor for the leg. It is to be distinguished from הַצִּנְחָה, *scin*’ (Isa. ix, 4), which Gesenius thinks was a sort of military shoe like the Roman *caliga*; and it probably was similar to the greaves of the Assyrians, as represented in their sculptures, which not only protected the leg, but covered the upper part of the foot like our gaiters, and seem to have been laced up in front; in other cases

Fig. 2. Section of the Treasury of Atreus.

columns and walls of the Treasury of Atreus at Mycenæ. On the other hand, the elements of the Doric order were mostly adopted from the more severe and stately temple architecture of Egypt. Under the extraordinary æsthetic feeling and culture of the Greeks, these elements, though of foreign origin, were developed and modified until, with the addition of certain native elements, there was produced a degree of perfection of architectural form, and of symmetrical and harmonious combination of parts into a unique whole, that has never been surpassed in the whole history of architecture.

Fig. 3. Pillar at the Entrance of the Treasury of Atreus.

The tendency to Oriental luxury and individual power that characterized the treasure-houses of the *ródavvoi* was checked by the overthrow of their chiefs and the establishment of democracy. From the time of the *ródavvoi* till the accession of Alexander the Great, Grecian architecture (as well as sculpture and painting) was devoted almost solely to the service of religion.

In addition to the Ionic and Doric orders, a third order, the Corinthian, was developed in Greece. It was, however, but little used until after the time of Alexander, when true religious feeling and patriotic sentiment had given way, throughout Greece and its colonies, to Oriental sensuous enjoyment and luxury.

The greatest variety and artistic freedom pervaded the Grecian architecture, both in the development of the individual members and in the general planning of the temples. All of the mouldings and the ornamentation were drawn with a free hand, and not by mathematical instruments, as was the case in Roman and Gothic architecture. With all of this variety and freedom, the typical character of the Grecian architecture was well preserved. The Doric order was the favorite, as the best adapted to the spirit of temple architecture. More than one order was frequently introduced, however, into the same edifice. From the erection of the earliest Doric temple, that of Neptune at Corinth, there was a gradual progress in the development of elegance of form in the single members of the edifice, and in the development of symmetry and harmony in the entire structure. During the earlier history of Grecian architecture, polychromy was used to a great extent. Later, the ornamentation became more sculptural. But color was used to develop

Fig. 4. Ionic Order; from the Erechtheum in Athens (Lübke).

the relief of the architectural forms of the capitals, the cornices, and the panels of the ceilings, until the period of decadence of the Grecian architecture.

Great care was taken to select the best sites for these temples. Oracles were consulted for their location. The temples of tutelary deities were usually placed on the highest ground in the city. They thus commanded, in many cases, most magnificent prospects. They were also thus seen at a great distance. The temples were sometimes surrounded by sacred groves, or by groves of olive and orange trees. The temples were often surrounded also by sacred inclosures, within which were frequently erected altars, and even temples to other deities. The temples of Mercury were usually placed on lower grounds; those of Mars, Venus, Vulcan, and Esculapius outside of and near the gates of the city. The front was always adorned with an equal number of columns—of four, six, eight, or ten. On the sides the number of columns was usually unequal. As the length of the temple was usually double the breadth, the number of columns at the side was thirteen for six on the front; seventeen for eight on the front. The proportion between the diameter and the height of the columns and of the space be-

Fig. 5. Ionic Order; from the monument of Lycierates in Athens (Lübke).

tween the columns varied in different temples and in different periods. Some temples had a portico on the front only; others on the front and rear, and others still on all four sides. Some had two rows of columns on the front and rear, and one on the side; and others had four rows on the front and rear, and two rows on the side. In some temples the cella required no pillars for the support of the roof; in others the cella was so large as to require a row, and sometimes two rows of pillars. Sometimes a gallery ran around the cella. The entire cella of some temples was covered with a roof, the central part being open to the sky. By this means only could the paintings of the celebrated artists which adorned the walls of the cella be distinctly seen.

Windows were occasionally introduced, as in the Erechtheum at Athens. It is supposed that these were closed by very thin slabs of alabaster or gypsum, thus giving a tranquil and mysterious light to the interior.

The base of the temple was raised several steps above the ground upon which it rested. The interior usually consisted of a room (cella) to contain the statue

of the deity. This cella opened to the east, that the first light of the morning might fall upon the image of the deity. Sometimes there was another room in the rear of the cella (as the treasury in the Parthenon

Fig. 6. Plan of the Parthenon.

at Athens). The gables contained groups of sculpture illustrative of some event connected with the mythology of the deity to whom the temple was dedicated. The metopes of the friezes frequently contained also smaller groups of sculpture. Upon the walls of the portico were frequently long series of sculptures.

The entire temple was erected primarily as a residence for the deity. It could contain but few persons at a time. Sacrifices, ceremonies, and processions were performed without the temple. Beside the statue of the deity, to whose service the temple was erected, were often placed smaller statues of friendly deities. Statues of priests were sometimes placed in the vestibule of the cella. Thank-offerings, sometimes of great value, were often placed upon the walls both of the cella and of the portico. An altar upon which offerings were placed often stood before the deity. But sacrifices were performed upon an altar placed before the entrance, but within the view of the image of the deity.

The other edifices of Grecian architecture were, like the temples, for the benefit and use of the entire population. They consisted mostly of fortifications, fortified entrances (propylea), and halls of justice (basilica). These partook of the general style of architecture in which the temples were built.

So different in principles of construction, and in the object for which they were designed, were the edifices of ancient Greece, that only with the greatest modification of detail can their style, and much less their plan, be adapted to the wants of modern life. Least

of all is the Grecian temple adapted to the purposes of a Christian church.

The history of Grecian architecture extends from the 7th century B.C. till the conquest of the Orient by Rome. The greater part of the earlier monuments of this architecture are found in the western colonies of Sicily and Grecia Magna. Most of the ancient temples in Greece itself were destroyed by the Persians. Most of the temples in Ionia and the further Orient were built during or after the reign of Alexander the Great. The Doric style prevailed mostly in Sicily, Grecia Magna, the Peloponnesus, and the northern part of Greece. The Ionic and Corinthian styles prevailed mostly in Asia Minor, while all three styles were found in Attica, and especially in Athens.

In Sicily there were over twenty temples that were famous for their size and splendor. They were mostly built in the 5th and 6th centuries B.C. The largest of these was the temple of Jupiter at Selinus, which was 350 feet long and 170 feet wide. The temple of Diana at Syracuse is remarkable for the indications of the influence of Egyptian architecture in its style and construction. The temple of Minerva at Syracuse was famous for its costly ornamentation. Hiero II built also at Syracuse a colossal altar, which rested on a lofty base 625 feet long and 73 feet wide, and was remarkable for the elegance of its architectural proportions. In Agrigentum were three imposing temples, the largest of them, that of Jupiter Olympus, being 344 feet long and 176 wide. At Paestum, in Italy, are the remains of two temples and of a basilica, that rank among the finest ruins of Grecian architecture. They show still the heavy influence of Egyptian architecture upon the Doric style, but yet they are marked by great freedom of treatment and harmony of proportion.

One of the most remarkable temples in the Peloponnesus was that of Neptune at Corinth, of which but seven columns and the architrave above them remain. As the earliest ruins of Grecian architecture extant, these are characterized by a heaviness of proportion that is not found in any later edifices. This temple dates from 650 B.C. The temple of Minerva, on the island of Egina, is remarkable for the traces of coloring yet remaining in the architectural ornamentation, and for the archaic character of the sculpture of the pediments, now in the Glyptothek at Munich. Among the most famous temples in Greece itself was that of Jupiter Olympus at Olympia. It was 205 feet long and 93 feet wide, and was adorned with most choice works of Grecian sculpture.

The glory of Grecian architecture is, however, to be seen in Athens. This city, with all of its temples, was utterly destroyed by the Persians 480 B.C. First among the temples of the newly rebuilt city was that of Theseus. This is to-day the best preserved of all ancient Grecian temples. In symmetry of proportion it surpassed all other temples that were built before it. The second temple in the new city was that of Victoria Aptera. This temple was taken down by the Turks in the 17th century to build a battery with. All of its parts were found in 1835, and the temple was completely restored. It is one of the most graceful monuments of Grecian architecture. The Parthenon at Athens is, however, the crowning glory of Grecian architecture. It was erected 448 B.C. Its length was 230 feet, and its breadth 102 feet. In the perfection of proportion of all the parts, and in the harmony of their union in an entire edifice, the Parthenon equals or surpasses all other edifices ever erected by the hand of man. It was also adorned with statues and other works of sculpture by the best sculptors that Greece or the world has ever produced. The Erechtheum and the Propylæum also showed the freedom with which the Greek architects varied the plans and construction of their edifices, without losing the character of the architecture, or grace of proportion and unity of effect. Nearly equal to the Parthenon was the temple of Diana at Eleusis, in which the mysteries were performed. There are but few ruins of the famous temple of Apollo at Delphi, which was burnt in the 6th century B.C., and the rebuilding of which was hardly completed at the time of the Roman conquest.

In size and costly magnificence, the temple of Diana at Ephesus exceeded all other temples of Grecian art. This magnificent edifice was completed in B.C. 400. It was 425 feet long and 220 feet wide. Erostratus set fire to it in B.C. 355, but it was rebuilt with renewed magnificence by Alexander the Great. It was plundered by the Goths, and later overthrown by an earthquake. It furnished much of the material for building the church of Santa Sophia (q. v.), and still its colossal ruins are the wonder of the antiquarian. The temple of Apollo at Didymus, near Miletus, destroyed by the Persians B.C. 496, and rebuilt B.C. 390, was one of the edifices in which the Oriental origin of the Ionic order is most plainly seen. It was also one of the largest and most elegant temples of antiquity. The Mausoleum at Halicarnassus was so large and costly as to be reckoned among the wonders of the world. It was 410 feet long, had nearly the

Fig. 7. The Parthenon restored.

shape of an arc of a circle, and was 140 feet high. Though built in a period when noble inspiration had left Grecian art, it was marked by an elegance of execution that was not surpassed in any edifice erected during the history of Greek architecture. The chief works of Greek architecture in Africa were in Cyrene, and especially in Alexandria. In this city all the resources of a luxuriant architecture were called into requisition in the erection of every class of edifices that should adorn a new and gorgeous capital city.

(For the literature upon Grecian architecture, see the article ARCHITECTURE.) G. F. C.

**Greece** (Ελλάς), properly the country in Europe inhabited by the Greek race (1 Macc. i. 1); but in Acts xx, 2, apparently designating only that part of it comprising the Roman province of MACEDONIA (q. v.). See Wetstein, *Nov. Test.* ii, 590; Kruse, *Hellas*, i, 557. Compare ACHAIA.

1. Greece is sometimes described as a country containing the four provinces of Macedonia, Epirus, Achaia or Hellas, and Peloponnesus, but more commonly the two latter alone are understood to be comprised in it. We will consider it as composed of Hellas and Peloponnesus, though there seems to be no question that the four provinces were originally inhabited by people of similar language and origin, and whose religion and manners were alike. Except upon its northern boundary it is surrounded on all sides by the sea, which intersects it in every direction, and naturally gives to its population seafaring habits. It is also a very mountainous country, abounding in eminences of great height, which branch out and intersect the land from its northern to its southern extremity, and form the natural limits of many of the provinces into which it is divided. At the isthmus of Corinth it is separated into its two great divisions, of which the northern was called *Grecia intra Peloponnesum*, and the southern the Peloponnesus, now called the Morea. The mountain and sea are thus the grand natural characteristics of Greece, and had a very considerable influence on the character of its inhabitants, as is evidenced in the religion, poetry, history, and manners of the people. The country has always been famous for the temperature of its climate, the salubrity of its air, and the fertility of its soil.

The Greek nation had a broad division into two races, Dorians and Ionians, of whom the former seem to have long lain hid in continental parts, or on the western side of the country, and had a temperament and institutions more approaching the Italic. The Ionians, on the contrary, retained many Asiatic usages and tendencies, witnessing that they had never been so thoroughly cut off as the Dorians from Oriental connection. When afterwards the Ionic colonies in Asia Minor rose to eminence, the Ionian race, in spite of the competition of the half Doric Æolians, continued to attract most attention in Asia.

Of the history of Greece before the first recorded Olympiad, B.C. 776, little that can be depended upon is known. There is no doubt that from very remote periods of antiquity, long prior to this date, the country had been inhabited, but facts are so intermingled with legend and fable in the traditions which have come down to us of these ancient times, that it is impossible with certainty to distinguish the false from the true (Grote, *Hist. of Greece*, pref. to vol. i). After its conquest by the Romans, B.C. 146, Greece continued for one thousand three hundred and fifty years to be either really or nominally a portion of the Roman empire. Literature and the arts, long on the decline, were at length destroyed by Justinian, who closed the schools of Athens. Alaric the Goth invaded the country in the year 400, followed by Genseric and Zaber Khan in the sixth and seventh, and by the Normans in the eleventh century. After the Latin conquest of Constantinople in 1204, Greece was divided into feudal principalities, and governed by a variety of Roman,

Venetian, and Frankish nobles; but in 1261, with the exception of the dukedoms of Athens and Nauplia, and some portions of the Archipelago, it was reunited to the Constantinopolitan empire by Michael Palaeologus. In 1438 it was invaded by the Turks, who completed its conquest in 1481. The Venetians, however, were not disposed to allow its new masters quiet possession, and the country during the sixteenth and seventeenth centuries was the theatre of obstinate wars, which continued till the treaty of Passarowitz in 1718 confirmed the Turks in their conquest. With the exception of Maina, the whole country remained under their despotic sway till 1821, when the Greeks once more aroused from their lethargy, and asserted their claim to a national existence. The revolutionary struggle was continued with varied success and much bloodshed till the great European powers interfered, and the battle of Navarino, in 1827, secured the independence of Greece, which was reluctantly acknowledged by the Porte in 1829. In 1831 Greece was erected into an independent monarchy: it retains its classic name, and nearly its ancient limits, comprehending the Morea, or ancient Peloponnesus, south of the Gulf of Corinth, now Gulf of Lepanto, and the province of Livadia, or the ancient *Grecia propria*, with part of Thessaly and Epirus, north of that gulf; besides the Island of Negropont, the ancient Eubœa, and other smaller islands in the Archipelago. The *Republic* of the Ionian Islands, Cephalonia, Zante, Corfu, and others on the western coast of Greece, is under the protection of Great Britain.—Fairbairn, s. v.; Bastow, s. v.

2. The relations of the Hebrews with the Greeks were always of a distant kind until the Macedonian conquest of the East: hence in the Old Testament the mention of the Greeks is naturally rare. See JAVAN. It is possible that Moses may have derived some geographical outlines from the Egyptians, but he does not use them in Gen. x, 2-5, where he mentions the descendants of Javan as peopling the isles of the Gentiles. This is merely the vaguest possible indication of a geographical locality; and yet it is not improbable that his Egyptian teachers were almost equally in the dark as to the position of a country which had not at that time arrived at a unity sufficiently imposing to arrest the attention of its neighbors. The amount and precision of the information possessed by Moses must be measured by the nature of the relation which we can conceive as existing in his time between Greece and Egypt. Now it appears from Herodotus that prior to the Trojan War the current of tradition, sacred and mythological, set from Egypt towards Greece; and the first quasi-historical event which awakened the curiosity and stimulated the imagination of the Egyptian priests was the story of Paris and Helen (Herodotus, ii, 43, 51, 52, and 112). At the time of the Exodus, therefore, it is not likely that Greece had entered into any definite relation whatever with Egypt. Withdrawn from the sea-coast, and only gradually fighting their way to it during the period of the Judges, the Hebrews could have had no opportunity of forming connections with the Greeks. From the time of Moses to that of Joel we have no notice of the Greeks in the Hebrew writings, except that which was contained in the word Javan (Gen. x, 2); and it does not seem probable that during this period the word had any peculiar significance for a Jew, except in so far as it was associated with the idea of islanders. When, indeed, they came into contact with the Ionians of Asia Minor, and recognised them as the long-lost islanders of the Western migration, it was natural that they should mark the similarity of sound between יָוָן = יָוֶן and *Jones*, and the application of that name to the Asiatic Greeks would tend to satisfy in some measure a longing to realize the Mosaic ethnography. Accordingly, the O.-T. word, which in the A. Vers. is *Greece, Greeks*, etc., is in Hebrew יָוָן, *Javan* (Joel iii,

Map of Ancient Greece.

6; Dan. viii, 21): the Hebrew, however, is sometimes retained (Isa. lxvi, 19; Ezek. xxvii, 13). In Gen. x, 2 the Sept. has *Ἴωναν καὶ Ἑλλᾶς*, with which Rosenmüller compares Herod. i, 56-58, and professes to discover the two elements of the Greek race. From Ἴωναν he gets the Ionian or Pelasgian, from Ἑλλᾶς (for which he supposes the Heb. original *עֲלִיָּהוּ*), the Hellenic element. This is excessively fanciful. See ELISHAI.

The Greeks and Hebrews met for the first time in the slave-market. The medium of communication seems to have been the Tyrian slave-merchant. About B.C. 800 Joel speaks of the Tyrians as selling the children of Judah to the Grecians (Joel iii, 6); and in Ezek. xxvii, 13 the Greeks are mentioned as bartering their brazen vessels for slaves. On the other hand, Bochart says that the Greek slaves were highly valued throughout the East (*Geogr. Sac.* pt. i, lib. iii, c. 3, p. 175); and it is probable that the Tyrians took advantage of the calamities which befell either nation to sell them as slaves to the other. Abundant opportunities would be afforded by the attacks of the Lydian

monarchy on the one people, and the Syrian on the other; and it is certain that Tyre would let slip no occasion of replenishing her slave-market. See TYRE.

Prophetic notice of Greece occurs in Dan. viii, 21, etc., where the history of Alexander and his successors is rapidly sketched. See GOAT. Zechariah (ix, 13) foretells the triumphs of the Maccabees against the Græco-Syrian empire, while Isaiah looks forward to the conversion of the Greeks, among other Gentiles, through the instrumentality of Jewish missionaries (lxvi, 19). For the connection between the Jews and the quasi-Greek kingdoms which sprang out of the divided empire of Alexander, see ANTIOCHUS; PTOLEMY.

The presence of Alexander (q. v.) himself at Jerusalem, and his respectful demeanor, are described by Josephus (*Ant.* xi, 8, 3); and some Jews are even said to have joined him in his expedition against Persia (Ilecat. ap. Joseph. c. *Apion*, ii, 4), as the Samaritans had already done in the siege of Tyre (Josephus, *Ant.* xi, 8, 4-6). In 1 Macc. xii, 5-23 (about B.C. 180), and Josephus, *Ant.* xii, 4, 10, we have an account of

an embassy and letter sent by the Lacedæmonians to the Jews. The most remarkable feature in the transaction is the claim which the Lacedæmonians prefer to kindred with the Jews, and which Areus professes to establish by reference to a book. It is by no means unlikely that two declining nations, the one crouching beneath a Græco-Syrian invader, and the other beneath a Roman yoke, should draw together in face of the common calamity; or we may with Jahn (*Heb. Comm.* ix, 91, note) regard the affair as a piece of pompous trifling or idle curiosity, at a period when "all nations were curious to ascertain their origin, and their relationship to other nations." See ONIAS.

The notices of the Jewish people which occur in Greek writers have been collected by Josephus (*contra Apion*, i, 22). The chief are Pythagoras, Herodotus, Chærilus, Aristotle, Theophrastus, and Hecateus. The main drift of the argument of Josephus is to show that the Greek authors derived their materials from Jewish sources, or with more or less distinctness referred to Jewish history. For Pythagoras, he cites Hermippus's life; for Aristotle, Clearchus; but it should be remembered that the Neo-Platonism of these authorities makes them comparatively worthless; that Hermippus, in particular, belongs to that Alexandrian school which made it its business to fuse the Hebrew traditions with the philosophy of Greece, and propitiate the genius of Orientalism by denying the merit of originality to the great and independent thinkers of the West. This style of thought was further developed by Iamblichus; and a very good specimen of it may be seen in Le Clerc's notes on Grotius, *De Verit.* It has been ably and vehemently assailed by Ritter, *Hist. Phil.* b. i, c. 3. Herodotus mentions the *Syrians of Palestine* as confessing that they derived the rite of circumcision from the Egyptians (ii, 104). Bähr, however, does not think it likely that Herodotus visited the interior of Palestine, though he was acquainted with the sea-coast. (On the other hand, see Dahlman, p. 55, 56, Engl. transl.) It is almost impossible to suppose that Herodotus could have visited Jerusalem without giving us some more detailed account of it than the merely incidental notices in ii, 159, and iii, 5, not to mention that the site of *Kάκρυς*, or Cadytis, is still a disputed question. The victory of Pharaoh-Necho over Josiah at Megiddo is recorded by Herodotus (comp. Herod. ii, 159 with 2 Kings xxiii, 29 sq.; 2 Chron. xxxv, 20 sq.). It is singular that Josephus should have omitted these references, and cited Herodotus only as mentioning the rite of circumcision. The work of Theophrastus cited is not extant; he enumerates among other oaths that of *Corban*. Chærilus is supposed by Josephus to describe the Jews in a by no means flattering portrait of a people who accompanied Xerxes in his expedition against Greece. The chief points of identification are their speaking the Phœnician language, and dwelling in the *Solymean mountains, near a broad lake*, which, according to Josephus, was the Dead Sea. The Hecateus of Josephus is Hecateus of Abdera, a contemporary of Alexander the Great, and of Ptolemy son of Lagus. The authenticity of the History of the Jews attributed to him by Josephus has been called in question by Origen and others.

After the complete subjugation of the Greeks by the Romans, and the absorption into the Roman empire of the kingdoms which were formed out of the dominions of Alexander, the political connection between the Greeks and Jews as two independent nations no longer existed.—Smith, s. v.

When a beginning had been made of preaching Christianity to the Gentiles, Greece immediately became a principal sphere for missionary exertion. The vernacular tongue of the Hellenistic Christians was understood over so large an extent of country as almost of itself to point out in what direction they should exert themselves. The Grecian cities, whether in Eu-

rope or Asia, were the peculiar field for Paul, for whose labors a superintending Providence had long before been providing in the large number of devout Greeks who attended the Jewish synagogues. Greece Proper was divided by the Romans into two provinces, of which the northern was called Macedonia, and the southern Achaia (as in 2 Cor ix, 2, etc.); and we learn incidentally from Acts xviii that the proconsul of the latter resided at Corinth. To determine the exact division between the provinces is difficult, nor is the question of any importance to a Biblical student. Achaia, however, had probably very nearly the same frontier as the kingdom of modern Greece, which is limited by a line reaching from the gulf of Volo to that of Arta, in great part along the chain of Mount Othrys. Of the cities celebrated in Greek history, none are prominent in the early Christian times except Corinth. Laconia, and its chief town Sparta, had ceased to be of any importance: Athens was never eminent as a Christian church. In Macedonia were the two great cities of Philippi and Thessalonica (formerly called Therme); yet of these the former was rather recent, being founded by Philip the Great; the latter was not distinguished above the other Grecian cities on the same coast. Nicopolis, on the gulf of Ambracia (or Arta), had been built by Augustus in memory of his victory at Actium, and was, perhaps, the limit of Achaia on the western coast (Tacitus, *Annal.* ii, 53). It had risen into some importance in Paul's days, and, as many suppose, it is to this Nicopolis that he alludes in his epistle to Titus. See NICOPOLIS.

3. Among the Greeks the arts of war and peace were carried to greater perfection than among any earlier people. In navigation they were little behind the Tyrians and Carthaginians; in political foresight they equalled them; in military science, both by sea and land, they were decidedly their superiors; while in the power of reconciling subject-foreigners to the conquerors and to their institutions, they perhaps surpassed all other nations of the world. Their copious, cultivated, and flexible tongue carried with it no small mental education to all who learned it thoroughly; and so sagacious were the arrangements of the great Alexander throughout his rapidly acquired Asiatic empire, that in the twenty years of dreadful war between his generals which followed his death, no rising of the natives against Greek influence appears to have been thought of. Without any change of population adequate under other circumstances to effect it, the Greek tongue and Greek feeling spread far and sank deep through the Macedonian dominions. Half of Asia Minor became a new Greece, and the cities of Syria, North Palestine, and Egypt were deeply imbued with the same influence. See GREEK LANGUAGE.

The Greeks were eminent for their appreciation of beauty in all its varieties; indeed, their religious creed owed its shape mainly to this peculiarity of their mind, for their logical acuteness was not exercised on such subjects until quite a later period. The puerile or indecent fables of the old mythology may seem to a modern reader to have been the very soul of their religion; but to the Greek himself these were a mere accident, or a vehicle for some embodiment of beauty. Whatever the other varieties of Greek religious ceremonies, no violent or frenzied exhibitions arose out of the national mind; but all such *orgies* (as they were called) were imported from the East, and had much difficulty in establishing themselves on Greek soil. At quite a late period the managers of orgies were evidently regarded as mere jugglers of not a very reputable kind (see Demosthenes, *De Coronâ*, § 79, p. 313); nor do the Greek states, as such, appear to have patronized them. On the contrary, the solemn religious processions, the sacred games and dances, formed a serious item in the public expenditure; and to be permanently exiled from such spectacles would have been a moral death to the Greeks. Wherever they settled they introduced their

native institutions, and reared temples, gymnasia, baths, porticoes, sepulchres, of characteristic simple elegance. The morality and the religion of such a people naturally were alike superficial; nor did the two stand in any close union. Bloody and cruel rites could find no place in their creed, because faith was not earnest enough to endure much self-abandonment. Religion was with them a sentiment and a taste rather than a deep-seated conviction. On the loss of beloved relatives they felt a tender and natural sorrow, but unclouded with a shade of anxiety concerning a future life. Through the whole of their later history, during Christian times, it is evident that they had little power of remorse, and little natural firmness of conscientious principle; and, in fact, at an earlier and critical time, when the intellect of the nation was ripening, an atrocious civil war, that lasted for twenty-seven years, inflicted a political and social demoralization, from the effects of which they could never recover. Besides this, their very admiration of beauty, coupled with the degraded state of the female intellect, proved a frightful source of corruption, such as no philosophy could have adequately checked.—Kitto, s. v. (Works expressly on Grecian mythology have been written by Le Clerc, 1787; Kanne, 1805; Lünmer, 1806; Hug, 1812; Völcker, 1824; Buttman, 1828; Studer, 1830; Kriche, 1840; Stühr, 1838; Limburg-Brouwer, 1833.) See GREEK.

**Greece, Kingdom of**, a country in south-eastern Europe, established in 1832 by a successful rising of the people against the rule of the Turks, to which they had been subject since the fall of the Byzantine empire. The kingdom was enlarged in 1863 by the annexation of the Ionian Islands, which until then had been subject to the sovereignty of Great Britain. The total area in 1869 amounted to 19,353 square miles, the total population in 1861 to 1,348,412, and in 1864 to about 1,400,000.

The great majority of the people of Greece belong to the Greek Church (q. v.), which is in Greece (since 1833) independent of the patriarch of Constantinople, and constitutes a national Church, which the patriarch recognised in 1850 by the so-called Tomos. The supreme management of ecclesiastical affairs is in the hands of a Holy Synod, consisting of five bishops and an officer of the government. At the beginning of the revolution the higher clergy consisted of 20 metropolitans, 2 archbishops, and 19 bishops; in 1869 there were 11 archbishops, 4 metropolitans, and 16 bishops. The number of male monasteries was, on the advent of the regency which was established after the expulsion of the Turks, about 400, and the number of nunneries from 30 to 40, together with about 800 inmates; in 1869 there were 128 monasteries of monks and 4 nunneries, the former with 1500, the latter with 150 inhabitants. There are about 2905 parish churches, with 3200 priests. The secular clergy and the monks are generally but little educated, but enjoy, nevertheless, great respect among the people, the majority of whom are firmly attached to their Church. For the orthodox Greek Church there are 4 archbishops in Livadia (Chalcis and Eubœa, Ætolia and Acarnania, Phthiotis, the metropolitan see of Athens, Megara and Ægina), with 4 bishops; in the Morea, 6 archbishops (Argolis, Corinth, Patras and Elis, Mantinea and Cynuria, Messenia, Sparta and Monembasia) and 6 bishops; in the Archipelago, 1 archbishop (Syros and Tynos) and 3 bishops; in the Ionian Islands, 4 metropolitans and 3 bishops. The Roman Catholics, who are mostly the descendants of families which immigrated at the time of the Crusades and during the rule of the Venetians, number about 25,000, chiefly in the islands, and have two archbishops—at Naxos and Corfu—and 4 bishops. There are a few thousand Mohammedans in Eubœa, and a few hundred Protestants and Jews in the commercial towns.

The labors of Protestant missionaries began in 1828,

and have ever since been carried on without intermission. The American Board of Missions, the Episcopal Board, and Baptist Board were all concerned in the work. The Episcopal Board began its operations in 1829, when it sent out Messrs. Robertson and Hill. These gentlemen, in the outset, started out upon the conciliatory course, under the impression that the Greek Church would be freed from its evils by liberal education. On this account they devoted themselves entirely to education, allowing a priest in their schools to teach the Greek Catechism. The American Board of Missions sent out the Rev. Dr. King in 1828, and he, too, opened schools for boys and girls at Athens, and also paid great attention to education, but only used it as a means to the preaching of the Gospel. In 1835 the representative of the American Board assisted in the establishment of the first college in Greece which was started under government assistance. Soon after this three other missionaries arrived in Greece, who opened schools in the mountains. In 1841, suddenly, and without any apparent provocation, the Church party made war against missionary operations, and attempted to extinguish the Gospel light. These persecutions ended in the banishment of Dr. King from the country. This action became the means of introducing the native element into the work. Dr. Kalopothakes, who had become acquainted with Protestantism in one of the schools of Dr. King, and who had subsequently spent four years in the United States to prepare for missionary work in his country, started in Athens a religious newspaper, the *Star of the East*. In 1864, when Dr. King (who had helped Dr. Kalopothakes in all his troubles) returned to America, the paper passed entirely into the hands of Dr. Kalopothakes and his companion, a Mr. Constantine; and when, in 1868, Dr. King again went to Greece, he found the paper prospering, and two regular Church services carried on every Sabbath at Athens. In 1869, Dr. Kalopothakes and Mr. Constantine published a daily paper, a weekly paper, and a children's paper, and also a number of cheap religious books. One of the chief results of the Protestant mission has been the increased circulation of the Bible, which is proved by the fact that in 1859, when Dr. Kalopothakes first opened the Bible dépôt at Athens, he did not sell 100 copies of the New Testament, whereas in 1868 he disposed of 3000.

Popular education has made considerable progress since the establishment of independence. There were 750 primary schools in 1856; 93 pro-gymnasia or Hellenic schools, with 165 teachers and 4990 pupils; 11 gymnasia (organized after the model of those of Germany), with 67 teachers and 1180 pupils; an ecclesiastical ("Rhisari") seminary, and a national university established in 1837, with a library of more than 80,000 volumes, an observatory, and botanical garden. See Wiggers, *Kirchl. Statistik*, i, 179 sq., 207 sq. (A. J. S.)

**Greek**, a term not found in the A. V. of the O. T., where either *Javan* is retained, or, as in Joel iii, 6, the word is rendered by *Grecian*. In Maccabees *Greeks* and *Grecians* seem to be used indifferently (comp. 1 Macc. i, 10; vi, 2; also 2 Macc. iv, 10, *Greekish*). In the N. T., on the other hand, a distinction is observed, "Ἕλλην being rendered "Greek," and Ἑλληνιστὴς "Grecian." The difference of the English terminations, however, is not sufficient to convey the difference of meanings. (See Overkamp, *De distinctione inter Judæos et Græcos, et inter Græc. et barbaros*, Gryj h. 1782; Amnell, *Hellas e N. T. illustrata*, Upsal. 1752.) "Ἕλλην in the N. T. is either a Greek by race, as in Acts xvi, 1-3; xviii, 17; Rom. i, 14; or more frequently a *Gentile*, as opposed to a Jew (Rom. ii, 9, 10, etc.); so fem. Ἑλληνίς, Mark vii, 26; Acts xvii, 12. Ἑλληνιστὴς (properly "one who speaks Greek") is a foreign Jew; opposed, therefore, not to Ἰουδαῖος, but to Ἑβραῖος, a home-Jew, one who dwelt in Palestine. So Schleusner, etc.: according to Salmasius, however,

the Hellenists were Greek proselytes, who had become Christians; so Wolf, Parkhurst, etc., arguing from Acts xi, 20, where Ἑλληστῆται are contrasted with Ἰουδαῖοι in 19. The question resolves itself partly into a textual one, Griesbach having adopted the reading Ἑλληνας, and so also Lachmann, Tischendorf, and others.—Smith, s. v. See HELLENIST.

**Greek Church**, the name usually given to the largest branch of the Oriental or Eastern churches (q. v.). It comprehends all those Christians following the Greek or the Græco-Slavonian rite, who receive the first seven general councils, with the authority of the Roman pontiff and the later councils of the Western Church. See COUNCILS. The title "Greek Church" is hardly an appropriate one. A "communio embracing several other nations and languages besides the Greek, each performing divine worship in its own tongue, and in which, out of sixty-six millions of Christians, perhaps fifty-nine millions are Slavonians, and pray in the Slavonic tongue, cannot properly be called *Greek* merely because its ritual is derived in great measure (by no means exclusively) from Greek sources, and because it was once united with the Græco-Roman empire" (Palmer, *Dissertations*, p. 5). The Church calls itself the "Holy Orthodox Catholic and Apostolic Church." The Greek Church has not, like the Roman Catholic Church, one head, but consists of eleven different groups, which, in point of administration, are independent of each other (see below, *Statistics*), though they fully agree in point of doctrine.

I. *History*.—The proper history of the Greek Church as a separate body begins with the interruption of ecclesiastical communion between the pope and the patriarch of Constantinople. After the establishment of the imperial residence at Constantinople, it was the natural ambition of both the bishops of Constantinople and the emperors to enlarge the authority and prerogatives of the see of Constantinople (q. v.). In 381 the first Œcumenical Council of Constantinople gave to the bishops of Constantinople, because it was the New Rome (ὡς τὸ εἶναι αὐτὴν νέαν Ῥώμην), the "precedence of honor" next after those of ancient Rome. The canon was not recognised by the churches of Rome and Alexandria, but the authority of the bishop of the imperial residence naturally rose, and in 451 the Council of Chalcedon not only confirmed the precedence already given, but placed under his jurisdiction the dioceses of Thrace, Asia, and Pontus, and grounded these ecclesiastical privileges, in the case of the new as well as the old Rome, upon the political distinction of the two cities. The Roman legates protested against this canon, and pope Leo the Great did not recognise it, but when the empire was divided, the patriarch gradually acquired a kind of superiority over the other three patriarchs of the East, and assumed the title of Œcumenical Patriarch. The support given by patriarch Acacius of Constantinople (471-489) to the *Henoticon* (q. v.) led in 484 to the excommunication of Acacius, together with the emperor and the patriarch of Alexandria, by pope Felix III, who also charged him with encroaching upon the rights of the patriarchs of Antioch and Jerusalem. For thirty-five years (484-519) the communion between Constantinople and Rome remained interrupted, most of the Eastern bishops siding with Acacius, while those of Illyria, bishop Kalandion of Antioch, and the convents in the vicinity of Constantinople, ranged themselves on the side of the pope. The withdrawal of the excommunication by pope Hormisdas involved a complete acknowledgment of the supremacy of the Roman pontiff, but the rivalry of the patriarchs of Constantinople continued, and pope Gregory the Great in vain endeavored to prevail upon the pious John the Faster of Constantinople to relinquish the title Œcumenical Patriarch. The antagonism of the two churches was increased by the support which several of the patriarchs of Constantinople gave to the iconoclast emperors, and by the complete political

separation between the East and the West. When Photius, after ascending the patriarchal see, could not obtain the recognition of pope Nicholas, he excommunicated the pope, and arraigned the whole Latin Church for her doctrine of the twofold procession of the Holy Ghost and the addition of "*Filioque*" (q. v.) to the creed, for the practice of clerical celibacy, and for denying to priests the power of administering confirmation. As the rival of Photius for the see of Constantinople, Ignatius, was a declared partisan of the pope and the Latins, the struggle for the possession of the see greatly added to the animosity of the party of Photius against the whole Latin Church. After the death of the emperor Michael III, Ignatius was restored to the see, and a council at Constantinople under his presidency, which by the Latins is accounted as the eighth Œcumenical council, established in 869 the union between the two churches. After the death of Ignatius in 877, Photius again became patriarch. A council held by him in 879 repealed the decisions of the Council of 869. The papal legates were induced by Photius to approve the acts of this council, which the Greek Church numbers among the Œcumenical, but pope John rejected it, and excommunicated Photius anew. In 886 Photius was exiled by the emperor Leo IV, and his successor, Stephen, accepted the demands of the pope. Peace between the two churches was preserved until the middle of the 11th century, when Michael Cerularius (q. v.) was, though a layman, elected patriarch, contrary to the canons of the Council of 869, which forbade the election of laymen to this dignity. Cerularius, in union with bishop Leo of Achrida, the metropolitan of Bulgaria, wrote a letter to bishop John of Trani, in Apulia, who was asked to communicate it to the bishops and priests of the Franks and to the pope. Besides the points of difference alleged by Photius, the letter of Cerularius reproached the Latins for the use of unglavened bread in the Eucharist, for fasting on Saturday, and for not singing Hallelujah during Lent. Cardinal Humbert gave a Latin translation of the letter to pope Leo IX. The pope wrote two letters against Cerularius, which in 1054 were taken to Constantinople by archbishop Petrus of Amalfi, the chancellor Frederick, and Cardinal Humbert. They charged Cerularius especially with the design to establish a jurisdiction over the patriarchs of Alexandria and Antioch, and to make himself the Œcumenical patriarch of the entire Greek Church. Cardinal Humbert added a third letter, in which he charged the Greeks with rebaptizing the Latins, with allowing to the priests the use of marriage during the days of their service at the altar, with not baptizing their children until the eighth day after their birth, and other similar points. The emperor Constantine Monomachos, who, from political reasons, was opposed to a schism, had the letter of Humbert translated into Greek. The monk Niketas (Pectoratus), who wrote a violent refutation of Humbert, was compelled to retract, but Cerularius remained firm in his opposition, and in July, 1054, was solemnly excommunicated by the papal legates. With the support of the emperor, whom he gained over to his side, Cerularius maintained his authority until, in 1059, he was exiled by the emperor Isaac Comnenus. He died soon after.

But the exile of Cerularius did not restore the union of the churches. On the contrary, from this time the separation struck deeper root among the people of the East. Some of the emperors were favorable to a reunion in order to procure political aid from the pope and the Latin princes; but their efforts met only with temporary success. Thus, in 1095, ambassadors of the emperor Alexius Comnenus appeared, suppliant for aid, at the Council of Piacenza, and pope Urban, to restore a union, held in 1097 a council at Bari, in Apulia. In 1201 pope Innocent III induced the Greek emperor Alexius and the patriarch of Constantinople,

John Lomaterus, to enter into a union with Rome. At the Council of Lyons, 1217, delegates from the Greek Church were present, and they, as well as the emperor Michael Palaeologus, declared in favor of union. But the son and successor of Michael, Andronicus, was a decided opponent of the union, and imprisoned the patriarch, who supported it. The emperor John Palaeologus II, and the patriarchs Philotheos of Constantinople (1363-1376), Niphon of Alexandria, and Lazar of Jerusalem, also re-entered into communion with Rome, and sent to pope Clement VI their profession of faith. At the Œcumenical Council of Ferrara, which began in January, 1438, the emperor John Palaeologus VI, his brother, the patriarch of Constantinople, representatives of the three other patriarchs, many bishops, priests, and officers, and altogether some 700 Greeks and Orientals, were present. After a long discussion of the points of difference, the decree of union was, on July 5, 1439, signed by the pope, the Greek emperor, the cardinals, the patriarchs and bishops of both churches, with the sole exception of the bishop Markos Eugenikos of Ephesus. See FERRARA; FLORENCE. But this union was short-lived. On the return of the Eastern bishops to their homes, their action was repudiated by the large body of the priests, monks, and people. The great majority of the bishops themselves yielded to the public pressure and renounced the union, and soon after, in 1453, the fall of Constantinople obliterated every trace of the attempted reconciliation. The patriarchs of Alexandria, Antioch, and Jerusalem declared in 1460 their readiness to accept the union, but, as usual, this declaration bore no practical fruit. Many attempts to effect a general union have since been made, but without effect. Only small bodies of Greeks, especially through the influence of the Catholic government of Poland, have entered into and remained in union with Rome, receiving from the popes permission to retain the use of the Greek language at divine service, and some other peculiarities of the Greek Church. See UNITED GREEK CHURCH. Pope Pius IX, on ascending the papal see, invited the bishops of the Greek Church, in a circular letter addressed to them, to re-enter into the union with Rome. The Greek bishops replied by a letter, setting forth their reasons for not complying with the invitation. In 1868 the pope invited the Greek bishops individually to attend the coming council, but this invitation also was declined by every bishop.

The Greek Church comprised within its ancient limits, anterior to the Mohammedan conquests, Greece properly so called, the Peloponnesus, Eastern Illyricum, the Islands, and Asia Minor, as also Syria and Palestine, Arabia, Egypt, and parts of Mesopotamia and Persia. Her territory in Asia and Africa was in the course of time almost wholly lost in consequence of the advance of the Mohammedans, and with the fall of Constantinople in the 15th century nearly all the ancient sees of the Church in Europe came likewise under the rule of a Mohammedan government. Other portions became subject to the Catholic governments of Austria and Poland, leaving only one single government, that of Russia, as the protector of the interests of the Greek Church. In Austria and Poland the Greek Church suffered some losses in consequence of the efforts of the governments of those two countries to induce the Greek bishops to accept the supremacy of the pope. In European Turkey the Church maintained, on the whole, her ground, as the Turks, though oppressing them in many ways, did not deny them religious toleration. More than from the Turkish government, the Greek Church in Turkey suffered from internal corruption, especially from the simony prevailing in the appointments to episcopal sees and other ecclesiastical positions. See TURKEY.

While the territory of the Greek Church in Africa, Asia, and South-eastern Europe was greatly reduced by the advance of Mohammedanism, it received a most

important increase by the conversion of the Russians. The first missionaries were sent to this people from Constantinople in the 9th century. In 955, princess Olga, the saint, was baptized at Constantinople, and in 956 the first Christian church was built at Kief. Vladimir, at the close of the 10th century, was especially eager for the suppression and destruction of paganism. The first attempt to sever the connection of the Russian Church with the patriarch of Constantinople was made by Yaroslav I, who, in 1051, commanded the Russian bishops to elect the new metropolitan of Kief without the co-operation of the patriarch. His successors, however, again conceded to the patriarch the right of appointing the metropolitan of Kief. In 1164 the patriarch of Constantinople sent a new metropolitan to Kief without even asking for the consent of the prince; but prince Rostislav, though willing to accept the metropolitan for once, declared that in future the election of the metropolitan would require the sanction at least of the government. Negotiations of the princes of Russia and the metropolitans of Kief with the pope for a union of the Russian Church with Rome began in the 11th century. Some of them, in particular several princes of the Rurians and Ruthenians in Galicia, and the metropolitan Isidore, who took part in the Council of Florence, really joined the union, but among the mass of the people and clergy it never gained ground. In 1588 the metropolitan Job of Moscow was consecrated by the patriarch of Constantinople the first patriarch of Russia, and was recognised by the other Oriental patriarchs as the fifth patriarch of the orthodox Church. At the close of the 16th century an attempt was made to establish a union between the Russian Church and those of Georgia and Armenia, but it failed in consequence of the intolerance of the Russian patriarch. The attitude of the patriarch towards the metropolitan of Kief induced the latter, with a number of other bishops of South Russia, and a population of about ten millions, to enter in 1594, at the Council of Brzesk, into communion with Rome. The breach between the Russians and the Church of Rome was greatly widened by the elevation of the house of Romanoff to the throne and by the consolidation of the Russian nationality in its hereditary struggle against Catholic Poland. In 1657 and the three following years the Russian ambassador in Constantinople obtained from the patriarchs of Constantinople, Alexandria, Antioch, and Jerusalem an official recognition of the right of Russia to have the patriarchs of Russia elected by the Russian clergy, without obtaining the previous sanction of the Oriental patriarchs. After the death of the eleventh Russian patriarch in 1702, Peter the Great left the patriarchal see vacant, and in 1721 put the administration of the Church in the hands of a board of bishops called the Holy Synod. Since then the Church of Russia has been eminently a state church. Though in doctrinal union with the other branches of the Greek Church, it is, in point of ecclesiastical administration, entirely unconnected with them. At home it has been unable to prevent the growth of numerous dissenting sects; but the rapid growth of the Russian empire has made it not only by far the most numerous and important branch of the Greek Church in the present age, but the largest state church in the Christian world. (For a fuller account of the inner history of the Church, see RUSSIA.)

The establishment of the independence of the Hellenic kingdom at the beginning of the present century created another independent Greek state church. In 1833, the regency of Greece, at the request of thirty-six metropolitans, declared the orthodox Oriental Church of Greece independent of every foreign ecclesiastical authority, and, after the model of the Russian Church, organized for the administration of the Church a "Holy Synod." This independent constitution was recognised by the patriarch of Constantinople in 1850.

(For a fuller account of this branch of the Greek Church, see GREECE.)

The Reformed Churches which arose in the 16th century made also several attempts to establish an understanding with the Greek Church. The Augsburg Confession and Luther's Smaller Catechism were translated into Greek, and, very early after the Reformation, a letter was addressed by Melancthon to the patriarch Joseph of Constantinople through a deacon Demetrius Mysus, who visited Germany in 1558. Another Lutheran embassy of a more imposing character, headed by the well-known Tübingen divines Andree and Crusius, visited Constantinople during the patriarchate of Jeremias (1576 to 1581). But both missions remained without result. Negotiations with the Reformed Churches were opened by the patriarch Cyril Lukaris, who in 1629 issued a decidedly Calvinistic confession of faith. But he was not only unable to carry his Church with him, but was himself deposed and imprisoned; and, to cut off future attempts of this kind, a doctrinal declaration was signed by the patriarchs of Constantinople, Alexandria, and Antioch, and many metropolitans and bishops, which, by clear and decided definitions, draws a marked line between the Greek and the Reformed Church. See CYRIL LUCAR. This exposition was generally adopted by the churches, and in a synod held in Jerusalem in 1672 it was adopted as the creed of the Greek Church. (See below.)

Several efforts have also been made by the Anglican churches to enter into intercommunion with the Greek Church, which during the last ten years have received the official indorsement of the English convocations and of the General Convention of the Protestant Episcopal Church of the United States. The plan has found many friends even among bishops of the Greek Church, some of whom are members and patrons of a Society for Promoting the Unity of Christendom [see ENGLAND], which comprises Anglicans, Roman Catholics, and Oriental Christians among its members.

11. *Doctrine.*—The Greek Church, in common with the Roman Catholic, recognises the infallible authority of the first seven councils. Its particular doctrines are laid down in a number of confessions of faith, among which the most important are, the Confession of patriarch Gennadius (q. v.), and the *Confessio orthodoxa catholice atque apostolice ecclesie orientalis* of Petrus Mogilas, metropolitan of Kiev, which in 1642 was sanctioned by a synod at Yassy, in 1643 signed by all the patriarchs, and in 1672 again sanctioned by a synod at Jerusalem, and declared to be an authentic exhibition of the doctrine of the Church.

The Greeks agree with the Roman Catholics in accepting as the rule of faith not alone the Bible, including the Deutero-canonical books, but also the traditions (q. v.) of the Church. They deny the procession of the Holy Ghost from the Son [see FILIOQUE], and reject the papal claim to supremacy and doctrinal authority. They admit the seven sacraments of the Roman Catholic Church, but differ in some of the rites used at their administration. They administer baptism by trine immersion, and confirmation in immediate connection with baptism, even in the case of infants. The right of administering confirmation is conceded to priests as well as to bishops. They administer the communion in both kinds, and even to children. (For their peculiarities in the sacraments of extreme unction and priestly orders, see EXTREME UNCTION and ORDERS.) They forbid marriage altogether to bishops; priests and deacons are forbidden to contract marriage after ordination, and must not have been married more than once, nor to a widow. Married priests must live separate from their wives during the time when they are actually engaged in Church service. They regard marriage as dissoluble in case of adultery, and regard fourth marriages as utterly unlawful. They do not permit the use of graven images, with the exception of that of the cross. They observe four

great fasts: the forty days of Lent, from Pentecost to the Feast of Sts. Peter and Paul, the fifteen days before Assumption Day, and the six weeks before Christmas; and, besides, the Wednesdays and Fridays throughout the year are fast days. At divine service they generally use the liturgy of St. Chrysostom, and on certain Sundays and festivals that of St. Basil. The liturgy of the Russian Church is in the Old Slavonic language; that of the Church in the kingdom of Greece, in modern Greek; that of the Church of Georgia, in the Old Georgian language. Instrumental music is forbidden, but singing is universally in use. The ordinary posture in public prayer is standing, the body being turned towards the east; only at Pentecost is kneeling in use. The sign of the cross is in more frequent use among them than in the Roman Catholic Church, but in a different form. The preaching of sermons is not common; generally a homily is read from ancient collections. Corresponding to the breviary of the Latin Church is the Horologion, which contains prayers for different hours of divine worship, a complete calendar (Menologion), and different appendixes for worship. Festivals peculiar to the Greek Church are the consecration of water on January 6 (Old Style) in commemoration of the baptism of Jesus in the Jordan, and the orthodox Sunday (*Estomihli*), with a litany anathematizing heretics and in honor of the imperial patrons, the prelates, and martyrs of the Church.

111. *Constitution and Statistics.*—The constitution of the Greek Church is, in many respects, similar to that of the Roman Catholic Church. They reject the claims of the pope to a supremacy over the whole Church, and are only willing to recognise him as the patriarch of one great section of the Church. The *higher* clergy (Archiereis) are the patriarchs, archbishops, and bishops, who have to live in celibacy; the *lower* clergy are divided into the regular clergy (monks; also called, from the color of their dress, the *black clergy*) and the secular clergy (also called, in opposition to the regulars, the *white clergy*, although their dress is, in fact, often of a brown, violet, or other color).

In point of ecclesiastical organization, the Greek Church consisted in 1869 of eleven groups, which were more or less independent of each other, namely, 1. The patriarchate of Jerusalem, which has 13 sees (metropolitan and 1 archiepiscopal). 2. The patriarchate of Antioch, with 6 metropolitan sees. 3. The patriarchate of Alexandria; it has 4 metropolitan sees. 4. The patriarchate of Constantinople, which has 135 sees (90 metropolitan and 4 archiepiscopal). 5. The patriarchate of Russia, which has 65 sees (5 metropolitan, 25 archiepiscopal). 6. Cyprus, 4 sees (of which 1 is archiepiscopal). 7. Austria, 11 sees (2 metropolitan). 8. Mount Sinai, 1 see. 9. Montenegro, 1 metropolitan see. 10. Greece, 31 sees (the archbishop of Athens is *ex officio* president of the Holy Synod). 11. Rumania, 4 bishops in Wallachia and 3 in Moldavia. The people of Servia and those of Bulgaria desire for their bishops a similar independence of Constantinople.

The statistics of the Greek Church, reported in 1867, were as follows:

Russia (in Europe, 51,000,000; Siberia, 2,600,000; Caucasus [total population, 4,257,000] not reported); total about.....	55,000,000
Turkey (inclusive of the dependencies in Europe and Egypt), about.....	11,500,000
Austria.....	2,921,000
Greece (inclusive of Ionian Islands).....	1,220,000
United States of America (chiefly in the territory purchased in 1867 from Russia).....	5,000
Prussia.....	1,500
China.....	200
Total.....	69,692,700

For fuller information on the several branches of the Church, see the articles RUSSIA; TURKEY; GREECE; AUSTRIA.

**Greek Church, United.** This is the name of those Christians who, while following the Greek rite, observing the general discipline of the Greek Church, and making use of the Greek liturgy, are yet united with the Church of Rome, admitting the double procession of the Spirit and the supremacy of the Roman pontiff, and accepting all the doctrinal decisions subsequent to the Greek schism which have force as articles of faith in the Roman Church. They have been allowed by the pope the same law of celibacy as among the other Greeks. They are also permitted to administer communion under both kinds. The United Greeks are found chiefly in Southern Italy, in the Austrian dominion, in Poland, in the Russian empire, and in Turkey. In Italy they are computed at 80,000, in Austria at about 4,000,000; and in Poland about 250,000. In Russia it is difficult to ascertain what their number is. As regards nationalities in Austria, they are divided into Rumanians and Ruthenians—the former being settled in Wallachia, Transylvania, and Eastern Hungary, the latter in Little Russia, Galicia, and North-eastern Hungary. The union of the Greek Christians of Wallachia and Transylvania dates from the end of the 12th century. The union of the Galician Greeks or Ruthenians is of much later date, about the close of the 17th century. The United Greeks, in 1868, had in Austria two archbishops, one for the Rumanian rite at Fogaras (with suffragan bishops at Szamos-Ujvar, Gran Wardein, and Lajos), and one for the Ruthenian rite at Lemberg (with bishops at Premizl, Kreuz, Eperies, and Mankacz). In Russia there is one bishop at Chelm. In European Turkey there is one bishop in Bulgaria; a patriarch in Antioch; three archbishops at Damascus, Emesa, and Tyre, and bishops at Aleppo, Beyroot, Bosra, Balbeck, Farzul, Jerusalem, Hauran, and Sidon. See *Annuario Pontificio* for 1869. (A. J. S.)

**Greekish** (Ἑλληνικός, *Hellenic*), another term (2 Macc. iv, 10) for GREEK (q. v.).

**Greek Language, BIBLICAL RELATIONS OF THE.** In treating of the peculiarities of the Greek found in the Sept. and N. T., we here substantially adopt Dr. Donaldson's article in Kitto's *Cyclopaedia*, s. v. The affinities between the Greek and the other branches of the Indo-Germanic family are copiously drawn out by Bopp, *Comparative Grammar*, etc. (Lond. 1860, 3 vols. 8vo, 2d edit. trans. by Eastwick from the Germ.). For its coincidences with the Hebrew, see PHIL. LOGY, COMPARATIVE.

1. *Historical Character.*—There has been much discussion as to the peculiar nature of the language used by the Septuagint translators and by the writers of the N. T. It would be useless to attempt to give an account of these discussions in this article. We shall simply indicate the main facts which have come out in the course of investigation, stating at the same time the theory which seems to account most satisfactorily for the peculiarities of Greek which these writings present.

In the earliest stages of a language the dialects are exceedingly numerous, every small district having peculiar variations of its own. Such we find to have been the case with Greek; for, though its dialects have generally been reckoned as four, we know that each of these was variously modified in various places. In course of time, however, one of these dialects, the Attic, drove the rest from the field of literary composition, and almost all Greeks who wrote books wrote in that dialect, wherever they might have been born. The Attic which they used underwent some changes, and then received the name of the κοινή or common dialect. This dialect has been used by Greeks for literary purposes from the time of Alexander the Great down to the present age.

While Attic thus became the literary language, the various communities spoke Greek as they had learned it from their parents and teachers. This spoken Greek would necessarily differ in different places, and it would gradually become very different from the stationary language which was used in writings. Now it seems that the language used by the Sept. and N.-T. writers was the language used in common conversation, learned by them, not through books, but most likely in childhood from household talk, or if not, through subsequent oral instruction. If this be the case, then the Sept. is the first translation which was made for the great masses of the people in their own language, and the N.-T. writers are the first to appeal to men through the common vulgar language intelligible to all who spoke Greek. The common Greek thus used was, however, considerably modified by the circumstances of the writers; and hence some have, but rather unnecessarily, termed the Greek in question the *Hebraistic* or Hellenistic dialect. See HELLENIST.

II. *Inflections.*—Max Müller justly affirms that the grammar of a language is “the most essential element, and therefore the ground of classification in all languages which have produced a definite grammatical articulation” (*Lectures on the Science of Language*, p. 74). Now the grammar of the Sept. and N. T., in very many of its departures from the common dialect, approximates to the mediæval Greek of Ptochoprodromus in the 12th century, and to the modern Greek of the present day, both of which are simply the language of the common people, as debased by time and vulgar usage. Thus the N. T. and modern Greek have no dual. In their declension of nouns we find a mixture of dialects, such as, for instance, *a* in the genitive singular of proper names in *ας*; and *ης* in the genitive, and *η* in the dative, of nouns in *ρα* (σπείρης, Acts xxvii, 1; μαχαίρη, Rev. xiii, 10, etc.). There is in both a change from the second to the third declension in the words νοῦς, σκότος, ἔλεος, and πλοῦτος. The N. T., however, declines some of them occasionally as of the second declension. Both display great peculiarities in the forms for the comparative and superlative of adjectives, such, for instance, as μείζοντα, 3 John 4. In modern Greek the optative mood is rare, and occurs only in wishes. It is rare also in the N. T., and in some of the books it does not occur at all. The modern Greek declines the second aorist as the first. This is the case frequently in the N. T. also, as ἔπεισα for ἔπεισον. The N. T. sometimes forms the imperative by means of ἀφήμι, as ἀφες ἐκβάλω, ἀφες ἰδωμεν. This is now the common form in modern Greek, ἀφες being contracted into ἀε. The second

person singular in the present passive or middle ends in modern Greek in the regular *σαι*; so in the N. T. *καυχᾶσαι* and *ἐβῆσαι*. The third person plural of the imperfect active of contracted verbs in modern Greek ends in *σαν*; so in Sept. and N. T. *ἔδουσαν*. There is a striking similarity in the conjugation of verbs in both. Both have a tendency to form all the parts regularly. Both also deal arbitrarily with augment. Both avoid the use of verbs in *μι*, and both generally strengthen pure verbs by the insertion of a *ν*. Sometimes they change the vowel *ε* into *α*, as *ἐλαῖτε*, in Jude 23 (see Cremer, s. v. *ἐλαία*). Instances of several of these peculiarities may be found in our texts of the classical writers, and a still larger number in our manuscripts of them; but it is to be noted that in them they appear as rarities; in the New Testament their occurrence is more frequent, and in modern Greek they have passed into customary forms. Some of these forms have been set down as Alexandrian or Macedonian, but Sturz (*De Dialecto Macedonica et Alexandrina*, Lipsiæ, 1808) has entirely failed to prove that there was either a Macedonian or an Alexandrian dialect. The Macedonian words which he has adduced indicate that the Macedonians were non-Hellenic. There are no forms adduced as Alexandrian which are not to be found in some earlier dialect. In fact, there is nothing in any of the statements to which he appeals to contradict the opinion that Alexandrians, like other Greek-speaking people, mixed up various dialects in their spoken language. The written language of the Alexandrians, as we know from the works of Philo and other residents in Alexandria, was the so-called "common dialect." Moreover, the Greek of the New Testament is to be found not in writings of any special locality, but in writings which made no pretensions to literary excellence, such as the fragments of Hegeſippus, some of the apocryphal gospels, the apostolical constitutions, the liturgies, the Chronicon Paschale, and Malalas.

III. *Syntax*.—Here the peculiar elements that mixed themselves with the common spoken language in the N.-T. writings make their appearance. The Hebrew element especially is noteworthy. The translators of the Septuagint went on the principle of translating as literally as possible, and consequently the form of the sentences is essentially Hebrew. Some of the writers of the N. T. were themselves Jews, or derived part of their information from Jews, and accordingly the form of portions of their writings, particularly in narrative, is influenced by Hebrew modes. At the same time, too much stress is not to be laid on this Hebrew influence, for the writers appear sometimes to differ from the classical types, not because they were Jews, but because they were simple plain-speaking (*τινὲς γλωτταν ἰδιωτέοντες*, Eusebius, *Hist. Eccl.* iii, 24) men, who cared little about rounded sentences. The Hebrew element shows itself in particular phrases and constructions, as in *ποιεῖν ἔλεος μετὰ τινος*; but the amount of this Hebrew element is not so great as it has often been supposed to be, and in some of the N.-T. writers it is scarcely noticeable at all. Generally speaking, the syntax, like the grammar, has a tendency towards modern Greek. It has, like it, frequent recourse to the use of prepositions, and we find such expressions even as *δόντα εἰς ἡμᾶς* (1 Thess. iv, 8). After the comparative *παρὰ* is frequently used instead of *ἤ* in the N. T.; in modern Greek it is always employed. On account of the rareness of the optative, and an avoidance of the infinitive by some of the writers, both the N. T. and modern Greek abound in the use of *ἴνα* with the subjunctive, and sometimes even with the indicative, as in Revelations. The neuter plural is more regularly joined with a plural verb in N.-T. Greek; it is always joined with it in modern Greek. Many other peculiarities in which the syntax and inflections of the N. T. and those of mod-

ern Greek agree might be noted. For the use of the Greek article, see ARTICLE.

IV. *Vocabulary*.—The words used by the N.-T. writers show a still greater variety of elements.

1. Here we notice distinctly, also, the tendency towards the modern language, as, for instance, in the use of *χορτάζω*, *to feed men*, in the frequent employment of diminutives, in attaching a weakened sense to words like *βάλλω*, which had originally the idea of vigor in them, and in a variety of adverbs and conjunctions rarely used by the classical writers. Some of these peculiar uses have been assigned to the supposed Alexandrian dialect; but in the discussions no attempt has been made to distinguish between what may have been pure Alexandrianisms, and what may have been common in Greek conversation, though not in Greek writings.

2. In the words we find a Latin element, as might be expected. The Latin words used in the N. T. are not very numerous, but they show plainly that the writers had no other desire than to call things by their common names. They do not translate them into Greek, as a scholar of those days or an imitator of Attic writings would have done. We find a few Greek phrases in the N. T. which have evidently been translated from Latin, such as *συμβούλιον λαβεῖν*—*consilium capere*.

3. There are also several Aramaic words used in the N. T., especially by Christ. Most of these words and expressions are of a peculiar nature. They are almost all of them utterances employed on some solemn occasion. They were at one time appealed to as proof that Jesus regularly used the Aramaic in his addresses to the people; but they have recently been adduced, and with considerable force, to prove exactly the contrary, that Jesus frequently used the Greek language in his public conversations as being more intelligible to all, but that, when powerfully moved or deeply touched, he employed Aramaic words, as being more expressive from their associations (Roberts, *Discussions on the Gospels*, pt. i, ch. iv). Besides this, the Hebrew or Aramaic has exercised an influence on the meanings of some Greek words, as, for instance, in the use of *ἁρεῖλημα* for a *sin*. In several instances, however, where this Hebrew influence has been set down as existing, a more satisfactory explanation is given in another way. Thus *δικαιοσύνη* is taken by some to mean *liberality* in 2 Cor. ix, 9, 10, because they suppose that *חַסְדִּים* has this meaning in Psa. cxii, 9, where the Sept. translates *δικαιοσύνη*. In both cases it may be doubted whether *δικαιοσύνη* ought to receive this meaning, and unquestionably in the second Epistle to the Corinthians it is much simpler to suppose that Paul looks on liberality as an essential part of righteousness, and righteousness therefore as including liberality.

4. There is also another element in the vocabulary of a peculiar nature. This arises from the novelty of the teachings combined with their exalted morality. The new thoughts demanded new modes of expression, and hence the writers did not hesitate to use words in senses rare, if not entirely unknown to the classical writers. This fact could not be fully illustrated without exhibiting the results of investigation into various characteristic words, such as *μυστήριον*, *δικαίος*, *δικαιοσύνη*, *δικαίω*, *πίστις*, *ζωή*, *θάνατος*, *δόξα*, *δοξάζω*, *δρόγη*, etc. These results seem to us to form no inconsiderable addition to the proof of the divinity of Christianity, for the grand moral ideas that were expressed by some of them are unique in the age in which they were uttered. Thus the word *ζωή* is frequently used to denote an entire and absolute consecration of soul, body, and spirit to God, for it is this entire consecration which they look upon as the life-principle of man. Living, with them, if it be not living to God in Christ, is not living at all, but death; and a death which works not merely in the soul, but also in the body. Plato and the Stoics had something

like this notion of ζῳή, but with them it was a speculation. They are continually reasoning about it. The writers of the N. T. treat it as an unquestionable realized fact. So, again, δόξα means glory; but the writers of the N. T. separate from it every notion of material splendor or earthly renown, and use it to denote that spiritual irradiation of the whole man which takes place when God reigns in him, when the image of God is realized in him. Thus we come short of God's glory when we fail to present the purity and holiness of his character and image in our characters. Thus the δόξα of the N. T. is purely spiritual and moral. Then, again, it is remarkable how, in the case of words like ἴσσο, λουτρού, and βαπτίζω, the material meaning often vanishes entirely out of sight, and the writers express by them the spiritually purifying power of Christ, which really and entirely cleanses both soul and body (Alexander, *Anglo-Catholicism not Apostolical*, p. 293). The moral fervor of the writers is also seen in their omission of certain words. Thus the sensuous ἑρᾶν is never used to express the idea which they had of love. The words εὐδαιμων and εὐτυχής are also unknown to the N. T., and, indeed, the writers do not use any word to express mere happiness: μακάριος is used several times to denote something more than mere earthly felicity. They avoid all words connected with mythology, such as the compounds of δαίμων, which, with its diminutive, is used in a peculiarly Jewish and Christian sense. The writers of the N. T. are also remarkable for confining a word to one meaning. Thus μέναινα is a turning of the whole soul from evil to good, and no other compound with μετά is used in the same sense, while Justin Martyr uses μέναινα as a change from good to evil as well as from evil to good, and he employs μεταγυνώσκω and μετατίθεσθαι, as well as μετανοέω, for the same idea.

V. *Literature*.—The works on the subject of this article are very numerous. Many of them are enumerated and criticised in Winer's *Grammatik des Neutestamentlichen Sprachidioms* (5th ed. Leipzig, 1844, 8vo); and Schirlitz's *Grundzüge der Neutestamentlichen Gräcität* (Giessen, 1861, 8vo); see also Lipsius, *Biblische Gräcität* (Lpz. 1863, 8vo). Much information will be found in works that discuss later Greek, such as Lobeck's *Phrynichus*, and Jacobs's *Achilles Tutiuis*, and especially in a *Glossary of Later and Byzantine Greek*, by E. A. Sophocles, published as vol. ii, new series, of the *Memoirs of the American Academy* (Cambridge and Boston, 1860, 4to). Much interesting and instructive matter is also to be found in the glossaries and articles given in the *Pandora*, a fortnightly periodical published in Athens.

The best GRAMMARS of the N. T., next the above work of Winer (of which the fourth ed., Leipzig, 1836, was translated by Agnew and Ebbecke, Philadel. 1840, 8vo; and the 6th ed., Lpz. 1855, by Masson, London, 1853, 8vo; revised and compared with the 7th ed. by Thayer, Andover, 1869, 8vo), are those of Stuart (Andover, 1841, 8vo), and Trollope (Lond. 1841, 8vo). The doctrine of the *article* has been especially discussed by Sharp (1st ed. Lond. 1798, 12mo) and Middleton (1st ed. Lond. 1808, 8vo). The *synonymes* have been well treated by Tittmann (Lips. 1829-32, 2 vols. 8vo; tr. in the *Bibl. Cabinet*, Edinb. 1833-37, 2 vols. 12mo), Trench (London, 1854, N. Y. 1857, 12mo), and Webster (Lond. 1864, 8vo). Grinfield's *Nov. Test. Hellenisticum* (Lond. 1843, 2 vols. 8vo) contains an ample collation of the N.-T. phraseology with that of the Sept., which his *Scholæ Hellenistica* (Lond. 1848, 2 vols. 8vo) extends to a comparison with Josephus, Philo, the fathers, and apocryphal works. The best LEXICONS of the N.-T. Greek are those of Parkhurst (ed. Rose, London, 1829, 8vo), Pasor (ed. Fischer, Lips. 1774, 8vo), Schöttgen (ed. Krebs et Spohn, Hal. 1819, 8vo), Simonis (including the Sept., Hal. 1762, 4to), Schleussner (4th ed. Lips. 1819, 4 vols. 8vo), Bretschneider (2d ed. Lips. 1829, 2 vols. 8vo), and Wahl (2d ed. Lipz. 1829, 2 vols. 8vo),

especially the completely remodelled issue of the last by Dr. Robinson (N. Y. 1850, 8vo). The latest are Wilkii *Clavis N. T.* (Lips. 1863, 8vo), and Cremer, *Bibl. theol. Wörterbuch der N. T. Gräcität* (Gotha, 1866, 8vo).

#### Greek Versions of the Holy Scriptures.

These, of course, except the modern Greek version of the N. T., are confined to the Old Testament, including the Apocrypha (q. v.).

I. THE SEPTUAGINT.—This is the most important of all the ancient versions, whether in the Greek or any other language. See SEPTUAGINT.

II. AQUILA.—It is a remarkable fact that in the 2d century after Christ there were three versions executed of the Old-Testament Scriptures into Greek. The first of these was made by Aquila (אֲקִילָא or אֲקִילָא, Ἀκυλάς), a native of Sinope, in Pontus, who had become a proselyte to Judaism. The Jerusalem Talmud (see Bartolucci, *Bibliotheca Rabbin.* iv, 281) describes him as a disciple of Rabbi Akiba; and this would place him in some part of the reign of the emperor Hadrian (A. D. 117-138). It is supposed that the object of his version was to aid the Jews in their controversies with the Christians; and that, as the latter were in the habit of employing the Sept., they wished to have a version of their own on which they could rely. It is very probable that the Jews in many Greek-speaking countries were not sufficiently acquainted with Hebrew to refer for themselves to the original, and thus they wished to have such a Greek translation as they might use with confidence in their discussions. Such controversies were (it must be remembered) a new thing. Prior to the preaching of the Gospel, there were none besides the Jews who used the Jewish Scriptures as a means of learning God's revealed truth, except those who either partially or wholly became proselytes to Judaism. But now the Jews saw to their grief that their Scriptures were made the instruments for teaching the principles of a religion which they regarded as nothing less than an apostasy from Moses.

This, then, is a probable account of the origin of this version. Extreme literality and an occasional polemical bias appear to be its chief characteristics. The idiom of the Greek language is very often violated in order to produce what was intended should be a very literal version; and thus not only sense, but grammar even, was disregarded: a sufficient instance of this is found in the rendering of the Heb. participle פָּנָה by σύν, as in Gen. i, 1, σύν τὸν οὐρανὸν καὶ σύν τὴν γῆν, "quod Græca et Latina lingua omnino non recipit," as Jerome says. Another instance is furnished by Gen. v, 5, καὶ ἔζησεν Ἀδὰμ τριάκοντα ἔτος καὶ ἑννακῶσια ἔτος.

It is sufficiently attested that this version was formed for controversial purposes; a proof of which may be found in the rendering of particular passages, such as Isa. vii, 14, where פָּרְזָה, in the Sept. παρθένος, is by Aquila translated *ῥαίνας*; such renderings might be regarded perhaps rather as modes of avoiding an argument than as direct falsification. There certainly was room for a version which should express the Hebrew more accurately than was done by the Sept.; but if this had been thoroughly carried out it would have been found that in many important points of doctrine—such, for instance, as in the divinity of the Messiah and the rejection of Israel, the true rendering of the Hebrew text would have been in far closer conformity with the teaching of the New Testament than was the Sept. itself. It is probable, therefore, that one polemical object was to make the citations in the New Testament from the Old appear to be inconclusive, by producing other renderings (often probably more literally exact) differing from the Sept., or even contradicting it. Thus Christianity might seem to the Jewish mind to rest on a false basis. But a really

critical examiner would have found that in many points of important doctrine the New Testament definitely rejects the reading of the Sept. (when utterly unsuited to the matter in hand), and adopts the reading of the Hebrew. The very circumstance that Aquila's version was adopted and valued by the Jews would tend to create a prejudice against it among the fathers, independently of all perversion of Messianic passages. Irenæus, the earliest writer who mentions Aquila, pronounces an unfavorable opinion respecting his translation (*Adv. Hæres.* iii, 24, p. 253, ed. Grabe). So also Eusebius (*Ad Psalm.* xc, 4) and Philastrius. Jerome speaks of him in various parts of his writings, sometimes disparagingly, and again in terms of commendation: the former in allusion to his doctrinal prepossessions, the latter in reference to his knowledge of the Hebrew language and exceeding carefulness in rendering. That this version was employed for centuries by the Jews themselves is proved indirectly by the 146th Novella of Justinian.

It is mentioned (Jerome, *in Ezek.* iii) that Aquila put forth a second edition (i. e. revision) of his version, in which the Hebrew was yet more servilely followed, but it is not known if this extended to the whole or only to three books, namely, Jeremiah, Ezekiel, and Daniel, of which there are fragments.

Aquila often appears to have so closely sought to follow the etymology of the Hebrew words that not only does his version produce no definite idea, but it does not even suggest any meaning at all. If we possessed it perfect it would have been of great value as to the criticism of the Hebrew text, though often it would be of no service as to its real understanding. (See Fürst, *Bibliotheca Judaica*, i, 29.) See AQUILA.

III. THEODOTIŌN.—The second version, of which we have information as executed in the 2d century, is that of Theodotion. He is stated to have been an Ephesian, and a Jewish proselyte; and he seems to be most generally described as an Ebionite (Irenæus, *Adv. Hæres.* iii, 24): if this is correct, his work was probably intended for those semi-Christians who may have desired to use a version of their own instead of employing the Sept. with the Christians, or that of Aquila with the Jews. But it may be doubted if the name of translation can be rightly applied to the work of Theodotion: it is rather a revision of the Sept. with the Hebrew text, so as to bring some of the copies then in use into more conformity with the original. This he was able to do (with the aid probably of some instructors), so as to eliminate portions which had been introduced into the Sept. without really being an integral part of the version, and also so as to bring much into accordance with the Hebrew in other respects. But his own knowledge of Hebrew was evidently very limited; and thus words and parts of sentences were left untranslated, the Hebrew being merely written with Greek letters.

Theodotion, as well as Aquila, was quoted by Irenæus, and against both there is the common charge laid of corrupting texts which relate to the Messiah: some polemical intention in such passages can hardly be doubted. The statement of Epiphanius that he made his translation in the reign of Commodus accords well with its having been quoted by Irenæus; but it cannot be correct if it is one of the translations referred to by Justin Martyr as giving interpretations contrary to the Christian doctrine of the New Testament. It appears from Jerome (*in Jer.* xxix, 17) that there were two editions of Theodotion's version.

There can be no doubt that this version was much used by Christians: probably many changes in the text of the Sept. were adopted from Theodotion: this may have begun before the Biblical labors of Origen brought the various versions into one conspectus. The translation of the book of Daniel by Theodotion was substituted for that of the Sept. in ecclesiastical use as early at least as the first part of the 3d century. Hence

Daniel, as rendered or revised by Theodotion, has so long taken the place of the true Sept. that the latter version of this book was supposed not to be extant, and it has only been found in one MS. In most editions of the Sept. Theodotion's version of Daniel is still substituted for that which really belongs to that translation. By the Jews Theodotion's version seems never to have been much esteemed. For literature, see Fürst, *Bibliotheca Judaica*, iii, 420 sq. See THEODOTIŌN.

IV. SYMMACHUS is stated by Eusebius (*Hist. Eccles.* vi, 17; *Demonstr. Evang.* vii, 1) and Jerome (*Pref. in Ezram*) to have been an Ebionite; so, too, in the Syrian accounts given by Assemani (*Bibl. Orient.* ii, 278; iii, 1, 17); Epiphanius, however, and others style him a Samaritan. There may have been Ebionites from among the Samaritans who constituted a kind of separate sect, and these may have desired a version of their own; or it may be that, as a Samaritan, he made this version for some of that people who employed Greek, and who had learned to receive more than the Pentateuch. But perhaps to such motives was added (if, indeed, this were not the only cause of the version) a desire for a Greek translation not so unintelligibly bald as that of Aquila, and not displaying such a want of Hebrew learning as that of Theodotion. It is probable that if this translation of Symmachus had appeared prior to the time of Irenæus, it would have been mentioned by him; and this agrees with what Epiphanius says, namely, that he lived under the emperor Severus.

The style of the work is good, and the diction perspicuous, pure, and elegant (Thieme, *De puritate Symmachi*, Lips. 1755; Hody, *De Bibl. text. original.*). It is of less benefit in criticism than that of Aquila, but of greater advantage in interpretation. It would seem from Jerome that there was a second edition of it (*Comment. in Jerem.* xxxii; *in Nah.* iii). For literature, see Fürst, *Bibl. Jud.* iii, 399 sq. See SYMMACHUS.

V. THE FIFTH, SIXTH, AND SEVENTH VERSIONS.—Besides the translations of Aquila, Symmachus, and Theodotion, the great critical work of Origen comprised as to portions of the Old Test. three other versions, placed for comparison with the Sept., which, from their being anonymous, are only known as the fifth, sixth, and seventh, designations taken from the places which they respectively occupied in Origen's columnar arrangement. Ancient writers seem not to have been uniform in the notation which they applied to these versions, and thus what is cited from one by its number of reference is quoted by others under a different numeral.

These three partial translations were discovered by Origen in the course of his travels in connection with his great work of Biblical criticism. Eusebius says that two of these versions (but without designating precisely which) were found, the one at Jericho, and the other at Nicopolis, on the gulf of Actium. Epiphanius says that what he terms the fifth was found at Jericho, and the sixth at Nicopolis, while Jerome speaks of the fifth as having been found at the latter place.

The contents of the fifth version appear to have been the Pentateuch, Psalms, Canticles, and the minor prophets: it seems also to have been referred to in the Syro-Hexaplar text of the second book of Kings: it may be doubted if in all these books it was complete, or at least if so much were adopted by Origen. The existing fragments prove that the translator used the Hebrew original; but it is also certain that he was aided by the work of former translators.

The sixth version seems to have been just the same in its contents as the fifth (except 2 Kings), and thus the two may have been confused: this translator also seems to have had the other versions before him. Jerome calls the authors of the fifth and sixth "Judæicos translatōres," probably meaning Jewish Christians, for the translator of this must have been a Christian

when he executed his work, or else the hand of a Christian reviser must have meddled with it before it was employed by Origen, which seems, from the small interval of time, to be hardly probable. For in Hab. iii, 15, the translation runs, *ἐξήλθε τοῦ πᾶσι τῶν λαῶν σου εὐὰ Ἰησοῦ τοῦ χριστοῦ σου*.

Of the seventh version very few fragments remain. It seems to have contained the Psalms and minor prophets, and the translator was probably a Jew.

From the references given by Origen, or by those who copied from his columnar arrangement and its results (or who added to such extracts), it has been thought that other Greek versions were spoken of. Of these, ὁ Ἐβραϊὸς probably refers to the Hebrew text, or to something drawn from it; ὁ Σύρος, to the Old Syriac version; τὸ Σαμαρειτικόν, probably a reference to the Samaritan text, or some Samaritan gloss; ὁ Ἑλληνικός ὁ Ἄλλος, ὁ ἀνεπιγραφός, some unspecified version or versions.

The existing fragments of these varied versions are mostly to be found in the editions of the relics of Origen's Hexapla, by Montfaucou and by Bardh. (See Eriphanius, *De Ponderibus et Mensuris*, cap. 17; Eusebius, *Hist. Eccles.* vi, 16; Jerome, *Comment in Tit.* cap. 3; *Apolog. contra Rufin.* ii, 34; Hody, p. 530, sq.) See ORIGEN.

VI. THE GRECO-VENETA VERSION.—A MS. of the 14th century, in the library of St. Mark at Venice, contains a peculiar version of the Pentateuch, Proverbs, Ecclesiastes, Canticles, Ruth, Lamentations, and Daniel. All of these books, except the Pentateuch, were published by Villoison at Strasburg in 1784; the Pentateuch was edited by Ammon at Erlangen in 1790-91. The version itself is thought to be four or five hundred years older than the one MS. in which it has been transmitted; this, however, is so thoroughly a matter of opinion, that there seems no absolute reason for determining that this one MS. may not be the original, as well as the only one in existence. In any case, the MS. cannot be considered earlier than the 14th century, or the version earlier than the 9th. It is written in one very narrow column on each page; the leaves follow each other in the Hebrew order, so that the book begins at what we should call the end. An examination of the MS. suggested the opinion that it may have been written on the broad inner margin of a Hebrew MS., and that for some reason the Hebrew portion had been cut away, leaving thus a Greek MS. probably unique as to its form and arrangement. As to the translation itself, it is on any supposition too recent to be of importance in criticism. It may be said briefly that the translation was made from the Hebrew, although the present punctuation and accentuation is often not followed, and the translator was no doubt acquainted with some other Greek versions. The language of the translation is a most strange mixture of astonishing and capricious barbarism with attempts at Attic elegance and refinement. The Doric, which is employed to answer to the Chaldee portions of Daniel, seems to be an indication of remarkable affectation. The author was probably a Christian of Byzantine, but of Jewish extraction. (See Eichhorn, *Allg. Bibl.* iii, 371; v, 743; vii, 193; Dabler, *Vers. Græc. Argent.* 1786.)—Smith, s. v. Versions; Kitto, s. v. See VENETO-GREEK.

**Green** is the rendering in the A. V. of the following terms in the original [see COLOR]: prop. some form of the root *קָרַח*, *yarak'*, to be pale green, as grass or an affrighted person, *χλωρός*; also *נֶזֶדֶן*, *de'shè*, early vegetation; other less appropriate or less usual words so rendered are *לֶחֶךְ*, *lach*, Gen. xxx, 37; Judg. xvi, 7, 8; Ezek. xvii, 24; xx, 47, moist with sap (as in Numb. vi, 3), like *ὑγρός*. Luke xxiii, 21, and like *רֹחֵף*, *ratob'*, juicy, Job viii, 16; *רֹחֵף*, *ruanan'*, verdant with foliage (in connection with "tree," etc., "fresh" in *Psa.* xcii, 10; "flourishing" in ver. 19); but in *Esth.*

i, 6, the word is *כַּרְפָּס*, *karpas'*, fine linen (q. v.). i. e. *κάρπασος*, *carbasus*. See also EAR (OF CORN); FIG.

**Green, Ashbel**, D. D., an eminent Presbyterian divine, was born at Hanover, Morris Co., N. J., July 6, 1762. He taught school for a while, and in his leisure hours studied to prepare himself for college. When the Revolution broke out he enlisted, and was for a time carried away by the infidel notions which prevailed among his new associates. He soon resolved, however, to make the divinity of the Bible the subject of thorough investigation, and, while seeking for proofs in the Bible itself, he had not gone far before he was cured of his skepticism. He entered the College of New Jersey in the spring of 1782, and graduated with high honors in 1784. He was immediately appointed tutor in the college, and two years after professor of mathematics and natural philosophy. He was licensed to preach by the presbytery of New Brunswick in Feb. 1786, and, after declining a call from the Independent congregation of Charleston, S. C., accepted one from the Second Presbyterian Church in Philadelphia, where he was installed in May, 1787, as colleague of the Rev. Dr. Sprout. In 1787 he was elected a member of the American Philosophical Society, and in 1790 of the General Assembly of the Presbyterian Church, where he moved for a renewal of communications with the Congregational Church. He was made D. D. by the University of Pennsylvania in 1792, and in the same year was appointed chaplain to Congress, which office he held until 1800. In 1802 the College of New Jersey was destroyed by fire, and Dr. Green, who had been one of the trustees since 1790, was appointed to fill the place of the president, Dr. Smith, while the latter went on a collecting tour through the States. The establishment of a Presbyterian Theological Seminary was first proposed in the General Assembly of May, 1809, and a board of directors having been appointed in May, 1812, the latter chose Dr. Green for their president: he held this office until his death. Being elected president of the College of New Jersey in August, 1812, he accepted the appointment, and resigned his pastoral charge. In the same year he was made LL. D. by the University of North Carolina. At the college he delivered a series of *Lectures on the Assembly's Catechism*, which were afterwards published by the General Assembly's Board of Publication (2 vols. 12mo) and in the *Christian Advocate*. Resigning the presidency of the college in September, 1822, he took up his residence at Philadelphia, where he published for twelve years the *Christian Advocate*, a religious monthly, writing the greater part of it himself, besides preaching to an African congregation for two years and a half, and often supplying the pulpits of other ministers. He died May 19, 1848. He was a very abundant writer; his principal works, in addition to those already named, are, *Ten occasional Sermons* (1790-1836);—*Six Addresses, Reports, etc.* (1793-1836);—*History of Presbyterian Missions* (1 vol.);—*Discourses on the College of New Jersey, together with a History of the College* (1822); etc. He also superintended an edition of *Dr. Witherspoon's Works* (1802), and left in MS. a biography of that great man. For several years, beginning with 1804, he was the responsible editor of the *General Assembly's Magazine*. See *Life of Ashbel Green, V. D. M., prepared for the Press at the Author's request by J. H. Jones* (N. Y. 1849, 8vo); Sprague, *Annals*, iii, 79 sq.; Allibone, *Dict. of Authors*, i, 731; *Princeton Review*, 1849, p. 563.

**Green, William**, a divine of the Church of England, was a fellow of Clare Hall, Cambridge, and afterwards rector of Hardingham, Norfolk. He wrote a *New Translation of the Psalms, with Notes* (Lond. 1763, 8vo);—*A New Translation of Isaiah, with Notes* (ch. vii-iii; 1776, 8vo);—and *Poetical Parts of the Old Testament, translated from the Hebrew, with Notes* (Camb. 1781, 4to). He died in 1794.—*Europ. Mag.*

**Greene, Thomas**, bishop of Ely, was born at Norwich in 1658, and educated at Benedict College, Cambridge, of which he obtained a scholarship, and in 1680 a fellowship. After numerous preferments he obtained the vicarage of St. Martin's-in-the-Fields, Westminster, in 1716. This he held in *commendam* with the bishopric of Norwich, to which he was consecrated October 8, 1721, but was thence translated to Ely, September 24, 1723. George I, soon after his accession, appointed him one of his domestic chaplains. He died in 1738. He wrote, 1. *The Sacrament of the Lord's Supper explained to the meanest capacities* (Lond. 1710, 12mo);—2. *The Principles of Religion explained for the Instruction of the Weak* (id. 1726, 12mo);—3. *Four Discourses on the four Last Things* (Lond. 1734, 12mo).—Hook, *Eccles. Biog.* vol. v.

**Greenfield, William**, a celebrated linguist, was born in London April 1, 1799. In his thirteenth year he was apprenticed to a London bookseller. His love of the study of languages was so great that, while laboring all day in his master's service, he acquired successively Hebrew, Greek, Latin, and several modern languages. In 1822 he submitted to Mr. Bagster, a publisher in London, the prospectus of a Polyglot Grammar of nearly thirty languages, on the principles of comparative grammar. He was employed to edit the Comprehensive Bible issued by Bagster in 1826. In 1828-9 he edited an edition of the Syriac New Testament, and in 1830 he prepared a revised translation of the N. T. into Hebrew, both for Bagster's Polyglot. He prepared a *Lexicon of the Greek N. T.*, followed by an abridgment of Schmidt's Greek Concordance. In 1830 he was appointed editor of foreign versions to the British and Foreign Bible Society. His excessive labor overmastered his strength, and he died Nov. 5, 1831.—Kitto, *Cyclop.* p. 178; Allibone, *Dict. of Authors*, i, 734; *Imperial Magazine*, Jan. and Feb. 1834.

**Greenham, Richard**, an English Puritan divine, was born in 1531, and was educated at Pembroke Hall, Cambridge. He was for many years pastor of Drayton, near Cambridge, where he died in 1591. He published a number of sermons, treatises, etc., which, after his death, were collected and published under the title *The Works of the Rev. Richard Greenham, revised and published by H. H.* (7th ed. Lond. 1681, fol.).—Darling, *Cyclop. Bibliographica*, i, 1312.

**Greenhill, William, M.A.**, a learned and pious Nonconformist divine, was born in Oxfordshire. He entered Magdalen College, Oxford, in 1604, and obtained the living of Stepney in 1656. Having joined the Independents during the Commonwealth, he was ejected at the Restoration, and died about 1677. His principal work is *An Exposition of the Prophet Ezekiel, with useful Observations thereupon* (Lond. 1645, 5 vols. 4to). A new edition, revised and corrected by Sherman, was published in 1839 (Lond. imperial 8vo).—Darling, *Cyclop. Bibliographica*, s. v.

**Greenland**, a region in North-eastern America of unknown extent northwards, stretches from its southern extremity, Cape Farewell, along the Atlantic and Arctic Oceans on the east, and Davis's Strait, Baffin's Bay, and Smith's Sound on the west. It obtained its name from an Icelander, Eric Rauoi (the Red), who led thither an expedition in 985 or 986, and founded two settlements on the west coast, called the Oestre and Westre Bygd (the east and west colonies). About four centuries afterwards, the Westre Bygd was destroyed by the pestilence called the "black death," combined with the attacks of the aborigines; and a century after this, the Oestre Bygd suffered the same fate. Greenland was visited, and its west coast explored, successively by Frobisher, Davis, and Baffin, the latter having advanced as far as lat. 78° N. (the limit of the inhabited country). More recently Dr. Kane has extended his explorations as far as lat. 82° 0'. or within 52½ miles of the north pole. In 1868 and 1869 new ex-

peditions to explore the coast were sent out from Germany. The most important incident in connection with this bleak region is the settlement, in 1721, of Hans Egede (q. v.), a Norwegian clergyman, at Godthaab (lat. 64° N.), and with him a colony of 43 men. The colony was supported by the Danish government till 1731, when the supplies were stopped; but a few years afterwards a pension of 2000 rix dollars a year was granted to the mission. Since that time the Danes have established thirteen different colonies or factoris along the west coast, seven in North Greenland (north of lat. 67° N.), and six in South Greenland; the total population of the colonies being about 10,000, inclusive of 250 Danes. The Danish (Lutheran) Missionary Society seeks to sustain various institutions formed in Greenland in eight different places. The Moravians, in 1866, supported in Greenland 6 stations, 25 missionaries, 56 native assistants, and their congregations had a total membership of 1801. See Chambers, *Cyclop.* s. v.; Newcomb, *Cyclop. of Missions*; Schem, *American Eccles. Almanac* for 1869. (A. J. S.)

**Greensky, Peter**, an Indian of the Lake Superior country, one of the first converts under the missionary labors of John Sunday (q. v.), was born in 1807, and became a Christian in 1830. He received license Sept. 21, 1844. Subsequently he was employed as an interpreter to Rev. Mr. Daugherty, of the Presbyterian Board, for several years. June 18, 1859, he was again licensed as a local preacher in the Methodist Episcopal Church; and in 1862 he was admitted into full connection in the Conference, and ordained deacon. For the two years following he was in charge of the Oceana Indian Mission. In 1864 he was again appointed in charge of the Pine River Indian Mission. In 1865 he was ordained elder, and returned to Pine River. He died of quick consumption, April 8, 1866. Among his own people he had extraordinary influence. He was a laborious student, a good theologian, and a powerful preacher. The Indians in Northern Michigan are greatly indebted to him for their civilization and piety.—*Minutes of Conferences*, 1866, p. 170.

**Greenwood, Francis William Pitt**, a Unitarian minister, was born in Boston in 1797. He graduated at Harvard in 1814, and then pursued his theological studies. He became pastor of the New South Church, Boston, in 1818, but was soon compelled, on account of his health, to go to Europe. He returned in 1821, and passed several years in Baltimore, where he became editor of the *Unitarian Miscellany*. In 1824 he was made associate minister of King's Chapel, Boston, and, after 1827, pastor. In 1837-38 he was associate editor of the *Christian Examiner*, to which he was an able and frequent contributor for many years. He died August 2, 1843. Dr. Greenwood was a man of rare gifts; an eloquent preacher, and a very accomplished writer. "He gladly acknowledged as Christian brethren those who led a Christian life, though their theological opinions might lead them to exclude him from the fellowship of the saints." He published *Chapel Liturgy* (Boston, 1827, 12mo);—*Psalms and Hymns* (1830);—*History of King's Chapel* (Boston, 1833, 12mo);—*Sermons to Children*;—*Lives of the Twelve Apostles* (1838);—*Sermons of Consolation* (1842);—*Sermons on various Subjects* (1844, 2 vols. 12mo).—Allibone, *Dict. of Authors*, i, 736; *Christ. Examiner*, xxxvi, 227.

**Greeting** (prop. שָׁלוֹם, *shalom'*, peace; χαίρω, to wish joy; also שְׁאַל, *shaal'*, to ask after one's health). See SALUTATION.

**Grégoire, Henri**, constitutional bishop of Blois, was born at Vého, near Luneville, Dec. 4, 1750. He was educated at the Jesuits' College of Nancy, entered the Church, and became teacher in the school at Pont-à-Mousson. When the French Revolution broke out he embraced its principles, and in 1789 he was elected a member of the States-general. He soon became distinguished for the boldness of his opinions on civil and

religious liberty; his eloquent efforts in favor of the Jews and the blacks placed him high among the friends of humanity. It was on his motion that the Convention in 1794 abolished negro slavery. He was the first among the clergy to take the constitutional oath. In Sept. 1792, he advocated the abolition of royalty in the Convention, yet proposed also the abolition of capital punishment, intending thus to save the king's life. In the Reign of Terror he had the courage to resist in the Convention the storm of invectives from the tribunes, and the threats from the Mountain. "Are sacrifices demanded for the country?" he said; "I am accustomed to make them. Are the revenues of my bishopric demanded? I abandon them without regret. Is religion the subject of your deliberations? It is a matter beyond your jurisdiction; I demand the freedom of religious worship." Later, he was one of five who opposed the accession of the first consul to the throne. In 1814 he signed the act deposing the emperor, and the next year, as member of the Institute, declined signing the *additional act*, which led, in the Restoration, to his expulsion both from that body and from the bishopric. He then devoted himself to literary and benevolent labors until his death, April 28, 1831. He had a large share in the foundation of some of the greatest institutions of that period, such as the *Bureau des Longitudes*, the *Conservatoire des Arts et M<sup>ét</sup>iers*, and the *Institut National*. Notwithstanding his great services to religion and humanity, and his repeated refusals, in the worst periods of the Revolution, to abandon the Roman Catholic Church, he was treated by the authorities of that Church, on their return to power, not merely with neglect, but with cruelty. The archbishop of Paris refused him the last sacraments, except on condition of retracting the constitutional oath taken forty years before, and also refused him Catholic burial! His principal publications are *Essai sur la régénération morale, physique et politique des Juifs* (Metz, 1789);—*Mémoire en faveur des gens de sang mêlé de St. Domingue*, etc. (1789);—*De la littérature des Nègres; recherches sur leurs facultés intellectuelles et morales*;—*Libertés de l'Eglise Gallicane* (1826, 2d edit.);—*Histoire des sectes religieuses dans les quatre parties du monde* (2d ed. 1828, 6 vols. 8vo);—*Chronique religieuse* (6 vols. 8vo);—*Recueil de lettres encycliques*;—*Annales de la religion* (18 vols. 8vo).—Herzog, v, 319; Migne; Carnot, *Mémoires de Grégoire* (1837, 2 vols. 8vo); Hoefler, *Nouv. Biog. Générale*, xxi, 882.

zum Gebrauch der Evangelischen Brudergemeinden) he was pre-eminent, furnishing more than three hundred hymns of his own. He published, besides, a valuable collection of chorals and anthems, and composed a number of the liturgical services which are still in use. (E. de S.)

**Gregorian**, a title of the *Armenian Church* (q. v.), taken from *Gregory of Armenia* (q. v.).

**Gregorian Calendar**. See CALENDAR.

**Gregorian Chant, RITE, LITURGY**. Pope Gregory the Great established a form for the administration of the sacraments (after that of Gelasius, which may be found in the "*Sacramentary of Gregory*"), collected, arranged, and improved the chants which had already been used for centuries before his time, and established a musical school to teach chanting at Rome, in which he took great interest up to the time of his death. The collection of chants compiled by Gregory forms the basis of modern cathedral music in the Church of Rome, and also in the Church of England.—Palmer, *Origines Liturgice*, vol. i, § 6. See LITURGY.

"The foundation of the system of the Gregorian tones may be explained thus: As there are seven notes from *a* to *g*, there should be at least seven different modes, or tone-systems, varying from each other according to the position of the semitones; but as the final or key-note of each mode might be the first note or might be in the middle, the same scale could therefore, as it were, be viewed from two sides, which gave rise to the fourteen system of tones. It was, however, found that two of those were at variance with a fundamental rule of church song, viz. that every mode or scale must possess a perfect fifth or perfect fourth; and that the modes containing a false fifth from *b* natural to *f* natural, or a false fourth from *b* to *f*, could not be used, and, on account of the dissonant character of these intervals, must be rejected. This reduced the number of the tones to twelve. It was further found, that as four of the twelve were merely transpositions of some of the others, there were really only eight, and that they were in every respect sufficient for all the purposes of church song. The eight Gregorian tones, as they are handed down to us, were in time fixed by a royal mandate of Charlemagne—*octo toni sufficere videntur*. The following example in modern notation in the G clef will show the position of the eight Gregorian tones:

**Gregor, CHRISTIAN**, an eminent bishop and hymnologist of the Moravian Church, was born Jan. 1, 1723, at Diersdorf, in Silesia, and died Nov. 6, 1801, at Berthelsdorf, in Saxony. He spent a year and a half (1770-1772) in America, on an official visit to the churches of the Brethren. Among the compilers of the large German Moravian Hymn-book (*Gesangbuch*

The different character of the Gregorian tones depends entirely on the places of the semitones, which in the above example are marked with a  $\frown$ . Several of the tones have various endings, some as many as four, while the second, fifth, and sixth tones have each only one ending. For a full and interesting account of the Gregorian church music, see N. A. Janssen's *Grundre-*

*gels des Gregorianischen Kirchengesanges*, published by Schott in Mainz, 1846."—Chambers, *Encyclop.* s. v.

**Gregorian Mass.** See MASS.

**Gregorian Year.** See YEAR.

**Gregorius** (Γρηγόριος) **Agrigentinus**, or *St. Gregory of Agrigentum*, a Greek theologian, was born near Agrigentum about A.D. 524. Destined for the priesthood by his pious parents, he studied at Jerusalem for five years, and was there ordained deacon. Thence he went to Antioch and Constantinople, and gained high repute in both places for learning, eloquence, and sanctity. From Constantinople he went to Rome, and the pope named him bishop of Agrigentum in Sicily. Two disappointed aspirants for the see hired a prostitute to charge him with fornication. He went to Constantinople, and was pronounced innocent by Justinian. Returning to Agrigentum, he died there, Nov. 23, 562. He wrote *Orationes* and *Conciones*; also a *Commentarius in Ecclesiasten*. This last is lost; the others are given in the life of Gregory, by Leontius, to be found in Cajetanus, *Sancti Siculi*, vol. i.—Hoefler, *Nouv. Biog. Générale*, xxi, 856; Cave, *Hist. Lit.* anno 940; Clarke, *Succession of Sacred Literature*, ii, 512.

**Gregorius Alexandrinus** (*Gregory of Alexandria*), patriarch from A.D. 341 to 348. He was chosen by the Arian prelates at the Council of Antioch, A.D. 341, though the see really belonged to Athanasius, then in exile. He is said to have been a Cappadocian, but his early history is not known. The orthodox party charge him with very violent and oppressive conduct. The Council of Sardica (A.D. 347) declared that he was "not only not a bishop, but not a Christian." The precise date of his death is uncertain, but it seems to have been shortly before the return of Athanasius from his second exile, A.D. 349. Socrates and Sozomen, however, say that he was deposed by his own party because he did not act with sufficient zeal against their enemies (A.D. 354).—Socrates, *Hist. Eccl.* ii, 10, 14; Sozomen, *Hist. Eccl.* iii, 5, 7; Theodoret, *Hist. Eccl.* ii, 4, 12; Tillemont, *Mémoires*, t. viii; Hoefler, *Nouv. Biog. Générale*, xxi, 875.

**Gregorius Antiochensis** (*Gregory of Antioch*), a Greek theologian of the 6th century. First a monk at Constantinople, he became afterwards abbot of a monastery on Mt. Sinai. The Arabs besieged the convent, but he succeeded in making peace with them and in keeping it. He was appointed patriarch of Antioch on the deposition of Anastasius, A.D. 570 or 571 (Baronius makes it A.D. 573). One of his friends, Anatolius, was put to death with severe tortures on a charge of magic, and the people of Antioch accused Gregory of complicity with him, but he was acquitted. His enemies then charged him with incest with his own sister: of this, too, he was acquitted. Weary of contentment, Gregory gave up his see to Anastasius, and soon after died (about A.D. 594). He distinguished himself by his hostility to the *Acephali* (q. v.). When the imperial troops rebelled in Persia, Gregory brought them back by an oration, which is preserved by Evagrius, under the title *Δημοτορία πρὸς τὸν στρατὸν*: he wrote also *Λόγος εἰς τὰς μυροφόρους* (*oratio in mulieres unguentiferas*); and both are given in Gallandii *Bibl. Patrum*, t. xii. See Evagrius, *Hist. Eccl.* v, 6, 18; vi, 4, 11, 18, 24; Smith, *Dict. of Gr. and Rom. Biog. and Myth.* ii, 308; Hoefler, *Nouv. Biog. Générale*, xxi, 875.

**Gregorius Cæsariensis** (*Gregory of Cæsarea*), a presbyter of the city of that name in Cappadocia in the 10th century. He wrote a life of Gregory of Nazianzus, which is given in a Latin version by Billens, in his edition of Gregory of Nazianzus. It is also in Surius, *Vit. Sanct.* May, 121. We have also of Gregory a panegyric in *Patres Nicænos*, in Combefis, *Novum Auctarium*, ii, 547.—Hoefler, *Nouv. Biog. Générale*, xxi, 878; Clarke, *Succession of Sac. Lit.* ii, 565.

**Gregorius Monachus** (*Gregory the Monk*), a

Greek writer of the first part of the 10th century. Though always called "the monk," he was not such, as he did not live in a convent, but practised an ascetic life at his own home. His spiritual guide was St. Basil the Younger, after whose death he wrote two memoirs of him, one of which survives in the *Acta Sanctorum*, March, iii, 667. With many absurd stories, it gives a good deal of valuable historical matter.—Fabricius, *Bibl. Græca*, x, 206; Cave, *Hist. Lit.* anno 940; Hoefler, *Nouv. Biog. Générale*, xxi, 877.

**Gregorius Nazianzenus** (*Gregory of Nazianzus*, or *Nazianzum*), one of the greatest of the Greek Church fathers, was born either at Arianzus, a small village in Cappadocia, near the town of Nazianzus (or Nazianum), from which he derives his surname, and of which his father was bishop, or else in the town of Nazianzum itself. The date of his birth has never been precisely settled, but it was probably about A.D. 330 (see Ullmann, *Life of Gregory*, Appendix i). His pious mother, Nonna, devoted him when an infant to Christ and the Church. His education, which commenced at Cæsarea in Cappadocia, was prosecuted next at Cæsarea Philippi, and at Alexandria, and was finished at Athens, where he began a life-long intimacy with Basil the Great. See BASIL. He was also a fellow-student with Julian, afterwards the apostate emperor. Gregory, with a quick instinct, discerned the character of Julian even then, and said to one of his friends, "How great a scourge is here in training for the Roman empire!" He remained at Athens nearly ten years, part of which he employed in teaching rhetoric with great success. About A.D. 356 he returned to Nazianzum, where he intended to enter upon civil life. Shortly after he was baptized, and consecrated himself anew to the service of God, resolving that his gift of eloquence should serve no interests but those of God and the Church. But for his aged father, he would probably at this time have gone into the desert to lead an ascetic life, at least for some years. At home he remained, and devoted himself to the study of the Scriptures, living by rule a life of the strictest self-denial. About A.D. 359 he visited Basil in his retreat, and remained a short time with him in the practice of ascetic and devotional acts. Returning home at the request of his father, probably to aid in the settlement of a difficulty into which the aged bishop had fallen by signing the Armenian formula, which favored Arianism (Ullmann, *Life of Gregory*, ch. iv, § 2), he was soon after (perhaps), at Christmas, A.D. 361, ordained suddenly, and without forewarning, by his father, before the congregation. These "violent" ordinations were not uncommon in the early Church. Gregory was, however, greatly displeased, and pronounced the transaction "an act of spiritual tyranny." Either to calm his feelings, or to prepare himself thoroughly for his new functions, he again retired to his friend Basil in Pontus early in A.D. 362. The commands of his father and the calls of the Church brought him back to Nazianzum towards Easter, and on that festival he delivered his first oration.

The next six or seven years were spent in pastoral labor at Nazianzum; happily, it seems, on the part of Gregory, though with some mortification to his pride, from a change of feeling towards him on the part of the fickle populace, who, after almost forcing him to serve them, afterwards neglected his ministry (*Orat. iii*, Bened. ed. p. 69). His brother Caesarius, who practiced medicine, had become a favorite of Julian, and this prince endeavored, by his favors, to bring him back to paganism. The Christians murmured at seeing the son of a bishop living openly at the court of their enemy. Gregory succeeded in inducing Caesarius to return to Cappadocia (A.D. 362). Julian's edict forbidding Christians to read the pagan authors was a severe blow to the Christians, and none felt it more than Gregory. His two discourses against Julian (prepared after his death, A.D. 363) are written as

if against a personal enemy. "He takes eloquence away from us," he says, "as though we were thieves who had stolen it." Elsewhere, addressing the hearer, he writes: "Every thing else, riches, birth, glory, power, and all the vain pomps of earth whose brilliancy vanishes like a dream, I willingly abandon to you; but I will not abandon *eloquence*. I do not complain of the fatigues I have undergone by land and by sea to attain it. Please God that my friends and I may possess its power! Among the things I care for it stands foremost—that is, foremost after those which are above all, faith, and the hope which rises up above things visible." And again: "It is our duty to render thanks unto God that eloquence has again become free." These two discourses, it must be admitted, are really nothing but pamphlets, exhibiting little of the charity and mildness which one would expect from a Christian pastor speaking of a deceased enemy. There is, nevertheless, a certain grandeur in the indignation which Gregory pours out against Julian. At the close of the second discourse the orator grows calmer, and endeavors to prevent revenge being taken on the partisans of Julian: he says: "Let not the facility of avenging ourselves lead us to forget the duty of moderation. Let us leave to God's judgment the chastisement of those who have offended us . . . and be satisfied with seeing the people openly hissing our persecutors in the public places and in the theatres." Gregory's friendly relations with Basil came near being sadly interrupted. Gregory had, in 365, brought about a reconciliation between his friend and Eusebius of Caesarea. The latter dying in 370, Basil succeeded him as archbishop, and Gregory came to visit him in the year following. There was a contest between Basil and Anthimus, bishop of Tyana in Cappadocia, who pretended to be metropolitan of the province. Basil, in order to secure a useful ally, offered Gregory the bishopric of Sasima, a small unhealthy place on the frontier of the two provinces which divided Cappadocia. Gregory, after declining for some time, finally accepted, and was ordained bishop in 372; but when pressed by Basil to take his part actively, he answered "that he would not take up arms in his quarrel with Anthimus, as he did not wish to play the part either of battle-field or of prey." Retiring to Nazianzum a bishop without a bishopric, he remained with his father, whom he assisted in the government of his church. "He taught the people, defended the Church against the vexations of the Roman governors, and by his eloquence and virtue exerted that kind of religious supremacy which, in the early ages, formed part of ecclesiastical power" (Villemain, *Tableau de l'Eloquence chrétienne au quatrième siècle*, p. 133). Losing his father and mother almost at the same time (A.D. 374), he retired to a convent of Seleucia. He was still there, living in a calm which, as he said himself, "the hisses of heretics" could not disturb, when he heard of the death of Basil in 379. It affected him deeply, and he wrote a letter of encouragement and consolation to Gregory of Nyssa, the brother of his deceased friend. The Church of Constantinople had been for forty years a prey to Arianism, when Gregory was chosen as the most proper person to bring it back to orthodoxy. Though unwilling to be drawn out from the calm retirement he so much enjoyed, Gregory permitted himself to be led by the advice of his friends and the interests of the Church. His emaciated appearance, the marks of severe penance and of sickness, and his strange speech, made him at first a butt for the laughter and irony of the heretics at Constantinople. The orthodox had not a single church of their own in Constantinople; Gregory was therefore obliged to preach at first in a private house, which gave place to a church named *Anastasia*, in remembrance of the *revival* of faith. He taught and defended the Nicene Creed before crowded audiences attracted by his eloquence. It is then he was surnamed the *Theologian*,

on account of the profundity of his learning. His success excited his enemies still more against him, and his life was several times in danger. Peter, patriarch of Alexandria, who had appointed him bishop of Constantinople, sided afterwards against him, and favored the pretensions of a cynic philosopher called Maximus, who caused himself to be elected bishop of Constantinople (A.D. 380). Vainly did Theodosius cause St. Gregory to take possession of the church of St. Sophia at the head of a large troop of soldiers, assuring him of his protection, and causing a council assembled at Constantinople to confirm Gregory's election as bishop, and annul that of Maximus. He could not put an end to the intrigues and calumnies which pursued Gregory. Some bishops of Egypt and of Macedonia attacked the validity of his election on the plea that he was already bishop of Sasima, and that the canons forbade the transfer of a bishop from one see to another. Gregory offered to resign, saying, "If my election is the cause of trouble, throw me into the sea like Jonas, to allay the storm, though it was not I who raised it." This proposal was accepted with a haste which could not but wound the susceptibilities of Gregory. Before leaving Constantinople he assembled the clergy and the people in the church of St. Sophia, and delivered his farewell address—the grandest of all his orations. "Farewell," said he at the close; "farewell, church of Anastasia, so called in remembrance of our pious trust; farewell, monument of our late victory, thou new Siloa, where, after forty years' wandering in the desert, we had for the first time settled the ark of the covenant; farewell, too, thou grand and famous temple, our last trophy . . . farewell to you all, holy abodes of faith . . . farewell, holy apostles, celestial colony, my models in the combats I have sustained; farewell, episcopal chair, post at once so envied and so full of perils; farewell, ministers of God at his holy table . . . farewell, choir of the Nazarenes, harmony of psalms, pious watches, holiness of virgins, modesty of women, assemblies of widows and of orphans, glances of the poor turned to God and to me; farewell, hospitable houses, friends of Christ who have succored me in mine infirmities. . . . Farewell, kings of the earth, palaces, retinue, and courtiers of kings, faithful, I trust, to your master, but for the most part, I fear, faithless towards God . . . applaud, exalt unto heaven your new orator; the troublesome voice which displeased you is hushed. . . . Farewell, sovereign city, the friend of Christ, yet open to correction and repentance; farewell, Eastern and Western world, for whose sake I have striven, and for whose sake I am now slighted. Most of all, farewell, guardian angels of this church, who protected me in my presence, and who will protect me in my exile; and thou, holy Trinity, my thought and my glory, may they hold fast to thee, and mayest thou save them, save my people! and may I hear daily that they are increasing in knowledge and in virtue." On his way to exile Gregory stopped at Caesarea, where he delivered a funeral oration on St. Basil. In the year 382 he retired to Ariazus for quiet and repose. In 383 Theodorus invited him to take part in a council held at Constantinople. He declined, saying, "To tell the truth, I will always avoid these assemblies of bishops; I have never seen them lead to any good result, but rather increase evils instead of diminishing them. They serve only as fields for tournaments of words and the play of ambition." He added that, at all events, his health would prevent him from attending. He remained in retirement until his death in 389. A garden which he cultivated, a fountain, and the shade of a few trees, composed all his enjoyments. He divided his time between prayer and the writing of poems, in which he expressed the thoughts, hopes, and longings of a mind naturally inclined to dreaminess and melancholy. He is one of the most polished among the sacred writers of the 4th century, and

ranks first after Chrysostom and Basil. The richness of his imagination, developed in the solitude in which a great part of his life was spent, gives to his writings a charming freshness of tone which is seldom met with in the writers of that age. His letters are full of playful sprightliness, sometimes tinged with a slight under-current of harmless irony. A severe critic might show some passages bordering on declamation and bombast. But these faults were general at the time in which he lived; and a writer, however great, always bears more or less the imprint of his day. He is commemorated as a saint in the Roman Catholic Church on May 9, in the Greek Church on the 25th and 30th of January.

St. Gregory left a large number of *poetical* pieces. During the reign of Julian, when profane literature was a forbidden pursuit for Christians, Gregory, considering it as a powerful aid to piety, attempted to supply the wants of his brethren by means of religious poems on the plan of the classics. He accused of stupidity and ignorance (*σκαυοὶ καὶ ἀπαιδευτοὶ*) those who attempted to prevent the study of literature. "Most of his poetical works are religious meditations, which, in spite of the differences of time and manners, have still many points of affinity with the poetical reveries of our days of sceptical satiety and social progress" (Villemain, *Tableau de l'Eloquence chrétienne au IV<sup>me</sup> siècle*, p. 139). Gregory wrote also a large number of *discourses* or *orations*, both while administering the diocese of Nazianzum for his father and while defending orthodoxy at Constantinople. Among these discourses are *funeral addresses* and *panegyrics*, e. g. those of Athanasius and Basil; *invectives*, the two discourses against Julian; *sermons* on questions of morals, discipline, and dogmas. Most of those written in Constantinople, while he was opposing the Arians and Macedonians, are of the latter kind. These discourses are fifty-three in number. Some critics claim that the 45th, 47th, 49th, 50th, and 53d cannot be genuine. The *Letters* of Gregory amount to 242, on all subjects; some of them are quite uninteresting except as they contribute to throw light on the character of Gregory and of his age. Gregory of Nazianzus has often been named as the author of a *Paraphrase on Ecclesiastes*, which is now generally attributed to Gregory Thaumaturgus. The *Poems* of Gregory number 156, differing very much from each other in length, subject, and metre; we find among them religious meditations, descriptions, acrostics, epigrams, etc. He also wrote 228 small pieces, which were collected and published by Muratori in 1709. In some collections of his works is included a tragedy entitled *Christ suffering* (*Χριστὸς πάσχων* [ed. by Ellissen, Leipz. 1855]), which is probably not his.

As a *theologian*, Gregory shows marks of the powerful influence of Origen. As to the Trinity, he earnestly defended the Nicene doctrines (*Orations*, 27-31), and vindicated, against the Apollinarians, the humanity of Christ. In common with nearly all theologians before Augustine, he maintained side by side the doctrines of the necessity of grace and the freedom of the human will.

The first edition of the *Works of Gregory* is that of Basle (1550, fol.): it contains the Greek text, a Latin version, and the life of Gregory by Suidas and by Gregory the Presbyter. This edition is not much esteemed. A better is that of Billius (Paris, 1609-11, 2 vols. fol.; reprinted *cum notis Prunovi Morelli*, etc., Paris, 1630, 2 vols. fol.; and again at Cologne, 1690, 2 vols. fol.), badly edited, and abounding in errors. The best edition is that of the Benedictines (Paris, vol. i, fol. edited by Clemençet, 1778; vol. ii, edited by Cail- lau, fol. 1840). It is also given in Migne's *Patrologiæ Curs. Complet.*, vols. xxxv-xxxviii (Paris, fol., v. y.). Many of his writings have been published separately. His *Oration on the Nativity*, and a number of his poems, are given in English by H. S. Boyd, *The Fathers*

*not Papists* (new ed. Lond. 1834, 8vo). A selection of his works was published by Goldhorn (Leips. 1854). The best view of the life and theology of Gregory is to be found in Ullmann, *Gregorius von Nazianz* (Darmst. 1825, 8vo); translated, but, unfortunately, without the dogmatical part, by G. V. Cox (Lond. 1857, 18mo). See Fabricius, *Bibl. Græca*, viii, 383-389; Tillemont, *Mém. pour servir*, etc., t. ix; Neander, *Ch. History*, ii, 420; Neander, *History of Dogmas*, p. 262, 403; Lardner, *Works*, iv, 285 sq.; Clarke, *Succession of Sacred Literature*, i, 308 (where the *Orations* are analyzed); Baur, *Lehre von d. Dreieinigkeit*, i, 648; Schaff, *Hist. of the Christian Church*, iii, 908 sq.; Böhlinger, *Kirche Christi in Biographien*, i, 2, 369; Hoeter, *Nouv. Biog. Générale*, xxi, 837-846.

**Gregorius Neo-Cæsariensis, or Thaumaturgus**, received the latter surname from the miracles ascribed to him. His proper name was Theodorus. He was born in the 3d century, of rich and noble parents, at Neo-Cæsarea, in Pontus. He was educated very carefully in the learning and religion of Paganism by his father, who was a warm zealot; but losing this parent at fourteen years of age, his inclinations led him to Christianity. Having studied the law for some time at Alexandria and Athens, he accompanied his sister to Cæsarea, and there became the pupil of Origen, about A.D. 234. He continued five years under his tuition, during which he learned logic, physics, geometry, astronomy, and ethics, and, what was of infinitely greater consequence, the knowledge of the true God and the Christian Scriptures. When Gregory returned to his native country he devoted himself to a private and retired life, but Phedimus, bishop of Amasea, ordained him bishop of Neo-Cæsarea, in which, and the whole neighborhood, there were only seventeen Christians. Gregory Nyssen, who has written an account of his life, says he was more perfectly instructed in the Christian doctrine by a vision from heaven, in which he heard and saw the Virgin Mary and St. John discoursing together of the Christian faith! When they disappeared, he wrote down carefully all they spoke, which, as Nyssen says, was preserved in Gregory's own handwriting in the church of Neo-Cæsarea in his time. There are other legends of miracles wrought by him, among them the following: On his way to take possession of his unpromising bishopric he was benighted, and obliged, through the inclemency of the weather, to take up his lodging in a heathen temple, the daemon of which had been very remarkable for his frequent appearances to the priest, and for the oracles which he delivered. Gregory and his companions departed from this place early in the morning, after which the priest performed the usual rites, but the daemon answered that "he could appear no more in that place, because of him who had lodged there the preceding night." The pagan priest besought Gregory to bring the daemon back. The saint laid on the altar a piece of paper, on which he had written, "Gregory to Satan—enter." The devils returned, and the pagan, astonished, was converted to Christianity. When Gregory arrived at the city a vast crowd of people came together, to whom he preached the gospel, and numbers were converted. As the number of believers increased daily, he formed the design of building a church, which was soon effected, all cheerfully contributing both by labor and money. This was probably the first church ever erected for the sole purpose of Christian worship. After having converted all the Neo-Cæsareans except seventeen persons, he died full of faith and the Holy Spirit, rejoicing that he left no more unbelievers in the city than he found Christians at the commencement of his ministry. In the year 264 he attended at the synod at Antioch, where Paul of Samosata made a feigned recantation of his heretical opinions. Gregory died most probably in the following year, certainly between A.D. 265 and 270. The many accounts of miracles ascribed to him do not rest upon the authority of

his contemporaries. We are chiefly indebted for an account of them to Gregory of Nyssa, who flourished a hundred years after Thaumaturgus, who wrote a panegyric of him rather than a life, and who evidently recorded every wonder of which he received a report without examination. Lardner, however, says that he will not assert that Gregory worked no miracles. The age of miracles was not entirely concluded, and had there been no foundation in truth, the wonderful stories relating to Gregory would not have been believed. He is commemorated in the Roman Catholic Church on the 17th of November.

The *creed* of Gregory is very important, as showing us how clearly defined was at this time the faith of the orthodox. Its authenticity has been disputed, but it is received as genuine by Bishop Bull and Dr. Waterland: it is as follows: "There is one God, Father of the living Word, the substantial wisdom and power and eternal express image: perfect Parent of one perfect, Father of the only begotten Son. There is one Lord, One of One, God of God, the express character and image of the Godhead, the effective word, the wisdom that grasps the system of the universe, and the power that made every creature, true Son of the true Father, invisible of invisible, incorruptible of incorruptible, immortal of immortal, and eternal of eternal. And there is one Holy Ghost, having his subsistence from God, and shining forth by the Son (viz. to mankind), perfect image of the perfect Son, life causal of all living, the holy fountain, essential sanctity, author of all sanctification, in whom God the Father is manifested, who is above all and in all, and God the Son who is through all. A perfect Trinity undivided, unseparated in glory, eternity, and dominion. There is, therefore, nothing created or servile in this Trinity, nothing adventitious that once was not, and came in after; for the Father was never without the Son, nor the Son without the Spirit, but this Trinity abides the same unchangeable and invariable forever." Gregory's works, so far as we know anything of them, are these: 1. *A Panegyric Oration in praise of Origen*, pronounced in 239, still extant, and unquestionably his. Dupin says of it "that it is very eloquent, and that it may be reckoned one of the finest pieces of rhetoric in all antiquity." It is the more admirable, because perhaps it is the first thing of the kind among Christians. 2. *A Paraphrase of the Book of Ecclesiastes*, mentioned by Jerome in his catalogue, and quoted by him in his Commentary upon that book, and still extant. 3. Jerome afterwards adds in his catalogue that Gregory wrote several epistles, of which, however, we have now only one remaining, called a Canonical Epistle to an anonymous bishop, written in 258 or 262, consisting, as we now have it, of eleven canons, all allowed to be genuine except the last, which is doubted of, or plainly rejected, as no part of the original epistle, but since added to it. The editions of his works are, 1. That of Vossius (Mayence, 1604, 4to, with a *Life of Gregory*); 2. *Opera omnia Gregor. Neocæs. Macariv et Basilii, Græc. et Lat.* (Paris, 1622, fol.); 3. Migne's edition, *Patrol. Coursus Complet.*, vol. x. This is the best edition. A life of Gregory has been published by Nic. Mar. Pallavicini (Rome, 1614). His writings are also given in *Bib. Max. Patrum*, vol. iii. See Lardner, *Works*, ii. 608-642; Hook, *Ecclesiastical Biography*, v. 390; Dupin, *Ecl. Writers*, cent. iii.; Neander, *Ch. History*, i. 716-720; Eusebius, *Ecl. Hist.* bks. vi, vii; Cave, *Hist. Lit.* anno 254; Fabricius, *Bibl. Græca*, vii. 249; Boye, *Diss. de Greg. Thaum.* (Jena, 1703, 4to); Greg. Nyssenus, *Vita Greg. Thaum.* Opp. t. iii, p. 536; Mosheim, *Ch. Hist.* i. 170.

**Gregorius Nyssenus** (*Gregory of Nyssa*), one of the fathers of the Eastern Church, was born at Caesarea in Cappadocia about 332. He was a younger brother of Basil, enjoyed a liberal education under able masters, and distinguished himself by his proficiency in literature and science. He excelled in rhetoric, and

was successful both as a professor and pleader. He married a woman of virtue and piety, named Theosebia, of whom Gregory of Nazianzus speaks in high commendation. He appears to have officiated as a reader in a church, and to have been originally intended for the ecclesiastical life, but his passion for rhetoric, to the study of which he had devoted his youth, haunted him so incessantly that, unable to withstand its continual allurements, he, for a time, forsook his clerical duties, and gave lessons to youth in this his favorite art. Gregory of Nazianzus heard with grief of this dereliction in the brother of his friend, and wrote him a letter, still preserved (*Epist.* 43), which recalled him to duty. No sooner was Basil elevated to the episcopal chair of Caesarea in 370, than he summoned his brother Gregory to assist him in the duties of his new diocese; but the bishopric of Nyssa, a city of Cappadocia, near Lesser Armenia, becoming vacant the following year, Basil gave up the pleasure of his brother's aid and society, and consecrated him to it against his will in 372. In this see he signalized his zeal in defence of the orthodox faith, in opposition to the Arians. He drew upon himself the vengeance of that party, and was banished from his see by the emperor Valens about 374. On the death of Valens in 378, he was recalled by Gratian, and restored to the possession of his see. A council, probably that of Antioch, having ordered Gregory of Nyssa to reform the Church of Arabia, and Palestine bordering upon it, he visited Jerusalem and the holy places, as well to perform a vow as to settle peace and tranquillity among them who governed the Church of Jerusalem. For his greater convenience in this journey the emperor allowed him the use of the public carriages, so that, having a wagon at his own disposal, it served him and those who accompanied him both as a church and a monastery; they sang psalms, and observed their fasts as they travelled. He visited Bethlehem, Mount Calvary, the holy Sepulchre, and the Mount of Olives; however, he was not much edified by the inhabitants of the country, who, he says, were very corrupt in their manners, and notoriously guilty of all sorts of crimes, especially murder. Therefore, being afterwards consulted by a monk of Cappadocia concerning the pilgrimage to Jerusalem, he declares "that he does not think it proper for such as have renounced the world, and have resolved to arrive at Christian perfection, to undertake these journeys. Advise your brethren, therefore, rather to leave the body to go to the Lord, than to leave Cappadocia to go to Palestine." This was the opinion of Gregory of Nyssa concerning pilgrimages. In 381 and the subsequent years, Gregory attended the Council of Constantinople. In this city he pronounced the funeral oration of his sister Macrina, and three years afterwards he was deprived by death of his wife, a woman of many virtues, who, in her later years, devoted herself to religious duties, and has been supposed by some to have become a deaconess. His own death took place in the beginning of the year 400.

As a *theologian*, Gregory had great reputation in his age. His theology shows independent and original thought, but contains many of the ideas of Origen. He maintained the Nicene doctrine of the Trinity, the doctrine of Redemption, the freedom of the will, faith as the subjective, and the sacraments as the objective means of grace. His style is very uneven. He was an abundant writer, but his abundance too often degenerated into diffuseness; his style drags; his illustrations are often in questionable taste, and, being too fully developed, fatigue the reader. When attempting to be refined, he becomes subtle, and his grander passages border on bombast; yet his works contain many passages full of elevated views and true beauty, and animated by a warmth of feeling reaching even to enthusiasm. An analysis of his writings may be found in Clarke, *Succession of Sac. Lit.* i. 354 sq.; and in Dupin, *Hist. of Ecl. Writers*, cent. iv. They may be di-

vided into, 1. *Doctrinal* (chiefly relating to the Arian controversy), 2. *Exegetical*; 3. *Practical* treatises; 4. *Discourses*; 5. *Epistles and Panegyrics*. Many of these have been published in separate editions. The first edition of his *collected Works* appeared at Cologne (1537, fol.), then at Basle (1562, 1571), and at Paris (1573 and 1603). Fronton le Duc gave the first Greek and Latin edition (Paris, 1615, 2 vols. fol.; an *Appendix* in 1 vol. fol. appeared in 1618). This edition was reprinted in 1638 (edited by Gretzer, 3 vols. fol.). It is handier, but not so neat and correct as that of 1615. New editions in Migne's *Patrol. Græc.* vols. xlv–xlvii (Par. 1846); also by Oehler (Hal. Sax. 1865 sq.). The oration against Arius and Sabellius, and that against the Macedonians, is in Mai's *Script. Vet. nova coll.* vol. viii, and in vol. iv of the *Nova Patrum Bibliotheca* (Rom. 1847). Ceillier gives a long catalogue of the separate editions of Gregory's writings in *Hist. Générale des Auteurs Sacrés*, vi, 119 sq. (Paris, 1860). Recent issues are, Gregorius Nyssenus, *Dial. de anima et resurrectione*, ed. Krabinger (Leips. 1837, 8vo); *Orationes Catechet.* ed. Krabinger (Munich, 1838, 8vo); *Orationes de Precatione*, edit. Krabinger (Landshut, 1840, 8vo). See Dupin, *Eccl. Writers*, cent. iii; Hook, *Eccl. Biog.* vol. v; Neander, *Ch. History*, ii, 413 sq.; Lardner, *Works*, v, 295 sq.; Cave, *Hist. Lit.* i, 249; Tillemont, *Mémoires*, t. ix; Rupp, *Gregor's von Nyssa Leben und Meinungen* (Leips. 1834, 8vo); Ileyns, *Disputatio de Gregorio Nysseno* (Leyden, 1835, 4to); Hoefler, *Nouv. Biog. Générale*, xxi, 846; Fabricius, *Bibl. Græca*, edit. Harles, ix, 98; Böhringer, *Kirche Christi in Biograph.* i, 2, 275; Möller, *Greg. Nyss. doctrinam de hominis natura*, etc. (Halle, 1854).

**Gregorius Syracusanus** (*Gregory of Sicily*, and surnamed ASBESTAS), was born about 820, and became bishop of Syracuse about 845. In consequence, it is said, of the invasion of the Arabs, he went to Constantinople soon after his appointment, for he was there in 847, when Ignatius was chosen patriarch. Gregory had strenuously opposed this election, and he then retired with some other prelates, who, taking his part, created a schism against Ignatius. The latter, in return, deposed Gregory in a council held at Constantinople in 854, under the plea of profligacy. The deposition was confirmed by pope Benedict III. When Photius took the place of Ignatius, who was deposed in 858, he caused himself to be consecrated by Gregory, thus openly recognising his ecclesiastical character in spite of his deposition. They were both anathematized by the council held at Rome in 863, and thus the schism between the two churches was completed. Under these circumstances, the accusation of immorality preferred against Gregory by Roman Catholic writers is to be received with great caution. Photius appointed him bishop of Nicea in Bithynia in 878. He died about 880. Some have considered him as the "*Gregorius archiepiscopus Siciliæ*" mentioned by Allatius (*De Methodiorum Scriptis*, in the *Convirium decem Virginum Sti Methodii Martyris*, Rome, 1656) as having written an "*Oratio longa in S. Methodium*." See Mongitor, *Bibliotheca Sicula*, i, 263; Cave, *Hist. Lit.* ii, 40, 76; Jäger, *Histoire de Photius*, i, 1; ii; Smith, *Dict. of Gr. and Rom. Biog. and Myth.* ii, 310; Hoefler, *Nouv. Biog. Générale*, xxi, 877.

**Gregorius Turonensis** (*Gregory of Tours*), an eminent prelate and scholar of the 6th century, called "the father of French history," was born of a noble family in Auvergne, A.D. 540, educated by his uncle, the bishop of Clermont. He was ordained deacon in 569, and bishop of Tours 573. He was strenuous in upholding the orthodox faith, and, though twenty-two years a bishop, he was only fifty-five years old when he died, A.D. 595. He was a man of active mind and habits, and much engaged in the theological disputes of the time. His great work, *Annales Francorum* (*History of the French*), is as barbarous in style

as it is full of credulity in narration: it begins at the creation, and comes down to his own times (Paris, 1552; Basil. 8vo, 1568; Paris, 1610, 8vo; but the best edition is that edited by Du Chesne in his *Script. Franc. tom. i*, Paris, 1636). He wrote also *Miraculorum libri vii* (*Seven Books of Miracles*), of which the first contains an account of the miracles of some of the primitive Christians as well as of Christ; the second, the miracles of St. Justin; the four next, the miracles of St. Martin of Tours; the seventh, the lives of some monks, and an account of the Seven Sleepers. While these writings show an honest simplicity on the part of Gregory, they manifest also his excessive credulity. The best edition of his collected works is *Greg. Opera*, ed. Ruinart (Paris, 1699, fol.). The *Historia Francorum* is given in the *Bib. Mar. Patrol.* vol. xi, in Pertz, *Monumenta Germanie historica*, in a new German version, *Kirchh. Geschichte d. Franken* (Würzburg, 1853, 18mo), and by Giesebrecht (Berl. 1851, 2 vols.). See Löbell, *Gregor. v. Tours und seine Zeit* (Leips. 1835, 8vo; 2d edit. 1867); Kries, *de Greg. Turon. vita et scriptis* (Vrat. 1839, 8vo); Mosheim, *Church History*, cent. vi, pt. ii, ch. ii, note 42; Clarke, *Success. Sacred Literature*, ii, 344; Neander, *Ch. Hist.* vol. iii; Dupin, *Eccl. Writers*, t. v.; *Hist. Litt. de la France*, iii, 372; Hoefler, *Nouv. Biog. Génér.* xxi, 856.

**Gregorius of ARMENIA** (*Gregory Illuminator*; Greek *Photistes*, Armenian *Lusaworich*), first bishop of Armenia and apostle of Christianity in that country (3d century). Others had preached there before him, but he was the first to organize Christianity thoroughly. Accurate information about him is wanting. The Bollandists (*Acta Sanctorum*, September, vol. viii) give a life of him professedly written by his contemporary, Agathangelus, but it is clearly spurious. He is the author of several Homilies, which have been published by the Mekhitarists (Venice, 1837). His name is held in just veneration in the Eastern churches, and he is also a saint in the Roman Calendar, Sept. 30. The United Armenians in Constantinople claim to possess his relics, which in August, 1869, were transferred from one church to another.—Hoefler, *Nouvelle Biogr. Générale*, xxi, 863 (where the traditional account is fully given); Mosheim, *Church History*, ii, 225; Malan, *Life and Times of Gregory Illuminator* (London, 1868). See ARMENIA.

**Gregorius of BÆTICA**, bishop of Illiberis (Elvira in the ancient Bætica, now Andalusia), 4th century. He is mentioned by Jerome (*Chronicon*, anno 371) as a vigorous opponent of the Arians, who persecuted him, and strove, but without success, to drive him from his see. Gregory wrote several works, and among them a treatise *de Fide*, which Jerome styles *elegans libellus*. The treatise *de Fide contra Arianos*, which is given as Gregory's in some editions of the fathers, is by Faustinus (q. v.).—Tillemont, *Mémoires*, x, 727.

**Gregory of HEMBURG**, one of the boldest opponents of papal encroachments in his time, was born at Würzburg in the early part of the 15th century. He studied in the University of Würzburg, and took the degree of LL.D. about 1430. We next find him at the Council of Basle in company with Æneas Sylvius (afterwards pope Pius II), who, as appears from his letter to Heimburg in Goldast's *Monarchia S. Rom. Imperii* (vol. ii, p. 1632 sq.), fully appreciated the character and talents of his colleague. Æneas took Gregory as his secretary, and the two opposed very successfully the papal encroachments on the domain of the temporal power. Heimburg, however, soon retired to Nuremberg, where he was elected syndic, and acquired such reputation that all important questions in civil or ecclesiastical law were referred to his arbitration. His relations with Æneas Sylvius changed in proportion as the latter rose in the Church, and when he was finally raised to the see of Rome, the friends found themselves in complete opposition to

each other. When pope Eugene IV deposed Theodor, archbishop of Cologne, and Jacob, archbishop of Treves, on account of the firmness with which they carried out the principles of the Council of Basle, the German electors sent Heimburg, at the head of a deputation to the pope. He spoke courageously against the usurpations of the Roman see. Eugene answered that he would send an answer "worthy of himself." This answer did not satisfy the deputation, and, on their return to Frankfort, they gave an unfavorable account of their mission, while Gregory, about the same time, wrote his most remarkable works against the papacy, entitled *Admonitio de injustis usurpationibus Paparum Rom. ad Imperatores, reges et principes Christianos, sive Confulatio Primatus Papae* (in Goldast, *Monarchia S. Rom. Imperii*, i, 557). In this work he censures the usurpations of the papacy in the strongest terms, substantiating his reproofs by Scripture and history. Gregory then entered the service of the grand duke Sigismund of Austria, and in this position continued to urge war against the papacy, soon after represented by Pius II. The latter, when ascending the papal chair, had formed the plan of engaging Germany in a crusade, and in this view convoked a meeting of the German princes at Mantua. Heimburg appeared at it as representative of Sigismund, and successfully opposed the project of Pius, who never forgave him for it. He soon found an opportunity for revenge. Cardinal Nicholas, of Cusa, also a former friend of Heimburg, was appointed bishop of Brixen, against the wishes of Sigismund. Difficulties arose between them, and Sigismund took the bishop prisoner. Pius II immediately (June 1, 1460) excommunicated the grand duke, who appealed to a general council by the intermediation of Gregory, Aug. 13, 1460 (see Goldast, as above, ii, 1576), and caused the appeal to be posted on the door of a number of churches throughout Italy. Gregory of Heimburg posted it himself on the doors of the church in Florence, and was immediately excommunicated also. Pius II even sent a brief to the magistrates of Nuremberg, Oct. 18, 1460, demanding that Gregory should be secured at any cost. The latter appealed to a future council (see Goldast, as above, p. 1592), showing how the pope abused his power, and strongly defending the proposition that a council is superior to the pope, and that therefore an appeal to a general council is legal. The apostolic referendary, Theodorus Lällius, bishop of Feltri, wrote a refutation of Gregory's appeal (Goldast, p. 1595), but the latter answered him triumphantly in his *Apologia contra detractationes et blasphemias Theod. Lallii* (Goldast, p. 1461). Against Nicholas of Cusa, whom he accused of having deserted his former principles, he wrote a vigorous attack in his *Invectiva in Rever. Patrem, Dom. Nicolovm de Cusa* (Goldast, p. 1626). In the mean time, Diether, archbishop of Mentz, had also been arbitrarily deposed by Pius II in 1461, when hardly installed in office; Gregory of Heimburg immediately took up his defence, but he soon found himself entirely unsupported. Sigismund made his peace with Pius by the mediation of the emperor Frederick, and obtained absolution in 1464; Diether submitted to the pope, and renounced his archbishopric. Gregory then retired to Bohemia, where he continued to make war against the pope under the protection of George Podiehrad, for whom he wrote several controversial essays (in Erscheulör, *Gesch. von Breslau*, pub. by Kunisch, Breslau, 1827). After the death of his protector he fixed his residence at Dresden, and, by the mediation of duke Albert, obtained absolution from pope Sixtus IV in 1472. He soon afterwards died (Aug. 1472), and was buried in the Church of Sophia, in Dresden. His collected works were published under the title *Scripta nervosa justitiaeque plena, ex manuscriptis utque primò eruta* (Pref. 1608).—See Hagen, in the *Zeitschrift Bragu* (Heidelberg, 1839, ii, 414 sq.); Ullmann, *Reformatoren vor d. Reformation* (Hamburg,

1841, i, 212 sq.).—Herzog, *Real-Encyclopädie*, v, 347; Brockhaus, *Gregor von Heimburg* (Leipzig, 1861).

**Gregory**, the patriarch of the Bohemian Brethren. Among the earnest-minded Hussites of the Calixtine party, which began, about 1453, to form around Rokycan, elected but never consecrated archbishop of Prague, and to listen with enthusiasm to his sermons on the necessity of a reformation, the most prominent was Gregory, surnamed "the Patriarch." The time and place of his birth are unknown. He was the son of a Bohemian knight, and the nephew of Rokycan, whose sister was his mother. Disappointed in his uncle, who was not willing to be a reformer practically, however much he theorized on the subject, he retired, with a number of his friends, to the barony of Litz, and there founded in 1457 the Church of the Bohemian Brethren, or *Unitus Fratrum*. Accepting no ecclesiastical office in the same, he remained merely a lay elder, but was the life and soul of the organization. In its interests he wrote and published many letters, doctrinal treatises, and apologetic works, nearly all of which have perished. His doctrinal tendencies were derived mainly from Peter Chelcicky, a Bohemian writer, who inveighed with stern rigor, from out of an isolated retreat, against the corruptness of that age. (For particulars about Chelcicky, see Gillette's article on the *Taborites and the Germ of the Moravian Church*, in the *Presbyterian Review* of July, 1864.) In consequence, his views of Christian discipline grew to be extreme, and more than puritanical. These he impressed upon the Church. Some of their most salient points were the following: men of rank must strip themselves of the same, and lay down every worldly office, before they can be received into the Church; no member is allowed to go to law, or to testify before a civil court; judicial oaths are forbidden; no member may keep an inn, or engage in any trade calculated to advance luxury. His object was to preserve the Church unspotted from the world, amid the fearful degeneracy which prevailed. At the time of his death, which occurred in 1473, at Brandeis, on the Adler, in Bohemia, these and other similar regulations were in full force. Twenty-one years later, however, in 1494, they were formally abrogated, and a more liberal policy was introduced. In the first persecution (1461) which came upon the Brethren, Gregory was frightfully tortured on the rack.—Palaeky's *Geschichte von Böhmen*, vol. vi, ch. vii, which work denies that Gregory was the nephew of Rokycan; Gindely's *Geschichte der Böhmischn Brüder*, vol. i, ch. i-iii; Cröger's *Geschichte der alten Brüderkirche*, vol. i, ch. i-iii; Benham's *Notes on the Origin and Episcopate of the Bohemian Brethren*, p. 1-120. (E. de S.)

**Gregory**, patriarch of Constantinople, was born at Calavrita (Arcadia) about 1740. He studied in the schools of Dimitzana (Morea), Athos, Patmos, and Smyrna; entered the Church, and, after being successively ordained deacon and priest, was, while yet quite a young man, appointed metropolitan of Smyrna. Most of the churches of the diocese were in ruins, and the Turks opposed their restoration, yet he succeeded in fitting some for divine worship, and endeared himself greatly to the Greek population by his zeal and virtues. In 1795 he was appointed patriarch of Constantinople. When the expedition of Napoleon I against Egypt took place, the Turks accused Gregory of favoring the French, and deposed him. He withdrew to a convent on Mount Athos, where he busied himself not only in writing religious books, but in learning the art of printing. Being soon after reappointed patriarch, he established a printing-office in the episcopal palace. His duties were interrupted by the political revolutions of 1808, when he was deposed on a charge of favoring Russia. He had finally been reappointed a third time patriarch, when the invasion of the Danubian provinces by Ypsilanti in 1821 led

to the rising of the Greeks. Constantinople was their supposed aim, and it was rumored that the Greeks of that city would rise, murder the sultan, and restore the throne of Constantine. The Turkish soldiery were daily killing the Greeks in the streets of Constantinople, and the patriarch's palace was pointed at as the arsenal where Christians kept their ammunition. The position of the Greek clergy, in view of this revolution, which announced itself as a religious one, became daily more critical. Gregory, following the traditions of his Church, which had always enjoined obedience to the temporal powers, excommunicated the leaders of the insurrection. He was intrusted with the custody of the Morousi family, the head of which had been killed as an insurgent. The priest to whose charge Gregory committed them allowed them to escape, and from that moment Gregory foresaw the fate which awaited him. Pressed to fly by his friends, he refused to leave his post, and on Easter celebrated public worship with all the splendor and solemnity habitual on that occasion among Eastern Christians. He was arrested on leaving the church, thrown into prison, and a few hours later hanged in front of the church as an originator of the insurrection. The chief members of the synod shared his fate, or were thrown into prison. After remaining on the gallows for three days the body of the patriarch was thrown into the sea by the Jews, but was taken out, put on board of a vessel, and sent to Odessa, where it was buried with great pomp, June 28. He compiled a Greek Lexicon, of which, however, only two volumes have appeared (Constantinople, 1819). See Constantin (Economos, *Oraison funèbre du patriarche Grégoire*; Pouqueville, *Hist. de la Régénération de la Grèce.*—Hoefler, *Nouv. Biog. Générale*, xxi, 880 sq.

**Gregory I**, Pope, commonly called GREGORY THE GREAT, great-grandchild of pope Felix II, was born at Rome about 541. Having received an education suitable to his rank, he became a member of the senate, and filled other employments in the state. The emperor Justin II appointed him prefect or governor of Rome (A.D. 573). This office he quitted soon after the death of his father, when he came into the possession of immense wealth, the greater part of which he devoted to the establishment of monasteries, six of which he founded in Sicily, and one at Rome, dedicated to St. Andrew, into which he retired himself, and was soon after ordained a deacon. Pelagius II sent him (about A.D. 578) as his nuncio to Constantinople to secure the favor of the emperor, who had been alienated by the ordination of the pope without the imperial consent. He succeeded in his mission. On his return he assumed the government of his own monastery of St. Andrew, and at the same time was secretary to the pope. On the death of Pelagius, Gregory was chosen pope by the clergy and the people, and, much against his will, this election was confirmed by the emperor Maurice (A.D. 590). He was installed as pope Sept. 3, 595.

No sooner was the ordination completed than, according to custom, the new pope drew up his confession of faith, and sent it to the other patriarchs, viz. to the patriarchs of Constantinople, Alexandria, Antioch, and Jerusalem. In this confession he professed to receive the four Gospels, the first four Councils, to reverence the fifth, and to condemn the Three Chapters. He adds, "Whoever presumes to loosen the persons whom the councils have bound, or to bind those whom the councils have loosened, destroys himself and not them." Thus it is apparent that even in the 6th century the authority of the councils was equal to that of the holy Scriptures. His first object after his promotion was the better regulation of his own see and household, and especially of the Sicilian churches, which the Council of Nice had placed more immediately under the see of Rome than any others; the African Donatists and Manichæans also claimed his attention, and

the Jews experienced some degree of favor from him. He assisted Theodolinda, queen of the Longobards, in converting that people to the Catholic faith. He likewise sent missionaries into Sardinia, and zealously supported the mission to England to bring the British into relations with Rome. It was previous to his exaltation to the pontifical chair that, seeing one day in the slave-market at Rome some Anglo-Saxon children exposed for sale, and being struck by their comely appearance, he is said to have exclaimed, "They would be indeed not Angli, but angeli, if they were Christians," and from that time he engaged his predecessor, Pelagius, to send missionaries to England. See ENGLAND, CHURCH OF. At home he exerted himself strenuously for the restoration of clerical discipline. The celibacy of the clergy was riveted upon the Romish system by the measures taken by Gregory. His course of action invariably was directed to strengthen the power of the Roman see; and, in fact, he was the father of the mediæval Roman system. He held monastic institutions in great favor, made strict rules concerning them, and granted them special privileges. This feature of his career gained him the title of *pater monachorum*. One of the marked events of his pontificate was his contest with John, patriarch of Constantinople, who had assumed the title of (Ecumenical, or universal Bishop (A.D. 595), which Gregory called "proud, heretical, blasphemous, antichristian, and diabolical" (*Epist.* 5, 18), and assumed to himself, in opposition, the title of "Servant of Servants" (*Servus servorum Domini*). "Whom do you imitate," says he, addressing the patriarch, "in assuming that arrogant title? Whom but him who, swelled with pride, exalted himself above so many legions of angels, his equals, that he might be subject to none, and all might be subject to him?" It was then, in the opinion of Gregory, imitating Lucifer for any bishop to exalt himself above his brethren, and to pretend that all other bishops were subject to him, himself being subject to none. And has not this been for many ages the avowed pretension and claim of the popes? "We declare, say, define, and pronounce it to be of necessity to salvation for every human creature to be subject to the Roman pontiff," is a decree issued by Boniface VIII in the fourteenth century. "The apostle Peter," continues Gregory, "was the first member of the universal Church. As for Paul, Andrew, and John, they were only the heads of particular congregations; but all were members of the Church under one head, and none would ever be called universal." The meaning of Gregory is obvious, viz. that the apostles themselves, though heads of particular congregations or churches, were nevertheless members of the Church universal, and none of them ever pretended to be the head of the whole Church, or to have power and authority over the whole Church, that being peculiar to Christ alone. This agrees with what he had said before, addressing himself to the patriarch, viz. "If none of the apostles would be called universal, what will you answer on the last day to Christ, the head of the Church universal? You who, by arrogating that name, strive to subject all his members to yourself?" For it was not the bare title of universal bishop that thus alarmed Gregory, but the universal power and authority which he apprehended his rival aimed at in assuming that title. Gregory adds: "But this is the time which Christ himself foretold; the earth is now laid waste and destroyed with the plague and the sword; all things that have been predicted are now accomplished; the king of pride, that is Antichrist, is at hand; and what I dread to say, an army of priests is ready to receive him; for they who were chosen to point out to others the way of humility and meekness are themselves now become the slaves of pride and ambition." Here Gregory treats the bishop of Constantinople as the forerunner of Antichrist for taking upon him the title of universal bishop.

In the year 596, Gregory sent Augustine, abbot of his own monastery of St. Andrew at Rome, to convert those of the English who yet remained heathens, and under his auspices Christianity was established in the northern parts of the island. See AUGUSTINE; and ENGLAND, CHURCH OF.

In several contests with the emperor Maurice, Gregory avowed his obligation to submit in temporal questions to the imperial commands. There was a long step to take between Gregory I and Gregory VII. See PAPACY. In the year 601 the centurion Phocas rebelled against Maurice, slew him and his family atrociously, and usurped the throne. "Never," says Maimbourg, "was there a more infamous tyrant than this wicked man" (*Hist. du Pontif. de St. Grégoire*, p. 179, 181). The greatest stain upon the pontificate of Gregory is that, instead of hurling his papal anathemas against Phocas, he flattered the murderer, and praised God for his accession to the throne. "The Almighty has chosen you and put you on the throne to banish by your merciful disposition all our griefs. . . . Let the heavens rejoice; let the earth leap for joy. . . ." It is poor excuse given by some of the Roman writers in Gregory's behalf that Maurice had sided against the pope in his disputes with the patriarch of Constantinople. Phocas, in return, established the supremacy of the see of Rome over all other sees.

The last years of Gregory's life were passed in great suffering from gout and other diseases, but he retained his vigor of mind and will to the end. He died March 12, A.D. 604. Gregory's career presents many contradictions. He was a man of great natural kindness, of indomitable energy, and determined will. His life was entirely devoted to the interests of the papal see, which, in his mind, were identical with the interests of the kingdom of Christ. If he did not, as has been charged, burn the Palatine library, he despised and discontenanced classical learning. His special attention was given to the Roman liturgy: he reformed the *Sacramentary* of Gelasius, and put the order of the mass (*Canon missæ*) very nearly into the shape in which it now exists. See MASS. Besides other less important ceremonies, added to the public forms of prayer, he made it his chief care to reform the psalmody, being excessively fond of sacred music. He arranged and improved the chants in use, and composed others for the psalms, the hymns, the prayers, the verses, the canticles, the lessons, the epistles, the gospels, the prefaces, and the Lord's prayer. He likewise instituted an academy for chanters, for all the clerks, as far as the deacons exclusively; he gave them lessons himself; and the bed in which he continued to chant in the midst of his last illness was preserved with great veneration in the palace of St. John Lateran for a long time, together with the whip with which he used to threaten the young clerks and singing-boys when they sang out of tune. See GREGORIAN CHANT.

In *theology* Gregory was a moderate Augustinian: he held to predestination, but not an unconditional predestination. He held also to the value of good works and penance as restoratives; and, in fact, he furnished a basis for the later system of works of supererogation, etc. He may be called the inventor of the doctrine of Purgatory, and of the modern Romish doctrines of Masses and Transubstantiation. The better side of his life and character is set forth strikingly by Neander in his *D. n. a. w. d. i. g. k. e. i. t. e. n.* The following extract will show how far later bishops of Rome have wandered from the spirit of the earlier ones as to the use of the Scriptures: "It was Gregory's strenuous endeavor to extend the study of the Scriptures among the clergy and the laity. He says in a sermon, 'As we see the face of strangers, and know not their hearts until these are opened to us by confidential intercourse, so, if only the history be regarded in the divine word, nothing else appears to us but the outward coun-

tenance. But when, by continual intercourse, we let it pass into our being, the confidence engendered by such communion enables us to penetrate into its spirit.' 'Often,' he observes elsewhere, 'when we do something, we believe it to be meritorious. But if we return to the word of God, and understand its sublime teaching, we perceive how far behind perfection we stand.' A bishop whom Gregory advised to study the Scriptures had excused himself on the plea that the troubles of the times would not permit him to read. Gregory showed him the barrenness of this excuse, referring him to Rom. xv, 4. 'If,' he replied, 'the holy Scripture is written for our consolation, we should read it more the more we feel oppressed by the burden of the times'" (Neander, *Light in Dark Places*, N. Y. p. 127).

Gregory was a very voluminous writer. His *letters* amount to eight hundred and forty; and besides them he wrote a *Comment on the Book of Job*, comprised in thirty-six books; a *Pastoral*, or a treatise on the duties of a pastor, consisting of four parts, and it was, of four different treatises; twenty-two *Homilies* on the prophet Ezekiel; forty *Homilies* on the Gospels, and four books of *Dialogues*. The *Comment on the Book of Job* is commonly styled Gregory's *Morals of Job* (*Moralia*), being rather a collection of moral principles than an exposition of the text. It is translated into English in the *Library of the Fathers* (Oxford, 4 vols. 8vo). That work and the *Pastoral* were anciently, and still are, reckoned among the best writings of the later fathers. "The *Pastoral*, in particular, was held in such high esteem by the Gallican Church that all bishops were obliged by the canons of that Church to be thoroughly acquainted with it, and punctually to observe the rules it contained; nay, to remind them of that obligation, it was delivered into their hands at the time of their ordination. As for the dialogues, they are filled with alleged miracles and stories so grossly absurd and fabulous that it would be a reflection on the understanding and good sense of this great pope to think that he really believed them; the rather as for many of them he had no better vouchers than old, dotting, and ignorant people. He was the first, as has been said, who discovered *purgatory*, and it was by means of the apparitions and visions which he relates in his dialogues that he first discovered it; so that the Church of Rome is probably indebted to some old man or old woman for one of the most lucrative articles of her whole creed. In this work Gregory observes that greater discoveries were made in his time concerning the state of departed souls than in all the preceding ages together, because the end of this world was at hand, and the nearer we came to the other the more we discovered it!" His liturgical works are (1) *Liber Sacramentorum*; (2) *Benedictionale*; (3) *Liber Antiphonarum*; (4) *Liber Responsalis*. There have been more than twenty editions of his collected works. The best editions are the Benedictine (Paris, 1705, 4 vols. fol., and also Venice, 1768-76, 17 vols. 4to), and in Migne's *Patrol.* (Paris, 1819, 5 vols. 4to). A recent edition of his *Pastoral* has been published by Westhof (*De pastoralis cura*, Münster, 1860). Fuller accounts of Gregory and his times are given in Lau, *Gregor I, nach seinem Leben und seiner Lehre* (Lips. 1845); Margraff, *De Greg. I. vita, dissert. historica* (Berl. 1845); Pfahler, *Greg. d. Grosse* (Frankf. 1852, 2 vols.). See also Maimbourg, *Hist. de Saint G. le Grand* (Par. 1686); Wiggers, *De Gregorio Magno* (Rostock, 1838 sq., 2 parts); Neander, *Church History*, vol. iii passim; Mosheim, *Church Hist.* cent. vi, part ii, ch. ii, note 29; Hase, *Church History*, § 130; Hook, *Eccles. Biog.* v, 497; Clarke, *Succession of Sac. Lit.* ii, 354; Bayle, *Dictionary*, s. v.; Dupin, *Ecclesiastical Writers* (7th century); Hoefler, *Nouv. Biog. Générale*, xxi, 789; Milman, *Latin Christianity*, i, 429-432; Bower, *Lives of the Popes*, vol. ii; Neander, *Hist. of Dogmas*, p. 385, 413, 418; *Methodist Quarterly Review*, 1845, p. 524.

**II,** Pope, was a Roman by birth, and of a patrician family. He was early set apart for the clerical life, and educated under the eye of Sergius I, in whose time he was librarian to the Roman see. Afterwards he went with Constantine as deacon to Constantinople, and succeeded to the pontificate on Constantine's death, A.D. 715. He was a strenuous supporter of the powers of the papal see, and did much to establish its supremacy. Himself a Benedictine, he restored the monastery at Monte Cassino, under the severest rule of St. Benedict, as an example to other monasteries. In the year 727 began the famous contest between the emperor Leo Isauricus with the *Iconoclasts*, or Image-breakers, on one side, and Gregory II, with the *Iconoduli*, or Image-worshippers, on the other; the pope anathematized the emperor, and condemned the council he had held (to abolish the worship of images), abused his name, vilified his actions, and summoned the French to attack his authority in Italy. He died A.D. 731. His writings are of no great account: fifteen *Letters*, a *Memorial*, and a *Liturgy* are preserved in the *Biblioth. Patrum*, vol. ix. See Mosheim, *Ch. Hist.* cent. viii, pt. ii, ch. ii; Cave, *Hist. Lit.* i, 620; Gieseler, *Church Hist.* per. iii, div. i, ch. ii, § 4; Dupin, *Eccles. Writers*, cent. viii.

**III,** Pope, a native of Syria, succeeded Gregory II in 731. He was as great a favorer of image-worship as his predecessor, and contended, with all weapons, against the Iconoclasts (q. v.), and against the Byzantine court. He found considerable difficulty in maintaining his ground against the warlike prince Luitprand, and had recourse to the stratagem of fomenting discords among the Lombards themselves. His reign was an epoch in the temporal power of the popes: he was the first to rule the exarchate of Ravenna as sovereign, and he obtained by his legates (the first sent to France) the homage of Charles Martel, who, however, could not aid him with material force. He died Nov. 28, 741. Some of his *Epistles* remain. See Dupin, *Eccles. Writers*, cent. viii.

**IV,** Pope, a native of Rome, made pope A.D. 827. By taking, in 833, the part of the three rebellious sons of Louis le Débonnaire against their father, this prelate embroiled himself much with his clergy, especially those of France, who, favoring the cause of Louis, refused to receive either him or his decrees. Gregory wrote a *Letter* to them, which is among Agobard's *Works*, which shows him to be arbitrary and tyrannical, claiming obedience to him, though against the commands of their prince. There are *three* other *Letters* in Labbe, *Concil.* vol. vii, and Baluze, *Miscell.*, which evince the same spirit of grasping dominion. It was this pope who made the feast of *All Saints* general throughout the Western Church. He died A.D. 844.—*Clarke, Succession of Sacred Lit.* vol. ii; Baronius, *Annales*, t. xiv.

**V (BRUNO).** Pope, was a native of Germany, son of the duke Otho of Carinthia, and nephew of Otho III, king of Germany. The latter caused him to be elected pope May 17, 996, when he was only 24 years of age. Eight days after, Gregory, in return, crowned his uncle Emperor of the West. As soon, however, as Otho had recrossed the Alps, Crescentius, a powerful senator, noted for his opposition to the previous pope (John XV), fomented a revolution, took the title of consul, drove out Gregory, and appointed in his place a Greek of low birth, Philagathos, bishop of Piacenza, who took the name of John XVI. The Council of Pavia (997) excommunicated both Crescentius and the anti-pope. Otho marched against Rome, and John XVI was made prisoner while attempting to escape. The servants of the emperor tore out his tongue, his nose, and his eyes, and Gregory caused him to be paraded through the streets of Rome covered with the insignia of his office torn into tatters, and sitting backward upon an ass. Crescentius, who had taken refuge in the castle of St. An-

gelo, was beheaded, in spite of the articles of capitulation, which guaranteed his life. Otho took his widow for a mistress. Robert, king of France, having married his cousin Bertha without dispensation, Gregory condemned him to do penance for seven years, deposed the archbishop who had officiated at the marriage, and demanded that Bertha should be discarded. Robert, refusing to comply, was excommunicated; and so great was at that time the fear inspired by this ecclesiastical punishment, that only two persons dared remain in the king's service, and even they threw into the fire everything he had made use of, for fear of being contaminated by contact with it (P. Damien, *Opera*, Paris, 1663, fol., *Epist.* v). At the end of three years Robert gave up the contest, and discarded Bertha, to whom he was much attached. Gregory died Feb. 11 (or 18), 999, not without suspicion of poison. Several letters and patents of Gregory are contained in Baluze, *Miscell.* vol. vi; five bulls in Ughelli, *Italia sacra*, ii, 352-354; iii, 618; iv, 98; two in D'Achery, *Spicilegium*, vol. vi; one in De Marca, *Marca hispanica*, p. 952; and four letters in Labbe, *Concil.* ix, 752. See Baronius, *Annales*, xvi, 345 sq.; F. Pagi, ii, 262; J. B. de Glen, p. 143; A. Duchesne, i, 938; Hoefler, *Nouv. Biog. Générale*, xxi, 799; Hoefler, *Die deutschen Päpste*, i, 195.

**VI,** Anti-pope, was elevated, in June, 1012, to the papal see by a party of the Roman nobility in opposition to Benedict VIII. As he was not recognised by the emperor, Henry IV, he seems to have resigned, and to have ended his life in retirement.

**VI,** Pope, a Roman, whose original name was JOHANNES GRATIANUS, and who had great repute for sanctity as a priest, obtained (A.D. 1044) the papal chair by *purchase* from Benedict IX, who abdicated to marry a girl of noble family. Failing in this, he claimed the seat again, and there were three claimants at once—Benedict IX, Gregory VI, and Sylvester III. Rome was filled with brawls and murders, and Gregory himself wielded the sword with effect! In 1046 Henry III came to Rome, deposed all three of the rival popes, and seated Clement II in the apostolic chair. Gregory died in Cologne A.D. 1048. See Baronius, *Annales*, t. xvii; Hoefler, *Die deutschen Päpste*, i, 224.

**VII. (HILDEBRAND),** the greatest man that ever occupied the papal throne. The exact place and year of his birth are not known, yet he is generally supposed to have been born between 1010 and 1020 at Siena in Tuscany, where, it is said, his father was a carpenter. He spent part of his youth at Rome in the service of pope Gregory VI, whom he accompanied in exile after he left Rome by order of the emperor. They went together to the convent of Cluny (France), where Hildebrand's austerity and asceticism soon gave him such ascendancy that he was made prior of the convent, though still quite young. He was not destined to remain long in seclusion. Henry III, after having regained the exclusive right of appointing popes, had made three in rapid succession, the latter of whom, Leo IX (Bruno, bishop of Toul), stopped at Cluny on his way to Italy. Hildebrand's influence over him became so great that, laying aside the insignia of his office, he went to Rome in the garb of a pilgrim, and declared that his appointment could only be considered as valid if confirmed by the clergy and the people of Rome. His election being confirmed (in 1049), he called Hildebrand to Rome, and created him cardinal. Guided by Hildebrand's advice, Leo IX attempted many reforms in the Church. Councils were assembled at Rome, Rheims, and Mayence, at which the pope himself presided, and in which all important questions arising from the state of the Church were discussed. The encroachments of lay authority, the laxity of the convents, the immorality of priests, the practice of selling ecclesiastical charges, and their consequent engrossment by the civil authorities, which resulted in filling the Church with persons devoted to the tempo-

ral powers—such were a few of the evils the Church was suffering under. Hildebrand directed all the measures of reform, under the authority of the pope. Leo IX died April 19, 1054. Hildebrand was then sent to the emperor by the clergy and the people of Rome to obtain his assent to the appointment of a new pope. Hildebrand proposed bishop Gebhard; the emperor proposed other candidates; but Hildebrand finally prevailed, and the new pope was elected in 1055, under the name of Victor II, in the old Roman way, thus rendering the consent of the emperor a mere matter of form. Victor II, urged by Hildebrand, continued the reforms commenced by Leo IX. He assembled councils, and sent Hildebrand to France, where the Church was in great disorder, and still disturbed by the doctrines of Berengar (q. v.). Both the pope and the emperor dying soon after, Stephen IX, an enemy of the new emperor Henry IV, was made pope. Hildebrand was not consulted about the election. This appointment, which resembled a challenge to the emperor, threatened to cause serious difficulties, and to overthrow the plans of Hildebrand, who wished to withdraw from the emperor the power of appointing popes in a more slow but surer manner. Stephen, however, died soon after his election in 1058, recommending, it is said, the clergy and the people to await Hildebrand's return before proceeding to another election. This advice was disregarded, and the powerful counts of Tusculum appointed a bishop of Velletri entirely devoted to their interests as successor of Stephen IX, under the name of Benedict X. This election caused great trouble in Rome, and Hildebrand returned in haste from Germany. Backed by the power of Germany, he caused the bishop of Florence to be elected pope, under the name of Nicholas II, by an assembly held in Tuscany, and submitted the appointment to the approbation of the emperor in order to secure his protection. At the same time, to avoid the recurrence of irregular elections by means of bribery, as had been the case in that of Benedict, he contrived a new method of election, according to which the choice should first be made by the cardinal bishops, and afterwards submitted successively to the other cardinals, the clergy, and the people, all "saving the respect which is due to our beloved son Henry, at present king. . . ." Nicholas II dying in 1061, after a reign of two years, new troubles arose concerning the new mode of election. The cardinals chose Anselm, bishop of Lucca, under the name of Alexander II, but the Roman nobility and part of the population refused to recognise him, and appealed to the emperor, who assembled at Basle a synod of bishops devoted to his cause, which elected Cadalous, bishop of Parma, for pope, under the name of Honorius II. Cadalous, like the other bishops of Lombardy, had been at open war with the see of Rome. Had Rome yielded to his election, all the ground gained by Hildebrand would have been lost. Without any hesitancy, Hildebrand recognised the validity of Alexander II's election, and the latter wisely chose the powerful monk for his chancellor. Cadalous, at the same time, advanced against Rome at the head of a German army, and the two popes, after duly excommunicating each other, fought at the doors of Rome. The Germans were defeated, and Cadalous fled. The young emperor was taken away from his mother's influence and put under the care of the archbishop of Cologne (Anno or Hanno), who caused Alexander's election to be confirmed by the Synod of Goslar. Hildebrand, more powerful now than ever, continued to work with all his might for the reformation of the Church and the suppression of simony. About that time an occurrence took place which throws some light upon Hildebrand's character, viz. his quarrel with one of the most virtuous and most austere men of that period, Peter Damien (q. v.). After being long united by similarity of views and unity of aim, they disagreed on some point not known, and after that time the writings of the eloquent

bishop are full of proofs of his resentment. At the death of Alexander II, Hildebrand himself was chosen pope in 1073. He expelled the nomination with reluctance; contemporary writers say that the day of his election was one of great trial to him. This can readily be believed, for none knew better than he the dangers and difficulties of his new position, where he would be obliged to act openly and to meet at once all emergencies. The history of his reign is the political and religious history of Europe in those times.

Hildebrand did not assume his title until he had received the approbation of the emperor Henry IV, to whom he dispatched messengers for the purpose. The emperor, pleased with this act of deference, readily confirmed his election, and Hildebrand assumed the name of Gregory VII. The great object of Gregory's ambition was, as he expressed himself in a letter to Hugo, abbot of Cluny, to effect a total reform of the Church in the points already named, as having employed his energies under the preceding popes. Gregory determined to remove the root of many of the existing evils by taking away from the secular princes the right which they assumed of disposing of the sees within their dominions. He aimed at nothing less than a concentration of all the ecclesiastical power of the world in the hands of the pope; and his whole reign was a struggle to secure this supreme dominion, which included, in his ideas, the absolute subordination of the temporal powers of the world to the spiritual power—that is, to the pope. The emperor Henry IV, licentious, ambitious, and at war with his revolted vassals, and therefore continually in want of money, was one of the most culpable in respect of simony. He disposed of sees and benefices in favor of vicious or incapable men, and the bishops of Germany readily entered into his views of making the Church a sort of feudal dependant on the imperial will. Gregory began by admonishing Henry; he sent legates to Germany, but to little purpose. His next step was to assemble a council at Rome in 1074, which anathematized persons guilty of simony, and ordered the deposition of those priests who lived in concubinage, under which name, however, were also included those who lived in a state of matrimony, and it was decreed also that no one should be admitted to holy orders unless he made a vow of celibacy. This last regulation created great excitement, especially at Milan, where the custom of priests being married was still prevalent, as in the Eastern Church. "Gregory summoned another council at Rome in 1075, in which, for the first time, kings and other lay princes were forbidden, under pain of excommunication, from giving the investiture of sees and abbeys by conferring the ring and the crossier. This was the beginning of the quarrel about the investiture which distracted Europe for many years after, and which may here require some explanation. In the early ages of the Christian Church, it would appear that the body of the clergy, or presbyters of a town or district, together with the municipal council or notables, elected their bishop or chief pastor, and the Christian emperors did not interfere with the choice except in the case of the great patriarchal sees, such as Rome and Constantinople, the candidate to which, after being elected by the clergy and people, was required to wait for the imperial confirmation. The Gothic kings of Italy followed the same system, as well as the exarchs of Ravenna after them, in the name of the Byzantine emperors. At Rome, and probably in the rest of Italy also, the laity participated in the election of their bishops till the 10th century; in the East they appear to have been excluded from it sooner. Charlemagne is said by some to have introduced the custom of putting the ring and crossier into the hands of new-elected bishops, while he required from them the oath of fealty to himself. There seems no doubt at least that the custom was prevalent under his successors of the Carolingian dynasty. The rea-

son of this was, that the churches having been richly endowed by various sovereigns with lands and other temporalities, the incumbents were considered in the light of feudal tenants. By thus keeping at their own disposal the temporalities of the sees, the sovereigns came gradually to appoint the bishops, either by direct nomination, or by recommending a candidate to the electors. Gregory, making no distinction between spiritualities and temporalities, considered the investiture as a spiritual act, insisting that the crossier was emblematic of the spiritual authority of bishops over their flocks, and the ring was the symbol of their mystical marriage with the Church; although Sarpi observes, in his *Treatise upon Benefices*, there was another ceremony, namely, the consecration of the bishop elect by imposition of hands by the metropolitan, which was the real spiritual investiture. But Gregory's object was to take away from laymen all ecclesiastical patronage, and to make the Church, with all its temporalities, independent of the state. He would not admit of any symbols of allegiance to the state; and he contended that the estates of sees had become inseparably connected with the spiritual office, and could no longer be distinguished; and yet he himself had waited for the confirmation of the emperor before he was consecrated. See INVESTITURE. The emperor Henry IV paid no regard to Gregory's councils and their decrees, and he continued to nominate not only to German, but also Italian bishoprics. Among others, he appointed a certain Tedaldo archbishop of Milan, in opposition to Azzo, a mere youth, who had been consecrated by Gregory's legate. But the quarrel of the investiture, which had opened the breach between the pope and the emperor, was lost sight of in the more extraordinary discussions which followed between them. Gregory had been for some time tampering with Henry's disaffected vassals of Saxony, Thuringia, and other countries, and he now publicly summoned the emperor to Rome to vindicate himself from the charges preferred by his subjects against him. This was a further and most unwarrantable stretch of that temporal supremacy over kings and principalities which the see of Rome had already begun to assume. Henry, indignant at this assumption of power, assembled a diet of the empire at Worms, at which many bishops and abbots were present, and which, upon various charges preferred against Gregory, deposed him, and dispatched a messenger to Rome to signify this decision to the Roman clergy, requesting them to send a mission to the emperor for a new pope. Upon this, Gregory, in a council assembled at the Lateran Palace in 1076, solemnly excommunicated Henry, and in the name of St. Peter, prince of the apostles, declared him *ipso facto* deposed from the thrones of Germany and Italy, and his subjects released from their oath of allegiance. Gregory, observes Platina, in his *Lives of the Popes*, was the first who assumed the right of deposing the emperors, whose vassals he and his predecessors had been considered till then, and who had even exercised the power of deposing several popes for illegal election or abuse of their authority. This bold act of Gregory produced for a time the effect which he had calculated upon. Most of Henry's subjects, already ripe for rebellion, readily availed themselves of the papal sanction, and a diet was assembled to elect a new emperor. Henry, however, obtained a delay, and, the matter being referred to the pope, he set off for Italy in the winter of 1077, and, passing the Alps of Susa, met Gregory at the castle of Canossa, near Reggio, in Lombardy, which belonged to the countess Mathilda, a great friend and supporter of the pope. Gregory would not see Henry at first, but insisted upon his laying aside all the insignia of royalty, and appearing in the garb of a penitent in a coarse woollen garment and barefooted. In this plight Henry remained for three days, from morning till sunset, in an outer court of the castle, in very severe weather. On the fourth day he was admitted into

Gregory's presence, and, on confessing his errors, received absolution, but was not restored to his kingdom, the pope referring him to the general diet. Henry soon after resumed the insignia of royalty, and, being supported by his Lombard vassals, and indignant at the humiliating scene of Canossa, recrossed the Alps, fought several battles in Germany, and at last defeated and mortally wounded Rudolf of Suabia, who had been elected emperor in his stead, and was supported by Gregory. Having now retrieved his affairs in Germany, he marched with an army into Italy in 1081 to avenge himself on the pope, whom he again deposed in another diet, having appointed Guibert, archbishop of Ravenna, as his successor, under the name of Clement III. Gregory had meantime drawn to his party by timely concessions Robert Guiscard, the Norman conqueror of Apulia and Sicily, who, however, could not prevent Henry from advancing to the walls of Rome; but the city was well defended, and the summer heats obliged Henry to retrace his steps towards North Italy, where his soldiers ravaged the territories of the countess Mathilda. He repeated the attempt against Rome in 1083, but without success. It was finally agreed that a general council should decide the questions between the emperor and the pope. The council assembled at Rome in 1083, and Gregory did not again excommunicate the emperor, but negotiated with him without coming to any definitive result. In fact, Gregory's personal successes were at an end, though the principles of papal supremacy for which he contended took root and grew up in after times. In 1084 Henry was invited by some ambassadors from the Roman people, who were dissatisfied with the pope, to enter the city, which he did on the 21st of March, and immediately took possession of the Lateran, the bridges, and other important positions. Gregory escaped into the castle of St. Angelo, and the anti-pope Guibert was publicly consecrated on Palm Sunday by several bishops. On the following Easter Sunday Henry IV was crowned by him as emperor in St. Peter's church. After the ceremony Henry ascended the capitol and was publicly proclaimed, and acknowledged by the Romans with acclamations. Hearing, however, that Robert Guiscard was approaching Rome with troops, he left the city and withdrew towards Tuscany. Robert came soon after with his Norman and Saracen soldiers, who, under the pretence of delivering Gregory, who was still shut up in the castle of St. Angelo, plundered Rome, and committed all kinds of atrocities. Gregory, having come out of his stronghold, assembled another council, in which, for the fourth time, he excommunicated Henry and the anti-pope Guibert. When Robert left the city to return to his own dominions, the pope, not thinking himself safe in Rome, withdrew with him to Salerno, where, after consecrating a magnificent church built by Robert, he died, May 25, 1085. His last words were, 'I have loved justice and hated iniquity, and therefore I die in exile.' He probably believed what he said. Gregory's character was in many respects a grand and noble one. But impartial history decides that the good he accomplished was far more than counterbalanced by his fanatical enforcement of celibacy (q. v.), which has continued to this day to demoralize the Romanist clergy, and by his semi-blasphemous assertions of almost divine power for the papacy. His earlier efforts for ecclesiastical reform were, no doubt, sincere and earnest; but at a later period he was led astray by the ambition of exalting his see over all the dignities and powers of the earth, spiritual as well as temporal. Not content with making, as far as in him lay, the Church independent of the empire, and at the same time establishing the control of the papal authority over the princes of the earth, objects which he left to be completed by his successor [see INNOCENT III.], Gregory determined to destroy the independence of the various national churches. His object was to raise the pope to supreme pow-

er over Church and State throughout Christendom. By a constitution of his predecessor Alexander II, which he dictated, and which he afterwards confirmed, it was enacted for the first time that no bishop elect should exercise his functions until he had received his confirmation from the pope. The Roman see had already, in the 9th century, subverted the authority of the metropolitans, under pretence of affording protection to the bishops; but now it assumed the right of citing the bishops, without distinction, before its tribunal at Rome to receive its dictates, and Gregory obliged the metropolitan to attend in person to receive the pallium. The quarrel of Anselm, archbishop of Canterbury, with William Rufus, was owing to that monarch not choosing to let him go to Rome, whither he had been summoned. The practice of sending apostolic legates to different kingdoms as special commissioners of the pope, with discretionary power over the national hierarchy, originated also with Gregory, and completed the establishment of absolute monarchy in the Church in lieu of its original popular or representative form. This doctrine of papal absolutism in matters of discipline was by prescription and usage so intermixed with the more essential doctrines of faith, that it came to be considered as a dogma itself, and has defied all the skill of subsequent theologians and statesmen to disentangle it from the rest, while at the same time it has probably been, though at a fearful cost, the means of preserving the unity of the Western or Roman Church" (*English Cyclopædia*). The measures accomplished and attempted by Gregory were (1) the abolition of the influence of the Roman nobility in the election of the pope; (2) the removal of all authority in the election of the popes from the emperors of Germany; (3) the establishment of the celibacy of the clergy; (4) the freedom of the Church in the matter of investitures. Great attention has been given to the history of Gregory VII, both by ecclesiastical and political writers, especially within the present century. See Dupin, *Eccles. Writers* (11th century); Mosheim, *Ch. History*, ch. xi, pt. ii, ch. ii; Neander, *Ch. History*, vol. iv; Ranke, *History of the Papacy*, i, 29 sq.; Hase, *Ch. History*, § 181; Sir James Stephen, *Essays in Ecclesiastical Biography*, i, 1; also in *Edinburgh Review*, lxxxi, 143; Guizot, *Hist. of Modern Civilization*; Bowden, *Life and Pontificate of Gregory VII* (Lond. 1840, 2 vols. 8vo); Voigt, *Hildebrand als Pabst Gregor VII* (Weimar, 1813, 8vo; 2d ed. 1846, 8vo); Spittler, *Gregor VII* (Hamb. 1827, 4to); Gresley, *Life and Pontificate of Gregory VII* (Lond. 1829, 12mo); Madelaine, *Pontificat de Grégoire VII* (Paris, 1837, 2 vols. 8vo); Cassander, *Zeitalter Hildebrand's* (Darmstadt, 1842, 8vo); Soeltl, *Gregor VII* (Leipzig, 1847, 8vo); Milman, *Latin Christianity*, iii, 140 sq.; Helfenstein, *Gregor's VII Bestrebungen* (Frankf., 1856, 8vo); Gröner, *Papst Gregor VII u. sein Zeitalter* (ultramontane view; Schaffhausen, 1859-1861, 7 vols. 8vo); *English Cyclopædia*; Herzog, *Real-Encyklop.* v, 334 sq.; Hoefler, *Nouv. Biog. Génér.* xxi, 801.

**VIII** (ALBERO DE MORA), Pope, was a native of Benevento. He succeeded Urban III, Oct. 21, 1187, and died at Pisa Dec. 16, 1187. His short reign was unimportant. He has generally been considered as a learned, eloquent, and virtuous man. He attempted a crusade to the Holy Land, and the cardinals themselves promised to join him, and to contribute their riches towards the undertaking, but these promises were only given to be evaded. Gregory's last act was to attempt a reconciliation between the inhabitants of Pisa and those of Genoa.—Hoefler, *Nouv. Biog. Génér.* xxi, 814.

**IX** (UGOLINO, COUNT OF Segni), Pope, was a native of Anagni, and a relative of Innocent III. He succeeded Honorius III, March 19, 1227. He followed carefully in the footsteps of Gregory VII and of Innocent III, upholding the see of Rome as the master of all empires and superior to all kings. His consecration took place

with unusual magnificence: he celebrated mass at St. John Lateran in vestments covered with gold and precious stones; then, mounting a richly-harnessed horse, and surrounded by cardinals clothed in purple and gold, he made a triumphant procession through the streets of Rome, which were decked with carpets and flowers for the occasion. The emperor Frederick II had a powerful party devoted to him in Rome; it became desirable to remove him from too close proximity with that city, and in order to achieve this, Gregory reminded him of his vow of visiting the Holy Land, and commanded him to go at once. At the moment of embarking Frederick fell sick at Otranto, but Gregory, who believed his illness to be feigned, excommunicated him, and notified all the churches of it. Frederick, on the other hand, wrote to all the princes complaining of the pope's proceedings. Gregory, in return, excommunicated him again, and threatened to take the empire from him. Frederick, disregarding this absurd threat, excited the Romans to revolt against Gregory, who, insulted even when saying mass, was obliged to retire first to Rieta, then to Spoleto, and finally to Perugia. Frederick, leaving Raynald at Rome to treat with the pope, embarked now for Palestine against the orders of Gregory. Raynald, in the mean time, having organized an army, invaded the papal states. Gregory put his forces under the orders of Roger of Aquila, and war began in earnest in 1228. Such, it is said, is the origin of the two factions, afterwards so celebrated, of the *Guelphs* and *Ghibellines*, the former acting for the pope, the latter for the emperor. Frederick, forestalled in Palestine by the emissaries of Gregory, badly seconded by the Christians of Syria, and, besides, being desirous of returning to Italy, where Raynald had been defeated by the papal troops, concluded a ten years' truce with the sultan of Egypt, and, though excommunicated, caused himself to be crowned king of Jerusalem, after which he returned to Europe. The pope, on hearing of his arrival, excommunicated him anew, and released his subjects from their allegiance. Frederick offered to submit, and asked for absolution; peace was in consequence concluded Aug. 28, 1230. The Romans again drove away the pope (July 20, 1232). He succeeded in going back to Rome in 1235. War soon broke out again. Frederick, having taken Sardinia, gave it to his natural son, Henry; the pope claimed it for himself. Neither had any right to it, and neither would give it up to the other. Frederick was excommunicated a fourth time in 1239. Frederick marched against Rome, but Gregory died before he reached it, Aug. 20, 1241. The principal traits of Gregory's character were pride and haughtiness; he aimed at extending the privileges of the Church at any cost. In this he received no help except from the king of England, who gave tithes to the see of Rome in exchange for the deposition of a bishop. St. Louis, even when threatened with excommunication, refused to free the clergy from their responsibility to civil jurisdiction. Gregory was well acquainted with civil and canon law, and in 1234 published a collection of decretals which were often reprinted: *Nova Compilatio Decretalium, cum glossa* (1st ed. Mentz, 1473, fol.). There are also 31 letters and 191 fragments of his writings in Labbe, *Concil.* xi, 310; 56 letters in Ughelli, *Italia Sacra*; 9 in Vossius; 1 bull in Duchesne, *Historiæ*, v, 861; and 1 in Mabillon, p. 421, No. 106.—Hoefler, *Nouv. Biog. Gén.* xxi, 814 sq.

**X**, Pope, previously known as TERBALDO DE' VISCONTI, was born at Piacenza, of the illustrious family of Visconti. He was chosen pope while absent with the prince of Wales in the Holy Land. The see had been vacant nearly three years after the death of Clement IV. Gregory greatly encouraged the Crusades. In 1271 he summoned the Council of Lyons, which convened in 1274. See LYONS. He died at Arezzo, Jan. 19, 1276. This pope instituted the regulations of the conclave nearly as they exist at the present time.

There are twenty-five epistles of Gregory in Labbe, *Council*, vol. xi. Gerard Vossius published his *Vita et Epistolæ* (Grk. and Lat. Rome, 1587). See Bower, *Hist. of Popes*, vol. viii; Bonacci, *Pontif. Gregorio X* (Rome, 1711, 4to).

**XI** (PIERRE ROGER), Pope, born in 1329 at Maumont, in France, was nephew to Clement VI, who made him cardinal at eighteen years of age, and gave him many rich benefices. He was elected pope December 30, 1370, and removed the papal court from Avignon to Rome in 1377. Wicliffe visited this pope at Avignon, and went back to England disgusted with the vices of the priesthood. Gregory opposed all "heresies" violently; he condemned Raymond Lull (q. v.) and his doctrines by a bull dated January 25, 1376, caused the burning of Jeanne Daubenton, and condemned the writings of Wicliffe. His pontificate was marked by gross nepotism. He died suddenly, March 28, 1378.—Hoefer, *Nouv. Biog. Gén.* xxi, 817.

**XII** (ANGELO CORRARO), Pope, a Venetian, was elected pope Nov. 30, 1406, by the Roman cardinals, during the Western strife, while his rival Benedict XIII occupied the chair at Avignon. After long quarrels, both popes were deposed by the Council of Pisa, 1409, but Gregory did not yield until the assembling of the Council of Constance, when he formally resigned (1415). He was made dean of the cardinals, and died Oct. 18, 1417, aged 92.—Hoefer, *Nouv. Biog. Générale*, xxi, 821.

**XIII** (UGO BUONCOMPAGNO), Pope, born in 1502 at Bologna, succeeded Pius V May 13, 1572. He was one of the most learned priests of his time, especially in civil and canonical law. He was a man of mild temper and jovial habits, yet his pontificate is stained by his relations to the bloody massacre of St. Bartholomew (which he openly approved by a solemn *Te Deum*, and by striking medals in honor of it), and by his participation in a treasonable plot against queen Elizabeth. His reign was agitated and unquiet throughout, and amid the confusions caused by his attempts to confiscate many of the estates of the Italian nobles, he died, April 10, 1585. His reform of the calendar, however, will carry his name down to the latest posterity.—Mosheim, *Church Hist.* cent. xvi, sec. iii, pt. i, ch. i, n. 28; Ranke, *History of Papacy*, i, 307 sq. See CALENDAR.

**XIV** (NICOLÒ SFONDRATI), Pope, was elected by the influence of the Jesuit party, Dec. 5, 1590. His short reign was taken up chiefly in efforts to sustain the league in France against Henry IV. He died Oct. 15, 1591.—Ranke, *Hist. of Papacy*, i, 536.

**XV** (ALESSANDRO LUDOVISI), Pope, was born at Bologna, 1553, made pope Feb. 9, 1621, and died July 18, 1623. With the aid of his nephew, cardinal Ludovico, he signalized his brief reign by several measures of great importance to the Roman Church. He urged on emperor Ferdinand to exterminate Protestantism from the empire; he established the *College of the Propaganda* [see PROPAGANDA]; and he greatly increased the missionary enterprises of Rome in South America, Abyssinia, China, and India. The dominion of the Church was more widely extended in his reign than at any former period of her history.—Ranke, *Hist. of Papacy*, ii, 64 sq.

**XVI** (BARTOLOMEO ALBERTO CAPELLARI), Pope, was born at Belluno, Sept. 18, 1765. He became a Camaldolite Benedictine under the name of *Mauro*, and at twenty-five years was made professor of theology. In 1799 he published the *Triumph of the Holy See and of the Church* (Rome, 4to), a treatise vindicating the absolute power of the popes. In 1801 he became abbot of his monastery, and in 1803 general of his order. He was made cardinal and prefect of the propaganda in 1826. On the death of Leo XII he was elected pope, Feb. 2, 1831. His reign fell in a stormy time. Immediately after his accession revolts occurred in several

of the papal provinces. Bologna took the lead; the commotion spread swiftly from Bologna throughout Romagna, and soon reached all parts of the pope's dominions except the metropolitan city. The intention of the insurgents was to put an end forever to the temporal sovereignty of the pope, and to unite the states of Italy. But the movement was not well contrived; it was simply a spontaneous burst of enthusiasm, excited by the French Revolution of 1830. Yet so utterly powerless and detested was the pontifical government, that, left to itself, it could not have survived the shock of even this unorganized insurrection. Austria poured troops into the disaffected provinces, and quickly silenced the tumult. It was evident, however, that agitations like these could only be prevented by timely concessions, and the powers of Europe united to recommend this course to the pope, in order that a "new era" (as cardinal Bernetti, the papal secretary, said) might commence with the pope of Gregory XVI. The *new era* was slow in arriving. The papal government, as usual, forgot its promises as soon as the danger was past. Indignant remonstrances, and partial attempts at revolt, rapidly followed by confiscations, imprisonments, and exiles, rapidly led the way to a complete relapse into the old system of misgovernment and steady suppression of free thought. The Papal States were now the only part of civilized Europe in which municipal institutions were unknown, and where the laity were wholly excluded from the conduct of public affairs. For many years the people were busy in plotting revolutions, and the government in practicing *espionage* on the largest scale, suddenly searching suspected houses, punishing the suspected without trial, and every way embittering the spirit of hostility. Plans were formed by the exiled patriots to unite all Italy in a confederation for freedom, but these plans were discovered and destroyed by the Austrian police before they were ripe for execution. All Europe looked on with pity, but no state offered to interfere, lest commotions in Italy should lead to disturbances elsewhere. The banished Italians themselves, in a manifesto which they published in 1845, declared that the enormities of Gregory's government had risen to such a height "that each one of them more than sufficed to give the right of loudly protesting against his breach of faith, his trampling upon justice, his torturing human nature, and all the excesses of his tyranny." In fact, the whole pontificate of Gregory was one long oppression of his subjects. At its termination there were between two and three thousand political prisoners in the papal dungeons!

Gregory was not less active in strengthening the power of Rome abroad than in crushing out liberty and happiness at home. He erected, in various countries, twenty-seven new bishoprics and thirty-two apostolic vicariates. In 1836 he gave the *College De Propaganda* into the care of the Jesuits, and he trusted and favored that order in every way. He opposed the Bible Societies and the general diffusion of the Bible, uttering violent encyclicals on these points. A better feature was his opposition to the slave-trade and to slavery. He put down the Hermesians (q. v.) in Germany with the strong hand, and greatly enlarged the bulk of the Index Expurgatorius. The Jesuit missions were greatly fostered by Gregory, and societies to raise funds, such as the *Feurre de la Foi* (Society for the Propagation of Faith) in France, grew rapidly in extent and productiveness. Romanism increased under his pontificate in every country in Europe, partly in consequence of a natural reaction against previous depression, but largely, also, through the energetic activity of the pope. He died of cancer, June 1, 1846. Gregory wrote several *Encyclical Epistles*, which are of value as showing the unchanged character of the papacy; among them are translated *A Letter to the Archbishops and Bishops of Ireland* (Lond. 1836, p. 71, 8vo):—*Encyclical to all Patriarchs, Pri-*

*mates*, etc. (London, 1845, p. 40, 8vo). See Farini, *Lo Stato Romano dell'anno 1815* (Turin, 1841, 3 vols.); La Farina, *Storia d'Italia*; *Revue des deux Mondes*, June, 1847; Moroni, *Dizionario di erudizione ecclesiast.* vol. xxxii.

**Gregory, George, D. D.**, an English divine, son of the prebendary of Ferns, in Ireland, was born in 1754, and was educated at the University of Edinburgh. In 1778 he took orders, and became a curate at Liverpool; in 1782 he removed to London, where he obtained the curacy of St. Giles, Cripplegate, and was chosen evening preacher of the Foundling Hospital. Lord Sidmouth in 1804 procured for him the living of Westham, in Essex, which Dr. Gregory held till his death in 1808. Among his works are *Essays, historical and moral:—History of the Christian Church* (Lond. 1790, 2 vols. 12mo);—*Sermons, with a Treatise on the Composition of a Sermon* (Lond. 1787, 8vo);—a translation of *Louth's Lectures on Hebrew Poetry* (Lond. 1787, 2 vols. 8vo).—Darling, *Cyclop. Bibliog.* i, 1323.

**Gregory, John**, a learned English divine, was born at Amersham, in Buckinghamshire, in 1607. In 1624 he was sent in, the capacity of servitor to Christ Church, Oxford, where he was placed under the tuition of Dr. George Morley, afterwards bishop of Winchester. Having been admitted into orders, he was appointed one of the chaplains of his college by the dean, Dr. Brian Duppa. In 1634 he published a second edition of Sir Thomas Ridley's *View of the Civil and Ecclesiastical Law, with Notes* (4to), by which he acquired much reputation on account of the civil, historical, ecclesiastical, and ritual learning, and the skill in ancient and modern languages, Oriental as well as European, displayed in it. In 1641 he obtained the prebend of Salisbury, but was deprived of it at the Rebellion. In 1646 he published *Notes and Observations on some Passages of Scripture* (4to), which were reprinted at different periods, and afterwards translated into Latin and inserted in the *Critici Sacri*. He died in 1646. An account of his life will be found in his *Works* (4th edit. Lond. 1684, 4to). Anthony Wood calls him the miracle of his age for critical and curious learning.—Fuller, *Worthies of England*; Hook, *Ecol. Biog.* vol. v; Darling, *Cyclop. Bibliog.* i, 1322.

**Gregory, Olinthus Gilbert, LL.D.**, was born at Xaxley, in Huntingdonshire, Jan. 29, 1774. He was educated under Mr. Weston, a celebrated mathematician, and published, at 19, a text-book called *Lessons Astronomical and Philosophical*. Through the interest of Dr. Hutton, he was appointed in 1802 mathematical master at the Royal Military Academy, Woolwich, where he obtained the professor's chair. He published a large number of mathematical treatises, of which it is not our place to give an account. But Dr. Gregory possessed qualities of a still nobler and better kind than those of a scientific philosopher. He was a decided Christian—a man who had not only studied the literature of the sacred volume, but made it the rule of his life, as well as the source of his inward peace and hope. On what firm and enlightened grounds his own faith was established in the truth and fundamental principles of the Gospel, appears from his *Letters to a Friend on the Evidences, Doctrines, and Duties of the Christian Religion* (Lond. 1812, 2 vols. 8vo); a treatise which has long maintained a high reputation. He also wrote *Memoirs of John Mason Good, M. D.* (Lond. 1828, 8vo);—*Memoirs of the Rev. Robert Hall* (prefixed to the editions of Hall's collected Works); and a number of articles in the *Eclectic Review* and other journals. He died Feb. 2, 1841.—Jamieson, *Relig. Biog.* 233; *English Cyclopædia*.

**Grellet, STEPHEN** (*Étienne de Grellet du Mabilier*), the fifth child of Gabriel Marc Antoine de Grellet, was born at Limoges, in France, Nov. 2, 1773. His parents were wealthy, and ranked high among the nobility. His father was comptroller of the mint, the friend and counsellor of Louis XVI, and was proprie-

tor of iron-works and of extensive porcelain manufactories. Etienne was trained in the Roman Catholic faith, but at the early age of six years, by a remarkable visitation of the Holy Spirit, was brought to experience the efficacy of private prayer. At the age of seventeen he was chosen one of the king's body-guard. During the horrors of the Revolution the family estates were confiscated. Etienne and his brothers became prisoners of war, and were sentenced to be shot, but escaped to America. In the year 1795, at Newtown, L. I., whilst walking in the evening twilight, he heard a voice pronouncing thrice the word ETERNITY, and he was overwhelmed with powerful convictions of sin. He was not at that time a Christian believer, and had never seen a Bible. Waiting patiently upon the Lord, the divine Spirit opened to his mind the scheme of salvation by Christ, and the truth as it is in him, and, uniting himself to the religious Society of Friends, he became one of the most illustrious ministers and missionaries of that Church. In 1798, during the prevalence of yellow fever in Philadelphia, he devoted himself to ministrations to the sick, the dying, and the afflicted, and, taking the disease, his name was one day reported in the death-list. His wife was Rebecca, daughter of Isaac Collins, a lady of extraordinary loveliness and virtues. He engaged in mercantile business, in which he was remarkably blessed, always winding up his temporal concerns when required to go forth to proclaim the gospel of salvation, and carefully defraying his own expenses in his long and arduous journeys, being very jealous that the ministry should not be blamed, and feeling conscientiously bound to bestow without charge what he had freely received. He visited Europe four times. Alexander, the czar of Russia, received him to his friendship and to his warm embrace, and at his suggestion adopted various governmental measures, and introduced into the schools of the empire comprehensive Biblical selections prepared by Grellet and his friend, W. Allen. He penetrated the secret archives of the Inquisition at Rome, and in an audience granted him by the pope, he preached boldly to him as a fellow-sinner, and exposed various outrages which he had witnessed. These the pope condemned, and at parting gave him his benediction. His missionary labors embraced also Great Britain, North America, Hayti, etc., and were attended with memorable experiences and success. For a full account thereof, see an interesting biography written by Benjamin Seebohm, one of his converts. See also the memorial issued by the Society of Friends, and *The Fight, Faith, and Crown*, by Dr. Van Rensselaer, of the Presbyterian Church; also a memoir published in London, called *Etienne de Grellet, the French Evangelist*. During his last illness, which was one of great suffering, he glorified God in a wonderful manner, and his seasons of exercising agony only drew from him expressions of thanksgiving and praise. He died at Burlington, N. J., Nov. 16, 1855.—See *London Quarterly Review*, April, 1862, art. vi. (W. J. A.)

**Greslon, ADRIAN**, a French Jesuit missionary, was born at Perigueux in 1618. He joined the Jesuits at Bordeaux in Nov. 1635, and was for a while professor of literature and theology in several schools of his order. In 1655 he was sent as missionary to China, and landed at Hian in 1657. China being at that time in revolution, Greslon remained for a while at Hian, learning Chinese in the mean time. After the revolution had ended in favor of Chun-Tchi, Greslon went to the province of Kian-si, near Peking, of which he has given a very flattering description. In 1670 he returned to France, where he resumed his former employments, and died in 1697. He wrote *Les Vies des saints Patriarches de l'Ancien Testament* (with notes in Chinese);—*Histoire de la Chine sous la domination des Tartares*, etc. (Paris, 1661, 8vo). See *Lettres édifiantes*; Moréri, *Grand Dict. hist.*; Hoefler, *Nouv. Biog. Générale*, xxi, 955.

**Gretser, Jakob**, a distinguished German Jesuit, theologian, and historian, was born at Markdorf (Sua-bia) in 1561. He joined the Jesuits at seventeen, and became successively professor of philosophy at Ingolstadt in 1589, of moral theology in 1592, and of scholastic theology in 1599. He continued in this office until his death, Jan. 29, 1625. He was distinguished for literary activity, and wrote over one hundred and fifty works, mostly against the Protestants. He possessed much learning, yet was only an indifferent critic; and his style, which is flowing, is bitter and full of invectives against his adversaries. His principal works are, *Disputatio philosophica de Topica et locis* (Ingolstadt, 1589, 4to).—*Integra Refutatio Historiæ Ordinis Jesuiticæ ab Elia Hasenmillero conscriptæ* (Ingol. 1594, 4to).—*De Sancta Cruce* (Ingol. 1598, 4to; last ed. 1616, fol.).—*Locorum quorundam Tertulianicorum a perversis Fr. Junii Calviniste depravationibus Vindicatio* (Ingol. 1600, 4to).—*De Jure et More prohibendi, expurgandi et abolendi libros hæreticos et noxiis* (Ingol. 1603, 4to).—*Exercitationum theologiarum Libri sex* (1604, 4to).—*De Spontanea disciplinarum seu flagellorum Cruce* (1606, 4to; German by Vetter, 1612).—*De Ecclesiæ catholicæ sacris Processionibus* (1606, 4to).—*Defensionis Bellarminianæ* (1st vol. 1607, fol.; 2d vol. 1609, fol.).—*De funere christiano* (1611, 4to). The catalogue of all his writings was published by himself in 1610 and 1612. A complete collection of his works was published at Ratisbon, 1734-1741, 17 vols. fol. See Bayle, *Dictionary*; Baillet, *Jugemens des Savants*, vol. vi; Nicéron, *Mémoires*, vol. xxvii; Alegambe, *Bibl. Script. Soc. Jesu*; *Vita Gretseri* (at the beginning of his *Opera omnia*); Sotwel, *Bibl. Soc. Jesu*; August. et Alois de Backer, *Bibl. des Ecrivains de la Compagnie de Jésus*; Dupin, *Nouvelle Biblioth. des Auteurs Eccles.* xvii, 63; Hoefler, *Nouv. Biog. Générale*, xxi, 955.

**Greve or Greeve, Egbert Jan**, a Dutch theologian and Hebrew scholar, was born at Deventer Sept. 4, 1754. He studied theology at Leyden, but refused in 1783 to sign the formula of union except as a human contrivance. He was elected representative in 1796, and became professor of Oriental languages and Hebrew antiquities at the University of Franeker in 1800. He wrote *Ultima Capita Jobi* (38-42) *ad græcam versionem recensita* (part i, Deventer, 1788; ii, Burg-Steinfort, 1791, 4to).—A Dutch translation of most of the Epistles of St. Paul (1790, 8vo).—*Vaticinium Nahumi et Habacuci* (Amsterdam, 1798, 8vo).—*Vaticinium Jesajæ hebraica ad numeros recensuit, versionem et notas adjecit E. J. Greve; accedit interpretatio belgica* (Amst. 1800, 2 vols. 8vo); etc. His posthumous works (in Dutch) have been published by Rhynvis Feith (Amst. 1813, 8vo). See Saxius, *Onomasticon litterarium*, part viii, p. 450; A. A. Lotze, *Laudatio E. J. Grevi* (Leyden, 1815, 8vo); Hoefler, *Nouv. Biograph. Générale*, xxi, 960.

**Greve, Jan**, a Dutch Remonstrant divine, was born in the duchy of Cleves about 1580. He was established first at Arnheim, then at Campen, and finally at Heusden. In 1619 he was expelled from the country for refusing to sign the confession of Dort. Returning again, he preached privately for a while, but was discovered, arrested, and condemned to remain for life in the prison of Amsterdam in 1619. His friends, however, liberated him in 1621, after he had remained 18 months in prison. This time he had improved by writing his most important work: *Tribunal reformatum, in quo sanctoris et tutoris justitia vni judicii christiano in processu criminali demonstratur, rejectæ et fugatæ tortura, cujus iniquitatem duplicem, fallaciam atque illicitum inter christianos usum, libera et necessaria dissertatione aperuit* (Hamb. 1624-35, 4to). He also published some letters in the *Limburgii Epistol. Remonstr. eccles.*, among which there is one addressed to Vorstius, in which he gives an account of his liberation.—See Bayle, *Dictionary*, s. v.; Moller, *Cimbria litterata*; Jö-

cher, *Allgemeines Gelehrten-Lexik.*; Hoefler, *Nouv. Biog. Générale*, xxi, 960.

**Grey.** See GRAY.

**Grey, Richard, D.D.**, an English divine, was born at Newcastle, 1694, and was educated at Lincoln College, Oxford. In 1721 he became rector of Hinton; afterwards rector of Kincote and prebendary of St. Paul's. He died in 1771. He published *A System of English Ecclesiastical Law* (London, 1743, 8vo), for which the University of Oxford gave him the degree of D.D.—*Memoria Technica, a new Method of Artificial Memory* (London, 1730, and often reprinted; last ed. London, 1851, 12mo).—*New Method of learning Hebrew without the Points* (London, 1738, 8vo).—*Liber Jobi, in Versiculos dicitus* (1742, 8vo). This work was criticised by Warburton, to whom Grey replied in *An Answer to Mr. Warburton* (London, 1744, 8vo).—Darling, *Cyclop. Bibl.* i, 1383; Chalmers, *Biog. Dict.* s. v.

**Grey, Zachary, LL.D.**, an English divine and laborious writer, was born of a Yorkshire family in 1687, and educated at Jesus College, Cambridge. He afterwards removed to Trinity Hall, where he took the degree of LL.D. in 1720. He was rector of Houghton Conquest, Bedfordshire, and vicar of St. Giles's and St. Peter's in Cambridge, and died in 1766. He was author of nearly thirty publications, many of which are violent diatribes against Dissenters. The best known of his publications is his edition of *Hudibras, with Annotations and a Preface* (1744, 2 vols. 8vo); to this he published a supplement in 1752 (8vo). He also wrote *An impartial Examination of Neal's History of the Puritans* (London, 1736-44, 3 vols. 8vo). This is a really valuable work in spite of its bitterness.—*A Defense of our Ancient and Modern Historians* (London, 2 vols. 1725-30).—*The Ministry of the Dissenters proved to be Null and Void* (London, 1725, 8vo).—Hook, *Ecl. Biog.* v, 412.

**Greyhound** is the rendering given by our translators of זָרְזִיר (or rather זָרְזִירִי, זָרְזִירִי, *zarzir' moth-na'yim*, girded as to the loins, as the marg. renders; Sept. ἀλέκτωρ ἐμπροσπαθῶν Σηλαίας ἐψύχως, a cock strutting about proudly among his hens; Vulg. *galus succinctus lumbos*), given in Prov. xxx, 31, as an instance of gracefulness in gait. Gesenius (*Heb. Thes.* p. 435) inclines to the opinion of Bochart (*Hieroz.* i, 103), Schultens (*Comment.* ad loc.), and others, that it denotes a war-horse, as ornamented with girths and buckles about the loins. This is a more noble comparison than the cock (with the Sept., Vulg., Aquila, Theodotion, the Targums, the Syr. and Arab. versions, Joseph Kimchi, and others), the greyhound (with the Venetian-Greek, the other Kimchis, Gershon, Luther, and others), or other more fanciful conjectures, e. g. the eagle, the zebra, etc., which may be seen in Fuller (*Miscell. Sacr.* v, 12), Simonis (*Exercitatio critica de זָרְזִירִי*, Hal. 1735), and others. Maurer, however (*Comment.* ad loc.), thinks a *wrestler* is intended as girded for a contest, and he refers to Buxtorf (*Lex. Talm.* col. 692) as confirming the signification of athlete thus assigned to *zarzir*. The hound was evidently known in ancient times, as appears from the Egyptian monuments. See Dog.

**Grief** (represented by numerous Heb. words, Gr. λύπη). The Oriental exhibits affliction over public or private misfortune, especially the death of a beloved relative or friend, by much more demonstrative signs than the European, although the degree of connection between the deceased and the mourner, and the greater or more moderate vehemence of character of the bereaved individual, naturally cause a certain modification of his grief, which is too apt to be lost sight of by archaeologists. The customs of the ancient Hebrews were in this respect little different from those of modern Orientals, and therefore derive ready elucidation from the accounts of modern travellers. In the most

vicious outburst of sorrow, in the instantaneous overflow of lamentation, they wrung their hands above the head (2 Sam. xiii, 19), or beat the breast with them (Nah. ii, 8; Luke xviii, 13; comp. Joseph. *Ant.* xvi, 7, 5;  $\text{קָרַע}$ ,  $\text{κόττεσθαι}$ ; see Homer, *Il.* ii, 700; Herodotus, ii, 85; Lucian, *Luct.* 12; Appian, *Pun.* 43; Virgil, *Æn.* iv, 673; xii, 871; Martial, ii, 11, 5; Petron. 111), or smote them upon the thigh (Jer. xxxi, 19; comp. Polyb. xv, 27, 11; Hom. *Odys.* xiii, 198; Plaut. *Trucul.* ii, 7, 42; see Douglaci *Analect.* i, 274) or on

An ancient Egyptian woman embracing and weeping before her husband's mummy.

the head (Josephus, *Ant.* xvi, 10, 7), tore the beard and hair (Ezra ix, 3; Job i, 20; comp. Joseph. *Ant.* xv, 3, 9; xvi, 7, 5; Barhebr. *Chron.* p. 256; Virgil, *Æn.* xii, 870; Ovid, *Met.* xi, 746; Apul. *Met.* ix, p. 212, Bip.; Curtius, iii, 11, 25; Petron. 111, 113; Martial, ii, 11, 5), strewed ashes (see Carpzov, *De cinerum ap. Hebr. usu, maroris atque luctus τεκμήριον*, Rost. 1739) on the head (1 Sam. iv, 12; 2 Sam. i, 2; xiii, 19; xv, 32; Neh. ix, 1; Ezek. xxvii, 30; Lam. ii, 10; Job ii, 11; 1 Macc. iii, 47; iv, 39; xi, 71; 2 Macc. x, 26; xiv, 15; Judith ix, 1; 3 Macc. iv, 6; Rev. xviii, 19; Josephus, *War.* ii, 12, 5; 15, 4; *Ant.* xx, 6, 1; comp. Homer, *Il.* xviii, 23 sq.; xxiv, 164; Eurip. *Suppl.* 827; *Hecub.* 496; Diod. Sic. i, 72, 91; Lucian, *Luct.* 12; Apulej. *Metam.* ix, p. 212, Bip.; see Burekhardt, *Nubia*, p. 475; Irwin, *Trav.* p. 303, 307; Kirchmann, *De fuer. Rom.* ii, 12; Mishna, *Taanith*, ii, 1), or rolled themselves in dust and ashes (Ezek. xxvii, 30; comp. Homer, *Il.* xxii, 414; xxiv, 640; Lucian, *Luct.* 12), tore the garments (see Hedenus, *De scissione vest. Ebraicæ ac gentibus usitata*, Jen. 1663; also in Ugolini *Thes.* xxix; Wichmannshausen, *De laceratione vestium ap. Hebr.* Viteb. 1716; also in Ugolino, xxxiii: this rending, however, had certain restrictions, Otho, *Lex. Rabb.* p. 360; see also Ugolino, *De sacerdotio*, ch. vi, in his *Thesaur.* xiii) from their breast (Gen. xxxvii, 29; xlv, 13; Judges xi, 36; 1 Sam. iv, 12; 2 Sam. i, 2, 11; iii, 31; 1 Kings xi, 27; 2 Kings iv, 8; vi, 30; xi, 14; xix, 1; xxii, 11, 19; Ezra ix, 3; Esth. iv, 1; 1 Macc. ii, 14; iii, 47; iv, 39; v, 14; xi, 71; xiii, 45; Judith xiv, 13, 15; Jer. xli, 5; Ep. Jer. 30; Joseph. *War.* ii, 15, 2 and 4; Acts xiv, 14; Mishna, *Moed Katon*, iii, 7; *Shab.* xiii, 3; comp. Barhebr. *Chron.* p. 256; Herod. iii, 66; viii, 99; Lucian, *Luct.* 12; Achil. *Tat.* iv, 6; Curtius, iii, 11, 25; iv, 10, 23; v, 12, 13, 31; x, 5, 17; Sueton. *Cæs.* 33; *Nero.* 42; Douglaci *Analect.* i, 118; Arvieux, iii, 282), lacerated even their face and body (Jer. xvi, 6; xli, 5; xlvii, 5; Ezek. xxiv, 17; comp. Appian, *Pun.* 46; Virgil, *Æn.* iv, 673; xii, 871; Cicero, *Leg.* ii, 23, 59; Petron. xvi, 111; Ruppell, *Abys.* ii, 57), though this last (see Wichmannshausen, *De corpore scissuris figurisque non cruetando*, Viteb.); Michaelis, *De incisura propter mortuos*, in his *Observ. sacr.* Arnhem. 1752, p. 131 sq.) was forbidden by the Mosaic law (Lev. xiv, 28; Deut. xiv, 1 sq.), as it was in the twelve Roman tables (Cic. *Leg.* ii, 23 sq.). These marks of deep grief were usually combined together. At protracted and regularly appointed seasons of mourning (for the deceased), persons were accustomed to fast (q. v.), put on mourning-weeds [see SACKCLOTH], cover up the lower part of the countenance (Ezek. xxiv, 17, 22; Micah. iii, 7; comp. Esth. vii, 8) or the entire head (2 Sam. xv, 30; xix, 4; Jer. xiv, 3, 4; Homer, *Od.* iv, 154; viii, 92), neglect to wash and anoint themselves (comp. Diod. Sic. i, 72 and 91), or cleanse their clothes (2 Sam. xiv,

2; xix, 24; comp. 2 Sam. xii, 20; Dan. x, 3; Judith x, 2 sq.), and abstain from all ornament (Ezek. xxvi, 16 [compare xxiv, 17]; Jonah iii, 6; Judith x, 3; comp. Homer, *Il.* xxii, 468; Lycophron, *Cassand.* 862; Livy, ix, 7; xxxiv, 7; Sueton. *Octav.* 100), even laying aside their shoes (2 Sam. xv, 30; Ezek. xxiv, 17, 23), and, as a special token of humiliation, shearing off the beard and hair, the pride of an Oriental (Isa. xv, 2; Jer. vii, 29; xvi, 6; xli, 5; xlviii, 37; Ep. Jer. 12; Amos viii, 10; Micah i, 16; Ezek. vii, 18; xxvii, 31; comp. Homer, *Il.* xxiii, 46 sq.; *Od.* iv, 197; xxiv, 45 sq.; Euripid. *Orest.* 458; *Alcest.* 427; Diod. Sic. i, 84; Ælian, V. H. vii, 8; Herod. iv, 71; ix, 24; Curtius, x, 5, 17; Sueton. *Calig.* 5; Ovid, *Ars. Am.* iii, 38). In deep grief they also seated or lay themselves on the ground (2 Sam. xii, 16; xiii, 31; Isa. iii, 20; xlvii, 1 [Ezek. viii, 14]; Jonah iii, 6; Neh. i, 4; Job ii, 8; xvi, 15; Matt. xi, 21, etc.; comp. Josephus, *Ant.* xix, 8, 2; Philo, *Opp.* ii, 519; Homer, *Il.* xviii, 26; see Kype, *Observ.* i, 261). Mourning usually lasted seven days (1 Sam. xxxi, 13; 1 Chron. x, 12; Judith xvi, 29; Sirach xxii, 12; Joseph. *Ant.* xvii, 8, 4; comp. Helioid. vii, 11; Lucian, *Dea Syr.* 52 sq.; see Movers, *Phönice.* p. 200); in extraordinary cases, longer (Numb. xx, 29; Deut. xxi, 18; Joseph. *War.* iii, 9, 5). Wealthy persons were accustomed to hire professional mourning women ( $\text{מְבַרְכֵי בְרִייתֵי}$ , *præfice*, Jer. ix, 16), who uttered loud wailing cries in the house and at the grave during the days of mourning (2 Chron. xxxv, 25), often in responsive chants (*Moed Katon*, iii, 8), and with instrumental accompaniment (*Chel.* xvi, 7). The same custom is well known to have prevailed among the Greeks (see Potter, *Antiq.* ii, 407 sq.) and Romans. On the usages of the modern East, see Mayr, *Schicksale*, ii, 87. Public mourning was instituted upon general calamities; the Jews were also obliged to take part in lamentation for the death of (heathen) rulers (Philo, *Opp.* ii, 525; comp. Livy, ix, 7). It was a peculiarity of Persian usage that no mourner could enter the royal palace (Esth. iv, 2), such probably being regarded as uncleanly by the Zend religion (Creuzer, *Symbol.* i, 712). See generally Geier, *De Ebraeorum luctu lugentiamque ritibus* (Lips. 1656; ed. by Kall, Hafn. 1745; also in Ugolini *Thesaur.* xxxiii); Otho, *Lex. Rabb.* p. 290; on the Grecian usages, Nicolai, *De luctu Græcorum* (Marb. 1698), and Lange, *Observat. sacr.* p. 346 sq.; on modern Persian, Chardin, *Voyage*, vi, 485 sq.—Winer, i, 630. See MOURNING; FUNERAL.

**Griesbach**, JOHANN JAKOB, an eminent German Protestant theologian, was born at Butzbach, in Hesse Darmstadt, Jan. 4, 1745. He received his early education at Frankfurt-on-the-Main, where his father was pastor, and afterwards visited successively the universities of Tübingen, Halle, and Leipzig, where he studied theology under the leaders of the different schools. He staid longest at Tübingen, where the old dogmatic system and method were still prevalent; but, having gone to Halle, Semler's teachings exerted a lasting influence on his mind, and led the way to his subsequent career. He became tutor in the university in 1771, but, before entering on his duties, he made a journey through part of Germany and Holland, and visited London, Oxford, Cambridge, and Paris. Critical examination of the text of the Bible was then much in favor, and young Griesbach followed the current in the line in which he was soon to surpass all competitors, both in the opinion of posterity, and even in that of his contemporaries. However unimportant such critical researches may appear, on account of their mechanical minuteness, in view of the higher interests of religion and of science, we must remember that they were then not only useful, but necessary, even apart from their immediate and manifest object. On his return Griesbach settled at Halle, where he became professor in 1773; in 1775 he removed to Jena in the same capacity, and afterwards remained permanently attached to that university. His services were fully

appreciated, and rewarded with honors and appointments even of a civic nature; thus he was appointed to represent the state and the university at the diets and on other public occasions. He died March 24, 1812.

Griesbach's name is inseparably connected with the criticism of the text of the N. T., so much so, indeed, as to throw all his works on other subjects entirely in the shade, and to form an epoch in that special department. In order to form a just estimate of his services, it is necessary to be thoroughly acquainted with the state of this science at the time. See CRITICISM, BRITANNICAL. Griesbach's studies in regard to the text were first directed to the collecting and appreciation of various readings. This field had often been gone over before, and it was thought that much less would be discovered in it than was found afterwards by paying greater attention to the quotations of the Greek fathers, and to some versions heretofore but little noticed, such as the Philoxenian, the Armenian, and the Gothic. Next he attempted to establish, on the basis of the ideas of Bengel and Semler, a history of the ancient text as a necessary basis for every improvement of it. On this history, all the details of which have not, however, proved correct, but have given a great impulse to researches, Griesbach founded a new theory of criticism, the rules of which were to regulate the choice and value of the various readings in individual passages, and which was based essentially on a combination of historical facts and logical principles. Finally, Griesbach undertook the task on which his reputation chiefly rests, viz. the publication of a *critically amended* edition of the text of the New Testament. Till then, among nearly 360 editions, there had been but two forms of text, both originating in the 16th century, when criticism was yet in its infancy. They were the so-called *Textus receptus*, which the Lutheran Church considered as unimpeachable; and the *Complutensian*, which circulated among the Roman Catholics. Bengel alone had dared to depart somewhat from the former, and that only by introducing a few readings of the latter. Griesbach's innovation excited great alarm among the partisans of the existing texts. Joachim Hartmann, professor at Rostock, attacked him in a pamphlet in 1775; but this, as well as other similar attacks, were answered by the preface of Griesbach's second edition. His editions of the N. T. appeared in the following order: 1. *Libri N. T. historici* (Halle, 1774, pt. i, ii), containing the first three gospels arranged synoptically. To this belongs as vol. ii (1775), the first edition of the Epistles and of Revelation, and to the latter, again as vol. i, a second (non-synoptical) edition of the historical books. The synopsis was afterwards reprinted, sometimes separately. 2. The principal edition (Halle, and London, 1796, 1806, 2 pts. 8vo), very complete, and with important prolegomena. 3. A costly edition (Leipzig, 4 vols. small 4to, or small folio, 1803-1807, in copper types; 4th and 5th pocket editions, Leipzig, 1805, 1825), like the preceding, but with the principal variations only. A new edition of the principal critical work of Griesbach was commenced in 1827 by David Schulz, but the first part only has appeared. The text of Griesbach has not remained intact in all these editions. It has often been used or referred to by others, and its peculiar readings, at least, are always introduced in the new critical editions. The other critical works of Griesbach are, *De codicibus ev. orientianis* (1771);—*Curæ in historiam textus epp. paul.* (1777);—*Symbolæ criticae ad supplendas et corrigendas varias N. T. lectiones* (pt. i, 1785; ii, 1793);—*Commentarius criticus in textum Gr. N. T.* (1794 sq.). Little need he said of his other works. They are mostly academical essays on exegesis, history, and dogmatics, and were published by Gabler in 2 parts (*Kleinere Schriften*, 1825). Some of them, however, possess yet a certain interest, as serving to show the progress made by science under the influence of the-

ologians, conservative at heart, but advancing nevertheless more or less with the times. Such was Griesbach, who may, perhaps, not unjustly be called a middle-party man, in view of his *Theopneustie* (1784), his *Christologie d. Hebräerbriefs* (1791), and especially of his *Aufleitung z. Studium d. populären Dogmatik* (1779, 1789, several ed.), a work considered at first as retrograde and inconsequent by the so-called friends of progress. His *Vorlesungen ü. Hermeneutik d. N. T.*, printed after his death (in 1815), belongs to the so-called school of *grammatico-historical* interpretation which prevailed during the author's life, and is such a work as would naturally be expected from a pupil of Semler and Ernesti.

"The peculiar principle of Griesbach's system consists in a division of the Greek manuscripts of the New Testament into three classes, each of which is considered as an independent witness for the various readings of the manuscripts which it comprises. He thus contemplates the existence of three distinct species of texts, which, with respect to their relationship or affinity, are called by Bengel, 'families,' and by Semler, Griesbach, and Michaelis 'recensions' or 'codices,' namely: 1. The 'Alexandrian' recension or codex, comprehending manuscripts which, in peculiar readings, agree with the citations found in the early Greek-Egyptian fathers, particularly Origen and Clemens of Alexandria. 2. The 'Western' recension, which is identified with the citations of the Latin fathers, especially Cyprrian and Tertullian, and was used by the Christians of Carthage, Rome, and the west of Europe. 3. The 'Byzantine' or Asiatic recension, comprising numerous manuscripts which were used especially in the see of Constantinople and the adjacent Oriental provinces, and have furnished the received text, called the Greek Vulgate. Each of these recensions has characteristics peculiar to itself, yet no individual manuscript exhibits any recension in a pure state, but is assigned to the Alexandrian or Western class, as the peculiar reading of each of those classes preponderate. Though Griesbach considers departures from the received Greek Vulgate as various readings, he does not allow the existence of any standard text as a criterion for determining which are genuine or spurious readings, his object being to show, not the character of particular deviations from any individual recension, but the general coincidence of manuscripts with one recension or codex more than with another. The authorized text does not regulate, but is regulated by his critical opinion of its comparative value; and the immense number of various readings form a floating medium in which the genuine text is considered to be in all instances discoverable. However, although he professes to determine the value of readings by the number of classes by which they are supported, he constantly displays a very decided preference for the Alexandrian class, which he places far above the two others in the rank of authority, a few manuscripts of this recension being supposed to outweigh a multitude of such as belong to the Byzantine recension, which he regards as certainly the most untrustworthy of all (*Prolog.* lxxii). The reason assigned by Griesbach for this decision is the fact that the Greek transcripts of this class contain a remarkably large number of suspected readings, owing to the very great liberties taken by learned copyists in making successive alterations; and finding the coincidence of the numerous scriptural quotations of Origen of Alexandria with the celebrated Greek manuscript of the New Testament from that city to be very striking, he thence concludes that the passages now extant in this father's writings, of the commencement of the 3d century, discover the earliest, and therefore the purest text of which we have any knowledge to be that of the Alexandrian manuscripts. His ultimate choice of readings is consequently determined by the testimony of Origen, in confirmation of which he often adduces much collateral evidence from the primitive

fathers and versions; and of the readings thus proved to be genuine is formed his corrected text of the New Testament. Against the complicated hypothesis on which Griesbach has based his system of recensions many very important objections were urged by learned Biblical critics of Germany (as by Hartmann, mentioned above), and in England, especially by archbishop Lawrence and Dr. Frederick Nolan. The primary fact enforced by Griesbach, that the Alexandrian readings which are supported by the quotations of Origen possess the highest authority of all, is disputed by professor Matthiæ, of Moscow, in his critical edition of the New Testament, and with greater confidence by professor Martin Scholz, of Bonn, in the prolegomena to his very learned and elaborate edition, founded on a system wholly at variance with that of Griesbach. The Alexandrian manuscripts are acknowledged by Scholz to be more ancient, but he asserts them to be more corrupt than any others, and contends that in Alexandria the alterations of the text principally originated. He divides all the manuscripts, not, as Griesbach, into three, but into two classes, the Byzantine and the Alexandrian, in which latter he includes the Western; and he gives a decided superiority to the authority of the Byzantine recensions, which, in opposition to Griesbach, he strenuously maintains to be directly derived from the autographs of the evangelists and apostles themselves. The work by archbishop Lawrence on this subject is entitled *Remarks upon the Systematical Classification of Manuscripts adopted by Dr. Griesbach* (1814, 8vo). The learned author states that he considers Griesbach to be what bishop Marsh denominated him, 'the most consummate critic that ever undertook an edition of the New Testament;' but in the course of his critical strictures on the origin and execution of his plan of appreciating manuscripts, he employs the severest terms of censure, observing that 'Griesbach's mode of investigation is unsatisfactory, his classification fallacious, and his statement of the number of readings inaccurate; that no such classification of the manuscripts of the New Testament is possible; the existence of three distinct species of texts being a fact only synthetically presumed, and not capable of any analytical demonstration; so that the student finds he is treading, not on solid ground, but on a critical quicksand.' Griesbach was long and severely attacked by Trinitarian writers as an opposer of the doctrine of Christ's divinity, chiefly in consequence of his having rejected from his text the celebrated passage respecting the three that bare witness (1 John v, 7), and also for inserting *ὁς* for *Θεός* in 1 Tim. iii, 16, and *Kypion* for *Θεῶν* in Acts xx, 28. In consequence of these and other points in his critical works, the commendation and patronage of the Unitarians were bestowed upon him; but in the preface to his treatise on the apostolical writings, he makes the following solemn declaration: 'Ut iniquas suspiciones omnes, quantum in me est, amolari, et hominibus malevolis calumniandi ansam præcipiam, publice profiteor, atque Deum testor, neutiquam me de veritate istius dogmatis dubitare;' and to this may be added a statement from his *Prolegomena*, namely, that 'nulla emendatio a recentioribus editoribus tentata ullam Scripturæ Sacræ doctrinam immutat, aut evertit,' though 'paucæ sensum sententiarum afficiunt.' The laborious and minutely learned work by the Rev. Dr. Nolan, entitled *An Inquiry into the Integrity of the Greek Vulgate, or Received Text of the New Testament*, published in 1815, is chiefly occupied in presenting evidence to subvert the critical system of Griesbach, and to establish the position since taken by professor Scholz and others, that the Byzantine, and not the Alexandrian, codices are the most worthy of reliance. 'Griesbach's theory,' says Dr. Nolan, 'is one of the most elaborate of those that have unsettled the foundation on which rests the entire canon. His corrected text can be received only as a proof of the general corruption of the sacred Scriptures, and

of the faithlessness of the traditionary testimony by which it is supported, since he states that the two principal classes of text, the Alexandrian and the Western, have been interpolated in every part; that the authorized Greek version exhibits 150,000 various readings, and has remained 1400 years in its present state of corruption; that there appears, therefore, to be no reservation by which the doctrinal integrity of the sacred Scriptures can be saved; for if, in the apostolic and primitive ages, corruption was prevalent, whatever be the text gathered out of the immense number of various readings, it may be as well any other as that originally delivered by the inspired writers.' Griesbach indeed declares, in his *Symbolæ Criticæ*, that the manuscripts of the Alexandrian and Western recensions, on which his system is founded, were grossly corrupted in the age succeeding that of the apostles; that those which he held in the highest esteem were corrupted in every page by marginal scholia and interpretations of the fathers, and contained innumerable and very serious errors ('innumeros gravissimosque errores'). He further states in the same treatise that no reliance can be placed on the printed editions of the works of Origen, on the fidelity of his different transcribers, on the accuracy of his quotations, or, finally, on the copies of the Scriptures from which he quoted; so that, as observed by Dr. Nolan, we have only to take his own account of the state in which he finds the best part of his materials to discover the extreme insecurity of the fabric which he has raised on such a foundation. 'His innovations,' continues the same learned divine, 'are formidable in number and nature; his corrections proscribe three important passages (already named) affecting the doctrinal integrity of the inspired text; for a proof once established of its partial corruption in important matters must involve its character for general fidelity; and the deservedly high character and singular merit of this learned edition must heighten apprehension and alarm at the attempts thus made to undermine the authority of the received text, for the scrupulous accuracy of its execution must always command respect'" (*English Cyclop.*). See Herzog, *Real-Encyclopædie*, v, 389; *English Cyclopædia*, s. v.: Hofer, *Nouv. Biogr. Générale*, xxii, 25; Köthe, *Griesbach's Lebensbeschreibung* (Jena, 1812); Seiler, *Hermeneutics*, p. 340 sq.; Horne, *Introduction to the Scriptures*, vol. ii.

**Griffen, BENJAMIN**, a Methodist Episcopal minister, was born in Mamaroneck, New York, June 6, 1792. When about nineteen years of age he joined the Methodist Episcopal Church. Soon after his conversion he was received into the New York Conference, and remained a member of that body (except for a short interval) for fifty years. In 1853 he was elected secretary of his Conference, and continued in that office until his death, which occurred at Rye, N. Y., Jan. 20, 1861. Among the members of his Conference he was the youngest man of his age; his cheeks had the freshness of youth; his step was firm and elastic; his voice retained its clearness and compass to the last; "his eye was not dim, nor his natural force abated." His activity, his vigor, his sprightly humor, and his flow of spirits seemed as perfect at the last Conference he attended as they had ever been. He grew more and more genial as life advanced, and his Christian graces shone out more clearly. He was remarkable for his punctuality as well as for his patient labor. Few men have performed more unrequited toil for the Church than he. He was treasurer for many years of the Board of Conference Trustees, and also of the Ministers' Mutual Assistance Society. He rendered his services with the strictest fidelity, and without any compensation. He had been appointed for the third time to Kingston, but never reached his field of labor. God had prepared for him a mansion in heaven, and he entered it suddenly. His Master kindly brought the season of earthly labor and eternal repose close to each

other.—*Methodist*, No. 52; *Minutes of Conferences*, 1862, p. 71. (G. B. D.)

**Griffin, Edmund Dorr**, A. M., a Protestant Episcopal minister, was born at Wyoming, Pa., Sept. 18, 1804. Early in life he gave proofs of classical proficiency in the composition of some Latin poems and poetic versions, which were considered to possess rare excellence. In 1823 he passed A. B. in Columbia College with distinguished honor; and having studied theology two years in the New York Theological Seminary, he was admitted to deacon's orders in 1826. After supplying for a time a church at Utica, he returned to New York, and was appointed agent to the Gen. Theolog. Seminary; he became rector of St. James's, New York, and the Associate Church of Bloomingdale, officiating also temporarily in Christ's Church, New York, as assistant to Dr. Lyell. In 1828, his health failing, he sailed for Europe, and visited England, France, and Italy. On his return he commenced lecturing at Columbia College, April 13, 1830, on the History of Literature, continuing the series which his friend, Prof. McVickar, had been obliged to suspend on account of ill health. Griffin's lectures had great success; and measures were in progress for the formation of a new chair of history in the college expressly for him, when, during the vacation, he was seized with inflammation of the bowels, and died Aug. 31, 1830. His MSS. were published after his death by his friend McVickar under the title *Remains of Rev. E. D. Griffin* (N. Y., 2 vols. 8vo). They contain several pieces of poetry, some of which are in Latin; an account of travels through Italy and Switzerland in 1829; notes on France, England, and Scotland in 1828, 1829, and 1830; extracts from his lectures, and some essays written while a student. See McVickar, *Notice* (in the Preface of the *Remains of R. E. G.*); *Cyclop. of American Literature*, ii, 391; *Christian Review*, iv, 356; Sprague, *Annals*, v, 671.

**Griffin, Edward Dorr**, D. D., a Presbyterian minister, was born at East Haddam, Conn., Jan. 6, 1770, and graduated at Yale College in 1790 with distinguished honor. After teaching for a time at Derby, he studied theology under the guidance of Jonathan Edwards, and was licensed in 1792. He commenced his labors at New Salem, supplied at Farmington, and then was called to the Congregational Church at New Hartford, of which he was ordained pastor in 1795. In 1800 he visited New Jersey, and supplied in Orange for a short time, when he accepted a call from Newark, where he was installed pastor in 1801, as colleague to Dr. M<sup>o</sup>Whorter, whom he succeeded as pastor in 1807. In 1808 he received the degree of D. D. from Union College. In 1809 he was appointed to the Bartlett professorship in Andover, and in 1811 was installed in Park-street Church, Boston. In 1812-13 he delivered his celebrated Park-street lectures. On resigning his charge in Boston he returned to Newark, and was installed in the Second Presbyterian Church in 1815. He interested himself warmly in the cause of the Africans, the American Bible and United Foreign Mission Societies. In 1821 he was appointed president of Williams College, and filled that office most ably and acceptably for fifteen years, resigning it in 1836, and retiring to Newark, N. J., where he died, Nov. 8, 1837. His ministry was marked by numerous revivals. Dr. Griffin was a man of large intellectual proportions. "The peculiar cast of his preaching and other religious instructions and appeals was formed, more perhaps than that of many other great minds, by his cherished habit of precise discrimination on the leading points of the prevalent theology. In his course of teaching in mental philosophy he drew the current distinctions with great accuracy and decision. His theological writings are distinguished by lucid and energetic statements of the main points belonging to the theological views of the time, and in such statements his ability

was not surpassed by any man of the age. His taste for those theological distinctions, his high sense of their value, and his facility and satisfaction in using them, gave his most rhetorical pulpit discourses remarkable internal coherence and compactness, and enabled him to command the judgments of his hearers by the force of a very stringent logic. The great prominence and intense light in which he placed some leading points of religious truth constitute the striking feature of his theological discussions. This trait is conspicuous in his Park-street lectures, his work on the Atonement, and some smaller publications on particular points of Christian doctrine. On the whole, the position and influence of Dr. Griffin are widely attested by the profound and general respect for his memory, and by the evident fruits of his labors. His power of clear, penetrating, and, at the same time, of lofty and comprehensive thought—his skill and force in argument, his rhetorical genius and culture, his eloquence, his majestic person and manner, all pervaded and controlled by his enlightened religious devotion, performed efficient service for the Church, and placed him among the greater lights of his age" (J. W. Yeomans, cited by Sprague). He published *The Extent of the Atonement* (1819, 12mo);—*Divine Efficiency* (1833, 12mo);—*Causal Power of Regeneration*, etc. (1834), and numerous *Sermons Addresses, Orations, and Lectures*, from 1805 to 1833.—Sprague, *Annals*, iv, 26; *Bibliotheca Sacra*, Jan. 1858; *Princeton Review*, xi, 404; *Am. Bib. Rep.* iii, 623; *N. A. Rev.* xxxiv, 119; Cooke, *Recollections of E. D. Griffin* (Boston, 1866, 8vo).

**Griffith, Benjamin**, a minister prominent among the early Baptists in America. He was born in County Cardigan, South Wales, in 1688, and came to this country in 1710, settling in Montgomery township, Penn. He was baptized in 1711, called to the ministry in 1722, and ordained in 1725. He enjoyed a successful ministry, labored extensively, and churches still exist that were formed in the field of his itinerant labors. He published—1. *A Treatise of Church Discipline*:—2. *Vindication of the Doctrine of the Resurrection*:—3. *Answer to "The Divine Right of Infant Baptism,"* printed by B. Franklin, 1747. He also wrote *An Essay on the Power and Duty of an Association*, and left it in MS. It was published in 1832. He died in 1768. (L. E. S.)

**Grimshaw, William**, a minister of the Church of England, was born in Lancashire, Eng., in 1708, educated at Cambridge, and entered into holy orders in 1731. After spending some years as minister of Todmorden, near Rochdale, he was appointed in 1742 to the perpetual curacy of Haworth, in Yorkshire. In 1745 he entered into a close union with the Methodists, acted as Mr. Wesley's assistant in what was known as the Haworth circuit, and until his death, which occurred in 1763, was the mainstay of the connection in that part of the country. Mr. Grimshaw was the author of a *Sermon in Defence of the Methodists*, printed in 1749, and republished with his biography. "He was of a cheerful, generous turn of mind, very courteous, and open as the day in his conversation with the people wherever he went. He was a natural orator, spoke with great fluency, and preached the Gospel with great ability and approbation." Wesley said of him, "He carries fire wherever he goes."—Myles, *Life of Grimshaw*; Crowther, *Portraiture of Methodism*; Newton, *Memoirs of Grimshaw* (Lond. 1799, 12mo); Stevens, *History of Methodism*, i, 258; Wesley, *Works*, iv, 117; vi, 750.

**Grind** (גרינד, *tachan'*, to crush small, Exod. xxxii, 20; Dent. ix, 21; specially with a hand-mill, Judg. xvi, 21; Num. xi, 8; also tropically, to oppress the poor by exaction, Isa. iii, 15. In the expression "let my wife grind for another," Job xxi, 10, it is put for the picture of abject poverty and degradation, i. e. let her become his mill-wench or menial; comp. Exod. xi, 5; Isa. xlvi, 2). See GRITS. In the earliest *poes* men

took the pains to roast the kernels of grain (Serv. *ad Æn.* i, 184), and to pound them (Pliny, xviii, 23) in a mortar (מַדְרָה, מַדְרָה) with a pestle (comp. Numb. xi, 8), and this method of preparing it is still common (in small encampments) among the modern Arabs (Burckhardt, *Wahaby*, p. 36). Yet the hand-mill (מַחְרָה, מַחְרָה, χειρομύλη) is an ancient invention (see Virgil. *Moret.* 19), for it was early employed by the Hebrews (Numb. xi, 8), and continued in use by them to the latest age (being often alluded to in the Talmud under the name קַדְרָה קַדְרָה, or קַדְרָה קַדְרָה), and is still in common use (in villages) among the Orientals (Niebuhr, *Beschr.* p. 51; *Trav.* i, 150; comp. Laborde, *Commentaire*, p. 58). It consisted of two millstones (Plaut. *Asinar.* ii, 1, 16); the upper one (רִידָה, the rider, Deut. xxiv, 6; 2 Sam. xi, 21; or, fully, פְּלֶחֶת רִידָה, the rider-piece, Judg. ix, 53; in Greek, ὄνος or ἐπιμόλιον, Lat. *catillus*) was movable and slightly concave, so as to fit the surface of the stationary lower one (פְּלֶחֶת פְּתִיחִית), Job xli, 16; Gr. μύλη, Lat. *meta*). It was (in poor families) worked by the women (Shaw, *Trav.* p. 202;

(see Herod. iv, 2, and compare the tradition that king Zedekiah was thus treated, Ewald, *Isr. Gesch.* iii, 445). An allusion to the noise of these mills, as being somewhat pleasing to the domestic ear (like that of a modern coffee-mill, which conveys an intimation of home comforts), seems to be contained in Jer. xxv, 10; Eecl. xii, 4; Rev. xviii, 22; others, however, consider these passages to refer to the singing, or rather screaming, of the females employed, as a means of diversion during their toil, or to drown the grating of the millstones (Hackett, *Illustra. of Script.* p. 80). It was not lawful to distract the family hand-mill for debt (Deut. xxiv, 6). In later times large mills, worked by asses, were used (רִידָה שֶׁל חֲמֹר), Buxtorf, *Lexicon Chald.* 2252), as by the Greeks (μύλος ὄνικός, Matt. xviii, 6) and Romans (*asinus molaris*, Varro, *R. R.* i, 19, 5; Colum. vii, 1; Cato, *R. R.* x, 4; Ovid, *Fast.* vi, 318; Lucian, *Asin.* xxxviii, 42; Apulej. *Metam.* vii, p. 153, Bip.; *Digest.* xxxiii, 7, 18), and as are still found in the East (Burckhardt, *Spürchw.* p. 41; Robinson, i, 161; Russel, *Aleppo*, i, 100). (On the subject generally, see F. L. Goetze, *De pistrinis vet.* Cygn. 1730; also in Ugolini *Thesaur.* xxix; Hoheisel, *De molis manualibus vet.* Gedani, 1728; also in Ugolini, *ib.*; Beckmann, *Erfind.* ii, 1 sq.; Mongoz, in the *Mémoires de l'Institut Royal, class. d'hist.* iii, 441 sq.). —Winer, ii, 119. See MILL.

Women grinding at a Mill.

The GRINDERS (מַחְרָה, *tochanoth'*, fem. *ons grinding*, by allusion to females so employed) of Eccles. xiii, 3, are evidently the *teeth*, whose decay is an evidence of old age (comp. מַחְרָה, *tachanah'*, mill, "grinding," ver. 4). See CAPEER-PLANT.

Grindal, EDMUND, D.D., archbishop of Canterbury, was born in the year 1519, in Cumberland. He was educated at Magdalen College, Cambridge, and was on all occasions distinguished as a learned man at the university. In 1550 he was selected by Ridley, bishop of London, as his chaplain. In 1553, on the death of king Edward VI, apprehending the persecution of the Protestants, he fled to Strasburg, in Germany, where he was well received. During his residence abroad he devoted much time to the duties of religion, to his studies, to the matter of the controversies at Frankfort, and to assisting Mr. John Fox in his *Martyrology*. In 1558, Grindal, on the accession of queen Elizabeth to the crown, returned to England; was diligently employed in the reformation of religion; assisted in public disputations; preached at the court and at St. Paul's with great zeal and piety; and in 1559, on the removal of bonner, bishop of London, the queen thought none so fit to succeed him as Grindal. He reluctantly accepted the office, but nobly discharged its duties. In 1575 he was nominated and appointed for the see of Canterbury, but in 1576, opposing the queen in some of her arbitrary proceedings concerning ecclesiastical affairs, he was sequestered from his office. In 1582 he offered his resignation, but, before the measure was completed, he died on the 6th of July, 1583, at Croydon. Grindal was a man of sincere personal piety, and of great firmness and resolution, though of a mild and affable temper and friendly disposition. In the time in which he lived, he was cele-

Joliffe, *Trav.* p. 37; Burckhardt, *Arab.* p. 187; Robinson, ii, 405, 650; Wellsted, *Trav.* i, 249; Thomson, *Land and Book*, ii, 295; see Wilkinson, *Anc. Egypt.* ii, 223; comp. Mishna, *Tohor.* vii, 4), but in large households, where it was severe toil (Artemid. ii, 42), by slaves (Arvieux, *Voy.* iii, 204; Burckhardt, *Arab.* p. 187), as a female employment (Matt. xxiv, 41; Luke xvii, 35), and that of the most menial kind (Exod. xi, 5; Isa. xlvii, 2; Job xxxi, 10; comp. Eccl. xii, 3; see *Odys.* vii, 103 sq.; Simonid, *Iamb.* 85 sq.; Plaut. *Merc.* ii, 3, 62; Theophr. *Char.* 5; Aristoph. *Nub.* 1358; Callimach. in *Del.* 242), but also as a male task, especially in punishment (Judg. xvi, 21; Lam. v, 13; compare Terent. *Andr.* i, 2, 29; Plaut. *Pæn.* v, 3, 33; *Asinar.* i, 1, 16; *Epitit.* i, 2, 42; *Mostell.* i, i, 16; Polluc. *Onom.* iii, 8; Cic. *Quint.* i, 2, 4; see *Cod. Theodos.* xiv, 3, 7), such culprits being closely fettered (Terent. *Phorm.* ii, 3, 19; Plaut. *Pers.* i, 1, 21 sq.), and even blinded (Judg. xvi, 21), by which means the giddiness arising from perpetually going round was at the same time avoided

brated for his episcopal abilities and admirable endowments for spiritual government, as well as his singular learning. The High-churchmen call him an ultra-Protestant, from the favor he showed to the Puritans, and from his abhorrence of Romanizing tendencies. His *Remains*, edited for the Parker Society, appeared in Cambridge, 1843 (8vo).—Jones, *Christian Biog.* p. 199; Neal, *History of the Puritans*, vol. i; Burnet, *History of the Reformation*, vols. ii, iii; Strype, *Life and Acts of Abp. Grindal* (Oxford, 1821, 8vo).

**Griswold**, ALEXANDER VIETS, D.D., a bishop of the Protestant Episcopal Church, was born April 22, 1766, in Simsbury, Conn., and died in Boston Feb. 15, 1843. He early evinced great capacity, and attained considerable proficiency in Greek and Latin, but untoward circumstances thwarted his desire of taking a collegiate course. After studying law for several years, he decided to enter the ministry, and became a candidate for orders in 1794, officiating in the parishes of Plymouth, Harwinton, and Litchfield; was ordained in 1795, and continued in charge of the three parishes named until 1804, when he accepted Bristol parish, R. I. In 1809 he was chosen rector of St. Michael's, Litchfield, and had accepted the call, but, being elected in May, 1810, bishop of the Eastern diocese, then embracing Massachusetts, Rhode Island, New Hampshire, and Maine, the proposed change was not consummated. He was consecrated in May, 1811, and for some years discharged the double duty of bishop and parish priest. "The year 1812 was signalized by an extensive revival of religion under his ministry," and "again and again his flock was visited with similar seasons of refreshing from the presence of the Lord." In reply to objections made against such "awakenings or reformations," he published some papers on "Prayer-meetings and Revivals," in which he ably and zealously vindicates them from "the exaggerated charges of disorder, fanaticism, and delusion," and maintains that under proper guidance they promote the religious life and power of the Church. Yielding to the general desire that his residence should be more centrally located for his diocese, in 1829 he accepted the rectorship of St. Peter's, Salem, Mass., and removed thither in 1830. He remained in Salem until 1835, when provision having been made for his independent episcopal support, he removed to Boston, and devoted the remainder of his life exclusively to his episcopal duties. In 1842 he was relieved by the appointment of an assistant bishop, whose consecration was his last ordaining act. He died suddenly of heart disease. Bishop Griswold was eminently distinguished among the clergy of his Church for his evangelical spirit and earnest religious life. His chief works are, *On the Reformation and the Apostolic Office* (Boston, 12mo);—*Sermons* (Phila. 1830, 8vo);—*Prayers* (N. Y.);—*Remarks on Social Prayer-meetings* (Boston, 1858, 12mo). See Stone, *Life of Bishop Griswold* (Phila. 1844, 8vo); Sprague, *Annals*, v, 415-425; *Christian Observer*, July, 1843; Allibone, *Dict. of Authors*, i, 744. (J. W. M.)

**Grits** from wheat appears from the Sept. in 2 Sam. xvii, 19; Prov. xxvii, 22, to be designated by the Heb. כֹּמֶת, *ripthot*' (Vulg. *ptisance*, A. V. "ground corn," "wheat"). This kind of meal food is still very common in the East, and the Turks especially employ it in time of war (Faber, in Harmer, ii, 26). On the contrary, the כָּלִי, *kali*, or "parched corn," of 2 Sam. xvii, 28, appears to be the roasted kernels of the newly-ripe grain, which is still eaten in that manner in Palestine (Robinson, ii, 668). See CORN.

**Grizzled** (בָּרֵד, *barod*', *spotted*), party-colored or variegated, as goats (Gen. xxxi, 10, 12) or horses (Zech. vi, 3, 6).

**Groin**. The edge formed by an intersection of two vaults (or curved ceilings). During the early part of the Romanesque period the groins were left perfectly

plain, but later, and especially through the Gothic period, they were invariably covered with ribs (or mouldings).—Parker, *Dict. of Architecture* (Oxford, 1864). (G. F. C.)

**Groningen School**. See HOFSTEDE.

**Groningenists**, a sect of Anabaptists (q. v.), who met at certain stated periods in the city of Groningen.—Mosheim, *Ch. History*, cent. xvii, div. ii, pt. ii, ch. v, § 3.

**Groot, Geert** (Lat. *Gerhardus Magnus*), was born at Deventer in 1340, studied in Paris, and subsequently taught philosophy and theology in Cologne. Being possessed of a considerable property and of several prebends, he abandoned himself to a luxurious life, from which he was recalled by a serious sickness and the impressive exhortations of a friend, the Carthusian Henry Aeger. Thoroughly reformed, he entered the monastery of Monkhuysen, near Antwerp; but he left it again after three years, in order to become a travelling preacher. In union with Florence Radwyn, he established at Deventer the Society of the Brethren of Common Life, which was sanctioned in 1376 by Gregory XI. He died at Deventer of the plague, August 20, 1384. He wrote *De Veridica Predicatione Evangelii*:—*De Sacris Libris Studendis* (both in Kemps, *Opera*, t. iii). Thirty-three treatises of his remain in MS. See Ullmann, *Reforms before the Reformation*, vol. i; Böhlinger, *Kirche Christi*, vol. ii, pt. iii, p. 612-64; Hoefler, *Nouv. Biog. Générale*, s. v. Groot. See BRETHREN OF THE COMMON LIFE.

**Groot, De**. See GROTIUS; HOFSTEDE.

**Groppe**, JOHANN, a German Romanist divine, was born at Soest in 1501, became successively canon of Cologne, provost of Bonn, and archdeacon and provost of St. Gereon of Cologne. He convoked a provincial synod in 1536 with the intention of effecting some reforms, and was afterwards sent by Charles V to the religious assembly of 1541 at Regensburg; he is even said to have framed the Interim which was there decided on. In 1548 he went to Soest, to reform the churches of that place agreeably to the Interim. In 1551, on the occasion of the reopening of the Council of Trent, the pope called him to Rome for the purpose of consulting with him. Here he died, March 12, 1558. Groppe belonged to the class of milder Romanists who, at the time of the Reformation, sought to reunite the Protestants to the Church of Rome by means of conciliatory measures. His principal works are, *Antididagma* (against the archbishop Hermann, Cologne, 1544):—*Institutio catholica* (1550):—*Von wahrer u. bleibender Gegenwart d. Leibes u. Blutes Christi* (1556):—*Capita institutionis ad pietatem* (1557), etc.—Herzog, *Real-Encycl.* s. v.; Dieringer, *Kathol. Zeitschrift* (vol. ii, 1844).

**Grosseteste**, **Groce-teste**, **Grotest**, **Grost-head**, **Groshead** (CAPITO, "Qui cognominatus est a pluribus GROSSUM-CAPUT," *Trivet*), ROBERT, bishop of Lincoln, a celebrated ecclesiastic, theologian, statesman, mathematician, astronomer, natural philosopher, poet, moralist, and teacher, in the first half of the thirteenth century. The various forms of the name indicate that it was a descriptive epithet, *agnomen*, or by-name, rather than a family designation, which was still no common appendage. The nickname has been rendered historical by the career of its bearer, who contended with pope and king, was the early counsellor of Simon De Montfort, the teacher, patron, and friend of Roger Bacon and Adam De Marisco, the colleague of the scarcely less eminent Robert Bacon and Richard Fitzacre. He has often been regarded as the first translator of the Scriptures into English, and as the precursor of the Protestant Reformation, and his continued reputation is mainly due to his strenuous and bold resistance to the corruptions of the Church at home, and to the vices of the papal court. The thirteenth century is one of the most active, bustling, eventful, and important in the whole series of the ages.

It is crowded with great personages. It is full of mighty events attendant on

The spirit of the years to come,  
Yearning to mix himself with life.

Not the least notable of these mutations occurred in England in the reign of Henry III, and laid, in the midst of anarchy and strife, the foundations of the English Church, the English jurisprudence, the English liberties, the English language, literature, philosophy, and science. In all of these movements Robert Grosseteste was concerned, and on all these forms of national development he left the impress of his genius and character.

*Life.*—Robert Grosseteste was born, about 1175, at Stradbroke, in the county of Suffolk, England. His origin was extremely humble, and little is known of his early career except that he studied at Oxford, and that law, physic, and divinity all received his attention. He is supposed to have extended his education at Paris, and to have held a chair in its university. He owed his first ecclesiastical appointment apparently to the bishop of Hereford, to whom he had been commended by a letter of Giraldus Cambrensis. His superior died in 1199, but his character and talents secured promotion. Between 1214 and 1232 he held successively the archdeaconries of Wilts, Northampton, and Leicester, and various other livings, including the prebend of Clifton in Lincoln. In 1224, at the request of Agnellus, provincial of the Franciscans, he became reader in the recently founded Franciscan school at Oxford, and inaugurated the brilliant career of that university (Eccleston, *De Adventu Fratrum Minorum*, c. v.). This function he discharged till his elevation to the episcopate. It was probably during these years that he was *rector scholarum*, or *chancellor* of the university, and was associated with Robert Bacon, the head of the Dominican school there. In January, 1232, he contemplated a visit to Rome, but was retained by his bishop. Towards the end of this year he had a violent attack of fever, and resigned all his preferments in the Church except his prebendal stall in Lincoln. His own feelings on this occasion are perpetuated in his letters to his sister and to his friend (*Epp.* viii, ix). During this year he had undertaken the defence of the Jews against the outrageous persecutions and crinations to which they had been exposed since the Jewish massacre at the accession of Richard I. He further manifested his solicitude for them by laboring for their conversion. His zeal is illustrated by his V Letter and his treatise *De Cessatione Legalium*. His acquisition of Hebrew may have been the cause or the consequence of this intervention. In 1235 he was elected to the bishopric of Lincoln. His promotion is commemorated by our earliest English poet, Robert of Gloucester:

Maister Robert Groce teste thulke zer was al so  
Isaerel bissop of Lincoln at Seinte Edmunde at Redinge.

His duties were onerous; the diocese was the largest and the most populous in the realm (*Ep.* xli). His new cares did not diminish at any time his active interest in the University of Oxford, which owned his jurisdiction.

When he accepted the mitre there was general disorder among the ecclesiastics subjected to him; there was a total want of settled discipline; there was constant recalcitration against authority; there was refractoriness in his own chapter, which eventuated in protracted contention; ignorance, licentiousness, simony, and greed were prevalent. There was twofold and simultaneous danger from royal rapacity and papal exaction. His position was full of annoyance and hazard, but he addressed himself at once to the correction of abuses, to the resistance to encroachment, and to the earnest performance of his solemn functions. He first set his own house in order, and reformed the episcopal establishment. A detailed and interesting ordinance

was prepared for the governance of his household (*Mon. Francisc.* Append. ix). The sons of the highest nobles, among them those of Simon de Montfort, were intrusted to him for training. He is supposed to have composed for these *élèves* his manual *De Moribus Pueri ad Mensam*, which is an early type of the popular *Stans Puer ad Mensam*, of which so many variations have been published by Mr. Furnivall in *The Babees' Boke*. In the first year of his episcopacy he commenced the visitation of the parishes, deaneries, archdeaconries, etc., under his rule. He frequently encountered disobedience, but he proceeded with energy and firmness. The enmity thus provoked stimulated an attempt to poison him. His life was saved by his friend and leech, John de S. Giles. One of his reformatory measures has a special interest for the student of mediæval literature and antiquities. He suppressed the celebration of the "Feast of Fools" in his cathedral, designating it as "*vanitate plenum et voluptatibus spurcum, Deo odibile et demoni amabile*" (*Ep.* xxxii). The character of this festival is copiously illustrated in the additions to Du Cange (tit. *Kalenæ*). Warton has founded it with the *Festum Asinorum*, which took place on the Nativity, not on the Circumcision. The bishop also prohibited Scot-Ales in chapters, synods, and on holy days. His earnestness for the spiritual improvement of his diocese, for the maintenance of religious purity, and for the advancement of knowledge, is shown by his Pastoral Letter or Constitutions in 1238 (*Ep.* lii); by his refusal to confer benefices on unworthy persons, even when powerfully connected and sustained (*Epp.* xlix, lii, lxxiv); by his opposition to the king's appointment of clerks as justices in eyre (*Epp.* xxvii, xxviii, lxxii); by his anxiety to purchase from John de Foxton his copies of the sacred Scriptures (*Ep.* xxxiii); by his interference in behalf of the scholars of Oxford after their riotous attack on cardinal Otho, and by his consideration for them on other occasions. To Grosseteste is due the special jurisdiction conceded to the university in 1244, a privilege obtained by Cambridge only sixty years later. His rigorous episcopal visitations induced expostulations from Adam de Marisco, and furnished a text for the censures of Matthew Paris. They culminated in the great contention of 1239 with his canons, which was only settled six years later by pontifical decree. Its commencement is marked by an elaborate epistle or essay, which asserts the episcopal rights through all the ponderous forms of scholastic reasoning (*Ep.* cxxvii). The question of the limits of authority and obedience, and of the respective boundaries of concurrent or conflicting authorities, was indeed the main root of discord in all the great debates of Church and State, of the papacy and the empire, in the thirteenth century.

While this controversy was in progress Grosseteste displayed his accustomed energy in manifold directions. He maintains an intimate correspondence with the king, with the queen, with the archbishop of Canterbury, with the legate, with the cardinals, with the chiefs of the Franciscans and the Dominicans, to both of which orders he was warmly attached. He gives constant advice to De Montfort in his oscillating fortunes; he constantly seeks it for himself from Adam de Marisco. He keeps up and extends his studies in many ways. With the assistance of a Greek monk from St. Alban's and other scholars, he translated the spurious *Testaments of the XII Patriarchs*, and other Greek works. This version of the Testaments may have originated the tradition that he translated the Bible. He resisted the scandalous appointment of Italians, Poitevins, Provençals, and Savoyards to the rich benefices as they fell vacant. He opposed the extravagance and favoritism of the king, and in 1244 secured the united-reply of the "Committee of XII on royal expenditures" that they would not grant the aids demanded without a pledge of the reformation of abuses and the expenditure of the money by the com-

mission for the king's benefit. This was the prelude to the Provisions of Oxford and the Barons' War. In November of this year, bishop Grosseteste, with his friend and habitual adviser, brother Adam, proceeds to the papal court to look after the appeal of his chapter on the subject of visitation. He is thus present at the General Council of Lyons in 1245, which had been summoned for the condemnation, excommunication, and deposition of the emperor Frederick II. He does not appear prominent in the proceedings of the grand assemblage. His remote diocese, his resistance to papal aggression, the connection of Frederick with Henry III of England and with the earl of Leicester, may have precluded any ardent sympathy with the furious arrogance of Innocent IV. But his own letters and his subsequent conduct show that he sustained the general action of the pontiff, whose cause was assuredly that of national liberty and independence against the menace of universal imperialism. In the autumn of this ominous year Grosseteste returned to England, having obtained a satisfactory decision in regard to his authority. His right of visitation was acknowledged, but a comparison of his letters with the statements of Matthew Paris demonstrates that he did not obtain all that he demanded from the pope. It is equally erroneous to suppose that he sacrificed any principle in urging the collection of the ecclesiastical subsidy granted to Boniface, the new archbishop of Canterbury. There is no abatement of his principle or of his resolution. He resumes his visitations, and extends them to the rich monasteries. They provoke fresh opposition, and occasion fresh complications. At the king's request, he writes upon the reciprocal relations of the sacerdotal and kingly powers. Despite of all obstacles, he sturdily maintains his course. He contends in Parliament against the exactions of the king and the intrusion of foreigners into English benefices. He continues his anxious supervision of the University of Oxford; is sedulous in offices of prudence and charity, especially in ministering to the wants of poor scholars. He is indefatigable in his own pursuits. To this period must be referred the affectionate letter of Adam de Marisco dissuading him from excessive study: "*Numquid non est temperandus labor litteralis studii quod indubitanter nostis quia vitales spiritus exhaurit et attenuat corporis habitudinem, exasperat affectionem et rationem obnubilat?*" . . . . (Ep. xxxix.) The renewed resistance to his visitations, particularly by the monasteries, the dissensions thus engendered, and his differences with Boniface of Savoy, his archbishop, and the uncle of the queen, compelled him to make another visit to Lyons in 1250. He was coolly received by Innocent, and, at the close of an excited conversation, exclaimed, "Oh, money, money, how powerful you are, especially at the court of Rome!" He had anticipated the denunciations of Dante and Petrarch. He gave larger development to his honest indignation in the celebrated sermon on papal abuses which he preached on the 13th of May before the pope and three of the cardinals. This daring rebuke was not calculated to conciliate favor at court, and he turned his face homeward in December "*tristis et vacuus.*" He came back wounded in spirit, and burdened with age, care, and anxiety for the future. He contemplated the resignation of his bishopric—no unusual procedure at that time—and seclusion with his books; but he was induced to renounce this purpose by the representations of Adam de Marisco and other friends—perhaps by the authority of the archbishop—and the fear that the temporalities would be despoiled by the king during the vacancy. The determination to retain his high office was marked by increased vigor in the repression of scandals. Matthew Paris censures with great bitterness his severity in putting down monastic luxury, but admits the righteousness of his purpose. His first open breach with the pope occurred at this time. He had refused the pontifical request to

induct an Italian, ignorant of English, into a rich cure. He was suspended for a short time in consequence. This did not arrest his reforming ardor. He communicated an unworthy nominee of the king's, and placed an interdict on the church to which he had been presented. In the great Parliament of London, October 13, 1252, he opposed the king's demands, fortified by the pope's bull, and induced his brethren to join in a firm refusal of the application for a new subsidy. On this occasion he had a computation made of the incomes of the Italians benefited in England by Innocent, and found that they reached 70,000 marks, or thrice the clear revenue of the crown. He addressed a formal appeal to the lords and commonalty of England to suppress this disastrous spoliation (Ep. cxxxi). It was the first direct claim of popular support in ecclesiastical and political dissensions, and indicated the course to Simon de Montfort as a popular leader. His conduct was still more decided and menacing at the Parliament of May, 1253. In this year, the last of his long and useful life, Grosseteste gave the final affront to Innocent IV, and by one notable act, in strict accordance with his whole previous career, secured the highest public favor, and won the renown by which he is chiefly remembered. He rejected the pope's demand of a canonry at Lincoln for his nephew, Frederick di Lavagna, conveying his refusal in a letter of strong argument and striking condemnation of the pernicious "*non-obstantes*" and "*provisions*" of the papal procedure. It was a note of preparation for Edward III's celebrated "*Statute of Provisors*" nearly a hundred years afterwards (1344). This sharp letter concludes with the declaration "*filialiter et obedienter non obedio, contradico, et rebello*" (Ep. cxxviii). The pope was thrown into uncontrollable rage by this letter, but his rage was exchanged for equally unseemly joy when he heard of the death of Grosseteste within the year. This event occurred at Buckden on the 9th of Oct., 1253. His remains were buried in Lincoln Cathedral, where they were joined about four years later by those of his friend, Adam de Marisco, "God so providing that, as they were lovely and amiable in their lives, so in death they should not be divided" (*Lanercost Chronicle*).

The contemporaneous and posthumous fame of Grosseteste insured a copious crop of legends. He was supposed to have prophesied the ensuing civil war, which he might have done without any extraordinary illumination. On the night of his death, bells ringing in the sky were heard by Mr. Bishop, of London, and by some Franciscan friars in the neighborhood. He appeared in a portentous dream to Innocent IV in his last illness. Miracles were attributed to him, and in 1307 the king requested his canonization. To him was also ascribed the talking head of brass, which has been sometimes assigned to Friar Bacon, and sometimes to Friar Bungay; but this arose from his reputation as a magician, and not as a saint. His books he bequeathed to the Franciscans at Oxford, out of friendship for Adam de Marisco, or out of regard for the school which he had taught, governed, cherished, and organized. The services rendered by Robert Grosseteste to the University of Oxford have been too little appreciated.

*Character, Acquirements, and Influence.*—There was no one in the age in which he lived who led a more blameless life, or displayed higher excellences than Grosseteste: Matthew Paris, whose temperament and associations bred prejudice, attests his pre-eminent virtues. The elegance of his manners attracted admiring comment; the placidity and placability of his disposition equalled his unyielding resolution. The eulogy pronounced upon him after his death by the University of Oxford was entirely just: "No one knew him to neglect any good action appropriate to his office or his charge from fear of any man; he was ever ready for martyrdom if the sword of the executioner should pre-

sent itself." This testimony is re-echoed by Adam de Marisco. He was essentially a reformer without being an innovator. He "stood upon the ancient ways" to restore, preserve, or improve what was good and old. In this sense he was a reformer in Church and State, in education, in letters, and in philosophy. He is not to be regarded as a reformer before the Reformation—as a herald of either Lollardism or Lutheranism. His career tended to that result, but it was unforeseen and undesigned. He is devoted to the order of the Church, solicitous for Catholic orthodoxy, imbued with the spirit, sentiments, and doctrines of his communion. These points are abundantly confirmed by his letters (*Epp.* lxxii, cxxii). Notwithstanding the sternness and severity of his ministry, there was great gentleness in his demeanor, with moderation and prudence in his private and public counsels. He seems to have had withal a very moderate opinion of his own judgment, and habitually sought aid from others whom he deemed wiser than himself. He was easily charmed with simple amusements, enjoyed a jest, and had a rich vein of native humor, as numerous anecdotes attest. This lofty character was sustained and irradiated by transcendent genius and splendid accomplishments. These can be only imperfectly appreciated from his remains published or preserved. They must be estimated from the commendations of his own and of immediately succeeding times. His pupil, Roger Bacon, calls him "*sapientissimus Latinorum*," and "*sapientissimus theologus et optimus homo*" (*Opus Minus*, p. 317, 320), and remarks that "Grosseteste alone knew the sciences" (*Opus Tert.* c. x; *Compend. Stud.* c. viii); that "Robert, bishop of Lincoln, and Brother Adam de Marisco, were perfect in all wisdom, and that no more were perfect in philosophy" than these two, and Avicenna, and Aristotle, and Solomon (*Op. Tert.* c. xxxi); that the said Robert and Adam were "the greatest clerks in the world, perfect in divine and human knowledge" (*Ibid.* c. xxiii). Tyssington speaks of him, "*cujus comparatio ad omnes doctores modernos est rebus comparatio solis ad lunam quando eclipsatur*." The range of his acquirements will be partially illustrated by the number and variety of his writings. He is credited with a consummate mastery of all existing science, and with a knowledge of the three learned professions. Roger Bacon distinctly assigns to him the adoption or the inauguration of the Experimental Method (*Comp. Stud.* c. viii). Several poems, Latin, French, and even English, are attributed to him; and he certainly encouraged the use of the English tongue in preaching, and it may have been, from his employment of the still rude vernacular, that he became the most popular as well as powerful preacher of his day. He is reputed to have been familiar with Greek and Hebrew, but we are assured that he attained only in advanced life a sufficient mastery of the former to translate Greek books (*Rog. Bacon, Op. Tert.* c. xxv), and then not without more competent assistance (*Comp. Stud.* c. viii). The vast influence which he exercised over his contemporaries and our succeeding times is ably presented by Luard (*Pref.* p. lxxxv, ix): "No one," says he, "had a greater influence upon English thought and English literature for the two centuries which followed his time; few books will be found that do not contain some quotations from Lincolnensis, 'the great clerk Grossetest.'"

*Writings.*—The works of Grosseteste have been diversely reported at 200 and 300. The difference of estimation, as well as the magnitude of the sum, may be explained by loose modes of enumeration, as indicated by the comparison of the lists of Roger Bacon's treatises with his actual remains. Divisions or chapters were frequently accounted separate productions. The same works were circulated under different titles. Many of Grosseteste's alleged books were only elaborate epistles or occasional essays, which would now pass as tracts. Many compositions were assigned to

him of which he was guiltless; many fathered upon him to secure the favor of his name. But, after all such rectifications, the multitude and multiplicity of his writings must have been amazing, especially when regarded as the leisure fruitage of an active life. Most of them have been lost, destroyed, or forgotten. Leland humorously reports the disappointment attending his own eager exploration of the Franciscan treasures at Oxford at the time of the dissolution of the monasteries: "*Summe Jupiter! quid ego illic invenni! Pulverem autem invenni, telus arcanarum, tineas, blattas, situm denique et squalorem. Inveni etiam et libros, sed quos tribus obolis non emerem*" (*Script. Brit.* p. 286). Much, however, remains, the greater part of which is still unpublished. In Pegge's *Life of Grosseteste*—"the scarcest of modern books"—the list of his writings fills twenty-three quarto pages, closely printed. Similar catalogues are given by Leland, Tanner, Oudin, etc. These it were unreasonable to repeat or to review. He was the reputed author of a religious romance in verse, *Chateau d'Amour*, and of the didactic poem *Manuel Peche*, translated by Robert de Brunne. Richard Hampole's *Prikke of Conscience* has also been referred to him. He may have composed or compiled the rude draft of these noted productions, or may have provided the crude materials with which they were constructed. We know from many sources that the venerable bishop was devoted to music, and "smit with the love of sacred song." Polycarp Leyser ascribes to him the metrical *Dialogue under Corpus et Animam*, of which many versions exist in Anglo-Norman, English, Greek, Provençal, French, German, Walloon, Spanish, Italian, Danish, and Swedish (*Latin Poems of Walter Mapes*, ed. Wright, p. 95-106, 321, 349), and whose echoes may have occasioned Tennyson's *Two Voices*. Grosseteste left behind him many moral and theological treatises, and a copious collection of sermons. He wrote commentaries on Aristotle and Boethius, and translated several works from the Greek. He wrote on agriculture, digested according to the calendar, *The Buke of Husbandry*, and of *Plantynge and Graffynge Trees and Vynes*, according to Wynkyn de Worde's title of the version printed by him. This was probably compiled from Palladius and the *Geoponica*. We trace in the letters of Adam de Marisco his untiring interest in all physical research and contemporaneous history; and from Roger Bacon we learn that he wrote *De Iride, de Cometis, et de aliis* (*Comp. Stud.* c. viii), including probably a discussion of tides. Other works have been alluded to already. But the most interesting of his remains, for the knowledge of the man and of his age, is the large volume of his letters, from which, and from the instructive preface by Mr. Luard, this notice has been principally drawn.

*Authorities.*—The fascination of Grosseteste's name has in successive centuries excited the enthusiasm of biographers, but has rarely resulted in the accomplishment of their designs. Bishop Barlow, of Lincoln; Samuel Knight, the biographer of dean Colet and Erasmus, and Anthony à Wood, collected materials for his life. Williams, archbishop of York, previously bishop of Lincoln, the successor of lord Bacon in the custody of the seals, meditated the publication of Grosseteste's life and writings in three volumes folio, but was prevented by the outburst of the Great Rebellion. Edward Brown, of Clare Hall, designed a life of the great bishop, but was anticipated by death in 1699. Dr. Samuel Pegge achieved his biography, which is valuable, but unattainable. Other authorities, some of which have been previously referred to, are Leland, *Script. Hist. Brit.*; Ball, *Script. Ill. Maj. Brit.*; Tanner, *Bibliotheca*; Wharton, *Anglia Sacra*; Oudin, *Script. Eccl.*; Pope Blount, *Cens. Celebr. Auct.*; Godwin, *De Præsulibus Angliæ*; Cave, *Script. Eccl. Hist.*; Warton, *Hist. English Poetry*; *Epistola Roberti Grosseteste*, edit. Luard; *Monumenta Franciscana*, ed. Brewer, containing Eccleston, *De Adventu Fratrum Minorum*, and Ada-

*mi de Marisco Epistole*, with valuable appendixes; *Rogeri Baconis Opera Anecdota*, edit. Brewer; *Royal and Historical Letters regn. Henry III.* The last four works are published by the British Treasury, in continuation of the task of the Record Commission. To these authorities should be added the *Chronicles of Matthew of Paris*, *Matthew of Westminster*, *Roger of Wendover*, *Capgrave*, *Trivet*, *Rishanger*, and *Lanercost*. See also *Lechler*, *Robert Grosseteste* (Leipsig, 1867). (G. F. II.)

**Grostète**, CLAUDE, a French Protestant theologian, was born at Orleans in 1647. He studied law, and was admitted to the bar by the Parliament of Paris in 1665, but afterwards devoted himself to theology, and in 1675 became pastor of Lisy. In 1682 he accepted a call to Rouen, but soon after returned to Lisy, where he remained until the revocation of the edict of Nantes in 1685. Obligated to leave France, he went to England, and died at London in 1713. He wrote *Traité de l'Inspiration des livres sacrez du N. T.* (Amst. 1635, 8vo):—*Entretiens sur la correspondance fraternelle de l'Eglise anglicane avec les autres Eglises réformées* (Hague, 1708, 12mo):—*Relation de la Société établie pour la propagation de l'Evangile dans les pays étrangers, avec trois sermons* (Rotterd. 1708):—*Nouveau Mémoires pour servir à l'histoire des trois Camarads où l'on voit les déclarations de M. le colonel Cavalier* (London, 1708, 8vo):—*La Pratique de l'Humilité* (Amst. 1710, 12mo):—*Charitas Anglicana* (about 1712):—*Le Devoir du chrétien concubescant, en quatre sermons sur le Psa. cxvi. 8, 9, et les quatre sentimens du roi Zéchias sur sa maladie, sa convalescence et sur sa chute après sa convalescence* (Hague, 1713, 8vo):—*Sermons sur divers textes* (Amsterdam, 1715, 8vo). See *Vie de Claude Grosstète* (prefixed to his *Sermons sur divers textes*); Haag, *La France Protestante*; Hoefer, *Nouv. Biog. Générale*, xxii, 190.

**Grosvenor**, BENJAMIN, D.D., an eminent Dissenting minister, was born in London Jan. 1, 1675, and educated at the academy at Attercliffe, Yorkshire. Mr. Grosvenor entered upon his public ministry in the year 1699 as a Baptist. Soon after this he was chosen to succeed Mr. Slater as pastor of the Presbyterian congregation in Crosby Square. To this charge he was ordained July 11, 1704. His popularity as a preacher, his solid judgment, added to a lively imagination, his graceful elocution, and fervent devotion, occasioned his being appointed to take a part in several important lectures which were then carrying on in the metropolis. In 1730 the University of Edinburgh presented him with the degree of D.D. He continued at Crosby Square till the year 1749, when age compelled him to relinquish his pastoral office. He died October 27, 1758. A catalogue of his published pieces, chiefly occasional sermons, amounting to about thirty in number, may be found in Wilson, *History of Dissenting Churches*. A volume of his *Sermons, with a Memoir by J. Davies*, was published in 1808 (Newport, 8vo).—*Jones, Christian Biography*; Skeats, *Free Churches of England*.

**Grotius**, HUGO (Dutch name DE GROOT), one of the most illustrious names in literature, politics, and theology. He was born at Delft April 10, 1583, and in his boyhood gave signs of extraordinary ability. At eleven he was sent to the University of Leyden, where he remained three years, devoting himself especially to theology, law, and mathematics. In 1597 he maintained two theses on philosophy, and wrote in praise of Henri IV., in Latin, a poem entitled *Triumphus Gallicus*, which he dedicated to M. de Buzenval, the French ambassador in Holland. In 1598 he accompanied a Dutch embassy to Paris, where he was introduced to the king, who gave him a brilliant reception. On his return home, 1599, he entered on the practice of law, but devoted himself also to literature. Each year was marked by a new book, or by a new

edition of some important work from his hand. In 1607 he married Mary of Reigersberg, a lady of excellent family, and of high moral and intellectual qualities. In 1609 he published his celebrated treatise *Mare Liberum*, his first essay in treating the law of nations. Appointed pensioner of Rotterdam in 1613, he foresaw the difficulties in which the country would soon become involved, and only accepted office on condition that it should be made permanent. He thus obtained the right of entering the States-general, where he was thrown into close relations with Barneveldt the elder, with whom he formed a lasting friendship. In 1615 he was sent to represent Holland in a conference held in England on the subject of the Greenland fisheries. During his stay in England, Grotius had several conferences with Casaubon on the means of uniting the Roman Catholics and the Protestants, a problem to which he devoted a great deal of thought and labor throughout his life. After his return to Holland he took an active part in the religious discussions which were soon to divide the country, and in which he was always found on the side of freedom. He had at all times favored the views of Arminius, whose enlogy he published in 1609. Though not then, as he afterwards became, a skilled theologian, he was especially attracted by the doctrine of Arminius, and the predilection was afterwards strengthened by study and reflection. And, indeed, the Arminian doctrine, which, discarding the Calvinistic dogma of absolute predestination, teaches that man is free to accept or to refuse grace, could not fail to suit a mind such as that of Grotius. It was held by the majority of the Dutch states; and when Gomar (q. v.) and his party attempted to obtain the proscription of the Arminians, the states did their utmost to prevent it, and enjoined on both parties to tolerate each other. The Gomarists then incited the people to disobey the states; revolts took place in various towns, and some Arminian ministers were driven out of their churches. Grotius, who had previously helped his friend Uytenbogaert with his advice when framing the *Acta Remonstrantium*, in which the Arminian principles are laid out, framed, together with Barneveldt, a new edict of toleration which was voted by the states. But fresh disturbances occurred every day, and the states, by a decree dated Aug. 4, 1617, gave to the town magistrates the power of raising troops to put down insurgents. This decree was passed without the participation of the stadtholder Maurice of Nassau, who had for a long time been seeking occasion to break with Barneveldt and the Republican party. He therefore availed himself of the opportunity offered him by this decree, which, he asserted, disregarded his rights as captain general. He at once sided with the Gomarists, approved all their plans, and forbade the soldiers to obey the civil authorities. Shortly before these events, Grotius had been sent to conciliate the authorities of Amsterdam, who were opposed to the Arminians. His failure in this mission, with the increasing troubles and perils of the country, caused him an illness. During the disturbances, he wrote several works in defence of his party, in which, in order to justify the measures taken by the Dutch States, he attempted to prove that the state has the right to regulate all that relates to the discipline and even the dogmas of the Church. He also applied himself to show that the Arminian doctrine was upheld by the fathers and the councils. The Gomarists, beaten in argument, employed violence to overcome their adversaries. In 1618, Maurice, backed by the States, undertook to coerce the towns, which, on the ground of the sovereignty guaranteed to them by the constitution, had disregarded as illegal the order of the prince forbidding their raising troops. Holland was invaded by the troops of the stadtholder, who gave free vent to his anger. Assembling eight members of the States, he made them decree the arrest of Barneveldt, Grotius, and Hogenbeets, under the accusation of being "ene-

mies of their country for having attempted to resist at Utrecht the army of the prince." The magistrates of Rotterdam and of some other cities of Holland protested against this open violation of their rights, but were deposed. The Synod of Dort, which the Gomarists, sure of having the majority of the clergy on their side, had for a long time demanded, in order to obtain a condemnation of the doctrines of their adversaries, was then assembled. See DORT. In consequence of the decisions of Dort, some of the Arminian ministers were exiled, others put in prison. See ARMINIANISM. The Gomarists, with the partisans of Maurice, commenced in Nov. 1618, the trial of the three prisoners. Twenty-six commissioners, chosen from their avowed enemies, were appointed to judge them. After having, under appearance of legality, murdered Barneveldt in spite of the remonstrances of Du Maurier, ambassador of France, and a friend of Grotius, they began the trial of the latter. He declined to recognise their competence, claiming that he could only be judged by the States of Holland. His remonstrances were of no avail; five hours' time and one sheet of paper were all the facilities afforded him for his defense. "He was condemned on the 18th of May, 1619, to perpetual imprisonment, and his property confiscated. Pursuant to this sentence, he was conveyed on the 6th of June in the same year to the fortress of Loevestein, situated at the extremity of an island formed by the Maas and the Waal. His wife was allowed to share her husband's imprisonment, but Grotius's father was refused permission to see his son. During the imprisonment of Grotius, study became his consolation and the business of his life. In several of his letters addressed from Loevestein to Vossius, he gives an account of his studies, informing him that he was occupied with law and moral philosophy. He devoted his Sundays to reading works on religious subjects, and he employed in the same way the time which remained after his ordinary labors were over. He wrote during his imprisonment his treatise on the truth of the Christian religion, in Dutch verse (which he subsequently translated into Latin prose, under the title *De Veritate Religionis Christianæ*); translated the *Phœnissæ* of Euripides into Latin verse, wrote the institutions of the laws of Holland in Dutch, and drew up for his daughter Cornelia a kind of catechism in 185 questions and answers, written in Flemish verse. After eighteen months' confinement, Grotius was at last released by the ingenuity of his wife, who had obtained permission to go out of the prison twice a week. He constantly received books, which were brought in and taken out in a large chest together with his linen. For some time this chest was strictly examined by the guards, but finding only books and foul linen, they at last grew tired of the search, and gave it up. Grotius's wife, having observed this, persuaded her husband to get into the chest, which he did, and in this manner escaped from the fortress on the 21st of March, 1621. He made his way through Antwerp to France, where his wife, who had been detained for about a fortnight in prison, joined him a few months afterwards. Louis XIII received Grotius very favorably, and granted him a pension of 3000 livres, but it was paid with great irregularity. He was harshly treated by the Protestant ministers of Charenton, who, having assented to the doctrines of the Synod of Dort, refused to admit Grotius into their communion, and he was obliged to have divine service performed at home. At Paris (1622) he published his *Apologétiqueum* (often reprinted), which was prohibited in Holland under severe penalties. Having spent a year at Paris, he retired to a country-seat of the president De Mesmes, near Senlis, where he spent the spring and summer of 1623. It was in that retreat that he commenced his work *De Jure Belli et Pacis*, which was published in the next year. During his residence in France he was constantly annoyed with importunities to pass over to the Roman Catholic religion. But,

though he was tired of the country, and received invitations from the duke of Holstein and the king of Denmark, he declined them. Gustavus Adolphus also made him offers, which, after his death, were repeated by Oxenstiern in the name of queen Christina. In the mean time the stadtholder Maurice died, and his successor seeming less hostile to Grotius, he was induced by the entreaties of his Dutch friends to venture to return. He arrived at Rotterdam in September, 1631, and the news of his return excited a great sensation throughout all Holland. But, in spite of all the efforts of his friends, he was again obliged to leave the country, and went (1632) to Hamburg, where he lived till 1634, when he joined the chancellor Oxenstiern at Frankfort-on-the-Main, who appointed him councillor to the queen of Sweden, and her ambassador at the court of France. The object of the embassy was to obtain the assistance of France against the emperor. Grotius arrived at Paris in March, 1635; and although he had many difficulties to encounter from Richelieu, and afterwards from Mazarin, he maintained the rights and promoted the interests of his adopted sovereign with great firmness. He continued in his post till 1644, when he was recalled at his own request. Having obtained a passport through Holland, he embarked on his return at Dieppe, and on his landing at Amsterdam (1645) was received with great distinction, and entertained at the public expense. From Amsterdam he proceeded by Hamburg and Lübeck to Stockholm, where he was received in the most flattering manner by the queen. Grotius, however, was not pleased with the learned flippancy of Christina's court, and resolved on quitting Sweden. The climate, also, did not agree with him. The queen, having in vain tried to retain him in her service, made him a present of a large sum of money, and of some costly objects; she also gave him a vessel, in which he embarked for Lübeck on the 12th of August; but a violent storm, by which his ship was tossed about during three days, obliged him to land on the 17th in Pomerania, about 15 leagues from Dantzic, whence he proceeded towards Lübeck. He arrived at Rostock on the 26th, very ill from the fatigues of the journey, and from exposure to wind and rain in an open carriage; he died on the 28th of August, 1645, in the sixty-third year of his age. His last moments were spent in religious preparation, and he died expressing the sentiments of a true Christian. His body was carried to Delft and deposited in the grave of his ancestors, where a monument was erected to him in 1781" (*English Cyclopædia*).

Of the many claims on posterity of this distinguished man, we have only to consider those which relate to theology. Grotius applied himself to various branches of theology. We notice, first, his *exegetical* writings. His "Annotations on the O. and N. T." (*Annotat. in libros evangeliorum et varia loca S. Scripturæ* [Amst. 1641]), *Annotat. in Epist. ad Philemonem* (ib. 1642, 8vo; 1646, 8vo), *Annot. in vet. Test.* (Paris, 1664, 3 vols. fol., with Vogel's and Döderlein's additions, Hal. 1775-1776, 3 vols. 4to), *Annot. in N. T.* (Par. 1644, 2 vols., often reprinted; late ed. Gröning. 1827-1829, 7 vols. 8vo) remained for a long time unknown almost to all except Arminian divines, and some Calvinists even spoke of them as dangerous works; for instance, Abr. Calov in *Bibl. V. et N. T. illustrat.* The chief cause of the present popularity of Grotius's exegesis is its purely philological and historical character. In this respect Grotius may be considered as the forerunner of Ernesti. Valuable, however, as these writings are in this respect, they have many defects. As to form they are mere *comments* (as is indicated by the title *Annotationes*), and do not constitute a complete exposition of biblical doctrine. Grotius fails to get at the connection of the thought in his elucidations, and often approaches to a rationalistic mode of treating Scripture. It was well enough in Grotius to compile classical parallels to the maxims given by Jesus in the Sermon on

the Mount, but this should only have been the preparatory step to a full elucidation of the points wherein the morality of Christ differs from that of antiquity. Thus, also, it was quite correct in the elucidation of the O.-T. prophecies to reject the practice of an arbitrary typology of separate passages taken without regard to their original historical connection. But Grotius went towards the other extreme, and gave at least a show of ground for the remark that "Coccejus found Christ everywhere in the O. T., while Grotius found him nowhere." On Grotius's merits as an interpreter, see Segaar, *Oratio de Hugone Grotio, illustri humanorum et divinorum N. T. scriptorum interprete* (Ultraj. 1785, 8vo); Meier, *Gesch. d. Schriftklärung* (iii, p. 434 sq.). His canon for the interpretation of the prophecies of the O. T. is contained in his exposition of the *ἰνα πληροφορῶ* in the *Annotations on Matt. i, 22*, which is worthy of being studied.

In the field of *Apologetics* Grotius achieved a great and enduring success by the publication of his treatise *De veritate religionis christiane* (1627; often reprinted). The best editions are those of Clericus (1709, 1717, 1724, 8vo) and of J. C. Köcher (Jena, 1727, 8vo; Halle, 1734-39, 3 vols. 8vo). It was translated into German by Höhl (Chemnitz, 1768, etc.); French, by Le Jeune (1724), Goujet (1724); English, by Patrick (1667), by Clarke (1793), by Middleton (Lond. 1849, 12mo); Arabic, by Pocock (1660), etc.; and even into Chinese and Malay. The first plan of it was drawn up by Grotius in 1622 while a prisoner at Loevestein. The original object of this prison work, which was written in verse, was to furnish seafaring men, who should come in contact with the heathen, arguments in defense of their faith. But when translated into Latin prose it found its way into the highest circles of educated men, and was, until very recently, a standard text-book on the Evidences of Christianity. In this work Grotius may be said to have erected apologetics into a science, and thus rendered immense service, even though his treatment of the subject does not meet all the wants of the present age. It is divided into six books, of which the first treats of the existence and attributes of God; the second, of the excellence of the doctrine and ethics of Christianity; the third, of the authenticity of the books of the New Testament; the last three, of objections supposed to be made on the part of pagans, Mohammedans, and Jews.

In *Doctrinal Theology* Grotius accepted the Arminian system as regards the doctrine of predestination. He pronounced clearly for the universality of divine grace, without, however, falling into Pelagianism, an accusation often brought against him, but which he vigorously repelled. See his *Conciliatio Dissidentium de re Predestinaria et gratia opinio* (1613), and his *Disquisitio an Pelagiana sint ea dogmata que nunc sub eo nomine traduntur*. Both treatises are given in his *Opera Theologica*, vol. iii. He also refuted in his *Christology* the accusation of inclining to Socinianism in his views of the doctrine of redemption. He defended the doctrine of the expiatory nature of the death of Christ against the Socinians in his *Defensio fidei catholice de satisfactione Christi adversus F. Socinum* (Leyden, 1617; often reprinted). The Socinians answered in the person of Crell by the *Responsio ad Librum Grotii de Satisfactione*, which was refuted by Stillingfleet, etc. But the orthodox, on the other hand, attacked Grotius on account of his theory of the atonement; and it is certainly true that he differs as well from the theory of satisfaction of Anselm as from the orthodox system both of the Lutheran and Reformed churches. In place of a real satisfaction (*satisfactio*), Grotius substitutes a *solutio* on the part of God for the sake of Christ; he saw in the death of Christ more a *substitutory* than a *satisfactory* act; it was a *penal example*, by which, on the one hand, the majesty of God's law was vindicated, and, on the other, his horror of the sin of the world was exempli-

fied in a most striking manner. Baur (*Versöhnungslehre*) gives a clear, and, in the main, fair account of the Grotian theory of atonement, from a translation of part of which, by the Rev. L. Swain, in the *Bibliotheca Sacra* for April, 1852, we extract the following: "The fundamental error of the Socinian view was found by Grotius to be this: that Socinus regarded God in the work of redemption as holding the place merely of a creditor, or master, whose simple will was a sufficient discharge from the existing obligation. But, as we have in the subject before us to deal with punishment and the remission of punishment, God cannot be looked upon as a creditor, or an injured party, since the act of inflicting punishment does not belong to an injured party as such. The right to punish is not one of the rights of an absolute master or of a creditor, these being merely personal in their character; it is the right of a ruler only. Hence God must be considered as a ruler, and the right to punish belongs to the ruler as such, since it exists, not for the punisher's sake, but for the commonwealth, to maintain its order, and to promote the public good. The act of atonement itself is defined in general as a judicial act, in accordance with which one person is punished in order that another may be freed from punishment, or as an act of dispensation, by which the binding force of an existing law is suspended in respect to certain persons or things. The first question to be asked, therefore, is, whether such a dispensation or relaxing is possible in respect to the law of punishment. Grotius does not hesitate to answer this question in the affirmative, on the ground that all positive laws are relaxable. The threat of punishment in Gen. ii, 17, contains in itself, therefore, the implied right to dispense with the infliction of that punishment, and that, too, without supposing any essential change in God himself, since a law in relation to God and the divine will is not something having an internal force and authority of its own (nichts Inneres), but is merely an operation or effect of the divine will. The objection that none but the guilty person himself can receive the punishment which is due to his crime is answered by the distinction that although every sinner, as such, does, in accordance with the very idea of sin, deserve punishment, still it is not a matter of absolute necessity that this punishment should be actually inflicted. As, therefore, the remission of punishment is a thing which is not in its own nature impossible, it must be left to the circumstances of each particular case to decide how far such remission shall really be admitted. If the authority of law is not to be dangerously weakened, it should be admitted only in cases of the greatest exigency. Such a case clearly is that which is offered in the very instance which we are now contemplating, where, by the actual infliction of the punishment, the entire race of man becomes devoted to death; and as, on the one side, the possibility of the remission of punishment cannot be denied, so, on the other, it cannot be shown to be absolutely unjust that one person should be punished for another's sin. The essential thing in punishment is that it should be inflicted in consequence of sin, not that it should be inflicted upon the person who committed the sin. If, now, it admits of no doubt that a superior may properly inflict upon a subject, as the punishment of another's sin, whatever he might properly inflict upon him respectively of another's sin, then may God, without incurring the charge of injustice, permit Christ to suffer and die for the sins of men. This course, then, being in itself a permissible one, the only question is why God actually determined to adopt it. As the Scripture says that Christ suffered and died for our sins, we are to infer that God purposed not to forgive sins so numerous and so great without a striking penal example, in order to show his displeasure at sin by some act which should in strictest propriety be termed a penal act. And besides this inward reason, lying in the very nature of

the Deity, and called in Scripture the wrath of God, there was the additional consideration that the less sin is punished the more lightly it will be regarded. Prudence itself, therefore, must lead the Deity to exact the punishment, especially where such punishment has been expressly threatened beforehand. Thus, in the penal example furnished by the death of Christ, there is exhibited at once the divine grace and the divine severity, the hatred of God against sin and his care for the maintenance of the law. And this is the mode of relaxing the laws which jurists themselves pronounce the best, viz. by commutation or compensation; because thereby the least injury is done to the authority of the law, and the design with which the law was made is effectually secured, as when one who is charged with the delivery of a thing is free from his liability on paying its full value; for the same thing and the same value are terms very nearly related. Such a commutation may take place not only with respect to things, but also with respect to persons, where it can be done without injury to another.

"In these few statements is contained the entire theory of Hugo Grotius. What is essential to it lies in this main proposition: God neither would nor could forgive the sins of men without the setting up of a penal example. This is done by the death of Christ. Hence the death of Christ is the necessary condition of the forgiveness of sin, and what it always actually presupposes. The theory, therefore, hangs upon the idea of a penal example and of its presupposed necessity, and the question for us now to consider is how, by means of that idea, it stands related, on the one hand, to the theory of the Church which it would defend, and, on the other, to the Socinian theory which it would confute.

"As to its relation to the satisfaction-theory held by the Church, it will be seen at once that it asserts the necessity of the death of Christ in order to the forgiveness of sin, in a sense wholly different from that which the Church intends. If the death of Christ is necessary only as a penal example, then its necessity is grounded, not in the very nature of God himself, not in the idea of absolute justice, by which sin, guilt, and punishment are inseparably bound together, but merely in that outward relation which God holds to men as a ruler. The real object of consideration is not past sin, but future. The guilt of past sin may be removed immediately, for God has the absolute right to remit punishment; and a penal example is necessary only for the purpose of maintaining the honor of the law, and guarding against sin in time to come. The connection, therefore, between sin and punishment is not an inherent, internal connection, founded in the very nature of sin; the design of punishment is merely to prevent sin; or, in other words, it is connected with sin only in consequence of a positive law emanating from God as the supreme Ruler. Hence the final ground upon which Grotius goes back to prove the necessity of instituting a penal example is merely the penal sanction contained in Gen. ii, 17. The advocates of the satisfaction-theory, indeed, go back to the same sentence, but only to remark in it a necessary outflowing of the divine justice. Grotius, on the contrary, takes the absolute idea of divine justice entirely away; for if he affirms, in opposition to Socinus, that justice is an attribute which belongs of itself to the very nature of God, but at the same time asserts that the actual exercise of the attribute depends on the will of God, it is precisely the same as the assertion of Socinus himself, that penal justice is the effect of the divine will; and if he further says that God does what he does not without a cause, still the ultimate ground is not God's absolute nature, but his absolute will, which is in itself equally competent to punish or not to punish.

"Here, then, is an important distinction between the theory of Grotius and that of the Church. The main

point in the Church's theory of satisfaction is that, if Christ had not made a strict and perfect satisfaction for men, they could not have been released from sin. Socinus objected to this that satisfaction and forgiveness were contradictory ideas. This assertion Grotius, as the defender of the Church's doctrine of satisfaction, could not admit. He therefore replied that satisfaction and forgiveness were not strictly simultaneous; that, according to the conditions established by God, the latter then first follows the former when a man by faith in Christ turns to God and prays him for the forgiveness of his sins. This distinction must certainly be made if the objection of Socinus is to be successfully met, and the two ideas are to be permitted to stand side by side. But Grotius could not stop here. If it is only a penal example that is furnished by the death of Christ, then the idea of satisfaction, strictly speaking, has no further relevancy. As, however, Grotius wished to retain this idea, he brought to his assistance a peculiar distinction which is made in law between the two ideas denoted respectively by the terms *solutio* and *satisfactio*. If, said Grotius, the very thing which is owed be paid either by the debtor himself, or, which is in this case the same thing, by another in the debtor's name, then the discharge of the debt takes place by that very act; but it is to be called a discharge, not a remission (*remissio*). Not so, however, when something else is paid than the specific thing which was due. In this case there must be added, on the part of the creditor or ruler, an act of remission as a personal act; and it is this kind of payment, that may be either accepted or refused by the creditor, which is properly called, in the technical language of the law, satisfaction. While, therefore, it was the original design of Grotius, in all this, merely to prove, in opposition to Socinus, that the idea of satisfaction did not exclude that of remission, what he really did was to substitute in place of the common idea of satisfaction a totally different one; for the common idea of satisfaction rests essentially on the supposition that Christ has rendered precisely the same thing which men themselves were to have rendered. If, now, such a payment (*solutio*) be, as Grotius asserts, no remission (*remissio*), but only a discharge (*liberatio*), then it must be conceded to Socinus, which was the thing contested by Grotius, that the ideas of satisfaction and remission mutually contradict and exclude each other, or, in other words, that the satisfaction which was made by Christ does not deserve the name of satisfaction in the sense which the common theory of the Church connected with that expression. But if Christ has not made satisfaction in this sense, if he has not truly and perfectly rendered for men what they were to have rendered for themselves, then the idea of satisfaction can be applied only so far as he has given to God something, whatever that something may be, in place of that which was to have been rendered by men themselves in their relation to God. This, then, is the precise meaning of the theory of Grotius, and the difference between it and the satisfaction-theory of the Church. The idea of satisfaction is let down from its full and real import to the idea of a mere rendering of something; Christ has made satisfaction so far as he has fulfilled a condition, of whatever kind it may be, upon which God has suspended the forgiveness of the sins of men—so far as he has given to God a something with reference to that end. This something is that penal example without the setting forth of which God could not have forgiven the sins of men."

Many of the writings of Grotius are important in the sphere of Church History: such are, for instance, his *Hist. Gothorum, Vandalorum et Longobardorum* (1655); and his *Annales et hist. de rebus Belgicis ab obitu Philippi regis usque ad inducias anni 1609*. He also treated several questions of ecclesiastical jurisprudence in his *De imperio summarum potestatum circa sacra* (*Opp.* theol. iii, p. 201), in which he sides with Arminius in

favor of the territorial system against the opinion of Gomar.

The theological writings of Grotius are collected under the title *Opera omnia theologica* (Lond. 1679, fol. 3 vols.). The first vol. contains a *Life of Grotius*, with his *Annot. in V. T.*; vol. ii contains the *Annot. in N. T.*; vol. iii includes his miscellaneous theological writings. There have been many lives of Grotius, none of them adequate except Brandt, *Hist. van het leven des Heeren Huig de Groot* (Amst. 1727, 2 vols. fol.). See also Lehmann, *Grotii Manes ab iniquis ostrectationibus vindicati* (Delft, 1727); Burigny, *Vie de Grotius* (Paris, 1752, 2 vols. 8vo), translated into English (Lond. 1754, 8vo); Butler, *Life of Grotius* (Lond. 1827, 8vo); Creuzer, *Luther and Grotius* (Heidelb. 1816, 8vo); Cras, *Laudatio H. Grotii* (Amst. 1796, 8vo); Luden, *H. Grotius nach seinen Schicksalen und Schriften dargestellt* (Berlin, 1806, 8vo); Seegar, *Orat. de Grotio* (Utrecht, 1785, 4to); Bayle, *Dictionary*, s. v.; Herzog, *Real-Encyclopädie*, v, 395 sq.; Nicéron, *Mémoires pour servir*, vol. xix.; Schröckh, *Kirchengeschichte*, v, 246; Hoefler, *Nouv. Biogr. Générale*, xxii, 197 sq.; Piper, *Kalender*, 1867; Nichols, *Calvinism and Arminianism*, ii, 582-641; Shedd, *Hist. of Doctrines*, ii, 347 sq.

**Grove**, the representative in the A. V. in certain passages of two Heb. words.

1. אֲשֶׁרֶת (or אֲשֶׁרֶת), *asherah* (from אָשַׁר, *to be upright*). Selden was the first who endeavored to show that this word—which in the Sept. and Vulg. is generally rendered *grove*, in which our authorized version has followed them—must in some places, for the sake of the sense, be taken to mean a *wooden image* of Ash-toreth (*De Diis Syris*, ii, 2). Not long after, Spencer made the same assertion (*De Leg. Hebreor.* ii, 16). Vitringa then followed out the same argument in his note on Isa. xvii, 8. Gesenius, at length, has treated the whole question so elaborately in his *Thesaurus* (p. 162) as to leave little to be desired, and has evinced that *Asherah* is a *name*, and also denotes an image of this goddess. Some of the arguments which support this partial, or, in Gesenius's case, total rejection of the signification *grove* for *asherah* are briefly as follows: It is argued that it almost always occurs with words which denote *idols* and *statues of idols*; that the verbs which are employed to express the making an *Asherah* are incompatible with the idea of a *grove*, as they are such as *to build, to shape, to erect* (except in one passage, where, however, Gesenius still maintains that the verb there used means *to erect*); that the words used to denote the destruction of an *Asherah* are those of *breaking to pieces, subverting*: that the *image* of *Asherah* is placed in the Temple (2 Kings xxi, 7); and that *Asherah* is coupled with *Baal* in precisely the same way as *Ashtoreth* is (comp. Judg. ii, 13; x, 6; 1 Kings xviii, 19; 2 Kings xxiii, 4; and particularly Judg. iii, 7, and ii, 13, where the plural form of both words is explained as of itself denoting *images* of this goddess; see also 2 Chron. xxxiii, 19; xxxiv, 3, 4). Besides, Selden objects that the signification *grove* is even incongruous in 2 Kings xvii, 10, where we read of "setting up groves under every green tree." Moreover, the Sept. has rendered *Asherah* by *Astarte* in 2 Chron. xv, 16 (and the Vulg. has done the same in Judg. iii, 7), and, conversely, has rendered *Ashtoreth* by *groves* in 1 Sam. vii, 3. See ASHTORETH; HIGH-PLACE.

On the strength of these arguments most modern

scholars assume that *Asherah* is a *name* for *Ashtoreth*, and that it denotes more especially the relation of that goddess to the planet Venus, as the lesser star of good fortune. It appears, namely, to be an indisputable fact that both *Baal* and *Ashtoreth*, although their primary relation was to the sun and moon, came in process of time to be connected, in the religious conceptions of the Syro-Arabbians, with the planets Jupiter and Venus, as the two stars of good fortune. See MENI. We may instance the connection between *Artemis* and *Selene*; that between *Juno* and the planet Venus, mentioned in *Creuzer*, ii, 566; the fact that *astro* is also the name of the same planet in the religious books of the Tsalians (*Norberg's Onomast. Cod. Nasarai*, p. 20). It is in reference to this connection, too, that a *star* is so often found among the emblems with which *Ashtoreth* is represented on ancient coins. Lastly, while the word *Asherah* cannot, in the sense of *grove*, be legitimately deduced from the primitive or secondary signification of any Syro-Arabian root, as a name of the goddess of good fortune it admits of a derivation as natural in a philological point of view as it is appropriate in signification. The verb אָשַׁר means *to prosper*; and *Asherah* is the feminine of an adjective signifying *fortunate, happy*.—Kitto, s. v. *Ashtoreth*. See ASHERAH.

We must not omit to notice a probable connection between this symbol or image—whatever it was—and the sacred symbolic tree, the representation of which occurs so frequently on Assyrian sculptures, and is shown in the subjoined woodcut. The connection is ingeniously maintained by Mr. Fergusson in his *Nineveh and Persepolis restored* (p. 299-304), to which the reader is referred.—Smith, s. v.

Sacred Symbolic Tree of the Assyrians. From Lord Aberdeen's Black Stone.

2. אֶשֶׁל, *e'shel* (Sept. ἄρορα, Vulg. *nemus*). The first notice of this tree is in Gen. xxi, 33, "And Abraham planted a *grove (eshel)* in Beersheba, and called there on the name of the Lord." The second passage where it occurs is 1 Sam. xxii, 6: "Now Saul abode in Gibeah under a *tree (eshel)* in Ramah, having his spear in his hand, and all his servants were standing about him." Under such a tree also he and his sons were buried, for in the only other notice of this word it is said (1 Sam. xxxi, 13), "And they took their bones, and buried them under a *tree (eshel)* at Jabesh, and fasted seven days. In the parallel passage of 1 Chron. x, 12, the word *alah* is employed, which perhaps signifies a *terebinth tree*, but is translated "oak" in the A. V.

Celsius (*Hierobot.* i, 535) maintains that *eshel* has always a general, and not a specific signification, and that it is properly translated *tree*. This, as stated by Rosenmüller, has been satisfactorily refuted by Michaelis in his *Supplem.* p. 134. In Royle's *Illustrated HIMAL. Bot.* p. 214, it is stated, "The Arabic name *asul* or *atul* is applied to *furus* (an arboreous species of tamarisk) in India, as to *T. orientalis* in Arabia and Egypt." So in the *Ulfuz Udrieh*, translated by Mr. Gladwin, we have at No. 36 *ussel*, the tamarisk bush, with 'jkaou as

the Hindec, and *guz* as the Persian synonym. The tamarisk and its products were highly valued by the Arabs for their medicinal properties, and are described in several places under different names in Avicenna. If we refer to travellers in Eastern countries, we shall find that most of them mention the *atul*. Thus Prosper Alpinus (*De Plantis Egypti*, c. ix, *De Tamarisco atle vocata*) gives a figure which sufficiently shows that it must grow to the size of a large tree, and says that he had heard of its attaining, in another place, to the size of a large oak; that its wood was employed for making a variety of vessels, and its charcoal used throughout Egypt and Arabia; and that different parts of it were employed in medicines. So Forskal, who calls the species *Tamariscus orientalis*, gives *at* as its

*Tamarix Orientalis.*

Arabic name, and identifies it with *eshel*. So Belon (*Observ.* ii, 28). In Arabia Burckhardt found the tree called *atul* in the neighborhood of Medina, and observes that the Arabs cultivated it on account of the hardness of its wood. If we endeavor to trace a species of tamarisk in Syria, we shall find some difficulty from the want of precision in the information supplied by travellers on subjects of Natural History. But a French naturalist, M. Bové, who travelled from Cairo to Mount Sinai, and from thence into Syria, has given ample proofs of the existence of species of tamarisk in these regions. A minute description of the tree under its Arabic name is given by L. E. Faber, in *Pub. and Reishü Opusc. med. ex mon. Ar.* p. 137. It is very remarkable that the only tree which is found growing among the ruins of Babylon is a tamarisk. "The one in question is in appearance like the weeping-willow, but the trunk is hollow through age, and partly shattered. The Arabs venerate it as sacred, in consequence of the calif Ali having reposed under its shade after the battle of Hilla" (Rosemüller, *Bibl. Geog.* ii, p. 26, from Ker Porter; comp. Ainsworth's *Researches*, p. 125). From the characteristics of the tamarisk-tree of the East, it certainly appears as likely as any to have been planted in Beersheba by Abraham, because it is one of the few trees which will flourish and grow to a great size even in the arid desert. Besides the advantage of affording shade in a hot country, it is also esteemed on account of the excellence of its wood, which is converted into charcoal. It is no less valuable on account of the galls with which its branches are often loaded, and which are nearly as astringent as oak-galls.—Kitto, s. v. See TAMARISK.

3. It is now generally recognised (see Gesén. *Thes.* 50 b; Stanley, *S. and P.* § 76; 3; p. 142 note, 220 note) that the word *Elon*, עֵלֹן, which is uniformly rendered by the A. V. "plain," signifies a *grove* or plantation.

Such were the *Elon* of Mamre (Gen. xiii, 18; xiv, 13; xviii, 1); of Moreh (Gen. xii, 6; Deut. xi, 30; of Zaananiah (Josh. xix, 33); of the pillar (Judg. ix, 6); of Meonenim (Judg. ix, 37); and of Tabor (1 Sam. x, 3). In all these cases the Sept. has *ἑῖν* or *βάλανος*; the Vulgate—which the A. V. probably followed—*Vallis* or *Convallis*; in the last three, however, *Quercus*. See *ELOX*.

In the religions of the ancient heathen world groves play a prominent part. In old times altars only were erected to the gods. It was thought wrong to shut up the gods within walls, and hence, as Pliny expressly tells us (*H. N.* xii, 2), trees were the first temples (Tacit. *Germ.* 9; Lucian, *de Sacrific.* 10; see Carpzov, *App. Crit.* p. 332), and from the earliest times groves are mentioned in connection with religious worship (Gen. xii, 6, 7; xiii, 18; Deut. xi, 30; A. V. "plain;" see above). Their high antiquity, refreshing shade, solemn silence, and awe-inspiring solitude, as well as the striking illustration they afford of natural life, marked them out as the fit localities, or even the actual objects of worship ("Lucos et in iis silentia ipsa adoramus," Pliny, xii, 1; "Secretum luci . . . et admiratio umbræ fidem tibi numinis facit," Senec. *Ep.* xli; "Quo posses vobis dicere Numen habet," Ovid, *Fast.* iii, 295; "Sacra nemus accubet umbrâ," Virgil, *Georg.* iii, 334; comp. Ovid, *Met.* viii, 743; see Ezek. vi, 13; Isa. lvii, 5; Hos. iv, 13). This last passage hints at another and darker reason why groves were opportune for the degraded services of idolatry; their shadow hid the atrocities and obscenities of heathen worship. The groves were generally found connected with temples, and often had the right of affording an asylum (Tacit. *Germ.* 9, 40; Herod. ii, 138; Virgil, *Æn.* i, 441; ii, 512; Sil. Ital. i, 81). Some have supposed that even the Jewish Temple had a *τίμωρον* planted with palm, and cedar (Psa. xcii, 12, 13), and olive (Psa. lii, 8), as the mosque which stands on its site now has. This is more than doubtful; but we know that a celebrated oak stood by the sanctuary at Shechem (Josh. xxiv, 26; Judg. ix, 6; Stanley, *Sinai and Pal.* p. 142). We find repeated mention of groves consecrated with deep superstition to particular gods (Livy, vii, 25; xxiv, 3; xxxv, 51; Tacit. *Ann.* ii, 12, 51, etc.; iv, 73, etc.). For this reason they were stringently forbidden to the Jews (Exod. xxxiv, 13; Jer. xvii, 2; Ezek. xx, 28), and Maimonides even says that it is forbidden to sit under the shade of any green tree where an idol-statue was (Fabric. *Bibl. Antiq.* p. 290). Yet we find abundant indications that the Hebrews felt the influence of groves on the mind ("the spirit in the woods," Wordsworth), and therefore selected them for solemn purposes, such as great national meetings (Judg. ix, 6, 37) and the burial of the dead (Gen. xxxv, 8; 1 Sam. xxxi, 14). Those connected with patriarchal history were peculiarly liable to superstitious reverence (Amos v, 5; viii, 13); and we find that the groves of Mamre were long a place of worship (Sozomen, *H. E.* ii, 4; Euseb. *Vit. Const.* p. 81; Reland, *Palæst.* p. 714). There are in Scripture many memorable trees; e. g. Allonbachuth (Gen. xxxv, 8), the tamarisk (see above) in Gibeah (1 Sam. xxii, 6), the terebinth in Shechem (Josh. xxiv, 26, under which the law was set up), the palm-tree of Deborah (Judg. iv, 5), the terebinth of enchantments (Judg. ix, 37), the terebinth of wanderers (Judg. iv, 11), and others (1 Sam. xiv, 2; x, 3; sometimes "plain" in A. V., Vulg. "convallis").

This observation of particular trees was among the heathen extended to a regular worship of them. "Tree-worship may be traced from the interior of Africa not only into Egypt and Arabia, but also onward uninterruptedly into Palestine and Syria, Assyria, Persia, India, Thibet, Siam, the Philippine Islands, China, Japan, and Siberia; also westward into Asia Minor, Greece, Italy, and other countries; and in most of the countries here named it obtains in the present day, combined as it has been in other parts with various forms

of idolatry" (Poole, *Gen. of Earth and Man*, p. 139). "The worship of trees even goes back among the Trau-nians to the rules of Hom, called in the Zend-Avesta the promulgator of the old law. We know from Herodotus the delight which Xerxes took in the great plane-tree in Lydia, in which he bestowed golden ornaments, and appointed for it a sentinel in the person of one of the 'immortal Ten Thousand.' The early veneration of trees was associated, by the moist and refreshing canopy of foliage, with that of sacred fountains. In similar connection with the early worship of nature were among the Hellenic nations the fame of the great palm-tree of Delos, and of an aged platanus in Arcadia. The Buddhists of Ceylon venerate the colossal Indian fig-tree of Anurah-depara. . . . As single trees thus became objects of veneration from the beauty of their form, so did also groups of trees, under the name of 'groves of gods.' Pausanias (i, 21, § 9) is full of the praise of a grove belonging to the temple of Apollo at Grynion in Æolis; and the grove of Colone is celebrated in the renowned chorus of Sophocles" (Humboldt, *Cosmos*, ii, 96, Eng. ed.). The custom of adorning trees "with jewels and mantles" was very ancient and universal (Herod. vii, 31; Ælian, *V. H.* ii, 14; Theocr. *id.* xviii; Ovid, *Met.* viii, 723, 745; Arnob. *adv. Gentes*, i, 39), and even still exists in the East.

The *arucular* trees of antiquity are well known (Homer, *Il.* xvi, 233; *Od.* v, 237; Soph. *Trach.* 754; Virgil, *Georg.* i, 16; Sil. Ital. iii, 11). Each god had some sacred tree (Virgil, *Ecl.* vii, 61 sq.). The Etrurians are said to have worshipped a palm, and the Celts an oak (Max. Tyr. *Dissert.* 38, in Godwyn's *Mos. and Aar.* ii, 4). On the Druidic veneration of oak-groves, see Pliny, *H. N.* xvi, 44; Tacit. *Ann.* xiv, 30. In the same way, according to the missionary Oldendorp, the negroes "have sacred groves, the abodes of a deity, which no negro ventures to enter except the priests" (Prichard, *Nat. Hist. of Man*, p. 525-539, 3d ed.; Park's *Travels*, p. 65). So, too, the ancient Egyptians (Rawlinson's *Herod.* ii, 298). Long after the introduction of Christianity it was found necessary to forbid all abuse of trees and groves to the purposes of superstition (Harduin, *Act. Concil.* i, 988; see Orelli, *ad Tac. Germ.* 9).—Smith, s. v. See Pehnen, *De arbore non plantanda ad altare Dei* (Lips. 1725); Dresler, *De lucis religioni gentili destinatis* (Lips. 1740); Lakemacher, *Antiq. Græc. sacræ*, p. 138 sq. See TREE.

**Grove, Henry**, a Presbyterian divine of distinction, was born at Taunton, Somersetshire, Jan. 4, 1683. He received his academical training under Mr. Warren at Taunton, whose school was in excellent repute. At 22 he began to preach; at 23 he succeeded Mr. Warren as head of the Taunton Academy. At first he taught ethics, but in 1725 he began to teach theology also. He at the same time succeeded Mr. James in his pastoral charge at Fullwood, near Taunton, in which he continued till his death. In 1730 he published *The Evidence of our Saviour's Redemption considered*, and the same year, *Some Thoughts concerning the Proof of a Future State, from Reason*. In 1732 he printed *A Discourse concerning the Nature and Design of the Lord's Supper*, where he set that institution in the same light as bishop Hoadly. In 1734 he published, without his name, *Wisdom the First Spring of Action in the Deity*, which was animadverted on by Balguy. In 1736 he published *A Discourse on Saving Faith*. He died February 27, 1737-8. After his death came out by subscription his *Posthumous Works* (1740, 4 vols. 8vo); also *Sermons* (Lond. 1742, 2 vols. 8vo); *Works published in his lifetime* (Lond. 1747, 4 vols. 8vo); *System of Moral Philos.* (Lond. 1749, 2d ed. 2 vols. 8vo). See Amory, *Life of Grove, prefixed to his Posthumous Works* (1745, vol. i); Jones, *Christian Biog.*; Darling, *Cyclop. Bibliog.*, i, 134.

**Gruber, Jacob**, a Methodist Episcopal minister, was born in Lancaster County, Pa., Feb. 3, 1778, of German Lutheran parents. He was converted at four-

teen or fifteen; entered the travelling ministry, in the Philadelphia Conference, in 1800; labored fifty years, chiefly in Pennsylvania and Maryland, with abundant usefulness, and died May 25, 1850. Mr. Gruber was "a singular and extraordinary man." He was alike remarkable for "strength and originality of mind, energy of character, depth of piety, prodigious labors, power of endurance, extensive usefulness, and simplicity and regularity of life." His conversion was powerful, and, although driven from his home in youth for his religious course, he kept his faith. Through his long life his vigor and industry were untiring, and he never ceased labor for any four consecutive weeks until the year of his death. Although eccentric, and often rude in style, he was nevertheless a sound theologian and an able defender of Methodism. In the pulpit he was sometimes grand and overwhelming. "He spent thirty-two years on circuits, seven in stations, and eleven as presiding elder. Many anecdotes are on record of his eccentric wit and sarcasm, and of his great control over men."—*Minutes of Conferences*, iv, 549; Wakeley, *Heroes of Methodism*, p. 407; Strickland, *Life of Gruber* (N. Y. 1860, 12mo).

**Gruner, Johann Friedrich**, a German theologian and philologist, was born at Coburg in 1723. He studied at the university of that city, and afterwards at Jena. In 1747 he became professor of Latin and of Roman archaeology in Jena, afterwards professor of eloquence at Coburg, and in 1764 professor of theology at Halle. He died March 29, 1778. His principal works, so far as they relate to theology, are, *Miscellanea sacra* (Jena, 1750);—*De Odii Romanorum adversus Christianos Causis* (Coburg, 1750);—*De Origine Episcoporum eorumque in Ecclesia præcipua Jure* (Halle, 1764);—*Anweisung z. geistlichen Beredsamkeit* (Halle, 1765);—*Versuch eines pragmatischen Auszugs aus d. Kirchengesch. d. Christen* (Halle, 1766);—*Praktische Einleitung in d. Religion d. Heiligen Schrift* (Halle, 1773);—*Institutionum Theologicæ dogmaticæ Libri tres* (Halle, 1777);—*Observationum criticarum Libri ii* (Jena, 1777). See Harlesius, *Vite Philologorum* (i, 234-243).—Hoefler, *Novv. Biog. Générale*, xxii, 253; Doering, *Gel. Theol. Deutschlands*.

**Grynæus, Johann**, a Swiss Protestant theologian, was born at Leufelingen (Basle) in 1705. He acquired great proficiency in theology and the Oriental languages, and was for seven years professor in the theological faculty of Basle. He died in that city April 11, 1744. He wrote *Opusculi Theol. miscell.* (Basle, 1746, 8vo), a learned and valuable work.—Hoefler, *Novv. Biog. Générale*, xxii, 275.

**Grynæus, Johann Jacob, D.D.**, a Swiss Protestant theologian, third son of Thomas Grynæus (q. v.), was born at Berne Oct. 1, 1540. He studied at Basle, was ordained deacon in 1559, and in 1565 succeeded his father as pastor. In 1577 he became professor of theology at Basle, and remained there until 1584, when he removed to Heidelberg. In 1586 he returned to Basle, where he died head pastor (*amitistes*) of the city, Aug. 30, 1617 (Aug. 31, 1618, according to Michaud). He published *Variorum Patrum Græcorum et Latino-rum Monumenta orthodoxygrapha* (Basle, 1569, 2 vols. fol.);—*Ecclesiastica Historia Eusebii Pamphili, Rufini, Socratis, Theodoret, Sozomeni, Theodori, Evagrii, et Dorothei*, etc. (Basle, 1571, 1588, 1611, fol.);—*Epitome Sacrorum Bibliorum, pars I* (Basle, 1577, 8vo);—*Character Christianorum, seu de fidei, spei et charitatis doctrina*, etc. (Basle, 1578, 8vo);—*Synopsis Historiæ Homi-nis, seu de prima hominis origine, ejusque corruptione, reconciliatione*, etc. (Basle, 1576, 8vo);—*Chronologia brevis Historiæ Evangelicæ* (Basle, 1580);—*Sciographia Sacre Theologiæ* (Basle, 1577, 4to);—*Censura theologica de prima Antichristianorum errorum origine* (Heideld. 1484);—*Theorematia et Problematia theologica* (Basle, 1590, 3 vols.);—*De viris illustribus quorum opere Deus in reformandis ecclesiis usus est* (1602); and a large

number of essays and discourses. See Jo. Fabricius, *Historia Bibliothec.* pt. vi, p. 418-421; Dan. Gerdes, *Florileg. Lib. rar.* p. 153; Adami, *Vita Theologorum Germanorum*; Nicéron, *Mémoires*, xxxvii, 307-315; Uhse, *Leben d. berühmtesten Kirchen-Schribenten*, p. 196; Hoefler, *Nouv. Biog. Générale*, xxii, 274; Herzog, *Real-Encyclop.* v, 404; Darling, *Cyclop. Bibliographica*, i, 1347; Middleton, *Evangelical Biography*.

**Grynæus** or **Grnæus**, **Simon**, surnamed **Major**, a German Protestant theologian, was born at Vehringeren (Hohenzollern) in 1493. He studied at Pfortzheim and Vienna, and early embraced the Reformation. He taught Greek at Heidelberg from 1524 to 1529. In 1534 he went to Tübingen, commissioned by duke Ulrich of Württemberg to reform the churches of that place. In 1536 he settled at Basle, where he died of the plague Aug. 1, 1541. Intimately connected with Melancthon, Luther, Calvin, Thomas More, and others, Grynæus was a zealous promoter of the Reformation, and, as such, was exposed to great dangers, but always managed to get out of them unharmed, thanks to his powerful protectors. He was present at the diets of Spire and of Worms, and went to England in 1531 to confer with Henry VIII about his divorce. He was employed to collect the opinions of the Reformed theologians on that subject. A great admirer of the classics, he did much to promote the interests of sound education in the German universities. He discovered in a convent on the Rhine the last five books of Livy (published by Erasmus, Basle, 1531, fol.). Grynæus published Latin translations of the works of Plutarch, Aristotle, and Chrysostom, the first Greek edition of the *Veterinaria medici* (Basle, 1537, 4to) and of the *Almagest* of Ptolemy (Basle, 1538, fol.). He was also the author of *Novus Orbis regionum ac insularum veteribus incognitarum*, etc. (Basle, 1532-1555, fol.). See Brucker, *Historia critica Philosoph.* vol. iv, period iii, p. 105 sq.; Freytag, *Adparatus Litterarius*, iii, 497; Melch. Adam, *Vita Theolog.* p. 56; *Athenæ Raurice*, ii, 69-72; Reimann, *Hist. Litterar.* iv, 207; Hoefler, *Nouv. Biog. Générale*, xxii, 272; Burnet, *History of Reformation*, pt. i, bk. ii; Herzog, *Real-Encyclop.* v, 402; Middleton, *Evangelical Biography*, i, 149.

**Grynæus**, **Simon**, a Swiss Protestant theologian and philologist (last of the eminent family of Grynæus) was born at Basle in 1725, and died in that city in 1799. He was a thorough theological and classical scholar, and well acquainted with French, English, and Latin literature. He published a translation of the Bible (Basle, 1776), and also versions of *Juvenal*, *Thomas à Kempis*, and Erasmus's *Enchiridion Moricæ*. He also translated into German several English works against Deism. See M. Lutz, *Nekrol. denkw. Schweiz. a. d. xviii<sup>ten</sup> Jahrh.*; Hoefler, *Nouv. Biograph. Générale*, xxii, 275.

**Grynæus**, **Thomas**, nephew of Simon Grynæus major, and an eminent Protestant divine, was born at Vehringeren in 1512. He was brought up by his uncle Simon, and became professor of the dead languages at Basle and Berne. He was a zealous promoter of the Reformation. The margrave Charles of Baden appointed him pastor and ecclesiastical superintendent at Röteln, where he remained until his death, Aug. 2, 1564. See Melch. Adam, *Vita Theolog.* p. 191; Hoefler, *Nouv. Biog. Générale*, xxii, 273; Middleton, *Evangelical Biography*.

**Gualbert**, GIOVANNI (*St. Johannes*), founder of the Cœnobia order of Vallombrosa (*vallis umbrosa*), in the Apennines, seven leagues from Florence. He died July 12, 1073, and was canonized by pope Celestine III in 1193. His life is in the *Acta Sanctorum*.—Mosheim, *Ch. Hist.* cent. xi, pt. ii, ch. ii, § 24; Jamieson, *Legends of the Monastic Orders*, p. 116 sq.; Hoefler, *Nouv. Biog. Générale*, xxvi, 441; Herzog, *Real-Encyclop.* v, 406.

**Gualfrid**. See GEOFFREY.

**Gualter**, RODOLPHUS, son-in-law of Zwingle, and one of the first Swiss Reformers, was born at Zurich Nov. 9, 1519, succeeded Bullinger as pastor, became superintendent at Zurich in 1575, and died Nov. 25, 1586. His commentaries are highly esteemed and rare, viz. *Honilia cœci in Mattheum* (Zurich, 1590-96, 2 vols. fol.);—*Homil. clxxv in Acta* (Zurich, 1577, fol.). He wrote also a strong anti-papal treatise, *Antichristus* (Zurich, 1546, 8vo). A complete edition of his works appeared at Zurich in 1585 (15 vols, 8vo).—Hoefler, *Nouv. Biog. Générale*, xxii, 810; Winer, *Theol. Literatur.* ii, 555; Darling, *Cyclop. Bibliographica*, i, 1350.

**Guard**. The Scripture terms used in this connection mostly have reference to the special duties which the body-guard of a monarch had to perform. See KING.

1. *Tabbach'*, תבבצ, originally signified a "cook;" and as butchering fell to the lot of the cook in Eastern countries, it gained the secondary sense of "executioner," and is applied to the body-guard of the kings of Egypt (Gen. xxxvii, 36) and Babylon (2 Kings xxx, 8; Jer. xxxix, 9; xl, 1; Dan. ii, 14). So Potiphar, the master of Joseph, was captain of Pharaoh's *body-guard*, i. e. chief executioner (Gen. xxxix, 1; lxi, 10, 12). In Egypt he had a public prison in his house (Gen. lx, 3-4). It is evident from Herodotus (ii, 165 sq.) that the kings of Egypt had a *guard* who, in addition to the regular income of the soldier, also received a separate salary. In the paintings of marches and battles on the monuments, these royal guards are commonly seen to be employed in protecting the person of the king, and are distinguished by peculiar dresses and weapons (Wilkinson, i, 337, 406). During the reign of the Ptolemies, who in general adhered to the usages of the ancient Egyptians, the office of the commander of the body-guard was a very important one. They possessed the confidence of the king, and were often employed in the most important business transactions. Finally, the superintendence of the executions belonged to the most distinguished caste. In Babylon, Nebuzaradan, who held this office, commanded also a part of the royal army (Jer. xxxix, 13; lii, 15). See EXECUTIONER.

Ancient Egyptian Sentry.

2. *Rîts*, ריץ, properly means a *courier*, and is the ordinary term employed for the attendants of the Jewish kings, whose office it was to run before the chariot (2 Sam. xv, 1; 1 Kings i, 5), like the *cursores* of the Roman emperors (Seneca, *Epist.* 87, 126). That the Jewish "runners" superadded the ordinary duties of a military guard appears from several passages (1 Sam. xxii, 17; 2 Kings x, 25; xi, 6; 2 Chron. xii, 10). It was their office also to carry dispatches (2 Chron. xxx, 6). They had a guard-room set apart for their use in the king's palace, in which their arms were kept ready for use (1 Kings xiv, 28; 2 Chron. xii, 11). See FOOTMAN. They were perhaps the same who, under David, were called *Peletites* (1 Kings i, 5; xiv, 27; 2 Sam. xiv, 1). See PELETHITE.

3. The terms *mishme' reth*, מִשְׁמֵרֵת, and *mishmar'*, מִשְׁמָר, express properly the *act of watching*, or else a *watch-station*, but are occasionally transferred to the persons who kept watch (Neh. iv, 9, 22; vii, 3; xii, 9; Job vii, 12). The A. V. is probably correct in substituting *mishmarto*' (מִשְׁמָרְתוֹ) for the present reading in 2 Sam. xxiii, 23, Benaiah being appointed "captain of the guard," as Josephus (*Ant.* vii, 14, 4) relates, and not privy councillor: the same error has crept into the text in 1 Sam. xxii, 14, where the words

"which goeth at thy bidding" may originally have been "captain of the body-guard." See CAPTAIN.

In New-Test. times we find the *σπουδαίωτος*, for the Latin *spiculator* (rendered "executioner," margin *guard*, Mark vi, 27), properly a *pike-man*, *halberdier*, a kind of soldiers forming the body-guard of kings and princes, who also, according to Oriental custom, acted as executioners. The term *κουστωδία*, for the Latin *custodia*, i. e. *custody*, a "watch" or *guard*, is spoken of the Roman soldiers at the sepulchre of Jesus (Matt. xxvii, 65, 66; xxviii, 11). The ordinary Roman guard consisted of four soldiers (*τετραδίον*, "quaternion"), of which there were four, corresponding to the four watches of the night, who relieved each other every three hours (Acts xii, 4; comp. John xix, 23; Polyb. vi, 33, 7). When in charge of a prisoner, two watched outside of the cell while the other two were inside (Acts xii, 6). The officer mentioned in Acts xxviii, 16 (*στρατοπεδάρχης*, "captain of the guard") was perhaps the commander of the Prætorian troops, to whose care prisoners from the provinces were usually consigned (Pliny, *Ep.* x, 65). See WATCH.

**Guardian Angel**, a term which represents a theory prevalent from antiquity, that human beings are accompanied through life by a special supernatural being (sometimes termed their "attendant genius"), who watches over them for guidance and protection. Such has been thought to be the meaning of Socrates when he claimed a particular *δαίμων* as his spiritual counsellor. See DEMON. Among Christian writers the theory has been thought to derive confirmation from the statement of our Saviour respecting children, that "in heaven their angels do always behold the face of my Father which is in heaven" (Matt. xviii, 10); and from the declaration that angels "are all ministering spirits sent forth to minister for them who shall be heirs of salvation" (Heb. i, 14). A more cautious criticism, however, has usually held that these passages only indicate a special care of divine Providence over the young and believers; and the peculiar form of the doctrine referred to appears to savor rather of a pagan than an evangelical origin. Monographs are named in Walch, *Bibliotheca Theologica*, i, 178, and Volbeding, *Index Programmatum*, p. 116. See ANGEL.

**Guardian of the Spiritualities**, in England, the person in whom is vested the ecclesiastical jurisdiction of a diocese upon the death or translation of the bishop, or in cases of infirmity of the incumbent or bishop.—Eden, *Churchman's Dictionary*.

**Guarin**, PIERRE, a French Hebraist, was born at Tronquay (Normandy) in 1678. He entered the order of the Benedictines of St. Maur Oct. 21, 1696, became subsequently professor of Greek and Hebrew, and died librarian of the abbey of St. Germain des Prés, Dec. 29, 1729. He had a lively literary controversy with canon Masclef, and wrote *Grammatica Hebraica et Chaldaica*, etc. (Paris, 1724-8, 2 vols. 4to);—*Lexicon Hebraicum et Chaldeobiblicum* (Par. 1746, 2 vols. 4to). Guarin only completed this dictionary to *Memo* inclusively; the following letters were the work of other Benedictines. See Le Cerf, *Bibl. Hist. et crit. des Auteurs de la Cong. de St. Maur*; Hoefler, *Nouv. Biog. Gén.* xxii, 318.

**Guastallines**, a monastic order in the Roman Catholic Church, founded in 1534 by countess Torelli, of Guastalla. They were at first connected with the Barnabites, whom they assisted in their missions; but, as this led to disorders, they were ordered to take the vow of seclusion. They were also called the *Angelic order* (*Angelici*), which name was to remind them that they should be as pure in their lives as angels.

**Guatemala**. See CENTRAL AMERICA.

**Gude**, GOTTLÖB FRIEDRICH, a German theologian, was born at Lauban Aug. 26, 1701. He studied theology in the universities of Halle and Leipzig, and taught for some time in the latter. Having returned

to his native city in 1727, he was made chief deacon in 1743, and archdeacon in 1753. He died at Lauban June 20, 1756. Among his numerous publications are *De Causis Dissensuum inter Scripturam Interpretes* (Lpz. 1724);—*Der Christen Reise nach dem rechten Vaterland* (Hal. 1726, fol.);—*De Jurisconsultorum Meritis in Scripturam* (Lauban. 1728);—*De mystica Miraculorum et factorum Christi Interpretatione* (Lpz. 1729);—*Gründliche Erläuterung des Briefes Pauli an die Epheser* (Lauban, 1735).—Hoefler, *Nouv. Biog. Gén.* xxii, 340.

**Gudg'adah** [some *Gud'adah*] (Heb. with the art. and ה directive, *hag-Gudgād'ah*, *הַגְּדָדָה*, *rent*, or perh. *thunder*; Sept. Γαγγὰδ; Vulg. *Gadgad*), the fortieth station of the Israelites during their wanderings in the desert, between Mount Hor and Jotbath (Deut. x, 7); doubtless the same with HOR-HAGIDGAD, through which they had previously passed between Benc-jaakan and Jotbath (Numb. xxxiii, 32). The name appears to be preserved in the present wady *Ghudhaghah* ("diminutions"), mentioned by Robinson (*Res.* i, 267) as "a broad sandy valley which drains the remainder of the region between the Jerafeh and el-Mukrah, and carries its waters eastward to the former." See EXODE. In this identification two late travellers agree (Schwartz, p. 213; Bonar, p. 286, 295). See HOR-HAGIDGAD. Dr. Robinson suggests that Gudgadah and Jotbathah may be in the Arabah, near the junction of wady Ghurundel with wady el-Jeib (Res. ii, 583). See JOTBATH.

**Gudule**, **Goule**, or **Ergoule**, ST., a Belgian virgin, patroness of Brussels, is said, according to tradition, to have been born in Brabant about 650. She was the daughter of St. Amalberge, and was educated by her godmother, St. Gertrude, abbess of the convent of Nivelles. In 664, Gertrude having died, Gudule went to reside with count Witger, the second husband of her mother. While there she led a life of extravagant asceticism, and, according to the Romish legend, accumulated such a stock of good works that God gave her the power to work miracles both during her life and after her death! She died Jan. 8, 712, and was buried in the church of St. Michael, Brussels, which was subsequently called after her, and is now the cathedral of St. Gudule. She is commemorated on the 8th of January, and is the object of special veneration throughout Belgium. See Ruth d'Ans, *Vie de St. Gudule* (Brussels, 1703, 12mo); Baillet, *Vies des Saints* (vol. i, Jan. 8); Hoefler, *Nouv. Biog. Générale*, xxii, 352; Butler, *Lives of the Saints*, Jan. 8.

**Guebres**. See PARSEES.

**Guédier de Saint-Aubin**, HENRI MICHEL, a French theologian, was born at Gournay-en-Bray June 17, 1695. He studied at Paris, and received the doctor's degree from the Sorbonne Oct. 29, 1723. He became professor in that institution in 1730, and its librarian in 1736. Some time after he obtained the abbey of St. Vulmer. He was acquainted with Hebrew, Greek, Latin, French, English, and Italian, besides history, theology, and kindred sciences. For fourteen years he decided all cases of conscience presented to the Sorbonne. He died at Paris Sept. 27, 1742. He wrote, *Histoire sainte des deux Alliances* (Paris, Didot, 1741, 7 vols. 12mo), which Moréri considers as a good concordance of the O. and N. T. At the end of every part are remarks and arguments on the designs of the sacred writers, and on the authenticity and inspiration of their writings.—Ladvozat, *Dict. historique*; Moréri, *Dict. hist.* (edit. 1759); Hoefler, *Nouv. Biog. Gén.* xxii, 358.

**Guelpherbytanus**, **Codex**. See WOLFENBÜTTEL MANUSCRIPT.

**Guelphs and Ghibellines**, the names given to two great mediæval parties which acquired a pre-eminent celebrity especially in Germany and Italy, inasmuch as their contests made up a great portion of the history of those countries from the 11th to the 14th centuries, and which claim notice here because of the close

connection of their party strifes with the ecclesiastical history of that period, and the use which the papacy made of them to increase its power and authority. According to the most reliable authorities, the word Guelph, or Gueif, is derived from "Welf," a baptismal name in several Italo-German families, which may be traced even up to the 9th century in a line of princes who migrated from Italy to Germany in the 11th century, when it appears there as the name of several chiefs of the ducal house of Saxony. Ghibelline is referred to "Waiblingen" (anciently *Wibelingen*), a town of Würtemberg, and the patrimonial seat of the Hohenstauffen family. The party conflicts originating in the rivalry of the ducal houses above mentioned, and probably also the party names, are of earlier date, but the first recorded use of these terms to designate the opposing parties occurred A.D. 1140, in the great battle of Weinsberg, in Suabia, fought between the partisans of Conrad of Hohenstauffen and those of Henry the Lion, of the house of Welf, rival claimants of the imperial throne. In this battle the followers of Conrad rallied to the cry of "He Waiblingen!" and those of Henry to the cry of "He Welf!" These party cries, transferred to Italy, subsequently the chief theatre of these party contests, became Ghibellini and Guelphi or Guelfi, in the Italian language, the former designating the supporters, and the latter the opponents of the imperial authority, which generally vested in the Hohenstauffen house. The opposition to this authority arose from two sources, viz. (1) from the cities and smaller principalities seeking to maintain their local rights and liberties, and (2) from the popes, who, jealous of the power of the German emperors, and irritated by their exercise of authority in ecclesiastical matters, especially in regard to investitures (q. v.), favored the party of the Guelphs, and, indeed, became the representative leaders thereof. Hence the term Guelph came to signify in general those who favored the Church's independence of the State, and the maintenance of municipal liberty as against the partisans of a supreme and centralized civil authority represented in the emperor. This statement, however, seems not to hold good always, since in the multiplied and complicated conflicts of these parties an interchange of the distinctive principles and objects of each appears to have taken place in certain instances, and the interests of the hierarchy by no means always coincided with the aspirations for municipal and personal freedom, however freely it evoked them to advance its own ends. The contest of the papacy for supremacy over the civil power, organized and definitely directed to its object by Gregory VII (q. v.), culminated in the pontificate of Innocent III (q. v.), when, "under that young and ambitious priest, the successors of St. Peter attained the full meridian of their greatness" (Gibbon, vi, 36, Harper's ed.), and "the imperial authority at Rome breathed its last sigh" (Muratori, *Annal. Ital.* anno 1198).

In the contests of the Ghibelline and Guelph parties historians note "five great crises," viz. (1) in 1055, under Henry IV; (2) in 1127, under Henry the Proud; (3) in 1140, under Henry the Lion; (4) in 1159, under Frederick Barbarossa; and (5) the pontificate of Innocent III. After the decline of the imperial authority in Italy, in the conflicts between opposing parties among the nobility and in the cities, Ghibelline was used to designate the aristocratic party, and Guelph those professedly favoring popular government. But the party name, as thus defined, did not always represent the real principles and objects of the party. In the course of time the contest "degenerated into a mere struggle of rival factions, availing themselves of the prestige of ancient names and traditional or hereditary prejudices" (Chambers), so that in 1273 pope Gregory X used the following language: "Guelphus aut Ghibellinus, nomina ne illis quidem, qui illa proferunt, nota; inane nomen, quod significat, nemo intelligit" (Muratori,

*Scriptt. rerum Italicarum*, xi, 178); and in 1334 pope Benedict XII forbade the further use of the terms, and "we read little more of Guelphs and Ghibellines as actually existing parties." The conflict of principles in ecclesiastical as well as civil polity which these terms once served to represent may be traced through every subsequent age, and has not, even in this 19th century, ceased to exist.—Chambers, *Cyclopædia*, s. v.; *English Cyclop.* s. v.; *New American Cyclop.* viii, 547-8; Hoefler, *Nouv. Biog. Générale*, xxii, 360 sq.; Sismondi, *Hist. Des Français* (see Index); Ranke, *Hist. of Papacy* (see Index); Herzog, *Real-Encycl.* xvii, 659 sq. (J. W. M.)

**Guénéé**, ANTOINE, a French abbot, was born at Etampes Nov. 23, 1717. He studied at Paris, entered the Church, and attained high degrees in the university. For twenty years professor of rhetoric at the college of Plessis, he travelled through Italy, Germany, and England to acquire a knowledge of their languages, and on his return published several translations. He afterwards wrote the *Lettres de quelques Juifs* against Voltaire, for which he was made canon of the cathedral of Amiens, and afterwards attached to the chapel of Versailles by cardinal de la Roche-Aymon. During the Revolution he was imprisoned for ten months at Fontainebleau, and after his liberation lived in retirement with his brother. He died at Fontainebleau Nov. 27, 1803. Among his publications are: *Les Témoins de la Résurrection de Jesus Christ examinés suivant les règles du barreau* (from the Engl. of Sherlock, against Woolston, Paris, 1753, 12mo):—*La Religion chrétienne démontrée par la conversion et l'apostolat de Saint Paul* (from the Engl. of Lyttleton, with the addition of two discourses by Secd):—*Sur l'Excellence intrinsèque de l'Écriture* (Paris, 1754, 12mo):—*Observations sur l'histoire et sur les preuves de la Résurrection de Jesus Christ* (from the Engl. of West, against Woolston) (Paris, 1757, 12mo):—*Lettres de quelques Juifs portugais, allemands et polonois à M. de Voltaire* (Paris, 1769, 8vo); often reprinted, with additions, as 6th ed. Paris, 1805, 3 vols. 8vo and 12mo; 7th ed. Paris, 1815, 4 vols. 8vo; 8th ed. Paris, 1817, 8vo; Lyon and Paris, 1857, 3 vols. 12mo; transl. into English by Lefanu under the title *Lettres of certain Jews to Voltaire* (Dublin, 1777, 2 vols. 8vo):—*Recherches sur la Judée considérée principalement par rapport à la fertilité de son terroir, depuis la captivité de Babylone jusqu'à nos temps, in Mémoires de l'Académie des Inscriptions*, vol. 1 (1808), composed of papers read by him before this society, of which he had been elected member in 1778.—Dacier, *Notice sur l'abbé Guénéé* (at the head of the 7th ed. of *Lettres de quelques Juifs*, etc., Paris, 1815); Quéraud, *La France littéraire*; Hoefler, *Nouv. Biog. Gén.* xxii, 381; Darling, *Cyclop. Bibliographica*, i, 1351.

**Guertler**, NICOLAUS, D.D., a learned Protestant divine, was born at Basel in 1654. He studied at the university of that city, and in 1685 became professor of philosophy and rhetoric at Herborn. He afterwards became professor of theology at Hanau, and in 1696 at Bremen. From thence he removed to Deventer in 1699, and to Franeker in 1707. He died in 1711. His principal work is *Systema theologiæ propheticae, cum indicibus necessariis* (Utrecht, editio secunda emendata, 1724, 4to).—Darling, *Cyclop. Bibliog.* ii, 1256; Hoefler, *Nouv. Biog. Gén.* xxii, 855. (J. H. P.)

**Guest.** See HOSPITALITY.

**Guest-chamber** (κατάλυμα, a lodging-place, i. e. properly inn, as rendered in Luke ii, 7; hence any room of entertainment, and so used by the Sept. at 1 Sam. ix, 22; Neh. iii, 5; Ezek. xl, 44), the ἰπεριώρον, *canaculum*, or spare apartment in an Oriental dwelling (Mark xiv, 14; Luke xxii, 11). See HOUSE. At the public festivals these may naturally be supposed to have been placed at the service of strangers attending Jerusalem for that purpose. See PASSOVER.

**Gui.** See GUIDO.

**Guibert de Nogent**, a French scholastic theo-

gian and historian, of noble and wealthy parentage, was born in 1053 near Clermont, and died in 1124. He lost his father while quite young, but the diligent care and zeal of his pious mother gave to his early training a strongly religious tendency. He was educated at the abbey of St. Germer, which he entered at 12 years of age, and where he enjoyed the instructions of Anselm (q. v.), then prior in the neighboring abbey of Bec. At first he found his chief delight in poetry and the reading of classic poets; but a severe illness gave a more serious direction and higher development to his inner life, and he devoted himself to the study of the Scriptures and ecclesiastical writers. At the age of fifty he became abbot of Notre-Dame de Nogent, where he composed most of his works. Though not exempt from the credulity and monkish devotion to hierarchical ideas which belong to his age, Guibert was for his time a man of more than ordinary learning and independence of spirit, to which he gave expression in his severe condemnation of the prevailing superstitions and errors in regard to relics and false miracles. The best edition of his writings is that published by D'Achéry under the title *Venerabilis Guiberti Abbatis B. Marie de Norwigeno Opera Omnia producta*, etc. (Paris, 1651, fol.). In this edition are found (p. 1-525) the following works of Guibert (the list and sketch of which, given here, are based on Herzog, viz.: 1. *Libro quo ordine sermo fieri debeat*; written while he was a monk at St. Germer, and especially interesting as being one of the few works on Homiletics coming to us from the Middle Ages;—2. *Moralium Genesios Libri x*; a figurative exposition of Genesis after the style of Gregory the Great's *Moralia in Jobum*;—3. *Tropologiarum in Prophetas Osea et Amos et Lamentationes Jeremie libri v*; with a preface and epilogue addressed to Norbert, founder of the Premonstrants (q. v.);—4. *Tractatus de incarnatione contra Judæos*; an apologetic treatise in vindication of the divinity and virgin-birth of Christ;—5. *Epistola de buccella Jude datu et de veritate dominici corporis*; in answer to the question whether Judas received the Eucharist or not, with a defence of Lanfranc's doctrine of the Eucharist against that of Berengarius (q. v.);—6. *De laude S. Marie liber*; wherein, though a zealous worshipper of the Virgin Mary, he makes no mention of her immaculate conception;—7. *Opusculum de Virginitate*;—8. *De pignorum Sanctorum libri iv*; a work on the worship of saints and relics, in which many abuses and errors connected therewith are boldly criticised and condemned, and the monks of St. Médard at Soissons are severely censured for pretending to possess a genuine tooth of Christ. Guibert will not allow that the miraculous virtues claimed for relics are a proof of genuineness or sanctity;—9. *Historia que dicitur gesta Dei per Francos sive Historia Hierosolymitana*; a valuable account of the first Crusade, founded on an earlier narrative by a crusader, perhaps a Norman knight, entitled *Gesta Francorum et aliorum Hierosolymitanorum*, which is complemented by materials obtained of other eye-witnesses;—10. *De vita sua sive Monodiarum libri iii*; an autobiography after the plan of St. Augustine's *Confessions*, and containing also much material valuable for the history of the Church and of the social life of the period. Besides the works above enumerated, Guibert wrote some commentaries on the minor prophets (the MSS. of which were formerly preserved in the libraries of Vauchair and Pontigny), as also another exegetical work, mentioned by himself (*De vita sua*, i, 16), but now lost, bearing the title *Capitularis libellus de diversis evangeliorum et prophetarum voluminum*. He was also probably the author of a sermon delivered at the feast of St. Magdalena, found in Mabillon's edition of the works of St. Bernard of Clairvaux, ii, 701. Another work, *Elucidarium sive dialogus summam totius Christiane religionis complectens*, has been erroneously ascribed to him.—Herzog, *Real-Encyklop.* xix, 584 sq.; Hoefer, *Nouv. Biog. Générale*, xxii, 515; Clarke, *Success. of Sac.*

*Lit.* ii, 647; Mosheim, *Ch. Hist.* c. xii, pt. ii, ch. ii, n. 71; *Hist. littér. de la France*, vii, 80, 92, 118, 124, 146; ix, 433. (J. W. M.)

**Guibert**, Anti-pope, was born at Parma in the 11th century. His family name was Correggia, and he was said to be descended from the counts of Augsburg. Made archbishop of Ravenna through the influence of the emperor Henry IV, he was elected pope by a council held at Brescia (hostile to Gregory VII) in 1080, and took the name of Clement III. His first act of authority was to excommunicate Gregory VII, who, in turn, put him under the ban, and never consented to grant him absolution. Guibert took Rome by force, but in 1089 was compelled to leave the city. He died at Ravenna in 1100. His election gave rise to the sect of the *Henricians*, who claimed that the emperor alone possessed the right of appointing popes. The sect was condemned by several councils, and finally disappeared towards the end of the 12th century.—See Artaud, *Hist. des souverains Pontifes*, vol. ii; *Art de Vérifier les Dates*; Hoefer, *Nouv. Biog. Génér.* xxii, 514; Herzog, *Real-Encyklop.* v, 408 sq.

**Guibert of Ravenna**. See **GUIBERT** (Anti-pope).

**Guide** (the rendering; more or less proper, of various Heb. words; Gr. *ὄδηγός*). Such was Hobab invited by Moses to become to the Israelites in the wilderness (Numb. x, 31, "that thou mayest be to us instead of eyes"). See **EXODE**.

**Guido de Arezzo**, or **Gui**, a Benedictine monk of the abbey of Pomposa, noted in the history of music. He was born at Arezzo about 990, and early distinguished himself by his talent for music, which he taught in his convent. Numerous inventions (e. g. counter-point) have been attributed to Guido without good ground; but he did render great service to music by his ingenious simplification of the existing methods of notation. He wrote *Micrologus de Disciplina Artis Musicae*, "or Brief Discourses on Music, in which most of his inventions are described, as well as his method of instruction." His doctrine of solmisation is, however, not found in that work, but set forth in a small tract under the title of *Argumentum novi Cantus inventendi*. He died about the middle of the 11th century, but the exact date of his death is unknown. See Burney, *History of Music*; Gerbert, *Scriptores Eccl. de Musica Sacra*; Hoefer, *Nouvelle Biog. Générale*, xxii, 551; Herzog, *Real-Encyklop.* v, 411.

**Guido de Bres**, an evangelist and martyr of the Walloon Church, was born at Mons in 1540. He was brought up in the Church of Rome, but by searching the Scriptures arrived at the knowledge of evangelical truth, and was compelled by persecution to escape to London, where he joined the Walloon Church organized under Edward VI, and prepared himself for the ministry. He afterwards returned to his native country as evangelist and travelling preacher, in which capacity he showed great zeal, first at Lille, where there was a large secret Protestant community, which was dispersed by force in 1566. Guido then retired to Ghent, where he published a polemic tract out of the fathers entitled *Le bâton de la foi*. He then went to prosecute his studies at Geneva, where he became a determined adherent of Calvin. Returning to his country, he resumed his evangelical labors, reorganized the three principal communities of Lille, Tournay, and Valenciennes, and made the whole of southern Belgium and northern France, from Dieppe to Sedan and from Valenciennes to Antwerp, the field of his indefatigable activity. Valenciennes, which had become almost entirely Protestant, was stormed by Noircarmes in 1567. Guido was caught while attempting to escape, and was thrown into prison. After seven weeks of imprisonment he was hanged, with the young La Grange, on the last day of May, 1567. Guido, though in the prime of life, leaving behind him a wife and several

young children, met death not only calmly, but cheerfully. While in prison he had written letters of consolation both to his mother, to whom he was much attached, and to his congregation; the latter epistle, containing a thorough refutation of the Roman Catholic doctrine of transubstantiation, is to be found in the *Histoire des Martyrs* (Geneva, 1617), together with a life of Guido and La Grange (p. 731-759).

Guido's prediction that the seeds of Protestantism he had so carefully sowed would grow with greater strength after being watered with his blood, has been fulfilled. To him the Dutch Church owes the fact that, instead of becoming a mere branch of the French (Calvinistic) or the German Reformed Church, it has remained between the two, a shield and a blessing for both. Guido drew up in 1559 a confession of faith, after the model of the French Confession drawn up in 1559 at Paris. This confession he submitted to Calvin, by whose advice he changed it in some particulars, and, after obtaining the assent of the principal Reformed churches in the Netherlands, he published it in 1562 as the *Confession of Faith of the Reformed Church in the Netherlands*, sending a copy of it, with an appropriate and remarkable introduction, to king Philip II. The theologians of Geneva believed that the Netherland churches might adopt the French Confession as it stood; but Guido probably foresaw that the adoption of a confession exclusively their own, in French and Low-Dutch, was the only means to form a united church in that country, inhabited by people of two nations and speaking two languages. See Le Long, *Kort historisch verhaal van den oorsprong der nederlandschen gereformeerden kerken onder Kruys*, etc. (Amsterd., 1741, 4to); G. Brandt, *Histoire der reformatie in en ontrent de Nederlanden* (Amsterd., 1671); Ypema Dermout, *Geschiedenis der Nederlandsche Hervormde Kerk* (Breda, 1818 sq.); and especially Van der Kemp, *de Eere der nederlandsche hervormde Kerk* (Rotterdam, 1830).—Herzog, *Real-Encyclop.* v, 412; Motley, *Rise of the Dutch Republic*, vol. i; *Christian Intelligencer*, March 14, 1861.

**Guignard, JEAN**, surnamed *Briquard*, a French Jesuit of the 16th century, and, during the League, rector and librarian of the college of Clermont at Paris. After the attempt of Jean Châtel against the life of king Henry IV, the Jesuits were charged with being implicated in the affair, as the would-be assassin was one of their pupils. Their houses were searched, and some violent writings of Guignard against the king were discovered. He defended himself by saying they had been written before the king's conversion to Roman Catholicism, and that since that time he had always taught obedience to the royal authority and remembered the king in his prayers. He was condemned of high treason, sentenced to be hung, and his body burnt. The execution took place on the same day, Jan. 7, 1595. He persisted to the last in asserting his innocence. The next day all the Jesuits were banished from Paris. Some Jesuit writers—father Jouvency, for instance—in writing the history of the order, have represented Guignard as a martyr. See Sully, *Economies royales*; L'Etoile, *Journal de Henri III*; De Thou, *Hist.* lib. cxi; Sismondi, *Hist. des Français* (see Index); Hoefler, *Nouv. Biog. Générale*, xxii, 566. (J. N. P.)

**Guignes, CHRÉTIEN LOUIS JOSEPH DE**, a French Orientalist, was born at Paris Aug. 25, 1759, and died in the same city March 9, 1845. He was instructed by his father, Joseph de Guignes, in the Oriental languages, making Chinese a special study. In 1784 he was appointed French resident in China and consul at Canton, and before his departure thither was also appointed correspondent to the Academy of Sciences and the Academy of Inscriptions and Belles-Lettres. After spending 17 years in China he returned to France, having mean while communicated to the academies sev-

eral interesting and useful papers, which were published in their *Mémoires*. In 1808 there issued from the imperial press his *Voyages à Peking, Manille, et l'Île de France, faits dans l'Intervalle des Armées 1784 à 1801* (3 vols. 4to, with fol. atlas of maps and plates). Among the grand literary projects of the reign of Louis XIV was the publication of a dictionary of the Chinese language, but the project has not been realized, and was apparently abandoned. The imperial government of Napoleon I determined to revive and complete the enterprise, and De Guignes, by a decree dated Oct. 22, 1808, was selected to compile such a work. In 1813 it appeared from the imperial press, bearing the title of *Dictionnaire Chinois-Français et Latin, publié d'après l'ordre de S. M. l'empereur et roi Napoléon le Grand*, etc. (Paris, fol.). This work proved to be, in the main, only an adaptation of the *Hán-tz-si-yih* (i. e. Occidental interpretation of Chinese characters), a Chinese-Latin vocabulary by a Franciscan missionary to China, Basil de Glemona, whose modest but valuable labors De Guignes had appropriated without acknowledgment. The plagiarism was discovered, and severely but justly censured by the critics of the time, and the effect was undoubtedly to diminish the appreciation of any additions or improvements made by De Guignes.—Hoefler, *Nouvelle Biog. Générale*, xxii, 569; *New American Cyclopaedia*, viii, 555. (J. W. M.)

**Guilbert.** See **GUIBERT** and **GILBERT**.

**Gulbertines.** See **GILBERTINES**.

**Guild, WILLIAM**, a divine of the Church of Scotland, was born at Aberdeen in 1586, and educated at Marischal College, then recently founded, with a view to holy orders. Before he entered the ministry, however, he published a treatise entitled *The New Sacrifice of Christian Incense; and The only Way to Salvation*. He was very soon after called to the pastoral charge of the parish of king Edward, in the presbytery of Turriff and synod of Aberdeen. In 1617, when James I visited Scotland with a view to establish episcopacy, and brought bishop Andrewes, of Ely, with him, to assist in the management of that affair, the latter paid great regard to Guild; and the following year, when Andrewes was promoted to the see of Winchester, Guild dedicated to him his *Moses Unveiled*, pointing out those figures in the Old Testament which allude to the Messiah (new ed. Edinb. 1839, royal 8vo). He wrote several works against Popery; an *Exposition of Solomon's Song* (Lond. 1658, 8vo);—an *Explanation of the Apocalypse* (Aberdeen, 1656);—*Exposition of Second Samuel* (Oxford, 1659, 4to). He was a man of great learning. In 1640 he was made principal of King's College, Aberdeen, but, taking part with the monarchy, was deposed by the Parliamentary commissioners in 1651, and died in 1657. See Shirreffs, *Life of Guild* (Aberdeen, 1799, 2d edit. 8vo); Allibone, *Dict. of Authors*, i, 748; Darling, *Cyclop. Bibliographica*, i, 1352.

**Guilds.** In the Middle Ages, religious clubs or mutual benefit societies, embracing men and women, were established in nearly every parish church. They kept yearly feasts, supported annals for the repose of deceased members, sometimes also hospitals for the relief of decayed members, and always collected alms for their sick and poor. On certain anniversaries they met at a common altar, wearing livery gowns and hoods, usually of two colors, and the badge of their patron saint. In the monasteries, kings, nobles, and benefactors were admitted as lay members, and in the parish societies as honorary members. "The members promised fidelity to the guild rules and obedience to the superiors." Of late, the Ritualists in the Anglican Church are endeavoring to revive the guilds, and quite a number had been re-established up to the year 1869. A list of them is given in the *Church Union Almanac for 1869* (Lond. 1869).—Walcott, *Sacred Archaeology*, s. v. (J. W. M.)

**Guillain.** See **GUILLAIN**.

**Guillelmus.** See WILLIAM.

**Guillemine or Guillemette**, a Bohemian enthusiast of the 13th century. She went from Bohemia to Milan, where she gave herself out as the daughter of the queen of Bohemia (Constantia), pretending to have been conceived in a miraculous manner, like Christ. She professed to have the mission of saving bad Christians, Jews, and Mohammedans. Her pretended visions and semblance of asceticism gained her many adherents. The *mysteries* of her system are said to have been grossly immoral. Guillemine died in 1280, according to Moréri (1300 according to Bossi), and was buried with great honors in the monastery of Chiaravalle, near Milan, founded by St. Bernard. The sect continued under the management of a priest, Andrew Saramita, and of a nun of the order of Humiliati, whom Guillemine had herself pointed out for her successor. Six years after, however, their secret practices were revealed, and the women were imprisoned and punished. Saramita and Provana were burnt after being condemned by the Inquisition, as was also the body of Guillemine, disinterred for the purpose. The house where the sect met was razed, and a hermitage erected in its place; it became afterwards part of a convent of Carmelites. Some writers have attempted to refute the accusation of immorality made against the sect. See Bossi, *Chron.*; Mabillon, *Museum Ital.* vol. i; Bayle, *Dict. Hist.*; Hoefler, *Nouvelle Biog. Générale*, xxii, 714 sq. (J. N. P.)

**Guillon**, MARIE NICHOLAS SILVESTRE, a French priest and distinguished humanist, was born at Paris Jan. 1, 1760. He studied at the colleges of Du Plessis and Louis-le-Grand, and acquired great proficiency not only in theology, but in medicine, natural sciences, and mathematics. Received as professor in the university in 1789, he entered the Church, and became soon distinguished as a preacher. He was afterwards almoner and librarian of the princess of Lamballe until her murder, Sept. 1792. He then fled to Seeaux, where, under the name of *Pastel*, he practiced medicine for some time to avoid persecution. He afterwards removed to Meaux, and in 1798 to Paris. Some time after he became connected with the abbot de Fontenay in the publication of the *Journal général de Littérature, des Sciences et des Arts*. After the restoration of Roman Catholic worship he became honorary canon and librarian of the cathedral of Paris, then professor of rhetoric and homiletics in the theological faculty, and almoner of the college of Louis-le-Grand. He was afterward successively appointed almoner of the duchess of Orleans in 1818, and inspector of the academy. His ready acquiescence in the Revolution of 1830 excited the displeasure of the clergy, and it was with great difficulty the king succeeded in obtaining his appointment as bishop of Beauvais. In this position he attended the last moments of the abbé Gregoire (q. v.), to whom he administered the sacraments. Severely censured for this, he referred the matter to the pope, resigning his bishopric in the mean time. Thanks to the interference of the court, the matter was settled, and Guillon was appointed bishop of Morocco in *partibus infidelium*, July 7, 1833. In 1837 he was appointed dean of the faculty of theology; but, when the French government and the clergy entered into closer union, Guillon was sacrificed by being sent to Dreux to keep the chapel which had successively received the remains of several children of the king. He died in Montfermeil Oct. 16, 1847. He was a most prolific writer. Among his theological works we notice the following: *Qu'est-ce donc que le pape? par un prêtre* (Paris, 1789, 8vo):—*Collection eccles., ou recueil complet des ouvrages faits depuis l'ouverture des états généraux relativement au clergé* (Paris, 1791–1792, 7 vols. 8vo, under the name of Barneul):—*Parallèle des Révolutions sous le rapport des hérésies qui ont désolé l'Église* (Paris, 1791, 8vo; often reprinted):—*Brefs et instructions du*

*saint-siège relatifs à la Revolution française*, etc. (Paris, 1799, 2 vols. 8vo):—*Discours prononcé dans l'Église de St. Sulpice sur l'autorité de l'Église romaine* (Paris, 1802, 8vo):—*Hist. générale de la Philosophie ancienne et moderne*, etc.; ou *supplément à la Bibliothèque choisie des Pères grecs et latins* (Paris, 1835, 2 vols. 8vo, and 4 vols. 12mo; 1848, 4 vols. 12mo); *Hist. de la nouvelle Hérésie du xix<sup>me</sup> siècle, ou refutation des ouvrages de M. l'abbé de La Mennais* (Paris, 1835, 3 vols. 8vo):—*Comparaison de la méthode des Pères avec celle des prédicateurs du xix<sup>me</sup> siècle* (Paris, 1837, 8vo):—*Ouvres complètes de St. Cyprien* (transl., with a life of the saint, and notes; Paris, 1837, 2 vols. 8vo):—*Examen critique des doctrines de Gibbon, du docteur Strauss et de M. Salvador*, etc. (Paris, 1841, 8vo). See Léon Laya, *Notice biog.* (*Moniteur* of Dec. 15, 1847); Hoefler, *Nouv. Biog. Générale*, xxii, 736 sq.

**Guilt.** See SIX.

**Guilty**, besides its proper signification, occurs in the A. V. in the sense of *liable* as a rendering of רָשָׁע, Numb. xxxv, 31; ἔνοχος, Matt. xxvi, 66; Mark xiv, 64; and ὀφίλω, Matt. xxiii, 18, like the Lat. *reus*.

**Guion.** See GUYON.

**Guiscard or Guichard de Beaulieu**, an Anglo-Norman poet, who flourished probably in the reign of Stephen, and died in the beginning of the reign of Henry II of England. He is known by a poem of some length bearing the title of *Sermon of Guiscard de Beaulieu* (*le sermoun Guischart de Beaulieu* in the Harleian MS.), which is a satire against the vices of his day. According to this poem, Guiscard, disgusted with the follies and vanities in which he had passed his youth, retired to a monastery. Walter Mapes, a contemporary, or nearly contemporary writer, states (*De Nugis Curial.* dist. i, c. 13) that Guiscard was a man distinguished for his wealth and valor, who in his old age surrendered his estates to his son, and, entering a Cluniac monastery, became so eminent a poet in his vernacular (Anglo-Norman) as to be styled the "Hommer of the laity" (*laicorum Homerus*). Of the *Sermon*, which is all now known of his writings, there is a MS. of the 12th century in the British Museum (MS. Harl. No. 4388), and an imperfect one in the Bibliothèque Impériale of France (No. 1856—given by De la Rue as No. 2560). From this last MS. an edition of the *Sermon* was published by Jubinal (Paris, 1834, 8vo). This poem is written in the versification of the earlier metrical romances, and exhibits considerable poetical talent, and frequently elegance and energy of expression.—Wright, *Biog. Brit. Lit.* Anglo-Norman Period, p. 131; Hoefler, *Nouv. Biog. Générale*, xxii, 771. (J. W. M.)

**Guise**, HOUSE OF, the name of a branch of the ducal family of Lorraine, which, during the reign of Francis I, established itself in France, where it was conspicuous in its hostility to the Protestant cause, and played a leading part in the religious wars of the 16th century. The three following members of this family were the most prominent for their abilities, and for bigoted and unscrupulous antagonism to the Reformed party, viz.

I. CHARLES, cardinal of Guise, better known as cardinal of Lorraine, was born at Joinville Feb. 17, 1524, and died Dec. 26, 1574. He was made archbishop of Rheims in 1538, created a cardinal in 1547, and was employed on several important embassies. In 1558, at an interview with the cardinal Granville at Péronne, he laid the foundations of the alliance between the Guises and Spain, which continued through, and exerted an important influence on, the civil wars in France. He was present at the Council of Trent (1562), where at first he favored the demand for reform and the superiority of councils to the pope, but was too ambitious to adhere to such principles throughout. Under Francis II he was made, or, rather, made himself, the administrator of the finances. His char-

acter is thus portrayed by De Felice (p. 71): "The cardinal Charles de Lorraine, archbishop of Rheims, and the possessor, in ecclesiastical benefices, of a revenue of three hundred thousand crowns (many millions of our present money), had some learning, affable manners, great facility of speech, and much dexterity in the management of men and affairs, a deep policy, and a vast ambition. He aspired to nothing less than the crown of France for his brother, and to the tiara for himself. So Pius V, somewhat anxious concerning the part he was playing in the Church, habitually called him the pope on the other side of the mountains. For the rest, he was a priest without settled convictions, and half preached the Confession of Augsburg to please my good masters the Germans, as says Brantôme; he was derided for his evil habits, which he did not even care to hide, and raised the hooting of the populace on quitting the dwelling of a courtesan; lastly, he was as pusillanimous in the face of danger as he was arrogant in prosperity." He was, however, a protector of letters, and Rheims owes to him its university. He left some letters and sermons.

II. FRANÇOIS OF LORRAINE, brother of the preceding, and second duke of Guise, was born Feb. 17, 1519, at the castle of Bar, and died Feb. 24, 1563, of wounds inflicted by an assassin named Poltrot de Méré. He served with marked distinction and success in the army, and gained a European reputation as a general. His good fortune and abilities were seconded by the potent influence of his niece, Mary Stuart, the wife of the weak Francis II, in whose reign Guise rose to the height of power in the state, and became the head of the Romanist party. He was able to foil the powerful combination (known in history as the conspiracy of Amboise) formed by the malcontent nobles and the Protestants to hurl him and his brother, the cardinal of Lorraine, from power. The death of Francis II compelled him to yield for a time to the opposition which his foreign origin, his rapacity, cruelty, and ambition had aroused against him, and he left the court. Soon, however, he formed a league with Montmorenci and St. André to control the government and oppose the Protestants, and having been invited to return to Paris by the king of Navarre (Antoine de Bourbon) then lieutenant general of the kingdom, and who had been won over to the Roman Catholic side, Guise was on his way to the capital, when, on Sunday, March 1, 1562, a bloody butchery of Huguenots, peaceably assembled for worship, was perpetrated by his followers, if not with his approbation, at least with his knowledge and sufferance. This atrocious act, called the Massacre of Vassy (q. v.), was the signal for the long and desolating religious wars between the Protestants and Romanists of France. At the head of the Catholics Guise retook Rouen, gained a victory at Dreux (though he lost his colleagues, Montmorenci by capture and St. André by death), and was besieging, with the prospect of speedy capture, the Protestant stronghold of Orleans, when he was assassinated. He left a sort of diary, which may be found in Michaud and Poujoulat's *Nouvelle Collection de Mémoires pour servir à l'histoire de France* (Paris, 1839, 4to, 1st series, iv, 1-539).

III. HENRY OF LORRAINE, son of the preceding and third duke of Guise, was born Dec. 31, 1550, and assassinated Dec. 23, 1588, by the orders of Henry III of France, against whose authority and throne he was treasonably plotting. Inheriting his father's valor, ability, and hatred of the Reformation, a hatred intensified by the false charge that the Protestant chief, Coligni, was the instigator of his father's murder, he fought the Huguenots at Jarnac and Moncontour, and in the same year (1569) forced Coligni to raise the siege of Poitiers. He was an ardent abettor of and active participant in the "Massacre of St. Bartholomew" (q. v.), and gave expression to the spirit of a base revenge by kicking the dead body of the venera-

ble Coligni, which had been thrown by his orders into the court-yard, where he was awaiting the consummation of the murder of this most prominent victim of that sad day. In 1575 he received, in an encounter with the Calvinists, a face-wound, which gave him the name of Balaféré (the scarred), an epithet also applied for a like reason to his father. In 1576 he was active in the formation of the famous Romanist league, called the "Holy Union," for the suppression of Protestantism, and "was, until his death, the head and soul of it." Supported by the pope and Philip II of Spain, he, after the death of the duke of Anjou in 1584, secretly aspired to the throne of France, and sought to excite the nation against its king, Henry III, and the heir apparent, Henry of Navarre. Though forbidden by royal order to enter Paris, Guise made a triumphal entry into, and, during the popular rebellion known as "the day of barricades," was virtually master of the capital, and, had his courage equalled his ambition, might have been proclaimed king. In the same year he attended a meeting of the States General at Blois, where he demanded the appointment of high constable and general in chief of the kingdom. Henry, satisfied that his own life and throne were endangered by Guise's ambition, caused him and his brother, cardinal de Guise, to be slain by his guards.—Hoefler, *Nouvelle Biog. Générale*, xxii, 776-9, and 784-6; De Felice, *History of the Protestants of France* (London, 1853, 12mo); Wright, *History of France*, i, 680-718; Sismondi, *Histoire des Français* (see Index); Rose, *New Gen. Biog. Dict.* viii, 155, 156; Ranke, *History of the Papacy* (see Index); *New Amer. Cyclopædia*, viii, 563, 564; *English Cyclopædia*, s. v.; Chambers, *Cyclop.* s. v. (J. W. M.)

**Gulf** (γάσμα, a *chasm*), an opening or impassable space, such as is represented to exist between Elysium and Tartarus (Luke xvi, 26). See HADES.

**Gulich** or **Gulichius**, ABRAHAM VAN, was born at Heusden about 1642. After studying at Nimeguen and the University of Leyden, he was appointed professor extraordinary of theology at Nimeguen, Jan. 17, 1667. Near the close of the same year he became ordinary professor of philosophy and eloquence, and extraordinary of theology, in the gymnasium of that place. In 1679 he was appointed professor of the Cartesian philosophy in the University of Franeker. He died Dec. 31 of the same year. While at Ham he published a philosophical work entitled *Disputationes philosophicæ*. His theological works are, (1) *Theologia Prophetica* (Amsterd. 1675-94, 2 vols.); to the first volume is appended a treatise on Hermeneutics, entitled *Hermeneutica Sacra bipartita*;—(2) *Librorum Propheticonum Vt. et N. Test. compendium et analysis* (Amst. 1694). See *Geschiedenis der Nederlandsche Hervormde Kerk door A. Ypeij en J. Dermont*, D. ii; *Gladius, Godgeleerd Nederland*, D. i; also J. Schotanus Sterringa, *Oratio fanebris in obitum A. Gulichii*. (J. P. W.)

**Gulielmus**. See WILLIAM.

**Gulloth** (גולות, *fountains*; Sept. Γωλάθ and λύτρωσις, Vulg. *irriguum*; Eng. Vers. "springs"), the name of two plots given by Caleb to his daughter, at her special request, in addition to her dower (Josh. xv, 18; Judg. i, 15); from which passages it may be inferred that they were situated in the "south land" of Judah, and were so called from the copious supply of water in their vicinity. See ACHSAH. The springs were "upper" and "lower"—possibly one at the top and the other at the bottom of a ravine or glen; and they may have derived their unusual name from their appearance being different to that of the ordinary springs of the country. The root (גולת) has the force of *rolling* or *tumbling over*, and perhaps this may imply that they welled up in that bubbling manner which is not uncommon here, though apparently most rare in Palestine (Stanley, *Palestine*, Append. § 55). Dr. Rosen (*Zeitschr. der Deutsch. Morg. Gesellsch.* 1857, p. 50 sq.)

identifies these springs with the *Ain Nunkur* and *De-wir-Ban*, spots along a beautiful green valley about one hour south-west of Hebron; and in this Stanley coincides (*Jewish Church*, i, 293, n.). See DEBR.

**Gundulf**, founder of a sect in Arras and Liege in the 11th century. In the year 1025, Gerhard, bishop of Cambrai and Arras, caused the arrest of a number of persons charged with having propagated heretical doctrines in his diocese, and in various parts of the north of France. A synod was convoked at St. Mary's church, in Arras, for their trial. Their rules commanded them to forsake the world; to bring into subjection their fleshly lusts and passions; to support themselves by the work of their hands; to wrong no one, and to evince love to all who felt inclined to adopt their mode of life. This confession, joined with their well-known practice of washing each other's feet, led to the belief that they differed from other Christians only in a devoted attachment to the letter of Scripture. But Gerhard professed to know more of their rules than they acknowledged publicly. He had caused himself, he says, to be initiated into their worship by some proselytes, and so learned all their tenets. They appear to have held the following principles: "The holy Church is the community of the righteous, and is formed of persons chosen by election. Admission into it is signified by the imposition of hands, after a confession of faith and taking certain vows. Besides the regular assemblies in the church, there are prayer-meetings, in which the disciples wash each other's feet. The apostles and martyrs are to be venerated, but saint-worship is forbidden. The fulfilment of the law constitutes righteousness, which alone works salvation. Disobedience in the elect, and disregard of their professional vows, entail everlasting condemnation on them. Neither penitence nor conversion can afterwards avail them." These people rejected the Roman Catholic Church, the supremacy of the bishop of Rome, the respect shown to bishops, the whole hierarchical system, and even all clergy whatever. "Dogmatic, liturgic, and constitutive traditions are worthless and of no account. All the sacraments of the Roman Catholic Church are rejected, especially baptism and the Lord's supper. The consecrated elements of the Lord's supper are nothing more than what they appear to our senses. At the last supper, Christ did not really give his disciples his body for food and his blood for drink. Marriage and all sexual intercourse are to be avoided. Churches are not holy, hence worship does not derive any special virtue from its being held in them. The altar is but a heap of stones. Fumigations and the ringing of bells are useless ceremonies. Crosses, crucifixes, images, etc., tend to idolatry."

Bishop Gerhard charged the Gundulfians with holding these and similar opinions, but they refused to acknowledge them. They attempted only to defend their views regarding baptism, but finally announced that they were ready to recant their errors. Then the bishop and other members of the clergy solemnly condemned the heresy, excommunicated its originators in case they did not repent, and made the prisoners sign a Roman Catholic statement of the doctrines on which they had held heretical opinions, translated from Latin into the vernacular; after which the prisoners were released and the synod closed. Gerhard sent a copy of its acts to the bishop of Liege, who applied himself also with great zeal to the suppression of the heresy. These acts, which are the only source from which the details of this affair can be obtained, are to be found in D'Achéry's *Spicilegium* (2d edit., i, 607-624), and in Mansi's *Concilii* (xix, 423 sq.). Still they give no information as to the rise and development of this party, nor on its relation to those which arose before and after it in the same and neighboring districts. Gundulf appears to have made northern France the exclusive field of his exertions, and it was probably there he had made the converts which were

afterwards arrested at Arras. His connection with them was probably an imitation of Christ's connection with his disciples; they called him the Master, and, as already stated, considered the imitation of the apostles as their highest aim. Gundulf may have been himself a working man who went to that country because the trades, and especially that of weaver, were in a prosperous condition there. Once there, he probably found a body of disciples among his fellow-workmen, whom he instructed in his principles, and whom he afterwards sent as travelling workmen to propagate his views in their own districts. Of the end of Gundulf's career nothing is known. The period of his greatest activity was probably already over in 1025. As we see no mention of search for him having been made by order either of Gerhard or of the bishop of Liege, although his disciples had proclaimed him as their chief, it is probable that he was out of the reach of both, and had perhaps been already removed by death. We have no further information as to what became of the sect afterwards, and, at any rate, it continued, if at all, in secret. Similar sects have existed at all times in the bosom of the Romish Church, and they are generally found to represent vital piety as opposed to the corrupted Christianity of Rome. See Hahn, *Gesch. d. Ketzler im Mittelalter*, pt. i, p. 39 sq.; Herzog, *Real-Encykl.* v, 414 sq.; Neander, *Ch. History*, iii, 597.

**Guni** (Heb. *Guni'*, גוני, dyed [Gesen.] or protected [Fürst]; Sept. *Puni*, but in 1 Chron. vii, 13, Γωνί, Vulg. *Guni*), the name of two men.

1. One of the sons of Naphtali (B.C. ante 1856, but not necessarily born before the migration to Egypt) (Gen. xlii, 24; Numb. xxvi, 48; 1 Chron. vii, 13). His descendants are called GUNITES (Numb. xxvi, 48).

2. Father of Abdiel, and grandfather of Ahi, which last was chieftain of the Gileadite Gadites (1 Chron. v, 15). B.C. between 1093 and 782.

**Gunite** (Hebrew with the art. *Wg-Guni'*, גוני, Sept. *o Panti*, Vulg. *Gunite*, A. V. "the Gunites"), a general name of the descendants of GUNI, of the tribe of Naphtali (Numb. xxvi, 48).

**Gunn, Walter**, was born in Carlisle, Schoharie Co., N. Y., June 27, 1815. He was graduated at Union College in 1840, and studied theology in the seminary at Gettysburg. He was licensed by the Hartwich Synod in 1842, and the following year was ordained as a missionary to foreign lands. He soon sailed for India, where he labored in faith, and with perseverance and success, among the Tulucoos until his death, which occurred at Guntoon July 8, 1857. Mr. Gunn was the first missionary from the Lutheran Church in the United States who fell in the foreign field. He exerted an influence in India which still lives. He was a man of faith and love, a missionary in the highest sense, of whom the "world was not worthy." (M. L. S.)

**Gunn, William**, a minister of the Methodist Episcopal Church, was born in Caswell Co., N. C., March 13, 1797, and died at Lexington, Ky., Sept. 3, 1853. He removed in early life to Tennessee with his father; became, while a mere youth, an active member of the Church; was licensed to preach before 21 years of age, and joined the itinerancy in 1819. He spent his subsequent life in ministerial labors, mainly in the state of Kentucky, filling with great acceptability and usefulness the positions of circuit and station preacher and presiding elder, and died in the full assurance of the faith he preached to others and so beautifully exemplified in his life. He published, in connection with another minister, *The Christian Psalmist* (Louisville, Kentucky), and also another work, chiefly selections of the preceding, and entitled *The Christian Melodist*.—Sprague, *Annals of the Amer. Pulpit*, vii, 622; *Minutes of Conf. of M. E. Church South*. (J. W. M.)

**Gunning, Peter, D.D.**, an eminent English High-church bishop, was born at Hoo, in Kent, in the

year 1613, and was educated at Clare Hall, Cambridge. He became fellow and tutor of his college, and distinguished himself as a preacher, but on account of his zeal for the king's service he was ejected, and afterwards was made chaplain to Sir Robert Shirley, at whose death he obtained the chapel at Exeter House, Strand. At the Restoration his services were rewarded; he was created D.D. by the king's mandate. He was one of the coadjutors selected by the bishops to maintain the High-church cause at the Savoy Conference (1661), and was the principal disputant with Baxter. He had a Romanizing tendency, and advocated prayer for the dead. In 1669 he was made bishop of Chichester, and in 1674 was translated to Ely, where he died in 1684. He wrote largely on the controversies of the time, and especially *The Paschal or Lent Fast apostolical and perpetual*, recently reprinted in the *Library of Anglo-Cath. Theology* (Oxford, 1845, 8vo).—Hook, *Ecol. Biog.* vol. v.; Neal, *History of the Puritans*, iii., 90, 168; Darling, *Cyclop. Bibliographica*, i., 1355.

**Gunpowder Plot**, a conspiracy formed and matured in the years 1604-5 by some English Romanists to blow up with gunpowder the Parliament House, and thus destroy at once the king, lords, and commons of England when assembled at the opening of Parliament, with the hope of being able, during the resultant confusion, to re-establish their faith in the kingdom, or, at least, avenge the oppressions and persecution of its adherents. At the accession of James I to the throne, the Roman Catholics anticipated toleration, or, at all events, a great relaxation in the rigor of the penal laws against them, and were greatly exasperated on finding that not only were their hopes in this regard disappointed, but that increased severity was employed towards them; for James, when once firmly seated on his throne, in Feb. 1604, "assured his council that 'he had never any intention of granting toleration to the Catholics;' that he would fortify the laws against them, and cause them to be put into execution to the utmost." The conceiver of the design of taking so indiscriminate and brutal a vengeance was Robert Catesby, of "ancient family and good estate," who had once abjured and then returned again with increased ardor to his early faith. He made known his scheme first to Thomas Winter, "a gentleman of Worcestershire," and next to John Wright, who belonged to a highly respectable Yorkshire family. According to the statement made in prison (Nov. 19, 1605) by a fellow-conspirator (Fawkes), "these three first devised the plot, and were the chief directors of all the particularities of it." Winter refused his assent to the plan until an effort had been made to obtain, through the mediation of Spain, toleration for the English Catholics by a clause to that effect in the treaty then negotiating between England and Spain. He accordingly went to the Netherlands to further that object, where he learned from the Spanish ambassador that it could not be accomplished. He, however, met at Ostend an old associate, Guy Fawkes (q. v.), and foreseeing in him an efficient coadjutor in Catesby's scheme, induced him to return with him to England without making known to Fawkes the particular nature of the plot. Fawkes, though not the projector or head, became by far the most notorious member of the conspiracy, and popular opinion long represented him as a low, cruel, and mercenary ruffian; but he appears to have been by birth a gentleman, and of a nature chivalrously daring and unselfish, but thoroughly perverted by a blind fanaticism, which led him to regard devotion to his own faith and its adherents as the essence of Christian virtues. Soon after the arrival of T. Winter and Fawkes in London, a meeting was held at Catesby's lodgings, at which there were present the four already named and an additional member of the conspiracy, Thomas Percy, a brother-in-law of John Wright, and "a distant relation of the earl of Northumberland." These five, at Catesby's request, agreed to bind themselves to secre-

cy and fidelity by a solemn oath, which, a few days afterwards, in a lonely house beyond St. Clement's Inn, they took on their knees in the following words: "You swear by the blessed Trinity, and by the sacrament you now propose to receive, never to disclose, directly or indirectly, by word or circumstance, the matter that shall be proposed to you to keep secret, nor desist from the execution thereof until the rest shall give you leave." They then went into an adjoining room and received the holy sacrament from father Gerard, a Jesuit priest, who was, it is said, ignorant of their horrid project. The particulars of the plot were then communicated to Fawkes and Percy, and in furtherance of the plan then agreed on, Percy, whose position as a gentleman pensioner would prevent any suspicion arising therefrom, rented of a Mr. Ferris, on May 24, 1604, a house adjoining the Parliament buildings, the keys of which were given to Fawkes, who was unknown in London, and who assumed the name of John Johnson, and the position of servant to Percy. They took a second oath of secrecy and fidelity to each other on taking possession of the house, but before their preparations were completed for beginning the work of mining through to the Parliament building, the meeting of Parliament was prorogued to Feb. 7, 1605. They separated to meet again in November, and, in the mean while, another house was hired on the Lambeth side of the river, in which wood, gunpowder, and other combustibles were placed, to be removed in small quantities to the house hired of Ferris. This Lambeth house was put in charge of Robert Kay, or Keyes, an indigent Catholic gentleman, who took the oath and became a member of the band. On a night in December, 1604, the conspirators, having provided themselves with tools and other necessaries, went zealously to work on the mine, Fawkes acting as sentinel. The wall separating them from the Parliament House was found to be very thick, and more help was needed; so Christopher Wright, a younger brother of John Wright, was taken in on oath, and Kay brought over from Lambeth. The work was carried on zealously, the conspirators beguiling the labor with discussions of future plans. They agreed in the policy of proclaiming one of the royal family in the place of James, and as they supposed his eldest son, prince Henry, would be present and perish with his father in the Parliament House, Percy undertook to seize and carry off prince Charles as soon as the mine was exploded; and, in default of Percy's success, arrangements were made to carry off the princess Elizabeth, then near Coventry under the care of lord Harrington. "Horses and armor were to be collected in Warwickshire." They failed, however, in devising any safe plan for saving the lives of Roman Catholic members of Parliament. While the matter was thus progressing, Fawkes reported the prorogation of Parliament to Oct. 3, and they separated until after the Christmas holidays. In January, 1605, John Grant, a Warwickshire gentleman, and Robert Winter, eldest brother of Thomas Winter, were admitted to the conspiracy, and shortly after them Thomas Bates, a servant of Catesby, and the only participant in the plot not of the rank of a gentleman. While going on with the work in Feb., 1605, they were alarmed by some noises, and Fawkes, who went out to ascertain the cause, reported that they were caused by the removal of a stock of coal from a cellar under the Parliament House, with the gratifying additional intelligence that the cellar was to be let. Percy straightway hired it, the work on the mine was abandoned, and the gunpowder (36 bbls.) was conveyed from its place of concealment at Lambeth into this cellar, and covered up with stones, bits of iron, and fagots of wood. All was ready in May, and the conspirators separated to await the meeting of Parliament. Fawkes went to the Netherlands on a mission connected with the plot, but returned without much success in August. In September, Sir Edward Baynham, "a gentleman of an ancient

family in Gloucestershire," was admitted into the plot and sent to Rome, not to reveal the project, but, on its consummation, to gain the favor of the Vatican by explaining that its object was the re-establishment of Roman Catholicism in England. A further prorogation of Parliament to Nov. 5 having been made, the conspirators were led, in consequence of the repeated prorogations, to fear that their plot was suspected; but Thomas Winter's examinations, made on the day of prorogation, served to reassure them. "Catesby purchased horses, arms, and powder, and, under the pretence of making levies for the archduke of Flanders, assembled friends who might be armed in the country when the first blow was struck." To obtain the required means for these ends, three wealthy men were admitted (on oath as the others) into the conspiracy, viz. Sir Everard Digby, of Rutlandshire, who promised to furnish £1500, and to collect his Roman Catholic friends on Dunsmore Heath, in Warwickshire, by Nov. 5, as if for a hunting party; Ambrose Rookwood, of Suffolk, who owned a magnificent stud of horses; and Francis Tresham, who "engaged to furnish £2000;" but Catesby mistrusted the latter, and sorely repented having intrusted his secret to him. As the 5th of November drew near, "it was resolved that Fawkes should fire the powder by means of a slow-burning match, which would allow him time to escape before the explosion" to a ship ready to proceed with him to Flanders; and that, in the event of their losing the prince of Wales and prince Charles, the princess Elizabeth should be proclaimed queen, and "a regent appointed during her minority." On another point they failed to harmonize so fully. Each conspirator had a friend or friends in Parliament whose safety he wished to secure, but to communicate the project to so many persons involved too great risk, "and it was concluded that no express notice should be given them, but only such persuasion, upon general grounds, as might deter them from attending. Many of the conspirators were averse to this resolve, "and angry at its adoption; and Tresham in particular, for his sisters had married lords Stourton and Mounteagle." On a refusal of Catesby and other leaders to allow him to notify directly Mounteagle, it is said he hinted that the money promised by him would not be forthcoming, and ceased to attend the meetings. It is probable he warned Mounteagle, for this nobleman unexpectedly gave a supper, Oct. 26, ten days before the meeting of Parliament, at a house at Hoxton which he had not lately occupied, and while seated at table a page brought him a letter, stating that he had received it in the street from a stranger, who urged its immediate delivery into Mounteagle's hands. The letter warned Mounteagle not to attend the Parliament, and hinted at the plot, and was on the same evening shown by Mounteagle to several lords of the council, and on Oct. 31 shown to the king also. The conspirators suspected Tresham of having betrayed them, and accused him of it, but he stoutly denied it. They were now thoroughly alarmed; some left London, and others concealed themselves; but Fawkes remained courageously at his post in the cellar, notwithstanding the hourly increasing intimation that the plot was known to government. On the evening of Nov. 4 the lord chamberlain visited the cellar, saw Fawkes there, and, noticing the piles of fagots, said to him, "Your master has laid in a good supply of fuel." After informing Percy of this ominous circumstance, Fawkes returned to his post, where he was arrested about 2 o'clock on the morning of Nov. 5 by a company of soldiers under Sir Thomas Knevet, a Westminster magistrate, who had orders to search the houses and cellars in the neighborhood. On Fawkes's person was found a watch (then an uncommon thing), some slow matches, some tinder and touchwood, and behind the cellar door a dark lantern with a light burning. They removed the wood, etc., and discovered the gunpowder also. Fawkes was taken before the king

and council, where he boldly avowed his purpose, only expressing regret for its failure, and, in reply to the king's inquiry "how he could have the heart to destroy his children and so many innocent souls," said, "Dangerous diseases require desperate remedies." He utterly refused to name his accomplices, and neither temptations nor tortures, whose horrible severity is shown by the contrast in his signatures on the 8th and 10th of November, could induce him to implicate others further than their own actions had already done, while at no time would he admit the complicity of suspected Jesuit priests, refusing to plead guilty on his trial because the indictment contained averments implicating them. For the connection of the Jesuits with this conspiracy, see GARNET; JESUITS; and the authorities given at the end of this article.

Catesby and John Wright had departed for Dunchurch before Fawkes's arrest, and the other conspirators, except Tresham, fled from London after that event. They met at Ashby Ledgers, and resolved to take up arms, and endeavor to excite to rebellion the Roman Catholics in Warwickshire, Worcestershire, Staffordshire, and Wales; but their failure was complete, and their efforts only served to point them out as members of the conspiracy. They were pursued by the king's troops, and at Holbeach the two Wrights, Percy, and Catesby were killed, and Rookwood and Thomas Winter wounded in a conflict with the troops. The others were soon captured. Tresham died in the Tower of disease; the remaining seven, viz., Digby, Robert and Thomas Winter, Rookwood, Grant, Fawkes, Kay, and Bates, were tried on the 27th January, 1606, and executed on the 30th and 31st of that month. This diabolical plot reacted fearfully against the Romanists, and its memory is still a bulwark of Protestant feeling in England. The revolting atrocity of the deed purposed by these misguided men must ever excite horror and reprobation; but we may hope that candid minds in this more tolerant age, while judging them, will condemn also both the teachings which bred such fanaticism, and the spirit of persecution which aroused it to action.

The 5th of November, in commemoration of this plot, is called Guy Fawkes's Day, and until recently a special service for it was found in the ritual of the English Church. It was made a holiday by act of Parliament in 1606, and is still kept as such in England, especially by the juveniles. The following account of the customs pertaining thereto is abridged from Chambers, *Book of Days*, ii, 549-50. The mode of observance throughout England is the dressing up of a scarecrow figure in cast-off clothing (with a paper cap, painted and knotted with paper strips, imitating ribbons), parading it in a chair through the streets, and at night burning it in a bonfire. The image represents Guy Fawkes, and, consequently, carries a dark lantern in one hand and matches in the other. The procession visits the houses in the neighborhood, repeating the time-honored rhyme—

"Remember, remember,  
The fifth of November,  
The gunpowder treason and plot;  
There is no reason  
Why the gunpowder treason  
Should ever be forgot!"

Numerous variations of the above rhyme are used: for example, at Islip, the following:

"The fifth of November,  
Since I can remember,  
Gunpowder treason and plot;  
This is the day that God did prevent,  
To blow up his king and Parliament.

A stick and a stake,  
For Victoria's sake;  
If you won't give me one,  
I'll take two;  
The better for me,  
And the worse for you!"

It is an invariable custom on these occasions to solici-

it money from the passers-by in the formula "Pray remember Guy!" "Please to remember Guy!" or, "Please to remember the bonfire!"

In former times the burning of Guy Fawkes's effigy was in London a most important ceremony. Two hundred cart-loads of fuel were sometimes consumed in the bonfire in Lincoln's Inn Fields, and thirty Guys would be gibbeted and then cast into the fire. Another immense pile was heaped up in the Clare Market by the butchers, who the same evening paraded the streets with the accompaniment of the famed "marrow-bone-and-cleaver" music. The uproar occasioned by the shouts of the mob, the ringing of the church bells, and the general confusion can be only faintly imagined at the present day.—Jardine, *British Criminal Trials* (Library of Entertaining Knowledge), vol. ii; *Pictorial Hist. of England*, iii, 20-32 (Chambers's ed.); Knight, *Popular Hist. of England*, iii, 321-37; *ibid.*, *Old England*, ii, 151-62; Chambers, *Book of Days*, ii, 546-50; Hume, *Hist. of England*, vol. iv; Chambers, *Cyclopaedia*, s. v. See FAWKES. (J. W. M.)

**Günther**, ANTON, a prominent Roman Catholic philosopher of modern times, was born Nov. 17, 1785, at Lindenau, in Bohemia. He studied philosophy and law at the University of Prague, was for several years tutor in the family of prince Bretzenheim, and took priestly orders in 1820. He was then for several years vice-director of philosophical studies at the University of Vienna. The professorship of philosophy, for which he was a candidate at the earnest solicitation of his friends, he did not obtain, in consequence of the efforts made by the opponents of his philosophical views. The life-work of Günther was to attempt, in opposition to the prevailing philosophical systems, which he regarded as more or less unchristian, the establishment of a thoroughly Christian philosophy. He desired to show that the teachings of divine revelation, being the absolute truth, need not only not to shun the light of reason, but that, on the contrary, reason itself will lead the sound thinker to an acceptance of the Christian philosophy, which he thought had found its most complete expression in the Roman Catholic doctrine. The first work of Günther was the *Vorschule zur speculative Theologie* (Vienna, 1828; 2d enlarged edition 1846), which contained the theory of creation; and it was followed in 1829 by the theory of the incarnation. These works at once established for him the reputation of being one of the foremost philosophers of the Roman Catholic Church. The University of Munich conferred upon him the title of *Doctor Philosophiæ*, which, however, the illiberal government of Austria did not allow him to use. Günther, who lived in great retirement, continued to publish a series of philosophical works, namely, *Peregrin's Gastmahl* (Vienna, 1830);—*Süd- und Nordlichter* (1832);—*Jawasköpfe für Philosophie und Theologie* (published by him conjointly with his friend Dr. Papst, Vienna, 1833);—*Der letzte Symboliker* (with special reference to the works of Möhler and Baur, 1834);—*Thomas à Kempis's: zur Transfiguration der Persönlichkeitspantheismus neuester Zeit* (1835);—*Die Juste-Milieu's in der deutschen Philosophie der gegenwärtigen Zeit* (1837);—*Euristheus und Hercules* (1842). He also published from 1848 to 1854, conjointly with his friend Dr. Veith, a philosophical annual entitled *Lydia*. In none of his works did he undertake to develop a philosophical system as a whole, but he contributed ample material for a new system. He was, in particular, acknowledged as one of the keenest and most powerful opponents of the pantheistic schools, and he found many adherents among the Roman Catholic theologians and scholars of Germany. The "Güntherian philosophy" (*Günthersche Philosophie*) came to establish itself at many of the Roman Catholic universities, and for a time shared with the school of Hermes (q. v.) the control of philosophical studies and learning in Catholic Germany. To the Jesuits and the ultramontane school, the school of

Günther was as obnoxious as that of Hermes. His philosophical treatment of the Christian doctrines was regarded by many as derogatory to the belief in them. He also gave great offence by daring to criticize high authorities, as Thomas of Aquinas. Still greater dissatisfaction was created by his dualistic theory concerning mind and body. His works were denounced in Rome. On Jan. 8, 1857, all his works were put on the Index of prohibited works, and on June 15 a brief of the pope appeared charging him with errors in the doctrine of the Trinity, of Christology and Anthropology, and an over-estimation of the powers of reason. Günther, and with him most of his adherents, submitted to the papal censure Feb. 20, 1857. Günther himself was deeply affected by this humiliation, and expressed the hope that his philosophy might be supplanted by something better. He died Feb. 24, 1863. See CLEMENS [an ultramontane opponent of Günther], *Die speculative Theologie Günthers* (Cöln, 1853). (A. J. S.)

**Guphta**. See JOTAPATA.

**Gur** (Heb. id. גִּירָא, a *whelp*, fully גִּירָא-הַגִּירָא, MALEH'-Gur, i. e. *ascent of the whelp*; Sept. ἡ ἀνάβασις τοῦ γούρου. Vulg. *ascensus Gauer*; Eng. Vers. "the going up to Gur"), a place or elevated ground in the immediate vicinity of (גִּירָא) Ibleam, on the road from Jezreel to Beth-hag-Gan, where Jehu's servants overtook and mortally wounded the flying king Ahaziah (2 Kings ix, 27). B. C. 883. It is, perhaps, the little knoll marked on Van de Velde's *Map* about midway between Zenin and Jelameh. See IBLEAM; GUR-BAL.

**Gur**. See WHELP.

**Gur-ba'al** (Heb. id. גִּירָא-בַּאֵל, *sojourn of Baal*; Sept. πέρρα, Vulg. *Gurbaal*), a place in Arabia, successfully attacked by Uzziah (B. C. 803) (2 Chron. xxvi, 7); hence on the confines of Judæa; probably so called from having a temple of Baal. From the rendering of the Sept., Calmet infers that it was in Arabia Petrea. Arabian geographers mention a place called *Baal* on the Syrian road, north of El-Medineh (*Marasid*, s. v.). The Targum reads "Arabs living in *Gerar*"—suggesting גִּירָא instead of גִּירָא. See GERAR. The ingenious conjectures of Bochart (*Phalq*, ii, 22) respecting the Melunim, who are mentioned together with the "Arabians that dwelt in Gur-Baal," may be considered as corroborating this identification (compare 1 Chron. iv, 39 sq.; see Ewald, *Isr. Gesch.* i, 322). See MEHUNIM.

**Gurgoyle**. See GARGOYLE.

**Gurley**, PHINEAS DENSMORE, D. D., an eminent Presbyterian minister, was born Nov. 12, 1816, at Hamilton, Madison County, N. Y., and died Sept. 30, 1868, in Washington, D. C. During his infancy his parents removed to Parishville, St. Lawrence County, N. Y., where, at the age of fifteen, he joined the Presbyterian Church, and soon after entered Union College, where he graduated in 1837 with the highest honors of his class. The same year he entered the Theological Seminary at Princeton, N. J., and graduated there in Sept. 1840, having been licensed to preach the April preceding at Cold Spring, N. Y. He accepted straightway a call to the First Presbyterian Church of Indianapolis, Ind., from which a strong minority had separated and organized a second church (New School), with the Rev. Henry Ward Beecher as pastor. In this place he labored for nine years with great success, the church being blessed with revivals and largely increased numbers; but in 1850, for the benefit of the health of his family, he removed to Dayton, Ohio, where for four years a like success attended his ministry as pastor of the First Presbyterian Church in that city. In 1854, yielding to the wishes of his brethren, he accepted the pastorate of the F-street Presbyterian

Church in Washington, D. C., with which, in 1859, the Second Presbyterian Church of that city united, and Dr. Gurley remained until his death pastor of the united body, worshipping in a new edifice, and called the New York Avenue Church. He was elected chaplain to the United States Senate in 1859, and was the pastor of several presidents of the United States, among them of Mr. Lincoln, during the sad but exciting scenes of whose dying moments he was present. The following incident which then occurred illustrates forcibly the spirit and power of his Gospel ministrations. When the patriot president had ceased to breathe, Mr. Stanton, secretary of war, turning to Dr. Gurley, said, "Doctor, will you say something?" After a brief pause, Dr. Gurley, addressing the weeping relatives and sympathizing friends, replied, "Let us talk with God;" and, kneeling, offered "a most touching and impressive prayer, which even in that dark hour of gloom lighted up with sunshine every sorrowing heart." Dr. Gurley was a member of the General Assembly (Old School) in 1866, and chairman of its judicial committee; was made moderator of the General Assembly held in 1867, was chosen a member of the committee of fifteen appointed to confer with a like committee of the New-School Assembly on the subject of a reunion of the two Presbyterian bodies in the United States, and "was the author of the amendments to the basis of union adopted by the joint committee in Philadelphia, and subsequently adopted by both assemblies." His health failed in 1867, and, after vainly seeking its restoration in rest and change of scene, he returned to die among his people. Great earnestness and singleness of purpose, with an ever-active zeal for the glory of God and the salvation of souls, characterized his life. See *Memorial Sermon* on Dr. Gurley by W. E. Schenck, D.D. (Washington, D. C., 1869), and *New York Observer*, Oct. 8, 1868. (J. W. M.)

**Gurnall, WILLIAM**, an English divine, and a "man of great excellence of character," was born in 1617, was educated at Emanuel College, Cambridge, and was minister at Lavenham for 35 years. He became a rector in 1644, but did not receive episcopal ordination until the Restoration. He published a volume of *Sermons* (1660, 4to), but is best known as the author of *The Christian in complete Armor* (1st ed. 1656-1662, 3 vols. 4to; new ed. 1844, 1 vol. 8vo), of which an edition, with a biographical introduction by the Rev. J. C. Ryle, was published in 1865 (London, 2 vols. imp. 8vo). This work is described by Dr. E. Williams (*Christian Preacher*) as "full of allusions to scriptural facts and figures of speech, generally well supported; sanctified wit, holy fire, deep experience, and most animated practical applications." Gurnall died in 1679. See *Biographical Introduction* by Ryle in the edition last named above, and Allibone, *Dict. of Authors*, i, 749. (J. W. M.)

**Gurney, JOSEPH JOHN**, an eminent minister of the Gospel, Christian philanthropist, and theological writer, was born at Earham Hall, near Norwich, England, Aug. 2, 1788. The family of Gurney, or Gournay, sprang from a house of Norman barons who followed William the Conqueror into England. Such was his reputation for wisdom, discrimination, and sound scholarship, that Lord Morpeth, when in Philadelphia, used to say, "Mr. Gurney is authority upon any subject in London." Although his family for two centuries deservedly wielded great influence in Norfolk, his large reputation is based upon his individual character and merits. In early manhood he dedicated himself to the service of his divine Redeemer, and made an open Christian confession as a member of the religious Society of Friends, in which Church he became an illustrious minister, being instrumental in winning many souls to Christ in Great Britain and Ireland. In the love of the Gospel, he made three missionary visits to the continent of Europe, and spent three years (1837-40) in North America and the West

India Islands, preaching Christ with powerful demonstration of the Spirit. He often joined his sister, the celebrated and excellent Elizabeth Fry, in labors in the British prisons. The apostolic character of his preaching is shown in the volume of sermons and prayers delivered in Philadelphia in the winter of 1838, and taken in short-hand by Edward Hopper, Esq. Possessed of great wealth, he was a faithful steward, and his large-hearted and well-directed benevolence was "like the dew, with silent, genial power, felt in the bloom it leaves along the meads." He was the associate of Clarkson, Wilberforce, his brother-in-law, Sir T. Fowell Buxton, and others, in the successful efforts for the abolition of slavery; and he was never known to be silent or unsympathizing when others needed his voice or his purse. Eminent as were his gifts and acquirements, his simplicity of character and humility, and, more than all, his conformity to the will of Christ, made him the sweet and willing minister and servant of all. In this capacity he served his generation according to the will of God. In his Christian authorship, his influence for good will extend to successive generations. His principal writings are as follows: *Observations on the distinguishing Views of the Society of Friends* (this is a standard book—the seventh edition, containing the author's latest revisions, and an introductory treatise of great value, should supersede former editions);—*Essays on Christianity*;—*Biblical Notes on the Deity of Christ* (an illustration of the texts relating to this subject);—*Essays on the habitual Exercise of Love to God as a Preparation for Heaven*;—*A Letter to a Friend on the Doctrine of Redemption*;—*Hints on the portable Evidences of Christianity*;—*Brief Remarks on the History, Authority, and Use of the Sabbath*;—*Guide to the Instruction of young Persons in the holy Scriptures*;—*On the moral Character of our Lord Jesus Christ*;—*Christianity a Religion of Motives*;—*An Account of John Stratford*;—*An Address to the Mechanics of Manchester*;—*The Accordance of geological Discovery with natural and revealed Religion*;—*Familiar Sketches of the late William Wilberforce*;—*Chalmeriana*;—*Sabbatical Verses, and other Poems*;—*A Winter in the West Indies*;—*A Journey in North America, described in familiar Letters to Amelia Opie*;—*Thoughts on Habit and Discipline*;—*Terms of Union in the Bible Society*;—*Puseyism traced to its Root*;—*Notes on Prisons and Prison Discipline*, etc. His last publication was an admirable and Christian declaration of his faith. In him was illustrated the Scripture, "The path of the just is as a shining light, which shineth more and more unto the perfect day." He fell asleep in Jesus Jan. 4, 1847. See *Memorial* issued by London Yearly Meeting; J. B. Braithwaite, *Memoirs of J. J. Gurney, with Selections from his Journal and Correspondence* (Norwich, 2 vols. 8vo); Hofer, *Non. Biog. Générale*, xxii, 854; Allibone, *Dict. of Authors*, i, 750. (W. J. A.)

**Gurtlerus.** See GUERTLER.

**Gury, JOSEPH PIERRE**, a Roman Catholic theologian, whose works on moral theology have obtained a great notoriety by the many offensive doctrines which he defends. He was born Jan. 23, 1801, entered in 1824 the Society of Jesus, became professor of moral theology at Vals, in France, and died April 18, 1866, at Mercœur, in the Auvergne. He wrote a *Compendium Theologiæ moralis* (4th ed. Ratisbon, 1868; German translation, Ratisbon, 1869), and *Casus Conscientiæ in præcipuis questionibus Theologiæ moralis* (Ratisbon, 1865). Both works have passed through a large number of editions in France and other countries, and have been introduced as text-books into a number of ecclesiastical seminaries. In the Dict of the grand-duchy of Hesse-Darmstadt, the government was in 1869 attacked by the Liberal party for allowing the Roman Catholic bishop of Mentz to introduce this work into the diocesan seminary, on the ground that it teaches,

in many cases, disobedience to the government, and principles incompatible with a civilized form of government. See Linné, *Das Handbuch Gury's und die christliche Ethik* (Fricberg, 1869). (A. J. S.)

**Gush-Chalab.** See GISHALA.

**Gustavus I, VASA**, the first Protestant king of Sweden, was born at Lindholm, Sweden, May 12, 1496. He descended, both on the paternal and maternal side, from noble Swedish families, and his original name was *Gustavus Ericsson*, since he was the son of the councillor Eric Johansson. From 1512 he was educated for a statesman at the court of the Swedish administrator, Sten Sture. In 1516 and 1517 he took an active part in the war against the Danes, but was treacherously made a prisoner by the Danish king, Christian II, and carried to Denmark. He escaped in September, 1519, landed in Sweden in May, 1520, aroused the peasants of Dalecarlia to a revolt against the Danish rule, and was proclaimed by them head of their own and other communes of Sweden. The forcible abdication of Christian II put an end to the Scandinavian union, and the Swedish Diet of Strengnäss proclaimed Gustavus as king. Being a decided adherent of the Reformation of Luther with whom he carried on a correspondence, Gustavus declined to be crowned by the hands of the Roman Catholic bishops, and postponed his coronation, which did not take place until 1528. In 1530 he formally joined the Lutheran Church, the cause of which he promoted with great eagerness, and even severity, crippling the power of the Roman Catholic clergy by enormous imposts and finally (1544) forcing the Lutheran doctrines upon all his subjects. Like many other Protestant princes of that time, he arrogated to himself an undue influence upon the Church, assuming in 1540 the highest authority in ecclesiastical matters, and thus burdening Sweden with the pernicious system of an oppressive and even intolerant state-churchism. By an act of the Diet of Westerås the crown was declared hereditary in his male descendants. On the whole, Gustavus was one of the best and wisest princes of his time. "He had found Sweden a wilderness, devoid of all cultivation, and a prey to the turbulence of the people and the rapacity of the nobles; and, after forty years' rule, he left it a peaceful and civilized realm, with a full exchequer, and a well-organized army of 15,000 men, and a good fleet, which were both his creations. He promoted trade at home and abroad. Every profession and trade received his attention and fostering care, and schools and colleges owed their revival, after the decay of the older Roman Catholic institutions, to him. He made commercial treaties with foreign nations, and established fairs for foreign traders. In his reign roads and bridges were made in every part of the country, and canals begun, one of which has only recently been brought to completion. In his relations with his subjects Gustavus was firm, and sometimes severe, but seldom unjust, except in his dealings towards the Romish clergy, whom he despoiled with something like rapacity of all their lands and funds. To him the various tribes of Lapps were indebted for the diffusion of Christianity among them by Lutheran missionaries, while the Finns owed to him the first works of instruction, Bibles and hymn-books printed in their own language. Gustavus was methodical, just, moral, and abstemious in his mode of life; an able administrator; and, with the exception of a tendency to avarice, possessed few qualities that are unworthy of esteem" (Chambers, *Cyclopaedia*). He died Sept. 29, 1560. (A. J. S.)

**Gustavus II, ADOLPHUS**, king of Sweden, was the grandson of Gustavus I (q. v.) by his youngest son, Charles IX, at whose death he succeeded to the throne of Sweden. Gustavus, who had been strictly brought up in the Lutheran faith, had at first to quell some disorders at home, arising from the disputed suc-

cession of his father (third son of Gustavus Vasa), who had been elected king on the exclusion of his nephew Sigismund, king of Poland (son of John III, the second son of Gustavus Vasa), whose profession of the Roman Catholic religion made him obnoxious to the Swedish people, and virtually annulled his claims to the crown. He reconciled the Estates by making them many concessions, ended the war with Denmark, in 1612, unsuccessfully, but obtained from the Czar in 1617, by virtue of the treaty of Stolbowa, several places, and renounced all claims to Livonia. The numerous exiles who, during the reign of his father, had fled to Poland, were permitted to return, and thus he thwarted the intrigues of the Polish king Sigismund. In 1620 he built Gothenburg anew, and founded or renewed sixteen other towns. He was eagerly intent upon enlarging the powers of the sovereign by reducing those of the Estates. In 1621 he was involved in a war with Poland, and gained Livonia and Courland, and carried the war into Prussia. Several revolts in Sweden, which broke out in consequence of the heavy taxes, were promptly quelled. In the summer of the year 1630 he went to Germany with an army of about 15,000 men to support the Protestants in the war against the emperor, having remitted the charge of the government and the care of his infant daughter Christina to his chancellor Oxenstiern. After carrying on the war triumphantly for two years [see THIRTY YEARS' WAR], he fell at Lützen, Nov. 6, 1632. Although Gustavus was eminently a warlike king, he made many salutary changes in the internal administration of his country, and devoted his short intervals of peace to the promotion of commerce and manufactures. He was pre-eminently religious, and his success in battle is perhaps to be ascribed not only to a better mode of warfare, and the stricter discipline which he enforced, but also still more to the moral influence which his deep-seated piety and his personal character inspired among his soldiers. The spot where he fell on the field of Lützen was long marked by the *Schvedenstein*, or Swede's Stone, erected by his servant, Jacob Ericsson, on the night after the battle. Its place has now been taken by a noble monument erected to his memory by the German people on the occasion of the second centenary of the battle held in 1832. Other monuments were erected between Coswig and Goertz (1840), and at Bremen (1853). A statue made by Fogelberg was set up at Gothenburg in 1854. In 1832 Protestant Germany established in his honor an association for the support of poor Protestant congregations. See GUSTAVUS ADOLPHUS SOCIETY. Biographies have been written, among others, by Rango (Lpz. 1824), Sparfeld (Lpz. 1844), Gfrörer (3d ed. Stuttg. 1852), Freydel (Germ. transl. Lpz. 1852), Helbig (Lpz. 1854), Flathe (*Gustav Adolf u. der dreissigjähr. Krieg*, Dresd. 1840 sq., 4 vols.), H. W. Thiersch (Nördlingen, 1868), and Droysen (vol. i, Leips. 1869). (A. J. S.)

**Gustavus-Adolphus Society** (*Gustav-Adolf-Verein*), a union of members of the Evangelical Protestant Church of Germany for the support of their persecuted or suffering brethren in the faith. It originated as follows. On the occasion of the second secular anniversary of the battle of Lützen (won by Gustavus Adolphus [q. v.] at the cost of his life, Nov. 6, 1632), held in that city Nov. 6, 1832, Schild, a merchant of Leipzig, proposed that a memorial should be erected to the champion of Protestantism. By the influence of Dr. Grossmann it was afterwards resolved that, instead of a monument of stone or brass, an *institution* should be formed in honor of the Protestant hero, having for its object the succor of the Protestant communities suffering from persecution in Roman Catholic countries. An association was soon formed at Dresden and another in Leipzig, and the two were united in 1834. The society thus formed was very popular in Saxony and Sweden. Its funds were chiefly the

fruit of house and church collections. On the anniversary of the Reformation in 1841, Dr. Zimmermann, of Darmstadt, issued an appeal to Protestants throughout the world to unite in forming an association for the support of such Protestant communities as required and were worthy of help. In order to effect this, and to incorporate in it the Leipzig and Dresden associations, a preparatory meeting was held at Leipzig Sept. 16, 1842, and "The Evangelical Society of the Gustavus-Adolphus Institution" was formed. A general assembly was held at Frankfort Sept. 21 and 22, 1843, in which twenty-nine societies were represented.

According to the rules adopted at this meeting, the object of the association is to succor all Protestants, either in or out of Germany, who stand in need of help, be they members of the Lutheran, Reformed, or Union churches, or any other who have given proofs of their adherence to the principles of the evangelical Church. The means are furnished partly by the income of the permanent funds of the association, partly by donations, endowments, yearly collections, etc. The local societies send to the superior association their annual collections. In every state (and for large countries in every province) there is a chief association, with which the others are connected as auxiliaries. The receipts are divided into three parts: one third is under the absolute control of the society which collects it; one third is sent to the central society, with directions as to the application of it, or is even sent direct to its destination; and the remaining third is placed at the disposal of the central society. The central association consists of twenty-four members, elected by the members of the chief associations; nine of them (including the president, treasurer, and cashier) must be residents at Leipzig, the other fifteen must be non-residents; every three years one third of the members go out of office. This central association represents the whole union, manages the general fund, and, when occasion presents, appoints a committee to inquire into the case of parties applying for assistance, and reports on it to the chief associations. In the general assemblies, which are held in different parts of Germany, the state of the association is discussed, the accounts adjusted, questions of general interest settled, etc. In 1846 there were thirty-nine chief associations, viz. eight in Prussia, two in Saxony, three in Hanover, and in the other states each one, except in Bavaria. The government of Bavaria, on Feb. 10, 1844, forbade the formation of branch associations, as well as the reception of gifts from the society; but this prohibition was annulled Sept. 16, 1849, and representatives of Bavaria appeared at the general assembly of 1851. Austria permitted the establishment of societies by the "Protestantpatent" of April 8, 1851. At the general assembly held at Nuremberg in 1862, two central societies (*Hauptvereine*) of Austria, Vienna and Mediasch, were received, the first embracing the German provinces and Galicia, and the latter the German part of Transylvania. The organs of the association are the *Bote der Evangelischen Vereins d. G. A. V.*, published by Zimmermann and Grossmann, Darmstadt, since 1843, and similar ones for Thuringia and Brandenburg. Numerous occasional sheets, reports, etc., are issued by the association.

The society has not been entirely free from internal troubles. While some of its members have sought to confine its operations within the strict limits of the evangelical confession, others have desired to see it based upon humanitarian principles, and thus to receive even Jews and Roman Catholics into membership. The most important difficulty occurred at the general meeting of 1846, at Berlin, where the delegates refused, by a vote of thirty-nine against thirty-two, to recognise Dr. Rupp as the delegate of Königsberg, on account of his having seceded from the national Church. Great excitement spread throughout Germany, and for a moment endangered even the exist-

ence of the association. The question was settled in the Assembly of Darmstadt in 1847, when it was resolved that the assembly should have the right of deciding upon the credentials of all delegates. The strict Lutherans have generally kept aloof from the association on account of its support of Reformed and Union churches. The means of the association have been steadily increasing. Up to 1841 the receipts amounted to 14,727 thalers. In 1858 the society appropriated 107,666 thalers to 379 communities (224 in Germany and 155 in other countries). From 1843 to 1858 the central and branch associations received legacies and donations amounting to 50,000 thalers. Sweden and the Netherlands (where the first Gustavus-Adolphus Society was instituted in 1853) have joined the German association, and helped to swell its funds. According to the report for the financial year 1863-64, the expenditures amounted to \$195,000, by which 723 poor congregations were supported (400 in Germany, 6 in North America, 10 in Belgium, 27 in France, 7 in Holland, 3 in Italy, 206 in Austria, 43 in Prussian Poland, 4 in Portugal, 4 in Switzerland, and 17 in Turkey). At the general assembly held at Dresden in 1865 it was announced that the society, since its foundation in 1842, had expended in the support of Protestant churches two million thalers, the first million from 1843 to 1858, the second from 1859 to 1864; that since its beginning the society had defrayed, either wholly or partly, the expense for the building of 229 new churches. The receipts for the year 1865-66 were reported at the Assembly of Worms (1867) to amount to 177,226 thalers, a slight decrease, caused by the war of 1866. During the year 1866-67, according to the report made at the general assembly at Halberstadt in 1868, 175,197 thalers were distributed among 783 congregations. The twenty-fourth general assembly of the association was held at Bayreuth in August, 1869. The receipts of the last year were stated to be 194,000 thalers. The number of congregations supported by the society amounted to 904; of these, 12 were in America, 348 in Prussia, 301 in Austria, 29 in France, 8 in Belgium, 60 in Rumania, 16 in Holland, 4 in Italy, 5 in Russia, 6 in Switzerland, and 1 in Spain. The total amount expended by the society from its beginning to the close of the financial year 1867-68 in supporting new and poor Protestant congregations amounts to 2,325,879 thalers. Aside from its external efficiency, the society has also been beneficial to its own members by furnishing a common centre of Christian activity for the national Protestant Church of Germany. Its appropriations are made as much as possible in a form to give permanent rather than temporary relief to weak churches. See Zimmermann, *D. Gustavus-Adolphus Verein* (Darmstadt, 1857); *Allgem. Real-Encykl.* vii, 67.

**Guthlac, Sr.**, a Mercian saint, who died in 714. His early life was a wicked one, he even being the leader of a band of robbers; but, abandoning his evil ways at the age of 24, he retired to the monastery of Repton, where he learned to read, and studied the lives of the hermit fathers. He then took up his abode on the desolate isle of Croyland, where, we are told, his temptations and trials paralleled those of St. Anthony, but acquired for him extraordinary favors and consolations from God. He died at the age of 47, and his sanctity, according to the legend, wrought posthumous miracles, which brought about the erection of the abbey of Croyland, famed for its libraries and seminaries and the story of Turketel (q. v.), abbot thereof in 948. See *Life of Guthlac*, by Felix of Croyland, in Mabilon's *Acta Sanctor. Ord. St. Benedict*, iii, 263-284.—Butler, *Lives*, etc., April 11; Janieson, *Legends of the Monastic Ord.*, p. 63-4; Wright, *Biog. Brit. Lit.* (Anglo-Saxon Period), p. 246-9. (J. W. M.)

**Guthrie, WILLIAM**, an eminent clergyman of the Presbyterian Church of Scotland, was born at Pitfor-

thy in 1620. He studied at the University of St. Andrew's, and in 1644 became minister of the parish church of Finwick. He died in 1655. His principal work is *The Christian's Great Interest*, with Introductory Essay by T. Chalmers, D.D., and Life (Glasgow, 1850, 7th ed. 12mo). This work has been translated into several languages. See W. Dunlap, *Memoirs of W. Guthrie*; Darling, *Cyclop. Bibliographica*, i, 1357; Howie, *Scots Worthies*, p. 434.

**Gutter** (גִּטְרָה, *tsinnor'*) occurs in the proposal of David while attacking Jebus, that some one should "get up to the gutter and smite the Jebusites" (2 Sam. v, 8). The Sept. here renders "with the sword" (ἐν παραξήφῳ), and the Vulg. "roof-pipes" (*domatum fistule*). The word only occurs elsewhere in Psa. xlii, 7 (Sept. and Vulg. *cataracts*, English Vers. "water-spouts"). Gesenius supposes it to mean a *water-course*. Dr. Boothroyd gives "secret passage," and in Psa. xlii "water-fall." It seems to refer to some kind of subterraneous passage through which water passed; but whence the water came, whither it went, or the use to which it was applied, cannot be determined, though we know that besiegers often obtained access to besieged places through aqueducts, drains, and subterraneous passages, and we also know that Jerusalem is abundantly furnished with such underground avenues. See JEBUS.

In the account of Jacob's artifice for producing party-colored young among his flock, by placing peeled rods in the drinking-troughs (Gen. xxx, 38, 41), the word for "gutters" in the original is גִּטְרָה, *rach'at*, vessels overflowing with water (as in Exod. ii, 16) for cattle.

**Gützlaff**, KARL FRIEDRICH AUGUST, missionary to China, was born at Stettin, in Pomerania, in 1802, and attracted attention at an early age by his zeal in study, and by the promise of activity which his youth afforded. The way was open for him to posts of usefulness at home, but having resolved to devote himself to missionary labor in foreign parts, he volunteered to go to the Dutch settlements in the East, under the auspices of the Netherlands Missionary Society. Before proceeding thither he came to England, where he met Dr. Morrison, the eminent Chinese scholar and missionary, and received a strong bias towards China as his ultimate field of labor. In 1823 he proceeded to Singapore, and it is said that before he had been there two years he was able to converse fluently in five Eastern languages, and to read and write as many more. In August, 1828, in company with Mr. Toulmin, Gützlaff went to Siam, where he remained more than a year. In 1831 he went to China. Between 1831 and 1834 he made three voyages along the coast, and published an account of his observations. From 1834 to the time of his death he held office under the British government as interpreter and secretary to the minister. An attempt to land in Japan (1837) was unsuccessful. In 1844 he established, conjointly with the American missionary Roberts, two Chinese, and others, a society for the propagation of the Gospel in China, which in 1860 had forty preachers. In 1849 he revisited Europe, and, by his personal exertions, gave a new impulse to missionary effort for China. He returned to China in 1850, and died at Victoria on the 9th of August, 1851. His way of life has been described as follows: "The whole of the early morning was devoted to the religious instruction of successive classes of Chinese who came to his house. From ten till four he was occupied with government duties. After a very brief interval he went out for the rest of the evening, preaching in public places, or teaching from house to house. He also, from time to time, made excursions to different places, accompanied by native teachers. All this toil was voluntary and unremunerated, for, except when he first went out to the East, he was not connected with any missionary society. A few friends in New York and London sent occasional-

ly, we believe, some contributions for purchasing books and medicines, but the work was mainly carried on at his own cost. He was a man of generous, self-denying spirit, in zeal for every good work untiring, and in labor indefatigable. He early inured himself to hardships, and in his devotedness to his work of spreading Christian truth he was regardless of privations and dangers. His medical skill and great learning often opened a way for him where few Europeans could have gained access, and wherever he was known he was beloved by the natives. They used to say sometimes that he must be a descendant of some Chinese family who had emigrated to the isles of the Western Ocean. Whatever may be the permanent results of Gützlaff's labors in the East, it is certain that his efforts for the cause of religion, and of Christian civilization in China, deserve to be held in the grateful remembrance of the Church. He translated the New Testament into the language of the Middle Kingdom. He made himself thoroughly acquainted with the social life of the Chinese, and even introduced himself among their numerous secret societies, concerning the most important of which, the *Triad*, he wrote a memoir, published in the *Journal of the Lond. Asiatic Society* (1849). He never lost an opportunity of disseminating Christianity among the Chinese. Of his visit to China he gave a description in the *Journal of the London Geographical Society*, vol. ix, 1849. The English gave his name to an island situated some seventeen miles from the mouth of the Yang-tsé-Kiang. He wrote, besides the above-mentioned papers, *Observations on the Kingdom of Siam* (in the *Journal of the London Geographical Society*, vol. viii, 1848):—*Journal of three Voyages along the Coast of China, with Notices of Siam, Corea, and the Loo-Choo Islands* (Lond. 1833):—*Sketch of Chinese History, ancient and modern* (Lond. 1834, 2 vols. 8vo):—*China opened, or display of the Topography, Literature, Religion, and Jurisprudence of the Chinese Empire* (Lond. 1838, 2 vols. 8vo):—*The Life of Tao Kwang, the late Emperor of China* (London, 1852, 8vo):—*Hist. of the Chinese Empire* (2 vols. 8vo), which was also published in German. etc.—See Hofer, *Nov. Biog. Générale*, xxii, 922; *Methodist Quarterly Review*, Jan. 1852; *American Quart. Review*, vol. xvii; *Quart. Rev.* (Lond. li, 458); Allibone, *Dictionary of Authors*, i, 751.

**Guy.** See GUIDO.

**Guyon**, JEANNE-MARIE BOUVIER DE LA MOTHE, an eminent French mystic, was born at Montargis April 13, 1648. She was educated in a convent, and in early youth showed signs of great quickness of mind. At seventeen she wished to take the veil, but her parents would not consent. In 1664 she was married to M. Jacques Guyon, a rich *parvenu*, for whom she had no affection. Her marriage was not a happy one, in consequence of the tyranny of her husband and mother-in-law, who, acting under the advice of her confessors, endeavored to withdraw her from the inward prayer and retirement to which, at the age of twenty, she began to addict herself. Vanity and coquetry were her besetting sins, and, to conquer them, she thought it necessary to purify herself by "good works" and bodily mortifications. She read largely in mystical writers, especially Kempis, Francis of Sales, and the life of Madame Chantal, whose self-inflictions she imitated. A Franciscan monk taught her to "look within instead of without" for peace, and to "seek God in her heart." Her doubts and fears fled: "I was on a sudden so altered that I was hardly to be known either by myself or by others." Madame Guyon dated this conversion from July 22, 1668. Her domestic troubles continued, but she could now bear them patiently. In 1676 her husband died, leaving her with three young children. Her religious feelings now increased in intensity. She believed that she had certain interior communications of the divine will,

but was often deeply distressed about the state of her soul. In 1672, on the anniversary of her conversion, she made "a marriage contract" with Christ, and signed it in her own blood! She formed an intimate acquaintance with Lacombe, a Barnabite mystic, who, from being her teacher, became her follower. In 1681, on St. Magdalene's Day, on occasion of a mass, she says, "My soul was perfectly delivered from all its pains." She soon after went to Paris, was exhorted in what she considered a miraculous manner to devote herself to the service of the Church, and went to Geneva to "convert" Protestants there, but, finding no success or sympathy, she went to Gex in 1681, to an establishment founded for the reception of converted Protestants. Her family then urged her to resign the guardianship of her children, which she did, giving up all her fortune to them, retaining only sufficient for her subsistence. Soon after, D'Arantion, bishop of Geneva, wished her to bestow this pittance upon an establishment, of which she was to be made prioress. She declined, and left Gex for the Ursuline convent at Thonon, where Lacombe became her "father confessor." Here she had a short period of unmingled enjoyment in dreams and reveries of bliss. Both Lacombe and Madame Guyon soon, however, began to gain purer ideas of the Christian life, and of the true nature of faith; but the errors of Romanism and mysticism were too closely incorporated with her mental habits to be got rid of. She preached to the Ursulines at Thonon not only "salvation by faith," but "indifference to life, to heaven, to hell, in the entire union of the soul with God." She returned to Gex, and there, in prayer at night, it was revealed to her that she was "the spiritual mother of Lacombe;" her relations to him became more intimate than ever, and gave occasion afterwards to great but groundless scandal. Lacombe seems to have been a weak man: he finally died in a madhouse. The bishop of Geneva became alarmed, and sought to be rid of his dangerous protégés. Madame Guyon now wandered for some years (1683-1686), visiting Turin, Grenoble, and other places. At about this time also she began to write. Her first work (begun at Gex) was *Les Torrents Spirituels* (published in her *Opuscules*, Cologne, 1704, 12mo). The "torrents" are souls tending to lose themselves in the ocean of God. The work exhibits the writer as a "devout enthusiast, but principally demonstrates her unfitness as a pattern or teacher of experimental godliness." At Grenoble she found herself "suddenly invested," as she expresses herself, "with the apostolic state," and able to discern the condition of those that spake with her, so that, one sending another, she was occupied from six in the morning till eight at night speaking of divine things. "There came," she says, "great numbers from all parts, far and near, friars, priests, men of all sorts, young women, married women, and widows; they all came one after the other, and God gave me that which satisfied them in a wonderful manner, without my thinking or caring at all about it. Nothing was hidden from me of their inward state and condition. . . . I perceived and felt that what I spake came from the fountain-head, and that I was only the instrument of him who made me speak." Her exposition of *Solomon's Song* and of the *Apocalypse* appeared in 1684 at Grenoble. Her notes were written under a quasi inspiration: she had dreams, visions, and marvellous manifestations. "Before I wrote I knew nothing of what I was going to write, and after I had written I remembered nothing of what I had penned," she says, in the singular autobiography which she has left of herself. Another of her works of this period was *Moyen court et très facile pour l'oraison*, which was published, and rapidly ran through five or six editions. The "Quietism" taught in these writings made her many enemies among the priests. In July, 1686, accompanied by Lacombe, she returned to Paris, where persecution and tribulation awaited the wanderers.

The "Quietism" of Molinos was condemned by the pope in 1687, and there was no peace or rest for the mystics or their abettors in Paris. In 1688 Madame Guyon was shut up (chiefly through the instigation of her brother, the Barnabite Lamothe, who bitterly hated her doctrines) in the convent of the Visitation at Paris. In 1689 Madame de Maintenon procured her release, and she soon gathered round her a circle of admiring and devoted friends, among whom was Fénelon, who formed an affection for her which was "stronger than persecution or death." A storm soon arose: Harlay, archbishop of Paris, condemned her writings, and other bishops followed his example. The outcry became general. Madame Guyon demanded of the king, through Madame de Maintenon, a dogmatical examination of her writings. A commission was appointed, consisting of Bossuet, Fénelon, the abbé Tronson, and the bishop of Chalons. At the end of six months thirty articles were drawn up by Bossuet, sufficient, as he deemed, to prevent the mischief likely to arise from Quietism, which were signed by Madame Guyon, who submitted at the same time to the censure which Bossuet had passed on her writings in the preceding April. Notwithstanding this submission, she was subsequently involved in the persecutions of Fénelon, the archbishop of Cambrai, and in 1695 was imprisoned in the castle of Vincennes, and thence removed to the Bastille, enduring the harshest treatment, and subjected to repeated examinations. In 1700 she was released, when she retired to Blois, to the house of her daughter, where she passed the remainder of her days in quiet and repose, in acts of love and charity, and in writing books. No reproach of her enemies and persecutors ever escaped her lips. All the neighborhood loved her; and her bitterest foes admitted that all the charges ever brought against her moral character had been false and scandalous. Her last will begins as follows: "I protest that I die in the faith of the Catholic, apostolical, Roman Church; having no other doctrines than hers; believing all that she believes, and condemning, without restriction, all that she condemns." She died June 9, 1717.

John Wesley sums up, in his usual clear way, the character of Madame Guyon's religious experience as follows: "The grand source of all her mistakes was this—the not being guided by the written word. She did not take the Scriptures for the rule of her actions; at most, they were but a secondary rule. Inward impressions, which she called inspirations, were her primary rule. The written word was not a lantern to her feet, a light in all her paths. No; she followed another light—the outward light of her confessors, and the inward light of her own spirit. It is true, she wrote many volumes upon the Scriptures. But she read them not to learn, but to teach; and therein was hurried on by the rapid stream of her overflowing imagination. Hence arose that capital mistake which runs through all her writings, that God never does, never can purify a soul but by inward and outward suffering. Utterly false! Never was there a more purified soul than the apostle John. And which of the apostles suffered less—yea, of all the primitive Christians? Therefore, all that she says on this head, of 'darkness, desertion, and privation,' and the like, is fundamentally wrong. This unscriptural notion led her into the unscriptural practice of bringing suffering upon herself—by bodily austerities; by giving away her estate to ungodly, unthankful relations; by not justifying herself, than which nothing could be more unjust or uncharitable; and by that unaccountable whim (the source of numberless sufferings which did not end but with her life), the going to Geneva to convert the heretics to the Catholic faith. And yet with all this dross, how much pure gold is mixed! So did God wink at involuntary ignorance. What a depth of religion did she enjoy! of the mind that was in Christ Jesus! What heights of righteousness, and peace,

and joy in the Holy Ghost! How few such instances do we find of exalted love to God and our neighbor; of genuine humility; of invincible meekness and unbounded resignation! So that, upon the whole, I know not whether we may not search many centuries to find another woman who was such a pattern of true holiness" (Wesley, *Works*, vii, 562, 563). See also Curry in *Methodist Quarterly Review*, July, 1848, which contains a discriminating estimate of Uplham's *Life and Religious Opinions of Madame Guyon* (N. Y. 1848-1850, 2 vols. 12mo). Comp. *Christian Review*, iii, 449; xvi, 51; *American Biblical Repository*, iv, 608 (third series); *New Englander*, vi, 165.

Madame Guyon's principal works are, *Moyen court et très facile pour l'oraison* (Lyons, 1688 and 1690; often reprinted; translated into English, London, 1703, 12mo);—*Le Cantique des Cantiques interprété selon le sens mystique* (Grenoble, 1685; Lyon, 1688, 8vo);—*Les torrents spirituels* (first published in the *Opusculs spirituels de Mme. Guyon* (Cologne, 1704, 12mo);—*Les livres de l'Ancien et du Nouveau Testament, traduits en français avec des explications et des réflexions qui regardent la vie intérieure* (Cologne, 1713-1715, 20 vols. 8vo);—*Recueil de Poesies spirituelles* (Amst. 1689, 5 vols. 8vo);—*Cantiques spirituels, ou cult. mes sur l'amour divin* (5 vols.);—*Discours chrétiens et spirituels sur divers sujets qui regardent la vie intérieure* (Cologne, 1716; Paris, 1790, 2 vols. 8vo);—*Lettres chrétiennes et spirituelles sur divers sujets qui regardent la vie intérieure, ou l'esprit du vrai christianisme* (Cologne, 1717, 4 vols. 8vo). She left MSS. containing her *Justifications*, and a number of mystic verses. The *Vie de Mme. Guyon, écrite par elle-même* (autobiography), which was published after her death, is perhaps not wholly her own work. It is generally thought to have been compiled by Poiret from documents furnished by her, first to the official of the archbishop of Paris, Chéron, and afterwards to the bishop of Meaux, at the time of the conferences of Issy. The book appeared first at Cologne in 1720 (3 vols. 12mo). Poiret also published her whole works (Amsterdam, 1713-22, 39 vols. 8vo). See, besides the works above cited, Herzog, *Real-Encyclopædie*, v, 426 sq.; Hoefer, *Nouv. Biog. Générale*, xxii, 934 sq.; *English Cyclopædia*.

**Guyot**, HENRI DANIEL, a Belgian philanthropist, was born at Trois-Fontaines in 1753. He studied at Maestricht and in the University of Franeker, then became pastor of the Walloon Church, and afterwards professor of theology at Gröningen. After filling the office for 28 years, he was deposed by the king of Holland, Louis Napoleon Bonaparte, on some unfounded accusation. He subsequently devoted all his time to a deaf and dumb institution which he had founded in 1790. The first idea of this institution had entered his mind on witnessing a lesson of the abbé de l'Épée, at Paris, in 1785. By his process Guyot succeeded in making a number of his pupils talk. After the restoration of the Belgian kingdom, king William protected the institution. Guyot died Jan. 10, 1828. See Lulofs, *Gedenkrede op H. D. Guyot* (Gröningen, 1828, 8vo); Hoefer, *Nouv. Biog. Générale*, xxii, 950.

**Guysse**, JOHN, D. D., an English Independent minister, was born at Hertford in 1680. He entered the ministry at the age of twenty as assistant to Mr. Hallowell, who soon after dying, Mr. Guysse was chosen to succeed him as pastor of the church at Hertford. In 1732 he accepted an invitation to remove to London as successor to the Rev. Matthew Clarke. Here his sphere of usefulness was enlarged, and his worth became widely known as a scholar, Christian, and divine. He published many sermons, but his great work is his *Practical Expositor, or Paraphrase on the New Testament* (Lond. 1739-52, 3 vols. 4to), which has been several times reprinted. He died November 22, 1761. Among his other writings are *Jesus Christ God-Man* (Lond. 1719, 8vo);—*Treatise on the Holy Spirit* (new

ed. Lond. 1840, 8vo);—*Practical Sermons* (Lond., 1756, 8vo);—*The Scripture Notion of Preaching Christ* (Lond. 1730, 8vo);—*Youth's Monitor* (Lond. 1759, 4th ed.). See Bogue and Bennet, *Hist. of Dissenters*, ii, 618; Allibone, *Dict. of Authors*, i, 751; Darling, *Cyclop. Bibl.* i, 1357.

**Gymnasium** (γυμνάσιον, A. V. "place of exercise"), a large unroofed building for the purpose of athletic exercises, consisting usually of different compartments, or a set of separate buildings conjoined, each of which was set apart to some special sport, as the *Sphaeristerion* for playing at ball, the *Palastra* for wrestling and the exercises of the pancratium, etc. (Smith, *Dict. of Class. Antiquities*, s. v.). This was almost exclusively a Greek institution, and there was hardly a Greek town of any size that had not its gymnasium. To the Jews it was unknown until the Hellenizing party introduced it in the age of the Maccabees (1 Macc. i, 14). Jason, the Hellenizing high-priest, caused one to be erected at Jerusalem (2 Macc. iv, 12 sq.). This innovation was viewed with much displeasure by the strict party among the Jews. Whether Herod the Great, when he introduced the theatre and amphitheatre, restored the gymnasium, does not appear, but the probability is that he did (Josephus, *Ant.* xv, 8, 1; compare *War*, i, 21, 11).—Kitto, s. v. See GAMES.

**Gymnosophists** (Γυμνοσοφισταί), an ancient sect of Hindoo philosophers, who distinguished themselves outwardly from others by discarding all clothing. They were believers in metempsychosis, and often sought to facilitate their transmigration by committing suicide—generally burning themselves alive. They placed the height of wisdom in contemplation and ascetic practices to mortify carnal instincts. They inculcated utter disregard of temporal advantages. This sect furnished for a long time counsellors to the kings, and stood in high consideration. They were divided into two classes, the Brachmans and Garmans, or Samaneans. Calanos, in the time of Alexander the Great, belonged to this sect. See FAKIRS, as also Cicero, *Tusc. Quest.* v, 27; Plutarch, *l'it. Alexand.* c. 65; Arrian, *Indica*, xii; Quintus Curtius, viii, cap. iv; Strabo, § 712-719.

**Gypsies, Gypseys, or Gipsies** (a corrupt form of *Egyptians*), the English name of a singular vagabond race of people, with a language and laws or customs peculiar to themselves, found throughout the whole of Europe, and in parts of Asia, Africa, and America, and everywhere noted for their aversion to the habits of settled life, and for the practice of deceptive tricks and thieving. They bear different names in different countries. In France they are called *Bohémiens* (because they first came thither from Bohemia, or from böem, an old French word meaning sorcerer, because of their practising on the credulity of the vulgar); in Spain, *Gitanos* or *Zincali*; in Germany, *Zigeuner*; in Italy, *Zingari*; in Holland, *Heddenen* (heathens); in Sweden and Denmark, *Tartars*; in Selavie countries, *Tsigani*; in Hungary, *Czigánok*; in Turkey, *Tshengender*; in Persia, *Sisech*; in Arabia, *Harami*, etc. Various nicknames are also applied to them, as *Cagoux* and *Gueux* in France; *Zieh-Gauner* (wandering rogues) in Germany, and *Tinklers* in Scotland. They call themselves *Rom* (men or husbands; comp. Coptic *Rem*), *Calo* (black), or *Sinte* (from Ind; hence *Zincali*, or black men from Ind).

*Origin and History.*—In the absence of any historical records of their migrations, their original country and the causes which drove them thence to scatter so widely over the earth have been the subject of speculation among the learned, and various theories have been proposed as solutions of the mystery of their origin and history. Some writers have connected them with the *Σιγύρραι*, mentioned by Herodotus (v, 9) as a people of Median extraction dwelling beyond the Lower Danube, and the *Σιγύρροι*, described by Strabo (§ 520) as living near Mount Caucasus, and

practising Persian customs. Others have referred them variously to Tartary, Nubia, Mesopotamia, Assyria, Ethiopia, Morocco, etc.; but the account which the Gypsies, at their appearance in Western Europe, gave of themselves, claimed "Little Egypt" as the original home of the race, whence they were driven in consequence of the Moslem conquests. According to one version of the story, pope Martin V imposed on them, as a penance for their renunciation of the true faith, a life of wandering and an inhibition of the use of a bed for seven years; according to another version, God himself had doomed them to this vagabond life because their forefathers had refused hospitality to Joseph and Mary when they took refuge in Egypt with the infant Saviour—"a notion which has, curiously enough, been partly revived in our own day by Roberts, with this difference only, that he proves them, from the prophecies of Isaiah, Jeremiah, and Ezekiel, to be the descendants of the ancient Egyptians, and their wanderings to be the predicted punishment of the various iniquities of their forefathers" (Chambers). We owe to the once-prevalent belief that they were from Egypt the origin of the English term Gypsies and the Spanish Gitanos. The results of the investigations made within the last hundred years in the fields of comparative philology and ethnology prove beyond reasonable grounds of doubt that the theories above named are erroneous, and that we must look to India, "the nursing home of nations" (*tellus gentium nutrix*), as also the fatherland of the Gypsies. It is now the almost, if not entirely universally received opinion that they came to Europe from Hindûstan, either impelled by the ravages of Tamerlane, or, more probably, at an earlier date, in quest of fresh fields for the enjoyment of their vagabond life, and the exercise of their propensity for theft and deception. This view of their origin rests upon their physiological affinities with Asiatic types of men, as well as on the striking resemblances between the Gypsy language and Hindûstane, and the similarity of their habits and modes of life to those of many roving tribes of India, especially of the Nuts or Bazegurs, who are styled the Gypsies of India, and are counterparts of those in Europe, both in other respects and also in having no peculiar religion, since they have never adopted the worship of Brahma. The Nuts are thought by some to be an aboriginal race, prior even to the Hindûs. Another theory, which seeks to reconcile the Gypsy statement of an Egyptian origin with the clear evidences of a Hindû one, would find their ancestors in the mixed multitude that went out from Egypt with Moses (see Exod. xii, 38; Numb. xi, 4; Neh. xiii, 3), and who, according to this view, passed onward to India and settled there, and from their descendants, subsequently, bands of Gypsies migrated to Europe, probably at different times and by different routes (see Simson).

The earliest supposed reference to Gypsies in European literature is contained in a German paraphrase of Genesis, written about A.D. 1122 by an Austrian monk, in which mention is made of "Ismaelites and braziers, who go peddling through the wide world, having neither house nor home, cheating people with their tricks, and deceiving mankind, but not openly." In the early part of the 15th century they had established themselves in Hungary and Wallachia, and began to spread over Western Europe in considerable numbers; one of their bands, which appeared at Basle in 1422, numbered, according to the old Swiss historian Stumpf, 14,000. They were under a kind of feudal leadership of so-called dukes, knights, etc., and, telling the story of their expulsion from Egypt and penal pilgrimage, sought to excite sympathy. At first they were well received as Christian pilgrims performing their allotted penance; but the deception was soon found out, and their thefts and impositions on the credulity of the people soon caused them to be regard-

ed as nuisances and pests to society. Very stringent, even barbarously cruel laws were enacted, and in most places enforced against them, without, however, extirpating them, or seriously diminishing their numbers. After the middle of the 18th century more humane views in regard to them obtained, and measures were employed to improve their social and moral condition with some degree of success. A society for their improvement was formed at Southampton, England, in 1832, by the Rev. George Crabbe, and a school has been established at Farnham, in Dorsetshire, "in which Gypsy children are instructed in the knowledge of Scripture, where they are at the same time trained for service and taught various trades." The number of them who adopt more settled modes of life is increasing, according to Simson, who further states that Gypsies have been found occupying honorable and responsible positions in public as well as private life, and reckons the celebrated John Bunyan among Gypsies. Grellman estimated the number of Gypsies in Europe at 700,000 to 800,000. Simson (p. 493) considers that estimate far too low, and thinks there are at least 4,000,000 in Europe and America. The Gypsies, as a race, have no religion, and, indeed, are usually described as destitute of religious sentiments or ideas, their language containing no word signifying God, soul, or immortality. But the sacrifice of horses, which, Simson asserts, formerly constituted a part of the Gypsy marriage ceremonies, and is still a necessary part of a valid divorce ceremony, not only involves a religious idea, but presents a coincidence with Hindû mythological conceptions. See GANGES. They have, for policy's sake, often conformed, so far as necessary, to the religion of the country in which they roved, but Velasquez says sarcastically, "The Gypsies' church was built of lard, and the dogs ate it." In regard to their morals, little that is commendatory can be said. They are described as squalid, thievish, treacherous, and revengeful, and their most strongly-marked virtue, viz. a strict regard for the corporeal chastity (*acha*) of their women, is sadly disfigured by the permission allowed them to employ the grossest licentiousness in manner merely in order to allure others to vice for the sake of gain as procuresses. Some of them show great aptitude for music, and the choirs of Moscow owe their chief excellence to them, and among the Hungarian Gypsies are found the most celebrated violinists of that country. They furnish a field for the display of the religious activities of this age, full of difficulties, yet provocative of effort, and Christians should zealously labor and pray for the conversion of this race, assured that its evangelization and consequent moral and material elevation will be one of the grandest of the victories of the Gospel over degradation and sin promised to the Church of Christ in its conflicts here.

*Language and Version.*—The Gypsies call their language Rommany, and modern philological researches prove that it belongs to the Sanscrit family. It has doubtless received additions and modifications from the languages of the countries in which the race has sojourned, yet it is still so nearly the same with modern Hindûstane that a Gypsy can readily understand a person speaking in that dialect—a fact which tends to verify the statements made as to the zealous care with which the Gypsies have cherished their ancestral tongue. Mr. George Borrow, who devoted himself to the study of their language and life, translated the whole of the New Testament into the Spanish dialect of Rommany, and in 1838 printed at Madrid 500 copies of the Gospel of Luke, in the translation of which, as far as the eighth chapter, he had been assisted by Gypsies. This version was found to be perfectly intelligible to the Gitanos, and copies were eagerly sought after by them, not, Mr. Borrow thinks, because of the truths it contained, but from a desire to see and read their broken jargon in print. He remarks: "The

only words of assent I ever obtained, and that rather of a negative kind, were the following from the mouth of a woman: 'Brother, you tell us strange things, though perhaps you do not lie; a month since I would sooner have believed these tales than that this day I should see one who could write Rommany.'” The following specimen of the version is from Bagster's *Bible of every Land*, p. 111—Luke vi, 27—29: “27 Tamí penelo á sangue sos lo Jneulais: Camelad á jires daschmanuces, querelad mistos á junos sos camelan sangue choro. 28 Majarad á junos sos zermánelan á sangue, y mangelad á Debél por junos sos araqerelan sangue choro! 29 Y á ó sos curarè tuece andrè yeque mejilla, dinle tambien a vare. Y á ó sos nicobelàre tuece o uehardo, na ó impidas lliguerar tambien a furi.” For further information on the Gypsies and their language, see the following works: Peyssonel, *Observations historiques et géographiques sur les peuples barbares qui ont habité les bords du Danube et du Pont-Euxin* (Paris, 1765, 4to); Pray, *Annales regum Hungarie ad annum Chr. MDLXIV deducti* (Vienna, 1764—70, 5 pts. fol.); Grellman, *Historische Versuch über die Zigeuner* (2d ed. Göttingen, 1787; English translation by Roper, Lond. 1787, 4to); Bischoff, *Deutsch-Zigeunerisches Wörterbuch* (Hmenau, 1827); Kogalmichan, *Esquisse sur l'histoire, les Mœurs et la langue des Cigains* (Berlin, 1837); Predari, *Origine e vicende dei Zingari* (Milan, 1841); Pott, *Die Zigeuner in Europa und Asien* (Halle, 1844—45, 2 vols. 8vo)—“the most wonderfully thorough and exhaustive book ever written on the subject of the Gypsies and their language”; Von Heister, *Ethnographie und geschichtliche Notizen über die Zigeuner* (Königsberg, 1842); Bataillard, *De l'émigration et de la dispersion des Bohémiens en Europe* (in 5th vol. of the *Bibliothèque de l'école de Chartres*, 1844); Böhtlingk, *Die Sprache der Zigeuner in Russland* (St. Petersburg, 1852); Borrow, *The Zinca'i* (London and N. York); Bagster's *Bible of every Land* (Lond. u. d.), p. 111—13; Simson, *A History of the Gipsies* (N. York and Lond. 1866, 12mo); Roberts, *Gypsies, their Origin, Continuance, etc.* (Lond. 8vo); Brand, *Popular Antiquities* (Lond. 1842, 3 vols. post 8vo), iii, 45—53; Thos. Browne, *Works* (Lond. 1852, Behn's ed.), ii, 204—6; Chambers, *Cyclopædia*, s. v.; *New American Cyclopædia*, viii, 612 sq. (J. W. M.)

**Gyrovagi, wandering monks.** The monasticism of Occidental Europe at an early period took the form of common life in monasteries. Ascetics and hermits were gradually obliged to connect themselves with their brethren settled in convents. Many of them, however, unwilling to submit to conventional discipline, travelled from place to place, from convent to convent, from abbey to abbey, being entertained a few days at each place, in consequence of the general rule of hospitality in vigor in all convents, but evading all propositions tending to render their stay a permanent one. When they had gone over their whole circuit they began it anew, and from this habit received the name of *Gyrovagi*. Isidore of Seville gave this name also to the *Circumcelliones* (q. v.). These wandering monks were the pests of the convents, introducing gossip and vice wherever they went. Vainly did Augustine, in *De Opere Monachorum*, c. 28, and Cassian, *Collatio* 18, declare themselves strongly against these vagrant monks. Benedict wrote his rules expressly (cap. i) in view of the Sarabaites and Gyrovagi, whom he seems to have been the first to mention by that name in writing. Columbanus and Isidore of Seville (*De eccl. s. officii*, lib. ii, c. 15), in the 7th century, also censured the degeneracy of monachism; but it required the rule of Benedict, in the 8th century, and the efforts of Charlemagne, Louis the Pious, and Benedict of Aniane, to bind the Western monks firmly to regular conventional life, thus putting an end to the race of homeless, wandering monks. The later mendicant orders are, to a certain extent; a reproduction of them. The name *Gyrovagi* has also been applied to unsettled, travelling members of the Roman

clergy. See Martone, *Comment. in Reg. S. P. Benedicti*, p. 53 sq. (Paris, 1690); Herzog, *Real-Encycl.* v, 433.

**Elliott, CHARLES, D. D.**,\* an eminent scholar and minister of the Methodist Episcopal Church, was born May 16, 1792, at Glenconway, County Donegal, Ireland. His early education was obtained in the ordinary schools of the neighborhood, but he soon went beyond their range in private study. He was brought to a religious life under the ministry of the Rev. E. Hazleton in 1811, and soon after turned his studies towards preparation for the ministry. He was licensed about 1813 as a local preacher, and taught school until 1816, when, with his widowed mother and her eight other children, he sailed for America. Settling in Western Pennsylvania, he devoted himself to farm labor and teaching school, preaching meanwhile almost every Sunday. In 1818 he was received on trial into the Ohio Conference, and was appointed first to Zanesville Circuit; then, in 1819, to Duck Creek Circuit; in 1820 he was ordained deacon, and appointed to Erie Circuit, and in 1821 to Mahoning Circuit; during part of the next year he was missionary to the Wyandotte Indians. From 1823 to 1827 he was presiding elder of the Ohio district; 1827—31, professor of languages in Madison College, Pa.; 1831—2, pastor at Pittsburg; 1833—6, editor of the *Pittsburg Conference Journal*; 1836—48, editor of the *Western Christian Advocate*. The next four years were spent in the regular work of the ministry; and from 1852 to 1856 he was again editor of the *Western Christian Advocate*. In 1857 he became professor, and in 1858 president of the Iowa Wesleyan University; and also edited the *Central Christian Advocate*, published at St. Louis from 1860 to 1864. He was nine times a delegate to the General Conference. After a long career of arduous and successful labor, he died at Mount Pleasant, Iowa, Jan. 3, 1869. “In every department of labor Dr. Elliott was an untiring worker; work was his element. Naturally blessed with a vigorous constitution and a cheerful flow of spirits, he never felt labor a burden. In his busiest hours he was light of heart, and often playful as a child. Mere elegance was never his study, either as to mind or manners; but, while the learned found in him a master and the child a companion, the most fastidious felt at home with him as a gentleman. To know him was to love him.” His scholarship was not only varied, but accurate, and in knowledge of the history and theology of the Roman Catholic Church he was not exceeded by any theologian of his time. The marvel is that, amid his incessant labors as preacher, editor, etc., he found time for so much study and authorship. His writings include *An Essay on the Subjects and Modes of Esqutism* (1834, 12mo);—*An Essay on the Value of the Soul* (1835, 12mo);—*Indian Reminiscences, principally of the Wyandotte Nation* (1835, 16mo);—*Debucation of Roman Catholicism* (N. Y. 1841, 2 vols. 8vo; London, 1851, royal 8vo);—*Life of Bishop Roberts* (1844, 12mo);—*The Sinfulness of American Slavery* (1850, 2 vols. 12mo);—*The Great Secession* (a history of the division of the Methodist Episcopal Church in 1844 on account of slavery; N. Y. 1852, royal 8vo);—*The Bible and Slavery* (1857, 12mo);—*South-western Methodism, a History of the Methodist Episcopal Church in Missouri from 1844 to 1864* (1868, 12mo). He also left ready for the press an elaborate work on *Political Romanism*, which, it is to be hoped, will be published. The *Delineation of Roman Catholicism* is unrivalled in English literature as a storehouse of facts and arguments; it is drawn from original sources, and is worked out with great care and accuracy. The English edition is provided with a copious index.—*Sketch* by the Rev. L. M. Vernon; *Irish Evangelist*, April, 1869.

\* The pages in which this article would be in place, alphabetically, were stereotyped before the death of Dr. Elliott.
